## Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain estimates, predictions, and other “forward-looking statements” (as defined in the Private Securities Litigation Reform Act of 1995, and within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended).

Forward-looking statements are generally identified with the words “believe,” “expect,” “anticipate,” “intend,” “estimate,” “target,” “may,” “will,” “plan,” “project,” “should,” “continue,” or the negative thereof or other similar expressions, or discussion of future goals or aspirations, which are predictions of or indicate future events and trends and which do not relate to historical matters. Such statements are based on information available to management as of the time of such statements and relate to, among other things, expectations of the business environment in which we operate, projections of future performance (financial and otherwise), including those of acquired companies, perceived opportunities in the market and statements regarding our mission and vision. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

Factors that could cause actual results to differ from those expected include, but are not limited to, general economic conditions caused by inflation, interest rates, consumer confidence, rates of unemployment and foreign currency exchange rates; global economic conditions, including continued uncertainties in Europe; investment performance of assets in our pension plans; competitive conditions within our markets, including the acceptance of our new and existing products; customer contract bidding activity; threats or challenges to our patented or proprietary technologies; raw materials: costs, availability, and terms (particularly for polymer resins and adhesives); price changes for raw materials and our ability to pass these price changes on to our customers or otherwise manage commodity price fluctuation risks; unexpected energy surcharges; broad changes in customer order patterns; a failure in our information technology infrastructure or applications; changes in governmental regulation, especially in the areas of environmental, health and safety matters, fiscal incentives, and foreign investment; unexpected outcomes in our current and future administrative and litigation proceedings; unexpected outcomes in our current and future tax proceedings; changes in domestic and international tax laws; costs associated with the pursuit of business combinations; unexpected costs associated with the integration of acquired businesses; unexpected costs and timing related to transition of production; changes in our labor relations; and the impact of changes in the world political environment including threatened or actual armed conflict. These and other risks, uncertainties, and assumptions identified from time to time in our filings with the Securities and Exchange Commission, including without limitation, those described in our Annual Report on Form 10-K for the year ended December 31, 2013 and our quarterly reports on Form 10-Q, could cause actual future results to differ materially from those projected in the forward-looking statements. In addition, actual future results could differ materially from those projected in the forward-looking statement as a result of changes in the assumptions used in making such forward-looking statement.

BEMIS COMPANY, INC. AND SUBSIDIARIES  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared by Bemis Company, Inc. (the "Company") in accordance with accounting principles for interim financial information generally accepted in the United States and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes necessary for a comprehensive presentation of financial position and results of operations. It is management's opinion, however, that all material adjustments (consisting of normal recurring accruals) have been made which are necessary for a fair financial statement presentation. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Note 2 — New Accounting Guidance

In May 2014, the Financial Accounting Standards Board ("FASB") issued new guidance which supersedes current revenue recognition requirements. This guidance is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance is required to be applied by the Company in the first quarter of fiscal 2017 using one of two retrospective application methods. The Company is currently evaluating the application methods and the impact of this new statement on the Company's consolidated financial position, results of operations, or cash flows.

In April 2014, the FASB issued new guidance that redefines a discontinued operation as a component or group of components that has been disposed of or is classified as held for sale and represents a strategic shift that has (or will have) a major effect on an entity's financial results. Continuing involvement will no longer preclude presentation as a discontinued operation. The guidance is required to be applied by the Company prospectively to new disposals and new classifications of disposal groups as held for sale beginning in fiscal 2015. However, early adoption is permitted. The Company does not expect the adoption of this standard will have a material impact on the consolidated financial statements.

Note 3 — Subsequent Event

On July 15, 2014, the Company amended its revolving credit facility to provide for a \$200 million term loan. This term loan will have an eight-year term and a variable rate based on the one-month London Interbank Offered Rate (LIBOR) plus a fixed spread. The Company will use this term loan combined with commercial paper borrowings to refinance \$400 million public notes maturing in August 2014.

Note 4 — Divestitures and Plant Closure

Divestiture of Paper Packaging Division

On March 31, 2014, the Company completed the sale of its Paper Packaging Division. Annual net sales by this division were approximately \$160 million. Net proceeds of the transaction totaled \$79.8 million, subject to customary post-closing adjustments. A \$9.4 million pre-tax gain on the sale was recorded as part of other non-operating income

for the six months ended June 30, 2014.

Pressure Sensitive Materials Plant Closure

In March 2014, the Company announced the closure of its plant in Stow, Ohio, one of its Pressure Sensitive Materials manufacturing facilities. Operations ceased at this location in May 2014. During the six months ended June 30, 2014, plant closure costs of \$25.0 million were recorded and approximately \$20 million of cash payments were made. These costs were primarily recorded within cost of products sold (\$23.2 million) and included a withdrawal liability for a multi-employer pension plan settlement. The Company expects that closure costs and cash payments during the second half of 2014 will not be significant.

