UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549
FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2008

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission file number 1-11294

Unum Group

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

62-1598430
(I.R.S. Employer Identification No.)

1 Fountain Square

Chattanooga, Tennessee 37402

(Address of principal executive offices)

423.294.1011

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Edgar Filing: Unum Group - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

(Check one): Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

331,118,447 shares of the registrant's common stock were outstanding as of October 29, 2008.

Cautionary Statement Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a safe harbor to encourage companies to provide prospective information, as long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. Certain information contained in this discussion, or in any other written or oral statements made by us in communications with the financial community or contained in documents filed with the Securities and Exchange Commission (SEC), may be considered forward-looking. Forward-looking statements are those not based on historical information, but rather relate to future operations, strategies, financial results, or other developments and speak only as of the date made. These statements may be made directly in this document or may be made part of this document by reference to other documents filed by us with the SEC, which is known as incorporation by reference. You can find many of these statements by looking for words such as will, may, should, could, believes, expects, anticipates, estimates, intends, projects, goals, objectives, or similar expressions in this document incorporated herein.

These forward-looking statements are subject to numerous assumptions, risks, and uncertainties, many of which are beyond our control. We caution readers that the following factors, in addition to other factors mentioned from time to time, may cause actual results to differ materially from those contemplated by the forward-looking statements:

General economic or business conditions, both domestic and foreign, may be less favorable than expected, including the continued financial market disruption, which may affect sales growth, premium levels, claims experience, the level of pension benefit costs and funding, the availability and cost of capital, liquidity, and investment results, including credit deterioration of investments, and as a result could adversely affect the Company's results of operations in a period.

Competitive pressures in the insurance industry may increase significantly through industry consolidation or otherwise.

Events or consequences relating to terrorism and acts of war, both domestic and foreign, may adversely affect our business and the Company's results of operations in a period and may also affect the availability and cost of reinsurance.

Legislative, regulatory, or tax changes, both domestic and foreign, including the effect of potential legislation and increased regulation in the current political environment, may adversely affect the businesses in which we are engaged, including the demand for and cost of certain of our products.

Rating agency actions, state insurance department market conduct examinations and other inquiries, other governmental investigations and actions, and negative media attention may adversely affect our business and the Company's results of operations in a period.

The level and results of litigation may not be favorable to the Company and may adversely affect our business and the Company's results of operations in a period.

Investment results, including, but not limited to, realized investment losses resulting from impairments, may differ from our assumptions and prior experience and may adversely affect our business and the Company's results of operations in a period.

Changes in the interest rate environment may adversely affect our reserve and policy assumptions and ultimately profit margins and reserve levels.

Edgar Filing: Unum Group - Form 10-Q

Sales growth may be less than planned, which could affect adversely revenue and profitability.

Effectiveness in supporting new product offerings and providing customer service may not meet expectations.

Actual experience in pricing, underwriting, and reserving may deviate from our assumptions.

Actual persistency may be lower than projected persistency, resulting in lower than expected revenue and higher than expected amortization of deferred acquisition costs.

Claim incidence and recovery rates may be influenced by, among other factors, the rate of unemployment and consumer confidence, the emergence of new diseases, epidemics, or pandemics, new trends and developments in medical treatments, and the effectiveness of risk management programs.

Insurance reserve liabilities may fluctuate as a result of changes in numerous factors, and such fluctuations can have material positive or negative effects on net income.

Table of Contents

Retained risks in our reinsurance operations are influenced primarily by the credit risk of the reinsurers and potential contract disputes. Any material changes in the reinsurers' credit risk or willingness to pay according to the terms of the contract may adversely affect our business and the results of operations in a period.

For further discussion of risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements, see Part I, Item 1A of our annual report on Form 10-K for the year ended December 31, 2007.

All subsequent written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. We do not undertake any obligation to release publicly any revisions to such forward-looking statements to reflect events or circumstances after the date of this document or to reflect the occurrence of unanticipated events.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Unum Group and Subsidiaries

September 30, 2008

Note 1 - Basis of Presentation

The accompanying consolidated financial statements of Unum Group and its subsidiaries (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended December 31, 2007.

In March 2007, we closed the sale of our wholly-owned subsidiary GENEX Services, Inc. (GENEX). The financial results of GENEX are reported as discontinued operations in the consolidated financial statements. Except where noted, the information presented in the notes to the consolidated financial statements excludes GENEX. See Note 3 for further discussion.

Freestanding derivatives with positive fair values are reported on our consolidated balance sheets at fair value as assets within other long-term investments, and those with negative fair values are carried as liabilities within other liabilities. Embedded derivatives, excluding those associated with modified coinsurance arrangements, are reported on the consolidated balance sheets at fair value with the host contract. The embedded derivatives associated with modified coinsurance contracts are reported at fair value as either other long-term investments or other liabilities in the consolidated balance sheets. We previously reported our freestanding derivatives and our embedded derivatives related to reinsurance contracts on a net basis within fixed maturity securities. We have increased fixed maturity securities, other long-term investments, and other liabilities \$160.0 million, \$109.2 million, and \$269.2 million, respectively, at December 31, 2007 to conform to the current year presentation.

In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2008, are not necessarily indicative of the results that may be expected for the year ended December 31, 2008.

Note 2 - Accounting Pronouncements

Accounting Pronouncements Adopted:

Effective January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards No. 157 (SFAS 157), *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The adoption of SFAS 157 did not have a material effect on our financial position or results of operations.

Effective January 1, 2007, we adopted the provisions of Statement of Position 05-1 (SOP 05-1), *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*. SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. An internal replacement is defined as a modification in product benefits, features, or coverages that occurs by the exchange or replacement of an existing insurance policy for a new policy. The cumulative effect of applying the provisions of SOP 05-1 decreased our 2007 opening balance of retained earnings \$445.2 million.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued****Unum Group and Subsidiaries****September 30, 2008****Note 2 - Accounting Pronouncements - Continued**

Effective January 1, 2007, we adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (SFAS 109)*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS 109. Unlike SFAS 109, FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Additionally, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The cumulative effect of applying the provisions of FIN 48 increased our 2007 opening balance of retained earnings \$22.7 million.

Effective January 1, 2007, we adopted the provisions of Statement of Financial Accounting Standards No. 155 (SFAS 155), *Accounting for Certain Hybrid Financial Instruments, an amendment of FASB Statements No. 133 (SFAS 133) and 140*. SFAS 155: (a) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; (b) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133; (c) establishes a requirement to evaluate beneficial interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; (d) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and, (e) eliminates restrictions on a qualifying special-purpose entity's ability to hold passive derivative financial instruments that pertain to beneficial interests that are or contain a derivative financial instrument. The adoption of SFAS 155 did not have a material effect on our financial position or results of operations.

Accounting Pronouncement Outstanding:

Statement of Financial Accounting Standards No. 161 (SFAS 161), *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, was issued in March 2008. SFAS 161 is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. We will adopt the provisions of SFAS 161 effective January 1, 2009. The adoption of SFAS 161 will not have a material effect on our financial position or results of operations.

Note 3 - Discontinued Operations

As discussed in Note 1, the sale of GENEX closed effective March 1, 2007, and we recognized an after-tax gain of \$6.2 million on the sale, which is included in income from discontinued operations in our statements of income.

Selected results for GENEX for the period January 1, 2007 through March 1, 2007 are as follows (in millions of dollars, except share data):

Total Revenue	\$ 47.2
Income Per Common Share	
Basic	\$ 0.02
Assuming Dilution	\$ 0.02

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2008

Note 4 - Fair Value Measurements

Effective January 1, 2008, we adopted the provisions of SFAS 157, which are intended to increase consistency and comparability among fair value estimates used in financial reporting. SFAS 157 does not require any new fair value measurements. SFAS 157 clarifies a number of considerations with respect to fair value measurement objectives for financial reporting and expands disclosure about the use of fair value measurements, with particular emphasis on the inputs used to measure fair value. The disclosures required by SFAS 157 are intended to provide users of the financial statements the ability to assess the reliability of an entity's fair value measurements. The adoption of SFAS 157 did not materially change the approach or methods we utilize for determining fair value measurements or the fair values derived under those methods.

Definition of Fair Value

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and, therefore, represents an exit price, not an entry price. The exit price objective applies regardless of a reporting entity's intent and/or ability to sell the asset or transfer the liability at the measurement date.

The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and less judgment utilized in measuring fair value. An active market for a financial instrument is a market in which transactions for an asset or a similar asset occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available. Conversely, financial instruments rarely traded or not quoted have less observability and are measured at fair value using valuation techniques that require more judgment. Pricing observability is generally impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, and overall market conditions.

Valuation Techniques

In accordance with SFAS 157, valuation techniques used for assets and liabilities accounted for at fair value are generally categorized into three types:

1. The *market approach* uses prices and other relevant information from market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach often use market multiples derived from a set of comparables or matrix pricing. Market multiples might lie in ranges with a different multiple for each comparable. The selection of where within the range the appropriate multiple falls requires judgment, considering both quantitative and qualitative factors specific to the measurement. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities but comparing the securities to benchmark or comparable securities.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2008

Note 4 - Fair Value Measurements - Continued

2. The *income approach* converts future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. Income approach techniques rely on current market expectations of future amounts. Examples of income approach valuation techniques include present value techniques, option-pricing models that incorporate present value techniques, and the multi-period excess earnings method.
3. The *cost approach* is based upon the amount that currently would be required to replace the service capacity of an asset, or the current replacement cost. That is, from the perspective of a market participant (seller), the price that would be received for the asset is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data are available that can be obtained without undue cost and effort. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate. If we use multiple valuation techniques to measure fair value, we evaluate and weigh the results, as appropriate, considering the reasonableness of the range indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances.

The selection of the valuation method(s) to apply considers the definition of an exit price and depends on the nature of the asset or liability being valued. For assets and liabilities accounted for at fair value, we generally use valuation techniques consistent with the market approach, and to a lesser extent, the income approach. During the third quarter and first nine months of 2008, we have applied valuation techniques on a consistent basis to similar assets and liabilities and consistent with those techniques used at year end 2007. Due to recent market conditions, the mix and availability of observable inputs for valuation techniques have been volatile, and the risk inherent in the inputs is elevated relative to prior periods.

Inputs to Valuation Techniques

Inputs refer broadly to the assumptions that market participants use in pricing assets or liabilities, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources.

Unobservable inputs are inputs that reflect our own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Observable inputs which we utilize to determine the fair values of our investments and derivative financial instruments include indicative broker prices and prices obtained from external pricing services. We review the prices obtained to ensure they are consistent with a variety of observable market inputs and to verify the validity of a security's price. These inputs, along with our knowledge of the financial conditions and industry in which the issuer operates, will be considered in determining whether the quoted or indicated price, as well as the change in price from quarter to quarter, are valid.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2008

Note 4 - Fair Value Measurements - Continued

On selected securities where there is not an indicated price or where we cannot validate the price, some combination of market inputs may be used to determine a price using a pricing matrix, or we may use pricing inputs from a comparable security. The parameters and inputs used to validate a price on a security may be adjusted for assumptions about risk and current market conditions on a quarter to quarter basis, as certain features may be more significant drivers of valuation at the time of pricing. Changes to inputs in valuations are not changes to valuation methodologies; rather, the inputs are modified to reflect direct or indirect impacts on asset classes from changes in market conditions. We consider transactions in inactive or disorderly markets to be less representative of fair value. We use all available observable inputs when measuring fair value, but when significant other unobservable inputs and adjustments are necessary, we classify these assets as Level 3.

Inputs that may be used include the following:

Benchmark yields (Treasury and swap curves)

Transactional data for new issuance and secondary trades

Broker/dealer quotes and pricing

Security cash flows and structures

Recent issuance/supply

Sector and issuer level spreads

Credit ratings/maturity/weighted average life/seasoning/capital structure

Security optionality

Corporate actions

Underlying collateral

Edgar Filing: Unum Group - Form 10-Q

Prepayment speeds/loan performance/delinquencies

Public covenants

Comparative bond analysis

Derivative spreads

Third-party pricing sources

Relevant reports issued by analysts and rating agencies

The overall valuation process for determining fair values may include adjustments to valuations obtained from our pricing sources when they do not represent a valid exit price. These adjustments may be made when, in our judgment, certain features of the financial instrument, such as its complexity or the market in which the financial instrument is traded (such as counterparty, credit, concentration, or liquidity), require that an adjustment be made to the value originally obtained from our pricing sources. Additionally, an adjustment to the price derived from a model typically reflects our judgment of the inputs that other participants in the market for the financial instrument being measured at fair value would consider in pricing that same financial instrument.

Certain of our investments do not have readily determinable market prices and/or observable inputs or may at times be affected by the lack of market liquidity. For these securities, we use internally prepared valuations combining matrix pricing with vendor purchased software programs, including valuations based on estimates of future profitability, to estimate the fair value. Additionally, we may obtain prices from independent third-party brokers to aid in establishing valuations for certain of these securities. Key assumptions used by us to determine fair value for these securities include risk-free interest rates, risk premiums, performance of underlying collateral (if any), and other factors involving significant assumptions which may or may not reflect those of an active market.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued****Unum Group and Subsidiaries****September 30, 2008****Note 4 - Fair Value Measurements - Continued**

The categorization of fair value measurements, by input level, for our fixed maturity securities, equity securities, and derivative financial instruments is as follows:

	September 30, 2008 (in millions of dollars)			
	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Assets				
Fixed Maturity Securities	\$ 3,305.9	\$ 29,291.9	\$ 569.0	\$ 33,166.8
Other Long-term Investments				
Equity Securities		0.5	2.1	2.6
Derivative Financial Instruments		80.3		80.3
Liabilities				
Other Liabilities				
Derivative Financial Instruments	\$	\$ 87.4	\$ 175.8	\$ 263.2

Changes in assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the three and nine month periods ended September 30, 2008 are as follows:

	Fixed Maturity Securities	Equity Securities	Net Derivative Financial Instruments (in millions of dollars)	Total
Balance at June 30, 2008	\$ 504.4	\$ 2.6	\$ (107.9)	\$ 399.1
Total Realized and Unrealized Gains (Losses)				
Included in Earnings	1.0	(0.4)	(67.9)	(67.3)
Included in Other Comprehensive Income	(49.6)	(0.1)		(49.7)
Net Purchases and Sales	(13.5)			(13.5)
Net Transfer Into (Out of) Level 3	126.7			126.7
Balance at September 30, 2008	\$ 569.0	\$ 2.1	\$ (175.8)	\$ 395.3

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued****Unum Group and Subsidiaries****September 30, 2008****Note 4 - Fair Value Measurements - Continued**

	Fixed Maturity Securities	Equity Securities	Net Derivative Financial Instruments	Total
	(in millions of dollars)			
Balance at January 1, 2008	\$ 421.0	\$ 1.5	\$ (68.8)	\$ 353.7
Total Realized and Unrealized Gains (Losses)				
Included in Earnings	0.8	(0.4)	(107.0)	(106.6)
Included in Other Comprehensive Income	(96.2)	(0.1)		(96.3)
Net Purchases and Sales	65.3	1.2		66.5
Net Transfer Into (Out of) Level 3	178.1	(0.1)		178.0
Balance at September 30, 2008	\$ 569.0	\$ 2.1	\$ (175.8)	\$ 395.3

Realized and unrealized investment gains and losses presented in the preceding tables represent gains and losses only for the time during which the applicable financial instruments were classified as Level 3. The amount of losses for the three and nine month periods ended September 30, 2008 which is included in earnings and is attributable to the change in unrealized gains or losses relating to assets or liabilities valued using significant unobservable inputs and still held at September 30, 2008 was \$67.9 million and \$107.0 million, respectively, and relates entirely to the change in fair value of embedded derivatives associated with modified coinsurance arrangements. Changes in the fair values of certain embedded derivatives are reported as realized investment gains and losses, as required under the provisions of Statement of Financial Accounting Standards No. 133 Implementation Issue B36 (DIG Issue B36), *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposure That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor Under Those Instruments*.

Realized investment gains and losses are reported as a component of revenue in the consolidated statements of income. Unrealized investment gains and losses are reported in other comprehensive income.

Curtailment Loss/Settlement Loss		0.2		0.3		
Net Periodic Benefit Cost	\$ 29.2	\$ 33.0	\$ 7.3	\$ 7.7	\$ 8.0	\$ 7.5

As a result of the sale of GENEX, we froze the pension plan benefits for the employees of GENEX during the first quarter of 2007, which resulted in the recognition of a curtailment loss of \$0.2 million. The curtailment loss was comprised of a \$0.6 million increase in our pension liability related to a termination benefit and a \$0.4 million recognition of unamortized prior service credits. As of the date of the curtailment, we remeasured our U.S. pension plan obligation. As a result of the remeasurement, our pension plan liability increased \$35.6 million. The net effect of the curtailment and remeasurement was an increase in our pension plan liability of \$29.0 million, a decrease in deferred income tax of \$10.1 million, a decrease in income from discontinued operations of \$0.2 million, and a decrease in accumulated other comprehensive income of \$18.7 million.

Edgar Filing: Unum Group - Form 10-Q

In the third quarter of 2007, we terminated the Canadian defined benefit pension plans which were frozen in 2004. The termination of these plans did not have a material effect on our financial position or results of operations.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued****Unum Group and Subsidiaries****September 30, 2008****Note 6 - Pensions and Other Postretirement Benefits - Continued**

We have no regulatory contribution requirements for our U.S. qualified defined benefit plan in 2008; however, we elected to make voluntary contributions of \$55.0 million during the first quarter of 2008. For our U.K. operation, which maintains a separate defined benefit plan, we made required contributions totaling \$1.6 million and \$6.0 million for the third quarter and first nine months of 2008, respectively.

Note 7 - Stockholders' Equity and Earnings Per Common Share

Net income per common share is determined as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2008	2007	2008	2007
	(in millions of dollars, except share data)			
Numerator				
Net Income	\$ 108.0	\$ 187.0	\$ 511.4	\$ 518.8
Denominator (000s)				
Weighted Average Common Shares - Basic	337,236.4	359,741.2	344,440.3	350,665.9
Dilution for the Purchase Contract Element of the Adjustable Conversion-Rate Equity Security Units				2,230.6
Dilution for Assumed Exercises of Stock Options and Nonvested Stock Awards	676.4	1,165.1	671.6	1,213.0
Weighted Average Common Shares - Assuming Dilution	337,912.8	360,906.3	345,111.9	354,109.5
Net Income Per Common Share				
Basic	\$ 0.32	\$ 0.52	\$ 1.48	\$ 1.48
Assuming Dilution	\$ 0.32	\$ 0.52	\$ 1.48	\$ 1.46

We use the treasury stock method to account for the effect of the purchase contract element of the adjustable conversion-rate equity security units (units), outstanding stock options, and nonvested stock awards on the computation of dilutive earnings per share. Under this method, these potential common shares will each have a dilutive effect, as individually measured, when the average market price of Unum Group's common stock during the period exceeds the threshold appreciation price of the purchase contract element of the units, the exercise price of the stock options, or the grant price of the nonvested stock awards.

