Table of Contents**EPICOR SOFTWARE CORPORATION****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****MARCH 31, 2008****Note 1. Basis of Presentation**

The accompanying Unaudited Condensed Consolidated Financial Statements included herein have been prepared by Epicor Software Corporation (the Company) in conformity with accounting principles generally accepted in the United States of America and pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC) for interim financial information for reporting on Form 10-Q. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. These Unaudited Condensed Consolidated Financial Statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

In the opinion of management, the Unaudited Condensed Consolidated Financial Statements contain all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the Company's financial position, results of operations and cash flows.

The results of operations for the three months ended March 31, 2008 are not necessarily indicative of the results of operations that may be reported for any other interim period or for the entire year ending December 31, 2008. The Condensed Consolidated Balance Sheet at December 31, 2007 has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements, as permitted by SEC rules and regulations for interim reporting.

Inventory is comprised solely of finished goods.

Note 2. Stock-Based Compensation

The following table sets forth the total stock-based compensation expense resulting from stock options, restricted stock awards and the employee stock purchase plan included in the Company's Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) (*in thousands*):

	Three Months Ended	
	March 31,	
	2008	2007
Cost of consulting revenues	\$ 251	\$ 370
Cost of maintenance revenues	111	155
Sales and marketing	875	1,098
Software development	201	262
General and administrative	1,050	1,508
Total stock-based compensation expense	\$ 2,488	\$ 3,393

Net cash proceeds from the exercise of stock options were \$1,009,000 and \$478,000 for the three months ended March 31, 2008 and 2007, respectively. In accordance with Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), Share-Based Payment (SFAS 123-R), the Company presents excess tax benefits from stock-based compensation awards, if any, as financing cash flows rather than operating cash flows. For the three months ended March 31, 2008 and 2007, net cash provided by operating activities decreased by, and financing activities increased by, \$617,000 and \$468,000, respectively, related to excess tax benefits from exercise of stock-based awards. The tax benefit related to stock-based compensation for the three months ended March 31, 2008 and 2007 was \$756,000 and \$1,008,000, respectively. No share-based compensation was capitalized for the three months ended March 31, 2008 and 2007.

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

During the first quarter of 2008, the Company granted 1,127,000 shares of performance-based restricted stock to employees for annual promotions and new hires for the 2008 and 2009 performance plan years. The shares are subject to a vesting schedule and were granted pursuant to the terms of the Company's performance-based restricted

Table of Contents

stock plan. The recipients will vest in the restricted stock, or a portion thereof, in two equal, annual installments depending upon achievement of targets with respect to the Company's annual revenue and adjusted earnings before interest, taxes, depreciation and amortization (EBITDA) for each of two performance years, 2008 and 2009. Restricted stock is held in escrow, and the Company's reacquisition right will not lapse until the shares are fully vested. Upon an employee's termination of service with the Company, shares that have not vested will be forfeited and automatically transferred to and reacquired by the Company. In addition, restricted shares that do not vest as a result of the Company's non-achievement with respect to annual revenue and adjusted EBITDA performance conditions for either performance year will be forfeited and automatically transferred to and reacquired by the Company.

The performance conditions for each year are independent of the performance condition for the preceding year. Therefore, although compensation expense for all years will be measured based on the grant date fair value of the shares, the related compensation expense will be recognized separately in each year related only to the shares potentially earned in each year, assuming that it is considered to be probable that the shares will be earned each year. In addition, the compensation expense for each year is estimated and a pro rata amount is accrued on a quarterly basis. Quarterly compensation expense may include a cumulative adjustment resulting from changes in the estimated number of shares expected to be earned during that plan year.

On February 15, 2008, the Company's reacquisition right lapsed on 659,646 shares related to the performance-based restricted stock plan for the 2007 performance year. These shares are included in restricted stock at December 31, 2007. The lapse occurred following the Company's determination of its achievement of 2007 performance year performance conditions. The compensation expense related to these shares was included in the Consolidated Statements of Operations for the year ended December 31, 2007.

The Company withholds a portion of the vested shares as consideration for the Company's payment of applicable employee income taxes. As of March 31, 2008, these repurchased shares are held in treasury and are available for future reissuance. In conjunction with the quarterly vesting of restricted stock grants and vesting of the performance-based restricted stock, during the three months ended March 31, 2008, the Company acquired 257,441 and 177,667, shares of common stock, respectively, at a value of \$3,144,000 and \$2,462,000, respectively.

At March 31, 2008, there was approximately \$1,954,000 of total unrecognized compensation expense related to restricted stock, excluding performance-based restricted stock, and \$12,210,000 related to performance-based restricted stock. These costs are expected to be recognized over a weighted-average period of approximately two years. The compensation cost related to the performance-based restricted stock depends on the estimated number of shares that will vest, based on the probable outcome of the performance conditions. Therefore, the recognized compensation could vary significantly, depending on the outcome of those conditions. The Company is required at each reporting date to assess whether achievement of any performance condition is probable. Based on the Company's current assessment, the Company has recorded stock compensation expense related to performance-based restricted stock of \$1,830,000 for three months ended March 31, 2008.

At March 31, 2008, there was approximately \$314,000 of total unrecognized compensation expense related to unvested stock options. This cost is expected to be recognized over a weighted-average period of approximately one year.

The fair value of restricted stock that vested during the three months ended March 31, 2008 and 2007 was \$9,085,000 and \$194,000, respectively.

No options were granted during the three months ended March 31, 2008 and 2007. There were 244,929 options exercised during the three months ended March 31, 2008. As of March 31, 2008, there were 1,799,000 options exercisable with a weighted average remaining contractual term, weighted average exercise price and aggregate intrinsic value of 4.6 years, \$8.12 and \$7,536,000, respectively. The Company issues new shares to satisfy stock option exercises and stock purchases under the Company's share-based plans.

The aggregate intrinsic value above represents the total pretax intrinsic value (the difference between the Company's closing stock price on the last trading day of the quarter and the exercise price) multiplied by the number of shares that would have been received by the option holders had all option holders exercised their options on March 31, 2008. This amount changes based on the fair market value of the Company's stock.

Table of Contents

Note 3. Revenue Recognition

The Company recognizes revenue in accordance with accounting principles generally accepted in the United States of America, principally:

Statement of Position (SOP) No. 97-2, Software Revenue Recognition, issued by the American Institute of Certified Public Accountants (AICPA) and interpretations;

AICPA SOP No. 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions;

Staff Accounting Bulletin (SAB) No. 101, Revenue Recognition in Financial Statements, issued by the United States Securities and Exchange Commission as amended by SAB No. 104;

Financial Accounting Standards Board (FASB) Emerging Issues Task Force (EITF) Issue No. 00-21 Revenue Arrangements with Multiple Deliverables; and

AICPA SOP No. 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts.

The Company enters into contractual arrangements with end-users of its products to sell software licenses, maintenance services and consulting services, either separately or various combinations thereof. For each arrangement, revenues are recognized when persuasive evidence of an arrangement exists, the fees to be paid by the customer are fixed or determinable, collection of the fees is probable, delivery of the product has occurred, vendor-specific objective evidence (VSOE) of the fair value of any undelivered elements exists and no other significant obligations on the part of the Company remain.

For multiple-element software arrangements, the Company accounts for the software license component using the residual method. The residual method generally requires recognition of software license revenue in a multiple-element arrangement once all software products have been delivered and accepted by the customer and the only undelivered elements are maintenance services and/or consulting services. The fair value of the maintenance services is determined based on VSOE of fair value and is deferred and recorded ratably over the maintenance terms. Fair value for any related consulting services is determined by VSOE of fair value and generally recognized as the services are performed. After any required fair value allocations to the undelivered maintenance and/or consulting services elements, the residual contractual consideration is allocated to the license associated with the software products in the transaction. The Company's maintenance services VSOE of fair value is determined by reference to the price the Company's customers are required to pay for the services when sold-separately (i.e. the maintenance service fees paid by the Company's customers upon renewal). VSOE of fair value for consulting services is determined by reference to the price the Company's customers are required to pay for such services when sold separately, or when sold independent of any of the Company's other product or service offerings.

In certain instances, the Company enters into arrangements that include two or more non-software products or services such as hardware and related services. Such arrangements are divided into separate units of accounting provided that the delivered item has stand-alone value and there is objective and reliable evidence of the fair value of the undelivered items. The total arrangement fee is allocated to the undelivered elements based on their fair values and to the initial delivered elements using the residual method. Revenue is recognized separately, and in accordance with the Company's revenue recognition policy, for each element.

License Revenues: Amounts allocated to software license revenues sold directly by the Company are recognized at the time of shipment of the software when fair value for any undelivered elements is determinable and all the other revenue recognition criteria discussed above have been met.

Revenues on sales made to the Company's resellers are recognized upon shipment of the Company's software to the reseller when the reseller has an identified end-user and all other revenue recognition criteria noted above are met. Under limited arrangements with certain distributors, all the revenue recognition criteria have been met upon delivery of the product to the distributor and, accordingly, revenues are recognized at that time. The Company does not offer a right of return on its products.

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

Consulting Service Revenues: Consulting service revenues are comprised of consulting and implementation services and, to a limited extent, training. Consulting services are generally sold on a time-and-materials basis and can include services ranging from software installation to data conversion and building non-complex interfaces to allow the software to operate in integrated environments. Consulting engagements can last anywhere from one day to several months and are based strictly on the customer's requirements and complexities and are independent of the

Table of Contents

functionality of the Company's software. The Company's software, as delivered, can generally be used by the customer for the customer's purpose upon installation. Further, implementation and integration services provided are generally not essential to the functionality of the software, as delivered, and do not result in any material changes to the underlying software code. Services are generally separable from the other elements under the same arrangement since the performance of the services are not essential to the functionality of the other elements of the transaction, the services are described in the contract such that the total price of the arrangement would be expected to vary as the result of the inclusion or exclusion of the services, and VSOE of fair value exists for the services based on sold separately data. If, in the services element of the arrangement the Company performs significant production, modification or customization of its software, the Company applies the provisions of SOP No. 81-1, otherwise SOP No. 97-2 applies. For services performed on a time-and-material basis, revenue is recognized when the services are performed and billed. On occasion, the Company enters into fixed fee arrangements or arrangements in which customer payments are tied to achievement of specific milestones. In fixed fee arrangements, revenue is recognized as services are performed as measured by hours incurred to date, as compared to total estimated hours to be incurred to complete the work. In milestone achievement arrangements, the Company recognizes revenue as the respective milestones are achieved.

The Company has recorded unbilled consulting revenues totaling \$4,025,000 and \$2,810,000 at March 31, 2008 and December 31, 2007, respectively. These unbilled revenues represent consulting services performed during the last few business days of the quarter but not billed until the following month. The Company cuts-off consulting billing prior to the end of each month. Unbilled consulting revenue is recorded in accounts receivable in the accompanying Condensed Consolidated Balance Sheets.

Maintenance Service Revenues: Maintenance service revenues consist primarily of fees for providing unspecified software upgrades on a when-and-if-available basis and technical support over a specified term, which is typically twelve months. Maintenance revenues are typically paid in advance and are recognized on a straight-line basis over the term of the contract.

Hardware Revenues: In some cases, the Company resells third party hardware systems and related peripherals as part of an end-to-end solution requested by its customers. Hardware revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collection is considered probable. The Company considers delivery to occur when the product is shipped and title and risk of loss have passed to the customer.

Software License Indemnification: The Company's standard software license agreements contain an infringement indemnity clause under which the Company agrees to defend, indemnify and hold harmless our customers and business partners against liability and damages arising from third party claims that the Company's products violate or infringe the intellectual property rights of others. These clauses constitute a form of guarantee that is subject to the disclosure requirements, but not the initial recognition or measurement provisions, of FASB Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The Company has never lost a third party infringement claim, and, to date, the Company's costs to defend such claims and/or lawsuits have been insignificant. Although it is possible that in the future third parties may claim that the Company's current or future software solutions infringe upon their intellectual property, a maximum obligation arising out of these types of agreements is not explicitly stated and, therefore, the overall maximum amount of these obligations cannot be reasonably estimated.

Sales taxes collected from customers are recorded on a net basis.

Note 4. Basic and Diluted Net Income Per Share

Net income (loss) per share is calculated in accordance with SFAS No. 128, Earnings per Share. Under the provisions of SFAS No. 128, basic net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period, excluding shares of unvested restricted stock. Diluted net income (loss) per share is computed by dividing the net income (loss) for the period by the weighted average number of common and potential common shares outstanding during the period if their effect is dilutive.

For the three months ended March 31, 2008 and 2007, options to purchase 763,000 and 536,000 shares of common stock, respectively, with weighted average prices of \$13.51 and \$14.42, respectively, were outstanding but not included in the computation because the effect would be anti-dilutive.

Table of Contents

On May 8, 2007, the Company closed an offering of \$230 million aggregate principal amount of 2.375% convertible senior notes due in 2027 (Note 8). The notes are unsecured and convertible into cash or, at the Company's option, cash and shares of the Company's common stock, at an initial conversion rate of 55.2608 shares of common stock per \$1,000 principal amount of notes, which is equivalent to an initial conversion price of approximately \$18.10 per share. Pursuant to the terms of the notes, the principal amount of the notes is settleable in cash and only the amount of conversion value, as defined, in excess of the principal amount of the notes is settleable in cash or shares. Therefore, the notes are only dilutive when the common stock price exceeds the conversion price, and no shares have been included in the calculation of diluted net income per share as the conversion value did not exceed the principal amount of the notes.