## Divestiture of Clysar

On May 29, 2013, the Company completed the sale of its Clysar thin gauge shrink film plant. Annual net sales of Clysar films were approximately \$70 million and were sold primarily through distributors. A \$5.9 million pre-tax gain on the sale was recorded as part of other non-operating income during the second quarter of 2013. As of June 30, 2013, net proceeds of the transaction totaled \$30.4 million, subject to customary post-closing adjustments, which reduced the proceeds and gain slightly during the second half of 2013.

## Note 5 — Financial Assets and Financial Liabilities Measured at Fair Value

The fair values of the Company's financial assets and financial liabilities listed below reflect the amounts that would be received to sell the assets or paid to transfer the liabilities in an orderly transaction between market participants at the measurement date (exit price).

The Company's non-derivative financial instruments include cash and cash equivalents, accounts receivable, accounts payable, short-term borrowings, and long-term debt. At June 30, 2014 and December 31, 2013, the carrying value of these financial instruments, excluding long-term debt, approximates fair value because of the short-term maturities of these instruments.

Fair value disclosures are classified based on the fair value hierarchy. Level 1 fair value measurements represent exchange-traded securities which are valued at quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date. Level 2 fair value measurements are determined using input prices that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data. Level 3 fair value measurements are determined using unobservable inputs, such as internally developed pricing models for the asset or liability due to little or no market activity for the asset or liability.

The fair value measurements of the Company's long-term debt represent non-active market exchange-traded securities which are valued at quoted prices or using input prices that are directly observable or indirectly observable through corroboration with observable market data. The carrying values and estimated fair values of long-term debt at June 30, 2014 and December 31, 2013 follow:

(in millions)	June 30, 2014		December 31, 2013	
	Carrying Value	Fair Value (Level 2)	Carrying Value	Fair Value (Level 2)
Long-term debt	\$1,465.1	\$1,575.6	\$1,421.4	\$1,520.1

The fair values of derivatives are based on inputs other than quoted prices that are observable for the asset or liability. These inputs include interest rates. The financial assets and financial liabilities are primarily valued using standard calculations / models that use as their basis readily observable market parameters. Industry standard data providers are the primary source for forward and spot rate information for both interest rates and currency rates, with resulting valuations periodically validated through third-party or counterparty quotes. The fair value of the Company's derivatives follow:

(in millions)	Fair Value As of	Fair Value As of
	June 30, 2014 (Level 2)	December 31, 2013 (Level 2)

Interest rate swaps — net liability position	\$5.3	\$20.2
--	-------	--------

## Note 6 — Derivative Instruments

The Company enters into derivative transactions to manage exposures arising in the normal course of business. The Company does not enter into derivative transactions for speculative or trading purposes. The Company recognizes all derivative instruments on the balance sheet at fair value. Derivatives not designated as hedging instruments are adjusted to fair value through income. Depending on the nature of derivatives designated as hedging instruments, changes in the fair value are either offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in shareholders' equity through other comprehensive income until the hedged item is recognized. Gains or losses, if any, related to the ineffective portion of any hedge are recognized through earnings in the current period.

The Company enters into interest rate swap contracts to economically convert a portion of the Company's fixed-rate debt to variable rate debt. During the fourth quarter of 2011, the Company entered into four interest rate swap agreements with a total notional amount of \$400 million. These contracts were designated as fair value hedges of the Company's \$400 million 4.50 percent fixed-rate debt due in 2021. The variable rate for each of the interest rate swaps is based on the six-month LIBOR, set in arrears, plus a fixed spread. The variable rates are reset semi-annually at each net settlement date. Fair values of these interest rate swaps are determined using discounted cash flow or other appropriate methodologies. Asset positions are included in deferred charges and other assets with a corresponding increase in long-term debt. Liability positions are included in other liabilities and deferred credits with a corresponding decrease in long-term debt.

The Company enters into forward exchange contracts to manage foreign currency exchange rate exposures associated with certain foreign currency denominated receivables and payables. Forward exchange contracts generally have maturities of less than six months and relate primarily to major Western European currencies for the Company's European operations, the U.S. dollar for the Company's Brazilian operations, and the U.S. and Australian dollars for the Company's New Zealand and Australian operations. The Company has not designated these derivative instruments as hedging instruments. At June 30, 2014 and December 31, 2013, the Company had outstanding forward exchange contracts with notional amounts aggregating \$11.8 million and \$5.5 million, respectively. The net settlement amount (fair value) related to active forward exchange contracts is recorded on the balance sheet as either a current or long-term asset or liability and as an element of other operating income which offsets the related transaction gains or losses. The net settlement amounts were immaterial for all periods presented.

The Company is exposed to credit loss in the event of non-performance by counterparties in forward exchange contracts and interest-rate swap contracts. Collateral is generally not required of the counterparties or of the Company. In the event a counterparty fails to meet the contractual terms of a currency swap or forward exchange contract, the Company's risk is limited to the fair value of the instrument. The Company actively monitors its exposure to credit risk through the use of credit approvals and credit limits, and by selecting major international banks and financial institutions as counterparties. The Company has not had any historical instances of non-performance by any counterparties, nor does it anticipate any future instances of non-performance.

