 (Do not check if a smaller reporting company)

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Amount to be registered(1)	Proposed maximum offering price per share	Proposed maximum aggregate offering price	Amount of registration fee(3)
Common Stock, par value \$0.001 per share	1,500,000 shares (2)	5.46 (3)	\$8,190,000 (3)	\$321.87
Common Stock, par value \$0.001 per share(1)	4,058,500 shares (4)(5)	\$1.55 (4)	\$6,290,675 (4)	\$673.12 (5)
Common Stock, par value \$0.001 per share(2)	1,344,000 shares (4)(5)	\$2.83 (4)	\$3,803,520 (4)	\$406.99 (5)
Total	6,902,500 shares			

- (1) This Registration Statement also covers such indeterminable additional number of shares as may be issuable under the plans by reason of any adjustments in the number of shares to prevent dilution from any future stock splits, stock dividends and similar transactions. This Registration Statement covers any such additional shares in accordance with Rule 416(a).
- (2) On October 24, 2007 the Registrant's Board of Directors resolved to increase by 1,500,000 shares the number of shares of the Registrant's common stock available for issuance pursuant to the Registrant's Amended and Restated 2004 Stock Plan. A Registration Statement on Form S-8 with respect to 4,000,000 shares of the Registrant's common stock under the original 2004 Stock Plan was previously filed (Commission File No. 333-140182). The Amended and Restated 2004 Stock Plan was approved by the Registrant's stockholders on December 4, 2007.
- (3) Estimated solely for the purposes of calculating the registration fee pursuant to Rule 457(c) and Rule 457(h)(1) under the Securities Act of 1933, as amended, and based on the average of the high and low sales prices of the Registrant's common stock reported on the American Stock Exchange on June 26, 2008.
- (4) With respect to 4,058,500 shares of common stock to be offered under the plans described above for which the offering price is known, the registration fee was determined in accordance with Rule 457(h). With respect to the remaining 1,344,000 shares of common stock that are issuable under the 2004 Stock Plan for which the offering price is not known, the proposed maximum aggregate offering price for these shares were estimated pursuant to Rule 457(c) and pursuant to Rule 457(h)(1) of the Securities Act based on the average high and low sales prices of the Registrant's common stock reported on the American Stock Exchange on January 17, 2007.
- (5) Pursuant to Rule 429, this table includes 5,402,500 shares of common stock previously registered on the Registrant's Registration Statement on Form S-8 (Commission File No. 333-140182). The filing fee of \$1,080.11 was previously paid in connection with the registration of such shares.

Pursuant to Rule 429 under the Securities Act of 1933, as amended, the reoffer prospectus included in this Registration Statement is a combined reoffer prospectus relating also to Registration Statement on Form S-8 (Commission File No. 333-140182). This Registration Statement, upon effectiveness, also constitutes Post-Effective Amendment No. 1 to Registration Statement No. 333-140182.

EXPLANATORY NOTE

This Registration Statement on Form S-8 is being filed by Evolution Petroleum Corporation (formerly named Natural Gas Systems, Inc.) (the "Registrant" or the "Company") for the purpose of registering 1,500,000 additional shares of the Company's common stock, \$0.001 par value per share relating to the Company's Amended and Restated 2004 Stock Plan. Pursuant to General Instruction E to Form S-8 under the Securities Act of 1933, as amended (the "Securities Act"), this Registration Statement registers additional securities of the same class as those registered under the currently effective Registration Statement on Form S-8 (Registration Nos. 333-140182) relating to the registration of 5,402,500 shares of the Company's common stock \$0.001 par value issuable under the Company's 2004 Stock Plan, the 2003 Stock Option Plan, Revocable Warrant Agreement and Warrant Agreement, and the contents of such Registration Statement, including any amendments thereto or filings incorporated therein, are incorporated herein by reference.

The Company has prepared this Registration Statement in accordance with the requirements of Form S-8 under the Securities Act, to register shares of its common stock, \$0.001 par value per share. Pursuant to General Instruction E to Form S-8 and Rule 429 of the Securities Act, this Registration Statement also includes a reoffer prospectus. The reoffer prospectus may be utilized for reofferings and resales by certain executive officers and directors listed in the re-offer prospectus who may be deemed "affiliates" of the Company on a continuous or a delayed basis in the future of up to 4,118,500 shares of common stock. These shares constitute "control securities" or "restricted securities" which have been issued prior to or issuable after the filing of this Registration Statement. The reoffer prospectus does not contain all of the information included in the Registration Statement, certain items of which are contained in schedules and exhibits to the Registration Statement, as permitted by the rules and regulations of the Securities and Exchange Commission (the "Commission"). Statements contained in this reoffer prospectus as to the contents of any agreement, instrument or other document referred to are not necessarily complete. With respect to each such agreement, instrument or other document filed as an exhibit to the Registration Statement, we refer you to the exhibit for a more complete description of the matter involved, and each such statement shall be deemed qualified in its entirety by this reference.

PART I

INFORMATION REQUIRED IN THE SECTION 10(a) PROSPECTUS

As permitted by the rules and regulations of the Commission, this Registration Statement omits certain information specified in Part I of Form S-8. The documents containing the information specified in Part I of this Registration Statement will be sent or given to eligible employees, directors or consultants as specified in Rule 428(b)(1) promulgated under the Securities Act. Such documents are not being filed with the Commission either as part of this Registration Statement or as prospectuses or prospectus supplements pursuant to Rule 424 promulgated under the Securities Act. These documents and the documents incorporated by reference in this Registration Statement pursuant to Item 3 of Part II of this Registration Statement, taken together, constitute a prospectus that meets the requirements of Section 10(a) of the Securities Act.

Reoffer Prospectus

4,187,891 Shares

EVOLUTION PETROLEUM CORPORATION

Common Stock

This reoffer prospectus relates offers and sales by certain of our executive officers and directors (also called Selling Shareholders) who may be deemed "affiliates" of the Company of our common stock that have or may be acquired by such persons upon the exercise of stock options, the vesting of restricted stocks or the exercise of previously granted warrants. This prospectus covers 88,141 shares of our currently outstanding shares of common stock that are owned by the Selling Stockholders, up to 3,081,000 shares issuable upon the exercise of currently outstanding options and up to 1,037,500 shares of our common stock issuable upon the exercise of outstanding common stock purchase warrants held by some of our warrant holders.

For a list of the Selling Stockholders, please see "Selling Stockholders." We are not selling any shares of common stock in this offering and therefore will not receive any proceeds from this offering. We will, however, receive the exercise price of the options or warrants if and when those options or warrants are exercised by the Selling Stockholders. We will pay the expenses of registering these shares.

Our common stock is traded under the symbol "EPM" on the American Stock Exchange. The closing sale price for our common stock on July 3, 2008 was \$5.95 per share.

The shares included in this prospectus may be offered and resold directly by the Selling Stockholders in the open market at prevailing prices or in individually negotiated transactions, through agents designated from time to time or through underwriters or dealers. We will not control or determine the price at which a Selling Stockholder decides to sell its shares. Brokers or dealers effecting transactions in these shares should confirm that the shares are registered under applicable state law or that an exemption from registration is available.

You should understand the risks associated with investing in our common stock before making an investment, read the "Risk Factors," which begin on page 3 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined whether this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this reoffer prospectus is July 3, 2008.

We have not authorized any person to give any information or to make any representations other than those contained or incorporated by reference in this prospectus, and, if given or made, you must not rely upon such information or representations as having been authorized. This prospectus does not constitute an offer to sell or the solicitation of an offer to buy any securities other than our shares of common stock and warrants described in this prospectus or an offer to sell or the solicitation to buy such securities in any circumstances in which such offer or solicitation is unlawful. You should not assume that the information we have included in this prospectus is accurate as of any date other than the date of this prospectus or that any information we have incorporated by reference is accurate as of any date other than the date of the document incorporated by reference regardless of the time of delivery of this prospectus or of any securities registered hereunder.

COMPANY OVERVIEW

Throughout this prospectus, the terms "we," "us," "our," and "our company" refer to Evolution Petroleum Corporation, a Nevada corporation formerly known as Natural Gas Systems, Inc. and, unless the context indicates otherwise, also includes our wholly-owned subsidiaries.

General

We were formed in late 2003 to acquire established crude oil and natural gas resources and exploit them through the application of conventional and specialized technology with the objective of increasing production, ultimate recoveries, or both. Our team is broadly experienced in oil and gas operations, development, acquisitions and financing. We follow a strategy of outsourcing most of our property accounting, human resources, administrative and non-core functions. Our principal executive offices are located at 2500 City West Blvd., Suite 1300, Houston, Texas 77042. Our telephone number is (713) 935-0122 and we maintain a website at www.evolutionpetroleum.com. Information contained on our website does not constitute part of this prospectus.

We are focused on an overall strategy of acquiring controlling working interests in oil and gas resources within established fields and redeveloping those fields through the application of capital and technology to convert the oil and gas resources into profitable producing reserves. Within this overall strategy, we have established three specific business initiatives:

Enhanced Oil Recovery (EOR) Initiative, using miscible and immiscible gas flooding to extract tertiary resources;

Bypassed Resource Initiative, using technology-based redevelopment of primary resources in mature oil and gas fields; and

Unconventional Gas Resource Initiative, using modern stimulation and completion technologies to economically produce tight gas formations.

