Diluted EPS Before Restructuring and Exceptional Items	\$ 1.33	\$ 0.59	125%

**BURR RIDGE, IL** (July 25, 2011) CNH Global N.V. (NYSE: CNH) today announced financial results for the quarter ended June 30, 2011. For the quarter, net sales increased 24% (18% on a constant currency basis) to \$4.9 billion as a result of favorable trading conditions for agricultural equipment, as well as higher comparative construction equipment demand in every region. Equipment Operations posted an Operating Profit of \$521 million as a result of higher revenues, increased industrial utilization and improved product pricing.

Net equipment sales for the quarter were 79% agricultural equipment and 21% construction equipment. The geographical distribution of revenue for the period was 42% North America, 35% EAME & CIS, 15% Latin America, and 8% APAC markets.

Year to date capital expenditures totaled \$126 million, a 40% increase from the comparable prior period largely as a result of new product launches in both the agricultural and construction equipment segments; 71% of the capital spend was on new products and production capacity in the period. Equipment Operations generated \$232 million of operating cash flow during the first six months of the year as net sales levels and operating performance more than offset the increased net working capital needed to support business activity. CNH's Equipment Operations ended the period with a net cash position of \$2.4 billion. The 34% effective tax rate for the second quarter of 2011 (49% second quarter of 2010) is within the Group's full year expectations of 32% to 38%.

Net income before restructuring and exceptional items for the quarter was \$320 million as a result of improved top line and industrial operating performance, improved results from the Group's unconsolidated subsidiaries, and a lower tax rate. This resulted in the Group generating a significant increase in diluted earnings per share to \$1.33 (before restructuring and exceptional items) compared to \$0.59 per share in the comparable period of 2010.

On April 26, CNH announced its plans to set up a local manufacturing site in Cordoba, Argentina for the production of combines and tractors for the Latin American market. The initial investment of over \$100 million will include the launch of new, localized product lines and the expansion of the Fiat Industrial complex in Cordoba.

### **2011 Full Year Market Outlook**

Demand in the agricultural and construction equipment markets is expected to remain firm for the balance of 2011 on the back of a positive environment in agricultural commodity prices and the consequent increase in planting and farming income estimates. Further, the environment for construction equipment continues to improve.

FY 2011 World Wide Unit Growth Forecast

Agricultural equipment demand up 5% to 10%

Construction equipment demand up 25% to 30%

### **2011 CNH Earnings Outlook:**

On the back of the year to date operating performance, and in view of the outlook for its markets for the balance of 2011, the CNH Group is upgrading its full year financial targets as follows: full year revenue growth of 15-20% and an operating margin at the upper end of its previously disclosed range of 7.1% to 7.9%.

**SEGMENT RESULTS****Agricultural Equipment**

	Quarter Ended		Change
	6/30/2011	6/30/2010	
	(US \$ in millions, except percentages)		
Net Sales of Equipment	\$ 3,851	\$ 3,148	22%
Gross Profit	\$ 850	\$ 644	32%
Gross Margin	22.1%	20.5%	1.6pts
Operating Profit	\$ 496	\$ 317	56%
Operating Margin	12.9%	10.1%	2.8pts

**Agricultural Equipment Industry and Market**

Worldwide agricultural industry unit sales increased 13% compared to the second quarter of 2010. Global tractor sales grew 13% while global combine sales grew 17% for the quarter. North American tractor sales were down 3%, with the high horsepower 4WD class up 1%, and combine sales were down 14%, partially offsetting the strong market growth of the first quarter, and maintaining a 7% growth on a year to date basis. Latin America sales of tractors decreased 5% and combine sales increased 58%. EAME & CIS markets improved for the quarter, with tractor and combine sales up 30%. APAC markets were up 15% in tractor sales and flat in combine sales.

**CNH Agricultural Equipment Second Quarter Results**

CNH's net sales in the agricultural equipment sector increased 22% for the quarter (16% on a constant currency basis) as a result of solid trading conditions in every region. Net sales in the EAME & CIS markets continued their positive growth trajectory with comparative reported revenue up 40% on the back of firm demand across all product segments. As a result of this increased unit volume in Europe and the CIS, comparative industrial capacity utilization increased driving positive cost absorption. This benefit coupled with improved price realization and favorable product mix (to larger horsepower tractor and combine segments) resulted in a 2.8 percentage point increase in comparative operating margin to 12.9% for the period.