The fair values, balance sheet presentation, and the hedge designation status of derivative instruments at June 30, 2014 and December 31, 2013 are presented in the table below:

(in millions)	Balance Sheet Location	Fair Value (Level 2) as of

Costs for defined contribution pension plans were \$5.1 million and \$10.5 million for the three and six months ended June 30, 2014, respectively. Costs for defined contribution pension plans were \$4.3 million and \$9.3 million for the three and six months ended June 30, 2013, respectively. For the six months ended June 30, 2014, a curtailment benefit of \$3.0 million was recorded related to other postretirement plan changes. Benefit costs for other postretirement plans were not significant for the six months ended June 30, 2013.

## Note 10 — Accumulated Other Comprehensive Loss

The components and activity of accumulated other comprehensive loss are as follows:

(in millions)	Foreign Currency Translation	Pension And Other Postretirement Liability Adjustments	Accumulated Other Comprehensive Loss
December 31, 2012	\$80.5	\$(193.4	) \$(112.9
Other comprehensive loss before reclassifications	(66.6	) —	(66.6

Net current period other comprehensive income	29.2	(1.5	) 27.7
June 30, 2014	\$21.2	\$(92.2	) \$(71.0

Accumulated other comprehensive loss associated with pension and other postretirement liability adjustments are net of tax effects of \$56.6 million and \$55.6 million as of June 30, 2014 and December 31, 2013, respectively.

Reclassifications of \$3.3 million (\$2.1 million, net of tax) and \$6.6 million (\$4.2 million, net of tax) for the three months ended June 30, 2014 and 2013, respectively, related to pension costs. Reclassifications of \$7.5 million (\$4.7 million, net of tax) and \$13.7 million (\$8.4 million, net of tax) for the six months ended June 30, 2014 and 2013,

respectively, related to pension costs. Other comprehensive income before reclassifications of \$7.7 million (\$4.8 million, net of tax) for the three and six months ended June 30, 2014, related to remeasurement of other postretirement plans triggered by curtailment. An additional reclassification of \$2.2 million (\$1.4 million, net of tax) for the three and six months ended June 30, 2014, related to curtailment benefits associated with other postretirement plans. Refer to Note 9 — Components of Net Periodic Benefit Cost for additional detail.

## Note 11 — Earnings Per Share Computations

The Company considers unvested share-based payment awards that contain nonforfeitable rights to receive dividends or dividend equivalents (whether paid or unpaid) to be participating securities, and thus includes them in the two-class method of computing earnings per share. Participating securities include a portion of the Company's unvested employee stock awards, which receive nonforfeitable cash payments equal to the dividend on the Company's common stock. The calculation of earnings per share for common stock shown below excludes the income attributable to the participating securities from the numerator and excludes the dilutive impact of those awards from the denominator.

Certain stock awards outstanding were not included in the computation of diluted earnings per share above because they would not have had a dilutive effect. The excluded stock awards represented an aggregate of 0.4 million shares for the three and six months ended June 30, 2014. There were no anti-dilutive stock awards outstanding for the three and six months ended June 30, 2013.

## Note 12 — Legal Proceedings

The Company is involved in a number of lawsuits incidental to its business, including environmental-related litigation and routine litigation arising in the ordinary course of business. Although it is difficult to predict the ultimate outcome of these cases, the Company believes, except as discussed below, that any ultimate liability would not have a material adverse effect on the Company's consolidated financial condition or results of operations.

### Environmental Matters

The Company is a potentially responsible party ("PRP") pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (commonly known as "Superfund") and similar state and foreign laws in proceedings associated with seventeen sites around the United States and one in Brazil. These proceedings were instituted by the United States Environmental Protection Agency and certain state and foreign environmental agencies at various times beginning in 1983. Superfund and similar state and foreign laws create liability for investigation and remediation in response to releases of hazardous substances in the environment. Under these statutes, joint and several liability may be imposed on waste generators, site owners and operators, and others regardless of fault. Although these regulations could require the Company to remove or mitigate the effects on the environment at various sites, perform remediation work at such sites, or pay damages for loss of use and non-use values, the Company expects its liability in these proceedings to be limited to monetary damages. The Company expects its future liability relative to these sites to be insignificant, individually and in the aggregate. The Company has accrued an amount that it believes to be adequate to cover its exposure.

### São Paulo Tax Dispute

Two of the Company's subsidiaries (Dixie Toga Ltda ("Dixie Toga") and Itap Bemis Ltda.) were involved in a tax dispute with the City of São Paulo, Brazil ("City"). The City imposes a tax on the rendering of printing services. The City assessed this city services tax on the production and sale of printed labels and packaging products. The Company disagreed and contended that the city services tax was not applicable to its products and that the products were subject only to the state value added tax ("VAT"). Under Brazilian law, state VAT and city services tax are mutually exclusive and the same transaction can be subject to only one of those taxes. Based on a ruling from the State of São Paulo, advice from legal counsel, and long standing business practice, the Company appealed the city services tax and instead continued to collect and pay only the state VAT.