Our strategy is designed to generate scalable development opportunities at relatively shallow depths, exhibiting relatively low completion risk, generally longer and more predictable production lives, less expenditures on infrastructure and lower operational risks. We believe that the benefits of this approach include:

Reduced exposure to the risk of whether resources are present;

Reduced capital expenditures per net BOE for infrastructure, such as roads, water handling facilities and pipelines;

Large inventory of development opportunities, which provides a more predictable future stream of drilling activity and production, as well as potentially reducing risks from short-term oil and gas price volatility;

Reduced operational risks and costs associated with lower pressures and lower temperatures; and

Control of operations, development timing and technology selection.

Enhanced Oil Recovery Initiative

Delhi EOR-CO2 Tertiary Recovery

We purchased our first oil and gas property in September 2003 through the acquisition of all of the active working interests and the corresponding 80% net revenue interest in property and wells in the Delhi Field, located in northeastern Louisiana. This acquisition included the

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

purchase of six producing wells, one salt water disposal well and 37 shut-in wells with minimal crude oil production per day and no natural gas sales. The Delhi Field encompasses approximately 13,636 acres, and the primary

Paluxy and Tuscaloosa producing reservoirs in the field were unitized in the 1950's as the Delhi Holt Bryant Unit. Our approximately \$2.8 million acquisition included the Delhi Holt Bryant Unit and certain other depths, excluding a separate reservoir contained in the Mengel Unit in the Delhi Field. We conducted various development activities in the Delhi Field following the acquisition. Between January and July 2006, we also acquired royalty and overriding royalty interests in the Delhi Holt Bryant Unit aggregating approximately 7.4% for approximately \$1.5 million.

In June 2006, we conveyed a farmout to a wholly-owned subsidiary of Denbury Resources ("Denbury") that included all of our working interests in the Delhi Holt Bryant Unit and 75% of our working interests in other depths of the Delhi Field, for which we received approximately \$50 million in cash, a 25% reversionary back-in working interest in the Delhi Holt Bryant Unit after payout, as defined in the agreement, and a commitment by Denbury to install a CO2 enhanced oil recovery project ("CO2-EOR") in the Delhi Holt Bryant Unit (the "Delhi Farmout") at Denbury's sole capital expense prior to payout. We also retained our separately acquired royalty and overriding royalty interests aggregating approximately 7.4% on the Delhi Holt Bryant Unit, including the CO2-EOR project.

In addition to the \$50 million paid to us for the Delhi Farmout at closing, Denbury has reported charging approximately \$79 million in capital costs to the Delhi EOR-CO2 project through December 31, 2007, mostly for pipeline construction. For calendar year 2008, Denbury has announced another \$80 million budget for completion of the pipeline to our Delhi Field, with oil recoveries from CO2 injection expected during 2009. Although we don't control the operations, we expect that oil production response will occur within months of first injection and that the field oil production rate will steadily increase beginning in 2009. We have no capital expenditure requirements related to the ongoing CO₂-EOR development at Delhi Field, although we retain our separate 7.4% overriding and mineral royalty interests and 25% reversionary interest after payout.

Bypassed Resource Initiative

Giddings Field

In December 2006, we began leasing in the mature Austin Chalk formations of the Giddings Field in Central Texas as a part of our bypassed primary resource initiative. Through November 1, 2007, we had acquired approximately 2.1 million BOE of proved undeveloped reserves in this field on 22 locations as reported by our independent engineers. By applying our operating staff's expertise gained in managing Austin Chalk assets in the Giddings Field with other major independent producers, this opportunity allows us to add potential new production prior to the significant increased ramp up of production we expect to begin in our Delhi Field in 2009. We view our further development of the Giddings field as a major addition to our value creation.

Tullos Field Area

In September 2004, we completed the acquisition of a 100% working interest and an approximate 78% average net revenue interest in producing crude oil wells, equipment and improvements located in the Tullos Urania, Colgrade and Crossroads Fields in LaSalle and Winn Parishes, Louisiana, which we refer to collectively as the "Tullos Field Area". The purchased assets included approximately 124 oil wells, 9 water disposal wells, and all associated infrastructure, including water disposal facilities, crude oil and water tanks, flow lines and pumping units. The purchase also included 15 wells without leases. We subsequently acquired new leases for ten of these wells.

In early February 2005, we completed the acquisition of a 100% working interest and an approximate 79% average net revenue interest in similar properties in our Tullos Field Area. The purchased assets included approximately 121 oil wells, 8 salt water disposal wells and associated infrastructure and equipment.

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

Following the acquisitions of the Tullos Field assets, we conducted various development activities, primarily to improve operations, bring operations up to industry standards, and increase produced water disposal capacity.

In early March 2008, we completed the sale of our 100% working interests in the Tullos Field assets for approximately \$4.6 million in cash. We have elected to focus our staff and capital on projects with far greater potential, particularly in growing our Giddings Field inventory beyond the twenty-two proved undeveloped locations, in addition to investigating the application of the technology we tested at Tullos in other higher potential fields characterized by heavy oil overlaying water formations.

Unconventional Gas Resource Initiative

In early 2007 we began leasing on two gas shale projects, targeting up to 25,000 acres in the Woodford Shale in Oklahoma. Currently, over 15,000 net acres have been acquired through leasing, with the remainder identified, partially leased or under negotiation. We expect to initiate development activities in these projects in calendar 2009.

Corporate History on Reverse Merger

Reality Interactive, Inc. ("Reality"), a Nevada corporation that traded on the OTC Bulletin Board under the symbol RLYI.OB and the predecessor of Evolution Petroleum Corporation, was incorporated on May 24, 1994 for the purpose of developing technology-based knowledge solutions for the industrial marketplace. On April 30, 1999, Reality ceased business operations, sold substantially all of its assets and terminated all of its employees. Subsequent to ceasing operations, Reality explored other potential business opportunities to acquire or merge with another entity while continuing to file reports with the Commission.

On May 26, 2004, Natural Gas Systems, Inc., a privately owned Delaware corporation formed in September 2003 ("Old NGS"), was merged into a wholly owned subsidiary of Reality. Reality was thereafter renamed Natural Gas Systems, Inc. ("NGS") and adopted a June 30 fiscal year end. As part of the merger, the officers and directors of Reality resigned, the officers and directors of Old NGS became the officers and directors of our Company, and the crude oil and natural gas business of Old NGS became that of our Company. Concurrently with the listing of our shares on the AMEX during July 2006, Natural Gas Systems was renamed Evolution Petroleum Corporation to avoid confusion with similar names traded on the AMEX and to better reflect our business model.

All regulatory filings and other historical information prior to May 26, 2004 that applied to Reality continue to apply to us after the merger.

RISK FACTORS

Risks Related to the Company

You should carefully consider the following risks relating to us as well as other information contained in this prospectus before deciding to invest in shares of our common stock. Our business, financial condition or results of operations have been, or could be, materially adversely affected by the following risks. The value of your investment may decrease and could result in a loss.

If we are not successful in replacing the production and revenues lost from the sale of our Tullos Assets, we will suffer a material adverse effect.

Effective March 3, 2008, we sold 100% of our working interest in our Tullos Field Area for approximately \$4.6 million. Our Tullos Assets yielded approximately 80 net barrels of oil per day, representing substantially all of our production and revenues at the time of the closing of the sale on March 3, 2008. Although we have since redeployed our assets to new operations, namely in the

Giddings Field in Central Texas and have had some initial success in such operations, our continued success is dependent upon replacing the production lost when we sold our Tullos Assets, in a field which we have not had significant operating history. If we are unable to replace the lost production and revenues by success in the Giddings Field and other operations, our financial results will be materially and adversely affected.

Operating results from oil and gas production may decline.

With the profitable sale of both of our Tullos Area assets in March 2008 and the Delhi Farmout we completed on June 12, 2006 with Denbury Onshore LLC (the "Delhi Farmout"), we divested virtually all of our oil and gas production prior to the initiation of our Giddings Field drilling program. In the short term, we are depending on the replacement, if any, of this lost production from the \$8.5 MM drilling program of proved undeveloped reserves we began in December 2007 in the Giddings Field. In the intermediate term, we hope our reversionary interest in the Denbury Field will result in cash flow to us as a result of Denbury substantially increases production in the Delhi Field via the CO2 enhanced oil recovery ("CO2-EOR") project. Our reversionary interest in the Delhi Field is subject to Denbury attaining a payment of approximately \$200 million from its investment in the field, and is further subject to the successful combined operation of the field by Denbury.

Without further acquisitions of new properties or any productive results from the future drilling and development activity we expect, our production and revenues from oil and gas operations will decline in the foreseeable future as compared to our fiscal 2007 results.

The types of resources we focus on have substantial operational risks.

Our business plan focuses on the acquisition and development of relatively shallow, more complex and/or lower permeability reservoirs. Shallower reservoirs usually have lower, normal pressure, which translates into fewer natural gas volumes in place; complex reservoirs are more difficult to analyze and exploit; and low permeability reservoirs require more wells and stimulation for development and such wells may have low profit margins and higher capital costs per produced BBL of oil or MCF of gas.