Second quarter tractor market share performance was in line with the overall market growth as a result of a positive performance in Europe, and in the important over 40 hp segment in North America driven by very good market response to the introduction of high horsepower tractors and combines equipped with the FPT Selective Catalytic Reduction (SCR) Tier 4A/Stage IIIB engines delivering increased power and reduced fuel consumption and overall operating costs compared to equivalent CNH Tier 3 equipment. Combine market share recovered in the second quarter in the North American and EAME & CIS regions. Industrial production and retail sales were closely aligned during the period with resulting company and dealer inventory levels remaining largely unchanged.

In Latin America, New Holland Agriculture launched the new CR6080, the only class 6 combine manufactured in Brazil, equipped with a 300 hp engine, a 9,000 liters grain tank and the segment's largest cab. The brand also introduced the new T8 tractor range, from 273 to 389 hp, the industry's highest horsepower tractors produced in Brazil, focused on cash grain and sugar cane business and equipped with the SideWinder II armrest with fully integrated ergonomic controls for precision farming solutions, as well as the TL Exitus tractor ideal for spraying applications. The New Holland product offering has been expanded by the new SP3500 sprayer. In Europe the brand introduced a new hydraulic Powershuttle transmission on the TD5000 tractor, ideal for loader work and for fast directional changes.

In North America, Case IH began shipments of Tier 4A/Stage IIIB compliant Steiger/Quadrac 550 600 hp series tractors with best-in-class fuel efficiency and hydraulic flow, as well as the Module Express 635 Cotton Picker now equipped with a 400 hp engine. In addition, Case IH sugar cane harvesters were honored with the Top of Mind award by the Brazilian trade publication Revista Rural. In Europe, the Steyr Tractor brand launched the Kompakt S series, while Case IH launched the AFS Pro model 700 monitors in all EfficientPower tractor models.

The Case IH Puma CVX EP and The New Holland T8.390 are two of the finalists for the Tractor of the Year 2012 award assigned by a panel of industry magazines representing 20 European countries.

### Construction Equipment

	Quarter Ended		Change
	6/30/2011	6/30/2010	
	(US \$ in millions, except percentages)		
Net Sales of Equipment	\$ 1,030	\$ 790	30%
Gross Profit	\$ 138	\$ 117	18%
Gross Margin	13.4%	14.8%	1.4pts
Operating Profit	\$ 25	\$ 13	92%
Operating Margin	2.4%	1.6%	0.8pts

### Construction Equipment Industry and Market

Global construction equipment industry unit sales rose 24% in the second quarter compared to the prior year, with light equipment up 29% and heavy equipment up 20%. North American demand was up 37%, for both light and heavy equipment. EAME & CIS markets rose 33% as the industry continued to rebuild from the prior year's low levels. In Latin America, the market was up 27%, driven by strong demand from projects in both the public and private sectors. Industry sales in APAC markets grew 16%.

### CNH Construction Equipment Second Quarter Results

Second quarter 2011 net sales in the construction equipment sector grew 30% (24% on a constant currency basis) as a result of market improvements in every region and in particular in the North American market. Operating profit improved 92% for the quarter to \$25 million as a result of unit demand of newly launched products in the light and heavy equipment segments,

increased industrial utilization, and positive comparative pricing. This positive performance was more than enough to offset the impact of tight supply conditions of Japanese supplied components and wholegoods during the quarter negatively impacting equipment availability and industrial efficiency. The Group expects that this situation will improve over the balance of the year.

Second quarter market share was down in light equipment due to low inventory levels as a result of slower than expected introduction of new key products started in the previous quarters. In the month of June, retail sales of these new products have increased and the Company believes that this trend will continue in the second half of the year leading to a more normalized share position. The Company maintained its market share in the heavy equipment segment.

Company and dealer inventories ended the period higher than in the first quarter as production rates of newly launched products continued to improve allowing the company to begin to restock the dealer network from low levels in the first quarter.

During the second quarter of 2011 Case Construction launched the new locally manufactured B-series motor graders in the Latin American markets. In North America the Case 850L crawler dozer, the Case 580M loader/backhoe, the Case 440 Series 3 skid steer loader and the Case 621E wheel loader were recognized as Contractor's Choice machines for 2011 by Road & Bridges magazine.

