XTL Biopharmaceuticals Ltd.  
("the Company")

August 29, 2011

Dear Sirs,

Re: Immediate Report - Proteins Research for the  
Company's Drug Treatment for Multiple Myeloma

Further to the Company's announcement on May 29th, 2011, regarding the receipt of an Orphan-drug designation by the US Food and Drug Administration (FDA) for its recombinant human erythropoietin (rHuEPO) treatment of multiple myeloma blood cancer, the Company hereby announces that, following consultation with its regulatory and scientific advisors in relation to the execution of its phase 2 clinical trial with its rHuEPO drug for the treatment of multiple myeloma cancer, the Company has decided on August 29th, 2011, to conduct a research, which includes data collection in relation to the presence of the level of specific proteins in the blood of a group of multiple myeloma patients. The collected research data will assist in focusing the phase 2 clinical trial protocol. The aforementioned data collection shall be integrated in the framework of the rHuEPO phase 2 clinical trial that the Company is planning to conduct. The Company's management and advisors estimate that receipt of an approval to commence a phase 2 clinical trial after the finalization of the research data collection and their combination in the framework of the trial's protocol is expected in the second half of 2012.

The Company's estimations with the expected schedules for the receipt of an approval to commence a phase 2 clinical trial are forward-looking statements. This information is uncertain and is based on the Company's current information at the time of this immediate report. The actual schedule may be substantially different than reflected in this report, as there is no certainty to the time required to receive the regulatory agencies' approval to commence the abovementioned trial.

Respectfully;

XTL Biopharmaceuticals Ltd.