The Delhi Farmout EOR project requires significant amounts of CO2 resources, the source of which may become unavailable or be curtailed and is outside of our control. In order to produce and deliver sufficient quantities of CO2 from Denbury's reserves from its Jackson Dome, Mississippi field, the construction of an approximately 100 mile pipeline necessary to connect to the Delhi Field will require large amounts of capital resources and the acquisition of new permits, right-of-ways, engineering designs, construction personnel and materials. Denbury's failure to manage these and other technical, strategic and logistical risks may render ultimate enhanced recoveries from the planned CO2-EOR project, if any, to fall short of our expectations.

Our new projects require that we acquire new leases in and around established fields and drill and complete wells, most of which may be horizontal, as well as negotiate the purchase of existing well bores and production equipment and install our proprietary artificial lift technology that has yet to be proven in the field. Leases may not be available, required oil field services may not be obtainable on the desired schedule or at the expected costs. While the projected drilling results are considered to be low to moderate in risk, there is no assurance as to what productive results may be obtained, if any.

Our limited operating history makes it difficult to predict future results and increases the risk of an investment in our Company.

We commenced our crude oil and natural gas operations in late 2003 and have a limited operating history. Therefore, we face all the risks common to companies in their early stages of development, including uncertainty of funding sources, high initial expenditure levels and uncertain revenue streams, an unproven business model, and difficulties in managing growth. Our prospects must be considered in

light of the risks, expenses, delays and difficulties frequently encountered in establishing a new business. Any forward-looking statements in this report do not reflect any possible effect on us from the outcome of these types of uncertainty. Prior to our recent Delhi Farmout with Denbury, we have incurred significant losses since the inception of our oil and gas operations and we have since resumed incurring losses. We cannot assure you that we will be successful. While members of our management have previously carried out or been involved with acquisition and production activities in the crude oil and natural gas industry while employed by us and other companies, we cannot assure you that our intended acquisition targets and development plans will lead to the successful development of crude oil and natural gas production or additional revenue.

We may be unable to continue licensing from third parties the technologies that we use in our business operations.

As is customary in the crude oil and natural gas industry, we utilize a variety of widely available technologies in the crude oil and natural gas development and drilling process. We do not have any patents or copyrights for the technology we currently utilize. Instead, we license or purchase services from the holders of such technology, or outsource the technology integral to our business from third parties. Our commercial success will depend in part on these sources of technology and assumes that such sources will not infringe on the proprietary rights of others. We cannot be certain whether any third-party patents will require us to utilize or develop alternative technology or to alter our business plan, obtain additional licenses, or cease activities that infringe on third-parties' intellectual property rights. Our inability to acquire any third-party licenses, or to integrate the related third-party products into our business plan, could result in delays in development unless and until equivalent products can be identified, licensed, and integrated. Existing or future licenses may not continue to be available to us on commercially reasonable terms or at all. Litigation, which could result in substantial cost to us, may be necessary to enforce any patents licensed to us or to determine the scope and validity of third-party obligations.

Regulatory and accounting requirements may require substantial reductions in reported Proved Reserves (see Glossary of Selected Petroleum Terms) and limitations of hedging.

We review on a periodic basis the carrying value of our crude oil and natural gas properties under the applicable rules of the various regulatory agencies, including the Commission. Under these rules, the carrying value of Proved Reserves of crude oil and natural gas properties may not exceed the present value of estimated future net after-tax cash flows from Proved Reserves, discounted at 10%. Application of this "ceiling" test generally requires pricing future revenues at the un-escalated prices in effect as of the end of our fiscal year and requires a write down for accounting purposes if the ceiling is exceeded, even if prices declined for only a short period of time. We may in the future be required to write down the carrying value of our crude oil and natural gas properties when crude oil and natural gas prices are depressed or unusually volatile. Whether we will be required to take such a charge will depend in part on the prices for crude oil and natural gas at the end of any fiscal period and the effect of reserve additions or revisions and capital expenditures during such period. If a write down is required, it would result in a charge to our earnings but would not impact our cash flow from operating activities.

Commodity contracts may expose us to risk of financial loss in certain circumstances, including instances where production is less than expected, our customers fail to purchase contracted quantities of crude oil or natural gas or a sudden, unexpected event materially impacts crude oil prices. In addition, any future commodity contracts may limit the benefit to us of increases in the price of crude oil. We have had no commodity contracts effective or outstanding since February 2007.

We may be unable to acquire and develop the additional oil and gas reserves that are required in order to sustain our business operations.

In general, the volumes of production from crude oil and natural gas properties decline as reserves are depleted, with the rate of decline depending on reservoir characteristics. Except to the extent we acquire properties containing proved reserves or conduct successful development activities, or both, our proved reserves will decline. Our future crude oil and natural gas production is, therefore, highly dependent upon our level of success in finding or acquiring additional reserves. Due to the Delhi Farmout, our immediate future growth is highly dependent on our ability to develop additional oil and gas reserves.

We are subject to substantial operating risks that may adversely affect our results of operations.

The crude oil and natural gas business involves numerous operating hazards such as well blowouts, mechanical failures, explosions, uncontrollable flows of crude oil, natural gas or well fluids, fires, formations with abnormal pressures, hurricanes, flooding, pollution, releases of toxic gas and other environmental hazards and risks. We could suffer substantial losses as a result of any of these events. While we carry general liability, control of well, and operator's extra expense coverage typical in our industry, we are not fully insured against all risks incident to our business.

We are not the operator of the Delhi CO₂-EOR project and may not always be the operator of our other wells. As a result, our operating risks for those wells and our ability to influence the operations for these wells will be less subject to our control. Operators of these wells may act in ways that are not in our best interests. If this occurs, the development of, and production of crude oil and natural gas from, some wells may not occur which would have an adverse effect on our results of operations.

The loss of key personnel could adversely affect us.

We depend to a large extent on the services of certain key management personnel, including our executive officers, the loss of any of whom could have a material adverse effect on our operations. In particular, our future success is dependent upon Robert S. Herlin, our President and Chief Executive Officer, Sterling H. McDonald, our Chief Financial Officer, and Daryl V. Mazzanti, our Vice-President of Operations, for sourcing, evaluating and closing deals, capital raising, and oversight of development and operations. Presently, the Company is not a beneficiary of any key-man insurance.

The loss of any of our skilled technical personnel could adversely affect our business.

We depend to a large extent on the services of skilled technical personnel to operate and maintain our crude oil and natural gas fields. We do not have the resources to perform all of these services and therefore we outsource many of our requirements. Additionally, as our production activity increases, so does our need for such services. Generally, we do not have long-term agreements with our drilling and maintenance service providers. Accordingly, there is a risk that any of our service providers could discontinue servicing our crude oil and natural gas fields for any reason. Although we believe that we could establish alternative sources for most of our operational and maintenance needs, any delay in locating, establishing relationships, and training our sources could result in production shortages and maintenance problems, with a resulting loss of revenue to us. We also rely on third-party carriers for the transportation and distribution of our production, the loss of any of which could have a material adverse effect on our operations.

We may have difficulty managing future growth and the related demands on our resources and may have difficulty in achieving future growth.

Although we hope to experience growth through acquisitions and development activity, any such growth may place a significant strain on our financial, technical, operational and administrative resources. Our ability to grow will depend upon a number of factors, including:

our ability to identify and acquire new development or acquisition projects;

our ability to develop existing properties;

our ability to continue to retain and attract skilled personnel;

the results of our development program and acquisition efforts;

the success of our technologies;

hydrocarbon prices;

our ability to successfully integrate new properties; and

our access to capital.

We cannot assure you that we will be able to successfully grow or manage any such growth.

We face strong competition from larger crude oil and natural gas companies.

Our competitors include major integrated crude oil and natural gas companies and numerous independent crude oil and natural gas companies, individuals and drilling and income programs. Many of our competitors are large, well-established companies with substantially larger operating staffs and greater capital resources than we have. We may not be able to successfully conduct our operations, evaluate and select suitable properties and consummate transactions in this highly competitive environment. Specifically, these larger competitors may be able to pay more for development projects and productive crude oil and natural gas properties and may be able to define, evaluate, bid for and purchase a greater number of properties and prospects than our financial or human resources permit. In addition, such companies may be able to expend greater resources on the existing and changing technologies that we believe are and will be increasingly important to attaining success in our industry.

The crude oil and natural gas reserves included in this report are only estimates and may prove to be inaccurate.

There are numerous uncertainties inherent in estimating crude oil and natural gas reserves and their estimated values. The reserves discussed in this report are only estimates that may prove to be inaccurate because of these uncertainties. Reservoir engineering is a subjective and inexact process of estimating underground accumulations of crude oil and natural gas that cannot be measured in an exact manner. Estimates of economically recoverable crude oil and natural gas reserves depend upon a number of variable factors, such as historical production from the area compared with production from other producing areas and assumptions concerning effects of regulations by governmental agencies, future crude oil and natural gas prices, future operating costs, severance and excise taxes, development costs and work-over and remedial costs. Some or all of these assumptions may in fact vary considerably from actual results. For these reasons, estimates of the economically recoverable quantities of crude oil and natural gas attributable to any particular group of properties, classifications of such reserves based on risk of recovery, and estimates of the future net cash flows expected therefrom prepared by different engineers or by the same engineers but at different times may vary substantially. Accordingly, reserve estimates may be subject to downward or upward adjustment. Actual production, revenue and expenditures with respect to our reserves will likely vary from estimates, and such variances may be material. The information regarding discounted future net cash flows included in this report should not

be considered as the current market value of the estimated crude oil and natural gas reserves attributable to our properties. As required by the Commission, the estimated discounted future net cash flows from proved reserves are based on prices and costs as of the date of the estimate, while actual future prices and costs may be materially higher or lower. Actual future net cash flows also will be affected by factors such as the amount and timing of actual production, supply and demand for crude oil and natural gas, increases or decreases in consumption, and changes in governmental regulations or taxation. In addition, the 10% discount rate, which is required by the Commission to be used in calculating discounted future net cash flows for reporting purposes, is not necessarily the most appropriate discount rate based on interest rates in effect from time to time and risks associated with us or the crude oil and natural gas industry in general.