New Holland Construction launched its new 200 Series of skid steer loaders (SSL) and compact track loaders (CTL), for a total of nine SSL and three CTL in the African, Middle East and CIS markets. The 200 Series features both radial-lift and vertical-lift models to better satisfy contractors' needs.

### CNH Financial Services Second Quarter Results

	Quarter Ended		Change
	6/30/2011	6/30/2010	
	(US \$ in millions, except percentages)		
Net Income	\$ 52	\$ 33	58%
On-Book Asset Portfolio	\$ 15,642	\$ 14,519	8%
Managed Asset Portfolio	\$ 18,449	\$ 16,998	9%

Net Income attributable to Financial Services was \$52 million for the quarter, compared with \$33 million in the comparable period of 2010. Financial Services generated improved financial margins on a higher average portfolio as a result of increased industrial units sales and improved funding costs. Risk cost provisions were lower as past due amounts continued to decline.

Compared to December 31, 2010, delinquent receivables greater than 30 days past due amounts declined to 4.5% of the total managed portfolio, an improvement of 0.7 percentage points. Past dues have improved 1.5 percentage points compared to June 30, 2010.

### Unconsolidated Equipment Operations Subsidiaries

Second quarter results for the Group's unconsolidated Equipment Operations subsidiaries improved to \$35 million compared with \$21 million in the comparable period of 2010. The major contributors were Turk Tractor (Turkey), Al Ghazi (Pakistan), and the Group's two joint ventures in Japan.

**CNH CONFERENCE CALL AND WEBCAST**

CNH management will hold a conference call on July 25, 2011 to review second quarter 2011 results. The conference call webcast will begin at 9:00 a.m. U.S. Central Daylight Savings Time; 10:00 a.m. U.S. Eastern Daylight Savings Time. This call can be accessed through the investor information section of the company's website at [www.cnh.com](http://www.cnh.com) and will be transmitted by CCBN.

**NON-GAAP MEASURES**

*CNH utilizes various figures that are Non-GAAP Financial Measures as this term is defined under Regulation G as promulgated by the SEC. In accordance with Regulation G, CNH has detailed either the computation of these measures from multiple U.S. GAAP figures or reconciled these non-GAAP financial measures to the most relevant U.S. GAAP equivalent in the accompanying tables to this press release. Some of these measures do not have standardized meanings and investors should consider that the methodology applied in calculating such measures may differ among companies and analysts. CNH's management believes these non-GAAP measures provide useful supplementary information to investors in order that they may evaluate CNH's financial performance using the same measures used by our management. These non-GAAP financial measures should not be considered as a substitute for, nor superior to, measures of financial performance prepared in accordance with U.S. GAAP.*

*CNH defines Equipment Operations Gross Profit as net sales of equipment less costs classified as cost of goods sold. CNH defines Equipment Operations Operating Profit as gross profit less costs classified as selling, general and administrative and research and development costs. CNH defines Equipment Operations Gross Margin as gross profit as a percent of net sales of equipment. CNH defines Equipment Operations Operating Margin as operating profit as a percent of net sales of equipment. Net Debt (Cash) is defined as total debt (including intersegment debt) less cash and cash equivalents, deposits in Fiat Industrial affiliates cash management system and intersegment notes receivable. CNH defines Net income (loss) and diluted EPS before restructuring and exceptional items as Net income (loss) attributable to CNH, less restructuring charges and exceptional items, after tax. Equipment Operations working capital is defined as accounts and notes receivable and other-net, excluding intersegment notes receivables, plus inventories less accounts payable. The U.S. dollar computation of cash generated from working capital, as defined, is impacted by the effect of foreign currency translation and other non-cash transactions. CNH defines the change in net sales on a constant currency basis as the difference between prior year actual net sales and current year net sales translated at prior year average exchange rates. Elimination of the currency translation effect provides constant comparisons without the distortion of currency rate fluctuations.*

**FORWARD-LOOKING STATEMENTS**

*This press release includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this press release, including statements regarding our competitive strengths, business strategy, future*

*financial position, operating results, budgets, projected costs and plans and objectives of management, are forward-looking statements. These statements may include terminology such as may, will, expect, could, should, intend, estimate, anticipate, believe, outlook, continue, remain, on track, goal, or similar terminology.*