The purchase contract element of the units had a threshold appreciation price of \$16.95 per share, the outstanding stock options have exercise prices ranging from \$12.23 to \$58.56, and the nonvested stock awards have grant prices ranging from \$19.18 to \$26.25.

In computing earnings per share assuming dilution, only potential common shares that are dilutive (those that reduce earnings per share) are included. Potential common shares not included in the computation of dilutive earnings per share because their impact would be antidilutive, based on current market prices, approximated 7.9 million and 8.0 million shares of common stock for the three and nine month periods ended September 30, 2008, and 6.1 million and 6.3 million common shares for the three and nine month periods ended September 30, 2007.

Unum Group and Subsidiaries

September 30, 2008

Note 7 - Stockholders Equity and Earnings Per Common Share - Continued

Unum Group has 25,000,000 shares of preferred stock authorized with a par value of \$0.10 per share. No preferred stock has been issued to date.

During 2007, our board of directors authorized the repurchase of up to \$700.0 million of Unum Group's common stock. In January 2008, we repurchased approximately 14.0 million shares for \$350.0 million, using an accelerated share repurchase agreement. Under the terms of the repurchase agreement, we were to receive, or be required to pay, a price adjustment based on the volume weighted average price of our common stock during the term of the agreement. Any price adjustment payable to us was to be settled in shares of our common stock. Any price adjustment we would have been required to pay was to be settled, at our option, in either cash or common stock. A 30 percent partial acceleration of the agreement, 4.2 million shares, occurred on March 26, 2008 and settled on March 28, 2008, with the price adjustment resulting in the delivery to us of approximately 0.5 million additional shares of our common stock. The remaining 9.8 million shares settled on May 29, 2008, with the price adjustment resulting in the delivery to us of approximately 0.9 million additional shares.

During August 2008, we repurchased approximately 12.5 million shares for \$350.0 million, using an accelerated share repurchase agreement with terms similar to the earlier agreement. A 50 percent partial acceleration of the agreement, 6.25 million shares, occurred on October 7, 2008 and settled on October 10, 2008, with the price adjustment resulting in the delivery to us of approximately 1.0 million additional shares of our common stock. The remaining 6.25 million shares settled on October 14, 2008, with the price adjustment resulting in the delivery to us of approximately 1.0 million additional shares.

In total, we repurchased 29.9 million shares of our common stock under the share repurchase program. These shares are reflected as treasury stock in our consolidated balance sheet.

Note 8 - Commitments and Contingent Liabilities

We are a defendant in a number of litigation matters. In some of these matters, no specified amount is sought. In others, very large or indeterminate amounts, including punitive and treble damages, are asserted. There is a wide variation of pleading practice permitted in the United States courts with respect to requests for monetary damages, including some courts in which no specified amount is required and others which allow the plaintiff to state only that the amount sought is sufficient to invoke the jurisdiction of that court. Further, some jurisdictions permit plaintiffs to allege damages well in excess of reasonably possible verdicts. Based on our extensive experience and that of others in the industry with respect to litigating or resolving claims through settlement over an extended period of time, we believe that the monetary damages asserted in a lawsuit or claim bear little relation to the merits of the case, or the likely disposition value. Therefore, the specific monetary relief sought is not stated.

The lawsuits described below are for the most part in very preliminary stages, and the outcome of the matters is uncertain. On a quarterly and annual basis, we review relevant information with respect to litigation and contingencies to be reflected in our consolidated financial statements. An estimated loss is accrued when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Unless indicated otherwise, reserves have not been established for these matters.

Claims Handling Matters

Multidistrict Litigation

On September 2, 2003, the Judicial Panel on the Multidistrict Litigation entered an order transferring more than twenty putative class actions and derivative suits, described below, filed in various courts against the Company, several of its subsidiaries, and some of our officers, to the U.S. District Court for the Eastern District of Tennessee for coordinated or consolidated pretrial proceedings. The defendants strongly deny the allegations in each of these actions and will vigorously defend the substantive and procedural aspects of the litigations, except as noted below with respect to settlement discussions.

Shareholder Derivative Actions

Between November 22, 2002 and March 11, 2003 five purported derivative actions were filed in state and federal courts in Tennessee. The defendants removed each of the actions that were filed in Tennessee state court to the U.S. District Court for the Eastern District of Tennessee, and the cases were consolidated. The plaintiffs then filed a single consolidated amended complaint, which purports to assert claims on behalf of the Company against certain current and past members of our Board of Directors and certain executive officers alleging breaches of fiduciary duties and other violations of law by establishing or permitting to be established an unlawful policy of denying legitimate disability claims and improper financial reporting, and that certain defendants engaged in insider trading.

On August 27, 2008, the parties entered into a Stipulation of Settlement to resolve the litigation. Under the terms of the settlement, which is subject to, among other things, approval of the court, we agreed to, among other things, implement or continue certain corporate governance measures and pay plaintiffs' attorneys' fees in an amount to be determined by the court. We have established adequate reserves for the attorneys' fees, the payment of which we believe will be an immaterial amount.

Policyholder Class Actions

On July 15, 2002, Rombeiro v. Unum Life Insurance Company of America, et al., was filed in the Superior Court of California and subsequently was removed to federal court, alleging that the plaintiff was wrongfully denied disability benefits under a group long-term disability plan. On January 21, 2003, an Amended Complaint was filed on behalf of a putative class of individuals that were denied or terminated from benefits under group long-term disability plans, seeking injunctive and declaratory relief and payment of benefits. On April 30, 2003, the court granted in part and denied in part the defendants' motion to dismiss the complaint. On May 14, 2003, the plaintiff filed a Second Amended Complaint seeking similar relief.

Between November 2002 and November 2003, six additional similar putative class actions were filed in (or later removed to) federal district courts in Illinois, Massachusetts, New York, Pennsylvania, and Tennessee. The complaints alleged that the putative class members' claims were evaluated improperly and allege that the Company and its insurance subsidiaries breached certain fiduciary duties owed to the class members under the Employee Retirement Income Security Act (ERISA), Racketeer Influenced Corrupt Organizations Act (RICO), and/or various state laws. The complaints sought various forms of equitable relief and money damages, including punitive damages.

These actions all were transferred to the Eastern District of Tennessee multidistrict litigation. On December 22, 2003, the Tennessee Federal District Court entered an order consolidating all of the above actions for all pretrial

purposes under the caption In re UnumProvident Corp. ERISA Benefit Denial Actions and appointed a lead plaintiff. A consolidated amended complaint was filed on February 20, 2004.

Court ordered mediation has concluded with the settlement of all individual claims brought by seven of the fifteen named plaintiffs. An eighth plaintiff has subsequently resolved her claims through the process established under the regulatory settlement agreements.

On September 4, 2007, the District Court certified a 23(b)(2) class consisting of all plan participants and beneficiaries insured under ERISA governed long-term disability insurance policies/plans issued by Unum Group and the insuring subsidiaries of Unum Group throughout the United States who have had a long-term disability claim denied, terminated, or suspended on or after June 30, 1999 by Unum Group or one or more of its insuring subsidiaries after being subjected to any of the practices alleged in the complaint. The class as certified seeks, among other forms of relief, an opportunity to have denied or terminated claims re-assessed by so-called independent reviewers. The District Court has yet to rule on pending motions by the Company for judgment on the pleading, or for summary judgment. We are appealing the class certification order to the Sixth Circuit Court of Appeals on an interlocutory basis.

On April 30, 2003, a separate putative class action, Taylor v. UnumProvident Corporation, et al., was filed in the Tennessee Circuit Court and subsequently removed to federal court. The complaint alleges claims against Unum Group and certain subsidiaries on behalf of a putative class of long-term disability insurance policyholders who did not obtain their coverage through employer sponsored plans and who had a claim denied, terminated, or suspended by a Unum Group subsidiary after January 1, 1995, seeking equitable and monetary relief. Plaintiff alleges that the defendants violated various state laws by engaging in unfair claim practices and improperly denying claims. The trial court subsequently dismissed the plaintiff's claims for equitable relief and punitive damages and, most recently, denied certification of a class action. On September 23, 2008, the Sixth Circuit Court of Appeals denied plaintiff's petition to appeal the denial of class certification; on the following day the District Court dismissed all of the plaintiff's additional claims except for plaintiff's individual claims for breaches of contract and fiduciary duty and alleged violations of the Tennessee Consumer Protection Act.

Other Claim Litigation

We and our insurance company subsidiaries, as part of our normal operations in managing disability claims, are engaged in claim litigation where disputes arise as a result of a denial or termination of benefits. Most typically these lawsuits are filed on behalf of a single claimant or policyholder, and in some of these individual actions punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. For our general claim litigation, we maintain reserves based on experience to satisfy judgments and settlements in the normal course. We expect that the ultimate liability, if any, with respect to general claim litigation, after consideration of the reserves maintained, will not be material to our consolidated financial condition. Nevertheless, given the inherent unpredictability of litigation, it is possible that an adverse outcome in certain claim litigation involving punitive damages could, from time to time, have a material adverse effect on our consolidated results of operations in a period, depending on the results of operations for the particular period.

On June 13, 2005, following a trial in the U.S. District Court of Nevada in the matter of G. Clinton Merrick vs. UnumProvident Corporation, Paul Revere Life Insurance Company, et al., judgment was entered in plaintiff's favor on his breach of contract and bad faith claims, and the plaintiff was awarded contract, emotional distress and punitive damages, as well as attorneys' fees. We appealed that judgment. The Ninth Circuit Court of Appeals reversed that portion of the judgment that awarded attorneys' fees and punitive damages award and remanded for a

Unum Group and Subsidiaries

September 30, 2008

Note 8 - Commitments and Contingent Liabilities - Continued

new trial on the issue of punitive damages that should be awarded, if any. We thereafter paid the portion of the verdict that had been upheld and proceeded to a second trial on the limited issue of the amount of punitive damages to be awarded against UnumProvident and The Paul Revere Life Insurance Company, if any. A second jury verdict was entered on July 3, 2008, in the amount of \$24.0 million as to The Paul Revere Life Insurance Company and \$36.0 million as to Unum Group. We have filed post trial motions requesting, among other things, that the award be reduced and, if necessary, will appeal this verdict to the Ninth Circuit. We believe that we have strong legal arguments to raise on appeal that create significant uncertainty regarding the ultimate outcome of this matter. However, since our efforts to reduce or overturn this award are at an early stage, an estimate of the liability to resolve this matter was established in the second quarter of 2008. The accrual was not material to our operating results.

From time to time class action allegations are pursued where the claimant or policyholder purports to represent a larger number of individuals who are similarly situated. Since each insurance claim is evaluated based on its own merits, there is rarely a single act or series of actions, which can properly be addressed by a class action. Nevertheless, we monitor these cases closely and defend ourselves appropriately where these allegations are made.

Broker Compensation, Quoting Process, and Related Matters

Examinations and Investigations

Since October 2004, we and/or our insurance subsidiaries have received subpoenas or information requests from state regulatory or investigatory agencies of at least seven states including Connecticut, Florida, Maine, Massachusetts, North Carolina, South Carolina, and Tennessee. The subpoenas and/or information requests relate to, among other things, compliance with ERISA relating to our interactions with insurance brokers and to regulations concerning insurance information provided by us to plan administrators of ERISA plans, as well as compliance with state and federal laws with respect to quoting processes, producer compensation, solicitation activities, policies sold to state or municipal entities, and information regarding compensation arrangements with brokers.

We have cooperated fully with all investigations and will continue to do so. However, due to a prolonged period of inactivity, we consider these state investigations dormant.

Broker-Related Litigation

We and certain of our subsidiaries, along with many other insurance brokers and insurers, have been named as defendants in a series of putative class actions that have been transferred to the U.S. District Court for the District of New Jersey for coordinated or consolidated pretrial proceedings as part of multidistrict litigation (MDL) No. 1663, In re Insurance Brokerage Antitrust Litigation. The plaintiffs in MDL No. 1663 filed a consolidated amended complaint in August 2005, which alleges, among other things, that the defendants violated federal and state antitrust laws, RICO, ERISA, and various state common law requirements by engaging in alleged bid rigging and customer allocation and by paying undisclosed compensation to insurance brokers to steer business to defendant insurers. Defendants filed a motion to dismiss the complaint on November 29, 2005. On April 5, 2007, defendants' motion to dismiss was granted without prejudice as to all counts except the ERISA counts. Plaintiffs were granted a last opportunity to file an amended complaint, and they did so on May 22, 2007. On June 21, 2007, defendants filed a motion to dismiss and for summary judgment on all counts. On August 31, 2007 and September 28, 2007, plaintiffs' federal antitrust and RICO claims were dismissed with prejudice. Defendants' motion for summary judgment on the ERISA counts was granted on January 14, 2008. All pending state law claims were dismissed.

Unum Group and Subsidiaries

September 30, 2008

Note 8 - Commitments and Contingent Liabilities - Continued

without prejudice. Plaintiffs have filed an appeal with the Third Circuit Court of Appeals of the order dismissing their federal antitrust and RICO claims.

We are a defendant in an action styled, Palm Tree Computers Systems, Inc. v. ACE USA, et al., which was filed in the Florida state Circuit Court on February 16, 2005. The complaint contains allegations similar to those made in the multidistrict litigation referred to above. The case was removed to federal court and, on October 20, 2005, the case was transferred to the District of New Jersey multidistrict litigation. Plaintiffs motion to remand the case to the state court in Florida was dismissed without prejudice along with other pending motions in the MDL.

Miscellaneous Matters

In September 2003, United States of America ex. rel. Patrick J. Loughren v. UnumProvident Corporation and GENEX Services, Inc. was filed in the United States District Court for the District of Massachusetts. This is a qui tam action to recover damages and civil penalties on behalf of the United States of America alleging violations of the False Claims Act by us and our former GENEX subsidiary. In accordance with the False Claims Act, the action was originally filed under seal to provide the government the opportunity to investigate the allegations and prosecute the action if they believed that the case had merit and warranted their attention. The government declined to prosecute the case, and the case became a matter of public record on December 23, 2004. The complaint alleges that we defrauded the government by inducing and or assisting disability claimants to apply for disability benefits from the Social Security Administration (SSA) when we allegedly knew that the claimants were not disabled under SSA criteria. We filed a motion for summary judgment which was denied on September 15, 2008. The case proceeded to trial at which seven sample claims were adjudicated. We prevailed on four of the claims, the Relator prevailed on two of the claims, and the jury could not reach a verdict on one of the claims. The jury awarded the Relator \$850 in damages which can be trebled. The court may also assess a penalty of between \$5,000 and \$11,000 per claim. The court must still address the issue of whether there can be any extrapolation of these results to the larger population of claims we manage. We strongly believe that no such extrapolation can be justified either legally or factually, especially in light of the recent split verdict. In addition, we will file post trial motions with the trial court seeking to reverse the adverse findings by the jury and, if necessary, file an appeal with the First Circuit Court of Appeals if final judgment is entered against us.

In May 2007, Roy Mogel, Todd D. Lindsay and Joseph R. Thorley individually and on behalf of those similarly situated v. Unum Life Insurance Company, was filed in the United States District Court for the District of Massachusetts. This is a putative class action alleging that we breached fiduciary duties owed to certain beneficiaries under group life insurance policies when we paid certain life insurance proceeds by establishing interest-bearing Retained Asset Accounts rather than checks. On February 4, 2008, the court granted the Company's motion to dismiss all claims. Plaintiffs have appealed that decision to the First Circuit Court of Appeals.

On May 16, 2008, we were added as a party to a case styled, Public Service Company of Colorado; P.S.R. Investments, Inc.; and Xcel Energy, Inc. v. Theodore J. Mallon; Transfinancial Corporation; and Provident Life and Accident Insurance Company, filed in the District Court, County of Boulder, State of Colorado, alleging among other things breach of contract, unjust enrichment, breach of duty of good faith and fair dealing, fraudulent concealment, negligent misrepresentation and non-disclosure, fraud, civil conspiracy, violation of the Colorado Consumer Protection Act, violation of the Colorado Organized Crime Control Act, and Conspiracy to violate the Colorado Organized Crime Control Act. These claims arise from the sale of corporate-owned life insurance policies to Public Service Company of Colorado by Mallon in 1984 and 1985. These policies were reinsured through REALIC, a subsidiary of Swiss Re, as of July 2000. In response to the complaint, we filed a motion to dismiss all counts of the complaint asserted against us. On October 22, 2008, the District Court granted in part and denied in

Table of Contents

Unum Group and Subsidiaries

September 30, 2008

Note 8 - Commitments and Contingent Liabilities - Continued

part our motion to dismiss, thereby dismissing all claims against us for violation of the Colorado Consumer Protection Act, violation of the Colorado Organized Crime Control Act, and Conspiracy to violate the Colorado Organized Crime Control Act. We deny the remaining allegations of the complaint and plan to vigorously defend them.

In September 2008, we received service of a complaint, in an adversary proceeding in connection with the bankruptcy case In re Quebecor World (USA) Inc., et al., entitled Official Committee of Unsecured Creditors of Quebecor World (USA) Inc., et al., v. American United Life Insurance Company, et al., filed in the United States Bankruptcy Court for the Southern District of New York. The complaint alleges that we received preference payments relating to notes held by certain of our insurance subsidiaries and seeks to avoid and recover such payments plus interest and cost of the action. We deny the allegations in the complaint and will vigorously contest them.

Summary

Various lawsuits against us, in addition to those discussed above, have arisen in the normal course of business. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning our compliance with applicable insurance and other laws and regulations.

Given the complexity and scope of our litigation and regulatory matters, it is not possible to predict the ultimate outcome of all pending investigations or legal proceedings or provide reasonable estimates of potential losses, except where noted in connection with specific matters. It is possible that our results of operations or cash flows in a particular period could be materially affected by an ultimate unfavorable outcome of pending litigation or regulatory matters depending, in part, on our results of operations or cash flows for the particular period. We believe, however, that the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on our financial position.

Note 9 - Other

Acquisition

During the second quarter of 2008, Unum UK became responsible for the ongoing administration and management of a closed block of group long-term disability claims through a reinsurance arrangement with Royal London Mutual Insurance Society Limited. As a result of the assumption, Unum UK received cash of £24.5 million, recorded £0.4 million in accrued premiums receivable, assumed reserves of £22.2 million, and recorded a deferred gain of £2.7 million.

Debt

During the second quarter of 2008, we retired the remaining \$175.0 million of our 5.997% senior notes. During the first nine months of 2008, we made principal payments of \$35.7 million and \$7.5 million on our senior secured non-recourse variable rate notes issued by Northwind Holdings, LLC and Tailwind Holdings, LLC, respectively. We also purchased and retired \$36.6 million of our 6.85% senior debentures due 2015.

At September 30, 2008, short-term debt consisted of \$150.0 million 5.859% senior notes due May 2009 and \$125.0 million of reverse repurchase agreements with a weighted average interest rate of 3.65 percent and a maturity date of October 27, 2008.

Income Tax

We do not believe that it is reasonably possible that our existing liability for unrecognized tax benefits will significantly change within the next 12 months. The interest expense and penalties related to unrecognized tax expense in the consolidated statements of income are \$1.5 million and \$4.3 million for the three and nine month periods ended September 30, 2008, respectively. In the third quarter of 2008, we filed protests to the Internal Revenue Service's revenue agent's report for the years 2002 to 2004. We believe sufficient provision has been made for all proposed adjustments and that such adjustments would not have a material adverse effect on our financial position, liquidity, or results of operations.

Table of Contents

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

Unum Group and Subsidiaries

We have reviewed the consolidated balance sheet of Unum Group and subsidiaries as of September 30, 2008, and the related consolidated statements of income and comprehensive income (loss) for the three-month and nine-month periods ended September 30, 2008 and 2007, and the consolidated statements of stockholders' equity and cash flows for the nine-month periods ended September 30, 2008 and 2007. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Unum Group and subsidiaries as of December 31, 2007, and the related consolidated statements of income, stockholders' equity, cash flows, and comprehensive income (loss) for the year then ended not presented herein, and in our report dated February 21, 2008, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2007, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Unum Group, a Delaware general business corporation, and its insurance and non-insurance companies, which collectively with Unum Group we refer to as the Company, operate in the United States, the United Kingdom, and, to a limited extent, in certain other countries around the world. The principal operating subsidiaries in the United States are Unum Life Insurance Company of America (Unum America), Provident Life and Accident Insurance Company (Provident), The Paul Revere Life Insurance Company (Paul Revere Life), and Colonial Life & Accident Insurance Company, and in the United Kingdom, Unum Limited. We are the largest provider of group and individual disability insurance products in the United States and the United Kingdom. We also provide a complementary portfolio of other insurance products, including long-term care insurance, life insurance, employer- and employee-paid group benefits, and other related services.

We have three major business segments: Unum US, Unum UK, and Colonial Life. Our other segments are the Individual Disability Closed Block segment, the Other segment, and the Corporate segment. These segments are discussed more fully under Segment Results included herein in Item 2.

As one of the leading providers of employee benefits, we offer a broad portfolio of products and services to meet the diverse needs of the marketplace. We try to achieve a competitive advantage by offering group, individual, and voluntary benefits products that can be offered as stand alone products or that can be combined with other coverages to provide comprehensive product solutions for customers. We offer businesses of all sizes competitive benefit plans that help them attract and retain a stronger workforce and protect the incomes and lifestyles of employees and their families. Through a variety of technological tools and trained professionals, we offer services which are designed to meet the evolving needs of our customers. We strive to be responsive and timely, and we are committed to service excellence.

We have well established market positions. However, due to the nature of our business, we are sensitive to economic and financial market movements, including consumer confidence, employment levels, and interest rates. The recent unprecedented global financial market disruption and deteriorating economic conditions could adversely affect our business, growth, and results of operations. Further, the current political environment could result in potential legislation and increased regulation which could also impact our business, including demand for and costs of certain of our products.

This discussion and analysis should be read in conjunction with the consolidated financial statements and notes thereto in Part I, Item 1 contained in this Form 10-Q and with the discussion, analysis, and consolidated financial statements and notes thereto in Part I, Items 1 and 1A, and Part II, Items 6, 7, 7A, and 8 of our annual report on Form 10-K for the year ended December 31, 2007.

Executive Summary

During 2008, we intend to continue our focus on a number of key areas. Objectives for 2008 include:

Consistent execution of our operating plans. We will continue our emphasis on disciplined, profitable growth.

Continued innovation throughout our businesses. Within Unum US, we plan to broadly launch *Simply Unum* in the small to mid sized employer marketplace. We also plan to capitalize on the introduction of a number of health related products for Colonial Life, as well as the launch of a pilot voluntary benefits program in our Unum UK business.

Leveraging of our leadership positions and marketplace reputation. We will seek to build on the momentum of 2007 with increased brand and product awareness.

Execution of our capital management strategy. We formalized our capital management strategy during 2007 and established several financial thresholds and targets that guide our capital decisions.

Table of Contents

Professional development of our employees. We have increased our focus on training and development as well as talent management and building bench strength throughout the Company.

We are confident in our business outlook and believe that our product diversification across sectors and locations, our mix of business, our disciplined underwriting, pricing, claims, and expense management, our investment portfolio, and our capital management strategy will somewhat mitigate the potential impact of an economic slowdown on our operating results.

Operating Performance

For the third quarter and first nine months of 2008, Unum US reported increases in segment operating income of 7.1 percent and 10.7 percent, respectively, compared to the prior year periods and excluding the second quarter of 2007 revision to the claim reassessment reserve estimate. The group disability benefit ratio was 89.3 percent for the third quarter of 2008, consistent with our goal of continual profit margin improvement for this line of business. Unum US sales increased 7.8 percent in the third quarter of 2008 compared to the third quarter of 2007 and 10.1 percent in the first nine months of 2008 when compared to the prior year period. Our group core market segment, which we define for Unum US as employee groups with less than 2,000 lives, had sales increases of 27.9 percent and 19.0 percent, respectively, over the third quarter and first nine months of 2007, and the number of new accounts increased 9.8 percent over the prior year first nine months. Our supplemental and voluntary sales increased 1.2 percent in the third quarter of 2008 compared to last year's third quarter and 11.5 percent in the first nine months of this year compared to the same period last year. Sales in the group large case market segment declined 0.7 percent compared to the prior year third quarter and 3.3 percent for the first nine months. During the third quarter of 2007, we introduced *Simply Unum*, an integrated platform of products and online services that we believe will transform the benefits marketplace through innovative solutions for our group core market segment and our voluntary market. The initial limited market rollout occurred in 2007, and we have now expanded the availability of *Simply Unum* to 45 states nationwide. We will complete the rollout to the remaining states as state approvals are received. We are also in the process of developing additional products and services.

Our Unum UK segment continues to produce excellent operating results, with an increase in segment operating income of 1.8 percent for the third quarter of 2008 and 12.6 percent for the first nine months of the year, as measured in Unum UK's local currency, relative to the comparable periods of 2007. Overall sales in Unum UK increased 9.1 percent over the third quarter of 2007 and 4.2 percent for the first nine months of 2008 as compared to the prior year. Sales growth in 2007 benefited from the change in age equality legislation more so than in 2008. Excluding sales related to the change in age equality legislation from all comparable periods, Unum UK achieved underlying sales growth of approximately 19.4 percent and 21.3 percent in the third quarter and first nine months of 2008 relative to the same periods of 2007, with sales in the core market segment, which we define for Unum UK as employee groups with less than 500 lives, driving the increase. The U.K. market remains highly competitive. Unum UK continues work on the development of a voluntary benefits offering to meet the benefit needs of the changing U.K. marketplace. We intend to utilize the basic *Simply Unum* platform used in the U.S. and adapt it for the unique aspects of the U.K. market.

Our Colonial Life segment reported an increase in segment operating income of 5.9 percent compared to the prior year third quarter and 7.9 percent for the first nine months. Colonial Life's sales increased 1.9 percent in the third quarter of 2008 relative to last year's third quarter. Sales in the commercial market segment for employee groups with less than 100 lives increased 7.1 percent. The number of new accounts increased over the prior year third quarter, although the average new case size was smaller than the prior year. For the first nine months of 2008, sales increased 1.9 percent compared to the first nine months of 2007, with sales in the commercial market segment for employee groups with less than 100 lives increasing 8.7 percent. During the latter part of 2007, we introduced a new hospital confinement indemnity insurance plan product and a group limited benefit medical plan product, and in the first quarter of 2008, we introduced the new Colonial Life brand. We are pleased with the marketplace reception for our new Colonial Life brand and these new product offerings. Colonial Life continues to expand its enrollment capabilities and its product offerings. In the third quarter of 2008, Colonial Life introduced the latest release of its enrollment system, *Harmony*, which offers multiple enrollment solutions. In addition, all of Colonial Life's individual products, including two new life products, are available on *Harmony*.

Table of Contents

Our investment portfolio continues to perform well, with net investment income of \$1,799.2 million for the first nine months of 2008, slightly higher than the comparable period of 2007. Included in the third quarter and first nine months of 2008 are \$97.9 million and \$101.2 million, respectively, of net realized investment losses from sales and write-downs of investments. The losses relate primarily to fixed maturity securities in the financial institutions sector that we either sold or considered other than temporarily impaired during the third quarter of 2008. We believe our investment portfolio is well positioned for the current environment, with historically low levels of below-investment-grade securities, no exposure to subprime mortgages, Alt-A loans, or collateralized debt obligations in our asset-backed or mortgage-backed securities portfolios, and minimal exposure to collateralized debt obligations within our public bond portfolio. Further discussion is included in Investments contained herein in Item 2.

Strategic and Capital Initiatives

The first priority of our capital management strategy is to maintain sufficient financial flexibility to support our operations over various economic cycles and to respond to opportunities in the marketplace while positioning our Company for improvements in its credit ratings. We have several financial targets which guide our capital management decisions including:

Maintain a risk based capital (RBC) ratio of 300 percent or greater for our traditional U.S. insurance subsidiaries. This is to be measured on a weighted average basis using the National Association of Insurance Commissioners (NAIC) Company Action Level formula.

Maintain leverage at approximately 25 percent. Leverage will be measured as total debt to total capital, which we define as total long-term and short-term debt plus stockholders' equity, excluding the net unrealized gain or loss on securities and the net gain or loss on cash flow hedges. This target level excludes the non-recourse debt and associated capital of Tailwind Holdings, LLC (Tailwind Holdings) and Northwind Holdings, LLC (Northwind Holdings).

Maintain cash and liquid investments at our holding companies sufficient to cover one year of fixed charges (measured as interest expense plus common stock dividends) plus a capital fund which will vary with business and economic conditions.

Maintain a common stock dividend yield that is near the median of our peer companies.

At the end of the third quarter of 2008, all of our financial measurements for capital management continue to compare favorably to our target levels. We have completed our \$700.0 million authorized share repurchase program, and we have maintained our leverage at 21.4 percent, consistent with the end of 2007.

See Liquidity and Capital Resources contained herein for further detail.

Legal and Regulatory Issues

During the third quarter of 2008, we reached a settlement in the Shareholder Derivative action that was originally filed in 2002. Under the terms of the settlement, which is subject to approval of the court, we have agreed to implement or continue certain corporate governance measures and pay plaintiffs' attorneys' fees in an amount to be determined by the court.

Also during the third quarter of 2008, class certification was denied in the putative class action styled, Taylor v. UnumProvident Corporation, et al. On September 23, 2008 the Sixth Circuit Court of Appeals denied plaintiff's petition to appeal this ruling, and on the following day, the District Court dismissed all of the plaintiff's additional claims except for plaintiff's individual claims for alleged breaches of contract and fiduciary duty and alleged violations of the Tennessee Consumer Protection Act.

During the second quarter of 2008, we reached a settlement with the U.S. Attorney in San Diego regarding broker compensation disclosure practices dating back several years. While this settlement was only recently finalized, it covers issues that were resolved several years ago with other regulators. We have worked cooperatively with the U.S. Attorney's office since its inquiry into the industry's compensation practices began. As part of the settlement, we agreed to a payment of \$5.6 million and included this expense in our second quarter of 2008 results. Compliance

Table of Contents

with the terms of the settlement agreement will not require any further changes in our business practices, as we previously made changes to our broker compensation program.

During 2005, following a trial in the U.S. District Court of Nevada, a judgment was entered in the plaintiff's favor on the plaintiff's breach of contract and bad faith claims, and the plaintiff was awarded contract, emotional distress, and punitive damages, as well as attorneys' fees. We appealed that judgment, and the Ninth Circuit Court of Appeals reversed the portion of the judgment that awarded attorneys' fees and punitive damages award and remanded for a new trial on the issue of punitive damages that should be awarded, if any. We paid the portion of the verdict that had been upheld and proceeded to a second trial on the limited issue of the amount of punitive damages to be awarded against us, if any. A second jury verdict was entered in July 2008 in the amount of \$60.0 million. We have filed post trial motions requesting, among other things, that the award be reduced and, if necessary, will appeal this verdict to the Ninth Circuit. We believe that we have strong legal arguments to raise on appeal that create significant uncertainty regarding the ultimate outcome of this matter. However, since our efforts to reduce or overturn this award are at an early stage, an estimate of the liability to resolve this matter was established in the second quarter of 2008. The accrual was not material to our operating results.

During 2007, we completed the claim reassessment process required by the 2004 and 2005 regulatory settlement agreements. The lead regulators conducted a final examination and presented their findings to our board of directors and management on April 14, 2008. The report of the multistate market conduct examination for the Maine Bureau of Insurance, Massachusetts Division of Insurance, New York State Insurance Department, Tennessee Department of Commerce and Insurance, and other participating jurisdictions as well as the report of the California Department of Insurance market conduct examination both provided that we satisfactorily complied with each of the agreements' mandates and that no fines will be assessed. We continue to work closely with our regulators and also continue to work toward resolution of other outstanding legal and regulatory issues.

First Nine Months 2008 Significant Transactions and Events

Financing

During 2007, our board of directors authorized the repurchase of up to \$700.0 million of Unum Group's common stock. In January 2008, we repurchased approximately 14.0 million shares for \$350.0 million, using an accelerated share repurchase agreement. Under the terms of the repurchase agreement, we were to receive, or be required to pay, a price adjustment based on the volume weighted average price of our common stock during the term of the agreement. Any price adjustment payable to us was to be settled in shares of our common stock. Any price adjustment we would have been required to pay was to be settled, at our option, in either cash or common stock. The final settlement occurred during the second quarter of 2008, and in total, we repurchased 15.4 million shares of our common stock under this agreement.

During August 2008, we repurchased approximately 12.5 million shares for \$350.0 million, using an accelerated share repurchase agreement with terms similar to the earlier agreement. The final settlement occurred during October 2008, with the price adjustment resulting in the delivery to us of approximately 2.0 million additional shares of our common stock, for a total repurchase of 14.5 million shares.

During the second quarter of 2008, we retired the remaining \$175.0 million of our 5.997% senior notes. During the first nine months of 2008, we made principal payments of \$35.7 million and \$7.5 million on our senior secured non-recourse variable rate notes issued by Northwind Holdings and Tailwind Holdings, respectively. We also purchased and retired \$36.6 million of our 6.85% senior debentures due 2015. The costs associated with our debt reduction decreased our first nine months of 2008 income approximately \$0.4 million before tax, or \$0.3 million after tax.

Table of Contents

Accounting Pronouncements

Effective January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards No. 157 (SFAS 157), *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The adoption of SFAS 157 did not have a material effect on our financial position or results of operations.

Statement of Financial Accounting Standards No. 161 (SFAS 161), *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, was issued in March 2008. SFAS 161 is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. We will adopt the provisions of SFAS 161 effective January 1, 2009. The adoption of SFAS 161 will not have a material effect on our financial position or results of operations.

First Nine Months 2007 Significant Transactions and Events

Revised Claim Reassessment Reserve Estimate

As previously noted, during 2007 we completed the claim reassessment process required by the 2004 and 2005 regulatory settlement agreements. Prior to completion of the claim reassessment process, in the second quarter of 2007 we increased our provision for the estimated cost of the claim reassessment process \$53.0 million before tax and \$34.5 million after tax based on changes in our emerging experience for the number of decisions being overturned and the average cost per reassessed claim. The revised second quarter of 2007 estimate was based on the cost of approximately 99 percent of the potential inventory of claim reassessment information forms returned to us, with our claim reassessment on approximately 88 percent of the forms completed at that time. At the time of our second quarter of 2007 revision, we had not yet finalized our claim reassessment on the remaining forms but had performed a financial review and included that information in our analysis of emerging experience. Additional information regarding the second quarter revision to our estimate is as follows:

1. We increased our previous estimate for benefit costs for claims reopened for our Unum US group long-term disability product line \$76.5 million. The revision related to the increase during the second quarter of 2007 in the overturn rate and the average cost, as well as a slightly higher number of claims.
2. We decreased our previous estimate for benefit costs for claims reopened for our Individual Disability - Closed Block segment \$10.7 million. Although the experience relative to our assumptions for the overturn rate was slightly higher, experience indicated that the total number of claims for this segment would be less than our previous assumptions.
3. We decreased our previous estimate for the additional incremental direct claim reassessment operating expenses \$12.8 million due to our projections for an earlier completion of the reassessment process. We released \$10.3 million for Unum US group long-term disability and \$2.5 million for our Individual Disability - Closed Block segment.
4. These second quarter of 2007 adjustments to our claim reassessment costs decreased 2007 before-tax operating earnings for our Unum US group disability line of business \$66.2 million and increased 2007 before-tax operating earnings for our Individual Disability - Closed Block segment \$13.2 million.

Financing

The scheduled remarketing of the senior note element of the 2004 adjustable conversion-rate equity units (units) occurred in February 2007, as stipulated by the terms of the original offering, and we reset the interest rate on \$300.0 million of senior notes due May 15, 2009 to 5.859%. We purchased \$150.0 million of the senior notes in the remarketing which were subsequently retired. The associated write-off of deferred debt costs decreased first quarter of 2007 income by \$2.4 million before tax, or \$1.6 million after tax. In May 2007, we settled the purchase contract element of the 2004 units by issuing 17.7 million shares of common stock. We received proceeds of approximately \$300.0 million from the transaction.