We cannot market the crude oil and natural gas that we produce without the assistance of third parties.

The marketability of the crude oil and natural gas that we produce depends upon the proximity of our reserves to, and the capacity of, facilities and third-party services, including crude oil and natural gas gathering systems, pipelines, trucking or terminal facilities, and processing facilities. The unavailability or lack of capacity of such services and facilities could result in the shut-in of producing wells or the delay or discontinuance of development plans for properties. A shut-in or delay or discontinuance could adversely affect our financial condition. In addition, federal and state regulation of crude oil and natural gas production and transportation could affect our ability to produce and market our crude oil and natural gas on a profitable basis.

Risks Relating to the Oil and Gas Industry

Crude oil and natural gas development, re-completion of wells from one reservoir to another reservoir, restoring wells to production and drilling and completing new wells are speculative activities and involve numerous risks and substantial and uncertain costs.

Our growth will be materially dependent upon the success of our future development program. Drilling for crude oil and natural gas and re-working existing wells involve numerous risks, including the risk that no commercially productive crude oil or natural gas reservoirs will be encountered. The cost of drilling, completing and operating wells is substantial and uncertain, and drilling operations may be curtailed, delayed or cancelled as a result of a variety of factors beyond our control, including:

unexpected drilling conditions;

pressure or irregularities in formations;

equipment failures or accidents;

inability to obtain leases on economic terms, where applicable;

adverse weather conditions;

compliance with governmental requirements; and

shortages or delays in the availability of drilling rigs or crews and the delivery of equipment.

Drilling or re-working is a highly speculative activity. Even when fully and correctly utilized, modern well completion techniques such as hydraulic fracturing and horizontal drilling do not guarantee that we will find crude oil and/or natural gas in our wells. Our future drilling activities may not be successful and, if unsuccessful, such failure would have an adverse effect on our future results of operations and financial condition. We cannot assure you that our overall drilling success rate or our drilling success rate for activities within a particular geographic area will not decline. We may identify and develop prospects through a number of methods, some of which do not include lateral drilling or

hydraulic fracturing, and some of which may be unproven. The drilling and results for these prospects may be particularly uncertain. Our drilling schedule may vary from our capital budget. The final determination with respect to the drilling of any scheduled or budgeted prospects will be dependent on a number of factors, including, but not limited to:

the results of previous development efforts and the acquisition, review and analysis of data;

the availability of sufficient capital resources to us and the other participants, if any, for the drilling of the prospects;

the approval of the prospects by other participants, if any, after additional data has been compiled;

economic and industry conditions at the time of drilling, including prevailing and anticipated prices for crude oil and natural gas and the availability of drilling rigs and crews;

our financial resources and results;

the availability of leases and permits on reasonable terms for the prospects; and

the success of our drilling technology.

We cannot assure you that these projects can be successfully developed or that the wells discussed will, if drilled, encounter reservoirs of commercially productive crude oil or natural gas. There are numerous uncertainties in estimating quantities of proved reserves, including many factors beyond our control.

Crude oil and natural gas prices are highly volatile in general and low prices will negatively affect our financial results.

Our revenues, operating results, profitability, cash flow, future rate of growth and ability to borrow and repay funds or obtain additional capital, as well as the carrying value of our properties, are substantially dependent upon prevailing prices of crude oil and natural gas. Lower crude oil and natural gas prices also may reduce the amount of crude oil and natural gas that we can produce economically. Historically, the markets for crude oil and natural gas have been very volatile, and such markets are likely to continue to be volatile in the future. Prices for crude oil and natural gas are subject to wide fluctuation in response to relatively minor changes in the supply of and demand for crude oil and natural gas, market uncertainty and a variety of additional factors that are beyond our control, including:

worldwide and domestic supplies of crude oil and natural gas;

the level of consumer product demand;

local and regional market differentials in price due to transportation cost, supply/demand imbalances and pipeline capacity limitations;

weather conditions;

domestic and foreign governmental regulations;

the price and availability of alternative fuels;

political instability or armed conflict in oil-producing regions;

the price and level of foreign imports; and

overall domestic and global economic conditions.

It is extremely difficult to predict future crude oil and natural gas price movements with any certainty. Declines in crude oil and natural gas prices may materially adversely affect our financial condition, liquidity, ability to finance planned capital expenditures and results of operations. Further, oil and gas prices do not move in tandem. While our new projects are evaluated based on the assumption of oil and gas prices considerably less than in the current market or projected in the futures market, we do assume commodity prices will be higher than historic levels prior to 2004.

Oilfield service prices have been escalating, and the availability of such services may be inadequate to meet our needs.

Our business plan to redevelop mature oil and gas resources requires third party oilfield service vendors, which we do not control. Long lead times and spot shortages of any of a myriad of services we may require to redevelop our properties may prevent us from, or delay us in, maintaining or increasing the production volumes we expect. In addition, the recent escalating costs for such services may render certain or all of our projects uneconomic, as compared to the earlier prices we may have assumed when deciding to redevelop newly purchased or existing properties. Further adverse economic outcomes may result from the long lead times often necessary to execute and complete our redevelopment plans.

Government regulation and liability for environmental matters may adversely affect our business and results of operations.

Crude oil and natural gas operations are subject to extensive federal, state and local government regulations, which may be changed from time to time. Matters subject to regulation include discharge permits for drilling operations, drilling bonds, reports concerning operations, the spacing of wells, unitization and pooling of properties and taxation. From time to time, regulatory agencies have imposed price controls and limitations on production by restricting the rate of flow of crude oil and natural gas wells below actual production capacity in order to conserve supplies of crude oil and natural gas. There are federal, state and local laws and regulations primarily relating to protection of human health and the environment applicable to the development, production, handling, storage, transportation and disposal of crude oil and natural gas, by-products thereof and other substances and materials produced or used in connection with crude oil and natural gas operations. In addition, we may inherit liability for environmental damages caused by previous owners of property we purchase or lease or nearby properties. As a result, we may incur substantial liabilities to third parties or governmental entities. We are also subject to changing and extensive tax laws, the effects of which cannot be predicted. The implementation of new, or the modification of existing, laws or regulations could have a material adverse effect on us.

Risks Associated with Our Stock and the Offering

Our stock price has been and may continue to be very volatile.

Our common stock is thinly traded and the market price has been, and is likely to continue to be, highly volatile. For example, during our fiscal year 2007, our stock price as traded on the American Stock Exchange has ranged from \$2.90 to \$3.04. The variance in our stock price makes it extremely difficult to forecast with any certainty the stock price at which an investor may be able to buy or sell shares of our common stock. The market price for our common stock could be subject to wide fluctuations as a result of factors that are out of our control, such as:

actual or anticipated variations in our results of operations;

naked short selling of our common stock and stock price manipulation;

changes or fluctuations in the commodity prices of crude oil and natural gas;

general conditions and trends in the crude oil and natural gas industry; and

general economic, political and market conditions.

Our executive officers, directors and affiliates may be able to control the election of our directors and all other matters submitted to our stockholders for approval.

Our executive officers and directors, in the aggregate, beneficially own approximately 11.6 million shares or approximately 39% of our outstanding common stock, inclusive of which our Chairman of the Board, Mr. Laird Q. Cagan, Managing Director of Cagan McAfee Capital Partners, LLC ("CMCP") currently owns or controls, directly or indirectly, approximately 7.5 million shares, or approximately 27.8% of our outstanding common stock. Mr. Eric McAfee, a Managing Director of CMCP, currently owns or controls, directly or indirectly, approximately 5.2 million shares, or approximately 19.4% of our outstanding common stock, but is neither an officer nor a member of our board of directors. Collectively, the two managing directors of CMCP currently own or control, directly or indirectly, approximately 12.7 million shares, or approximately 47% of our outstanding common stock. Our executive officers and outside directors (other than Mr. Cagan) have beneficial ownership of approximately 4,187,891 shares, or approximately 15.5% of our outstanding common stock. As a result, these holders, if they were to act together, could exercise effective control over all matters submitted to our stockholders for approval (including the election and removal of directors and any merger, consolidation or sale of all or substantially all of our assets). This concentration of ownership may have the effect of delaying, deferring or preventing a change in control of our company, impede a merger, consolidation, takeover or other business combination involving our company or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our company, which in turn could have an adverse effect on the market price of our common stock.

The market for our common stock is limited and may not provide adequate liquidity.