*Our outlook is predominantly based on our interpretation of what we consider key economic assumptions and involves risks and uncertainties that could cause actual results to differ. Crop production and commodity prices are strongly affected by weather and can fluctuate significantly. Housing starts and other construction activity are sensitive to the availability of credit and to interest rates and government spending. Some of the other significant factors which may affect our results include general economic and capital market conditions, the cyclical nature of our business, customer buying patterns and preferences, foreign currency exchange rate movements, our hedging practices, our customers' access to credit, restrictive covenants in our debt agreements, actions by rating agencies concerning the ratings of our debt securities and asset backed securities, risks related to our relationship with Fiat Industrial S.p.A., the effect of the demerger transaction consummated by Fiat S.p.A. pursuant to which CNH was separated from Fiat S.p.A.'s automotive business and has become a subsidiary of Fiat Industrial S.p.A, political uncertainty and civil unrest or war in various areas of the world, pricing, product initiatives and other actions by competitors, disruptions in production capacity, excess inventory levels, the effect of changes in laws and regulations (including those related to tax, healthcare, retiree benefits, government subsidies and international trade), the results of legal proceedings, technological difficulties, results of our research and development activities, changes in environmental laws, employee and labor relations, pension and health care costs, relations with and the financial strength of dealers and critical suppliers, the cost and availability of supplies from our suppliers, raw material costs and availability, energy prices, real estate values, animal diseases, crop pests, harvest yields, government farm programs and consumer confidence, housing starts and construction activity, concerns related to modified organisms and fuel and fertilizer costs. Additionally, our achievement of the anticipated benefits of our margin improvement initiatives depends upon, among other things, industry volumes as well as our ability to effectively rationalize our operations and to execute our brand strategy. Further information concerning factors that could significantly affect expected results is included in our annual report on Form 20-F for the year ended December 31, 2010.*

*We can give no assurance that the expectations reflected in our forward-looking statements will prove to be correct. Our actual results could differ materially from those anticipated in these forward-looking statements. All written and oral forward-looking statements attributable to us are expressly qualified in their entirety by the factors we disclose that could cause our actual results to differ materially from our expectations. We undertake no obligation to update or revise publicly any forward-looking statements.*

CNH Global N.V. Second Quarter and First Half 2011 Conference Call July 25, 2011

Forward Looking Statement

3

CNH Global N.V. Second Quarter and First Half 2011 Conference Call July 25, 2011

This presentation includes "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this presentation, including statements regarding our competitive strengths, business strategy, future financial position, operating results, budgets, projected costs and plans and objectives of management are forward-looking statements. These statements may include terminology such as "may," "will," "expect," "could," "should," "estimate," "anticipate," "believe," "outlook," "continue," "remain," "on track," "goal," or similar terminology.

Our outlook is predominantly based on our interpretation of what we consider key economic assumptions and involves risks and uncertainties that could cause actual results to differ. Crop production and commodity prices are strongly affected by weather and

fluctuate significantly. Housing starts and other construction activity are sensitive to the availability of credit and to interest rate movements and government spending. Some of the other significant factors which may affect our results include general economic and capital market conditions, the cyclical nature of our business, customer buying patterns and preferences, foreign currency exchange rate movements, hedging practices, our customers' access to credit, restrictive covenants in our debt agreements, actions by rating agencies concerning the ratings of our debt securities and asset backed securities, risks related to our relationship with Fiat Industrial S.p.A., the effect of the demerger transaction consummated by Fiat S.p.A. pursuant to which CNH was separated from Fiat S.p.A.'s automotive business, the fact that CNH became a subsidiary of Fiat Industrial S.p.A, political uncertainty and civil unrest or war in various areas of the world, pricing, marketing initiatives and other actions by competitors, disruptions in production capacity, excess inventory levels, the effect of changes in government regulations (including those related to tax, healthcare, retiree benefits, government subsidies and international trade), the result of legal proceedings, technological difficulties, results of our research and development activities, changes in environmental laws, employment and labor relations, pension and health care costs, relations with and the financial strength of dealers and critical suppliers, the cost of production, the availability of supplies from our suppliers, raw material costs and availability, energy prices, real estate values, animal diseases, crop harvest yields, government farm programs and consumer confidence, housing starts and construction activity, concerns related to global climate change, organisms and fuel and fertilizer costs. Additionally, our achievement of the anticipated benefits of our margin improvement program depends upon, among other things, industry volumes as well as our ability to effectively rationalize our operations and to execute our strategy. Further information concerning factors that could significantly affect expected results is included in our annual report for the year ended December 31, 2010.

