Notes to Schedule of Investments:

- * Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services. The Fund's investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics.

The Board of Trustees has adopted methods for valuing portfolio securities and other financial derivative instruments in circumstances where market quotes are not readily available and has delegated the responsibility for applying the valuation methods to the Investment Manager and Pacific Investment Management Company LLC (the Sub-Adviser), an affiliate of the Investment Manager. The Valuation Committee has been established by the Board of Trustees to oversee the implementation of the Fund's valuation methods and to make fair value determinations on behalf of the Board of Trustees as instructed. The Sub-Adviser monitors the continual appropriateness of methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Sub-Adviser determines that a valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board of Trustees shall review the appropriateness of the valuation methods and these methods may be amended or supplemented from time to time by the Valuation Committee.

If third party evaluated vendor pricing is neither available nor deemed to be reliable of fair value, the Sub-Adviser may elect to obtain market quotations (broker quotes) directly from a broker-dealer.

Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold and these differences could be material. The Fund's net asset value (NAV) is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

Level 1 - quoted prices in active markets for identical investments that the Fund has the ability to access

Level 2 - valuations based on other significant observable inputs, which may include, but not limited to, quoted prices for similar assets or liabilities, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates or other market corroborated inputs.

Level 3 - valuations based on significant unobservable inputs (including Sub-Adviser's or Valuation Committee's own assumption and single source broker quote in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Fund generally uses to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with Generally Accepted Accounting Principles.

Municipal Bonds & Notes and Variable Rate Notes - Municipal bonds & notes and variable rate notes are valued by independent pricing services based on pricing models that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the callability of the bond or note, state of issuance, benchmark yield curves, and bond or note insurance. To the extent that these inputs are observable, the values of municipal bonds & notes and variable rate notes are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

A summary of the inputs used at July 31, 2012 in valuing the Fund's assets and liabilities is listed below (refer to the Schedule of Investments for more detailed information on Investments in Securities):

	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs	Value at 7/31/12
Investments in Securities - Assets				
Municipal Bonds & Notes:				
Tennessee		\$ 11,140,337	\$ 472,350	\$ 11,612,687
All Other		513,169,938		513,169,938
Variable Rate Notes		12,121,001		12,121,001
Total Investments		\$ 536,431,276	\$ 472,350	\$ 536,903,626

The valuation techniques used by the Fund to measure fair value during the three months ended July 31, 2012 maximized the use of observable inputs and minimized the use of unobservable inputs.

The Fund's policy is to recognize transfers between levels at the end of the reporting period. An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used. Assets categorized as Level 1 or 2 as of period end may have been transferred between Levels 1 and 2 since the prior period due to changes in the valuation method utilized in valuing the investments.

At July 31, 2012, there were no transfers between Levels 1 and 2.

A roll forward of fair value measurements using significant unobservable inputs (Level 3) for the three months ended July 31, 2012, was as follows:
