**COMMENT**

Terry Burman, Group Chief Executive, commented In the third quarter Group sales rose by 5.7%, the like for like increase being 1.8%.

UK like for like sales were down by 8.1% against a background of difficult trading conditions.

The US business, which accounts for some 70% of Group sales, had another good quarter with like for like sales up 6.6%. Performance during the latter two months of the period, although less strong, remained solid.

Pending the outcome of the all important fourth quarter, which represents some 40% of annual sales, we believe that the range of analysts pre-tax profit estimates for the year as a whole should be wider than presently forecast, with an upper level no higher than that of last year (restated for IFRS). Factors contributing to this view include the continuation of difficult trading conditions in the UK, some additional easing of the US gross margin and potential uninsured costs arising from the hurricanes.

**Note 2 - Impact of constant exchange rates**

The Group has historically used constant exchange rates to compare period-to-period changes in certain financial data. This is referred to as constant exchange rates throughout this release. The Group considers this to be a useful measure for analysing and explaining changes and trends in the Group's results. The impact of the re-calculation of sales at constant exchange rates, including a reconciliation to the Group's GAAP sales, is shown below:
