## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with instructions for Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. However, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of results for the unaudited interim periods.

The results of operations for the six month period ended December 31, 2010 are not necessarily indicative of the results to be expected for the fiscal year ending June 30, 2011 or any other period. The unaudited consolidated financial statements and notes presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in Eagle's Form 10-K dated June 30, 2010.

The Company evaluated subsequent events for potential recognition and/or disclosure through February 11, 2011 the date the consolidated financial statements were issued.

On April 5, 2010, the Company completed its second-step conversion from the partially-public mutual holding company structure to the fully publicly-owned stock holding company structure. As part of that transaction it also completed a related offering of its common stock. As a result of the conversion and offering, the Company became the stock holding company for American Federal Savings Bank, and Eagle Financial MHC and Eagle Bancorp ceased to exist. The Company sold a total of 2,464,274 shares of common stock at a purchase price of \$10.00 per share in the offering for gross proceeds of \$24.6 million. Concurrent with the completion of the offering, shares of Eagle Bancorp common stock owned by the public were exchanged. Stockholders of Eagle Bancorp received 3.800 shares of the Company's common stock for each share of Eagle Bancorp common stock that they owned immediately prior to completion of the transaction. Accordingly, as of April 5, 2010, the Company had 8,000,000 shares of common stock authorized and 4,083,127 issued and outstanding.

In evaluating debt securities for other-than-temporary impairment losses, management assesses whether the Company intends to sell or if it is more likely than not that it will be required to sell impaired debt securities. In so doing, management considers contractual constraints, liquidity, capital, asset/liability management and securities portfolio objectives. With respect to its impaired debt securities at December 31, 2010 and June 30, 2010, management determined that it does not intend to sell and that there is no expected requirement to sell any of its impaired debt securities.

As of December 31, 2010 and June 30, 2010, there were respectively, 64 and 48, securities in an unrealized loss position and were considered to be temporarily impaired and therefore an impairment charge has not been recorded. All of such temporarily impaired investments are debt securities.

At December 31, 2010 there was one corporate obligation security that had an unrealized loss. Its unrealized loss was 0.21% of its amortized cost basis. We believe this unrealized loss is principally due to interest rate movements. As such, the Company determined that none was other-than-temporary impaired.

-9-

# EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 2. INVESTMENT SECURITIES - continued

At December 31, 2010, 49 U.S. Government and agency securities and municipal obligations have unrealized losses with aggregate depreciation of less than 4.82% from the Company's amortized cost basis of these securities. We believe these unrealized losses are principally due to interest rate movements and recent credit concerns in the municipal bond market. As such, the Company determined that none of such securities had other-than-temporary impairment.

At December 31, 2010, 7 mortgage backed and CMO securities have unrealized losses with aggregate depreciation of less than 4.17% from the Company's cost basis of these securities. We believe these unrealized losses are principally due to the credit market's concerns regarding the stability of the mortgage market and potentially rising interest rates. Two of the CMO securities are non-agency securities. At December 31, 2010 the fair value of these non-agency securities totaled \$651,000 with an unrealized loss of \$111,000, or 14.57% of the Company's amortized cost basis. Management considers available evidence to assess whether it is more likely than not that all amounts due would not be collected. In such assessment, management considers the severity and duration of the impairment, the credit ratings of the security, the overall deal and payment structure, including the Company's position within the structure, underlying obligor, financial condition and near term prospects of the issuer, delinquencies, defaults, loss severities, recoveries, prepayments, cumulative loss projections, discounted cash flows and fair value estimates. There has been no disruption of the scheduled cash flows on any of the securities. Management's analysis as of December 31, 2010 revealed no expected credit losses on these securities.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 3. LOANS RECEIVABLE - continued

The following table sets forth information regarding non-performing loans as of December 31, 2010 (dollars in thousands):

1-4 Family	\$ 925
Commercial real estate	186
Construction	650
Home equity	392
Consumer	48
Commerical	182
Total	\$ 2,383

The Company had no troubled debt restructured loans as of December 31, 2010.

#### NOTE 4. DEPOSITS

Deposits are summarized as follows (dollars in thousands):

	December		
	31, June 30,		
	2010	2010	
	(Unaudited)	(Audited)	
Noninterest checking	\$18,700	\$18,376	
Interest-bearing checking	40,540	34,658	
Statement savings	33,424	30,875	
Money market	27,622	29,021	
Time certificates of deposit	84,007	85,009	
Total	\$204,293	\$197,939	

#### NOTE 5. EARNINGS PER SHARE

Basic earnings per share for the six months ended December 31, 2010 was computed using 3,897,702 weighted average shares outstanding. Basic earnings per share for the six months ended December 31, 2009 was computed using 4,078,625 weighted average shares outstanding adjusted for the 3.800 to 1.000 exchange ratio in the second-step conversion. Diluted earnings per share was computed using the treasury stock method by adjusting the number of shares outstanding by the shares purchased. The weighted average shares outstanding for the diluted earnings per share calculations was 3,897,702 for the six months ended December 31, 2010 and 4,644,490 for the six months ended December 31, 2009 adjusted for the 3.8000 to 1.000 exchange ratio in the second-step conversion.