The City disagreed and assessed the subsidiaries the city services tax for the multiple years dating back to 1991. The Company challenged the assessments and ultimately litigated the issue. Multiple courts including the Lower Tax Court in the city of São Paulo and the São Paulo Court of Justice previously issued decisions in favor of the Company. In May 2014, the Second Panel of the Supreme Court for the State of São Paulo issued a decision in favor of the Company in one of the relevant lawsuits. The City did not appeal, and the decision is final. We expect it may take several years before the remaining cases are fully decided, but we believe this decision has established precedence and should lead to a favorable ruling in the remaining cases.

### Brazil Tax Dispute - Goodwill Amortization

During October 2013, Dixie Toga received an income tax assessment in Brazil for the tax years 2009 through 2011 that relates to the amortization of certain goodwill generated from the acquisition of Dixie Toga. The income tax assessed for those years is approximately \$17.3 million, translated to U.S. dollars at the June 30, 2014 exchange rate. The Company expects that tax examinations for years after 2011 will include similar assessments as the Company continues to claim the tax benefits associated with the goodwill amortization. An ultimate adverse resolution on these assessments, including interest and penalties, could be material to the Company's consolidated results of operations and/or cash flows.

The Company has been advised by its legal and tax advisors that its position with respect to the deductions is allowable under the tax laws of Brazil. The Company is contesting the disallowance and believes it is more likely than not the tax benefit will be sustained in its entirety and consequently has not recorded a liability. The Company intends to litigate the matter if it is not resolved at the administrative appeals levels. The ultimate outcome will not be determined until the Brazilian tax appeal process is complete, which could take several years. At this time, the Company believes that final resolution of the assessment will not have a material impact on the Company's consolidated financial statements.

## Brazil Investigation

On September 18, 2007, the Secretariat of Economic Law ("SDE"), a governmental agency in Brazil, initiated an investigation into possible anti-competitive practices in the Brazilian flexible packaging industry against a number of Brazilian companies including a Dixie Toga subsidiary. The investigation relates to periods prior to the Company's acquisition of control of Dixie Toga and its subsidiaries. Given the nature of the proceedings, the Company is unable at the present time to predict the outcome of this matter.

## Multi-employer Defined Benefit Pension Plans

As of June 30, 2014, the Company participates in one multi-employer defined benefit pension plan based on obligations arising under collective bargaining agreements covering union-represented employees. The Company does not directly manage this multi-employer pension plan, which is generally managed by a board of trustees, half of whom are appointed by the unions and the other half by employers contributing to the plans. Based on the information provided by the plan administrator, the Company is aware that this plan is underfunded. In addition, pension-related legislation requires underfunded pension plans to improve their funding ratios within prescribed intervals based on the level of their underfunding. As a result, the Company expects its contributions to this plan to increase in the future.

Under current law regarding multi-employer defined benefit plans, a plan's termination, the Company's voluntary partial or full withdrawal, or the mass withdrawal of all contributing employers from any underfunded multi-employer pension plan, would require the Company to make payments to the plan for the Company's proportionate share of the multi-employer pension plan's unfunded vested liabilities. In addition, if a multi-employer defined benefit pension plan fails to satisfy certain minimum funding requirements, the IRS may impose a nondeductible excise tax of five percent on the amount of the accumulated funding deficiency for those employers contributing to the fund. It cannot be assured that there will not be a withdrawal event where the amount the Company would be required to contribute would have a material adverse impact on our consolidated financial condition, results of operations, or cash flows.

As of December 31, 2013, based on the most recently available valuation data, the Company estimated a full withdrawal from its two remaining multi-employer plans would result in a charge of approximately \$25 million, with the option to pay the balance in installments over twenty years. During the six months ended June 30, 2014, the Company settled and paid a withdrawal liability for the withdrawal from the Central States Southeast and Southwest Areas Pension Fund as part of a Pressure Sensitive Materials plant closure (refer to Note 4 — Divestitures and Plant Closure). The Company's current estimate of residual exposure related to its one remaining plan is not significant.

Note 13 — Segments of Business

The Company's business activities are organized around and aggregated into its three principal business segments, U.S. Packaging, Global Packaging, and Pressure Sensitive Materials, based on their similar economic characteristics, products, production process, types of customers, and distribution methods. Both internal and external reporting conforms to this organizational structure, with no significant differences in accounting policies applied. Minor intersegment sales are generally priced to reflect nominal markups. The Company evaluates the performance of its segments and allocates resources to them based primarily on operating profit, which is defined as profit before general corporate expense, interest expense, other non-operating income, and income taxes.

A summary of the Company's business activities reported by its three business segments follows:

## Overview

Bemis Company, Inc. is a leading global manufacturer of packaging and pressure sensitive materials supplying a variety of markets. Historically, about 65 percent of our total net sales are to customers in the food industry. Sales of our packaging products are widely diversified among food categories and can be found in nearly every aisle of the grocery store. Our emphasis on supplying packaging to the food industry has typically provided a more stable market environment for our U.S. Packaging and Global Packaging business segments, which accounted for approximately 89 percent of our net sales in 2013. Our remaining net sales are from our Pressure Sensitive Materials business segment which, while diversified in end use products, is more exposed to economically sensitive end markets.

