Natural Gas Services Group, Inc.
Notes to Condensed Financial Statements
(unaudited)

(1) Basis of Presentation and Summary of Significant Accounting Policies

These notes apply to the unaudited condensed financial statements of Natural Gas Services Group, Inc. (the "Company", "NGSG", "Natural Gas Services Group", "we" or "our") (a Colorado corporation). We were formed on December 17, 1998 for the purposes of combining the operations of certain manufacturing, service and leasing entities.

The accompanying unaudited condensed financial statements include all adjustments, consisting of only normal recurring adjustments, which are necessary to make our financial position at September 30, 2012 and the results of our operations for the three and nine months ended 2012 and 2011 not misleading. As permitted by the rules and regulations of the Securities and Exchange Commission (SEC), the accompanying condensed financial statements do not include all disclosures normally required by accounting principles generally accepted in the United States of America (GAAP). These financial statements should be read in conjunction with the financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011 on file with the SEC. In our opinion, the condensed financial statements are a fair presentation of the financial position, results of operations and cash flows for the periods presented.

The results of operations for the three and nine months ended September 30, 2012 are not necessarily indicative of the results of operations to be expected for the full fiscal year ending December 31, 2012.

Revenue recognition

Revenue from the sales of custom and fabricated compressors, and flare systems is recognized upon shipment of the equipment to customers or when all conditions have been met and title is transferred to the customer. Exchange and rebuild compressor revenue is recognized when both the replacement compressor has been delivered and the rebuild assessment has been completed. Revenue from compressor services is recognized upon providing services to the customer. Maintenance agreement revenue is recognized as services are rendered. Rental revenue is recognized over the terms of the respective rental agreements based upon the classification of the rental agreement. Deferred income represents payments received before a product is shipped. Revenue from the sale of rental units is included in sales revenue when equipment is shipped or title is transferred to the customer.

Fair Value of Financial Instruments

Our financial instruments consist principally of cash and cash equivalents, accounts receivable, accounts payable and our line of credit. Pursuant to ASC 820 (Accounting Standards Codification), the fair value of our cash equivalents is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. We believe that the recorded values of all of our other financial instruments approximate their fair values because of their nature and relatively short maturity dates or durations.

Recently Issued Accounting Pronouncements

In September 2011, FASB issued ASU 2011-08, Testing Goodwill for Impairment. Under the amendments in this Update, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely

than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. If the carrying amount of a reporting unit exceeds its fair value, then the entity is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss, if any. Under the amendments in this Update, an entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. An entity may resume performing the qualitative assessment in any subsequent period. The adoption of ASU No. 2011-08 on January 1, 2012 did not have a material effect on our financial position or results of operations, but this will be followed on our 2012 goodwill impairment test.

(2) Stock-Based Compensation

Stock Options:

A summary of option activity under our 1998 Stock Option plan for the nine months ended September 30, 2012 is presented below.

	Number of Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (years)	Aggregate Intrinsic Value (in thousands)
Outstanding, December 31, 2011	422,239	\$ 15.06	6.48	\$766
Granted	20,000	14.89	8.00	
Exercised	(22,500)) 7.47	—	
Canceled/Forfeited	(12,500)) 18.81	—	
Expired	(7,500)) 16.82	—	
Outstanding, September 30, 2012	399,739	\$ 15.33	6.06	\$675
Exercisable, September 30, 2012	331,072	\$ 14.94	5.62	\$674

We granted options to purchase 20,000 shares to our non-executive employees on January 25, 2012 at an exercise price of \$14.89 with a three year vesting period.

The following table summarizes information about our stock options outstanding at September 30, 2012:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Shares	Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
7.50-9.59	79,239	4.21	\$8.61	79,239	\$8.61
9.60-15.65	82,500	6.26	12.91	62,500	12.28
15.66-17.63	70,000	6.20	17.23	68,000	17.27
17.64-18.71	83,000	7.57	17.76	46,333	17.75
18.72-20.48	85,000	6.01	20.00	75,000	20.01
7.50-20.48	399,739	6.06	\$15.33	331,072	\$14.94

The summary of the status of our unvested stock options as of December 31, 2011 and changes during the nine months ended September 30, 2012 is presented below.

	Shares	Weighted Average Grant Date Fair Value
Unvested stock options:		
Unvested at December 31, 2011	78,666	\$8.82
Granted	20,000	14.89
Vested	(29,999)) 7.99

Unvested at September 30, 2012

68,667

\$10.95

5

As of September 30, 2012, there was \$375,124 of unrecognized compensation cost related to unvested options. Such cost is expected to be recognized over a weighted-average period of 1.69 years. Total compensation expense for stock options was \$330,000 and \$359,126 for the nine months ended September 30, 2012 and 2011, respectively.

