**NEWS RELEASE**

**Enbridge Announces Plans to Hold Open Season for Proposed LaCrosse Pipeline**

**HOUSTON and CALGARY, Alberta** (April 1, 2009) Enbridge Inc. (TSX:ENB) (NYSE:ENB) today announced it will conduct a non-binding Open Season beginning April 13, 2009, for an interstate pipeline to transport natural gas from Carthage, Texas, to Washington Parrish in Southeastern Louisiana.

The proposed LaCrosse Pipeline, which would run from Enbridge's Carthage Hub to an interconnection with Sonat Pipeline in Washington Parish, Louisiana, would include approximately 300 miles of 42- and 36-inch diameter pipe. The pipeline would interconnect with at least five to six major interstate pipelines along this route and could include up to as many as 12 pipeline interconnections, depending on shipper interest. Enbridge also is exploring the possibility of extending the pipeline to Florida Gas Transmission's Station 10 near Wiggins, Mississippi. The proposed project is expected to be completed in late 2011 or early 2012.

We anticipate this pipeline could move at least 1 billion cubic feet/day (bcf/d) of natural gas from the Carthage area and the Enbridge Carthage Hub and the Haynesville Shale producing basin to various interconnections with market-area pipelines located across Louisiana. This pipeline would also provide outlets for the Fort Worth and East Texas producing basins, said Patrick D. Daniel, President and Chief Executive Officer, Enbridge Inc. The Haynesville Shale is one of the most active gas plays in the United States. Our proposed LaCrosse Pipeline provides a creative and flexible solution to relieve market constraints affecting producers in the booming region.

The non-binding Open Season will run through May 15, 2009. Information received during the non-binding Open Season will be used to finalize design and final capacity for the proposed project.

Potential shippers desiring further information should contact:

## **About Enbridge**

*Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 6,000 people, primarily in Canada and the U.S. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at [www.enbridge.com](http://www.enbridge.com).*

### **CCS PROPOSALS OFFER SIGNIFICANT EMISSION REDUCTIONS**

**EDMONTON** EPCOR Utilities Inc. and Enbridge Inc. are jointly submitting two projects that each have the potential to meet nearly one-quarter of the provincial government's carbon dioxide (CO<sub>2</sub>) reduction target. Full project proposals are being submitted for funding from the Alberta Government's \$2 billion carbon capture and storage (CCS) program under the climate change action plan.

The CCS Fund has kick-started industry to work together to find technological solutions to provide a cleaner energy future, said EPCOR Executive Vice-President Brian Vaasjo. We have been working with our partners and we believe our proposals can deliver on the goals the province has established.

In 2008, the Alberta government committed to reducing CO<sub>2</sub> emissions by 200 megatonnes by 2050, said Enbridge Senior Vice President, New Ventures, Jim Schultz. Through projects like ours, we can thoroughly test our technology, share our knowledge with the industry, and help the Alberta government meet its target.

The two projects are designed to provide cleaner electricity from both existing and new electricity plants, with captured CO<sub>2</sub> piped offsite and used for enhanced oil recovery (EOR) or stored underground in saline aquifers. The proposals include North America's first project combining an Integrated Gasification Combined Cycle (IGCC) commercial-scale near-zero-emission thermal power plant with carbon capture, compression and storage (CCS). The Genesee IGCC CCS project has the potential to capture more than 3,300 tonnes per day or 1.2 million tonnes of carbon dioxide emissions a year.

The other proposal is for a post-combustion facility designed to capture CO<sub>2</sub> emissions on conventional power plants. The Genesee Amine CCS project would use an amine scrubbing process to remove CO<sub>2</sub> emissions from the flue gas of the facility. This project would be designed to capture 3,000 tonnes of CO<sub>2</sub> per day, or nearly one million tonnes a year.

Enbridge and the Alberta Saline Aquifer Project (ASAP) would be responsible for transporting captured CO<sub>2</sub> from the Genesee site for use in enhanced oil recovery or permanent storage in deep saline aquifers.

The province will review the proposals and is expected to release their funding decisions in the next three months.

