APPROXIMATE DATE OF PROPOSED PUBLIC OFFERING:

As may be practicable after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box. x

It is proposed that this filing will become effective (check appropriate box):

x when declared effective pursuant to section 8(c).

Table of Contents**CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933**

Title of Securities Being Registered	Amount Being Registered	Proposed Maximum	Proposed Maximum	Amount of Registration Fee ⁽¹⁾
		Offering Price Per Unit	Aggregate Offering Price ⁽¹⁾	
Common Stock, \$0.001 par value ⁽²⁾	\$	\$	\$	\$
Preferred Stock, \$0.001 par value ⁽²⁾				
Warrants ⁽²⁾				
Subscription Rights ⁽³⁾				
Debt Securities ⁽⁴⁾				
Total	\$	\$	\$ 800,000,000 ⁽⁵⁾	\$ 109,120 ⁽⁶⁾

- (1) Estimated pursuant to Rule 457 solely for the purposes of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this registration statement.
- (2) Subject to Note 5 below, there is being registered hereunder an indeterminate number of shares of common stock, preferred stock or warrants as may be sold, from time to time. Warrants represent rights to purchase common stock, preferred stock or debt securities.
- (3) Subject to Note 5 below, there is being registered hereunder an indeterminate number of subscription rights as may be sold, from time to time, representing rights to purchase common stock.
- (4) Subject to Note 5 below, there is being registered hereunder an indeterminate principal amount of debt securities as may be sold, from time to time. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$800,000,000.
- (5) In no event will the aggregate offering price of all securities issued from time to time pursuant to this registration statement exceed \$800,000,000.

(6) Previously paid.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(c) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(c), may determine.

Debt Securities

PennantPark Floating Rate Capital Ltd. is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a business development company under the Investment Company Act of 1940, as amended.

Our investment objectives are to generate current income and capital appreciation by investing primarily in Floating Rate Loans and other investments made to U.S. middle-market private companies. Floating Rate Loans or variable-rate investments pay interest at variable-rates, which are determined periodically, on the basis of a floating base lending rate such as the London Interbank Offered Rate, or LIBOR, with or without a floor plus a fixed spread. We can offer no assurances that we will achieve our investment objectives.

We are managed by PennantPark Investment Advisers, LLC. PennantPark Investment Administration, LLC provides the administrative services necessary for us to operate.

We may offer, from time to time, in one or more offerings or series, together or separately, up to \$800,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights, or debt securities, which we refer to, collectively, as the securities. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus. In the event we offer common stock, the offering price per share of our common stock exclusive of any underwriting commissions or discounts will not be less than the net asset value per share of our common stock at the time we make the offering except (1) in connection with a rights offering to our existing stockholders, (2) with the consent of the majority of our common stockholders and approval of our board of directors, or (3) under such circumstances as the Securities and Exchange Commission, or the SEC, may permit. See Risk Factors on page 6 and Sales of Common Stock Below Net Asset Value on page 41 of this prospectus for more information.

Our common stock has been approved for quotation on the NASDAQ Global Select Market under the symbol PFLT. The last reported closing price for our common stock on November 20, 2014 was \$14.19 per share, and our net asset value on September 30, 2014 was \$14.40 per share.

This prospectus and any accompanying prospectus supplement contain important information you should know before investing in our securities. Please read them before you invest in our securities and keep them for future reference. We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may also obtain such information free of charge or make stockholder inquiries by

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

contacting us in writing at 590 Madison Avenue, New York, NY 10022, by calling us collect at (212) 905-1000 or by visiting our website at www.pennantpark.com. The information on our website is not incorporated by reference into this prospectus. The SEC also maintains a website at www.sec.gov that contains such information free of charge.

Investing in our securities involves a high degree of risk, including the risk of the use of leverage. Before buying any of our securities, you should read the discussion of the material risks of investing in us in Risk Factors beginning on page 8 of this prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the SEC using the shelf registration process. Under the shelf registration process, we may offer from time to time up to \$800,000,000 of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities on the terms to be determined at the time of the offering. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the securities that we may offer. The information contained in this prospectus is accurate only as of the date on the front of this prospectus and our business, financial condition, results of operations and prospectus may have changed since that date. Each time we use this prospectus to offer securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement, together with any exhibits, before you make an investment decision.