Restricted Stock:

On January 25, 2012, the Compensation Committee awarded 70,000 shares of restricted common stock to our three named executive officers. 30,000 of the restricted shares were awarded to Stephen C. Taylor, our Chief Executive Officer, pursuant to the terms of his employment agreement. We also awarded Mr. Taylor an additional 20,000 restricted shares and our other two named executive officers 10,000 restricted shares each in connection with our review of their performance in 2011. The restricted shares issued to Messrs. Hazlett and Lawrence vest in annual one-third installments beginning on January 25, 2013, with Mr. Taylor's restricted shares subject to a one year vesting requirement. On March 28, 2012, we awarded and issued 12,500 shares of restricted stock to our Board of Directors as part payment for 2012 Directors' fees. The restricted stock vests in quarterly installments beginning on March 31, 2013. Total compensation expense related to restricted stock awards was \$727,658 and \$452,392 for the nine months ended September 30, 2012 and 2011, respectively. As of September 30, 2012, there was a total of \$702,693 of unrecognized compensation expenses related to these shares of restricted stock.

(3) Inventory

Our inventory, net of allowance for obsolescence of \$816,000 at September 30, 2012 and \$486,000 at December 31, 2011, consisted of the following amounts:

	September 30, 2012 (in thousands)	December 31, 2011
Raw materials	\$ 21,628	\$ 20,364
Work in process	5,024	6,601
	\$ 26,652	\$ 26,965

During the nine months ended September 30, 2012, there were no write offs of obsolete inventory against the allowance for obsolescence.

(4) Credit Facility

On December 31, 2010, we established a \$20 million senior secured revolving credit agreement (subject to a right, on an uncommitted basis, to increase the commitments thereunder to up to \$40 million) with JP Morgan Chase Bank, N.A. On December 31, 2011, we amended and renewed the Credit Agreement, which was set to expire on December 31, 2011 (the "Amended Credit Agreement"). The Amended Credit Agreement increased our aggregate commitment amount from \$20 million to \$30 million, subject to collateral availability. We also have a right to request from the lender, on an uncommitted basis, an increase of up to \$20 million on the aggregate commitment (which could potentially increase the commitment amount to \$50 million). The maturity date was extended to December 31, 2014, and the interest rate terms were amended.

Borrowing Base. At any time before the maturity of the Amended Credit Agreement, we may draw, repay and re-borrow amounts available under the borrowing base up to the maximum aggregate availability discussed above. Generally, the borrowing base equals the sum of (a) 80% of our eligible accounts receivable plus (b) 50% of the book value of our eligible general inventory (not to exceed 50% of the commitment amount at the time) plus (c) 75% of the book value of our eligible equipment inventory. JPMorgan Chase Bank (the "Lender") may adjust the borrowing base components if material deviations in the collateral are discovered in future audits of the collateral. We had \$29.0

million borrowing base availability at September 30, 2012 under the terms of our Amended Credit Agreement.

Interest and Fees. Under the terms of the Amended Credit Agreement, we have the option of selecting the applicable variable rate for each revolving loan, or portion thereof, of either (a) LIBOR multiplied by the Statutory Reserve Rate (as defined in the Amended Credit Agreement), with respect to this rate, for Eurocurrency funding, plus the Applicable Margin ("LIBOR-based"), or (b) CB Floating Rate, which is the Lender's Prime Rate less the Applicable Margin; provided, however, that no more than three LIBOR-based borrowings under the agreement may be outstanding at any one time. For purposes of the LIBOR-based interest rate, the Applicable Margin is 1.50%. For purposes of the CB Floating Rate, the Applicable Margin is 1.25%. For the nine month period ended September 30, 2012, our weighted average interest rate was 1.5%.

Accrued interest is payable monthly on outstanding principal amounts, provided that accrued interest on LIBOR-based loans is payable at the end of each interest period, but in no event less frequently than quarterly. In addition, fees and expenses are payable in connection with our requests for letters of credit (generally equal to the Applicable Margin for LIBOR-related borrowings multiplied by the face amount of the requested letter of credit) and administrative and legal costs.

Maturity. The maturity date of the Amended Credit Agreement is December 31, 2014, at which time all amounts borrowed under the agreement will be due and outstanding letters of credit must be cash collateralized. The agreement may be terminated early upon our request or the occurrence of an event of default.

Security. The obligations under the Amended Credit Agreement are secured by a first priority lien on all of our inventory and accounts and leases receivables, along with a first priority lien on a variable number of our leased compressor equipment the book value of must be maintained at a minimum of 2.00 to 1.00 commitment coverage ratio (such ratio being equal to (i) the amount of the borrowing base as of such date to (ii) the amount of the commitment as of such date.)

Covenants. The Amended Credit Agreement contains customary representations and warranties, as well as covenants which, among other things, limit our ability to incur additional indebtedness and liens; enter into transactions with affiliates; make acquisitions in excess of certain amounts; pay dividends; redeem or repurchase capital stock or senior notes; make investments or loans; make negative pledges; consolidate, merge or effect asset sales; or change the nature of our business. In addition, we also have certain financial covenants that require us to maintain on a consolidated basis a leverage ratio less than or equal to 2.50 to 1.00 as of the last day of each fiscal quarter.

Events of Default and Acceleration. The Amended Credit Agreement contains customary events of default for credit facilities of this size and type, and includes, without limitation, payment defaults; defaults in performance of covenants or other agreements contained in the loan documents; inaccuracies in representations and warranties; certain defaults, termination events or similar events; certain defaults with respect to any other Company indebtedness in excess of \$50,000; certain bankruptcy or insolvency events; the rendering of certain judgments in excess of \$150,000; certain ERISA events; certain change in control events and the defectiveness of any liens under the secured revolving credit facility. Obligations under the Amended Credit Agreement may be accelerated upon the occurrence of an event of default.

As of September 30, 2012, we were in compliance with all covenants in our Amended Credit Agreement. A default under our Credit Agreement could trigger the acceleration of our bank debt so that it is immediately due and payable. Such default would likely limit our ability to access other credit. At September 30, 2012 our balance on the line of credit was \$927,000.

(5) Other Long-term Liabilities

As of September 30, 2012, we had a long-term liability of \$275,000 to Midland Development Corporation. This amount is to be recognized as income contingent upon certain staffing requirements in the future. In addition, we entered into a purchase agreement with a vendor on July 30, 2008 pursuant to which we agreed to purchase up to \$4.8 million of our paint and coating requirements exclusively from the vendor. In connection with the execution of the agreement, the vendor paid us a \$300,000 fee which is considered to be a discount toward future purchases from the vendor. The \$300,000 payment we received is recorded as a long-term liability and will decrease as the purchase commitment is fulfilled. The long-term liability remaining as of September 30, 2012 was \$232,340.

(6) Earnings per Share

The following table reconciles the numerators and denominators of the basic and diluted earnings per share computation(in thousands, except per share data).

	Three months ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Numerator:				
Net income	\$2,606	2,231	\$9,114	\$6,736
Denominator for basic net income per common share:				
Weighted average common shares outstanding	12,230	12,179	12,214	12,151
Denominator for diluted net income per share:				
Weighted average common shares outstanding	12,230	12,179	12,214	12,151
Dilutive effect of stock options and restricted stock	101	98	98	105
Diluted weighted average shares	12,331	12,277	12,312	12,256
Earnings per common share:				
Basic	\$0.21	\$0.18	\$0.75	\$0.55
Diluted	\$0.21	\$0.18	\$0.74	\$0.55

For the nine months ended September 30, 2012, there were no stock options excluded due to their anti-dilutive effect. A total of 75,942 stock options for the nine months ended September 30, 2011 were excluded from the diluted weighted average shares as their effect would be anti-dilutive.

(7) Segment Information

ASC 280-10-50, Operating Segments, define the characteristics of an operating segment as a) being engaged in business activity from which it may earn revenue and incur expenses, b) being reviewed by the company's chief operating decision maker (CODM) for decisions about resources to be allocated and assess its performance and c) having discrete financial information. Although we indeed look at our product line information to analyze the nature of our revenue, other financial information, such as certain costs and expenses, net income and EBITDA are not captured or analyzed by these categories. Therefore discrete financial information is not available by product line and our CODM does not make resource allocation decisions or assess the performance of the business based on these categories, but rather in the aggregate. Based on this, Management believes that it operates in one business segment.

However, should a portion of our business be considered an operating segment; management has additionally reviewed the criteria for aggregation. ASC 280-10-50-11, Aggregation Criteria, allows for the aggregation of operating segments if the segments have similar economic characteristics and if the segments are similar in each of the following areas:

- The nature of the products and services;
- The nature of the production of processes;
- The type or class of customer for their products and services;
- The methods used to distribute their products or provide their services; and
- The nature of the regulatory environment, if applicable.

We are engaged in the business of designing and manufacturing compressors and flares. Our compressors and flares are sold and rented to our customers. In addition, we provide service and maintenance on compressors in our fleet and to third parties. These business activities are similar in all geographic areas. Our manufacturing process is essentially the same for the entire Company and is performed in house at our facilities in Midland, Texas and Tulsa, Oklahoma. Our customers primarily consist of entities in the business of producing natural gas. The maintenance and service of our products is consistent across the entire Company and is performed via an internal fleet of vehicles. The regulatory environment is similar in every jurisdiction in that the most impacting regulations and practices are the result of federal energy policy. In addition, the economic characteristics of each customer arrangement are similar in that we maintain policies at the corporate level.

Therefore, we believe that should product lines be considered separate operating segments, they meet the requirements for aggregation as described above.

For the three months ended September 30, 2012 (in thousands):

	Sales	Rental	Service & Maintenance	Corporate	Total
Revenue	\$4,935	\$14,120	\$235	\$—	\$19,290
Operating costs and expenses	3,126	5,896	88	5,938	15,048
Other income (expense)	—	—	—	(45) (45
Income before provision for income taxes	\$1,809	\$8,224	\$147	\$(5,983) \$4,197

(8) Commitments and Contingencies

From time to time, we are a party to various legal proceedings in the ordinary course of our business. While management is unable to predict the ultimate outcome of these actions, it believes that any ultimate liability arising from these actions will not have a material adverse effect on our financial position, results of operations or cash flow. We are not currently a party to any material legal proceedings, and we are not aware of any other threatened litigation.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The discussion and analysis of our financial condition and results of operations are based on, and should be read in conjunction with, our condensed financial statements and the related notes included elsewhere in this report and in our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC.

Overview

We fabricate, manufacture, rent and sell natural gas compressors and related equipment. Our primary focus is on the rental of natural gas compressors. Our rental contracts generally provide for initial terms of six to 24 months. After the initial term of our rental contracts, most of our customers have continued to rent our compressors on a month-to-month basis. Rental amounts are paid monthly in advance and include maintenance of the rented compressors. As of September 30, 2012, we had 1,680 natural gas compressors totaling 233,241 horsepower rented to 99 third parties compared to 1,545 natural gas compressors totaling 215,704 horsepower rented to 99 third parties at September 30, 2011.

We also fabricate natural gas compressors for sale to our customers, designing compressors to meet unique specifications dictated by well pressures, production characteristics and particular applications for which compression is sought. Fabrication of compressors involves the purchase by us of engines, compressors, coolers and other components, and then assembling these components on skids for delivery to customer locations. The major components of our compressors are acquired through periodic purchase orders placed with third-party suppliers on an “as needed” basis, which presently requires a two to three month lead time with delivery dates scheduled to coincide with our estimated production schedules. Although we do not have formal continuing supply contracts with any major supplier, we believe we have adequate alternative sources available. In the past, we have not experienced any sudden and dramatic increases in the prices of the major components for our compressors. However, the occurrence of such

an event could have a material adverse effect on the results of our operations and financial condition, particularly if we were unable to increase our rental rates and sales prices proportionate to any such component price increases.

We also manufacture a proprietary line of compressor frames, cylinders and parts, known as our CiP (Cylinder-in-Plane) product line. We use finished CiP component products in the fabrication of compressor units for sale or rental by us or sell the finished component products to other compressor fabricators. We also design, fabricate, sell, install and service flare stacks and related ignition and control devices for onshore and offshore incineration of gas compounds such as hydrogen sulfide, carbon dioxide, natural gas and liquefied petroleum gases. To provide customer support for our compressor and flare sales businesses,

we stock varying levels of replacement parts at our Midland, Texas facility and at field service locations. We also provide an exchange and rebuild program for screw compressors and maintain an inventory of new and used compressors to facilitate this business.

We provide service and maintenance to our customers under written maintenance contracts or on an as required basis in the absence of a service contract. Maintenance agreements typically have terms of 6 months to 1 year and require payment of a monthly fee.

The oil and natural gas equipment rental and services industry is cyclical in nature. The most critical factor in assessing the outlook for the industry is the worldwide supply and demand for natural gas and the corresponding changes in commodity prices. As demand and prices increase, oil and natural gas producers increase their capital expenditures for drilling, development and production activities. Generally, the increased capital expenditures ultimately result in greater revenues and profits for services and equipment companies.

In general, we expect our overall business activity and revenues to track the level of activity in the natural gas industry, with changes in domestic natural gas production and consumption levels and prices more significantly affecting our business than changes in crude oil and condensate production and consumption levels and prices. We also believe that demand for compression services and products is driven by declining reservoir pressure in maturing natural gas producing fields and, more recently, by increased focus by producers on non-conventional natural gas production, such as coalbed methane, gas shales and tight gas, which typically requires more compression than production from conventional natural gas reservoirs.

Demand for our products and services was strong throughout most of 2008, but in 2009 and early 2010 the demand declined due to lower natural gas prices, decreased demand for natural gas and the economic recession. This began to show signs of easing during the later part of 2010 and throughout the first quarter of 2011. Since then, natural gas prices have had only slight movements up followed by downward movements. Opportunities have developed in non-conventional shale plays. While shale plays continued to offer opportunities, natural gas prices have stalled, leaving demand for compression in conventional areas uncertain.

For the remainder of 2012, our forecasted capital expenditures will be directly dependent upon our customers' compression requirements and are not anticipated to exceed our internally generated cash flows. Any required capital will be for additions to our compressor rental fleet and/or addition or replacement of service vehicles. We believe that cash flows from operations will be sufficient to satisfy our capital and liquidity requirements for the foreseeable future. We may require additional capital to fund any unanticipated expenditures, including any acquisitions of other businesses, although that capital may not be available to us when we need it or on acceptable terms.

Natural gas prices continue at levels that do not encourage energy companies to invest capital in natural gas projects. In addition, the domestic economy has not fully recovered. Notwithstanding the continuing weak economy and financial uncertainty, we believe the long-term trend in our market is favorable. We believe this outlook is supported by the growth in our revenue through the nine months of 2012 compared to the same period in 2011.

Results of Operations

Three months ended September 30, 2012, compared to the three months ended September 30, 2011.

The table below shows our revenues and percentage of total revenues of each of our product lines for the three months ended September 30, 2012 and 2011.