The following table computes basic and diluted net income (loss) per share (*in thousands, except per share amounts*):

	Three Months Ended	
	March 31,	
	2008	2007
Net income (loss) applicable to common stockholders	\$ (6,991)	\$ 4,433
Basic:		
Weighted average common shares outstanding	60,138	59,179
Weighted average common shares of unvested restricted stock	(2,240)	(2,537)
Shares used in the computation of basic net income (loss) per share	57,898	56,642
Net income (loss) per share applicable to common stockholders - basic	\$ (0.12)	\$ 0.08
Diluted:		
Shares used in the computation of basic net income per share	57,898	56,642
Stock options and employee stock purchase plan (ESPP) shares		757
Unvested restricted stock		304
Shares used in the computation of diluted net income per share	57,898	57,703
Net income per share applicable to common stockholders - diluted	\$ (0.12)	\$ 0.08

Note 5. Acquisitions and Disposition

Acquisitions are accounted for under the purchase method of accounting, in accordance with SFAS No. 141, Business Combinations. Management is responsible for determining the fair value of the assets acquired and liabilities assumed. The fair value of the assets acquired and liabilities assumed represent management's estimate of fair value. The Company conducts an active mergers and acquisitions program. Acquisition candidates are determined to be viable if they meet the Company's stringent criteria which includes, but is not limited to, product and technology fit, culture, geography, revenue synergies and financial contribution. Because the software industry is consolidating, the purchase environment is competitive. Valuations are determined through a combination of earnings per share accretion models which assume certain cost synergies, internal rate of return calculations, discounted cash flow models, outside valuations and appraisals and market conditions. The results of the acquisitions are included in the accompanying Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) from the respective acquisition dates forward.

Acquisitions*NSB Retail Systems PLC*

On February 7, 2008, the Company completed its acquisition of NSB Retail Systems PLC (NSB). NSB designs, develops, markets and supports store and merchandising solutions to retailers of apparel, footwear and specialty merchandise. The acquisition of NSB provides an expanded portfolio of products and services for large and mid-sized specialty retailers and department stores, as well as a fully hosted, managed service offering designed for smaller retailers who are interested in rapid implementation via an on-demand versus on-premise offering.

Table of Contents

Pursuant to the terms of the acquisition agreement, shareholders of NSB received £0.38 in cash for each NSB ordinary share. The value of the fully diluted share capital of NSB was approximately \$311,845,000, not including transaction costs, based on the exchange rates in effect at the time the U.S. dollars were converted to pounds sterling for purposes of the transaction. The consideration payable under the agreement was funded by the Company with approximately \$161,000,000 in existing cash balances, with the balance of the consideration being funded by drawing from funds available pursuant to the 2007 credit facility (Note 8). In addition, on February 11, 2008, the Company sold the NSB acquisition British pound sterling call options that were marked to market at December 31, 2007 at \$1,802,000 back to the issuing institutions for \$192,000, resulting in net foreign currency loss of \$1,610,000. The loss resulted from depreciation of pounds sterling against the U.S. Dollar. The net loss is included in Interest and other income, net, in the Condensed Consolidated Statements of Operations.

The total preliminary purchase price for NSB is shown below (*in thousands*):

Cash	\$ 311,845
Transaction costs	5,258
Total purchase price	\$ 317,103

The acquisition of NSB is accounted for as a purchase business combination as defined in SFAS No. 141, Business Combinations. Under the purchase method of accounting, the purchase price was allocated to NSB's tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of February 7, 2008, with any excess being ascribed to goodwill. Management is primarily responsible for determining the fair values of these assets. The fair value of the assets acquired and liabilities assumed represent management estimate of fair values. The purchase price allocation and transaction costs are preliminary and will be adjusted upon completion of the final valuation of acquired assets and liabilities assumed, including income tax assets and liabilities. See Note 6 for a discussion of goodwill and intangibles acquired.

The following table summarizes the preliminary allocation of the purchase price (*in thousands*):

Fair value of tangible assets acquired:	
Cash and marketable securities	\$ 33,181
Accounts receivable	17,688
Inventory	1,196
Property and equipment	11,933
Prepaid and other assets	4,587
Deferred tax asset	5,351
Total tangible assets acquired	73,936
Acquired technology	58,700
Acquired in-process research and development	200
Customer base	39,300
Trade name	3,500
Goodwill	184,007
Accounts payable and accrued expenses	(22,948)
Deferred revenue	(17,328)
Other long-term liabilities	(2,264)
Net assets acquired	\$ 317,103

In connection with the acquisition, the Company formulated a restructuring plan for the NSB operations. As a result, the Company recorded a liability of \$4,344,000 for the costs related to involuntary employee terminations. This liability was included in the allocation of the purchase price in accordance with SFAS No. 141, Business Combinations and EITF Issue No. 95-3 Recognition of Liabilities in Connection with a Purchase Business Combination. Execution of the restructuring plan was substantially completed as of March 31, 2008.

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

Included in the Company's operating results for three months ended March 31, 2008 is a charge of \$200,000 for the acquired in-process research and development expenses related to the NSB acquisition. The in-process research and

Table of Contents

development expenses arose from new products that were under development at the date of the acquisition and were expected to eventually lead to new products but had not yet established technological feasibility and for which no future alternative use was identified. The valuation of the in-process research and development projects were based upon the discounted expected future cash flows of the products over the products expected life, reflecting the estimated stage of completion of the projects and the estimate of the costs to complete the projects.

Goodwill is amortizable for tax purposes when determining foreign earnings subject to tax in the U.S. A portion of the goodwill is amortizable for tax in the foreign jurisdiction.

Professional Advantage Pty Limited

On May 16, 2007, the Company acquired the assets of a division of Professional Advantage Pty Limited (PA), a privately held reseller located in Australia. The primary purpose of this acquisition was to increase the Company's presence and direct customer base in the territories covered by PA.

The purchase price was allocated to PA's tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of May 16, 2007. The Company is amortizing the acquired customer base over seven years and the acquired technology over five years. The following table summarizes the allocation of the purchase price (*in thousands*):

Cash	\$ 16,000
Transaction costs	631
Total	\$ 16,631
Fixed assets	\$ 49
Customer base	5,728
Acquired technology	1,199
Goodwill	10,626
Accrued liabilities	(632)
Deferred revenue	(339)
 Net assets acquired	 \$ 16,631

Goodwill is amortizable for tax purposes when determining foreign earnings subject to tax in the U.S. It is amortizable for tax in the foreign jurisdictions. The pro forma impact of this acquisition was not significant to the Company's historical results of operations.

Pro Forma Information

Actual results of operations of the companies acquired in 2008 and 2007 are included in the consolidated financial statements from their respective dates of acquisition. The unaudited pro forma statement of operations data of the Company set forth below gives effect to the acquisition by Epicor of NSB using the purchase method as if it occurred on January 1, 2007, and includes amortization of identified intangibles, interest expense on debt incurred to finance the acquisitions, elimination of amortization related to NSB intangibles not assumed in the acquisition, and the in-process research and development charge. This pro forma information is presented for illustrative purposes only and is not necessarily indicative of the combined financial results of operations for future periods or the financial results of operations that actually would have been realized had the acquisition occurred at that time (*in thousands, except per share data*).

Table of Contents**Disposition***Sale of Non-Strategic Asset*

During March 2007, the Company entered into an arrangement to sell the assets of its payroll bureau operations in Russia. In connection with this asset sale arrangement, the Company also entered into an arrangement with the same party to license the iScala payroll product for resale on an exclusive basis in certain Eastern European territories. This transaction was accounted for as a multiple-element arrangement under EITF Issue No. 00-21. Based on an estimated fair value of the payroll bureau, the Company allocated \$2,500,000 of the total consideration to the sale of these assets. This consideration, less the carrying amounts of \$786,000 of goodwill and \$113,000 of net customer base intangible assets originally recorded in connection with the 2004 acquisition of Scala and \$22,000 of net tangible assets, resulted in a net gain of \$1,579,000 which is included in gain on sale of non-strategic asset in the accompanying Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) for three months ended March 31, 2007. The remaining consideration related to the iScala payroll product license is included in license revenues in the accompanying Condensed Consolidated Statements of Operations and Comprehensive Income (Loss) for the three months ended March 31, 2007.

Note 6. Goodwill and Intangible Assets

In acquisitions accounted for using the purchase method, goodwill is recorded for the difference, if any, between the aggregate consideration paid for an acquisition and the fair value of the net tangible and identified intangible assets acquired. SFAS No. 142, Goodwill and Other Intangible Assets, requires an annual review of goodwill and indefinite-lived intangibles for possible impairment. In accordance with SFAS No. 142, the Company performed an impairment review of its recorded goodwill in 2007 and determined that no impairment of goodwill existed because the estimated fair value of each reporting unit exceeded its carrying amount. The following table represents the balance and changes in goodwill by reporting unit as of and for the three months ended March 31, 2008 (*in thousands*):

	License	Consulting	Maintenance	Total
Balance as of December 31, 2007	\$ 51,670	\$ 39,471	\$ 78,126	\$ 169,267
NSB acquisition	82,111	28,866	73,030	184,007
Foreign currency translation	170	371	207	748
Other	28	24	154	206
Balance as of March 31, 2008	\$ 133,979	\$ 68,732	\$ 151,517	\$ 354,228

The following is the average amortization period for intangible assets:

	Average Amortization Periods
Acquired technology	5 years
Customer base	7 years
Trademark	5 years
Covenants not to compete	1-2 years

The following represents the change in intangible assets recorded during 2008, including intangible assets recorded as a result of the NSB acquisition and additional change due to foreign currency translation (*in thousands*):

	NSB	Foreign Currency Translation	Total Change
Acquired technology	\$ 58,700	\$ 58	\$ 58,758
Customer base	39,300	819	40,119
Trademark	3,500	8	3,508

Covenant not to compete

Table of Contents

Intangible assets are amortized over the estimated economic life of the assets. As of March 31, 2008, the Company has not identified any indicators of impairment associated with identified intangible assets.

The following table summarizes the components of intangible assets (*in thousands*):

	As of March 31, 2008			As of December 31, 2007		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Acquired technology	\$ 137,481	\$ 59,142	\$ 78,339	\$ 78,723	\$ 54,459	\$ 24,264
Customer base	77,474	20,855	56,619	37,355	18,684	18,671
Trademark	13,808	7,335	6,473	10,300	6,711	3,589
Covenant not to compete	2,247	2,247		2,190	2,190	
Total	\$ 231,010	\$ 89,579	\$ 141,431	\$ 128,568	\$ 82,044	\$ 46,524

Amortization expense of the Company's intangible assets included in cost of revenues for the three months ended March 31, 2008 and 2007 was \$7,066,000 and \$4,181,000, respectively. Amortization expense of the Company's intangible assets included in general and administrative expense for the three months ended March 31, 2008 and 2007 was \$0 and \$47,000, respectively. Estimated amortization expense for the remainder of 2008, 2009, 2010, 2011, 2012 and thereafter is approximately \$26,167,000, \$31,170,000, \$27,999,000, \$21,647,000, \$20,134,000 and \$14,314,000, respectively.

Note 7. Restructuring Charges

During the first quarter of 2008, the Company recorded restructuring charges of \$4,083,000. This charge represents severance costs related to management severance and cost reductions from the elimination of redundancies in the Company's retail business resulting from the NSB acquisition. In connection with these restructuring costs, the Company terminated 35 employees or approximately 1% of the Company's workforce at that time from all functional areas. As of March 31, 2008, all of these terminations had been completed.

In connection with the Company's acquisition of NSB, the Company formulated a restructuring plan for the NSB operations. In connection with this plan, the Company recorded a liability in purchase accounting of \$4,344,000 for the separation costs associated with the NSB reduction in workforce. The Company terminated 79 NSB employees, or 10% of the NSB workforce. At March 31, 2008, 59 of these terminations had been completed and all other employees to be terminated have been notified.

During the three months ended March 31, 2008, the Company made \$3,092,000 in cash payments (or otherwise settled) against reserves associated with its restructuring activities.

Note 8. Credit Facility and Debt Offering*Credit Facilities*

On March 30, 2006, the Company entered into a credit agreement with several financial institutions (the 2006 credit facility), consisting of a term loan and a revolver. In May 2007, the Company completed a debt offering for \$230 million convertible senior notes and used a portion of the proceeds to repay the outstanding balance of the term loan. On May 1, 2007, the credit agreement for the 2006 credit facility was amended to permit this debt offering described above.

Effective December 17, 2007, the Company voluntarily terminated the 2006 credit facility as a result of entering into the 2007 credit facility described below. There were no premiums or penalties incurred by the Company in connection with the termination of the 2006 credit facility and all amounts outstanding under 2006 credit facility were deemed paid in full on the termination date.

Table of Contents

On December 16, 2007, the Company entered into a credit agreement with several financial institutions (the 2007 credit facility), which provides for term loans in an amount up to \$100 million and revolving loans in an amount up to \$100 million with an option for the Company to increase the revolving loan commitments and/or the term loan commitments by an aggregate amount of up to \$50 million pursuant to an accordion feature for a total secured loan facility of up to \$250 million. In connection with the 2007 credit facility, the Company agreed to certain financial and other covenants. Funds available under the 2007 credit facility were allowed to be used by the Company to finance its acquisition of NSB (Note 5), to pay the fees and expenses incurred in connection with the NSB acquisition, to provide ongoing working capital and for other general corporate purposes of the Company and its subsidiaries following the NSB acquisition. The Company may also use a portion of the available borrowing capacity to repurchase outstanding shares of its common stock.

On February 11, 2008, the Company amended the 2007 credit facility to exercise the accordion feature contained in the facility and increase the total credit facility to \$250 million, consisting of \$100 million of term loans and \$150 million of revolving loans. On February 19, 2008, the Company borrowed \$100 million in term loans and \$60 million of revolving loans under the 2007 credit facility and used the proceeds to finance the NSB acquisition and to pay certain fees and expenses incurred in connection with the NSB acquisition. Interest under the 2007 credit facility is based, at the option of the Company, on either (i) the base rate, which is defined as a fluctuating rate per annum equal to the higher of the average rate of the overnight federal funds and Administrative Agent's prime rate as announced from time to time, plus a margin equal to between .50% and 1.75%, depending on the Company's senior secured leverage ratio as of the fiscal quarter most recently ended or (ii) a floating per annum rate (based upon one, two, three, six or nine-month interest periods) based on BBA LIBOR plus a margin equal to between 1.50% and 2.75%, depending on the Company's senior secured leverage ratio as of the fiscal quarter most recently ended.

On March 31, 2008, the Company made a mandatory principal payment of \$1.25 million against the term loan from discretionary funds. As of March 31, 2008, the Company had borrowing capacity of \$90 million under the 2007 credit facility and the weighted average interest rate applicable to outstanding loans under the 2007 credit facility was 5.39%. As of March 31, 2008, the Company was in compliance with all covenants included in the terms of the 2007 credit facility.