## Market Conditions

The markets into which our products are sold are highly competitive. Our leading market positions in packaging for perishable food and medical device products reflect our focus on value-added, proprietary products that provide food safety and sterility benefits. We also manufacture products for which our technical know-how and economies of scale

offer us a competitive advantage. The primary raw materials for our business segments are polymer resins and films, paper, inks, adhesives, aluminum, and chemicals.

## Facility Consolidation

To improve efficiencies and reduce fixed costs, we initiated a facility consolidation program during the fourth quarter of 2011 and expanded the program in the second quarter of 2012. In total, nine production facilities were closed, and while some low margin business was shed, most of the production from these facilities has been transferred to other facilities. The total cost of the programs was \$152.5 million which included \$58.0 million in employee-related costs, \$51.2 million in fixed asset accelerated depreciation and write-downs, and \$43.3 million in other facility consolidation costs.

We recorded \$20.9 million and \$30.2 million of charges associated with the facility consolidation programs during the three and six months ended June 30, 2013. These costs have been recorded on the consolidated statement of income as facility consolidation and other costs. Cash payments for these programs during the six months ended June 30, 2013 totaled \$22.5 million. At the end of 2013, the facility consolidation program was substantially complete.

## Divestitures, Plant Closure, and Acquisition

### Divestiture of Paper Packaging Division

On March 31, 2014, we completed the sale of our Paper Packaging Division. Annual net sales by this division were approximately \$160 million. Net proceeds of the transaction totaled \$79.8 million, subject to customary post-closing adjustments. A \$9.4 million pre-tax gain on the sale was recorded as part of other non-operating income for the six months ended June 30, 2014.

### Pressure Sensitive Materials Plant Closure

In March 2014, we announced the closure of our plant in Stow, Ohio, one of our Pressure Sensitive Materials manufacturing facilities. Operations ceased at this location in May 2014. During the six months ended June 30, 2014, plant closure costs of \$25.0 million were recorded and approximately \$20 million of cash payments were made. These costs were primarily recorded within cost of products sold (\$23.2 million) and included a withdrawal liability for a multi-employer pension plan settlement. We expect that closure costs and cash payments during the second half of 2014 will not be significant.

### Acquisition of Specialty Film Manufacturer in Foshan, China

On July 1, 2013, we acquired Foshan New Changsheng Plastics Films Co., LTD ("NCS"), a specialty film manufacturer located in Foshan, China. NCS is a supplier to our food packaging plant in Dongguan, China, and other specialty film product customers. The acquisition of this film platform is expected to provide cost and logistics benefits to support the Company's broader Asia-Pacific growth strategy. The cash purchase price was \$75.6 million.

### Divestiture of Clysar Plant in Clinton, Iowa

On May 29, 2013, we completed the sale of our Clysar thin gauge shrink film plant. Annual net sales of Clysar films were approximately \$70 million and were sold primarily through distributors into the display market. Net proceeds of the transaction totaled \$30 million.

## Results of Operations — Second Quarter 2014

## Consolidated Overview

(in millions, except per share amounts)

	2014	2013
Net sales	\$1,241.6	\$1,297.1
Net income	65.8	53.1
Diluted earnings per share	0.65	0.51

Net sales for the second quarter of 2014 decreased 4.3 percent compared to the same period of 2013. The divestitures of the Clysar business in 2013 and the Paper Packaging Division in 2014 reduced sales by 4.0 percent. The acquisition of NCS during the third quarter of 2013 increased net sales by 1.5 percent in the current quarter. The impact of currency translation reduced net sales by 1.5 percent. The remaining 0.3 percent decrease in net sales represents an approximate 3 percent reduction due to lower volume, substantially offset by the benefit of increased selling prices and improved sales mix.

Diluted earnings per share for the second quarter of 2014 were \$0.65 compared to \$0.51 reported in the same quarter of 2013. Results for the second quarter of 2013 included a \$0.13 charge associated with facility consolidation and other costs and a \$0.03 gain on the sale of our Clysar plant.

## U.S. Packaging Business Segment

(dollars in millions)

	2014	2013
Net sales	\$725.8	\$780.9
Operating profit (See Note 13 to the Condensed Consolidated Financial Statements)	101.0	80.3
Operating profit as a percentage of net sales	13.9	% 10.3

For the second quarter of 2014, U.S. Packaging net sales of \$725.8 million represented a decrease of 7.1 percent compared to the same period of 2013. The divestitures of the Clysar business in 2013 and the Paper Packaging Division in 2014 reduced sales by 6.6 percent. The remaining 0.5 percent decrease in net sales reflects approximately 3 percent lower unit volumes driven by generally softer demand, partially offset by increased selling prices and improved sales mix as a result of our ongoing focus to increase sales of value-added flexible packaging products.

Operating profit for the second quarter of 2014 was \$101.0 million, or 13.9 percent of net sales, compared to \$80.3 million, or 10.3 percent of net sales in 2013. Operating profit in 2013 was negatively impacted by \$21.2 million of facility consolidation and other costs. The current period profit reflects the favorable impact of divestitures and increased selling prices and improved sales mix, offset by the decrease in unit sales volume.