	Revenue					
	Three months ended September 30, (in thousands)					
	2012			2011		
Sales	\$4,935	26	%	\$4,807	27	%
Rental	14,120	73	%	12,672	72	%
Service and Maintenance	235	1	%	222	1	%
Total	\$19,290			\$17,701		

Total revenue increased from \$17.7 million to \$19.3 million, or 9%, for the three months ended September 30, 2012, compared to the same period ended September 30, 2011. Of the \$1.6 million increase in revenue, \$1.5 million was related to compressor rentals in the three months ended September 30, 2012 compared to the three month period ended September 30, 2011. We also had increased compressor sales revenue. Comparing the three months ended September 30, 2012 to the same period in 2011, sales revenue increased 2.7% and rental revenue increased 11.4%. Service and maintenance revenue increased by 5.9%, but represents only 1% of total revenue.

Sales revenue increased from \$4.8 million to \$4.9 million for the three months ended September 30, 2012, compared to the same period ended September 30, 2011. This increase is the result of a firming of demand for our products due to consistent energy industry activity related to higher levels of capital authorizations. This activity was due to continued attention to unconventional plays in which the project economics depend on oil prices rather than natural gas prices. This activity resulted in consistent compressor units sold to third parties from our Tulsa and Midland operations. There was also a slight increase in demand for flares.

Rental revenue increased from \$12.7 million to \$14.1 million for the three months ended September 30, 2012, compared to the same period ended September 30, 2011. This increase is the result of higher oil and natural gas industry drilling and demand for low to mid horsepower compression. We ended the quarter with 2,236 compressor packages in our rental fleet, up from 2,076 units at September 30, 2011. The rental fleet had a utilization of 75.1% as of September 30, 2012 compared to 74.4% utilization as of September 30, 2011. This utilization increase is mainly the result of more compressor rental units in our inventory being matched to customer requirements and being returned to service as well as fewer units being returned from operation. In the event that natural gas prices increase we should be able to rent more of the available units.

Our overall operating margin percentage remained relatively flat for the three months ended September 30, 2012 compared to the same period ended September 30, 2011. The margin stability is mainly the result of our ability to hold the line on costs related to compressor sales, and improved product pricing with fewer strategically competitive bids during the period and fewer projects requiring new and complex designs.

Selling, general, and administrative expense increased to \$2.0 million from \$1.6 million, a 25.0% increase for the three months ended September 30, 2012, as compared to the same period ended September 30, 2011. This increase is mainly due to higher commissions and salaries and a small increase in staffing levels. Our staffing increase is mainly in support of operational demands. Overall staffing increased from 259 to 268 employees between the periods.

Depreciation and amortization expense increased to \$4.0 million for the three months ended September 30, 2012, compared to \$3.5 million for the period ended September 30, 2011. This was the result of new gas compressor rental units being added to the rental fleet from September 30, 2011 to September 30, 2012. We added a net of 160 compressors to our rental fleet during the twelve month period.

Provision for income tax increased to \$1.6 million from \$1.4 million, or 14.3%, and is the result of the increase in taxable income. We had an effective tax rate of 38% in both periods.

Nine months ended September 30, 2012, compared to the nine months ended September 30, 2011.

The table below shows our revenues and percentage of total revenues of each of our product lines for the nine months ended September 30, 2012 and 2011.

Revenue
Nine months ended September 30, (in thousands)

Edgar Filing: NATURAL GAS SERVICES GROUP INC - Form 10-Q

	2012			2011		
Sales	\$28,015	40	%	\$10,586	23	%
Rental	41,529	59	%	35,153	75	%
Service and Maintenance	630	1	%	774	2	%
Total	\$70,174			\$46,513		

Total revenue increased from \$46.5 million to \$70.1 million, or 50.8%, for the nine months ended September 30, 2012, compared to the same period ended September 30, 2011. The increase includes a non-recurring sale of rental units from our fleet

to a single customer. In addition, we had an increase in other compressor and flare sales. This increase was also the result of increased compressor rental revenue. Comparing the nine months ended September 30, 2012 to the same period in 2011, sales revenue increased 164.2% and rental revenue increased 17.9%. Service and maintenance revenue decreased by 18.6%.

Sales revenue increased from \$10.6 million to \$28.0 million for the nine months ended September 30, 2012, compared to the same period ended September 30, 2011. This increase is the result of a non-recurring sale of rental units from our fleet to a single customer and higher purchase demand for our products due to greater energy industry activity from higher levels of capital authorizations. This activity was due to greater attention to unconventional plays in which the project economics depend on oil prices rather than natural gas prices. This activity increase resulted in more compressor units sold to third parties from our Tulsa and Midland operations. There was also a slight increase in demand for flares.

Rental revenue increased from \$35.2 million to \$41.5 million for the nine months ended September 30, 2012, compared to the same period ended September 30, 2011. This increase is the result of higher oil and natural gas industry drilling and demand for low to mid horsepower compression. We ended the quarter with 2,236 compressor packages in our rental fleet, up from 2,076 units at September 30, 2011. The rental fleet had a utilization of 75.1% as of September 30, 2012 compared to 74.4% utilization as of September 30, 2011. This utilization increase is mainly the result of more compressor rental units in our inventory being matched to customer requirements and being returned to service as well as fewer units being returned from operation. In the event that natural gas prices increase we should be able to rent more of the available units.