On April 18, 2008, the Company entered into interest rate swap agreements to convert a portion of the Company's interest rate variability to a fixed rate basis as required under the 2007 credit facility. The interest rate swaps qualify for hedge accounting treatment pursuant to SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended. The changes in the fair value of the interest rate swaps will be reflected in the carrying value of the interest rate swap on the balance sheet. The differential to be paid or received on the interest rate swap agreements will be accrued and recognized as an adjustment to interest expense as interest rates change. The interest rate swap agreements commence effective June 30, 2008 and have an aggregate notional amount of \$20 million maturing March 31, 2009 and \$30 million maturing September 30, 2009. The effective interest rate for the notional amounts covered by the swap agreements is 5.67%.

Debt Offering

On May 8, 2007, the Company closed an offering of \$230 million aggregate principal amount of 2.375% convertible senior notes due in 2027. The notes are unsecured and pay interest semiannually at a rate of 2.375% per annum until May 15, 2027. The notes are convertible into cash or, at the Company's option, cash and shares of the Company's common stock, at an initial conversion rate of 55.2608 shares of common stock per \$1,000 principal amount of notes, which is equivalent to an initial conversion price of approximately \$18.10 per share. Pursuant to the terms of the notes, the principal amount of the notes is settleable in cash and only the amount of conversion value, as defined, in excess of the principal amount of the notes is settleable in cash or shares. The initial conversion price represents a 30% premium over the last reported sale price of the Company's common stock prior to the offering that began on May 2, 2007, which was \$13.92 per share. The conversion rate will be adjusted upon the occurrence of certain events defined in the indenture. The share settlement feature upon conversion of the senior convertible notes is generally limited to the conversion value in excess of the par value of the notes. The notes do not contain any restrictive financial covenants.

The notes are convertible under the following circumstances: (1) during any fiscal quarter after the fiscal quarter ending June 30, 2007 (and only during such fiscal quarter), if the closing sale price of the Company's common stock for each of 20 or more trading days in a period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter exceeds 130% of the conversion price in effect on the last trading day of the

Table of Contents

immediately preceding fiscal quarter; (2) during the five consecutive business days immediately after any five consecutive trading day period (the note measurement period) in which the trading price per \$1,000 principal amount of notes for each such trading day was equal to or less than 98% of the conversion value of the notes for such trading day during the note measurement period; (3) upon our calling such notes for redemption; (4) upon the occurrence of specified corporate transactions and (5) during the 30 days prior to, but excluding, any scheduled purchase date and at any time on or after May 15, 2026, and before the close of business on the business day immediately preceding the maturity date.

On or after May 15, 2014, the Company may from time to time at its option redeem the notes, in whole or in part, for cash, at a redemption price equal to 100% of the principal amount of the notes we redeem, plus any accrued and unpaid interest to, but excluding, the redemption date. On each May 15, 2014, May 15, 2017 and May 15, 2022, holders may require us to purchase all or a portion of their notes at a purchase price equal to 100% of the principal amount of the notes to be purchased, plus any accrued and unpaid interest to, but excluding, the purchase date.

The net proceeds of the offering were \$222.0 million after deducting the underwriters' discounts and commissions and offering expenses. On May 8, 2007, the Company used approximately \$94 million of the proceeds to pay in full its term loan outstanding under the 2006 credit facility. The balance of the net proceeds of the offering will be used for working capital, capital expenditures and other general corporate purposes, which may include funding acquisitions of businesses, technologies or product lines. The Company may also use a portion of the remaining net proceeds to repurchase outstanding shares of its common stock.

Note 9. Provision for Income Taxes

The Company adopted FASB Interpretation (FIN) 48, *Accounting for Uncertainty in Income Taxes* (FIN 48) on January 1, 2007. At March 31, 2008, the Company had \$21.4 million of gross unrecognized tax benefits, of which \$2.7 million would reduce the effective tax rate if recognized. The Company's continuing practice is to recognize interest and/or penalties related to income tax matters in income tax expense. As of March 31, 2008, the Company has approximately \$221,000 of accrued interest and penalties related to uncertain tax positions.

The tax years 1994 to 2008 remain open to examination by the major taxing jurisdictions to which the Company is subject. The Company is currently under examination in various locations including Canada and United Kingdom. The Company does not believe the amount of unrecognized tax benefits as of March 31, 2008 will significantly increase or decrease within 12 months.

The provision for income taxes consists of provisions for federal, state and foreign income taxes. The Company operates in an international environment with significant operations in various locations outside the U.S. Accordingly, the consolidated income tax rate is a composite rate reflecting the earnings in the various locations and the applicable rates.

The Company recorded a benefit for income taxes of (\$4,086,000) and a provision for income taxes of \$2,620,000 for the three months ended March 31, 2008 and 2007, respectively. The effective income tax rates were (36.9%) and 37.2% for the three months ended March 31, 2008 and March 31, 2007, respectively. The effective tax rate differs from the statutory U.S. federal income tax rate of 35% primarily due to state and foreign income tax and permanent differences between GAAP pre-tax income and taxable income.

The Company has provided a valuation allowance on certain foreign deferred tax assets and intends to maintain a valuation allowance until sufficient positive evidence exists to support its reversal. In general, any realization of these deferred tax assets will reduce the Company's effective rate in future periods. Under the provisions of SFAS No. 109, *Accounting for Income Taxes*, and related interpretations, future period reductions to the valuation allowance related to Scala's deferred tax assets that existed as of the date of acquisition of Scala are first credited against goodwill, then to the other identifiable intangible assets existing at the date of acquisition, and then, once these assets have been reduced to zero, credited to the income tax provision. In accordance with FIN 18, *Accounting for Income Taxes in Interim Periods*, the Company makes its best estimate of the tax rate expected to be applicable for the full fiscal year. The rate so determined is used to provide for income taxes in an interim period. Absent a material or discrete adjustment to deferred taxes, the deferred tax accounts are adjusted at year end.

The Company regularly reviews the deferred tax assets for recoverability and the need for a valuation allowance. The Company analyzes both negative and positive evidence, and the strength of such evidence. This analysis includes assessment by jurisdiction of forecasted and historic financial performance and taxable income, performance compared to profit and revenue targets, strength or weakness of revenue generating functions, expense forecasts, and other factors. The valuation allowance will continue to be evaluated over future quarters.

Table of Contents

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires the formulation of estimates and assumptions that affect the reported amount of tax-related assets and liabilities and income tax provisions. The Company assesses the recoverability of the deferred tax assets on an ongoing basis, analyzing all available positive and negative evidence to determine whether, based on such evidence, it is more likely than not that some portion or all of the Company's net deferred assets will be realized in future periods. This assessment requires significant judgment. In addition, the Company has made estimates involving current and deferred income taxes, tax attributes relating to the interpretation of various tax laws and historical bases of tax attributes associated with certain tangible and intangible assets. Failure to achieve the Company's operating income targets may change its assessment regarding the recoverability of the net deferred tax assets and such change could result in a valuation allowance being recorded against some or all of the deferred tax assets. Any increase in a valuation allowance would result in additional income tax expense, lower stockholders' equity and could have a significant impact on the Company's earnings in future periods.

U.S. income taxes were not provided for on undistributed earnings from certain non-U.S. subsidiaries. Those earnings are considered to be permanently reinvested in accordance with Accounting Principles Board (APB) Opinion 23.

Note 10. Segment Information

In accordance with SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information," the Company has prepared operating segment information to report components that are evaluated regularly by the Company's chief operating decision maker in deciding how to allocate resources and in assessing performance.

The Company's reportable operating segments include licenses, consulting, maintenance and hardware and other. Currently, the Company does not separately allocate amortization of intangible assets or operating expenses to these segments, nor does it allocate specific assets to these segments. Therefore, the segment information reported includes only revenues, cost of segment revenues and segment gross profit. Excluded from the table below is amortization of intangible assets for the three months ended March 31, 2008 and 2007 of \$7,066,000 and \$4,181,000, respectively.

Operating segment data for the three months ended March 31, 2008 and 2007 is as follows (*in thousands*):

	Licenses	Consulting	Maintenance	Hardware and Other	Total
Three months ended March 31, 2008:					
Revenues	\$ 18,504	\$ 31,402	\$ 46,156	\$ 6,162	\$ 102,224
Cost of revenues	3,578	31,957	11,590	6,420	53,545
Gross profit	\$ 14,926	\$ (555)	\$ 34,566	\$ (258)	\$ 48,679
Three months ended March 31, 2007:					
Revenues	\$ 22,032	\$ 32,723	\$ 39,053	\$ 7,521	\$ 101,329
Cost of revenues	4,921	26,831	8,747	6,680	47,179
Gross profit	\$ 17,111	\$ 5,892	\$ 30,306	\$ 841	\$ 54,150

Note 11. Commitments and Contingencies*Litigation*

The Company is subject to legal proceedings and claims in the normal course of business. The Company is currently defending these proceedings and claims, and anticipates that it will be able to resolve these matters in a manner that will not have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Table of Contents*Guarantees*

The Company from time to time enters into certain types of contracts that contingently require the Company to indemnify parties against third-party claims. These contracts primarily relate to: (i) divestiture and acquisition agreements, under which the Company may provide customary indemnifications to either (a) purchasers of the Company's businesses or assets; or (b) entities from whom the Company is acquiring assets or businesses; (ii) certain real estate leases, under which the Company may be required to indemnify property owners for environmental and other liabilities and other claims arising from the Company's use of the applicable premises; (iii) certain agreements with the Company's officers, directors and employees, under which the Company may be required to indemnify such persons for liabilities arising out of their relationship with the Company; and (iv) Company license and consulting agreements with its customers, under which the Company may be required to indemnify such customers for intellectual property infringement claims and other claims arising from the Company's provision of services to such customers.

Note 12. Employee Benefits

As part of the NSB acquisition (Note 5), the Company acquired a defined benefit pension plan that provides pension benefits for certain NSB employees upon retirement. The plan was closed to new entrants prior to the acquisition, and the plan participants are no longer employed by the Company.

The net periodic benefit cost of the Company's defined benefit pension plan included the following components (*in thousands*):

	Quarter Ended March 31, 2008
Interest cost on projected benefit obligation	\$ 68
Expected return on plan assets	\$ (48)
Net periodic benefit cost	\$ 20

During the quarter ended March 31, 2008, contributions of approximately \$50,000 were made to the Company's defined benefit pension plan. The Company expects to contribute approximately \$225,000 for the remainder of the year to its defined benefit pension plan.

Note 13. New Accounting Pronouncements

In April 2008, the FASB issued FASB Staff Position (FSP) FAS 142-3, *Determination of the Useful Life of Intangible Assets*. This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, *Goodwill and Other Intangible Assets*. The intent of this FSP is to improve the consistency between the useful life of a recognized intangible asset under Statement 142 and the period of expected cash flows used to measure the fair value of the asset under FASB Statement No. 141 (Revised 2007), *Business Combinations*, and other U.S. generally accepted accounting principles (GAAP). This FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early adoption is prohibited. The Company is currently assessing the impact the adoption of this FSP will have on its financial position, results of operations or cash flows.

In March 2008, the FASB issued Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 (SFAS 161). The Statement requires companies to provide enhanced disclosures regarding derivative instruments and hedging activities. It requires companies to better convey the purpose of derivative use in terms of the risks that such company is intending to manage. Disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect a company's financial position, financial performance, and cash flows are required. This Statement retains the same scope as SFAS No. 133 and is effective for fiscal years and interim periods beginning after November 15, 2008, or January 1, 2009 for the Company. The Company is currently assessing the impact, if any, that the adoption of this Statement will have on the Condensed Consolidated Financial Statements of the Company.

Table of Contents

In December 2007, the FASB issued SFAS No. 141, *Business Combinations* (revised 2007) (SFAS 141-R), which provides greater consistency in the accounting and financial reporting of business combinations. It requires the acquiring entity in a business combination to recognize all assets acquired and liabilities assumed in the transaction, establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed, and requires the acquirer to disclose the nature and financial effect of the business combination. SFAS 141-R is effective for acquisitions in fiscal years beginning after December 15, 2008, or January 1, 2009 for the Company. The Company is currently assessing the impact the adoption will have on its financial position and results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* (SFAS 160). This Statement amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for fiscal years beginning after December 15, 2008, or January 1, 2009 for the Company. The Company is currently assessing the impact, if any, the adoption will have on its financial position and results of operations.

On February 15, 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115* (SFAS 159). Under this standard, the Company may elect to report financial instruments and certain other items at fair value on an investment-by-investment basis with changes in value reported in earnings. This election is irrevocable. SFAS 159 provides an opportunity to mitigate volatility in reported earnings that is caused by measuring hedged assets and liabilities that were previously required to use a different accounting method than the related hedging contracts when the complex provisions of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, hedge accounting are not met. SFAS 159 is effective for years beginning after November 15, 2007. Early adoption within 120 days of the beginning of the Company's 2007 fiscal year is permissible, provided the Company has not yet issued interim financial statements for 2007 and has adopted SFAS 157, *Fair Value Measurements* (SFAS 157). Adoption of this standard did not have a material effect on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157), which clarifies the definition of fair value whenever another standard requires or permits assets or liabilities to be measured at fair value. Specifically, the standard clarifies that fair value should be based on the assumptions market participants would use when pricing the asset or liability, and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. SFAS No. 157 does not expand the use of fair value to any new circumstances, and must be applied on a prospective basis except in certain cases. The standard also requires expanded financial statement disclosures about fair value measurements, including disclosure of the methods used and the effect on earnings.

In February 2008, FASB Staff Position (FSP) FAS No. 157-2, *Effective Date of FASB Statement No. 157* (FSP No. 157-2) was issued. FSP No. 157-2 defers the effective date of SFAS No. 157 to fiscal years beginning after December 15, 2008, and interim periods within those fiscal years, for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Examples of items within the scope of FSP No. 157-2 are nonfinancial assets and nonfinancial liabilities initially measured at fair value in a business combination (but not measured at fair value in subsequent periods), and long-lived assets, such as property, plant and equipment and intangible assets measured at fair value for an impairment assessment under SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. The partial adoption of SFAS No. 157 on January 1, 2008 with respect to financial assets and financial liabilities recognized or disclosed at fair value in the financial statements on a recurring basis did not have a material effect on the Company's consolidated financial statements. The Company is currently assessing the impact, if any, of SFAS No. 157 relating to its planned January 1, 2009 adoption of the remainder of the standard.