Our common stock is currently thinly traded on the American Stock Exchange. During our fiscal year 2007, 2008, the actual trading volume in our common stock ranged from a low of 1,800 shares of common stock traded to a high of 353,300 shares of common stock traded, with only 61 days exceeding a trading volume of 50,000 shares. On most days, this trading volume means there is limited liquidity in our shares of common stock. Selling our shares is more difficult because smaller quantities of shares are bought and sold and news media coverage about us is limited. These factors result in a limited trading market for our common stock and therefore holders of our stock may be unable to sell shares purchased should they desire to do so.

The sale of shares could depress our stock price.

The re-offer prospectus registers the re-sale of approximately 4,187,891 shares of stock which are held by our executive officers and outside directors. The sale of all or a substantial portion of these shares at any one time given our current trading volume could have a depressive affect on our stock price.

If securities or industry analysts do not publish research reports about our business or if they downgrade our stock, the price of our common stock could decline.

Small, relatively unknown companies can achieve visibility in the trading market through research and reports that industry or securities analysts publish. To our knowledge, there are four non-company paid analysts covering our company. The lack of additional published reports by independent securities analysts could limit the interest in our common stock and negatively affect our stock price. We do not have any control over the research and reports these analysts publish or whether they will be published at all. If any analyst who does cover us downgrades our stock, our stock price would likely decline. If any analyst ceases coverage of our company or fails to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause our stock price to decline.

The issuance of additional common and preferred stock would dilute existing stockholders.

We are authorized to issue up to 100,000,000 shares of common stock. To the extent of such authorization, our board of directors has the ability, without seeking stockholder approval, to issue additional shares of common stock in the future for such consideration as our board may consider sufficient. The issuance of additional common stock in the future will reduce the proportionate ownership and voting power of the common stock now outstanding. We are also authorized to issue up to 5,000,000 shares of preferred stock, the rights and preferences of which may be designated in series by our board of directors. Such designation of new series of preferred stock may be made without stockholder approval, and could create additional securities which would have dividend and liquidation preferences over the common stock now outstanding. Preferred stockholders could adversely affect the rights of holders of common stock by:

exercising voting, redemption and conversion rights to the detriment of the holders of common stock;

receiving preferences over the holders of common stock regarding our surplus funds in the event of our dissolution or liquidation;

delaying, deferring or preventing a change in control of our company; and

discouraging bids for our common stock.

We do not plan to pay any cash dividends on our common stock.

We have not paid any dividends on our common stock to date and do not anticipate that we will be paying dividends in the foreseeable future. Any payment of cash dividends on our common stock in the future will be dependent upon the amount of funds legally available, our earnings, if any, our financial condition, our anticipated capital requirements and other factors that our board of directors may think are relevant. However, we currently intend for the foreseeable future to follow a policy of retaining all of our earnings, if any, to finance the development and expansion of our business and, therefore, do not expect to pay any dividends on our common stock in the foreseeable future.

FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements, which reflect the views of our management with respect to future events and financial performance. Certain of the statements contained in all parts of this document including, but not limited to, those relating to our acquisition and development plans, the effect of changes in strategy and business discipline, our project portfolio, future general and administrative expenses on a per unit of production basis, increases in wells operated, future growth, expansion and acquisitions, future exploration, future seismic data (including timing and results), purchase of technology licenses and their value and application, expansion of operations, generation of additional prospects, review of outside generated prospects and acquisitions, additional reserves and reserve increases, enhancement of visualization and interpretation strengths, expansion and improvement of capabilities, integration of new technology into operations, credit facilities, attraction of new members to our exploration team, future compensation programs, new focus on core areas, new prospects and drilling locations, future capital expenditures (or funding thereof), sufficiency of future working capital, borrowings and capital resources and liquidity, projected cash flows from operations, expectation or timing of reaching payout, outcome, effects or timing of any legal proceedings, drilling plans, including scheduled and budgeted wells, the number, timing or results of any wells, the plans for timing, interpretation and results of new or existing seismic surveys or seismic data, future production or reserves, future acquisition of leases, lease options or other land rights and any other statements regarding future operations, financial results, opportunities, growth, business plans and strategy and other statements that are not historical facts are forward looking.

These forward-looking statements reflect our current view of future events and financial performance. When used in this document, the words "budgeted," "anticipate," "estimate," "expect," "may," "project," "believe," "intend," "plan," "potential" and similar expressions are intended to be among the statements that identify forward looking statements. These forward-looking statements speak only as of their dates and should not be unduly relied upon. We undertake no obligation to update or review any forward-looking statement, whether as a result of new information, future events, or otherwise. Such statements involve risks and uncertainties, including, but not limited to, the numerous risks and substantial and uncertain costs associated with drilling of new wells, the volatility of crude oil and natural gas prices and the effects of relatively low prices for our products, conducting successful exploration and development in order to maintain reserves and revenue in the future, operating risks of crude oil and natural gas operations, our dependence on key personnel, our ability to utilize changing technology and the risk of technological obsolescence, the significant capital requirements of our exploration and development and technology development programs, governmental regulation and liability for environmental matters, results of litigation, management of growth and the related demands on our resources and the ability to achieve future growth, competition from larger crude oil and natural gas companies, the potential inaccuracy of estimates of crude oil and natural gas reserve data, property acquisition risks, and other factors detailed in this prospectus. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes will likely vary materially from those indicated. For a discussion of some of the factors that may cause actual results to differ materially from those suggested by the forward-looking statements, please read carefully the information under "Risk Factors" beginning on page 3.

You may rely only on the information contained in this prospectus. We have not authorized anyone to provide information different from that contained in this prospectus. Neither the delivery of this prospectus nor the sale of common stock means that information contained in this prospectus is correct after the date of this prospectus. This prospectus is not an offer to sell or solicitation of an offer to buy these securities in any circumstances under which the offer or solicitation is unlawful.

USE OF PROCEEDS

We will not receive any proceeds from the resale of our common stock by the Selling Stockholders pursuant to this prospectus. However, we will receive the sale price of any common stock we sell to the Selling Stockholders upon exercise by them of their warrants. If options to purchase all of the underlying 3,081,000 shares are exercised for cash, we would receive a maximum of approximately \$4,879,600 of total proceeds. If warrants to purchase all of the underlying 1,037,500 shares are exercised for cash, we would receive a maximum of approximately \$1,615,000 of total proceeds. These amounts, and the number of shares issued upon exercise of the options and warrants, may be reduced to the extent that the holders elect to pay for the exercise by canceling a portion of the options or warrants as may be provided under some of the agreements or as may be approved by the Plan Administrator on a case-by-case basis. We would expect to use these proceeds, if any, for general working capital purposes. We have agreed to pay the expenses of registration of these shares, including specified legal and accounting fees.

SELLING STOCKHOLDERS

We are registering our shares of common stock in order to permit the Selling Stockholders to offer the shares for resale from time to time. The table below lists the Selling Stockholders and other information regarding the beneficial ownership of our shares of common stock by each of the Selling Stockholders, including the number of shares of our common stock beneficially owned by each Selling Stockholder as of June 27, 2008.

Each of the Selling Stockholders is currently, or has been within the past three years, an employee, officer, director or consultant of ours or of our predecessors or affiliates. The shares being registered

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

for reoffer and resale were acquired by the Selling Stockholders named below pursuant to the Amended and Restated 2004 Stock Plan, the 2003 Stock Option Plan, Revocable Warrant Agreement or Warrant Agreement.

Name of Selling Stockholder	Position	Number of Shares Beneficially Owned	Number of Shares Offered	Number of Shares Beneficially Owned After Offering	Percentage of Shares Beneficially Owned After Offering(1)
Robert S. Herlin(2)	Chief Executive Officer and President	2,296,875(3)	1,687,500(4)	2,687,500	9.4%
Sterling H. McDonald(2)	Vice President and Chief Financial Officer	787,500(5)	1,050,000(6)	1,050,000	3.8%
Daryl Mazzanti(2)	Vice President-Operations	559,375(7)	900,000(8)	925,000	3.3%
Gene Stoever(2)	Director	199,047(9)	178,000	199,047	*
E.J. DiPaolo(2)	Director	199,047(10)	178,000	199,047	*
William Dozier(2)	Director	146,047(11)	125,000	146,047	*

*

(1)
Based on 26,860,439 shares outstanding on June 27, 2008.

(2)
Address: c/o Evolution Petroleum Corporation, 2500 City West Boulevard, Suite 1300, Houston, Texas 77042.

(3)
Includes (i) 1,000,000 shares directly held by Mr. Herlin; (ii) 703,125 shares which are issuable upon exercise of options that are presently exercisable or exercisable by August 26, 2008; and (iii) 593,750 shares which are issuable upon exercise of warrants that are presently exercisable or exercisable by August 26, 2008.

(4)
Includes (i) 1,000,000 shares which are issuable upon exercise of options; and (ii) 687,500 shares which are issuable upon exercise of warrants.

(5)
Includes (i) 656,250 shares which are issuable upon exercise of options that are presently exercisable or exercisable by August 26, 2008 and (ii) 131,250 shares which are issuable upon exercise of warrants that are presently exercisable or exercisable by August 26, 2008.

(6)
Includes (i) 900,000 shares which are issuable upon exercise of options; and (ii) 150,000 shares which are issuable upon exercise of warrants.

(7)
Includes (i) 25,000 shares directly held by Mr. Mazzanti; (ii) 384,375 shares which are issuable upon exercise of options that are presently exercisable or exercisable by August 26, 2008; and (iii) 150,000 shares which are issuable upon exercise of warrants that are presently exercisable or exercisable by August 26, 2008.

(8)
Includes (i) 700,000 shares which are issuable upon exercise of options; and (ii) 200,000 shares which are issuable upon exercise of warrants.

(9)
Includes (i) 21,047 shares directly held by Mr. Stoever, of which, 8,633 shares are subject to forfeiture provision through December 2008; and (ii) 178,000 shares which are issuable upon exercise of options that are presently exercisable or exercisable by August 26, 2008.

- (10) Includes (i) 21,047 shares directly held by Mr. DiPaolo, of which, 8,633 shares are subject to forfeiture provision through December 2008; and (ii) 178,000 shares which are issuable upon exercise of options that are presently exercisable or exercisable by August 26, 2008.
- (11) Includes (i) 21,047 shares directly held by Mr. Dozier, of which, 8,633 shares are subject to forfeiture provision through December 2008; and (ii) 125,000 shares which are issuable upon exercise of options that are presently exercisable or exercisable by August 26, 2008.

PLAN OF DISTRIBUTION

We are registering shares of our common stock to permit the resale of these shares of our common stock by the holders of such shares of our common stock from time to time after the date of this prospectus. We will not receive any of the proceeds from the sale by the Selling Stockholders of the shares of our common stock, other than the sale price of any common stock we sell to Selling Stockholders upon the exercise of their options or warrants. We will bear all fees and expenses incident to our obligation to register the shares of our common stock.

The Selling Stockholders may sell all or a portion of the shares of our common stock owned by them and offered hereby from time to time directly or through one or more underwriters, broker-dealers or agents. If the shares of our common stock are sold through underwriters or broker-dealers, the Selling Stockholders will be responsible for underwriting discounts or commissions or agent's commissions. The shares of our common stock may be sold in one or more transactions at fixed prices, at prevailing market prices at the time of the sale, at varying prices determined at the time of sale, or at negotiated prices. These sales may be effected in transactions, which may involve crosses or block transactions,

on any national securities exchange or quotation service on which the securities may be listed or quoted at the time of sale;

in the over-the-counter market;

in transactions otherwise than on these exchanges or systems or in the over-the-counter market;

through the writing of options, whether such options are listed on an options exchange or otherwise;

in ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

purchases by a broker-dealer as principal and resale by the broker-dealer for its account;

an exchange distribution in accordance with the rules of the applicable exchange;

privately negotiated transactions;

short sales (provided that no short sales shall occur prior to the effectiveness of this Registration Statement and prospectus);

sales pursuant to Rule 144;

broker-dealers may agree with the Selling Stockholders to sell a specified number of such shares at a stipulated price per share;

a combination of any such methods of sale; and

any other method permitted pursuant to applicable law.

If the Selling Stockholders effect such transactions by selling shares of our common stock to or through underwriters, broker-dealers or agents, such underwriters, broker-dealers or agents may receive commissions in the form of discounts, concessions or commissions from the

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

Selling Stockholders or commissions from purchasers of the shares of our common stock for whom they may act as agent or to whom they may sell as principal (which discounts, concessions or commissions as to particular underwriters, broker-dealers or agents may be in excess of those customary in the types of transactions involved). In connection with sales of the shares of our common stock or otherwise, the Selling

Stockholders may enter into hedging transactions with broker-dealers or others, which may in turn engage in short sales of the shares of our common stock in the course of hedging in positions they assume. The Selling Stockholders may also sell shares of our common stock short and deliver shares of our common stock covered by this prospectus to close out short positions and to return borrowed shares in connection with such short sales. The Selling Stockholders may also loan or pledge shares of our common stock to broker-dealers or others that in turn may sell such shares.

The Selling Stockholders may pledge or grant a security interest in some or all of the shares of our common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of our common stock from time to time pursuant to this prospectus or any amendment to this prospectus under Rule 424(b)(3) or other applicable provision of the Securities Act of 1933, amending, if necessary, the list of Selling Stockholders to include the pledgee, transferee or other successors in interest as Selling Stockholders under this prospectus. The Selling Stockholders also may transfer and donate the shares of our common stock in other circumstances in which case the transferees, donees, pledgees or other successors in interest will be the selling beneficial owners for purposes of this prospectus.

The Selling Stockholders and any broker-dealer participating in the distribution of the shares of our common stock may be deemed to be "underwriters" within the meaning of the Securities Act, and any commission paid, or any discounts or concessions allowed to, any such broker-dealer may be deemed to be underwriting commissions or discounts under the Securities Act. At the time a particular offering of the shares of our common stock is made, a prospectus supplement, if required, will be distributed which will set forth the aggregate amount of shares of our common stock being offered and the terms of the offering, including the name or names of any broker-dealers or agents, any discounts, commissions and other terms constituting compensation from the Selling Stockholders and any discounts, commissions or concessions allowed or reallocated or paid to broker-dealers.

Under the securities laws of some states, the shares of our common stock may be sold in such states only through registered or licensed brokers or dealers. In addition, in some states the shares of our common stock may not be sold unless such shares have been registered or qualified for sale in such state or an exemption from registration or qualification is available and is complied with.

We cannot assure you that any Selling Stockholder will sell any or all of the shares of our common stock registered pursuant to the shelf Registration Statement, of which this prospectus forms a part.

The Selling Stockholders and any other person participating in such distribution will be subject to applicable provisions of the Securities Exchange Act of 1934, as amended, and the rules and regulations there under, including, without limitation, Regulation M of the Exchange Act, which may limit the timing of purchases and sales of any of the shares of our common stock by the Selling Stockholders and any other participating person. Regulation M may also restrict the ability of any person engaged in the distribution of the shares of our common stock to engage in market-making activities with respect to the shares of our common stock. All of the foregoing may affect the marketability of the shares of our common stock and the ability of any person or entity to engage in market-making activities with respect to the shares of our common stock.

We will pay all expenses of the registration of the shares of our common stock pursuant to various registration rights agreements, including, without limitation, Commission filing fees and expenses of compliance with state securities or "blue sky" laws; provided, however, that a Selling Stockholder will pay all underwriting discounts and selling commissions, if any.

Once sold under the shelf Registration Statement, of which this prospectus forms a part, the shares of our common stock will be freely tradable in the hands of persons other than our affiliates.

LEGAL MATTERS

The law firm of Adams and Reese LLP will render an opinion with respect to the validity of the shares of our common stock covered by this prospectus.

EXPERTS

Our financial statements for the twelve month period ended June 30, 2007 and the twelve month period ended June 30, 2006 have been audited by Hein & Associates, LLP to the extent and for the periods indicated in their report thereon which is incorporated by reference into this prospectus. Such financial statements are incorporated by reference into this prospectus in reliance upon the report of Hein & Associates, LLP and upon the authority of such firm as experts in auditing and accounting.

Oil and gas reserve quantities and future net revenues information incorporated by reference in this prospectus and Registration Statement were extracted from reports prepared by W. D. Von Gonten & Co., independent petroleum engineers.

We engaged Robert Olson, an independent geologist, to perform a six-month geological study with respect to approximately 20% of our Delhi Field, the results of which were used to propose eight well locations that yielded proved undeveloped reserves on each location in the Von Gonten engineering report dated July 1, 2005. Four of these proved undeveloped reserve locations are included in the five wells we drilled and completed in our 2005 Delhi Development Drilling Program we began in October 2005.

INFORMATION INCORPORATED BY REFERENCE

The Commission allows us to incorporate by reference the information we file with it, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus, and information that we later file with the Commission will automatically update and supersede that information.

We incorporate by reference into this prospectus the following documents:

Our Quarterly Report on Form 10-Q for the quarter ended March 31, 2008 filed on May 14, 2008;

Our Quarterly Report on Form 10-Q for the quarter ended December 31, 2007 filed on February 14, 2008;

Our Current Report on Form 8-K filed on December 10, 2007, February 22, 2008, March 7, 2008, and May 14, 2008;

Our Quarterly Report on Form 10-Q for the quarter ended September 30, 2007 filed on November 14, 2008;

Our Annual Report on Form 10-KSB for the fiscal year ended June 30, 2007 filed on September 28, 2007;

The description of our common stock as described in our Registration Statement on Form 8-A filed on July 13, 2006 and any amendment or report filed for the purpose of updating any such description.

Additionally, all documents that we file pursuant to Sections 13(a), 13(c), 14 and 15(d) of the Securities Exchange Act of 1934, as amended, after the date of this prospectus and before the termination or completion of this offering shall be deemed to be incorporated by reference into this prospectus from the respective dates of filing of such documents. Any information that we subsequently file with the Commission that is incorporated by reference as described above will automatically update and supersede any previous information that is part of this prospectus.

The Company will provide to each person to whom this prospectus is delivered, upon written or oral request by such person, a copy of any or all of the information that has been incorporated by reference in this prospectus but not delivered with this prospectus. You may make such requests at no cost to you by writing or calling our Corporate Secretary at the following address or telephone number: Evolution Petroleum Corporation, 2500 City West Blvd., Suite 1300, Houston, Texas 77042; (713) 935-0122. Our website is <http://www.evolutionpetroleum.com>.

GLOSSARY OF SELECTED PETROLEUM TERMS

The following abbreviations and definitions are terms commonly used in the crude oil and natural gas industry and throughout this prospectus:

"BBL." A standard measure of volume for crude oil and liquid petroleum products; one barrel equals 42 U.S. gallons.