**About EPCOR Utilities**

EPCOR builds, owns and operates power plants, electrical transmission and distribution networks, water and wastewater treatment facilities and infrastructure in Canada and the United States. EPCOR, headquartered in Edmonton, Alberta, has been named one of Canada's Top 100 Employers for nine consecutive years and was selected as one of Canada's 10 Most Earth-Friendly Employers. EPCOR's web-site is [www.epcor.ca](http://www.epcor.ca).

**About Enbridge**

Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. Enbridge employs approximately 6,000 people, primarily in Canada and the U.S. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at [www.enbridge.com](http://www.enbridge.com).

**About ASAP**

ASAP is an industry initiative being led by Enbridge Inc. to identify deep saline aquifers in Alberta that could be used in a carbon sequestration pilot project. A true collaborative effort, 38 organizations have been participating in the first phase of the project. For more information about ASAP, please visit [www.albertaasap.com](http://www.albertaasap.com).

**Forward-looking Information**

Certain information in this news release is forward looking and related to anticipated financial performance, events and strategies. When used in this context, words such as will, anticipate, believe, plan, intend, target and expect, and similar words suggest future outcomes. By their nature, such statements are subject to significant risks and uncertainties, which could cause EPCOR's, Enbridge's or ASAP's actual results and experience to be materially different than the anticipated results. Such risks and uncertainties include, but are not limited to, operating performance, commodity prices and volumes, load settlement, regulatory and government decisions including changes to environmental and tax legislation, weather and economic conditions, competitive pressures, construction risks, availability and cost of financing, foreign exchange risks, availability of labour and management resources and the performance of partners, contractors and suppliers.

Readers are cautioned not to place undue reliance on forward-looking statements as actual results could differ materially from the plans, expectations, estimates or intentions expressed in the forward-looking statements. Except as required by law, EPCOR, Enbridge and ASAP disclaim any intention and assume no obligation to update any forward-looking statement even if new information becomes available, as a result of future events or for any other reason.

**NEWS RELEASE**

**Enbridge Ontario Wind Power Turns on Green Energy in Kincardine**

Minister Smitherman Helps Celebrate Milestone in Renewable Generation for Ontario

**Kincardine, Ontario, April 3, 2009** Today, Enbridge Inc. officially opened the 115-turbine Enbridge Ontario Wind Power project in the Kincardine area, which is capable of producing up to 190 megawatts (MW) of renewable electricity. A ceremony held in Kincardine to mark this milestone was attended by The Honourable George Smitherman, Ontario's Deputy Premier and Minister of Energy and Infrastructure, Carol Mitchell, MPP for Huron-Bruce, Kincardine Mayor Larry Kraemer and other dignitaries.

The Kincardine community and the province of Ontario are leading the way in their support of wind and emerging clean energy technologies and Enbridge is pleased to contribute to advancing our shared goals through our own green and renewable investment program, said Jim Schultz, Senior Vice President, New Ventures, Enbridge Inc. Wind power projects like our wind farm in Kincardine further position Enbridge to become a significant player in developing one of the fastest growing sectors of electricity generation in North America.

Enbridge began construction in July of 2007 and the wind farm began supplying green energy to the province's electricity grid in August 2008. The final turbine came online in mid-February 2009. When operating at peak capacity, the 115 turbines can provide enough electricity to power between 50,000 and 60,000 homes.

Minister Smitherman helped mark the occasion held at the electrical substation by switching on one of the 115 Vestas V82 turbines that are located on the 20,000-hectare project site. Each turbine is 80 metres high and includes a three-blade rotor 82 metres in diameter.

I'm delighted to join Enbridge and the community of Kincardine to celebrate this significant milestone, said Minister Smitherman. Today at more than 950 megawatts online, Ontario leads the rest of Canada in wind power capacity. With the added impetus of the province's proposed Green Energy Act, the McGuinty government will continue to transform Ontario's electricity generation system into one of the cleanest, greenest energy supply mixes in the world.

Bringing on new, clean sources of renewable supply provides valuable spinoff benefits to our community while helping to clean up our air, said Carol Mitchell, MPP for Huron-Bruce. We're proud of our role as an energy powerhouse. Keeping the lights on keeps Ontario competitive and benefits families and businesses across the province.