## Global Packaging Business Segment

(dollars in millions)

	2014	2013
Net sales	\$371.8	\$374.4
Operating profit (See Note 13 to the Condensed Consolidated Financial Statements)	26.6	27.4
Operating profit as a percentage of net sales	7.2	% 7.3

For the second quarter of 2014, Global Packaging net sales of \$371.8 million represented a decrease of 0.7 percent compared to the second quarter of 2013. The impact of currency translation reduced net sales by 5.8 percent compared to the previous year, primarily reflecting the weaker Brazilian currency. The acquisition of NCS during the third quarter of 2013 increased net sales by 5.2 percent in the current quarter. The remaining 0.1 percent decrease in Global Packaging net sales reflects approximately 4 percent lower unit volumes driven by generally lower consumer demand in South America, partially offset by increased selling prices and improved sales mix as a result of our ongoing focus

to increase sales of value-added packaging products.

Operating profit for the second quarter of 2014 was \$26.6 million, or 7.2 percent of net sales, compared to \$27.4 million, or 7.3 percent, of net sales in 2013. The net effect of currency translation decreased operating profit during the second quarter of 2014 by \$1.7 million compared to the same period of 2013. Operating profit in 2013 was positively impacted by \$0.3 million related to facility consolidation and other costs. The operating profit benefit of higher unit sales of value-added healthcare packaging was offset by the impact of generally lower unit sales of food packaging.

#### Pressure Sensitive Materials Business Segment

(dollars in millions)	2014	2013		
Net sales	\$144.0	\$141.8		
Operating profit (See Note 13 to the Condensed Consolidated Financial Statements)	9.8	6.0		
Operating profit as a percentage of net sales	6.8	% 4.2		%

Pressure Sensitive Materials net sales totaled \$144.0 million for the second quarter of 2014, a 1.6 percent increase from the same period in 2013. Currency translation increased net sales by 2.0 percent during the period. The remaining 0.4 percent decrease in net sales reflects an approximate 4 percent decrease associated with generally lower unit sales volumes, partially offset by higher selling prices and favorable sales mix of value-added graphic products.

Operating profit for the second quarter of 2014 was \$9.8 million, or 6.8 percent of net sales, compared to operating profit of \$6.0 million, or 4.2 percent, of net sales in 2013. The increase in operating profit during the period reflects improved global production efficiencies and cost control as well as the strengthening demand in Europe for value-added graphic products sold for advertising and promotional applications.

#### Consolidated Gross Profit

(dollars in millions)	2014	2013		
Gross profit	\$245.7	\$251.8		
Gross profit as a percentage of net sales	19.8	% 19.4		%

Consolidated gross profit as a percentage of sales increased in the second quarter of 2014 reflecting the favorable impact of divestitures and increased sales of value-added products.

#### Consolidated Selling, General, and Administrative Expenses

(dollars in millions)	2014	2013		
Selling, general, and administrative expenses (SG&A)	\$119.8	\$132.1		
SG&A as a percentage of net sales	9.6	% 10.2		%

SG&A expenses declined \$1.5 million due to the effects of currency translation. SG&A expenses also declined due to business divestitures and employee-related expenses. We expect total SG&A to be slightly less than 10 percent of net sales for the full year 2014.

#### Interest Expense

(dollars in millions)	2014	2013		
Interest expense	\$17.0	\$17.0		
Effective interest rate	4.6	% 4.5		%

Bonds that mature August 1, 2014 are expected to be refinanced with lower variable rate debt.

Edgar Filing: BEMIS CO INC - Form 10-Q

Other Non-operating Income (in millions)	2014	2013		
Other non-operating income	\$(1.5	) \$(7.2	)	

A \$5.9 million pre-tax gain on the sale of our Clysar plant was recorded as part of other non-operating income during the second quarter of 2013.

Consolidated Income Taxes (dollars in millions)	2014	2013		
Income taxes	\$34.5	\$27.4		
Effective tax rate	34.4	% 34.0		%

We expect the effective income tax rate for the second half of 2014 to be approximately 34.5 percent.

Results of Operations — Six Months Ended June 30, 2014

Consolidated Overview (in millions, except per share amounts)	2014	2013		
Net sales	\$2,479.4	\$2,552.1		
Net income	115.0	102.4		
Diluted earnings per share	1.13	0.98		

Net sales for the six months ended June 30, 2014, decreased 2.8 percent from the same period of 2013. The impact of currency translation reduced net sales by 2.2 percent. The divestitures of the Clysar business in 2013 and the Paper Packaging Division in 2014 reduced sales by 2.7 percent. The acquisition of NCS during the third quarter of 2013 increased net sales by 1.4 percent in the current quarter. Plant closures during 2013 reduced sales by 0.1 percent. The remaining 0.8 percent increase in net sales represents the net benefit of increased selling prices and improved sales mix, partially offset by an approximate 3 percent decrease in unit volumes.