NOTE 6. DIVIDENDS AND STOCK REPURCHASE PROGRAM

This fiscal year Eagle paid dividends of \$0.07 per share on August 27, 2010 and November 26, 2010. A dividend of \$0.07 per share was declared on January 20, 2011, payable February 25, 2011 to stockholders of record on February 4, 2011.

At its regular meeting of January 17, 2008, the Company's Board of Directors announced a stock repurchase program for up to 28,750 shares. The plan was suspended on December 2, 2009 when the Board of Directors announced the adoption of plan of conversion and reorganization. At that date, 5,315 shares have been purchased under this program. On April 5, 2010, the date of completion of the conversion and reorganization, the repurchase program was terminated and all then existing treasury stock was eliminated.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## NOTE 7. FAIR VALUE DISCLOSURES

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. FASB ASC 825 allows the Company to elect to apply fair value accounting for designated instruments to improve financial reporting and mitigate volatility in reported earnings. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

FASB ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value.

While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Investment Securities Available for Sale – Securities classified as available for sale are reported at fair value utilizing Level 1 and Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayments speeds, credit information and the bond's terms and conditions, among other things.

# EAGLE BANCORP MONTANA, INC. AND SUBSIDIARY

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

#### NOTE 7. FAIR VALUE DISCLOSURES - continued

Loan Subject to Fair Value Hedge – The Company has one loan that is carried at fair value subject to a fair value hedge. Fair value is determined utilizing valuation models that consider the scheduled cash flows through anticipated maturity and is considered a Level 3 input.

Loans Held for Sale – These loans are reported at the lower of cost or fair value. Fair value is determined based on expected proceeds based on sales contracts and commitments and are considered Level 2 inputs.

Impaired Loans – Impaired loans are reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on internally customized discounting criteria.

Repossessed Assets – Real Estate and other assets acquired in the settlement of loans are reported at fair value less estimated costs to dispose of the property using Level 2 inputs. The fair values are determined by appraisals using valuation techniques consistent with the market approach using recent sales of comparable properties. In cases where such inputs are unobservable, the balance is reflected within the Level 3 hierarchy.

Derivative financial instruments – Fair values for interest rate swap agreements are based upon the amounts required to settle the contracts. These instruments are valued using Level 3 inputs utilizing valuation models that consider: (a) time value, (b) volatility factors and (c) current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Although the Company utilizes counterparties' valuations to assess the reasonableness of its prices and valuation techniques, there is not sufficient corroborating market evidence to support classifying these assets and liabilities as Level 2.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of December 31, 2010, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs		Level 2 Inputs	.1	Level 3 Inputs			Total Fair Value	
	(In thousands)								
Financial Assets:									
Investment securities									
available-for-sale	\$ -	\$	105,222	\$	-		\$	105,222

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## NOTE 7. FAIR VALUE DISCLOSURES - continued

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table summarizes financial assets and nonfinancial liabilities measured at fair value on a nonrecurring basis as of December 31, 2010, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1	Level 2	Level 3	Total Fair			
	Inputs	Inputs	Inputs	Value			
	(In thousands)						
Impaired loans	\$ -	\$ -	\$ 902	\$ 902			
Repossessed assets	-	-	1,487	1,487			

As of December 31, 2010, certain impaired loans were remeasured and reported at fair value through a specific valuation allowance with allocation of the allowance for loan losses based upon the fair value of the underlying collateral. Impaired loans with a carrying value of \$1,562,000 were reduced by specific valuation allowance allocations totaling \$660,000 to a total reported fair value of \$902,000 based on collateral valuations utilizing Level 3 valuation inputs.

Repossessed assets are recorded at market value less estimated cost to sell, and are measured for impairment by comparing the carrying value with the current fair value of the assets. Repossessed assets with a carrying amount of \$1,547,000 were reduced by valuation adjustments of \$60,000 to a total reported fair value of \$1,487.000 bas on collateral valuations utilizing Level 3 valuation inputs as of December 31, 2010.

Those financial instruments not subject to the initial implementation of FASB ASC 820 are required under FASB ASC 825 to have their fair value disclosed, both assets and liabilities recognized and not recognized in the statement of financial position, for which it is practicable to estimate fair value. Below is a table that summarizes the fair market values of all financial instruments of the Company at December 31, 2010, and June 30, 2010, followed by methods and assumptions that were used by the Company in estimating the fair value of the classes of financial instruments not covered by FASB ASC 820.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.