Our overall operating margin percentage remained relatively flat for the nine months ended September 30, 2012 compared to the same period ended September 30, 2011. The margin stability is mainly the result of our ability to control costs related to compressor sales and rentals and some firming of prices. We had fewer custom projects requiring complex design.

Selling, general, and administrative expense increased to \$6.1 million, a 38.7% increase for the nine months ended September 30, 2012, as compared to the same period ended September 30, 2011. This increase is mainly due to higher commissions and salaries and increased staffing levels. Our staffing increase is mainly in support of operational demands. Overall staffing increased from 262 to 268 employees between the periods.

Depreciation and amortization expense increased to \$11.6 million for the nine months ended September 30, 2012, compared to \$10.3 million for the same period ended September 30, 2011. This was the result of new gas compressor rental units being added to the rental fleet from September 30, 2011 to September 30, 2012. We added a net of 160 compressors to our rental fleet during the twelve month period.

Other income and expense decreased for the nine months ended September 30, 2012, as compared to the same period ended September 30, 2011. The decrease was due to a gain on sale of our former headquarters and manufacturing facility in the first quarter of 2011.

Provision for income tax increased to \$5.6 million from \$4.1 million, or 36.6%, and is the result of the increase in taxable income. We had an effective tax rate of 38% in both periods.

Liquidity and Capital Resources

Our working capital positions as of September 30, 2012 and December 31, 2011 are set forth below:

	September 30, 2012 (in thousands)	December 31, 2011
Current Assets:		
Cash and cash equivalents	\$30,924	\$16,390
Trade accounts receivable, net	3,731	5,679
Inventory, net	26,652	26,965
Prepaid income taxes	167	109
Prepaid expenses and other	481	360
Total current assets	61,955	49,503
Current Liabilities:		
Line of credit	—	—
Accounts payable	2,059	3,730
Accrued liabilities	8,774	3,644
Current portion of tax liability	75	75
Deferred income	3,505	4,863
Total current liabilities	14,413	12,312
Total working capital	\$47,542	\$37,191

Historically, we have funded our operations through public and private offerings of our equity securities, subordinated debt, bank borrowings and cash flow from operations. Proceeds from these sources were primarily used to pay debt and to fund the manufacture and fabrication of additional units for our rental fleet of natural gas compressors.

For the nine months ended September 30, 2012, we invested \$25.8 million in equipment for our rental fleet and service vehicles, exclusive of the \$8.7 million in equipment sold from our rental fleet. Even though we have idle rental equipment, at times we do not have the specific type of equipment that our customers require, therefore we have to build new equipment to satisfy their needs. We financed this activity with cash flow from operations and cash on hand. During this period we also made \$90,000 in principal payments on our credit line.

Cash flows

At September 30, 2012, we had cash and cash equivalents of \$30.9 million compared to \$16.4 million at December 31, 2011. Our cash flow from operations of \$31.5 million was offset by capital expenditures of \$17.1 million, net of the \$8.7 million in equipment sold from our rental fleet, during the nine months ended September 30, 2012. We had working capital of \$47.6 million at September 30, 2012 compared to \$37.2 million at December 31, 2011. At September 30, 2012 and December 31, 2011, we had total debt of \$927,000 and \$1.0 million, respectively, and is all related to our line of credit and classified as long term. We had positive net cash flow from operating activities of \$31.5 million during the first nine months of 2012 compared to \$24.1 million for the first nine months of 2011. The cash flow from operations of \$31.5 million was primarily the result of the net income of \$9.1 million and the non-cash items of depreciation of \$11.6 million, a decrease in accounts payable of \$3.5 million, and deferred taxes of \$5.6 million.

Uncertain Economy Strategy

For the remainder of the fiscal year 2012 and into 2013, our overall plan during the uncertain economy is to continue monitoring expenses in line with the anticipated level of activity, fabricate rental fleet equipment only in direct response to market requirements, emphasize marketing of our idle gas compressor units and limit bank borrowing. Capital expenditures for the year ended December 31, 2012 are not anticipated to exceed our internal cash generating capacity. We believe that cash flows from

operations will be sufficient to satisfy our capital and liquidity requirements through 2012 and beginning of 2013. We may require additional capital to fund any unanticipated expenditures, including any acquisitions of other businesses.

Bank Borrowings

On December 31, 2010, we established a \$20 million senior secured revolving credit agreement (subject to a right, on an uncommitted basis, to increase the commitments thereunder to up to \$40 million) with JP Morgan Chase Bank, N.A. On December 31, 2011, we amended and renewed the Credit Agreement, which was set to expire on December 31, 2011 (the "Amended Credit Agreement"). The Amended Credit Agreement increased our aggregate commitment amount from \$20 million to \$30 million, subject to collateral availability. We also have a right to request from the lender, on an uncommitted basis, an increase of up to \$20 million on the aggregate commitment (which could potentially increase the commitment amount to \$50 million). The maturity date was extended to December 31, 2014, and the interest rate terms were amended.