Table of Contents**Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations:****Forward Looking Statements - Safe Harbor**

Certain statements in this Quarterly Report on Form 10-Q are forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended, that involve risks and uncertainties. Any statements contained herein (including without limitation statements to the effect that the Company or Management estimates, expects, anticipates, plans, believes, projects, continues, should, may, or will or statements concerning potential or opportunity or variability or comparable terminology or the negative thereof) that are not statements of historical fact should be construed as forward-looking statements including statements about (i) the Company's future financial results, (ii) the impact of new accounting pronouncements, (iii) the Company's product development plans, (iv) the Company's capital spending, (v) the Company's future cash flow from operations, (vi) sufficient sources of financing to continue operations for next twelve months and to satisfy contractual obligations and commercial commitments, (vii) the effect of current legal proceedings, (viii) payment of obligations related to the Company's restructurings, (ix) the future use of forward or other hedging contracts, (x) the future impact of recent acquisitions on the Company, (xi) future investments in product development, (xii) schedule of amortization of intangible assets, (xiii) future impact of valuation allowance review and (xiv) future expense levels. Actual results could differ materially and adversely from those anticipated in such forward looking statements as a result of certain factors, including the factors listed at pages 34 to 42. Because these factors may affect the Company's operating results, past performance should not be considered an indicator of future performance and investors should not use historical results to anticipate results or trends in future periods. The Company undertakes no obligation to revise or publicly release the results of any revision to these forward-looking statements. Investors should carefully review the risk factors described below and in other documents the Company files from time to time with the Securities and Exchange Commission.

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto.

Overview

The Company designs, develops, markets and supports computer software applications, which assist mid-sized companies as well as the divisions and subsidiaries of larger corporations in the planning, management and operation of their businesses. The Company is focused on the mid-market, which generally includes companies or divisions with annual revenues between \$10 million and \$1 billion. The Company's software products and related consulting and support services are designed to help these companies automate key aspects of their business operations, processes and procedures from customer relations, ordering, purchasing and planning, to production, distribution, accounting and financial reporting. By automating these processes, companies may gain faster access to more accurate information, which can improve operating efficiency, reduce cost and allow companies to be more responsive to their customers, ultimately leading to increased revenues. The Company also offers support, consulting and education services in support of its customers' use of its software products. The Company's products and services are sold worldwide by its direct sales force and an authorized network of value added resellers (VARs), distributors and authorized consultants.

Total revenues for the three months ended March 31, 2008, increased 0.9% to \$102.2 million, compared to \$101.3 million for the three months ended March 31, 2007. This included total revenue from the NSB acquisition of \$10.2 million, of which \$0.7 million were related to hardware. Net license revenue decreased by 16.0% to \$18.5 million for the three months ended March 31, 2008, compared to \$22.0 million for the three months ended March 31, 2007. Consulting revenue was \$31.4 million for the three months ended March 31, 2008, a decrease of 4.0% compared to consulting revenues of \$32.7 million for the three months ended March 31, 2007. Maintenance revenue for the three months ended March 31, 2008 was \$46.1 million, an increase of 18.2% compared to maintenance revenues of \$39.1 million for the three months ended March 31, 2007. Hardware and other revenue for the three months ended March 31, 2008 was \$6.2 million, a decrease of 18.1% compared to hardware and other revenue of \$7.5 million for the three months ended March 31, 2007. See discussion in Results of Operations for more detailed information.

Overall gross margin was 40.7% for the three months ended March 31, 2008, compared to 49.3% during the same period in 2007, primarily due to negative consulting margins, as well as the addition of NSB maintenance revenues, which have relatively lower gross margins than the Company has historically reported.

Cash flows from operations were \$0.1 million during the three months ended March 31, 2008, compared to 2007 cash flows from operations of \$6.0 million. The decrease in operating cash flows is primarily due to the net loss recorded during the first quarter 2008, as well as increased cash payments on payables, compared to the same period in 2007.

Table of Contents

Critical Accounting Policies

The consolidated financial statements are prepared in conformity with United States of America generally accepted accounting principles (GAAP). As such, management is required to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The significant accounting policies which are most critical to aid in fully understanding and evaluating reported financial results include the following:

Revenue Recognition

The Company enters into contractual arrangements with end-users that may include licensing of the Company's software products, product support and maintenance services, consulting services, resale of third-party hardware or various combinations thereof, including the sale of such products or services separately. The Company's accounting policies regarding the recognition of revenue for these contractual arrangements is fully described in Note 3 of Notes to Consolidated Financial Statements.

The Company considers many factors when applying accounting principles generally accepted in the United States of America related to revenue recognition. These factors include, but are not limited to:

The actual contractual terms, such as payment terms, delivery dates and pricing of the various product and service elements of a contract;

Availability of products to be delivered;

Time period over which services are to be performed;

Creditworthiness of the customer;

The complexity of customizations and integrations to the Company's software required by service contracts;

The sales channel through which the sale is made (direct, VAR, distributor, etc.);

Discounts given for each element of a contract;

Any commitments made as to installation or implementation go live dates and

Whether vendor specific objective evidence of the fair value of undelivered elements exists.

Each of the relevant factors is analyzed to determine its impact, individually and collectively with other factors, on the revenue to be recognized for any particular contract with a customer. Management is required to make judgments regarding the significance of each factor in applying the revenue recognition standards, as well as whether or not each factor complies with such standards. Any misjudgment or error by management in its evaluation of the factors and the application of the standards, especially with respect to complex or new types of transactions, could have a material adverse affect on the Company's future revenues and operating results.

Allowance for Doubtful Accounts

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

The Company's accounts receivable go through a collection process that is based on the age of the invoice and requires attempted contacts with customers at specified intervals and assistance from other personnel within the Company who have a relationship with the customer. The Company writes-off accounts to its allowance when the Company has determined that collection is not likely. The Company believes no significant concentrations of credit risk existed at March 31, 2008. Receivables from customers are generally unsecured.

The Company maintains an allowance for doubtful accounts based on historical collections performance and specific collection issues. If actual bad debts differ from the reserves calculated, the Company records an adjustment to bad debt expense in the period in which the difference occurs. Such adjustment could result in additional charges to the Company's results of operations.

Intangible Assets

The Company's intangible assets were recorded as a result of the Company's acquisitions and represent acquired technology, customer base and trademarks. These intangible assets are amortized over the estimated economic life

Table of Contents

of the asset. The Company periodically evaluates the recoverability of the intangible assets and considers any events or changes in circumstances that would indicate that the carrying amount of an asset may not be recoverable. Any material changes in circumstances, such as large decreases in revenue or the discontinuation of a particular product line, could require future write-downs in the Company's intangible assets and could have a material adverse impact on the Company's operating results for the periods in which such write-downs occur.

Goodwill

The Company's goodwill was recorded as a result of the Company's acquisitions. In accordance with SFAS No. 141, Business Combinations, the Company has recorded these acquisitions using the purchase method of accounting. In accordance with SFAS No. 142, Goodwill and Other Intangible Assets, the Company performed an impairment review of its recorded goodwill in 2007 and determined that no impairment of goodwill existed because the estimated fair value of each reporting unit exceeded its carrying amount. The Company tests its recorded goodwill for impairment on an annual basis, or more often if indicators of potential impairment exist, by determining if the carrying value of each reporting unit exceeds its estimated fair value. Factors that could trigger an impairment include, but are not limited to, underperformance relative to historical or projected future operating results, significant changes in the manner of use of the acquired assets or the Company's overall business and significant negative industry or economic trends. Future impairment reviews may require write-downs in the Company's goodwill and could have a material adverse impact on the Company's operating results for the periods in which such write-downs occur.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with SFAS No. 123 (revised 2004), Share-Based Payment (SFAS 123-R). The Company adopted the provisions of SFAS 123-R in the first quarter of 2006. Under the fair value recognition provisions of this statement, stock-based compensation expense is measured at the grant date based on the value of the award and is expensed ratably over the vesting period. Determining the fair value of stock options at the grant date requires judgment, including estimating expected dividends, volatility, terms and estimating the amount of share-based awards that are expected to be forfeited. If actual forfeiture rates differ significantly from the estimate, stock-based compensation expense and the Company's results of operations could be materially impacted. Beginning in 2006, the Company changed its previous practice of predominantly granting stock options to employees, and began granting restricted stock as an alternative. Compensation expense for restricted stock is based on the fair market value of the restricted stock on its grant date, and is expensed ratably over the vesting period.

Income Taxes

Income taxes are determined under guidelines prescribed by SFAS No. 109, Accounting for Income Taxes (SFAS 109). Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company regularly reviews the deferred tax assets for recoverability and has established a valuation allowance when it is more likely than not that some portion, or all, of the deferred tax assets will not be realized. The Company assesses the recoverability of the deferred tax assets and the need for a valuation allowance on an ongoing basis. In making this assessment, the Company is required to consider all available positive and negative evidence to determine whether, based on such evidence, it is more likely than not that some portion, or all, of the net deferred assets will be realized in future periods.

During the year ended December 31, 2007, the Company determined, primarily based on operating income during recent years and anticipated operating income and cash flows for future periods that it is more likely than not that certain foreign deferred tax assets will be realized in the future and accordingly, it was appropriate to release the valuation allowance recorded against those deferred tax assets. As a result, the Company released a portion of the valuation allowance related to certain foreign jurisdictions, resulting in a non-cash income tax benefit to net income, as well as a credit to goodwill as some of the deferred tax assets existed at the date of Scala's acquisition. The Company intends to maintain a valuation allowance for the remaining foreign deferred tax assets until sufficient

Table of Contents

positive evidence exists to support its reversal. The remaining valuation allowance will continue to be evaluated over future quarters. If it is determined that it is more likely than not that all or a portion of these remaining foreign deferred tax assets will be utilized to offset future taxable income, the valuation allowance could be decreased or eliminated altogether which will result primarily in a decrease to goodwill.

Future releases of the valuation allowance related to these assets will be accounted for as a reduction of goodwill rather than a reduction of income tax expense if the valuation allowance decrease occurs prior to the effective date of SFAS No. 141 (revised 2007), Business Combinations, or SFAS No. 141(R). Effective January 1, 2009, SFAS 141(R) provides that any reduction to the valuation allowance established in purchase accounting is to be accounted for as a reduction in income tax expense.

The Company is subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. Effective January 1, 2007, the Company adopted Financial Interpretation No. 48, Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109, Accounting for Income Taxes. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.

Although the Company believes it has adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. The Company adjusts these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest.

During the ordinary course of business, there are many transactions and calculations for which the ultimate tax determination is uncertain. As a result, the Company recognizes tax liabilities based on estimates of whether additional taxes and interest will be due. These tax liabilities are recognized when, despite the Company's belief that its tax return positions are supportable, the Company believes that certain positions may not be fully sustained upon review by tax authorities. The Company believes that its accruals for tax liabilities are adequate for all open audit years based on its assessment of many factors including past experience and interpretations of tax law. This assessment relies on estimates and assumptions and may involve a series of complex judgments about future events. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will impact income tax expense in the period in which such determination is made.

U.S. income taxes were not provided for on undistributed earnings from certain non-U.S. subsidiaries. Those earnings are considered to be permanently reinvested in accordance with Accounting Principles Board (APB) Opinion 23.

New Accounting Pronouncements

For new accounting pronouncements see Note 13 in Notes to the Consolidated Financial Statements.

Table of Contents**Acquisitions***NSB Retail Systems PLC*

On February 7, 2008, the Company completed its acquisition of NSB Retail Systems PLC (NSB). NSB designs, develops, markets and supports store and merchandising solutions to retailers of apparel, footwear and specialty merchandise. The acquisition of NSB provides an expanded portfolio of products and services for large and mid-sized specialty retailers and department stores, as well as a fully hosted, managed service offering designed for smaller retailers who are interested in rapid implementation via an on-demand versus on-premise offering.

Pursuant to the terms of the acquisition agreement, shareholders of NSB received £0.38 in cash for each NSB ordinary share. The value of the fully diluted share capital of NSB was approximately \$311.8 million, not including transaction costs, based on the exchange rates in effect at the time the U.S. dollars were converted to pounds sterling for purposes of the transaction. The consideration payable under the agreement was funded by the Company with approximately \$161.0 million in existing cash balances, with the balance of the consideration being funded by drawing from funds available pursuant to the 2007 credit facility. In addition, on February 11, 2008, the Company sold the NSB acquisition British pound sterling call options that were marked to market at December 31, 2007 at \$1.8 million back to the issuing institutions for \$0.2 million, resulting in net foreign currency loss of \$1.6 million. The loss resulted from depreciation of pounds sterling against the U.S. Dollar. The net loss is included in Interest and other income, net, in the Condensed Consolidated Statements of Operations.

The total preliminary purchase price for NSB is shown below (*in thousands*):

Cash	\$ 311,845
Transaction costs	5,258
Total purchase price	\$ 317,103

The acquisition of NSB is accounted for as a purchase business combination as defined in SFAS No. 141, Business Combinations. Under the purchase method of accounting, the purchase price was allocated to NSB's tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of February 7, 2008, with any excess being ascribed to goodwill. Management is primarily responsible for determining the fair values of these assets. The fair value of the assets acquired and liabilities assumed represent management estimate of fair values. The purchase price allocation and transaction costs are preliminary and will be adjusted upon completion of the final valuation of acquired assets and liabilities assumed, including income tax assets and liabilities.

The following table summarizes the preliminary allocation of the purchase price (*in thousands*):

Fair value of tangible assets acquired:	
Cash and marketable securities	\$ 33,181
Accounts receivable	17,688
Inventory	1,196
Property and equipment	11,933
Prepaid and other assets	4,587
Deferred tax asset	5,351
Total tangible assets acquired	73,936
Acquired technology	58,700
Acquired in-process research and development	200
Customer base	39,300
Trade name	3,500
Goodwill	184,007
Accounts payable and accrued expenses	(22,948)
Deferred revenue	(17,328)
Other long-term liabilities	(2,264)

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

Net assets acquired	\$ 317,103
---------------------	------------

In connection with the acquisition, the Company formulated a restructuring plan for the NSB operations. As a result, the Company recorded a liability of \$4.3 million for the costs related to involuntary employee terminations.

