### ALCOA TO OFFER TO ACQUIRE ALCAN

#### Companies

**Ticker** NYSE: AA

NYSE: AL; TSX: AL

**Description** Alcoa is the world's leading producer of primary aluminum, fabricated aluminum, and alumina, and is active in all major aspects of the industry: technology, mining, refining, smelting, fabricating, and recycling. Aluminum and alumina represent approximately three-fourths of Alcoa's revenues, and the price of aluminum influences the operating results of Alcoa. Nonaluminum products include precision castings, industrial fasteners, consumer products, food service and flexible packaging products, plastic closures and electrical distribution systems for cars and trucks. Alcoa's products are used worldwide in aircraft, automobiles, commercial transportation, packaging, consumer products, building and construction, and industrial applications. Alcoa is a global company operating in 44 countries.

In 1902, Alcan was synonymous with aluminum production. Today, it offers much more. Alcan has evolved into one of the globe's leading suppliers of bauxite, alumina and aluminum, and a top-ranked provider of engineered and packaging materials, delivering increased productivity, competitiveness and profitability to customers. Alcan's strength lies in the powerful synergy of its skilled people, its market-driven solutions, its advanced technology and its proven commitment to sustainable value creation. Alcan is a strategic operating company that is more attuned and responsive to market opportunities. Each of the four business groups—Bauxite and Alumina, Primary Metal, Engineered Products and Packaging—hold strong market positions in the Americas, Europe and Asia.