Kincardine is already the leader in providing Ontario with clean electricity, said Kincardine Mayor Larry Kraemer.

Our community slogan is great energy, balanced life. We are proud of our role in producing clean, sustainable energy for all Ontarians and in helping to build the province's swiftly emerging green economy.

Today the Province of Ontario moved towards a cleaner energy economy, said Janet Holder, President of Enbridge Gas Distribution. With the official opening of the Enbridge Ontario Wind Power facility, the second largest wind farm in Canada, Ontario is well on its way to meeting its targets for renewable energy. We thank all levels of government, our business partners, the landowners who host the turbines and the people in this community for helping make green energy a priority.

---

### **Enbridge and clean energy**

Enbridge companies are leaders in the development of clean energy technologies:

Including the Enbridge Ontario Wind Power facility, Enbridge has interests in four wind farms with a combined capacity of more than 260 megawatts, or enough electricity to meet the energy requirements for about 90,000 homes. The Company also has interests in four waste heat recovery facilities in Saskatchewan that are capable of generating approximately 20 megawatts of greenhouse-gas free electricity.

Enbridge, EPCOR Utilities Inc. and the Enbridge-led Alberta Saline Aquifer Project (ASAP) are developing two carbon capture and sequestration (CCS) projects that each have the potential to meet nearly one-quarter of the Alberta government's carbon dioxide (CO<sub>2</sub>) reduction target. The two projects are designed to provide cleaner electricity from both existing and new electricity plants, with captured CO<sub>2</sub> piped offsite and used for enhanced oil recovery (EOR) or stored underground in saline aquifers.

Enbridge Gas Distribution's Toronto headquarters is the site of the world's first hybrid fuel cell power plant which harvests pipeline energy that would otherwise be wasted and combines it with fuel cell technology to generate 2.2 megawatts of ultra-clean electricity enough to serve up to 1,700 Ontario homes.

Between 1995 and 2007, Enbridge Gas Distribution's energy efficiency programs allowed customers to avoid the use of natural gas by 3.6 billion cubic metres and avoided 6.9 million tonnes of carbon dioxide emissions. The savings provide enough natural gas to serve more than 1.1 million homes for one year or are equivalent to removing 1.5 million cars from the road for a year.

Within North America, the toll-free call in number is 1-800-798-2801. Interested parties outside North America can call in to +617-614-6205. The access code is 82165737. To register for the webcast, interested parties are invited to visit [www.enbridge.com/investor](http://www.enbridge.com/investor) and follow the webcast registration link under *Investor News*. A webcast replay will be available approximately two hours after the conclusion of the event and a transcript will be posted to the website within approximately 24 hours.

The audio replay will be available at toll-free 1-888-286-8010 or +617-801-6888 for 7 days following the call. The access code for the replay is 37457619.

The conference call will cover the Company's most recent financial results and may contain forward-looking statements. When used in the call, words such as *anticipate*, *expect*, *project*, and similar expressions are intended to identify such forward-looking statements. Although Enbridge believes that these statements are based on information and assumptions which are current, reasonable and complete, these statements are necessarily subject to a variety of risks and uncertainties pertaining to operating performance, regulatory parameters, economic conditions and commodity prices. You can find a discussion of those risks and uncertainties in our Canadian securities law and American SEC filings. While Enbridge makes these forward-looking statements in good faith, should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary significantly from those expected. Except as may be required by applicable securities laws, Enbridge assumes no obligation to publicly update or revise any forward-looking statements made herein or otherwise, whether as a result of new information, future events or otherwise.

**About Enbridge**

*Enbridge Inc., a Canadian company, is a leader in energy transportation and distribution in North America and internationally. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a growing involvement in the natural gas transmission and midstream businesses. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York*

---

*State. Enbridge employs approximately 6,000 people, primarily in Canada and the U.S. Enbridge's common shares trade on the Toronto Stock Exchange in Canada and on the New York Stock Exchange in the U.S. under the symbol ENB. Information about Enbridge is available on the Company's web site at [www.enbridge.com](http://www.enbridge.com).*
