Item 8.01. Other Events.

On April 3, 2006, Gran Tierra Energy Inc. (the “Company”) announced an agreement in principle with Argosy Energy International (“Argosy”), entered into on March 31, 2006, pursuant to which the Company shall acquire Argosy. Argosy holds a diverse portfolio of producing properties, drill-ready prospects and exploration acreage in Colombia. Argosy's oil production averaged 1,140 barrels per day (net before royalty) during the fourth quarter of 2005. Argosy's remaining proven reserves at December 31 2005 are estimated at 2.80 million barrels with probable reserves of 1.63 million barrels according to independent estimates (all net before royalty). Royalty rates are 20% and 8% for Argosy's producing properties. Argosy's net land position is approximately 153,000 acres.

Terms of the acquisition include a payment of \$37.5 million cash plus \$3.5 million paid in common shares of the Company and certain overriding and net profit interests in the acquired assets valued at \$1 million. Closing is scheduled to occur on or prior to May 31, 2006 (and in any event within 60 days of the parties' entry into definitive acquisition agreement), and is subject to customary closing conditions. If the Company is unable or unwilling to complete the transaction for certain, limited reasons, the Company will be required to pay to the sellers a breakup fee of \$3.5 million, payable in either cash or common stock, at the Company's option.

The agreement to acquire Argosy is the Company's third acquisition agreement since February 15, 2006. Upon completion of the announced acquisitions, the Company's share of production is expected to increase to approximately 2,600 barrels of oil equivalent per day from the current 330 barrels per day; remaining proven reserves are estimated to increase to approximately 6.5 million barrels of oil equivalent (all before royalty, natural gas conversion 20:1) and the Company's land inventory is expected to increase to 1.7 million net acres. Utilizing a 6:1 conversion for natural gas, net production before royalty is expected to reach 3,600 barrels of oil equivalent per day, and remaining proven reserves are estimated at 9.2 million barrels of oil equivalent.

On April 3, 2006, the Company issued a press release to announce its agreement to make the above acquisition. The press release is filed as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.