Table of Contents

This liability was included in the allocation of the purchase price in accordance with SFAS No. 141, Business Combinations and EITF Issue No. 95-3 Recognition of Liabilities in Connection with a Purchase Business Combination. Execution of the restructuring plan was substantially completed as of March 31, 2008.

Included in the Company's operating results for three months ended March 31, 2008 is a charge of \$0.2 million for the acquired in-process research and development expenses related to the NSB acquisition. The in-process research and development expenses arose from new products that were under development at the date of the acquisition and were expected to eventually lead to new products but had not yet established technological feasibility and for which no future alternative use was identified. The valuation of the in-process research and development projects were based upon the discounted expected future cash flows of the products over the products' expected life, reflecting the estimated stage of completion of the projects and the estimate of the costs to complete the projects.

See Note 5 in Notes to the Consolidated Financial Statements for Pro Forma information related to this acquisition.

Professional Advantage

On May 16, 2007, the Company acquired the assets of a division of Professional Advantage Pty Limited (PA), a privately held reseller located in Australia. The primary purpose of this acquisition was to increase the Company's presence and direct customer base in the territories covered by PA.

The purchase price was allocated to PA's tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of May 16, 2007. The following table summarizes the allocation of the purchase price (*in thousands*):

Cash	\$ 16,000
Transaction costs	631
Total	\$ 16,631
Fixed assets	\$ 49
Customer base	5,728
Acquired technology	1,199
Goodwill	10,626
Accrued liabilities	(632)
Deferred revenue	(339)
Net assets acquired	\$ 16,631

Restructuring Charges

During the first quarter of 2008, the Company recorded restructuring charges of \$4.1 million. This charge represents severance costs related to management severance and cost reductions from the elimination of redundancies in the Company's retail business resulting from the NSB acquisition. In connection with these restructuring costs, the Company terminated 35 employees or approximately 1% of the Company's workforce at that time from all functional areas. As of March 31, 2008, all of these terminations had been completed.

Table of Contents**Results of Operations**

The following table summarizes certain aspects of the Company's results of operations for the three months ended March 31, 2008, compared to the three months ended March 31, 2007 (in millions, except percentages):

	2008	Three Months Ended March 31, 2007	Change \$	Change %
Revenues:				
License	\$ 18.5	\$ 22.0	\$ (3.5)	(16.0)%

% of total revenues	(6.8)%	4.4%		

Table of Contents*Revenue*

The decrease in license revenues for the three months ended March 31, 2008, compared to the same period in 2007, is due primarily to fewer than expected international license deals closing during the quarter and the Company not finalizing and completing the communication of its retail product strategy to the market until late in the quarter. The lower than expected retail and international license sales were partially offset by additional license revenues due to the acquisition of NSB. License revenues for the three months ended March 31, 2008, included three sales greater than \$0.5 million, of which none were greater than \$1.0 million. License revenues for the three months ended March 31, 2007, included three deals greater than \$0.5 million, of which one was greater than \$1.0 million. The one sale greater than \$1.0 million in 2007 was related to the sale of a non-strategic asset (see *Sale of Non-Strategic Asset*).

Consulting revenues decreased for the three months ended March 31, 2008, compared to the same period in 2007, due to a significant international engagement in the prior year's quarter, with no similar engagement in the current quarter, as well as the delayed retail software sales in the fourth quarter of 2007 and the first quarter of 2008, which led to lower than expected consulting utilization rates. Consulting revenues were also negatively impacted by a strategic consulting deal with a large customer that required the Company to allocate significant consulting resources to this project with no additional associated revenues to date. In addition to not generating revenues on this project, these consulting resources were unable to be used to generate revenues on other engagements. The decrease in consulting revenue was partially offset by additional consulting revenues from the acquisition of NSB.

The increase in maintenance revenues for the three months ended March 31, 2008, compared to the same period in 2007, is due primarily to the acquisition of NSB, which contributed maintenance revenues during the quarter, as well as continued high renewal rates in the Company's customer base, continued higher license sales in prior periods and related maintenance contracts sold with new licenses and an increase in existing customers whose maintenance agreements had previously lapsed, but who have now renewed their maintenance agreements.

Hardware and other revenues consist primarily of the resale of third-party hardware. The decrease in hardware and other revenue for the three months ended March 31, 2008, as compared to the same period in 2007, is due to the timing of customer hardware orders, which vary based on the customers' hardware roll-out schedules, resulting in a high degree of variability in the Company's hardware revenues.

International revenues were \$35.7 million and \$42.0 million for the three months ended March 31, 2008 and 2007, representing 34.9% and 41.5%, respectively, of total revenues. The decrease in international revenue for the three months ended March 31, 2008 compared to the same period in 2007 in both absolute dollars and percentage of revenue is primarily due to international deal slippage. The decrease in international revenues as a percentage of total revenues was also impacted by the addition of NSB revenues which are primarily earned in the United States. Foreign currency exchange rate fluctuations resulted in foreign currency-based revenues during the three months ended March 31, 2008 being reported \$2.5 million, or 2.5%, higher than these revenues would have been if they had been translated at 2007 foreign currency exchange rates.

Cost of Revenues and Gross Margins

Cost of license revenues consists primarily of software royalties paid for third-party software incorporated into the Company's products, referral fees paid to Value Added Resellers (VARs), costs associated with product packaging and documentation and software duplication. For the three months ended March 31, 2008, compared to the same period in 2007, gross profit of license revenue increased as costs decreased due primarily to the mix of products sold, which had lower associated royalties, as well as the addition of NSB license revenues, which generally have higher margins due to fewer royalty bearing products.

Cost of consulting revenues consists primarily of salaries, benefits, commissions, bonus, other headcount-related expenses and travel for the Company's consulting organization, which provides consulting services to customers in the implementation and integration of the Company's software products, as well as education, training and other consulting and programming services. These costs increased in absolute dollars and as a percentage of revenue during the three months ended March 31, 2008, compared to the same period in 2007, due primarily to a 21% increase in consulting headcount. Consulting services margins were negatively impacted due in part to a strategic consulting contract with a large customer for which the Company had to adjust costs estimated and record future estimated losses. In addition, consulting revenue margins were also impacted by lower than expected utilization

Table of Contents

rates related to the integration of NSB and the significant hiring the Company has done in lower cost geographies over the past several quarters, which has required more training to bring these consultants up to fully billable rates. The Company expects consulting margins to improve and increase for the remainder of the year.

Cost of maintenance revenues consists primarily of maintenance royalties on third-party software incorporated into the Company's products, as well as salaries, benefits and other headcount-related expenses for the Company's support organization. For the three months ended March 31, 2008, compared to the same period of 2007, cost of maintenance revenues increased in absolute dollars due primarily to the acquisition of NSB. Maintenance gross profit decreased during the three months ended March 31, 2008, compared to the same period in 2007, due to the addition of NSB maintenance revenues, which have lower gross margins.

Cost of hardware and other revenues decreased in absolute dollars in the three months ended March 31, 2008 compared to the same period in 2007 due to the timing of customer hardware orders, which vary based on the customers' hardware roll-out schedules and can result in a high degree of variability in our hardware gross profit margins. For the three months ended March 31, 2008, compared to the same period in 2007, gross profit for hardware and other revenues was negatively impacted by significant low margin hardware sales to large customers and a customer settlement. The Company expects consulting margins to improve and increase for the remainder of the year.

Amortization of Intangible Assets

Amortization of intangible assets consists of amortization of capitalized acquired technology, customer base and trademarks that were recorded as a result of acquisitions. The Company's intangible assets are amortized over the estimated economic lives of the assets. For the three months ended March 31, 2008 and 2007, the Company recorded amortization expense, included in cost of revenues, related to intangible assets of \$7.1 million and \$4.2 million, respectively. The increase in amortization expense for the three months ended March 31, 2008, as compared to the same period in 2007 is due to the additional amortization expense related to the NSB acquisition. Amortization of acquired technology and trademarks will be complete in 2013 and amortization of the customer base will be complete in 2015. See Note 6 in Notes to the Consolidated Financial Statements for expected future amortization expense.

Sales and Marketing

Sales and marketing expenses consist primarily of salaries, commissions, travel, advertising and promotional expenses. The increase in these costs in absolute dollars and as a percentage of revenue for the three months ended March 31, 2008, compared to the same period in 2007, is due to increased headcount of approximately 22%, related primarily to the NSB acquisition, as well as increased costs for the Company's annual internal strategic sales meeting that occurred during the quarter.

Software Development

Software development costs consist primarily of compensation of development personnel, related overhead incurred to develop new products and upgrade and enhance the Company's current products and fees paid to outside consultants. The majority of these expenses have been incurred by the Company in the United States, Canada, Mexico, Eastern Europe and Russia, where the Company operates development centers.

Software development expenses increased in absolute dollars and as a percentage of revenue for the year the three months ended March 31, 2008, compared to the same period in 2007. The increase in these costs is due primarily to an increase in headcount of 62% due to increased hiring and the acquisition of NSB.

General and Administrative Expense

General and administrative expenses consist primarily of costs associated with the Company's executive, financial, legal, human resources and information services functions. General and administrative expenses decreased in total dollars and as a percentage of total revenues during the three months ended March 31, 2008, compared to the same period in 2007. This decrease is primarily attributable to reductions in provision for doubtful accounts and personnel related costs, including stock-based compensation expense, associated with changes in senior management within the Company, partially offset by an increase in costs from the acquisition of NSB.

Table of Contents*Stock-Based Compensation Expense*

Stock-based compensation expense includes compensation expense from stock options granted prior to 2006 and restricted stock issued by the Company. For the three months ended March 31, 2008 and 2007, stock-based compensation expense was \$2.5 million and \$3.4 million, respectively.

At March 31, 2008, there was approximately \$12.2 million and \$2.0 million of unrecognized compensation cost related to performance-based restricted stock and other restricted stock grants, respectively. These costs are expected to be recognized over weighted average periods of approximately two years. The compensation cost related to the performance-based restricted stock depends on the estimated number of shares that will vest based on the probable outcome of the performance conditions. Therefore, the recognized compensation could vary significantly, depending on the outcome of those conditions. The Company is required at each reporting date to assess whether achievement of any performance condition is probable. Quarterly compensation expense may include a cumulative adjustment resulting from changes in the estimated number of shares expected to be earned during that plan year.

At March 31, 2008, there was approximately \$0.3 million of total unrecognized compensation cost related to unvested stock options. This cost is expected to be recognized over a weighted-average period of approximately one year.

The following table sets forth the total stock-based compensation expense resulting from stock options, restricted stock awards and the employee stock purchase plan included in the Company's Consolidated Statements of Operations (*in thousands*):

	Three Months Ended	
	March 31,	
	2008	2007
Cost of consulting revenues	\$ 251	\$ 370
Cost of maintenance revenues	111	155
Sales and marketing	875	1,098
Software development	201	262
General and administrative	1,050	1,508
 Total stock-based compensation expense	 \$ 2,488	 \$ 3,393

In-Process Research and Development

Included in the Company's operating results for three months ended March 31, 2008 is a charge of \$0.2 million for the acquired in-process research and development expenses related to the NSB acquisition. The in-process research and development expense arose from new products that were under development at the date of the acquisition and were expected to eventually lead to new products but had not yet established technological feasibility and for which no future alternative use was identified. The valuation of the in-process research and development projects were based upon the discounted expected future cash flows of the products over the products' expected life, reflecting the estimated stage of completion of the projects and the estimate of the costs to complete the projects.

Restructuring

During 2008, the Company recorded restructuring charges of \$4.1 million. This charge is related to management severance and cost reductions from the elimination of redundancies as a result of the NSB acquisition in the Company's retail business.

Interest Expense

Interest expense increased for the three months ended March 31, 2008, as compared to the same period in 2007 due to increased interest on additional debt incurred in February for the acquisition of NSB as well as interest on the Company's convertible senior notes issued in May of 2007.

Table of Contents*Sale of Non-Strategic Asset*

During March of 2007, the Company entered into an arrangement to sell the assets of its payroll bureau operations in Russia. In connection with this asset sale arrangement, the Company also entered into an arrangement with the same party to license the iScala payroll product for resale on an exclusive basis in certain Eastern European territories. This transaction was accounted for as a multiple-element arrangement under EITF Issue No. 00-21. Based on an estimated fair value of the payroll bureau, the Company allocated \$2.5 million of the total consideration to the sale of these assets as well. This consideration, less the carrying amounts of \$0.8 million of goodwill and \$0.1 million of net customer base intangible assets originally recorded in connection with the 2004 acquisition of Scala and \$22,000 of net tangible assets, resulted in a net gain of \$1.6 million which is included in *gain on sale of non-strategic asset* in the accompanying Condensed Consolidated Statements of Operations for the three months ended March 31, 2007. The remaining consideration related to the iScala payroll product license is included in *license* in the accompanying Condensed Consolidated Statements of Operations for the three months ended March 31, 2007.

Interest Income and Other, Net

Interest income and other, net, increased for the three months ended March 31, 2008, as compared to the same period in 2007, due primarily to an increase in interest earned on the Company's cash balances. The Company's average cash balance in the first quarter of 2008, which included cash designated for acquisition until February 7, 2008, increased significantly over 2007. The increase in interest income was offset by foreign currency loss. The foreign currency loss results primarily from the Company's British pound sterling call option contracts related to the NSB acquisition, which settled for a loss of \$1.6 million. This loss was offset by foreign currency gains of \$0.9 million primarily due to the Company's intercompany translation.

Provision for Income Taxes

The provision for income taxes consists of provisions for federal, state and foreign income taxes. The Company operates in an international environment with significant operations in various locations outside the U.S. Accordingly, the consolidated income tax rate is a composite rate reflecting the earnings in the various locations and the applicable rates.

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amount of tax-related assets and liabilities and income tax provisions. The Company assesses the recoverability of the deferred tax assets on an ongoing basis. In making this assessment the Company is required to consider all available positive and negative evidence to determine whether, based on such evidence, it is more likely than not that some portion or all of our net deferred assets will be realized in future periods. This assessment requires significant judgment. In addition, the Company has made estimates involving current and deferred income taxes, tax attributes relating to the interpretation of various tax laws, historical bases of tax attributes associated with certain tangible and intangible assets.