Table of Contents

During the first nine months of 2007, we made principal payments of \$15.0 million on our senior secured non-recourse variable rate notes due 2036 which were issued by Tailwind Holdings. During the second quarter of 2007, we purchased \$34.5 million aggregate principal amount of our outstanding 6.85% notes due 2015. The costs associated with this debt reduction decreased our first nine months 2007 income approximately \$0.8 million before tax, or \$0.6 million after tax.

On October 31, 2007, Northwind Holdings issued \$800.0 million of floating rate, insured, senior, secured notes due 2037 in a private offering. The notes bear interest at a floating rate equal to the three month London Interbank Offered Rate (LIBOR) plus 0.78%. Recourse for the payment of principal, interest, and other amounts due on the notes will be dependent principally on the receipt of dividends from Northwind Reinsurance Company (Northwind Re), the sole subsidiary of Northwind Holdings. The ability of Northwind Re to pay dividends to Northwind Holdings will depend on its satisfaction of applicable regulatory requirements and on the performance of the business of Paul Revere Life, Provident, and Unum America (collectively, the ceding insurers) reinsured by Northwind Re. None of Unum Group, the ceding insurers, Northwind Re, or any other affiliate of Northwind Holdings is an obligor or guarantor on the notes.

Dispositions

During the first quarter of 2007, we completed the sale of our wholly-owned subsidiary, GENEX Services, Inc. (GENEX), a leading workers compensation and medical cost containment services provider. Our growth strategy is focused on the development of our primary markets, and GENEX's specialty role in case management and medical cost containment related to the workers' compensation market was no longer consistent with our overall strategic direction. We recognized an after-tax gain on the transaction of approximately \$6.2 million. See Note 3 of the Notes to Consolidated Financial Statements contained herein in Item 1 for additional information.

Accounting Pronouncements

Effective January 1, 2007, we adopted the provisions of Statement of Position 05-1 (SOP 05-1), *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*. SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. An internal replacement is defined as a modification in product benefits, features, or coverages that occurs by the exchange or replacement of an existing insurance policy for a new policy. The cumulative effect of applying the provisions of SOP 05-1 decreased our 2007 opening balance of retained earnings \$445.2 million.

Effective January 1, 2007, we adopted the provisions of Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (SFAS 109)*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS 109. Unlike SFAS 109, FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Additionally, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The cumulative effect of applying the provisions of FIN 48 increased our 2007 opening balance of retained earnings \$22.7 million.

Effective January 1, 2007, we adopted the provisions of Statement of Financial Accounting Standards No. 155 (SFAS 155), *Accounting for Certain Hybrid Financial Instruments, an amendment of FASB Statements No. 133 (SFAS 133) and 140*. SFAS 155: (a) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; (b) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133; (c) establishes a requirement to evaluate beneficial interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; (d) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and, (e) eliminates restrictions on a qualifying special-purpose entity's ability to hold passive derivative financial instruments that

Table of Contents

pertain to beneficial interests that are or contain a derivative financial instrument. The adoption of SFAS 155 did not have a material effect on our financial position or results of operations.

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect amounts reported in our financial statements and accompanying notes. Estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed in our financial statements.

The accounting estimates deemed to be most critical to our results of operations and financial condition are those related to reserves for policy and contract benefits, deferred acquisition costs, valuation of fixed maturity investment securities, pension and postretirement benefit plans, and income taxes. There have been no significant changes in our critical accounting estimates during the first nine months of 2008.

For additional information concerning our accounting policies and critical accounting estimates, see Note 1 of the Notes to Consolidated Financial Statements in Part II, Item 8 and Critical Accounting Estimates in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2007.

N.M. = not a meaningful percentage

In describing our results, we may at times note certain items and exclude the impact of these items on financial ratios and metrics to enhance the understanding and comparability of our Company's performance and the underlying fundamentals in our operations, but this exclusion is not an indication that similar items may not recur. The second quarter of 2007 revision to our estimate of benefit costs and associated operating expenses for claims reopened in our claim reassessment process affects the comparability of the financial results reported herein and, only where noted, are excluded from certain of our financial ratios and metrics.

Consolidated premium income for the third quarter and first nine months of 2008 includes premium growth, relative to the prior year periods, for Unum US supplemental and voluntary lines of business and Colonial Life. Unum UK, in local currency, reported premium growth for the first nine months of 2008, relative to the prior year, but had a decline for the third quarter of 2008 due to lower persistency and lower sales in prior periods. Unum US group disability and group life and accidental death and dismemberment lines of business experienced a decline in premium income during the third quarter and first nine months of 2008 compared to the same periods of 2007, as expected, due primarily to our continued pricing discipline for our Unum US group business and our strategy of developing a more balanced business mix. However, both premium and case persistency for these lines of business improved during 2008 relative to 2007, indicating that persistency for these product lines has begun to stabilize as expected. Premium income in the Individual Disability Closed Block segment decreased in 2008 relative to 2007, as expected in this closed block of business.

Table of Contents

Net investment income for the third quarter of 2008 was marginally below the prior year third quarter, and for the first nine months of 2008 net investment income was slightly higher than the prior year first nine months. Asset levels are higher in 2008 than in the prior year, but we have received fewer bond call premiums.

We reported a net realized investment loss of \$165.8 million in the third quarter of 2008 compared to \$46.1 million in the third quarter of 2007. For the first nine months, we reported a net realized loss of \$208.2 million in 2008 compared to \$39.4 million in 2007. Changes in the fair values of certain embedded derivatives are reported as realized investment gains and losses, as required under the provisions of Statement of Financial Accounting Standards No. 133 Implementation Issue B36 (DIG Issue B36), *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposure That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor Under Those Instruments*. During the third quarter and first nine months of 2008, changes in the fair value of the embedded derivatives associated with modified coinsurance arrangements resulted in net realized losses of \$67.9 million and \$107.0 million, respectively, compared to net realized losses of \$27.7 million and \$21.4 million for the prior year periods. The third quarter losses in both years resulted primarily from a widening of credit spreads in the overall investment market. Also included in the third quarter and first nine months of 2008 are \$97.9 million and \$101.2 million, respectively, of net realized investment losses from sales and write-downs of investments. The 2008 losses relate primarily to fixed maturity securities in the financial institutions sector that we either sold or considered other than temporarily impaired during the third quarter of 2008. See **Investments** contained herein in Item 2 for further discussion.

The reported ratio of benefits and change in reserves for future benefits to premium income was 84.6 percent and 84.9 percent for the third quarter and first nine months of 2008 compared to 86.9 percent and 89.1 percent for the same periods of 2007, with improved risk results in each of our segments and in each of the major lines of business within the Unum US segment. Our reported benefits and change in reserves for future benefits for the first nine months of 2007 include \$65.8 million related to second quarter of 2007 revisions to our estimate of benefit costs for claims reopened in our claim reassessment process. Excluding this charge, the ratio of benefits and change in reserves for future benefits to premium income was 88.0 percent for the first nine months of 2007. See **Segment Results** as follows for discussions of line of business risk results and claims management performance in each of our segments.

Interest and debt expense is lower relative to the third quarter and first nine months of 2007 due to lower rates of interest on our outstanding debt relative to last year, primarily as a result of the replacement of older fixed rate debt with non-recourse floating rate debt.

The deferral and amortization of deferred acquisition costs was higher in the third quarter and first nine months of 2008 relative to the prior year comparable periods due primarily to continued growth in certain of our product lines. Amortization also increased due to an increase in the amortization related to Unum US internal replacement transactions that result in a policy that is substantially changed as well as slightly elevated persistency in certain policy issue years.

Our other expense ratio increased in the third quarter and first nine months of 2008 in comparison to the same periods of 2007 due primarily to our investment in brand and product promotion and an increase in product and service development costs in our core lines of business. Also included in the third quarter and first nine months of 2008 expense is a \$4.7 million litigation settlement, and 2008 year-to-date expenses also include the \$5.6 million settlement regarding broker compensation. We intend to aggressively manage our operating expenses while continuing to increase the effectiveness of our operating processes.

Table of Contents**Consolidated Sales Results***(in millions of dollars)*

	Three Months Ended September 30		Nine Months Ended September 30			
	2008	% Change	2007	2008	% Change	2007
Unum US						
Fully Insured Products	\$ 118.5	8.7%	\$ 109.0	\$ 446.6	10.5%	\$ 404.1
Administrative Services Only (ASO) Products	0.6	(60.0)	1.5	3.5	(23.9)	4.6
Total Unum US	119.1	7.8	110.5	450.1	10.1	408.7
Unum UK	22.9	3.2	22.2	72.5	2.4	70.8
Colonial Life	75.9	1.9	74.5	224.8	1.9	220.7
Individual Disability - Closed Block	0.8	14.3	0.7	1.7	(26.1)	2.3
Consolidated	\$ 218.7	5.2	\$ 207.9	\$ 749.1	6.6	\$ 702.5

Sales results shown in the preceding chart generally represent the annualized premium or annualized fee income on new sales which we expect to receive and report as premium income or fee income during the next 12 months following or beginning in the initial quarter in which the sale is reported, depending on the effective date of the new sale. Sales do not correspond to premium income or fee income reported as revenue in accordance with GAAP. This is because new annualized sales premiums reflect current sales performance and what we expect to recognize as premium or fee income over a 12 month period, while premium income and fee income reported in our financial statements are reported on an earned basis rather than an annualized basis and also include renewals and persistency of in force policies written in prior years as well as current new sales.

Premiums for fully insured products are reported as premium income. Fees for ASO products (those where the risk and responsibility for funding claim payments remain with the customer and we only provide services) are included in other income. Sales, persistency of the existing block of business, and the effectiveness of the renewal program are indicators of growth in our premium and fee income. Trends in new sales, as well as existing market share, also indicate our potential for growth in our respective markets and the level of market acceptance of price changes and new product offerings. Sales results may fluctuate significantly due to case size and timing of sales submissions.

See Segment Results as follows for additional discussion of sales by segment.

Table of Contents**Segment Results**

Our reporting segments are comprised of the following: Unum US, Unum UK, Colonial Life, Individual Disability Closed Block, Other, and Corporate. In the following segment financial data and discussions of segment results, operating revenue excludes net realized investment gains and losses. Operating income or operating loss excludes net realized investment gains and losses and income tax. These are considered non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP.

These non-GAAP financial measures of operating revenue and operating income or operating loss differ from revenue and income (loss) from continuing operations before income tax as presented in our consolidated operating results and in income statements prepared in accordance with GAAP due to the exclusion of before tax realized investment gains and losses. We measure segment performance for purposes of Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information*, excluding realized investment gains and losses because we believe that this performance measure is a better indicator of the ongoing businesses and the underlying trends in the businesses. Our investment focus is on investment income to support our insurance liabilities as opposed to the generation of realized investment gains and losses, and a long-term focus is necessary to maintain profitability over the life of the business. Realized investment gains and losses depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our segments. However, income or loss excluding realized investment gains and losses does not replace net income or net loss as a measure of overall profitability. We may experience realized investment losses, which will affect future earnings levels since our underlying business is long-term in nature and we need to earn the assumed interest rates in our liabilities.

A reconciliation of total operating revenue by segment to total consolidated revenue and total operating income by segment to consolidated net income is as follows:

(in millions of dollars)

	Three Months Ended September 30		Nine Months Ended September 30	
	2008	2007	2008	2007
Operating Revenue by Segment	\$ 2,608.5	\$ 2,656.3	\$ 7,866.8	\$ 7,915.8
Net Realized Investment Loss	(165.8)	(46.1)	(208.2)	(39.4)
Revenue	\$ 2,442.7	\$ 2,610.2	\$ 7,658.6	\$ 7,876.4
Operating Income by Segment	\$ 325.6	\$ 325.1	\$ 979.7	\$ 811.2
Net Realized Investment Loss	(165.8)	(46.1)	(208.2)	(39.4)
Income Tax	51.8	92.0	260.1	259.9
Income from Discontinued Operations				6.9
Net Income	\$ 108.0	\$ 187.0	\$ 511.4	\$ 518.8

As previously noted, included in operating income by segment are before-tax charges of \$53.0 million in the first nine months of 2007 related to a revision to our regulatory claim reassessment reserve estimates. This charge lowered net income \$34.5 million in 2007.

Table of Contents**Unum US Segment**

The Unum US segment includes group long-term and short-term disability insurance, group life and accidental death and dismemberment products, and supplemental and voluntary lines of business. The supplemental and voluntary lines of business are comprised of recently issued disability insurance, group and individual long-term care insurance, and voluntary benefits products.

Unum US Operating Results

Shown below are financial results for the Unum US segment. In the sections following, financial results and key ratios are also presented for the major lines of business within the segment.

(in millions of dollars)

	Three Months Ended September 30			Nine Months Ended September 30		
	2008	% Change	2007	2008	% Change	2007

Administrative Services Only (ASO) Products	0.6	(60.0)	1.5	3.5	(23.9)	4.6
Total Sales	\$ 119.1	7.8	\$ 110.5	\$ 450.1	10.1	\$ 408.7

Sales for Unum US increased 7.8 percent in the third quarter of 2008 relative to the prior year third quarter and increased 10.1 percent for the first nine months of 2008 relative to the first nine months of 2007, driven primarily by increases in sales in the group core market segment and voluntary benefits.

Sales for our group core market segment increased 27.9 percent and 19.0 percent over the prior year third quarter and first nine months, respectively. We had a sales mix of approximately 74 percent core market and 26 percent large case market in the third quarter of 2008 and a sales mix of approximately 64 percent core market and 36 percent large case market in the first nine months of 2008, in line with our targeted 60 percent core/40 percent large case market distribution mix.

Sales for our individual disability line of business decreased slightly in the third quarter of 2008 compared to the third quarter of 2007 but increased slightly over the first nine months of 2007. Sales of the multi-life product increased approximately 4.5 percent in the third quarter of 2008 compared to last year's third quarter and increased 4.3 percent for the first nine months relative to the first nine months of last year. Long-term care sales decreased from the prior year third quarter, driven by a decrease in sales in both group and individual long-term care. Long-term care sales increased slightly over the prior year first nine months, driven by an increase in group long-term care sales. In order to focus more completely on the group long-term care market, we have decided to discontinue selling individual long-term care insurance on an active basis effective in 2009. Our voluntary benefits sales increased in the third quarter and the first nine months of 2008 relative to the same prior year periods due to an increase in sales in the core market segment.

We anticipate that sales for our group core market segment, group long-term care, and our voluntary products will continue to increase during the remainder of 2008, aided in part by the introduction of *Simply Unum* in additional sales offices during the second and third quarters of 2008.

Case Persistency:

Group Long-term Disability	89.3%	88.1%
Group Short-term Disability	88.1%	87.1%

(1) Included in this ratio is the second quarter of 2007 \$76.5 million increase in our claim reassessment reserve estimate. Excluding this revision, the benefit ratio for the nine months ended September 30, 2007 would have been 92.7%.

(2) Included in this ratio is the second quarter of 2007 \$10.3 million decrease in our claim reassessment incremental direct operating expense estimate. Excluding this revision, the other expense ratio for the nine months ended September 30, 2007 would have been 23.6%.

(3) Included in this ratio is the second quarter of 2007 \$66.2 million net increase in our claim reassessment cost estimate. Excluding this revision, the before-tax operating income ratio for the nine months ended September 30, 2007 would have been 7.2%.

Table of Contents

Premium income for group disability decreased in the third quarter and first nine months of 2008 relative to the prior year, as expected, due primarily to our pricing, renewal, and risk selection strategy as well as the termination of one large case group in September 2007. However, premium persistency and case persistency both improved over the prior year in both the core and large case markets, indicating that persistency for these lines is beginning to stabilize as expected. Net investment income declined in the third quarter and first nine months of 2008 in comparison to the prior year due primarily to the investment of new cash at lower rates than that of the portfolio yield for assets supporting these lines of business and also due to a decrease in bond call premiums. These declines in net investment income were partially offset by an increase in the level of assets supporting these lines of business. Other income includes ASO fees of \$16.8 million and \$49.4 million for the third quarter and first nine months of 2008, respectively, and \$16.7 million and \$48.4 million for the third quarter and first nine months of 2007.

The benefit ratio for the third quarter and first nine months of 2008 was lower than the benefit ratio for the same prior year periods, excluding the revision to our estimate for the claim reassessment costs, due primarily to a higher rate of claim recoveries in group long-term disability and lower paid claims in short-term disability. Claim incidence rates for both group long-term and short-term disability are slightly lower than the prior year, with no unusual trends noted by sector or by case size. An increase in incidence rates for group short-term disability generally precedes an increase in long-term disability submitted incidence.

The deferral of acquisition costs was generally consistent with the comparable periods of 2008. Amortization was higher in the third quarter and first nine months of 2008 relative to the prior year due to an increase in amortization related to internal replacement transactions that result in a policy that is substantially changed. These transactions are accounted for as an extinguishment of the original policy and the issuance of a new policy.

The other expense ratio increased in the third quarter and first nine months of 2008 compared to the prior year comparable periods due primarily to the decline in premium income. Also contributing to the increase in the other expense ratio was the expense related to the broker compensation settlement previously discussed, of which \$4.4 million was included in the first nine months of 2008 expenses for group disability. The decline in acquisition related expenses, as noted above, was mostly offset by an increase in policy maintenance expenses and product and service development costs.

As discussed under Cautionary Statement Regarding Forward-Looking Statements, certain risks and uncertainties are inherent in group disability business. Components of claims experience, including, but not limited to, incidence and recovery rates, may be worse than we expect. Both economic and societal factors can affect claim incidence. Claim incidence and claim recovery rates may be influenced by, among other factors, the rate of unemployment and consumer confidence. The relationship between these and other factors and overall incidence is very complex and will vary due to contract design features and the degree of expertise within the insuring organization to price, underwrite, and adjudicate the claims. Adjustments to reserve amounts may be required if there are changes in assumptions regarding the incidence of claims or the rate of recovery, as well as persistency, mortality, and interest rates used in calculating the reserve amounts. Within the group disability market, pricing and renewal actions can be taken to react to higher claim rates. However, these actions take time to implement, and there is a risk that the market will not sustain increased prices. In addition, changes in economic and external conditions may not manifest themselves in claims experience for an extended period of time.