"BCF." Billion Cubic Feet of natural gas at standard temperature and pressure.

"BOE." Barrels of oil equivalent. BOE is calculated by converting 6 MCF of natural gas to 1 BBL of oil.

"BTU" or "British Thermal Unit." The standard unit of measure of energy equal to the amount of heat required to raise the temperature of one pound of water 1 degree Fahrenheit. One Bbl of crude is typically 5.8 MMBTU, and one standard MCF is typically 1 MMBTU.

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

"CO₂." Carbon dioxide, a gas that can be found in naturally occurring reservoirs, typically associated with ancient volcanoes, and also is a major byproduct from manufacturing and power production, also utilized in enhanced oil recovery through injection into an oil reservoir.

"EOR." Enhanced Oil Recovery projects involve injection of heat, miscible or immiscible gas, or chemicals into oil reservoirs, typically following full primary and secondary waterflood recovery efforts, in order to gain incremental recovery of oil from the reservoir.

"Field." An area consisting of a single reservoir or multiple reservoirs all grouped on or related to the same individual geologic structural feature and/or stratigraphic feature.

"Farmout." Sale or transfer of all or part of the operating rights from the working interest owner (the assignor or farmout party), to an assignee (the farmin party) who assumes all or some of the burden of development, in return for an interest in the property. The assignor may retain an overriding royalty or any other type of interest. For Federal tax purposes, a farmout may be structured as a sale or lease, depending on the specific rights and carved out interests retained by the assignor.

"Gross Acres or Gross Wells." The total acres or number of wells participated in, regardless of the amount of working interest owned.

"Horizontal Drilling" Involves drilling horizontally out from an existing vertical well bore, thereby potentially increasing the area and reach of the well bore that is in contact with the reservoir.

"Hydraulic Fracturing" Involves pumping a fluid with or without particulates into a formation at high pressure, thereby creating fractures in the rock and leaving the particulates in the fractures to ensure that the fractures remain open, thereby potentially increasing the ability of the reservoir to produce oil or gas.

"LOE." Means lease operating expense(s), a current period expense incurred to operate a well.

"MBOE." One thousand barrels of oil equivalent.

"MCF." One thousand cubic feet of natural gas at standard conditions, being approximately sea level pressure and 60 degrees Fahrenheit temperature. Standard pressure in the state of Louisiana is deemed to be 15.025 psi by regulation, but varies in other states.

"MMBTU." One million British thermal units.

"MMCF." One million cubic feet of natural gas at standard temperature and pressure.

"Net Acres or Net Wells." The sum of the fractional working interests owned in gross acres or gross wells.

"NGL." Natural gas liquids, being the combination of ethane, propane, butane and natural gasoline's that can be removed from natural gas through processing, typically through refrigeration plants that utilize low temperatures, or through J-T plants that utilize compression, temperature reduction and expansion to a lower pressure.

"NYMEX." New York Mercantile Exchange.

"Operator." An E&P joint venture participant that manages the joint venture, pays venture costs and bills the venture's non-operators for their share of venture costs. The operator is also responsible to market all oil and gas production, except for those non-operators who take their production in-kind.

"Overriding Royalty." A royalty interest that is created out of the operating or working interest. Unlike a royalty interest, an overriding royalty interest terminates with the operating interest from which it was created or carved out of. See "royalty interest".

"Permeability." The measure of ease with which petroleum can move through a reservoir.

"Porosity." (of sand or sandstone). The relative volume of the pore space (or open area) compared to the total bulk volume of the reservoir.

"Proved Developed Reserves." Reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery should be included as "proved developed reserves" only after testing by pilot project or after the operation of an installed program has confirmed through production responses that increased recovery will be achieved.

"Proved Reserves." Estimated quantities of crude oil, natural gas, and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions.

"Proved Undeveloped Reserves." Reserves that are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage are limited to those drilling units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other undrilled units can be claimed only where it can be demonstrated with certainty that there is continuity of production from the existing productive formation. Proved undeveloped reserves may not include estimates attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

"PSI," or pounds per square inch, a measure of pressure. Pressure is typically measured as "psig", or the pressure in excess of standard atmospheric pressure.

"Present Value." When used with respect to oil and gas reserves, present value means the estimated future net revenues computed by applying current prices of oil and gas reserves (with consideration of price changes only to the extent provided by contractual arrangements) to estimated future production of proved oil and gas reserves as of the date of the latest balance sheet presented, less estimated future expenditures (based on current costs to be incurred in developing and producing the proved reserves) computed using a discount factor and assuming continuation of existing economic conditions.

"Productive Well." A well that is producing oil or gas or that is capable of production.

"PV-10." Means a present value, discounted at 10% per annum, and is not necessarily the same as market value.

"Royalty" or "Royalty Interest." The mineral owner's share of oil or gas production (typically between $\frac{1}{8}$ and $\frac{1}{4}$), free of costs, but subject to severance taxes unless the lessor is a government. In certain circumstances, the royalty owner bears a proportionate share of the costs of making the natural gas saleable, such as processing, compression and gathering. A royalty interest that is coterminous with an operating or working interest is an "overriding royalty" interest.

"Shut-in Well." A well that is not on production, but has not yet been plugged and abandoned. Wells may be shut-in in anticipation of future utility as a producing well, plugging and abandonment or other use.

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

"Standardized Measure." The standardized measure is an estimate of future net reserves from a property, and is calculated in the same exact fashion as a PV-10 value, except that the projected revenue stream is adjusted to account for the estimated amount of federal income tax that must be paid.

"Working Interest." The interest in the oil and gas in place which is burdened with the cost of development and operation of the property. Also called the operating interest.

"Workover." A remedial operation on a completed well to restore, maintain or improve the well's production.

WHERE YOU CAN FIND MORE INFORMATION

We are subject to the information and periodic reporting requirements of the Exchange Act, and, in accordance with that act, file periodic reports, proxy statements and other information with the Commission. The periodic reports, proxy statements and other information filed by us are available for inspection and copying at prescribed rates at the Commission's Public Reference Room at Headquarters Office, 100 F Street, NE, Room 1580, Washington, DC 20549. Please call the Commission at 1-800-SEC-0330 for further information about the operation of the Commission's Public Reference Room. The Commission also maintains an Internet site that contains all reports, proxy statements and other information that we file electronically with the Commission. The address of that website is <http://www.sec.gov>. You may obtain a copy of any of these documents at no cost, by writing or calling us at the following address or telephone number: Evolution Petroleum Corporation, 2500 City West Blvd., Suite 1300, Houston, Texas 77042; (713) 935-0122. Our website is <http://www.evolutionpetroleum.com>.

We have filed with the Commission a Registration Statement on Form S-8 under the Securities Act for the common stock offered under this prospectus. The Registration Statement, including the exhibits to the Registration Statement, contains additional information about us and the common stock offered by this prospectus. The rules and regulations of the Commission allow us to omit from this prospectus certain information that is included in the Registration Statement. For further information about us and our common stock, you should review the Registration Statement and the exhibits filed with the Registration Statement.

DISCLOSURE OF COMMISSION POSITION ON INDEMNIFICATION FOR SECURITIES ACT LIABILITIES

Pursuant to Nevada Revised Statutes Section 78.751 and 78.7502, we must indemnify any of our directors, officers, employees or agents who is successful on the merits or otherwise in defense of any action or suit. This indemnification includes expenses, including attorney's fees actually or reasonably incurred. Nevada law also provides for discretionary indemnification for each person who serves as or at our request as our officer or director. We may indemnify these individuals against all costs, expenses, and liabilities incurred in a threatened, pending, or completed action, suit or proceeding brought because the individual is our director or officer. The individual must have conducted himself in good faith and reasonably believed that his conduct was in, or not opposed to, our best interests. In a criminal action he must not have had a reasonable cause to believe his conduct was unlawful.

Our Articles of Incorporation provide that no officer or director shall be personally liable to our corporation or our stockholders for monetary damages except as provided pursuant to Nevada law. Our Bylaws and Articles of Incorporation also provide that we shall indemnify and hold harmless each person who serves at any time as a director, officer, employee or agent of our company from and against any and all claims, judgments and liabilities to which such person shall become subject by reason of the fact that he is or was a director, officer, employee or agent of our company, and shall reimburse such person for all legal and other expenses reasonably incurred by him or her in connection

with any such claim or liability. In addition, we may maintain liability insurance for those persons. We also have the power to defend such person from all suits or claims in accord with Nevada law. The rights accruing to any person under our Bylaws and Articles of Incorporation do not exclude any other right to which any such person may lawfully be entitled, and we may indemnify or reimburse such person in any proper case, even though not specifically provided for by our bylaws or articles of incorporation.