The Company recorded a benefit for income taxes of \$4.1 million and a provision for income taxes of \$2.6 million for the three months ended March 31, 2008 and 2007, respectively. The effective income tax rates were (36.9%) and 37.2% for the three months ended March 31, 2008 and March 31, 2007, respectively. The effective tax rate differs from the statutory U.S. federal income tax rate of 35% primarily due to state and foreign income tax and permanent differences between GAAP pre-tax income and taxable income.

Future releases of the valuation allowance related to these assets will be accounted for as a reduction of goodwill rather than a reduction of income tax expense if the valuation allowance decrease occurs prior to the effective date of SFAS No. 141 (revised 2007), *Business Combinations*, or SFAS No. 141(R). Effective January 1, 2009, SFAS 141(R) provides that any reduction to the valuation allowance established in purchase accounting is to be accounted for as a reduction in income tax expense.

During the year ended December 31, 2007, the Company determined, primarily based on operating income during recent years and anticipated operating income and cash flows for future periods that it is more likely than not that certain foreign deferred tax assets will be realized in the future, and, accordingly, it was appropriate to release the valuation allowance recorded against those deferred tax assets. As a result, the Company released a portion of the valuation allowance related to certain foreign jurisdictions, resulting in a non-cash income tax benefit to net income as well as a credit to goodwill as some of the deferred tax assets existed at the date of Scala's acquisition. The Company intends to maintain a valuation allowance for the remaining foreign deferred tax assets until sufficient

Table of Contents

positive evidence exists to support its reversal. The remaining valuation allowance will continue to be evaluated over future quarters. If it is determined that it is more likely than not that all or a portion of these remaining foreign deferred tax assets will be utilized to offset future taxable income, the valuation allowance could be decreased or eliminated altogether which will result primarily in a decrease to goodwill.

Liquidity and Capital Resources

The following table summarizes the Company's cash and cash equivalents, working capital, long-term debt and cash flows as of and for the three months ended March 31, 2008 (*in millions*):

	March 31, 2008
Cash and cash equivalents	\$ 103.5
Working capital	71.0
Net cash provided by operating activities	0.1
Net cash (used in) investing activities	(124.6)
Net cash provided by financing activities	152.3
Long-term debt, less current portion	382.8

As of March 31, 2008, the Company's principal sources of liquidity included cash and cash equivalents of \$103.5 million and unused borrowing capacity of \$90 million under its senior revolving credit facility. The Company's operations provided \$0.1 million in cash during the three months ended March 31, 2008. As of March 31, 2008, the Company had \$14.5 million in cash obligations for severance costs, lease terminations and other costs related to the Company's restructurings. These obligations are expected to be paid through 2016 and the Company believes these obligations will be funded from existing cash reserves and cash generated from continuing operations. The Company's working capital excluding deferred revenue is \$161.1 million. The Company believes this is a relevant measurement of working capital as deferred revenue is an obligation for services not cash. The cost of providing these services is generally fixed in nature and ranges from 21% to 25% of the related revenues.

On November 1, 2007, the Company announced that the Board of Directors authorized the Company to institute a stock repurchase program whereby up to \$50 million of its common stock may be repurchased from time to time. The duration of the repurchase program is open-ended. Under the program, the Company is able to purchase shares of common stock through open market transactions at prices deemed appropriate by management. The timing and amount of repurchase transactions under this program will depend on market conditions and corporate and regulatory considerations. The program may be discontinued at any time by the Board of Directors. As of May 8, 2008, the Company has repurchased 162,000 shares of its common stock at an average price of \$8.03 per share.

On May 8, 2007, the Company closed an offering of \$230 million aggregate principal amount of 2.375% convertible senior notes due in 2027. The notes are unsecured and pay interest semiannually at a rate of 2.375% per annum until May 15, 2027. The notes are convertible into cash or, at the Company's option, cash and shares of the Company's common stock, at an initial conversion rate of 55.2608 shares of common stock per \$1,000 principal amount of notes, which is equivalent to an initial conversion price of approximately \$18.10 per share. Pursuant to the terms of the notes, the principal amount of the notes is settleable in cash and only the amount of conversion value, as defined, in excess of the principal amount of the notes is settleable in cash or shares. The initial conversion price represents a 30% premium over the last reported sale price of the Company's common stock prior to the offering that began on May 2, 2007, which was \$13.92 per share. The conversion rate will be adjusted upon the occurrence of certain events defined in the indenture. The notes do not contain any restrictive financial covenants.

On or after May 15, 2014, the Company may from time to time at its option redeem the notes, in whole or in part, for cash, at a redemption price equal to 100% of the principal amount of the notes we redeem, plus any accrued and unpaid interest to, but excluding, the redemption date. On each May 15, 2014, May 15, 2017 and May 15, 2022, holders may require us to purchase all or a portion of their notes at a purchase price equal to 100% of the principal amount of the notes to be purchased, plus any accrued and unpaid interest to, but excluding, the purchase date.

Table of Contents

The Company's days sales outstanding (DSO) for the last five quarters are set forth in the following tables:

Quarter Ended:	2007
March 31	68
June 30	71
September 30	75
December 31	76
Quarter Ended:	2008
March 31	91

The increase in DSO's during 2008 was due primarily to the Company higher accounts receivable balances without related revenues as a result of the NSB acquisition and relatively longer payment cycles.

The Company's principal investing activities for the three months ended March 31, 2008, included use of cash designated for acquisition of \$161.0 million, acquisitions for \$284.1 million and capital expenditures of \$1.4 million.

Financing activities for the three months ended March 31, 2008 included \$160.0 million in proceeds from long-term debt, \$1.5 million in payments on long-term debt, \$5.0 million in debt issuance fees and \$3.1 million in the purchase of treasury stock. The Company repurchases a portion of the vested shares to satisfy employee income tax withholding requirements and expects such treasury stock activity to recur due to the various vesting schedules of restricted stock. Cash provided by financing activities also included proceeds from the issuance of stock under the employee stock purchase plan and proceeds from the exercise of employee stock options of \$1.3 million.

On December 16, 2007, the Company entered into a credit agreement with several financial institutions (the 2007 credit facility), which provides for term loans in an amount up to \$100 million and revolving loans in an amount up to \$100 million with an option for the Company to increase the revolving loan commitments and/or the term loan commitments by an aggregate amount up to \$50 million pursuant to an accordion feature for a total secured loan facility up to \$250 million. In connection with the 2007 credit facility, the Company agreed to certain financial and other covenants. Funds under the 2007 credit facility are available to the Company upon completion of the NSB acquisition (See Note 5 in Notes to the Condensed Consolidated Financial Statements), to pay the fees and expenses incurred in connection with the NSB acquisition, as well as to provide ongoing working capital and for other general corporate purposes of the Company and its subsidiaries following the NSB acquisition.

On February 11, 2008, the Company amended the 2007 credit facility to exercise the accordion feature contained in the facility to increase the total credit facility to \$250 million, consisting of \$100 million of term loans and \$150 million of revolving loans. On February 19, 2008, the Company borrowed \$100 million in term loans and \$60 million of revolving loans under the 2007 credit facility and used the proceeds to finance the NSB acquisition and to pay certain fees and expenses incurred in connection with the NSB acquisition.

On March 31, 2008, the Company made a mandatory principal payment of \$1.25 million against the term loan from discretionary funds. As at March 31, 2008, the Company had borrowing capacity of \$90 million under the 2007 credit facility and the weighted average interest rate applicable to outstanding loans under the 2007 credit facility was 5.39%. As of March 31, 2008, the Company was in compliance with all covenants included in the terms of the 2007 credit facility.

On April 18, 2008, the Company entered into interest rate swap agreements to convert a portion of the Company's interest rate variability to a fixed rate basis as required under the 2007 credit facility. The interest rate swap agreements commence effective June 30, 2008 and have an aggregate notional amount of \$20 million maturing March 31, 2009 and \$30 million maturing September 30, 2009. The effective interest rate for the notional amounts covered by the swap agreements is 5.67%.

The Company is dependent upon its ability to generate cash flows from license and other operating revenues, providing services to its customers and through collection of its accounts receivable to maintain current liquidity levels. If the Company is not successful in achieving targeted revenues and expenses or positive cash flows from operations, the Company may be required to take further cost-cutting measures and restructuring actions or seek alternative sources of funding. Alternative sources of funding may not be available on terms favorable to the Company or at all, in which case, the Company's business, financial condition or results of operations may be adversely affected.

Table of Contents

Considering current cash reserves, and other existing sources of liquidity, including its revolving credit facility, management believes that the Company will have sufficient sources of financing to continue its operations through at least the next twelve months. There can be no assurance that the Company will not seek to raise additional capital through the incurrence of debt or issuance of equity securities in the future. However, the Company may require additional sources of liquidity to fund any future acquisitions and its future growth.

Foreign Currency Risk

The Company has several operations in foreign locations around the world. These operations incur revenue and expenses in various foreign currencies. Revenues and expenses denominated in currencies other than the U.S. dollar expose the Company to foreign currency market risk. Unfavorable movements in foreign currency exchange rates between the U.S. dollar and other foreign currencies may have an adverse impact on the Company's operations. These foreign currency market movements could create a foreign currency gain or loss that could be realized or unrealized for the Company. The Company's Board of Directors has approved a foreign currency risk policy that allows the Company to enter into forward contracts and purchase option agreements to hedge foreign currency risks. The Company has an ongoing program to evaluate its foreign currency risk and to minimize these risks whenever possible through leading and lagging accounts payables and accounts receivables, centralized cash management and other forms of natural hedging. The Company also uses forward contracts or purchased options to hedge some of its foreign currency transaction exposure. Gains and losses resulting from these transactions are included in interest and other income, net in the accompanying Condensed Consolidated Statement of Operations. As of March 31, 2008, the Company had no open forward contracts or purchase options.

Off-Balance Sheet Arrangements

On May 8, 2007, the Company closed an offering of convertible senior notes due in 2027. These notes are due in full in 2027 and are convertible into shares of common stock at a conversion price of \$18.10 per share. Pursuant to the terms of the notes, the principal amount of the notes is settleable in cash and only the amount of conversion value, as defined, in excess of the principal amount of the notes is settleable in cash or shares. In accordance with relevant authoritative pronouncements issued by the FASB and its Emerging Issues Task Force (EITF), the conversion feature of the notes does not qualify for separate accounting from the notes. Accordingly, no separate amounts related to the conversion feature are presented in the consolidated financial statements (see Note 8 in Notes to the Condensed Consolidated Financial Statements).

Material Changes in Contractual Obligation

The Company had a material change in significant contractual obligations from December 31, 2007, as a result of the Company's amendment of its 2007 credit facility and drawing down for the NSB acquisition. As of March 31, 2008, future payments related to the 2007 credit facility are as follows:

	Payments Due by Period (in thousands)				Total
	Less than 1 Year	1 - 3 Years	3 - 5 Years	More than 5 years	
Long-term debt	\$ 3,750	\$ 25,000	\$ 130,000	\$	\$ 158,750
Estimated interest payments*	6,367	15,665	11,521		33,553
Total contractual obligations	\$ 10,117	\$ 40,665	\$ 141,521	\$	\$ 192,303

* Based on effective interest rate at March 31, 2008.

Table of Contents

Certain Factors That May Affect Future Results

We have recorded a large amount of goodwill and other acquired intangible assets which we will be required to write down and record an expense if they become impaired.

In connection with our acquisitions, we currently have goodwill of \$354.2 million and \$141.4 million of amortizing acquired intangible assets on our balance sheet. Although the goodwill is not amortized, we are required to test the goodwill for impairment at least yearly and any time there is an indication an impairment may have occurred. If we determine that the carrying value of the goodwill or other acquired intangible assets is in excess of its fair value, we will be required to write down a portion or all of the goodwill or other acquired intangible assets, which would adversely impact our results of operations.

We have a significant amount of debt following our note offering in 2007 and credit agreement in February 2008.

As of March 31, 2008, we had approximately \$230 million of outstanding debt related to our debt offering. In addition, in February 2008, we borrowed \$160 million under our Credit Agreement dated December 16, 2007, as amended by the First Amendment dated February 11, 2008 and the Notice dated February 11, 2008, to finance the acquisition of NSB and to pay certain fees and expenses incurred in connection with the acquisition. Our substantial indebtedness could adversely affect our business, financial condition and results of operations and our ability to meet our payment obligations under our outstanding liabilities.

This level of debt could have significant consequences on our future operations, including:

Making it more difficult for us to meet our payment and other obligations under our outstanding debt;

Resulting in an event of default if we fail to comply with the financial and other restrictive covenants contained in our debt agreements, which event of default could result in all of our debt becoming immediately due and payable and, in the case of an event of default under our secured debt, such as our senior secured credit facility, could permit the lenders to foreclose on our assets securing that debt;

Reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and other general corporate purposes, and limiting our ability to obtain additional financing for these purposes;

Subjecting us to the risk of increased sensitivity to interest rate increases on any indebtedness with variable interest rates;

Limiting our flexibility in planning for, or reacting to, and increasing our vulnerability to, changes in our business, the industry in which we operate and the general economy and

Placing us at a competitive disadvantage compared to our competitors that have less debt or are less leveraged.

Any of the above-listed factors could have an adverse effect on our business, financial condition and results of operations and our ability to meet our payment obligations under our outstanding liabilities.

The accounting method for our convertible debt securities may be subject to change.

For the purpose of calculating diluted earnings per share, a convertible debt security providing for net share settlement and meeting specified requirements under U.S. generally accepted accounting principles (GAAP) may be accounted for similar to non-convertible debt, with the stated coupon constituting interest expense and any shares issuable to settle the conversion spread being accounted for under the treasury stock method. The effect of the treasury stock method is that the shares potentially issuable upon conversion of the notes are not included in the calculation of our earnings per share until the notes are in the money, and we are assumed to issue the number of shares of our common stock to settle the

conversion spread.