Table of Contents**Unum US Group Life and Accidental Death and Dismemberment Operating Results**

Case Persistency:

Group Life	88.9%	87.2%
Accidental Death & Dismemberment	89.1%	87.6%

Premium income for group life decreased in the third quarter and first nine months of 2008 relative to the prior year periods due primarily to our pricing, renewal, and risk selection strategy. Premium persistency and case persistency both improved in comparison to the prior year. The decrease in net investment income relative to the prior year third quarter and first nine months resulted primarily from a decline in the level of assets supporting these lines of business and a lower yield due to the investment of new cash at lower rates than that of the portfolio yield for assets supporting these lines of business.

The benefit ratio decreased in the third quarter and first nine months of 2008 due primarily to lower paid claim incidence rates for both group life and the accidental death and dismemberment lines of business.

Table of Contents

The deferral of acquisition costs increased in the third quarter and first nine months of 2008 due primarily to increased sales in the group core market segment. Amortization of deferred acquisition costs was higher in the third quarter and first nine months of 2008 relative to the prior year periods due to an increase in amortization related to internal replacement transactions.

The other expense ratio increased in the third quarter and first nine months of 2008 in comparison to the prior year periods due primarily to the decline in premium income as well as an increase in policy maintenance expenses and product and service development costs. Also included in the first nine months of 2008 expenses was \$1.2 million related to the broker compensation settlement previously discussed.

Table of Contents

The increase in premium income for the third quarter and first nine months of 2008 relative to the prior year is due to sales growth in our supplemental and voluntary product lines, the impact of premium rate increases implemented for individual long-term care, and overall stable persistency. Net investment income increased relative to the prior year third quarter and first nine months primarily from growth in the level of assets supporting these lines of business and a higher yield due to the investment of new cash at higher rates than that of our portfolio yield.

The interest adjusted loss ratio for the individual disability recently issued line of business decreased in the third quarter of 2008 relative to the prior year third quarter due primarily to a decrease in incidence rates and a slight increase in the claim recovery rate. The decrease in the interest adjusted loss ratio for the individual disability recently issued line of business for the first nine months of 2008 relative to the same prior year period is due primarily to a decrease in incidence rates, partially offset by a lower claim recovery rate. The interest adjusted loss ratio for long-term care was lower in the third quarter and first nine months of 2008 than in the prior year periods due primarily to higher premium income and an increase in the claim recovery rate, partially offset by an increase in claim incidence rates. The change in the benefit ratio for voluntary benefits in comparison to the prior year comparable periods relates primarily to the disability line of business.

The increase in commissions and the deferral and amortization of acquisition costs relative to the prior year third quarter and first nine months is due primarily to growth in these lines of business. The other expense ratio increased in comparison to the prior year third quarter and first nine months due to an increase in product and service development costs and acquisition related expenses.

Segment Outlook

Our primary focus for the remainder of 2008 is continued improvement of our claims management performance in our group disability line of business along with growth in our core group market and our supplemental and voluntary lines of business. We continue to expect that our overall benefit ratio for group disability will improve to the 88 to 89 percent range by the end of this year or in early 2009. We expect that premium income growth will emerge in 2009 as our group large case market persistency stabilizes and growth continues in our group core market and our supplemental product lines.

We are focused on diversifying our product portfolio through initiatives such as *Simply Unum* and increased focus on our group core market and voluntary product sales. *Simply Unum* combines group and voluntary coverages on one fully-integrated platform and represents substantial changes in existing technologies and workflow processes, from quote and proposal to billing and administration and ultimately to the payment of claims. *Simply Unum* is now available in 45 states nationwide, and marketplace reaction from brokers and customers has been very positive. We will complete the rollout to the remaining states as state approvals are received.

Although periods of economic downturns have historically affected disability claim incidence rates and, to a lesser extent, disability claim recovery rates in certain sectors of the market, the current downturn or a future downturn may not necessarily lead to a similar increase in claim incidence. In addition, we have previously taken steps to better improve our risk profile. We have reduced our exposure to volatile business segments through diversification by market size, product segment, and industry segment. Our claims management is positioned for stable and sustainable performance levels. We have not currently experienced an increase in claim incidence levels, on a seasonally adjusted basis, in the aggregate or in any particular market sector or case size. We may see some near term impact from the uncertain economic environment on premium growth due to unfavorable persistency of existing cases or lower sales, particularly if customers elect to delay expansion of existing benefits in today's environment or if there is a significant reduction in the number of covered employees. We may also see some volatility in net investment income as a result of fluctuations in bond calls and other types of miscellaneous net investment income. We continuously monitor key indicators to assess our risk to an economic slowdown or recession and attempt to adjust our business plans accordingly.

Table of Contents**Unum UK Segment**

Unum UK includes insurance for group long-term disability, group life, and individual disability products sold primarily in the United Kingdom through field sales personnel and independent brokers and consultants.

Table of Contents**Foreign Currency Translation**

The functional currency of Unum UK is the British pound sterling. Unum UK's premiums, net investment income, claims, and expenses are received or paid in pounds, and we hold pound denominated assets to support Unum UK's pound denominated policy reserves and liabilities. We translate Unum UK's pound-denominated financial statement items into dollars for our consolidated financial reporting. We translate income statement items using an average exchange rate for the reporting period, and we translate balance sheet items using the exchange rate at the end of the period. We report unrealized foreign currency translation gains and losses in accumulated other comprehensive income in our consolidated balance sheets.

Fluctuations in the pound to dollar exchange rate have an effect on Unum UK's reported financial results and our consolidated financial results. In periods when the pound weakens, as occurred during the third quarter of 2008, translating pounds into dollars decreases current year results relative to the prior year. In periods when the pound strengthens, translating into dollars increases current year results in relation to the prior year.

Premium income decreased in the third quarter of 2008 relative to the prior year due primarily to lower persistency in the group long-term disability line of business. For the first nine months of 2008, the increase in premium income for group life and individual disability more than offset the decline in group long-term disability resulting from the lower persistency. Current and prior period sales growth as well as a decrease in group life ceded premiums as a result of a modification, in the fourth quarter of 2007, of a quota share reinsurance arrangement relating to new group life sales were the primary contributors to the increase. Group long-term disability premium income for the first nine months of 2008 also includes an increase of £2.8 million relating to a non-recurring reinsurance premium on a previously acquired claims block. Net investment income increased in the third quarter and first nine months of 2008 relative to the prior year due primarily to the growth in the level of assets supporting these lines of business and a higher yield due to the investment of new cash at higher rates than that of our portfolio yield.

Table of Contents

The lower benefit ratio in the third quarter and first nine months of 2008 in comparison to the prior year periods was primarily due to a lower rate of claim incidence for both group long-term disability and group life and an increased rate of claim recoveries for group long-term disability. Also included in the third quarter results is an adjustment to our long-term assumptions for claim reserves due to emerging experience and our view of future events, which increased third quarter and year-to-date operating income approximately £5.5 million and £8.2 million in 2008 and 2007, respectively.

The decrease in amortization of acquisition costs in the third quarter and first nine months of 2008 relative to the prior year periods is due primarily to a decrease in amortization related to internal replacement transactions that result in a policy that is substantially changed. These transactions are accounted for as an extinguishment of the original policy and the issuance of a new policy.

The other expense ratio increased in comparison with the prior year third quarter and first nine months due primarily to continued growth in expenses associated with investing in process changes.

During the second quarter of 2008, Unum UK became responsible for the ongoing administration and management of a closed block of group long-term disability claims through a reinsurance arrangement with Royal London Mutual Insurance Society Limited. At the time of the transaction, Unum UK received cash of £24.5 million, recorded £0.4 million in accrued premiums receivable, assumed reserves of £22.2 million, and recorded a deferred gain of £2.7 million. The transaction is not expected to materially impact operating results.

Total Sales	\$ 22.9	3.2	\$ 22.2	\$ 72.5	2.4	\$ 70.8
Total Sales (in millions of pounds)	£ 12.0	9.1	£ 11.0	£ 37.1	4.2	£ 35.6

Sales in Unum UK increased in the third quarter of 2008 relative to the third quarter of 2007 due to an increase in group life sales as well as marginal increases in both core and large case group long-term disability sales. Sales for the first nine months increased primarily due to an increase in large case market sales for both group long-term disability and group life as well as growth in group life sales. In the U.K., legislative changes that removed discrimination by employers on the basis of age, therefore encouraging the extension of insurance coverage, became effective in October 2006. During 2007, Unum UK took advantage of the opportunities offered by age equality legislation, with £1.2 million and £6.0 million of additional sales during the third quarter and first nine months of 2007, respectively, compared to £0.3 million and £1.2 million in the third quarter and first nine months of 2008. Excluding sales related to the change in age equality legislation, Unum UK achieved underlying sales growth of approximately 19.4 percent and 21.3 percent in the third quarter and first nine months of 2008 as compared to the same prior year periods.

Segment Outlook

During the remainder of 2008, we intend to focus on continued profitable sales growth and improvement in our premium persistency. We anticipate that high levels of profitability in this segment will continue, but with margins likely to return to approximately 30 percent in the medium term as we invest in new growth opportunities. We are currently undertaking an in-depth analysis of our expense efficiency and alignment to premium growth, the results of which we believe will be a disciplined cost management process that will reduce our operating expenses in 2009. However, we expect to incur additional expenses during the fourth quarter of 2008 in conjunction with implementing this process.

Table of Contents

We expect to maintain our strong leadership position in the U.K, but in the current competitive market we have a cautious outlook for premium growth. We are exploring additional market opportunities to expand our growth in the group market through new distribution channels and new product offerings, including leveraging Unum US expertise to open up the voluntary workplace market in the U.K. In April 2008, we launched an innovative group disability product targeted to our core market segment. We are making good progress on our initiative to provide the U.K. market with industry leading services, processes, systems, and operational capability.

Regarding the current economic downturn, we have not yet experienced any significant deterioration in disability claims incidence or claim recoveries. The more likely impact of a softer economic environment is on premium growth, which could be impacted by a prolonged competitive pricing environment. We continuously monitor key indicators to assess our risk to an economic slowdown or recession and attempt to adjust our business plans accordingly.

Table of Contents**Colonial Life Segment**

The Colonial Life segment includes insurance for accident, sickness, and disability products, life products, and cancer and critical illness products issued primarily by Colonial Life & Accident Insurance Company and marketed to employees at the workplace through an agency sales force and brokers.

Operating Results

Shown below are financial results and key performance indicators for the Colonial Life segment.

(in millions of dollars, except ratios)

	\$ 66.2	5.9	\$ 62.5	\$ 201.8	7.9	\$ 187.0

Operating Ratios (% of Premium Income):

Benefit Ratio	47.5%	48.6%	47.2%	48.3%
Other Expense Ratio	20.1%	19.0%	20.1%	19.2%
Before-tax Operating Income Ratio	27.0%	27.5%	27.7%	27.7%

Premium Persistency:

Accident, Sickness, and Disability	75.9%	76.0%
Life	84.7%	82.9%
Cancer and Critical Illness	84.1%	83.8%

Growth in premium income for the third quarter and first nine months of 2008 compared to the prior year periods was attributable primarily to current and prior period sales and stable persistency. Net investment income increased in the third quarter and first nine months of 2008 in comparison to the prior year due primarily to growth in the level of assets supporting these lines of business and a higher yield due to the investment of new cash at higher rates than that of our portfolio yield.

Table of Contents

The benefit ratio for this segment decreased in the third quarter and first nine months of 2008 in comparison to the prior year due primarily to favorable risk experience in the accident, sickness, and disability line of business, offset somewhat by higher benefit ratios in the life and cancer and critical illness lines of business. The improvement in the accident, sickness, and disability line of business resulted from the continued favorable experience related to several new products introduced between 2002 and 2004. The life line of business benefit ratio was higher in the third quarter and first nine months of 2008 relative to the same periods last year due to a higher level of death claims and a higher average claim cost. The cancer and critical illness product line reported a higher benefit ratio in the third quarter and first nine months of 2008 relative to the prior year due primarily to unfavorable claim experience associated with the older cancer products.

Although we continue to focus on expense management, the other expense ratio for the third quarter and first nine months of 2008 increased in comparison to the prior year due primarily to our investment in brand and product promotion and the development of additional product offerings.

Sales

(in millions of dollars)

	Three Months Ended September 30		Nine Months Ended September 30			
	2008	% Change	2007	2008	% Change	2007
Accident, Sickness, and Disability	\$ 49.7	5.5%	\$ 47.1	\$ 147.1	5.5%	\$ 139.4
Life	14.8	(0.7)	14.9	43.6	(2.5)	44.7
Cancer and Critical Illness	11.4	(8.8)	12.5	34.1	(6.8)	36.6
Total Sales	\$ 75.9	1.9	\$ 74.5	\$ 224.8	1.9	\$ 220.7

Colonial Life reported third quarter and first nine months of 2008 sales increases in the commercial market segment for employee groups with less than 100 lives and in the public sector markets for state and federal governments. These increases were partially offset by decreases in sales in the commercial market segment for employee groups with greater than 100 lives. The number of new accounts increased over the prior year third quarter and first nine months, but the new account annualized sales premium per case sold declined.

Segment Outlook

Throughout the remainder of 2008, we intend to focus on sales and distribution growth by accelerating recruiting and development, capitalizing on sales opportunities where we have less market share, and assessing emerging distribution opportunities. We anticipate that high levels of profitability in this segment will continue, but with margins decreasing modestly over time as the benefit ratio returns to more historic levels.

We will continue our brand development, product promotion, and marketing programs that we initiated during 2007. Our initiatives also include enhancement of our product development and enrollment capabilities. We intend to further enhance our continuous improvement program and focus on training and leadership development of our sales organization. We believe that the changes we have made and continue to make in our sales organization through recruiting, development, and training will drive growth.

Periods of economic downturns have historically had minimal impact on the operations of Colonial Life, due primarily to a diversified product portfolio that is designed with short duration, indemnity benefits. We have not experienced an increase in claim incidence levels, on a seasonally adjusted basis, in the aggregate or in any particular market sector. We may see some near term impact on sales and premium growth if current economic conditions impact the buying patterns of employees or cause employers to defer introduction of new plans. We continuously monitor key indicators to assess our risk to an economic slowdown or recession and attempt to adjust our business plans accordingly.

Table of Contents**Individual Disability - Closed Block Segment**

The Individual Disability Closed Block segment generally consists of those individual disability policies in force before the substantial changes in product offerings, pricing, distribution, and underwriting, which generally occurred during the period 1994 through 1998. A small amount of new business continued to be sold after these changes, but we stopped selling new policies in this segment at the beginning of 2004 other than update features contractually allowable on existing policies.

Operating Results

Shown below are financial results and key performance indicators for the Individual Disability Closed Block segment.

(in millions of dollars, except ratios)

	Three Months Ended September 30			Nine Months Ended September 30

<i>(2) Included in this ratio is the second quarter of 2007 \$2.5 million decrease in our claim reassessment incremental direct operating expense estimate. Excluding this revision, the other expense ratio for the nine months ended September 30, 2007 would have been 13.7%.</i>						
<i>(3) Included in this ratio is the second quarter of 2007 \$13.2 million decrease in our claim reassessment cost estimate. Excluding this revision, the before-tax operating income ratio for the nine months ended September 30, 2007 would have been 10.7%.</i>						

Table of Contents

The decrease in premium income for the third quarter and first nine months of 2008 relative to the prior year is due to the expected run-off of this block of closed business due to persistency and policy maturities. Partially offsetting the premium decrease from the expected run-off is an increase in premium income due to the reinsurance recapture, in the third quarter of 2007, of a small block of business, with an effective date of January 1, 2007, and an annualized premium income of approximately \$7.0 million.

Net investment income decreased in the third quarter and first nine months of 2008 compared to the prior year due to a decrease in bond call premiums, a lower level of assets supporting this closed block of business, and a decline in the portfolio yield rate for this segment. During the fourth quarter of 2007, we entered into an intercompany reinsurance transaction which allowed us to release excess statutory capital previously supporting this reinsured closed block business. As a result, the capital allocated to our Individual Disability Closed Block segment declined, with a resulting decrease in net investment income due to the lower asset levels needed to support allocated capital. Because this is an intercompany reinsurance arrangement, reported results remain unchanged for this segment other than the lower net investment income.

Other income includes the underlying results of certain blocks of reinsured business, including the net investment income of portfolios held by those ceding companies to support of the block we have reinsured. The net investment income for those blocks of reinsured business also declined relative to prior years, primarily due to a lower level of assets.

The interest adjusted loss ratio was lower in the third quarter of 2008 compared to last year's third quarter due to lower claim reopens and an improvement in mortality experience. For the first nine months, the ratio was lower than last year, excluding the decrease in our claim reassessment reserve estimate, due primarily to lower submitted claims.

The other expense ratio is higher for the third quarter and first nine months of 2008 relative to the prior year comparable periods due to a \$4.7 million litigation settlement as well as higher legal fees related to two pending cases.

Segment Outlook

As a result of the decline in capital allocated to this segment, net investment income has decreased in 2008 relative to 2007 due to the lower asset levels needed to support allocated capital. Net investment income has also been negatively impacted in 2008 by a reduced level of bond call premiums, relative to recent historical experience, as a result of the uncertain economic environment, and it is possible that this trend may continue through the remainder of the year and during the early part of 2009.

We also expect that operating revenue and income will decline over time as this closed block of business winds down. We believe that the interest adjusted loss ratio for this block of business will be relatively flat over the long term, but the segment may experience quarterly volatility. Claim resolution rates are very sensitive to operational and environmental changes and can be volatile over short periods of time. Our claim resolution rate assumption used in determining reserves is our expectation of the resolution rate we will experience over the life of the block of business and will vary from actual experience in any one period. It is possible, however, that variability in our reserve assumptions could result in a material impact on our reserve levels.

Table of Contents**Other Segment**

The Other operating segment includes results from products not actively marketed (with the exception of certain individual disability products), including individual life and corporate-owned life insurance, reinsurance pools and management operations, group pension, health insurance, and individual annuities. We expect operating revenue and income resulting from the products that are not actively marketed to decline over time as these business lines wind down, and we expect to reinvest the capital supporting these lines of business in the future growth of our Unum US, Unum UK, and Colonial Life segments.

Reinsurance Pools and Management

Our reinsurance operations include the reinsurance management operations of Duncanson & Holt, Inc. and the risk assumption, which includes reinsurance pool participation; direct reinsurance, which includes accident and health, long-term care, and long-term disability coverages; and Lloyd's of London syndicate participations. During the third quarter and first nine months of 2008, this line of business reported operating losses of \$2.8 million and \$5.7 million, respectively, compared to operating losses of \$3.6 million and \$7.6 million in the same prior year periods.