Diluted earnings per share for the six months ended June 30, 2014 were \$1.13 compared to \$0.98 reported in the same period of 2013. Results for 2014 included a \$0.16 charge associated with a Pressure Sensitive Materials plant closing and a \$0.06 gain on the sale of our Paper Packaging Division. Results for 2013 included a \$0.19 charge associated with facility consolidation and other costs and a \$0.03 gain on the sale of our Clysar plant.

U.S. Packaging Business Segment (dollars in millions)	2014	2013		
Net sales	\$1,464.0	\$1,526.9		
Operating profit (See Note 13 to the Condensed Consolidated Financial Statements)	192.8	166.3		
Operating profit as a percentage of net sales	13.2	% 10.9		%

U.S. Packaging net sales decreased 4.1 percent in the six months ended June 30, 2014, compared to the same period of 2013. The divestitures of the Clysar business in 2013 and the Paper Packaging Division in 2014 reduced sales by 4.4 percent. Plant closures during 2013 reduced sales by 0.2 percent. The remaining 0.5 percent increase in net sales reflects the net benefit of increased selling prices and improved sales mix as a result of our ongoing focus to increase sales of value-added flexible packaging products, partially offset by an approximate 3 percent decrease in unit volumes driven by generally softer demand.

Operating profit for the six months ended June 30, 2014, was \$192.8 million, or 13.2 percent of net sales, compared to \$166.3 million, or 10.9 percent of net sales, in 2013. Operating profit in 2013 was negatively impacted by \$30.6 million of facility consolidation and other costs.

Global Packaging Business Segment (dollars in millions)	2014	2013		
Net sales	\$728.6	\$742.9		
Operating profit (See Note 13 to the Condensed Consolidated Financial Statements)	50.7	53.3		
Operating profit as a percentage of net sales	7.0	% 7.2		%

Global Packaging net sales decreased 1.9 percent in the six months ended June 30, 2014 compared to the same period of 2013. Acquisitions increased net sales by approximately 4.9 percent, which was more than offset by a 8.2 percent decrease in net sales related to currency translation. The remaining 1.4 percent increase in Global Packaging net sales reflects the net benefit of increased selling prices and improved sales mix as a result of our ongoing focus to increase sales of value-added flexible packaging products, partially offset by an approximate 3 percent decrease in unit volumes driven by generally lower consumer demand in South America.

Operating profit for the six months ended June 30, 2014 was \$50.7 million, or 7.0 percent of net sales, compared to \$53.3 million, or 7.2 percent of net sales, in 2013. The net effect of currency translation decreased operating profit during 2014 by \$4.5 million.

Pressure Sensitive Materials Business Segment (in millions)	2014	2013		
Net sales	\$286.8	\$282.3		
Operating (loss) profit (See Note 13 to the Condensed Consolidated Financial Statements)	(4.7	) 13.7		
Operating (loss) profit as a percentage of net sales	(1.6	)% 4.9		%

Pressure Sensitive Materials net sales increased 1.6 percent in the six months ended June 30, 2014 compared to the same period of 2013. The impact of currency translation increased net sales by 1.7 percent. The remaining 0.1 percent decrease in net sales reflects an approximate 4 percent decrease associated with generally lower unit sales volumes, partially offset by higher selling prices and favorable sales mix of value-added graphic products.

Consolidated Gross Profit (in millions)	2014	2013		
Gross profit	\$460.3	\$493.6		
Gross profit as a percentage of net sales	18.6	% 19.3		%

Consolidated gross profit decreased in the six months ended June 30, 2014 reflecting \$23.2 million of costs associated with the closure of one of our Pressure Sensitive Materials plants.

Consolidated Selling, General, and Administrative Expenses (in millions)	2014	2013		
Selling, general and administrative expenses (SG&A)	\$242.5	\$262.7		
SG&A as a percentage of net sales	9.8	% 10.3		%

SG&A expenses declined \$4.4 million due to the effects of currency translation. SG&A expenses also declined due to business divestitures and employee-related expenses. We expect total SG&A to be slightly less than 10 percent of net sales for the full year 2014.

Other Non-operating Income (in millions)	2014	2013		
Other non-operating income	\$(14.1	) \$(3.1	)	

A \$9.4 million pre-tax gain related to the sale of our Paper Packaging Division and \$4.7 million of interest income were recorded in the six months ended June 30, 2014. A \$5.9 million pre-tax gain on the sale of our Clysar plant was recorded as part of other non-operating income during the second quarter of 2013. We recognized \$4.5 million of expense in the first quarter of 2013 for the write-off of indemnification receivables as the offsetting tax liability was reversed in the first quarter (see below). These equal and offsetting items had no impact on operating profit, net income, or earnings per share.

Consolidated Income Taxes (in millions)	2014	2013		
Income taxes	\$60.2	\$49.5		
Effective tax rate	34.4	% 32.6	%	

During the first quarter of 2013, a \$4.5 million tax benefit was recognized for the reversal of non-U.S. tax liabilities that were assumed in a past acquisition. We also recognized an equal amount of non-operating expense for the write-off of related receivables (see above). These equal and offsetting items had no impact on operating profit, net income, or earnings per share for 2013. We expect the effective income tax rate for the second half of 2014 to be approximately 34.5 percent.