We can give no assurance that the expectations reflected in our forward-looking statements will prove to be correct. Our actual results could differ materially from those anticipated in these forward-looking statements. All written and oral forward-looking statements attributable to us are expressly qualified in their entirety by the factors we disclose that could cause our actual results to differ from our expectations. We undertake no obligation to update or revise publicly any forward-looking statements.

### Highlights

Net Sales increase of 24% to \$4.9 billion in the second quarter and up 21% to \$8.7 billion for the first six months

Agricultural equipment +22% in the second quarter and +20% for the first six months

Construction equipment +30% in the second quarter and 25% for the first six months  
Equipment Operations Operating Profit of \$521 million, an increase of 58%

Operating Margin increased to 10.7% compared to 8.4% in Q2 2010

Equipment Operations  
Operating  
Profit\*  
Evolution

First  
Half

Higher volumes and increased industrial utilization, particularly in Europe and the CIS, and better product mix

Improved pricing, in particular on newly launched products in the CE light and heavy equipment and the high hp Tier 4 equipped tractors and combines

Production cost increased on product launch costs and tight supply conditions of Japanese components and wholegoods

R&D increased as a result of T4 compliance programs and new product launches across the portfolio

CNH Global N.V. Second Quarter and First Half 2011 Conference Call July 25, 2011

In this report, management estimates of market share information are generally based on retail unit data in North America, on registrations of equipment in most of Europe, Brazil, and various Rest of World markets and on retail and shipment unit data collected by a central information bureau appointed by equipment manufacturers associations including the Association of Equipment Manufacturers in North America, the Committee for European Construction Equipment in Europe, the ANFAVE in Brazil, the Japan Construction Equipment Manufacturers Association and the Korea Construction Equipment Manufacturers Association, as well as on other shipment data collected by an independent service bureau.

Not all agricultural or construction equipment is registered, and registration data may thus underestimate, perhaps substantially actual retail industry unit sales demand, particularly for local manufacturers in China, Southeast Asia, Eastern Europe, Russia, Turkey, Brazil and any country where local shipments are not reported .

In addition, there may also be a period of time between the shipment, delivery, sale and/or registration of a unit, which must be estimated, in making any adjustments to the shipment, delivery, sale, or registration data to determine our estimates of retail unit data in any period.

Non-GAAP Measures

30

CNH Global N.V. Second Quarter and First Half 2011 Conference Call July 25, 2011

Non-GAAP Measures  
CNH  
utilizes  
various  
figures  
that  
are  
Non-GAAP  
Financial  
Measures

as  
this  
term  
is  
defined  
under

Regulation G as promulgated by the SEC. In accordance with Regulation G, CNH has detailed either the computation of these financial measures from multiple U.S. GAAP figures or reconciled these non-GAAP financial measures to the most relevant U.S. GAAP equivalent in the accompanying tables in this presentation. Some of these measures do not have standardized meanings and investors should consider that the methodology applied in calculating such measures may differ among companies and analysts. CNH's management believes these non-GAAP measures provide useful supplementary information to investors in order that they may evaluate CNH's financial performance using the same measures used by our management. These non-GAAP financial measures should not be considered as a substitute for, nor superior to, measures of financial performance prepared in accordance with U.S. GAAP.

Non-GAAP measures include:

Net Income Before Restructuring and Exceptional Items

Operating Profit

Net Debt (Cash)

31

CNH Global N.V. Second Quarter and First Half 2011 Conference Call July 25, 2011

Net Income Before Restructuring and  
Exceptional Items  
32  
CNH  
defines  
net  
income  
before  
restructuring  
and

exceptional  
item  
as  
net  
income  
attributable

to  
CNH,  
less restructuring charges and exceptional items, after tax. Exceptional items include charges or income  
that may mask underlying operating results. We believe that net income before restructuring and  
exceptional items is a useful figure for measuring the performance of our operations.

Equipment Operations Operating Profit

CNH defines Equipment Operations Gross Profit as net sales less of equipment cost of goods sold. CNH defines Equipment Operations Operating Profit as Gross Profit less selling, general and administrative and research and development costs. Operating Margin is Operating Profit expressed as a percentage of net sales of equipment. The following table summarizes the computation of Equipment Operations Gross and Operating Profit for all periods presented:

33