Borrowing Base. At any time before the maturity of the Amended Credit Agreement, we may draw, repay and re-borrow amounts available under the borrowing base up to the maximum aggregate availability discussed above. Generally, the borrowing base equals the sum of (a) 80% of our eligible accounts receivable plus (b) 50% of the book value of our eligible general inventory (not to exceed 50% of the commitment amount at the time) plus (c) 75% of the book value of our eligible equipment inventory. JPMorgan Chase Bank (the "Lender") may adjust the borrowing base components if material deviations in the collateral are discovered in future audits of the collateral. We had \$29.0 million borrowing base availability at September 30, 2012 under the terms of our Amended Credit Agreement.

Interest and Fees. Under the terms of the Amended Credit Agreement, we have the option of selecting the applicable variable rate for each revolving loan, or portion thereof, of either (a) LIBOR multiplied by the Statutory Reserve Rate (as defined in the Amended Credit Agreement), with respect to this rate, for Eurocurrency funding, plus the Applicable Margin ("LIBOR-based"), or (b) CB Floating Rate, which is the Lender's Prime Rate less the Applicable Margin; provided, however, that no more than three LIBOR-based borrowings under the agreement may be outstanding at any one time. For purposes of the LIBOR-based interest rate, the Applicable Margin is 1.50%. For purposes of the CB Floating Rate, the Applicable Margin is 1.25%. For the nine month period ended September 30, 2012, our weighted average interest rate was 1.5%.

Accrued interest is payable monthly on outstanding principal amounts, provided that accrued interest on LIBOR-based loans is payable at the end of each interest period, but in no event less frequently than quarterly. In addition, fees and expenses are payable in connection with our requests for letters of credit (generally equal to the Applicable Margin for LIBOR-related borrowings multiplied by the face amount of the requested letter of credit) and administrative and legal costs.

Maturity . The maturity date of the Amended Credit Agreement is December 31, 2014, at which time all amounts borrowed under the agreement will be due and outstanding letters of credit must be cash collateralized. The agreement may be terminated early upon our request or the occurrence of an event of default.

Security. The obligations under the Amended Credit Agreement are secured by a first priority lien on all of our inventory and accounts and leases receivables, along with a first priority lien on a variable number of our leased compressor equipment the book value of must be maintained at a minimum of 2.00 to 1.00 commitment coverage ratio (such ratio being equal to (i) the amount of the borrowing base as of such date to (ii) the amount of the commitment as of such date.)

Covenants. The Amended Credit Agreement contains customary representations and warranties, as well as covenants which, among other things, limit our ability to incur additional indebtedness and liens; enter into transactions with

affiliates; make acquisitions in excess of certain amounts; pay dividends; redeem or repurchase capital stock or senior notes; make investments or loans; make negative pledges; consolidate, merge or effect asset sales; or change the nature of our business. In addition, we also have certain financial covenants that require us to maintain on a consolidated basis a leverage ratio less than or equal to 2.50 to 1.00 as of the last day of each fiscal quarter.

Events of Default and Acceleration. The Amended Credit Agreement contains customary events of default for credit facilities of this size and type, and includes, without limitation, payment defaults; defaults in performance of covenants or other agreements contained in the loan documents; inaccuracies in representations and warranties; certain defaults, termination events or similar events; certain defaults with respect to any other Company indebtedness in excess of \$50,000; certain bankruptcy or insolvency events; the rendering of certain judgments in excess of \$150,000; certain ERISA events; certain change in control events and the defectiveness of any liens under the secured revolving credit facility. Obligations under the Amended Credit Agreement may be accelerated upon the occurrence of an event of default.

As of September 30, 2012, we were in compliance with all covenants in our Amended Credit Agreement. A default under our Credit Agreement could trigger the acceleration of our bank debt so that it is immediately due and payable. Such default would likely limit our ability to access other credit. At September 30, 2012 our balance on the line of credit was \$927,000.

Contractual Obligations and Commitments

We have contractual obligations and commitments that affect the results of operations, financial condition and liquidity. The following table is a summary of our significant cash contractual obligations:

Cash Contractual Obligations	Obligations Due in Period (in thousands of dollars)						Total
	2012 ⁽¹⁾	2013	2014	2015	2016	Thereafter	
Line of credit (secured)	\$—	\$—	\$927	\$—	\$—	\$—	\$927
Interest on line of credit ⁽²⁾	9	37	37	—	—	—	83
Purchase obligations	300	300	300	300	300	2,453	3,953
Other long-term liabilities	—	—	—	507	—	—	507
Facilities and office leases	66	190	41	30	30	23	380
Total	\$375	\$527	\$1,305	\$837	\$330	\$2,476	\$5,850

(1) For the three months remaining in 2012.