Individual Life and Corporate-Owned Life

During 2000, we reinsured substantially all of the individual life and corporate-owned life insurance blocks of business and ceded approximately \$3.3 billion of reserves to the reinsurer. The \$388.2 million before-tax gain on these transactions was deferred and is being amortized into income based upon expected future premium income on the traditional insurance policies ceded and estimated future gross profits on the interest-sensitive insurance policies ceded. A portion of the ceded corporate-owned life insurance block of business surrendered during 2007. The termination of this fully ceded business had no impact on our operating results and will not materially affect the amortization of the deferred gain.

Total operating revenue for individual life and corporate-owned life insurance was \$7.9 million and \$24.6 million in the third quarter and first nine months of 2008, respectively, compared to \$7.3 million and \$23.9 million in the same prior year periods. Operating income was \$6.4 million and \$19.8 million in the third quarter and first nine months of 2008, respectively, compared to \$6.3 million and \$21.7 million in the same prior year periods.

Table of Contents

Other

Group pension, health insurance, individual annuities, and other closed lines of business had combined operating revenue of \$25.1 million and \$73.5 million in the third quarter and first nine months of 2008, respectively, compared to \$23.7 million and \$75.3 million in the same prior year periods. These closed lines of business had combined operating losses of \$0.1 million and \$3.3 million in the third quarter and first nine months of 2008, respectively, compared to combined operating income (losses) of \$0.9 million and \$(2.9) million in the third quarter and first nine months of 2007.

Corporate Segment

The Corporate segment includes investment income on corporate assets not specifically allocated to a line of business, corporate interest expense, and certain corporate income and expense not allocated to a line of business.

Operating revenue in the Corporate segment was \$13.5 million and \$54.6 million in the third quarter and first nine months of 2008 compared to \$9.8 million and \$26.6 million in the same prior year periods. The increased operating revenue in the third quarter and first nine months of 2008 compared to the prior year periods is due primarily to an increase in net investment income resulting from higher levels of assets held by the Corporate segment.

The Corporate segment reported operating losses of \$30.3 million and \$82.7 million in the third quarter and first nine months of 2008, respectively, compared to \$35.7 million and \$134.3 million in the same prior year periods. Included in the corporate segment operating results for the first nine months of 2008 were \$0.4 million of costs related to the early retirement of debt. Included in the corporate segment operating results for the first nine months of 2007 were \$3.2 million of costs related to the early retirement of debt as well as a second quarter of 2007 securities litigation settlement accrual of \$11.6 million.

Interest and debt expense was \$37.2 million and \$121.5 million in the third quarter and first nine months of 2008 compared to \$43.9 million and \$134.3 million in the same prior year periods, excluding the costs related to early retirement of debt. See **Debt** contained herein in Item 2 for further discussion.

Discontinued Operations

During the first quarter of 2007, we completed the sale of GENEX and recognized an after-tax gain on the transaction of approximately \$6.2 million. This gain is included with income from discontinued operations in our statements of income. Also included in discontinued operations for the first nine months of 2007 is after-tax income for GENEX of \$0.7 million. See Note 2 of the **Notes to Consolidated Financial Statements** contained herein in Item 1 for additional information.

Investments

Overview

Investment activities are an integral part of our business, and profitability is significantly affected by investment results. We segment our invested assets into portfolios that support our various product lines. Generally, our investment strategy for our portfolios is to match the effective asset cash flows and durations with related expected liability cash flows and durations to consistently meet the liability funding requirements of our businesses. We try to maximize investment income and assume credit risk in a prudent and selective manner, subject to constraints of quality, liquidity, diversification, and regulatory considerations. Our overall investment philosophy is to invest in a portfolio of high quality assets that provide investment returns consistent with those assumed in the pricing of our insurance products. Assets are invested predominately in fixed maturity securities, and the portfolio is matched with liabilities so as to eliminate as much as possible our exposure to changes in the overall level of interest rates. Changes in interest rates may affect the amount and timing of cash flows. For information on our formal investment philosophy, including our overall quality and diversification objectives, see **Investments** in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2007.

Table of Contents

We actively manage our asset and liability cash flow match, as well as our asset and liability duration match to minimize interest rate risk. We may redistribute investments within our different lines of business, when necessary, to adjust the cash flow and/or duration of the asset portfolios to better match the cash flow and duration of the liability portfolios. Asset and liability portfolio modeling is updated on a quarterly basis and is used as part of the overall interest rate risk management strategy. Cash flows from the inforce asset and liability portfolios are projected at current interest rate levels and also at levels reflecting an increase and a decrease in interest rates to obtain a range of projected cash flows under the different interest rate scenarios. These results enable us to assess the impact of projected changes in cash flows and duration resulting from potential changes in interest rates. Testing the asset and liability portfolios under various interest rate scenarios enables us to choose the most appropriate investment strategy as well as to minimize the risk of disadvantageous outcomes. This analysis is a precursor to our activities in derivative financial instruments, which are used to hedge interest rate risk and to manage duration match.

Our investment portfolio consists primarily of fixed income securities. We have established an investment strategy that we believe will provide for adequate cash flows from operations and allow us to hold our securities through periods where significant decreases in fair value occur. We have no exposure to subprime mortgages, Alt-A loans, or collateralized debt obligations in our asset-backed or mortgage-backed securities portfolios. We hold \$22.1 million of collateralized debt obligations within our public bond portfolio. We have \$151.2 million of exposure to investments for which the payment of interest and principal is guaranteed under a financial guaranty insurance policy. The weighted average rating of the underlying securities, absent the guaranty insurance policy, is A1.

We recognize impairment losses when we determine that the value of certain fixed maturity securities has other than temporarily declined during the applicable reporting period, as well as when there are further declines in the values of fixed maturity securities that were initially written down in a prior period. See *Critical Accounting Estimates* in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2007, for a complete discussion of the valuation of fixed maturity securities.

Investment Results

Net investment income was \$594.7 million and \$1,799.2 million in the third quarter and first nine months of 2008, a decrease of 1.4 percent and an increase of 0.5 percent relative to the same prior year periods. The level of invested assets was higher in the third quarter and first nine months of 2008 relative to the same prior year periods, but we received fewer bond call premiums.

The yield in our investment portfolio was 6.70 percent as of September 30, 2008, and the weighted average credit rating was A2. This compares to a yield in the portfolio of 6.66 percent as of December 31, 2007 and a weighted average credit rating of A2. At September 30, 2008, the weighted average duration of our policyholder liability portfolio was approximately 7.24 years, and the weighted average duration of our investment portfolio supporting those policyholder liabilities was approximately 6.85 years.

We report changes in the fair values of embedded derivatives in certain modified coinsurance arrangements as realized investment gains and losses, as required under the provisions of DIG Issue B36. During the third quarter and first nine months of 2008, changes in the fair value of these embedded derivatives resulted in realized losses of \$67.9 million and \$107.0 million, respectively, compared to net realized losses of \$27.7 million and \$21.4 million for the prior year periods. The third quarter losses in both years resulted primarily from a widening of credit spreads in the overall investment market.

Also included in the third quarter and first nine months of 2008 are \$97.9 million and \$101.2 million, respectively, of net realized investment losses from sales and write-downs of investments. The 2008 losses relate primarily to fixed maturity securities in the financial institutions sector that we either sold or considered other than temporarily impaired during the third quarter of 2008.

Table of Contents

Realized investment gains and losses, before tax, are as follows:

(in millions of dollars)

	Three Months Ended September 30		Nine Months Ended September 30	
	2008	2007	2008	2007
Gross Realized Investment Gain from Sales	\$ 10.6	\$ 11.4	\$ 53.3	\$ 69.2
Gross Realized Investment Loss				
Write-downs	71.2	23.5	82.7	56.4
Sales	37.3	6.3	71.8	30.8
Total	108.5	29.8	154.5	87.2
Change in Fair Value of DIG Issue B36 Derivatives	(67.9)	(27.7)	(107.0)	(21.4)
Net Realized Investment Loss	\$ (165.8)	\$ (46.1)	\$ (208.2)	\$ (39.4)

Realized Investment Losses \$10.0 Million or Greater from Other than Temporary Impairments

During the third quarter of 2008, we recognized an other than temporary impairment loss of \$39.3 million on a principal protected equity linked note issued by a Fortune 500 financial services company, the return of which is linked to a Vanguard S&P 500 index mutual fund. This note has an embedded derivative contract and substitutes highly rated bonds in place of the underlying S&P 500 index mutual fund to provide principal protection if there is a significant decline in the equities market. The note derives its value from the underlying S&P 500 index mutual fund. As of September 30, 2008, the decline in the S&P 500 index had not been significant enough to trigger the substitution of the bonds, but due to the recent steep decline in the S&P 500 index, we could no longer conclude that the value of the underlying S&P 500 index mutual fund would equate to or exceed the par value of the security at maturity. At the time of the impairment loss, these securities had been in an unrealized loss position for a period of greater than three years. The circumstances of this impaired investment have no impact on other investments.

During the third quarter of 2008, we recognized an other than temporary impairment loss of \$27.0 million on securities issued by a large investment banking firm. The company experienced a rapid deterioration in its credit and derivatives portfolio, which made it impossible for the firm to raise additional capital or to sell assets to increase liquidity. The inability to raise capital forced the company to file for bankruptcy protection in the third quarter of 2008. The firm was rated A2 by Moody's and A by S&P at the time of the bankruptcy filing. At the time of the impairment loss, these securities had been in an unrealized loss position for a period of greater than two years but less than three years.

Realized Investment Losses \$10.0 Million or Greater from Sale of Fixed Maturity Securities

During the third quarter of 2008, we recognized a loss of \$16.2 million on the sale of securities issued by the large investment banking firm discussed above. We had no other individual realized investment losses \$10.0 million or greater from the sale of fixed maturity securities during the first nine months of 2008.

While the majority of our 2008 realized losses from other than temporary impairments and from sales were generated by fixed maturity securities in the financial institutions sector, we are generally underweight in that sector relative to industry averages. Our remaining exposure to equity linked securities is approximately \$121.4 million on a book value basis as of September 30, 2008.

Table of Contents

We had no individual realized investment losses \$10.0 million or greater from other than temporary impairments or from the sale of fixed maturity securities during the first nine months of 2007. During the second quarter of 2007, we recorded an adjustment to the book values and related unrealized loss of two securitized asset trusts acquired in 2001 to reflect the values that would have been present had we recorded the investment income as dividends rather than interest accretion. The book value adjustment of \$20.2 million was recognized as a realized investment loss in the second quarter of 2007. Because the investments no longer satisfied our investment objectives, we subsequently sold the trusts in June of 2007 and recognized a realized investment gain of \$24.9 million on the sale.

Fair Value Measurements

Effective January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards No. 157 (SFAS 157), *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 is intended to increase consistency and comparability among fair value estimates used in financial reporting. It does not require any new fair value measurements. SFAS 157 clarifies a number of considerations with respect to fair value measurement objectives for financial reporting and expands disclosure about the use of fair value measurements, with particular emphasis on the inputs used to measure fair value. This disclosure is intended to provide users of the financial statements the ability to assess the reliability of an entity's fair value measurements. The adoption of SFAS 157 did not materially change the approach or methods we utilize for determining fair value measurements or the fair values derived under those methods.

Definition of Fair Value

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and, therefore, represents an exit price, not an entry price. The exit price objective applies regardless of a reporting entity's intent and/or ability to sell the asset or transfer the liability at the measurement date.

The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and less judgment utilized in measuring fair value. An active market for a financial instrument is a market in which transactions for an asset or a similar asset occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available. Conversely, financial instruments rarely traded or not quoted have less observability and are measured at fair value using valuation techniques that require more judgment. Pricing observability is generally impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, and overall market conditions.

Valuation Techniques

In accordance with SFAS 157, valuation techniques used for assets and liabilities accounted for at fair value are generally categorized into three types:

1. The *market approach* uses prices and other relevant information from market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach often use market multiples derived from a set of comparables or matrix pricing. Market multiples might lie in ranges with a different multiple for each comparable. The selection of where within the range the appropriate multiple falls requires judgment, considering both quantitative and qualitative factors specific to the measurement. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities but comparing the securities to benchmark or comparable securities.

Table of Contents

2. The *income approach* converts future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. Income approach techniques rely on current market expectations of future amounts. Examples of income approach valuation techniques include present value techniques, option-pricing models that incorporate present value techniques, and the multi-period excess earnings method.

3. The *cost approach* is based upon the amount that currently would be required to replace the service capacity of an asset, or the current replacement cost. That is, from the perspective of a market participant (seller), the price that would be received for the asset is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data are available that can be obtained without undue cost and effort. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate. If we use multiple valuation techniques to measure fair value, we evaluate and weigh the results, as appropriate, considering the reasonableness of the range indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances.

The selection of the valuation method(s) to apply considers the definition of an exit price and depends on the nature of the asset or liability being valued. For assets and liabilities accounted for at fair value, we generally use valuation techniques consistent with the market approach, and to a lesser extent, the income approach. During the third quarter and first nine months of 2008, we have applied valuation techniques on a consistent basis to similar assets and liabilities and consistent with those techniques used at year end 2007. Due to recent market conditions, the mix and availability of observable inputs for valuation techniques have been volatile, and the risk inherent in the inputs is elevated relative to prior periods.

Inputs to Valuation Techniques

Inputs refer broadly to the assumptions that market participants use in pricing assets or liabilities, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable.

Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources.

Unobservable inputs are inputs that reflect our own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Observable inputs which we utilize to determine the fair values of our investments and derivative financial instruments include indicative broker prices and prices obtained from external pricing services. At September 30, 2008, approximately 88.6 percent of our fixed maturity securities were valued based on active trades and/or broker quotes or prices obtained from pricing services that generally use observable inputs in their valuation techniques, with no additional adjustments to the prices. These assets were classified as either Level 1 or Level 2, with the categorization dependent on whether the price was for an actual representative sale, for identical assets actively traded, and/or the quote binding or non-binding. We generally obtain, on average, one quote per financial instrument. We review the prices obtained to ensure they are consistent with a variety of observable market inputs and to verify the validity of a security's price. These inputs, along with our knowledge of the financial conditions and industry in which the issuer operates, will be considered in determining whether the quoted or indicated price, as well as the change in price from quarter to quarter, are valid.

On selected securities where there is not an indicated price or where we cannot validate the price, some combination of market inputs may be used to determine a price using a pricing matrix, or we may use pricing inputs from a comparable security. At September 30, 2008, we valued approximately 9.4 percent of our fixed maturity securities using this method. These assets were classified as Level 2. The parameters and inputs used to validate a price on a security may be adjusted for assumptions about risk and current market conditions on a quarter to quarter basis, as

Table of Contents

certain features may be more significant drivers of valuation at the time of pricing. Changes to inputs in valuations are not changes to valuation methodologies; rather, the inputs are modified to reflect direct or indirect impacts on asset classes from changes in market conditions. We consider transactions in inactive or disorderly markets to be less representative of fair value. We use all available observable inputs when measuring fair value, but when significant other unobservable inputs and adjustments are necessary, we classify these assets as Level 3.

Inputs that may be used include the following:

Benchmark yields (Treasury and swap curves)

Transactional data for new issuance and secondary trades

Broker/dealer quotes and pricing

Security cash flows and structures

Recent issuance/supply

Sector and issuer level spreads

Credit ratings/maturity/weighted average life/seasoning/capital structure

Security optionality

Corporate actions

Underlying collateral

Prepayment speeds/loan performance/delinquencies

Public covenants

Comparative bond analysis

Derivative spreads

Edgar Filing: Unum Group - Form 10-Q

Third-party pricing sources

Relevant reports issued by analysts and rating agencies

The overall valuation process for determining fair values may include adjustments to valuations obtained from our pricing sources when they do not represent a valid exit price. These adjustments may be made when, in our judgment, certain features of the financial instrument, such as its complexity or the market in which the financial instrument is traded (such as counterparty, credit, concentration, or liquidity), require that an adjustment be made to the value originally obtained from our pricing sources. Additionally, an adjustment to the price derived from a model typically reflects our judgment of the inputs that other participants in the market for the financial instrument being measured at fair value would consider in pricing that same financial instrument.

Certain of our investments do not have readily determinable market prices and/or observable inputs or may at times be affected by the lack of market liquidity. For these securities, we use internally prepared valuations combining matrix pricing with vendor purchased software programs, including valuations based on estimates of future profitability, to estimate the fair value. Additionally, we may obtain prices from independent third-party brokers to aid in establishing valuations for certain of these securities. Key assumptions used by us to determine fair value for these securities include risk-free interest rates, risk premiums, performance of underlying collateral (if any), and other factors involving significant assumptions which may or may not reflect those of an active market.

As of September 30, 2008, the key assumptions we generally used to estimate the fair value of these types of securities included those listed below. Where appropriate, we have noted the assumption used for the prior period as well as the reason for the change.

Risk free interest rates of 2.98 percent for five-year maturities to 4.31 percent for 30-year maturities were derived from the current yield curve for U.S. Treasury Bonds with similar maturities. This compares to interest rates of 3.33 percent for five-year maturities to 4.52 percent for 30-year maturities used at June 30, 2008.

Current Baa corporate bond spreads ranging from 3.35 percent to 4.01 percent plus an additional 20 basis points were added to the risk free rate to reflect the lack of liquidity. We used spreads ranging from 2.46 percent to 2.92 percent plus an additional 20 basis points at June 30, 2008. The changes were based on observable market spreads.

An additional five basis points were added to the risk free rates for foreign investments, consistent with June 30, 2008.

Table of Contents

Additional basis points were added as deemed appropriate for certain industries and for individual securities in certain industries that are considered to be of greater risk.

Increasing the 20 basis points added to the risk free rate for lack of liquidity by 1.5 basis points, increasing the five basis points added to the risk free rates for foreign investments by one basis point, and increasing the additional basis points added to each industry considered to be of greater risk by one basis point would have decreased the September 30, 2008 fair value of our fixed maturity securities portfolio by approximately \$1.2 million. We believe this range of variability is appropriate, and although the current market is very volatile, historically the inputs noted have generally not deviated outside the range provided.

We regularly test the validity of the fair values determined by our valuation techniques by comparing the prices of assets sold to the fair values reported for the assets in the immediately preceding reporting period. Historically, our realized gains or losses on dispositions of investments have not varied significantly from amounts estimated under the valuation methodologies described above, which, combined with the results of our testing, indicates to us that our pricing methodologies are appropriate.