Table of Contents

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. References to our portfolio, our investments and our business include investments we make through our consolidated subsidiaries. Some of the statements in this prospectus constitute forward-looking statements, which apply to both us and our consolidated subsidiaries, as applicable, and relate to future events, future performance or future financial condition. The forward-looking statements involve risks and uncertainties on a consolidated basis and actual results could differ materially from those projected in the forward-looking statements for many reasons, including those factors discussed in Risk Factors and elsewhere in this prospectus. You should read carefully the more detailed information set forth under Risk Factors and the other information included in this prospectus. In this prospectus and any accompanying prospectus supplement, if any, except where the context suggests otherwise: the terms we, us, our and Company refer to PennantPark Floating Rate Capital Ltd. and its consolidated subsidiary; Funding I or our subsidiary refers to our consolidated subsidiary, PennantPark Floating Rate Funding I, LLC; PennantPark Investment Advisers or Investment Adviser refers to PennantPark Investment Advisers, LLC; PennantPark Investment Administration or Administrator refers to PennantPark Investment Administration, LLC; Code refers to the Internal Revenue Code of 1986, as amended; RIC refers to a regulated investment company under the Code; 1940 Act refers to the Investment Company Act of 1940, as amended; BDC refers to a business development company under the 1940 Act; and Credit Facility refers to our senior secured revolving credit facility, as amended.

General Business of PennantPark Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd. is a BDC whose objectives are to generate current income and capital appreciation by investing primarily in Floating Rate Loans and other investments made to U.S. middle-market companies.

We believe that Floating Rate Loans to U.S. middle-market companies offer attractive risk adjusted returns due to a limited amount of capital available for such companies and the potential for rising interest rates. We use the term middle-market to refer to companies with annual revenues between \$50 million and \$1 billion. Our investments are typically rated below investment grade. Securities rated below investment grade are often referred to as leveraged loans or high yield securities or junk bonds and are often higher risk compared to debt instruments that are rated above investment grade and have speculative characteristics. However, when compared to junk bonds and other non-investment grade debt, senior secured Floating Rate Loans typically have more robust capital-preserving qualities, such as historically lower default rates than junk bonds, represent the senior source of capital in a borrower's capital structure and often have certain of the borrower's assets pledged as collateral. Our debt investments may generally range in maturity from three to ten years and are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions.

Under normal market conditions, we generally expect that at least 80% of the value of our Managed Assets, which means our net assets plus any borrowings for investment purposes, will be invested in Floating Rate Loans and other investments bearing a variable-rate of interest. We generally expect that senior secured loans, or first lien loans, will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including mezzanine securities and, to a lesser extent, equity investments. Our investment size may generally range between \$1 million and \$15 million, on average, although we expect that this investment size will vary proportionately with the size of our capital base.

Our investment activity depends on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. We have used, and expect to continue to use, our Credit Facility, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives.

Organization and Structure of PennantPark Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd., a Maryland corporation organized in October 2010, is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for federal income tax purposes we have elected to be treated, and intend to qualify annually, as a RIC under the Code.

Funding I, our wholly owned subsidiary and a special purpose entity, was organized in Delaware as a limited liability company in May 2011. We formed Funding I in order to establish our Credit Facility.

Table of Contents

Our Investment Adviser and Administrator

We utilize the investing experience and contacts of PennantPark Investment Advisers in developing what we believe is an attractive and diversified portfolio. The senior investment professionals of the Investment Adviser have worked together for many years and average over 25 years of experience in the mezzanine lending, leveraged finance, distressed debt and private equity businesses. In addition, our senior investment professionals have been involved in originating, structuring, negotiating, managing and monitoring investments in each of these businesses across economic and market cycles. We believe this experience and history have resulted in a strong reputation with financial sponsors, management teams, investment bankers, attorneys and accountants, which provides us with access to substantial investment opportunities across the capital markets. Our Investment Adviser has a rigorous investment approach, which is based upon intensive financial analysis with a focus on capital preservation, diversification and active management. Since our Investment Adviser's inception in 2007, it has raised approximately \$2.3 billion in debt and equity capital and has invested approximately \$4.1 billion in 344 companies with 140 different financial sponsors through its managed funds.