The Financial Accounting Standards Board (FASB) is addressing, among other things, the accounting method for net share settled financial instruments. The FASB is considering a proposed method for accounting for net share settled financial instruments under which the debt and equity components of the convertible security would be bifurcated and accounted for separately. The effect of this proposal is that the equity component would be accounted for as an original issue discount bond and would be included in the paid-in-capital section of stockholders' equity on an issuer's balance sheet. Income available to common stockholders would be lower by recognizing amortization of the original issue discount as interest expense. The diluted earnings per share calculation would continue to be calculated based on the treasury stock method.

Table of Contents

We cannot predict the outcome of the FASB deliberations and whether or not the FASB will require net share settled financial instruments to be accounted for under the existing method, the proposed method described above or some other method, and when any change would be implemented or whether it would be implemented retroactively or prospectively. We also cannot predict any other changes in GAAP that may be made affecting accounting for convertible debt instruments. Any change in the accounting method for convertible securities could have an adverse impact on our reported or future financial results and could cause future results to vary in unpredictable ways if we must mark to market the equity component of the recently issued notes. These impacts could adversely affect our stock price.

Because of these and other factors affecting the Company's operating results, past financial performance should not be considered an indicator of future performance, and investors should not use historical trends to anticipate results or trends in future periods.

If the emerging and current technologies and platforms of Microsoft and others upon which the Company builds its products do not gain or retain broad market acceptance, or if we fail to develop and introduce in a timely manner new products and services compatible with such emerging technologies, we may not be able to compete effectively and our ability to generate revenues will suffer.

The Company's software products are built and depend upon several underlying and evolving relational database management system platforms such as Microsoft SQL Server, Progress and IBM. To date, the standards and technologies that the Company has chosen to develop its products upon have proven to be popular and have gained broad industry acceptance. However, the market for the Company's software products is subject to ongoing rapid technological developments, quickly evolving industry standards and rapid changes in customer requirements, and there may be existing or future technologies and platforms that achieve industry standard status, which are not compatible with our products. Additionally, because the Company's products rely significantly upon popular existing user interfaces to third party business applications, the Company must forecast which user interfaces will be or will remain popular in the future. For example, the Company believes the Internet has and continues to transform the way businesses operate and the software requirements of customers, who are increasingly shifting towards web-based applications and away from server-based applications. Specifically, the Company believes that customers desire business software applications that enable a customer to engage in commerce or service over the Internet. The Company is proceeding on its previously announced determination to continue with development of several of its primary product lines upon the Microsoft .NET technology. If the Company cannot continue to develop such .NET compatible products in time to effectively bring them to market, or if .NET does not become or continue to be a widely accepted industry standard, or if customers adopt competitors' products when they shift to web-based applications, the ability of the Company's products to interface with popular third party applications will be negatively impacted and the Company's competitive position, operating results and revenues could be adversely affected.

New software technologies could cause us to alter our business model resulting in adverse effects on our operating results.

Development of new technologies may also cause the Company to change how it licenses or prices its products, which may adversely impact the Company's revenues and operating results. Emerging licensing models include Software as a Service (SaaS), hosting as well as subscription-based licensing, in which the licensee essentially rents software for a defined period of time, as opposed to the current perpetual license model. While the Company does currently offer a hosted model as well as a SaaS model to its NSB retail customers, it has to date chosen not to offer a subscription based model. The Company's future business, operating results and financial condition will depend on its ability to effectively train its sales force to sell an integrated comprehensive set of business software products and recognize and implement emerging industry standards and models, including new pricing and licensing models.

If the Company fails to respond to emerging industry standards, including licensing models and end-user requirements, the Company's competitive position and revenues could be adversely affected.

A significant portion of our future revenue is dependent upon our existing installed base of customers continuing to license additional products, as well as purchasing consulting services and renewing their annual maintenance and support contracts. If our existing customers fail to renew their maintenance and support agreements or fail to purchase new product enhancements or additional services from the Company at historical levels, the Company's revenues and results of operations could be materially impacted.

Table of Contents

Historically, approximately 50% to 60% of the Company's license revenues, 90% of the Company's maintenance revenues and a substantial portion of the Company's consulting revenues are generated from the Company's installed base of customers. Maintenance and support agreements with these customers are traditionally renewed on an annual basis at the customer's discretion, and there is normally no requirement that a customer so renew or that a customer pay new license or service fees to the Company following the initial purchase. As a result, if the Company's existing customers fail to renew their maintenance and support agreements or fail to purchase new product enhancements or additional services at historical levels, our revenues and results of operations could be materially impacted.

Our increasingly complex software products may contain errors or defects, which could result in the rejection of our products and damage to our reputation as well as cause lost revenue, delays in collecting accounts receivable, diverted development resources and increased service costs and warranty claims.

The Company's software products are made up of increasingly complex computer programs. Software products are complex and products offered by the Company often contain undetected errors or failures (commonly referred to as bugs) when first introduced to the market or as new updates or upgrades of such products are released to the market. Despite testing by the Company, and by current and potential customers, prior to general release to the market, the Company's products may still contain material errors after their initial commercial shipment. Such material errors may result in loss of or delay in market acceptance of the Company's products, damage to the Company's reputation and increased service and warranty costs. Ultimately, such errors could lead to a decline in the Company's revenues. The Company has from time to time been notified by some of its customers of errors in its various software products. Although it has not occurred to date, the possibility of the Company being unable to correct such errors in a timely manner could have a material adverse effect on the Company's results of operations and its cash flows. In addition, if material technical problems with the current release of the various database and technology platforms, on which the Company's products operate, including Progress, IBM, Microsoft SQL or Microsoft .NET, occur, such difficulties could also negatively impact sales of these products, which could in turn have a material adverse effect on the Company's results of operations.

The market for new development tools, application products and consulting and education services continues to emerge, which could negatively affect our client/server and web-based products, and, if the Company fails to respond effectively to evolving requirements of these markets, the Company's business, financial condition, results of operations and cash flows could be materially and adversely affected.

The Company's development tools, application products and consulting and education services generally help organizations build, customize or deploy solutions that operate in both client/server-computing and web-based environments. The Company believes that the environment for application software is continuing to change from client/server to a Web-based environment to facilitate commerce on the Internet. There can be no assurance that the market for client/server computing will continue to grow, or will not decrease, or that the Company will be able to continue to respond effectively to the evolving requirements of Web-based markets.

The market for our software products and services is highly competitive. If we are unable to compete effectively with existing or new competitors our business could be negatively impacted.

The business information systems industry in general and the manufacturing, distribution, retail, CRM and financial computer software industry specifically, in which the Company competes are very competitive and subject to rapid technological change, evolving standards, frequent product enhancements and introductions and changing customer requirements. Many of the Company's current and potential competitors have (i) longer operating histories, (ii) significantly greater financial, technical and marketing resources, (iii) greater name recognition, (iv) larger technical staffs and (v) a larger installed customer base than the Company. A number of companies offer products that are similar to the Company's products and target the same markets. In addition, any of these competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements (such as commerce on the Internet and Web-based application software), and to devote greater resources to the development, promotion and sale of their products than the Company. Furthermore, because there are relatively low barriers to entry in the software industry, the Company expects additional competition from other established and emerging companies. Such competitors may develop products and services that compete with those offered by the Company or may acquire companies, businesses and product lines that compete with the Company. It also is possible that competitors

Table of Contents

may create alliances and rapidly acquire significant market share, including in new and emerging markets. Accordingly, there can be no assurance that the Company's current or potential competitors will not develop or acquire products or services comparable or superior to those that the Company develops, combine or merge to form significant competitors or adapt more quickly than the Company to new technologies, evolving industry trends and changing customer requirements. Competition could cause price reductions, reduced margins or loss of market share for the Company's products and services, any of which could materially and adversely affect the Company's business, operating results and financial condition. There can be no assurance that the Company will be able to compete successfully against current and future competitors or that the competitive pressures that the Company may face will not materially adversely affect its business, operating results, cash flows and financial condition.

If we were to lose the services of the members of our senior management team, we may not be able to execute our business strategy.

Our future success depends in a large part upon the continued service of key members of our senior management team. In particular, our executive Officers and other senior members of our management team such as our chief marketing officer and senior vice presidents are critical to the overall management of Epicor as well as the development of our technology, our operations and our strategic direction. All of our executive officers and key employees are at-will employees, and we do not maintain any key-person life insurance policies. The loss of any members of our executive management team and the possible inability to attract qualified replacements in a timely manner could adversely affect our ability to compete effectively and seriously harm our business.

We may not be able to maintain and expand our product offerings or business if we are not able to retain, hire and integrate sufficiently qualified personnel.

The Company's success depends in large part on the continued service of key management personnel that are not subject to employment agreements, including, but not limited to, several of the key personnel employed as a result of the Company's recent acquisitions. In addition, the Company needs to expand its workforce to continue its growth, and the competition to attract, retain and motivate qualified technical, sales and software development personnel is intense. Additionally, the sudden unexpected loss of such technical personnel, such as developers can have a negative impact on the Company's ability to develop and introduce new products in a timely and effective manner. There is no assurance that the Company will retain its key personnel, including those who came to the Company as part of acquisitions, or attract sufficient numbers of qualified key personnel in the future. The failure to retain or attract such persons could have a material adverse effect on the Company's business, operating results, cash flows and financial condition.

Our software products incorporate and rely upon third party software products for certain key functionality and our revenues, as well as our ability to develop and introduce new products, could be adversely affected by our inability to control or replace these third party products and operations.

The Company's products incorporate and rely upon software products developed by several other third party entities such as Microsoft, IBM and Progress. Specifically, the Company's software products are built and depend upon several underlying and evolving relational database management system platforms including Microsoft SQL Server, Progress OpenEdge and IBM U2, and also are integrated with several other third party provider products for the purpose of providing or enhancing necessary functionality. In the event that these third party products were to become unavailable to the Company or to our customers, either directly from the third party manufacturers or through other resellers of such products, the Company could not readily replace these products with substitute products. As a result, the Company cannot provide assurance that these third parties will:

Remain in business;

Continue to support the Company's product lines;

Maintain viable product lines;

Make their product lines available to the Company on commercially acceptable terms and

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

Not make their products available to the Company's competitors on more favorable terms.

In the long term (i.e., a year or more), an interruption of supply from these vendors could potentially be overcome through migration to another third party supplier or development within the Company. However, any interruption in the short term could have a significant detrimental effect on the Company's ability to continue to market and sell those of its products relying on these specific third party products and could have a material adverse effect on the Company's business, results of operation, cash flows and financial condition.

Table of Contents

We may pursue strategic acquisitions, investments and relationships and may not be able to successfully manage our operations if we fail to successfully integrate such acquired businesses and technologies, which could adversely affect our operating results.

As part of its business strategy, the Company may continue to expand its product offerings to include application software products and services that are complementary to its existing software applications, particularly in the areas of electronic commerce or commerce over the Internet, or may gain access to established customer bases into which the Company can sell its current products. The Company's acquisitions of Scala Business Solutions in 2004, CRS in 2005 and NSB in 2008 are typical of this ongoing strategy. However, while this strategy has historically and may in the future involve acquisitions, investments in other businesses that offer complementary products, joint development agreements or technology licensing agreements, the specific risks we commonly encounter in these types of transactions include the following:

Difficulty in effectively integrating any acquired technologies or software products into our current products and technologies;

Difficulty in predicting and responding to issues related to product transition such as development, distribution and customer support;

The possible adverse impact of such acquisitions on existing relationships with third party partners and suppliers of technologies and services;

The possibility that customers of the acquired company might not accept new ownership and may transition to different technologies or attempt to renegotiate contract terms or relationships, including maintenance or support agreements;

The possibility that the due diligence process in any such acquisition may not completely identify material issues associated with product quality, product architecture, product development, intellectual property issues, key personnel issues or legal and financial contingencies;

Difficulty in integrating acquired operations, including incorporating internal control structures, due to geographical distance, and language and cultural differences and

Difficulty in retaining employees of the acquired company.

A failure to successfully integrate acquired businesses or technology for any of these reasons could have a material adverse effect on the Company's results of operations.

Our future results could be harmed by economic, political, geographic, regulatory and other specific risks associated with our international operations.

The Company believes that any future growth of the Company will be dependent, in part, upon the Company's ability to maintain and increase revenues in its existing and emerging international markets, including Asia and Latin America. During the March 31, 2008 and 2007, 34.9% and 41.5%, respectively, of total Company revenues were generated by the Company's international operations. There can be no assurance that the Company will maintain or expand its international sales. If the revenues that the Company generates from foreign activities are inadequate to offset the expense of maintaining foreign offices and activities, the Company's business, financial condition and results of operations could be materially and adversely affected. The international reach of the Company's businesses could also subject the Company and its results of operations to unexpected, uncontrollable and rapidly changing economic and political conditions. Specifically, our international sales and operations are subject to inherent risks, including:

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

Differing intellectual property and labor laws;

Lack of experience in a particular geographic market;

Different and changing regulatory requirements in various countries and regions;

Tariffs and other barriers, including import and export requirements and taxes on subsidiary operations;

Fluctuating exchange rates and currency controls;

Difficulties in staffing and managing foreign sales and support operations;

Longer accounts receivable payment cycles;

Potentially adverse tax consequences, including repatriation of earnings;

Development and support of localized and translated products;

Table of Contents

Lack of acceptance of localized products or the Company in foreign countries;

Shortage of skilled personnel required for local operations and

Perceived health risks, natural disasters or terrorist risks which impact a geographic region and business operations therein. Any one of these factors or a combination of them could materially and adversely affect the Company's future international sales and, consequently, the Company's business, operating results, cash flows and financial condition. A portion of the Company's revenues from sales to foreign entities, including foreign governments, has been in the form of foreign currencies. While the Company does enter into hedges and other similar foreign currency contracts from time to time, there can be no assurance that such activities will effectively minimize the impact that fluctuations in the value of foreign currencies may have on the Company. Fluctuations in the value of foreign currencies could adversely impact the profitability of the Company's foreign operations.

We rely, in part, on third parties to sell our products. Disruptions to these channels would adversely affect our ability to generate revenues from the sale of our products.