Fair Value Hierarchy

SFAS 157 requires financial instruments measured at fair value to be categorized into a three-level classification. The lowest level input that is significant to the fair value measurement of a financial instrument is used to categorize the instrument and reflects the judgment of management. Financial assets and liabilities presented at fair value in our consolidated balance sheets generally are categorized as follows:

Level 1 Inputs are unadjusted and represent quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2 Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life. Level 2 inputs include, for example, indicative prices obtained from brokers or pricing services validated to other observable market data and quoted prices for similar assets or liabilities.

Level 3 Inputs reflect our best estimate of what market participants would use in pricing the asset or liability at the measurement date. Generally, assets and liabilities carried at fair value and included in this category are comprised of certain mortgage and asset-backed securities, certain corporate fixed maturity securities, certain private equity investments, and certain derivatives. Financial assets and liabilities presented at fair value and categorized as Level 3 are generally those that are valued using unobservable inputs to extrapolate an estimated fair value. The inputs reflect our assumptions about the assumptions that market participants would use in pricing the instrument in a current period transaction, and outputs represent an exit price and expected future cash flows.

As of September 30, 2008, approximately 10.0 percent of our fixed maturity securities were categorized as Level 1, 88.3 percent as Level 2, and 1.7 percent as Level 3. During the third quarter of 2008, we transferred \$241.1 million of fixed maturity securities into Level 3 and \$114.4 million of fixed maturity securities out of Level 3. The reclassifications between levels resulted primarily from a change in observability of three inputs used to determine fair values of the securities reclassified: (1) transactional data for new issuance and secondary trades, (2) broker/dealer quotes and pricing, primarily related to the lack of an active and orderly market, and (3) comparable bond metrics from which to perform an analysis. See Note 4 of the Notes to Consolidated Financial Statements contained herein in Item 1 for additional information.

Table of Contents*Fixed Maturity Securities*

Fixed maturity securities at September 30, 2008, included \$32.9 billion, or 99.1 percent, of bonds and \$288.6 million, or 0.9 percent, of redeemable preferred stocks. The following table shows the fair value composition by internal industry classification of the fixed maturity bond portfolio and the associated unrealized gains and losses.

Fixed Maturity Bonds-By Industry Classification

Unrealized losses on investment-grade fixed maturity securities principally relate to changes in interest rates or changes in market or sector credit spreads which occurred after the acquisition of the securities. These changes are generally temporary and are not recognized as realized investment losses unless the securities are sold, it becomes unlikely that we will hold the securities until recovery based on relevant facts and circumstances, or the securities become other than temporarily impaired. Generally, below-investment-grade fixed maturity securities are more likely to develop credit concerns. In determining whether a decline in fair value below amortized cost of a fixed maturity security is other than temporary, we utilize a formal, well-defined, and disciplined process to monitor and evaluate our fixed income investment portfolio. The process results in a thorough evaluation of problem investments and the recording of realized losses on a timely basis for investments determined to have an other than temporary impairment.

For those fixed maturity securities with an unrealized loss and on which we have not recorded an impairment loss, we believe that the decline in fair value below amortized cost is temporary. We have the ability and intent to hold our securities to the earlier of recovery or maturity. If information becomes available that changes our assessment as to whether we will receive contractual payments related to a fixed maturity security and the security is also not projected to recover in value, the related security is generally sold. We may also in certain circumstances sell a security in an unrealized loss position because of changes in tax laws, when a merger or the disposition of a segment or product line results in positions outside of our investment guidelines, due to changes in regulatory or capital

Table of Contents

requirements, due to unexpected changes in liquidity needs, to better match portfolio cash flows, or to take advantage of relative value opportunities or tender offers that recover up to or beyond the cost of the investment.

For those securities with a gross unrealized loss, we considered all applicable factors shown below in reaching the conclusion that the impairments were not other than temporary.

The probability of recovering principal and interest.

Our ability and intent to retain the security for a sufficient period of time for it to recover.

Whether the security is current as to principal and interest payments.

The significance of the decline in value.

The time period during which there has been a significant decline in value.

Current and future business prospects and trends of earnings.

The valuation of the security's underlying collateral.

Relevant industry conditions and trends relative to their historical cycles.

Market conditions.

Rating agency actions.

Bid and offering prices and the level of trading activity.

Adverse changes in estimated cash flows for securitized investments.

Any other key measures for the related security.

Gross Unrealized Losses on Fixed Maturity Bonds

\$20.0 Million or Greater

As of September 30, 2008

Edgar Filing: Unum Group - Form 10-Q

(in millions of dollars)

Fixed Maturity Bonds	Fair Value	Gross Unrealized Loss	Length of Time in a Loss Position
<i>Investment-Grade</i>			
United Kingdom Based Financial Institution	\$ 57.0	\$ 24.6	> 2 years <= 3 years
U.S. Based Financial Institution	49.9	25.1	> 2 years <= 3 years
Canadian Based Metals Company	79.5	21.4	> 2 years <= 3 years
U.S. Government Sponsored Mortgage Funding Company	654.5	76.5	> 3 years
U.S. Based Media Conglomerate	51.8	20.9	> 3 years
Total	\$ 892.7	\$ 168.5

U.S. Based Automobile Manufacturer	15.8	21.4	> 3 years
Total	\$ 43.6	\$ 70.0	

For those securities with a gross unrealized loss of \$20.0 million or greater, further discussed as follows are (a) the factors which we believe resulted in the impairment and (b) the information we considered, both positive and negative, in reaching the conclusion that the impairments were not other than temporary.

Table of Contents

Investment-Grade Fixed Maturity Securities:

The decline in fair value of the United Kingdom based financial institution securities is due to a lack of market liquidity currently affecting most European financial institutions. This company is well diversified and has global market operations in capital markets, asset-backed securities, wealth management, asset management, commodities, and insurance. The company has adequate access to the capital markets and recently announced a significant equity offering in which a portion of the proceeds will be used for growing operations. Some of the countries in which this institution operates are experiencing an economic slowdown, which may lower earnings over the near term. We believe the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

The fair value of the U.S. based financial institution securities declined due primarily to liquidity concerns about financial institutions in general as well as concerns about the quality of assets held by the firm. In October 2008, the company received a substantial equity infusion which should help to alleviate recent liquidity concerns. We believe the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

The decline in fair value of the Canadian based metals company securities is primarily due to a general widening of credit spreads in the market. This company has a strong investment-grade rating and has had its credit profile strengthened due to being recently acquired by a larger, more diversified metals/mining company. The positive outlook for the company's markets and the benefits derived from industry consolidation serve to further enhance its credit profile. We believe the decline in value is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

The fixed maturity securities of the U.S. government sponsored mortgage funding company were issued by the Federal Home Loan Mortgage Corporation. The securities were rated AAA by S&P as of September 30, 2008, with no negative outlook by rating agencies. The change in the fair value of these securities relates to changes in interest rates subsequent to purchase of the securities as well as concerns related to the mortgage market. We believe that the decline in fair value of this security is temporary. We have the ability to hold this security to the earlier of recovery or maturity.

The fair value of the U.S. based media conglomerate securities declined due to general widening of credit spreads in the media industry particularly among companies sensitive to the cyclical advertising market. The company generates significant free cash flow, maintains a sizeable cash balance, and owns interests in various media businesses providing additional liquidity. We believe the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

Below-Investment-Grade Fixed Maturity Securities:

The fair value of the U.S. based financial services company securities declined due to losses reported by both its residential real estate finance subsidiary and its auto finance business. The real estate losses are a result of a decline in housing prices, higher mortgage delinquencies, and a decline in value of mortgages held for investment. The auto finance losses are related to declining residual values in its lease portfolio, lower loan originations due to declining auto sales, and weaker consumer credit trends. The real estate subsidiary is considered bankruptcy remote, and the company's core automotive finance business has strong liquidity and capital support. We believe the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

The fair value of the U.S. based media conglomerate securities declined due to the increase in leverage from a leveraged buyout transaction, as well as a general widening of credit spreads in the media industry. The company is expected to continue to generate sufficient cash flow to service its debt obligations, and it has ownership interests in a variety of media businesses that could be sold to further reduce leverage. We believe the decline in fair value of these securities is temporary. We have the ability to hold these

securities to the earlier of recovery or maturity.

Table of Contents

The fixed maturity bonds of the U.S. based automobile manufacturer are securities issued by the manufacturer and its captive finance subsidiary. The reduction in market value of these securities is due primarily to a decline in profitability and cash flow due to the competitive environment, a loss of market share, shifting consumer demand, and an increase in the cost of raw materials and employee healthcare and pension benefits. The company and its finance subsidiary both have substantial liquidity. We believe that the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

Our mortgage/asset-backed securities were approximately \$3.8 billion and \$4.0 billion on an amortized cost basis at September 30, 2008 and December 31, 2007, respectively. At September 30, 2008, the mortgage/asset-backed securities had an average life of 6.34 years, effective duration of 5.34 years, and a weighted average credit rating of AAA. The mortgage/asset-backed securities are valued on a monthly basis using valuations supplied by the brokerage firms that are dealers in these securities as well as independent pricing services. The primary risk involved in investing in mortgage/asset-backed securities is the uncertainty of the timing of cash flows from the underlying loans due to prepayment of principal with the possibility of reinvesting the funds in a lower interest rate environment. We use models which incorporate economic variables and possible future interest rate scenarios to predict future prepayment rates.

We have not invested in mortgage-backed derivatives, such as interest-only, principal-only, or residuals, where market values can be highly volatile relative to changes in interest rates. All of our mortgage-backed securities have fixed rate coupons. The credit quality of our mortgage-backed securities portfolio has not been negatively impacted by the recent issues in the market concerning subprime mortgage loans. The change in value of our mortgage-backed securities portfolio has moved in line with that of prime agency-backed mortgage-backed securities.

As of September 30, 2008, our exposure to below-investment-grade fixed maturity securities was \$1,840.0 million, approximately 5.1 percent of the fair value of invested assets excluding ceded policy loans. Below-investment-grade bonds are inherently more risky than investment-grade bonds since the risk of default by the issuer, by definition and as exhibited by bond rating, is higher. Also, the secondary market for certain below-investment-grade issues can be highly illiquid. Additional downgrades may occur, but we do not anticipate any liquidity problem caused by our investments in below-investment-grade securities, nor do we expect these investments to adversely affect our ability to hold our other investments to maturity.

We have a significant interest in, but are not the primary beneficiary of, a special purpose entity which is a collateralized bond obligation asset trust (CBO) in which we hold interests in several of the tranches and for which we act as investment manager of the underlying high-yield securities. This entity is a cash flow CBO and was fully funded at the time of issuance. Our potential losses in this CBO are limited to our investment in the entity. Our investment in this entity is reported at fair value with fixed maturity securities in the consolidated balance sheets. The fair value of this investment was derived from the fair value of the underlying assets. The fair value and amortized cost of this investment were \$2.5 million and \$2.4 million, respectively, at September 30, 2008, and \$12.0 million and \$11.8 million, respectively, at December 31, 2007.

Mortgage Loans and Real Estate

Our mortgage loan portfolio was \$1,238.5 million and \$1,068.9 million on an amortized cost basis at September 30, 2008 and December 31, 2007, respectively. Our mortgage loan portfolio is comprised entirely of commercial mortgage loans. We expect that we will continue to add investments in this category either through the secondary market or through loan originations. We believe our mortgage loan portfolio is well diversified geographically and among property types. The incidence of problem mortgage loans and foreclosure activity remains low, and we expect the level of delinquencies and problem loans to remain low in the future. At September 30, 2008, delinquent mortgage loans, or those past due more than 30 days as to interest or principal payments, totaled \$5.3 million. We had no delinquent mortgage loans at December 31, 2007 and no impaired mortgage loans at September 30, 2008 or December 31, 2007.

Real estate was \$13.8 million and \$18.2 million at September 30, 2008 and December 31, 2007, respectively. Investment real estate is carried at cost less accumulated depreciation. Real estate acquired through foreclosure is valued at fair value at the date of foreclosure and may be classified as investment real estate if it meets our

Table of Contents

investment criteria. If investment real estate is determined to be permanently impaired, the carrying amount of the asset is reduced to fair value. Occasionally, investment real estate is reclassified to real estate held for sale when it no longer meets our investment criteria. Real estate held for sale, which is valued net of a valuation allowance that reduces the carrying value to the lower of cost or fair value less estimated cost to sell, was \$2.3 million and \$8.9 million at September 30, 2008 and December 31, 2007, respectively.

We use a comprehensive rating system to evaluate the investment and credit risk of each mortgage loan and to identify specific properties for inspection and reevaluation. We establish an investment valuation allowance for mortgage loans based on a review of individual loans and the overall loan portfolio, considering the value of the underlying collateral. Investment valuation allowances for real estate held for sale are established based on a review of specific assets. If a decline in value of a mortgage loan or real estate investment is considered to be other than temporary or if the asset is deemed permanently impaired, the investment is reduced to estimated net realizable value, and the reduction is recognized as a realized investment loss. We monitor the risk associated with these invested asset portfolios and regularly review and adjust the investment valuation allowance. We had no valuation allowance for mortgage loans and real estate at September 30, 2008 or for mortgage loans at December 31, 2007. The valuation allowance for real estate was \$7.6 million December 31, 2007.

Derivative Financial Instruments

We use derivative financial instruments to manage reinvestment risk, duration, and currency risk. Historically, we have utilized interest rate futures contracts, current and forward interest rate swaps and options on forward interest rate swaps, current and forward currency swaps, interest rate forward contracts, forward treasury locks, currency forward contracts, and forward contracts on specific fixed income securities. All of these freestanding derivative transactions are hedging in nature and not speculative. Positions under our hedging programs for derivative activity that were open during the third quarter and first nine months of 2008 involved current and forward interest rate swaps, current and forward currency swaps, currency forward contracts, forward treasury locks, and options on forward interest rate swaps. Almost all hedging transactions are associated with the individual and group long-term care and the individual and group disability products. All other product portfolios are periodically reviewed to determine if hedging strategies would be appropriate for risk management purposes.

During the third quarters of 2008 and 2007, we recognized net losses of \$29.3 million and \$1.6 million, respectively, on the termination of cash flow hedges and reported those losses in other comprehensive income (loss). During the first nine months of 2008 and 2007, we recognized net gains of \$52.3 million and \$13.5 million, respectively, on the termination of cash flow hedges and reported \$54.3 million and \$13.4 million, respectively, in other comprehensive income (loss). During the first nine months of 2008 and 2007, we reported a net gain (loss) of \$(2.0) million and \$0.1 million as a component of realized investment gains and losses. We amortized \$5.2 million and \$3.5 million of net deferred gains into net investment income in the third quarters of 2008 and 2007, respectively, and \$16.1 million and \$16.5 million during the first nine months of 2008 and 2007, respectively.

Our current credit exposure on derivatives, which is limited to the value of those contracts in a net gain position less collateral held, was \$28.9 million at September 30, 2008. The carrying value of fixed maturity securities pledged as collateral to our counterparties was \$162.2 million at September 30, 2008. We believe that our credit risk is mitigated by our use of multiple counterparties, all of whom are rated A or better by both Moody's and S&P.

Additions and terminations, in notional amounts, to our hedging programs during the third quarter of 2008 were \$296.7 million and \$316.1 million, respectively, and in the third quarter of 2007 were \$80.5 million and \$271.5 million, respectively. Additions and terminations include roll activity, which is the closing out of an old contract and the initiation of a new one when a contract is about to mature but the need for it still exists. The notional amount of derivatives outstanding under the hedge programs was \$2,716.9 million at September 30, 2008 and \$2,985.7 million at December 31, 2007.

As of September 30, 2008 and December 31, 2007, we had \$1,295.0 million and \$1,645.0 million, respectively, notional amount of forward starting interest rate swaps outstanding to lock in the reinvestment rates on future anticipated cash flows through the year 2013 for certain of our long-term product portfolios.

Table of Contents

As of September 30, 2008 and December 31, 2007, we had \$296.9 million and \$333.5 million, respectively, notional amount of currency swaps and \$216.3 million notional amount of forward currency contracts outstanding to hedge the foreign currency risk associated with the U.S. dollar denominated debt issued by one of our U.K. subsidiaries.

As of September 30, 2008 and December 31, 2007, we had \$635.9 million and \$612.1 million, respectively, notional amount of open current and forward foreign currency swaps to hedge fixed income foreign dollar denominated securities.

Our freestanding derivatives all qualify as hedges under Statement of Financial Accounting Standards No. 133 (SFAS 133), *Accounting for Derivative Instruments and Hedging Activities*. Prior to the second quarter of 2008, all were designated as cash flow hedges. To the extent effective, changes in the fair value of cash flow hedges are reported in other comprehensive income and reclassified into earnings in the same period or periods during which the hedged items affect earnings. Any ineffective portion of a cash flow hedge is recognized in current earnings during the period of change in fair value. During the second and third quarters of 2008, we entered into \$174.0 million notional amount of receive variable, pay fixed interest rate swaps to hedge the changes in fair value of certain fixed rate securities held. These swaps effectively convert our fixed rate securities into floating rate securities, which are used to fund our floating rate long-term debt. These swaps were designated as fair value hedges under SFAS 133. As such, changes in the fair value of the derivatives, as well as the offsetting change in fair value on the hedged securities attributable to the risk being hedged, are reported as realized investment gains and losses during the period of change in fair value. We did not have any ineffectiveness with these hedges during the third quarter and first nine months of 2008.

We have invested in certain structured fixed maturity securities that contain embedded derivatives with a notional amount of \$98.8 million as of September 30, 2008 and December 31, 2007. These embedded derivatives represent forward contracts and are accounted for as cash flow hedges. The purpose of these forward contracts is to hedge the risk of changes in cash flows related to the anticipated purchase of certain equity securities in the years 2020 through 2022.

We also have embedded derivatives associated with modified coinsurance contracts. Those derivatives are not designated as hedging instruments, and the change in fair value is reported as a realized investment gain or loss during the period of change. Due to the change in fair value of these embedded derivatives, we recognized \$67.9 million and \$107.0 million of net realized investment losses during the third quarter and first nine months of 2008, respectively, and \$27.7 million and \$21.4 million of net realized investment losses during the third quarter and first nine months of 2007, respectively.

Other

Our exposure to non-current investments, on a fair value basis, totaled \$11.5 million and \$2.6 million at September 30, 2008 and December 31, 2007, respectively.

We use the repurchase agreement market as a source of short-term financing and had \$125.0 million outstanding at September 30, 2008. See further discussion under *Debt* as follows.

