Item 1.01 Entry into a Material Agreement.

On August 1, 2011, DCP Midstream Partners, LP (the Partnership) entered into a Gas Processing Contract (the Agreement) with DCP Midstream, LP (Midstream), which requires the Partnership to construct a 200 MMcf/day cryogenic natural gas processing plant in the Eagle Ford shale in Texas (the Eagle Plant). Midstream is an affiliate of DCP Midstream, LLC, the owner of the Partnership 's general partner. The terms of the Agreement also provide that Midstream will pay a fixed demand charge to the Partnership for 150 MMcf/d along with a throughput fee on all volumes processed for a term of 15 years commencing with commercial operations of the Eagle Plant. In connection with the Agreement, the Partnership also entered into a purchase and sale agreement with DCP Midstream, LLC to acquire certain tangible assets and real property located in the Eagle Ford shale for approximately \$25 million (together with the Agreement, the Transaction).

The Agreement is expected to be filed, with confidential portions redacted, as an exhibit to the Partnership 's quarterly report on Form 10-Q for the quarter ending September 30, 2011. Investors are encouraged to read the Agreement in its entirety when it becomes available because it contains important terms not discussed in this current report.

DCP Midstream, LLC currently directly or indirectly owns 100% of DCP Midstream GP, LLC, the general partner of the Partnership 's general partner (the General Partner). Accordingly, the conflicts committee of the General Partner 's Board of Directors recommended approval of the Transaction. The conflicts committee, a committee of independent members of the General Partner 's Board of Directors, retained independent legal and financial advisors to assist it in evaluating and negotiating the Transaction.