(2) Assumes an interest rate of 4.0% and no additional borrowings.

Critical Accounting Policies and Practices

There have been no changes in the critical accounting policies disclosed in the Company's Form 10-K for the year ended December 31, 2011.

Recently Issued Accounting Pronouncements

In September 2011, FASB issued ASU 2011-08, Testing Goodwill for Impairment. Under the amendments in this Update, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. If the carrying amount of a reporting unit exceeds its fair value, then the entity is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss, if any. Under the amendments in this Update, an entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. An entity may resume performing the qualitative assessment in any subsequent period. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of ASU No. 2011-08 did not have a material effect on the Company's financial position or results of operations, but this will be followed on our 2012 goodwill impairment test.

Off-Balance Sheet Arrangements

From time-to-time, we enter into off-balance sheet arrangements and transactions that can give rise to off-balance sheet obligations. As of September 30, 2012, the off-balance sheet arrangements and transactions that we have entered into include operating lease agreements and purchase agreements. We do not believe that these arrangements are reasonably likely to materially affect our liquidity, availability of, or requirements for, capital resources.

We entered into a purchase agreement with a vendor on July 30, 2008 pursuant to which we agreed to purchase up to \$4.8 million of our paint and coating requirements exclusively from the vendor. In connection with the execution of the agreement, the vendor paid us a \$300,000 fee which is considered to be a discount toward future purchases from the vendor. The \$300,000

payment received by the Company is recorded as a long-term liability and will decrease as the purchase commitment is fulfilled. This long-term liability remaining as of September 30, 2012 was \$232,340.

Special Note Regarding Forward-Looking Statements

Except for historical information contained herein, the statements in this report are forward-looking and made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve known and unknown risks and uncertainties, which may cause our actual results in future periods to differ materially from forecasted results. Those risks include, among other things, the loss of market share through competition or otherwise; the introduction of competing technologies by other companies; a prolonged, substantial reduction in oil and natural gas prices which could cause a decline in the demand for our products and services; and new governmental safety, health and environmental regulations which could require us to make significant capital expenditures. The forward-looking statements included in this Form 10-Q are only made as of the date of this report, and we undertake no obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances. A discussion of these risk factors is included in our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the Securities and Exchange Commission.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There have been no changes in the market risks disclosed in the Company's Form 10-K for the year ended December 31, 2011, except for the Amended Credit Agreement discussed below.

Interest Rate Risk

Under the terms of the Amended Credit Agreement, we have the option of selecting the applicable variable rate for each revolving loan, or portion thereof, of either (a) LIBOR multiplied by the Statutory Reserve Rate (as defined in the Credit Agreement) to which the Lender is subject, with respect to this rate, for Eurocurrency funding, plus the Applicable Margin ("LIBOR-based"), or (b) CB Floating Rate, which is the Lender's Prime Rate less the Applicable Margin; provided, however, that no more than three LIBOR-based borrowings under the facility may be outstanding at any one time. The "Applicable Margin" is based on our leverage ratio (debt-to-EBITDA). For purposes of the LIBOR-based interest rate, the Applicable Margin ranges is 1.50%. For purposes of the CB Floating Rate, the Applicable Margin is 1.25%. Consequently, our exposure to interest rates relate primarily to interest earned on short-term investments and paying above market rates, if such rates are below the fixed rate, on our bank borrowings. As of September 30, 2012, we were not using any derivatives to manage interest rate risk.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures.

An evaluation was carried out under the supervision and with the participation of our management, including our President and Chief Executive Officer and our Principal Accounting Officer and Treasurer, of the effectiveness of the design and of our "disclosure controls and procedures" (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended or, the "Exchange Act") as of the end of the period covered by this report pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the President and Chief Executive Officer and

our Principal Accounting Officer and Treasurer have concluded that our disclosure controls and procedures as of the end of the period covered by this report were effective to ensure that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. These include controls and procedures designed to ensure that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our principal executive and financial officers as appropriate to allow timely decisions regarding required disclosures. Due the inherent limitations of control systems, not all misstatements may be detected. Those inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple errors or mistakes. Additionally, controls could be circumvented by the individual acts of some persons or by collusion of two or more people. Our controls and procedures can only provide reasonable, not absolute, assurance that the above objectives have been met.

(b) Changes in Internal Controls.

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during our last quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are a party to various legal proceedings in the ordinary course of our business. While management is unable to predict the ultimate outcome of these actions, it believes that any ultimate liability arising from these actions will not have a material adverse effect on our financial position, results of operations or cash flow. We are not currently a party to any material legal proceedings and we are not aware of any other threatened litigation.

Item 1A. Risk Factors

Please refer to and read “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011 for a discussion of the risk associated with our Company and industry.

Item 6. Exhibits

The following exhibits are filed herewith or incorporated herein by reference, as indicated:

Exhibit No. Description

- | | |
|------|--|
| 3.1 | Articles of Incorporation, as amended (Incorporated by reference to Exhibit 3.1 of the 10-QSB filed and dated November 10, 2004) |