Liquidity and Capital Resources

Our liquidity requirements are met primarily by cash flows provided from operations, principally in our insurance subsidiaries. Premium and investment income, as well as maturities and sales of invested assets, provide the primary sources of cash. Debt and/or securities offerings provide an additional source of liquidity. Cash is applied to the payment of policy benefits, costs of acquiring new business (principally commissions), operating expenses, and taxes, as well as purchases of new investments. We have established an investment strategy that we believe will provide for adequate cash flows from operations.

Table of Contents

Our policy benefits are primarily in the form of claim payments, and we have minimal exposure to the policy withdrawal risk associated with deposit products such as individual life policies or annuities. A decrease in demand for our insurance products or an increase in the incidence of new claims or the duration of existing claims could negatively impact our cash flows from operations. Deterioration in the credit market, which could delay our ability to sell our positions in certain of our fixed maturity securities in a timely manner, could also negatively impact our cash flows. In light of the recent credit market turmoil, we have implemented a more conservative cash management strategy with respect to our securities lending and commercial paper programs. In addition, we have an unsecured revolving credit facility that we can utilize as needed to provide additional liquidity and financial flexibility. We believe our cash resources are sufficient to meet our liquidity requirements for the next 12 months.

During 2007, our board of directors authorized the repurchase of up to \$700.0 million of Unum Group's common stock. During January 2008, we repurchased approximately 14.0 million shares for \$350.0 million, using an accelerated share repurchase agreement. Under the terms of the repurchase agreement, we received a price adjustment based on the volume weighted average price of our common stock during the term of the agreement. The price adjustment resulted in the delivery to us of approximately 1.4 million additional shares. During August 2008, we repurchased approximately 12.5 million shares for \$350.0 million, using an accelerated share repurchase agreement with terms similar to the earlier agreement. The final settlement occurred during October 2008, with the price adjustment resulting in the delivery to us of approximately 2.0 million additional shares of our common stock. In total, we purchased 29.9 million shares of our common stock under the share repurchase program.

During 2008, we intend to retain sufficient capital in our traditional U.S. insurance subsidiaries to maintain a weighted average RBC ratio in excess of our stated long-term objective of 300 percent. We also intend to maintain our leverage ratio at or slightly below our target levels and maintain, as a minimum threshold, liquidity at our holding companies sufficient to cover one year of fixed charges (measured as interest expense plus common stock dividends). We expect that holding company liquidity will be in excess of this minimum threshold at the end of 2008.

Our cash flows from discontinued operations are combined with cash flows from continuing operations within each cash flow statement category in our consolidated statements of cash flows for the applicable periods. The absence of cash flows from discontinued operations has not, nor is it expected to, materially affect liquidity and capital resources.

Operating Cash Flows

Net cash provided by operating activities was \$1,021.6 million for the nine months ended September 30, 2008, compared to \$1,255.3 million for the comparable period of 2007. Operating cash flows are primarily attributable to the receipt of premium and investment income, offset by payments of claims, commissions, expenses, and income taxes. Premium income growth is dependent not only on new sales, but on renewals of existing business, renewal price increases, and stable persistency. Investment income growth is dependent on the growth in the underlying assets supporting our insurance reserves and on the level of portfolio yield rates. Increases in commissions and operating expenses are attributable primarily to new sales growth and the first year acquisition expenses associated with new business. The level of paid claims is due partially to the growth and aging of the block of business and also to the general economy, as previously discussed in the operating results by segment. Included in operating cash flows for the nine months ended September 30, 2008 and 2007 are voluntary pension contributions to our U.S. qualified defined benefit plan of \$55.0 million and \$110.0 million, respectively. We also had increased cash inflows of approximately \$211.4 million in the third quarter of 2007 due to the reinsurance recapture of a small block of individual disability business.

Investing Cash Flows

Investing cash inflows consist primarily of the proceeds from the sales and maturities of investments. Investing cash outflows consist primarily of payments for purchases of investments. Net cash used by investing activities was \$200.8 million for the nine months ended September 30, 2008 compared to \$1,253.6 million for the comparable period of 2007.

Table of Contents

We had higher proceeds from sales and maturities of available-for-sale securities in the first nine months of 2008 compared to the first nine months of 2007 primarily due to an increase in sales of fixed maturity securities and an increase in bonds that were called at par, partially offset by a lower level of proceeds from mortgage-backed securities prepayments. Proceeds from sales and maturities of other investments decreased in the first nine months of 2008 primarily due to lower proceeds from the sale of common stock investments and a reduction in principal payments received on our commercial mortgage loans. This reduction in cash flows received on other investments was partially offset by higher proceeds in 2008 from terminations of derivatives within our cash flow hedging programs.

Purchases of available-for-sale securities increased during the first nine months of 2008 relative to the prior year first nine months. The increase resulted in part from more funds available for reinvestment as compared to the prior year because of the higher level of proceeds from sales and calls, as noted in the preceding paragraph. Additionally, during the first half of 2008, we continued to transition out of short-term investments into floating rate fixed maturity securities to support the floating rate debt issued during the fourth quarter of 2007. Purchases for 2007 included the investing of the net cash inflows of \$98.8 million from the sale of GENEX and the \$211.4 million cash inflows from the reinsurance recapture.

Net sales of short-term investments increased during the first nine months of 2008 due in part to the sale of investments to fund the \$700.0 million accelerated share repurchase agreements executed one half in each of January and August 2008, as well as the previously mentioned transition to floating rate fixed maturity securities in lieu of short-term investments. During the second quarter of 2007, a portion of the proceeds from the issuance of the 17.7 million shares of common stock was invested in short-term investments, thereby contributing to the higher purchase of short-term investments in 2007. Also, during the third quarter of 2007, there was an increase in net purchases of short-term investments to provide liquidity needed for the capital redeployment plan announced in the fourth quarter of 2007 in conjunction with the issuance of the Northwind Holdings debt.

As previously discussed, proceeds from acquisitions relate to the second quarter of 2008 Unum UK acquisition of a group long-term disability claims portfolio. The proceeds from dispositions in 2007 relate to the sale of GENEX.

Financing Cash Flows

Financing cash flows consist primarily of borrowings and repayments of debt, issuance or repurchase of common stock, and dividends paid to stockholders. Net cash used by financing activities was \$914.4 million for the nine months ended September 30, 2008 compared to net cash provided of \$20.2 million for the comparable period of 2007. As discussed previously, during the first nine months of 2008, we completed our \$700.0 million authorized share repurchase program using an accelerated share repurchase agreement.

During the second quarter of 2008, we retired the remaining \$175.0 million of our 5.997% senior notes. At the end of the third quarter of 2008, we held \$275.0 million of short-term debt, \$125.0 million of which was borrowed during 2008. The remaining \$150.0 million represents debt previously classified as long-term but which now has a maturity date within one year after the date of our balance sheet.

During the first nine months of 2008 and 2007, we purchased and retired \$36.6 million and \$34.5 million, respectively, aggregate principal amount of our outstanding 6.85% notes due 2015.

During the first nine months of 2008 and 2007, Tailwind Holdings made principal payments on its floating rate, senior secured non-recourse notes due 2036 of \$7.5 million and \$15.0 million, respectively. During the first nine months of 2008, Northwind Holdings made principal payments of \$35.7 million on its floating rate, senior secured non-recourse notes due 2037.

During the first quarter of 2007, we purchased \$150.0 million, aggregate principal amount of the remarketed senior note element of the 2004 units, which were subsequently retired.

Table of Contents

During the second quarter of 2007, we received proceeds of approximately \$300.0 million and issued 17.7 million shares of common stock upon the settlement of the common stock purchase contract element of the 2004 units.

See *Debt* as follows for further information.

Cash Available from Subsidiaries

Unum Group and certain of its intermediate holding company subsidiaries and/or finance subsidiaries depend on payments from subsidiaries to pay dividends to stockholders, to pay debt obligations, and/or to pay expenses. These payments by our insurance and non-insurance subsidiaries may take the form of interest payments on loans from the parent to a subsidiary, operating and investment management fees, and/or dividends.

Restrictions under applicable state insurance laws limit the amount of ordinary dividends that can be paid to a parent company from its insurance subsidiaries in any 12-month period without prior approval by regulatory authorities. For life insurance companies domiciled in the United States, that limitation generally equals, depending on the state of domicile, either ten percent of an insurer's statutory surplus with respect to policyholders as of the preceding year end or the statutory net gain from operations, excluding realized investment gains and losses, of the preceding year.

The payment of ordinary dividends to a parent company from its insurance subsidiaries is generally further limited to the amount of statutory surplus as it relates to policyholders. Based on the restrictions under current law, during 2008, \$626.5 million is available for the payment of ordinary dividends to Unum Group from its traditional U.S. insurance subsidiaries, excluding Northwind Reinsurance Company and Tailwind Reinsurance Company.

Unum Group and/or certain of its finance subsidiaries may also receive dividends from its United Kingdom-based affiliate, Unum Limited, subject to applicable insurance company regulations and capital guidance in the United Kingdom. Approximately £202.1 million is available for the payment of dividends from Unum Limited during 2008, subject to regulatory approval.

The ability of Unum Group and certain of its intermediate holding company subsidiaries and/or finance subsidiaries to continue to receive dividends from their insurance subsidiaries without regulatory approval generally depends on the level of earnings of those insurance subsidiaries as calculated under law. In addition to regulatory restrictions, the amount of dividends that may be paid by insurance subsidiaries will depend on additional factors, such as RBC ratios, funding growth objectives at an affiliate level, and maintaining appropriate capital adequacy ratios to support desired ratings. Insurance regulatory restrictions do not limit the amount of dividends available for distribution from non-insurance subsidiaries except where the non-insurance subsidiaries are held directly or indirectly by an insurance subsidiary and only indirectly by Unum Group.

Debt

At September 30, 2008, we had long-term debt, including senior secured notes and junior subordinated debt securities, totaling \$2,285.4 million and short-term debt of \$275.0 million. Short-term debt consisted of \$150.0 million 5.859% senior notes due May 2009 and \$125.0 million of reverse repurchase agreements. The reverse repurchase agreements were entered into during the third quarter of 2008, with a weighted average interest rate of 3.65 percent and a maturity date of October 27, 2008. Our leverage ratio, when calculated excluding the non-recourse debt and associated capital of Tailwind Holdings and Northwind Holdings was 21.4 percent at September 30, 2008, consistent with December 31, 2007. Our leverage ratio, when calculated using consolidated debt to total consolidated capital, was 26.4 percent at September 30, 2008 and December 31, 2007.

During the second quarter of 2008, we retired the remaining \$175.0 million of our 5.997% senior notes. During the first nine months of 2008, we made principal payments of \$35.7 million and \$7.5 million on our senior secured non-recourse variable rate notes issued by Northwind Holdings and Tailwind Holdings, respectively. We also purchased and retired \$36.6 million of our 6.85% senior debentures due 2015.

See *Debt* in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2007, for further discussion.

Table of Contents*Commitments and Off-Balance Sheet Arrangements*

With respect to our commitments and off-balance sheet arrangements, see the discussions under *Commitments* and *Off-Balance Sheet Arrangements* in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2007. During the first nine months of 2008, there were no substantive changes in our commitments, contractual liabilities, or other off-balance sheet arrangements.

Ratings

A.M. Best Company (AM Best), Fitch Ratings (Fitch), Moody's Investors Service (Moody's), and Standard & Poor's Corporation (S&P) are among the third parties that assign issuer credit ratings to Unum Group and financial strength ratings to our insurance subsidiaries. Issuer credit ratings reflect an agency's opinion of the overall financial capacity of a company to meet its senior debt obligations. Financial strength ratings are specific to each individual insurance subsidiary and reflect each rating agency's view of the overall financial strength (capital levels, earnings, growth, investments, business mix, operating performance, and market position) of the insuring entity and its ability to meet its obligations to policyholders. Both the issuer credit ratings and financial strength ratings incorporate quantitative and qualitative analyses by rating agencies and are routinely reviewed and updated on an ongoing basis.

We compete based in part on the financial strength ratings provided by rating agencies. A downgrade of our financial strength ratings can be expected to adversely affect us and could potentially, among other things, adversely affect our relationships with distributors of our products and services and retention of our sales force, negatively impact persistency and new sales, particularly large case group sales and individual sales, and generally adversely affect our ability to compete. A downgrade in the issuer credit rating assigned to Unum Group can be expected to adversely affect our cost of capital or our ability to raise additional capital.

The table below reflects the issuer credit ratings for Unum Group and the financial strength ratings for each of our traditional insurance subsidiaries as of the date of this filing.

	AM Best	Fitch	Moody's	S&P
Issuer Credit Ratings	bbb- (Good)	BBB- (Good)	Ba1 (Speculative)	BBB- (Good)
Financial Strength Ratings				
Provident Life & Accident	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	A- (Strong)
Provident Life & Casualty	A- (Excellent)	A- (Strong)	Not Rated	Not Rated
Unum Life of America	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	A- (Strong)
First Unum Life	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	A- (Strong)
Colonial Life & Accident	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	A- (Strong)
Paul Revere Life	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	A- (Strong)
Paul Revere Variable	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	Not Rated
Unum Limited	A- (Excellent)	Not Rated	Not Rated	A- (Strong)

We maintain an ongoing dialogue with the four rating agencies that evaluate us in order to inform them of progress we are making regarding our strategic objectives and financial plans, as well as other pertinent issues. A significant component of our communications involves an annual review meeting; included as well are other meetings not limited to quarterly updates regarding our business. During the second quarter of 2008, we held our annual review meetings with S&P and Moody's. During late October 2008, we held our annual review meeting with AM Best. We plan to hold our annual review meeting with Fitch in early November 2008.

Table of Contents

On January 29, 2008, AM Best reaffirmed the ratings of Unum Group and its operating subsidiaries and upgraded the outlook from negative to stable. The agency's revised outlook was attributed to our increased financial flexibility, the quality of our investment portfolio, the operational execution of our operating segments, and the completion of the claim reassessment process. On February 4, 2008, Fitch revised its outlook for Unum Group and its operating subsidiaries to positive from stable, citing our progress in increasing profitability and decreasing risk along with our improved capitalization levels as the basis for the upgrade. On February 14, 2008, Moody's revised its outlook for Unum Group and its operating subsidiaries to stable from negative, basing its revision on the overall improvement in our financial flexibility.

On July 17, 2008, S&P raised its counterparty credit and senior unsecured debt rating on Unum Group from BB+ to BBB- and raised its counterparty credit and financial strength ratings on Unum Group's insurance subsidiaries from BBB+ to A-. S&P stated that the rating actions reflect our maintenance of our market position, improved insurance risk profile, operating profitability, enhanced investments quality, and stronger capitalization through statutory earnings.

There have been no other changes in any of the rating agencies' outlook statements or ratings during the period January 1, 2008 to the date of this filing.

Agency ratings are not directed toward the holders of our securities and are not recommendations to buy, sell, or hold our securities. Each rating is subject to revision or withdrawal at any time by the assigning rating organization, and each rating should be regarded as an independent assessment, not conditional on any other rating. Given the dynamic nature of the ratings process, changes by these or other rating agencies may or may not occur in the near-term.

See our annual report on Form 10-K for the year ended December 31, 2007, for further information regarding our debt and financial strength ratings and the risks associated with rating changes.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to various market risk exposures including interest rate risk and foreign exchange rate risk. With respect to our exposure to market risk, see the discussion under "Investments" in Item 2 of this Form 10-Q and in Part II, Item 7A of our annual report on Form 10-K for the year ended December 31, 2007. During the first nine months of 2008, there was no substantive change to our market risk or the management of this risk.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this quarterly report. Based on that evaluation, these officers concluded that our disclosure controls and procedures were effective as of September 30, 2008.

Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended, during the quarter ended September 30, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

In the ordinary course of business, our internal control over financial reporting changes as we modify and enhance our processes and information technology systems to meet changing needs and increase our efficiency. Any significant changes in internal controls are evaluated prior to implementation to help maintain the continued effectiveness of our internal control. While changes have occurred in our internal controls during the quarter ended September 30, 2008, there were no changes that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II****ITEM 1. LEGAL PROCEEDINGS**

Refer to Part I, Item 1, Note 8 of the Notes to Consolidated Financial Statements for information on legal proceedings.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in our annual report on Form 10-K for the year ended December 31, 2007.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information about our share repurchase activity for the third quarter of 2008:

	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Program (1) (2) (3)	(d) Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (1) (2) (3)
July 1 - July 31, 2008		\$		\$ 350,000,000
August 1 - August 31, 2008	12,500,000	24.17	12,500,000	
September 1 - September 30, 2008				
Total	12,500,000		12,500,000	

- (1) On October 31, 2007, we announced that our board of directors authorized the repurchase of up to \$700.0 million of Unum Group's common stock.
- (2) On January 31, 2008, we repurchased 14,000,000 shares of Unum Group's common stock for \$350.0 million using an accelerated share repurchase agreement. Under the terms of the repurchase agreement, we were to receive, or be required to pay, a price adjustment based on the volume weighted average price of Unum Group common stock during the term of the agreement. Any price adjustment payable to us was to be settled in shares of our common stock. Any price adjustment we would have been required to pay would have been settled in either cash or common stock. A 30 percent partial acceleration of the agreement, 4,200,000 shares, occurred on March 26, 2008 and settled on March 28, 2008 with the price adjustment resulting in the delivery to us of 482,483 additional shares of our common stock. The remaining 9,800,000 shares settled on May 29, 2008, with the price adjustment resulting in the delivery to us of 913,707 additional shares. In total, we repurchased 15,396,190 shares of our common stock under this agreement for an average price paid per share of \$22.73.
- (3) On August 4, 2008, we repurchased 12,500,000 shares of Unum Group's common stock for \$350.0 million using an accelerated share repurchase agreement. Under the terms of the repurchase agreement, we were to receive, or be required to pay, a price adjustment based on the volume weighted average price of Unum Group common stock during the term of the agreement. Any price adjustment payable to us was to be settled in shares of our common stock. Any price adjustment we would have been required to pay would have been settled in either cash or common stock. A 50 percent partial acceleration of the agreement, 6,250,000 shares, occurred on October 7, 2008 and settled on October 10, 2008 with the price adjustment resulting in the delivery to us of 980,886 additional shares of our common stock. The remaining 6,250,000 shares settled on October 14, 2008, with the price adjustment resulting in the delivery to us of 1,000,896 additional shares. In total, we repurchased 14,481,782 shares of our common stock under this agreement for an average price paid per share of \$24.17.