## Liquidity and Capital Resources

### Net Debt to Total Capitalization

Net debt to total capitalization (which includes total debt net of cash balances divided by total debt net of cash balances plus equity) was 44.4 percent and 43.5 percent at June 30, 2014 and December 31, 2013, respectively. Total debt as of June 30, 2014 and December 31, 2013 was \$1.5 billion and \$1.4 billion, respectively.

### Cash Flow

Net cash provided by operating activities was \$70.4 million for the first six months of 2014, compared to \$102.4 million for the first six months of 2013. In 2014 we used \$20 million of cash for payments related to the closure of one of our Pressure Sensitive Materials plants. Increased levels of working capital at June 30, 2014, reflect generally higher inventory levels in anticipation of increased shipments during the remainder of the year.

Net cash provided by investing activities was \$18.3 million for the first six months of 2014 compared to cash used by investing activities of \$18.4 million for the same period of 2013. In 2014 we received \$79.8 million as net proceeds from the divestiture of our Paper Packaging Division. In 2013 we received \$30.4 million as net proceeds from the divestiture of our Clysar plant.

Net cash used in financing activities was \$108.6 million for the six months ended June 30, 2014, compared to net cash used in financing activities of \$42.6 million for the same period of 2013, primarily reflecting a higher number of the Company's shares repurchased during the six months ended June 30, 2014.

## Available Financing

In addition to using cash provided by operating activities, we issue commercial paper to meet our short-term liquidity needs. As of June 30, 2014, our commercial paper debt outstanding was \$273.0 million. Based on our current credit rating, we enjoy ready access to the commercial paper markets.

On August 12, 2013, we amended our revolving credit facility to increase the total amount available from \$800 million to \$1.1 billion and to extend the term from July 21, 2016 to August 12, 2018. This facility is principally used as back-up for our commercial paper program. Our revolving credit facility is supported by a group of major U.S. and international banks. Covenants imposed by the revolving credit facility include minimum net worth calculations and a maximum ratio of debt to total capitalization. The revolving credit agreement includes a \$100 million multicurrency limit to support the financing needs of our international subsidiaries. As of June 30, 2014, there was \$273.0 million of debt outstanding supported by this credit facility, leaving \$827.0 million of available credit. If we were not able to issue commercial paper, we would expect to meet our financial liquidity needs by accessing the bank market, which would increase our borrowing costs. Borrowings under the credit agreement are subject to a variable interest rate.

Public notes totaling \$400 million are scheduled to mature in August 2014. These amounts have been classified as long-term liabilities in accordance with the Company's ability and intent to refinance such obligations on a long-term basis. On July 15, 2014, we further amended our revolving credit facility to provide for a \$200 million term loan. This term loan will have an eight-year term and a variable rate based on the one-month London Interbank Offered Rate (LIBOR) plus a fixed spread. We will use this term loan combined with commercial paper borrowings to refinance the \$400 million public notes maturing in August 2014.

## Liquidity Outlook

We expect cash flow from operations and available liquidity described above to be sufficient to support future operating activities. There can be no assurance, however, that the cost or availability of future borrowings will not be impacted by future capital market disruptions. In addition, increases in raw material costs would increase our short-term liquidity needs.

## Dividends

In February 2014, the Board of Directors approved the 31<sup>st</sup> consecutive annual increase in the quarterly cash dividend on common stock to \$0.27 per share, a 3.8 percent increase.

## New Accounting Pronouncements

Refer to Note 2 — New Accounting Guidance in the Condensed Consolidated Financial Statements.

## Critical Accounting Estimates and Judgments

Our discussion and analysis of our financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. On an ongoing basis, management evaluates its estimates and judgments, including those related to retirement benefits, intangible assets, goodwill, and expected future performance of operations. Our estimates and judgments are based on

historical experience and on various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. These critical accounting estimates are discussed in detail in “Management’s Discussion and Analysis — Critical Accounting Estimates and Judgments” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the Company's market risk during the six month period ended June 30, 2014. For additional information, refer to Note 5 and Note 6 to the Condensed Consolidated Financial Statements and to Part II, Item 7A of the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

### ITEM 4. CONTROLS AND PROCEDURES

The Company's management, under the direction, supervision, and involvement of the Chief Executive Officer and the Vice President and Controller (the principal financial officer), has carried out an evaluation, as of the end of the period covered by this report, of the effectiveness of the design and operation of the disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) of the Company. Based on this evaluation, the Chief Executive Officer and the Vice President and Controller (the principal financial officer) have concluded that disclosure controls and procedures in place at the Company are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the Securities and Exchange Commission's rules and forms and is accumulated and communicated to our management, including the Chief Executive Officer and the Vice President and Controller (the principal financial officer), as appropriate to allow timely decisions regarding required disclosure. There were no changes in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II — OTHER INFORMATION

## ITEM 1. LEGAL PROCEEDINGS

The material set forth in Note 12 of the Notes to Condensed Consolidated Financial Statements is incorporated herein by reference.

## ITEM 1A. RISK FACTORS

Information about our risk factors is contained in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2013. We believe that at June 30, 2014, there has been no material change to this information.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