The Company distributes products through a direct sales force as well as through an indirect distribution channel, which includes VARs and other distributors and authorized consultants, consisting primarily of professional firms. During the three months ended March 31, 2008 and 2007, 13% and 15%, respectively, of the Company's software license revenues were generated by VARs and distributors. If the Company's VARs or authorized consultants cease distributing or recommending the Company's products or emphasize competing products, the Company's results of operations could be materially and adversely affected. The success of the Company's distributors depends in part upon their ability to attract and maintain qualified sales and consulting personnel. Additionally, the Company's distributors may generally terminate their agreements with the Company upon 30 days notice, while the Scala partners may generally terminate their agreements upon 30 days to several months notice. Almost all partners though may effectively terminate their agreements at any time by ceasing to promote or sell our products. If our VARs or other distributors are unable to maintain such qualified personnel or if several of the Company's VARs or other distributors were to cease doing business or terminate their agreements and the Company is unable to replace them in a timely fashion, such factors could negatively impact the Company's results of operations. Finally, there can be no assurance that having both a direct sales force and a distribution channel for the Company's products will not lead to conflicts between those two sales forces which could adversely impact the Company's ability to close sales transactions or could have a negative impact upon average selling prices, any of which may negatively impact the Company's operating revenues and results of operations.

If third parties infringe upon our intellectual property, we may expend significant resources enforcing our rights or suffer competitive injury, which could adversely affect our operating results. In addition, we may be subject to claims that we infringe upon the intellectual property of others.

The Company considers its proprietary software and the related intellectual property rights in such products to be among its most valuable assets. The Company relies on a combination of copyright, trademark and trade secret laws (domestically and internationally), employee and third-party nondisclosure agreements and other industry standard methods for protecting ownership of its proprietary software. However, the Company cannot assure you that in spite of these precautions, an unauthorized third party will not copy or reverse-engineer certain portions of the Company's products or obtain and use information that the Company regards as proprietary. From time to time, the Company has in the past taken legal action against third parties whom the Company believed were infringing upon the Company's intellectual property rights. However, there is no assurance that the mechanisms that the Company uses to protect its intellectual property will be adequate or that the Company's competitors will not independently develop products that are substantially equivalent or superior to the Company's products.

Moreover, the Company from time to time receives claims from third parties that the Company's software products infringe upon the intellectual property rights of others. The Company expects that as the number of software products in the United States and worldwide increases and the functionality of these products further overlaps, the number of these types of claims will increase. This risk is potentially heightened in such diverse international markets as Eastern Europe, Asia and the Middle East. Although it has not yet occurred to date, any such claim, with or without merit, could result in costly litigation and require the Company to enter into royalty or licensing arrangements. The terms of such royalty or license arrangements, if required, may not be favorable to the Company. In addition, in certain cases, the Company provides the source code for some of its application software under licenses to its customers and distributors to enable them to customize the software to meet their particular requirements or translate or localize the products for resale in foreign countries, as the case may be. Although the

Table of Contents

source code licenses contain confidentiality and nondisclosure provisions, the Company cannot be certain that such customers or distributors will take adequate precautions to protect the Company's source code or other confidential information. Moreover, regardless of contractual arrangements, the laws of some countries in which the Company does business or distributes its products do not offer the same level of protection to intellectual property, as do the laws of the United States.

Foreign currency fluctuations may negatively impact the financial results of the Company.

The results of operations or financial condition of the Company may be negatively impacted by foreign currency fluctuations. The Company operates throughout the world through international sales subsidiaries, networks of exclusive third party distributors, and non-exclusive dealers. As a result, certain sales and related expenses are denominated in currencies other than the U.S. dollar. The Company's results of operations may fluctuate due to exchange rate fluctuation between the U.S. dollar and other currencies because our financial results are reported on a consolidated basis in U.S. dollars. In an effort to minimize operation fluctuations due to currency movements, we may attempt to limit foreign exchange exposure through operational strategies (e.g. natural hedges, netting, leading and lagging of accounts payables and account receivables) to offset the effects of exchange rate changes. In addition, the Company may enter into forward currency contracts and purchased options contracts to mitigate unfavorable impacts to our non-operating income. The Company estimates the volume of sales transactions in various currencies. Our estimates of transaction volumes in these various currencies could be overstated or understated. If these estimates are overstated or understated during periods of currency volatility, the Company may experience material currency gains or losses.

Our quarterly operating results are difficult to predict and subject to substantial fluctuation.

The Company's quarterly operating results have fluctuated significantly in the past. For example, from the first quarter of 2006 through the first quarter of 2008, quarterly operating results have ranged from a loss of \$9.0 million to income of \$13.9 million. The Company's operating results may continue to fluctuate in the future as a result of many specific factors that include:

The demand for the Company's products, including reduced demand related to changes in marketing focus for certain products, software market conditions or general economic conditions as they pertain to information technology (IT) spending;

Fluctuations in the length of the Company's sales cycles which may vary depending on the complexity of our products as well as the complexity of the customer's specific software and service needs;

The size and timing of orders for the Company's software products and services, which, because many orders are completed in the final days of each quarter, may be delayed to future quarters;

The number, timing and significance of new software product announcements, both by the Company and its competitors;

Customers' unexpected postponement or termination of expected system upgrades or replacement due to a variety of factors including economic conditions, changes in IT strategies or management changes;

Changes in accounting standards, including software revenue recognition standards;

Currency fluctuations and

Fluctuations in number of customers renewing maintenance.

In addition, the Company has historically realized a significant portion of its software license revenues in the final month of any quarter, with a concentration of such revenues recorded in the final ten business days of that month. Further, the Company generally realizes a significant

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

portion of its annual software license revenues in the final quarter of the fiscal year.

Due to the above factors, among others, the Company's revenues are difficult to forecast. The Company, however, bases its expense levels, including operating expenses and hiring plans, in significant part, on its expectations of future revenue. As a result, the Company expects its expense levels to be relatively fixed in the short term. The Company's failure to meet revenue expectations could adversely affect operating results. Further, an unanticipated decline in revenue for a particular quarter may disproportionately affect the Company's operating results in that quarter because the majority of the Company's expenses will be fixed in the short term. As a result, the Company believes that period-to-period comparisons of the Company's results of operations are not, and will not, necessarily be meaningful, and you should not rely upon them as an indication of future performance. Due to the foregoing factors, it is likely that, as in past quarters, in some future quarters the Company's operating results will be below the expectations of public market analysts and investors. As in those past quarters, such an event would likely have an adverse effect upon the price of the Company's outstanding securities.

Table of Contents

Our operating cash flows are subject to fluctuation, primarily related to our ability to timely collect accounts receivable and to achieve anticipated revenues and expenses. Negative fluctuations in operating cash flows may require us to seek additional cash sources to fund our working capital requirements. If additional cash sources are not available to the Company, our operations could be adversely affected.

From the first quarter of 2006 through the first quarter of 2008, the Company's quarterly operating cash flows have ranged from \$0.1 million provided by operating activities to \$22.3 million provided by operating activities. The Company's cash and cash equivalents have increased from \$70.2 million at December 31, 2006 to \$103.5 million at March 31, 2008. However, the Company has at times experienced decreasing revenues and, prior to the first quarter of 2003, continued operating losses. If, in the future, the Company is not successful in achieving its anticipated revenues and expenses or maintaining a positive cash flow, the Company may not have sufficient resources for planned growth and may be required to take actions to reduce its operating expenses, such as reductions in work force and/or seek additional sources of funding. Historically, the Company has also experienced fluctuations in the proportion of accounts receivable over 90 days old and days sales outstanding. These fluctuations have been due to various issues, including product and service quality, deteriorating financial condition of customers during the recent recession and lack of effectiveness of the Company's collection processes. During the past year, our days sales outstanding have increased from 68 as of March 31, 2007 to 91 as of March 31, 2008, due in part to the recent acquisition of NSB. If the Company cannot successfully collect a significant portion of its net accounts receivable, the Company may be required to seek alternative financing sources. As of March 31, 2008, the Company had a \$230.0 million obligation to holders of the Company's convertible bonds and \$158.5 million in debt.

The market for our stock is volatile and fluctuations in operating results, changes in the Company's guidance on revenues and earnings estimates and other factors could negatively impact our stock's price.

During the three year period ended March 31, 2008, the price of the Company's common stock ranged from a low of \$9.59 to a high of \$15.75. For three months ended March 31, 2008, the stock price ranged from a low of \$10.33 to a high of \$12.62. As of May 1, 2008, the Company had 59,316,743 shares of Common Stock outstanding. The market prices for securities of technology companies, including the Company's, have historically been quite volatile. Quarter to quarter variations in operating results, changes in the Company's guidance on revenues and earnings estimates, announcements of technological innovations or new products by the Company or its competitors, announcements of major contract awards, announcements of industry acquisitions by us or our competitors, changes in accounting standards or regulatory requirements as promulgated by the FASB, SEC, NASDAQ or other regulatory entities, changes in management and other events or factors may have a significant impact on the market price of the Company's Common Stock. In addition, the securities of many technology companies have experienced extreme price and volume fluctuations, which have often been related more to changes in recommendations or financial estimates by securities analysts than to the companies' actual operating performance. Any of these conditions may adversely affect the market price of the Company's Common Stock.

If we are not able to successfully integrate NSB Retail Systems and its operations with those of CRS Retail Technology Group and the Company, our ability to achieve anticipated revenues and related profits, as well as sales for NSB products may be adversely impacted.

The success of our acquisition of NSB will depend in large part upon our ability to continue to successfully integrate the NSB business with CRS and into the Company. As with most acquisitions, integration issues are complex, time-consuming and expensive and, without proper planning and implementation, could significantly disrupt the business of NSB and thus, the Company. The challenges involved in continuing to integrate NSB with the Company include:

Coordinating sales and marketing efforts to effectively communicate the combined company's capabilities;

Introducing and effectively selling and cross selling the NSB products into international (non-US) markets where they have not traditionally been offered;

Combining product offerings and technology;

Coordinating and combining domestic operations, relationships and facilities;

Edgar Filing: EPICOR SOFTWARE CORP - Form 10-Q

Coordinating and rationalizing research and development activities to enhance introduction of new products and technologies with reduced cost;

Table of Contents

Coordinating NSB's research and development efforts here in the United States and Canada with the Company's R&D facilities in the U.S. as well as in Moscow, Russia and Monterrey, Mexico;

Continuing to demonstrate to the existing NSB customers that the acquisitions will not result in adverse changes in client service standards or business focus and helping customers conduct business easily with the Company;

Preserving distribution, marketing or other important relationships of the Company and NSB and resolving potential conflicts that may arise;

Successfully integrating the business cultures of the Company and NSB, maintaining employee morale and retaining key employees and

Consolidating and rationalizing corporate information technology and administrative infrastructures.

The integration of the NSB business into the Company's business may not realize all of the anticipated benefits of the acquisition to the extent, or in the time frame, anticipated. The failure to fully integrate the NSB business operations successfully with those of CRS and the Company or to realize all of the anticipated benefits of the acquisitions could seriously hinder our plans for product development and business and market expansion.

A variety of specific business interruptions could adversely affect our business.

A number of particular types of business interruptions could greatly interfere with our ability to conduct business. For example, a substantial portion of our facilities, including our corporate headquarters and other critical business operations, are located near major earthquake faults. We do not carry earthquake insurance and do not fund for earthquake-related losses. In addition, our computer systems are susceptible to damage from fire, floods, earthquakes, power loss, telecommunications failures, and similar events. The Company continues to consider and implement its options and develop contingency plans to avoid and/or minimize potential disruptions to its telecommunication services.

If open source software expands into enterprise software applications, our software license revenues may decline.

Open source software includes a broad range of software applications and operating environments produced by companies, development organizations and individual software developers and typically licensed for use, distribution and modification at a nominal cost or often, free of charge. A notable example of open source software is the Linux operating system, which continues to gain in popularity. To the extent that the open source software models expand and non-commercial companies and software developers create and contribute competitive enterprise software applications to the open source community, we may have to adjust our pricing, maintenance and distribution strategies and models, which could adversely affect our revenue and operating margins.

Future acquisitions of technologies or companies, which are paid for partially, or entirely through the issuance of stock or stock rights could prove dilutive to existing shareholders.

Consistent with past experience, the Company expects that the consideration it might pay for any future acquisitions of companies or technologies could include stock, rights to purchase stock, cash or some combination of the foregoing. For example, the Company's acquisition of Scala Business Solutions in 2004 involved the issuance of approximately 4.25 million shares of the Company's Common Stock. If the Company issues stock or rights to purchase stock in connection with future acquisitions, earnings (loss) per share and then-existing holders of the Company's Common Stock may experience dilution.

Table of Contents

Item 3 - Quantitative and Qualitative Disclosures About Market Risk:

Interest Rate Risk. The Company's exposure to market risk for changes in interest rates relates primarily to the Company's cash and cash equivalents and outstanding debt. At March 31, 2008, the Company had \$103.5 million in cash and cash equivalents. Based on the investment interest rate and the balance as of March 31, 2008, a hypothetical 1% decrease in interest rates would decrease interest income by approximately \$1.0 million on an annual basis, as well as increase the Company's net loss and decrease cash flows from operations. The Company places its investments with high credit quality issuers and, by policy, limits the amount of credit exposure to any one issuer. Deposits with its U.S. issuers may exceed the amounts of federal deposit insurance provided on such deposits, and deposits held outside the U.S. are not afforded such protection. The Company is averse to principal loss and ensures the safety and preservation of its invested funds by limiting default, market and reinvestment risk. The Company mitigates default risk by investing in only the safest and highest credit quality securities and by constantly positioning its portfolio to respond appropriately to a significant reduction in a credit rating of any investment issuer or guarantor. The Company has not experienced any losses on deposits of cash or cash equivalents.

The Company cannot predict market fluctuations in interest rates and their impact on its variable rate debt, nor can there be any assurance that fixed rate long-term debt will be available to the Company at favorable rates, if at all. Consequently, future results may differ materially from the estimated adverse changes discussed above. Changes in interest rates do not affect the amount of interest we pay on our fixed rate senior convertible notes, but do affect the fair value of the debt.

On April 18, 2008, the Company entered into interest rate swap arrangements that convert our portion of its floating rate interest rate exposure under the 2007 credit facility to a fixed rate basis. The interest rate swaps qualify for hedge accounting treatment pursuant to SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended. The changes in the fair