Further, we have outstanding indemnification agreements with our officers and directors. In general, the indemnification agreements provide that the Company will, to the fullest extent permitted by Nevada law and subject to certain limitations, indemnify the director or officer against certain expenses (including attorneys' fees), judgments, fines, penalties and settlement amounts that may be incurred in connection with the defense or settlement of any claim, criminal, civil or administrative action or proceeding to which the director or officer becomes subject in connection with his service as a director or officer of the Company. The agreements provide for indemnification rights regarding both third-party claims and proceedings brought by or in the right of the Company. In addition, each indemnification agreement provides for the advancement of expenses incurred by the indemnitee in connection with any proceeding covered by the agreement to the fullest extent permitted by Nevada law. The indemnification agreements supersede all prior indemnification agreements entered into with the directors and officers. The indemnification agreements do not exclude any other rights to indemnification or advancement of expenses to which the indemnitees may be entitled, including any rights arising under the Articles of Incorporation or By-Laws of the Company, or Nevada law.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the Company pursuant to the foregoing provisions, or otherwise, the Company has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable.

PART II

INFORMATION REQUIRED IN THE REGISTRATION STATEMENT

Item 3. Incorporation of Documents by Reference.

The following documents previously filed by Evolution Petroleum Corporation (formerly named Natural Gas Systems, Inc.), a Nevada corporation (the "Company"), with the Securities and Exchange Commission (the "Commission") under the Securities Exchange Act of 1934, as amended, are incorporated by reference into this Registration Statement:

Our Quarterly Report on Form 10-Q for the quarter ended March 31, 2008 filed on May 14, 2008;

Our Quarterly Report on Form 10-Q for the quarter ended December 31, 2007 filed on February 14, 2008;

Our Current Report on Form 8-K filed on December 10, 2007, February 22, 2008, March 7, 2008, and May 14, 2008;

Our Quarterly Report on Form 10-Q for the quarter ended September 30, 2007 filed on November 14, 2008;

Our Annual Report on Form 10-KSB for the fiscal year ended June 30, 2007 filed on September 28, 2007;

The description of our common stock as described in our Registration Statement on Form 8-A filed on July 13, 2006 and any amendment or report filed for the purpose of updating any such description; and

All documents that we file pursuant to Sections 13(a), 13(c), 14 and 15(d) of the Securities Exchange Act of 1934 subsequent to the date hereof and prior to the filing of a post-effective amendment that indicates that all securities offered have been sold or that deregisters all securities then remaining unsold shall be deemed to be incorporated by reference into this Registration Statement and to be part hereof from the date of filing such documents. Any statement contained in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this Registration Statement to the extent that a statement contained herein or in any other subsequently filed document which also is or is deemed to be incorporated by reference herein modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part hereof.

Item 4. Description of Securities.

Not applicable.

Item 5. Interest of Named Experts and Counsel.

None.

Item 6. Indemnification of Directors and Officers.

Pursuant to Nevada Revised Statutes Section 78.751 and 78.7502, we must indemnify any of our directors, officers, employees or agents who is successful on the merits or otherwise in defense of any action or suit. This indemnification includes expenses, including attorney's fees actually or reasonably incurred. Nevada law also provides for discretionary indemnification for each person who serves as or at our request as our officer or director. We may indemnify these individuals against all costs, expenses, and liabilities incurred in a threatened, pending, or completed action, suit or proceeding brought because the individual is our director or officer. The individual must have conducted himself in good faith and reasonably believed that his conduct was in, or not opposed to, our best interests. In a criminal action he must not have had a

reasonable cause to believe his conduct was unlawful.

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

Our Articles of Incorporation provide that no officer or director shall be personally liable to our corporation or our stockholders for monetary damages except as provided pursuant to Nevada law. Our Bylaws and Articles of Incorporation also provide that we shall indemnify and hold harmless each person who serves at any time as a director, officer, employee or agent of our company from and against any and all claims, judgments and liabilities to which such person shall become subject by reason of the fact that he is or was a director, officer, employee or agent of our company, and shall reimburse such person for all legal and other expenses reasonably incurred by him or her in connection with any such claim or liability. In addition, we may maintain liability insurance for those persons. We also have the power to defend such person from all suits or claims in accord with Nevada law. The rights accruing to any person under our Bylaws and Articles of Incorporation do not exclude any other right to which any such person may lawfully be entitled, and we may indemnify or reimburse such person in any proper case, even though not specifically provided for by our bylaws or articles of incorporation.

Further, we have outstanding indemnification agreements with our officers and directors. In general, the indemnification agreements provide that the Company will, to the fullest extent permitted by Nevada law and subject to certain limitations, indemnify the director or officer against certain expenses (including attorneys' fees), judgments, fines, penalties and settlement amounts that may be incurred in connection with the defense or settlement of any claim, criminal, civil or administrative action or proceeding to which the director or officer becomes subject in connection with his service as a director or officer of the Company. The agreements provide for indemnification rights regarding both third-party claims and proceedings brought by or in the right of the Company. In addition, each indemnification agreement provides for the advancement of expenses incurred by the indemnitee in connection with any proceeding covered by the agreement to the fullest extent permitted by Nevada law. The indemnification agreements supersede all prior indemnification agreements entered into with the directors and officers. The indemnification agreements do not exclude any other rights to indemnification or advancement of expenses to which the indemnitees may be entitled, including any rights arising under the Articles of Incorporation or By-Laws of the Company, or Nevada law.

Item 7. Exemption from Registration Claimed.

Not applicable.

Item 8. Exhibits.

The following exhibits are filed with this Registration Statement by the Company (formerly named Natural Gas Systems, Inc.) or are incorporated by reference as a part of this Registration Statement:

- 4.1 Natural Gas Systems, a Delaware Corporation, 2003 Stock Option Plan (included with this Registration Statement).
- 4.2 Evolution Petroleum Amended and Restated 2004 Stock Plan (previously filed on October 29, 2007 as an exhibit to the Company's Definitive Proxy Statement on Form DEF14A and incorporated herein by reference).
- 4.3 Form of Stock Option Agreement for the Natural Gas Systems 2004 Stock Plan (previously filed on April 8, 2005 as an exhibit to the Current Report on Form 8-K and incorporated herein by reference).
- 4.4 Form of Warrant Agreement (previously filed on April 8, 2005 as an exhibit to the Company's Current Report on Form 8-K and incorporated herein by reference).
- 4.5 Revocable Warrant Agreement (previously filed on June 29, 2005 as an exhibit to the Company's Current Report on Form 8-K and incorporated herein by reference).
- 4.6 Form of Stock Grant Agreement (previously filed on June 29, 2005 as an exhibit to the Company's Current Report on Form 8-K and incorporated herein by reference).

Edgar Filing: EVOLUTION PETROLEUM CORP - Form S-8

- 5.1 Opinion of Adams and Reese LLP (included with this Registration Statement).
- 23.1 Consent of Hein & Associates LLP (included with this Registration Statement).
- 23.2 Consent of Adams and Reese LLP (included in the opinion filed as Exhibit 5.1).
- 23.3 Consent of W. D. Von Gonten & Co. (included with this Registration Statement).
- 24.1 Power of Attorney (included on the signature page of this Registration Statement).

Item 9. Undertakings

(a) The Company hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this Registration Statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

(ii) To reflect in the prospectus any facts or events arising after the effective date of this Registration Statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in this Registration Statement;

(iii) To include any material information with respect to the plan of distribution not previously disclosed in this Registration Statement or any material change to such information in this Registration Statement; provided, however, that paragraphs (a)(1)(i) and (a)(1)(ii) do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in periodic reports filed with or furnished to the Commission by the Company pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in this Registration Statement;

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new Registration Statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof; and

(3) To remove from registration by means of a post-effective amendment any of the securities being registered that remain unsold at the termination of the offering.

(b) The Company hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the Company's annual report pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in this Registration Statement shall be deemed to be a new Registration Statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial *bona fide* offering thereof.

(c) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the Company pursuant to the foregoing provisions, or otherwise, the Company has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Company of expenses incurred or paid by a director, officer or controlling person of the Company in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Company will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

EXHIBIT INDEX

The following exhibits are filed with this Registration Statement by the Company (formerly named Natural Gas Systems, Inc.) or are incorporated by reference as a part of this Registration Statement:

- 4.1 Natural Gas Systems 2003 Stock Option Plan (previously filed as an exhibit to the Company's Form 8-K on January 24, 2007).
- 4.2 Evolution Petroleum Corporation Amended and Restated 2004 Stock Plan (previously filed on October 29, 2007 as an exhibit to the Company's Definitive Proxy Statement on Form DEF14A and incorporated herein by reference).
- 4.3 Form of Stock Option Agreement for the Natural Gas Systems 2004 Stock Plan (previously filed on April 8, 2005 as an exhibit to the Current Report on Form 8-K and incorporated herein by reference).
- 4.4 Form of Warrant Agreement dated April 4, 2005 (previously filed on April 8, 2005 as an exhibit to the Company's Current Report on Form 8-K and incorporated herein by reference).
- 4.5 Revocable Warrant Agreement (previously filed on June 29, 2005 as an exhibit to the Company's Current Report on Form 8-K and incorporated herein by reference).
- 4.6 Form of Stock Grant Agreement (previously filed on June 29, 2005 as an exhibit to the Company's Current Report on Form 8-K and incorporated herein by reference).
- 5.1 Opinion of Adams and Reese LLP (included with this Registration Statement).
- 23.1 Consent of Hein & Associates LLP (included with this Registration Statement).
- 23.2 Consent of Adams and Reese LLP (included in the opinion filed as Exhibit 5.1).
- 23.3 Consent of W. D. Von Gonten & Co. (included with this Registration Statement).
- 24.1 Power of Attorney (included on the signature page of this Registration Statement).