Our Administrator has experienced professionals with substantial backgrounds in finance and administration of registered investment companies. In addition to furnishing us with clerical, bookkeeping and record keeping services, the Administrator also oversees our financial records as well as the preparation of our reports to stockholders and reports filed with the SEC. The Administrator assists in the determination and publication of our net asset value, or NAV, oversees the preparation and filing of our tax returns, and monitors the payment of our expenses as well as the performance of administrative and professional services rendered to us by others. Furthermore, our Administrator provides, on our behalf, managerial assistance to those portfolio companies to which we are required to offer such assistance. See **Risk Factors** **Risks Relating to our Business and Structure** There are significant potential conflicts of interest which could impact our investment returns for more information.

Market Opportunity

We believe that the limited amount of capital available to middle-market companies, coupled with the desire of these companies for flexible sources of capital, creates an attractive investment environment for us. From our perspective, middle market companies have faced difficulty in raising debt through the capital markets and private markets. As a result of the difficulties in the credit markets and fewer sources of capital for middle-market companies, we see opportunities for improved risk-adjusted returns. Furthermore, we believe with a large pool of uninvested private equity capital seeking debt capital to complete transactions and a substantial supply of refinancing opportunities, there is an opportunity to attain appealing risk-adjusted returns with debt investments. See **Business** for more information.

Competitive Advantages

We believe that we have competitive advantages over other capital providers in middle-market companies, such as a management team with an average of over 25 years of experience in mezzanine lending, leveraged finance, distressed debt and private equity businesses, a disciplined investment approach with strong value orientation, an ability to source and evaluate transactions through our Investment Adviser's research capability and established network and flexible transaction structuring that allows for us to invest across the capital structure coupled with a longer investment horizon with an attractive publicly traded model. See **Business** for more information.

Competition

Our primary competitors provide financing to middle-market companies and include other BDCs, commercial and investment banks, commercial finance companies, collateralized loan obligation, or CLO, funds and, to the extent they provide an alternative form of financing, private equity funds. Additionally, alternative investment vehicles, such as hedge funds, frequently invest in middle-market companies. As a result, competition for investment opportunities in middle-market companies can be intense. However, we believe that from time to time there has been a reduction in the amount of debt capital available to middle-market companies. We believe this has resulted in a less competitive environment for making new investments.

Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some competitors have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC. See **Risk Factors** **Risk Relating to our Business and Structure** We operate in a highly competitive market for investment opportunities for more information.

Table of Contents

Leverage

We currently use and expect to continue to use leverage to make investments. As a result, we may continue to be exposed to the risks associated with leverage. See [Risk Factors – Risks Relating to our Business and Structure](#) for more information. We believe that our capital resources provide us with the flexibility to take advantage of market opportunities when they arise. Our use of leverage, as calculated under the asset coverage requirements, or the asset coverage ratio, of the 1940 Act, may generally range between 70% and 90% of our net assets, or 40% and 50% of our Managed Assets. We cannot assure investors that our leverage will remain within the range. The amount of leverage that we employ will depend on our assessment of the market and other factors at the time of any proposed borrowing. See [Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources](#) for more information.

Operating and Regulatory Structure

Our investment activities are managed by PennantPark Investment Advisers. Under our investment management agreement, or the Investment Management Agreement, we have agreed to pay our Investment Adviser an annual base management fee based on our average adjusted gross total assets as well as an incentive fee based on our investment performance. See [Certain Relationships and Transactions – Investment Management Agreement](#) for more information.

We have also entered into an administration agreement, or the Administration Agreement, with the Administrator. Under our Administration Agreement, we have agreed to reimburse the Administrator for our allocable portion of overhead and other expenses incurred by the Administrator in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Compliance Officer, Chief Financial Officer and their respective staffs. Our board of directors, a majority of whom are independent of us, provides overall supervision of our activities, and the Investment Adviser supervises our day-to-day activities. See [Certain Relationships and Transactions – Administration Agreement](#) for more information.

As a BDC, we are required to comply with certain regulatory requirements. Also, while we are permitted to finance investments using debt, our ability to use debt is limited in certain significant respects. See [Regulation](#) for more information. We have elected, and intend to qualify annually, to be treated for federal income tax purposes under the Code as a RIC. See [Material U.S. Federal Income Tax Considerations](#) for more information.

Use of Proceeds

We may use the net proceeds from selling securities pursuant to this prospectus to reduce our then-outstanding debt obligations, to invest in new or existing portfolio companies, to capitalize a subsidiary or for other general corporate or strategic purposes. Any supplements to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering. See [Use of Proceeds](#) for information regarding our outstanding borrowings as of September 30, 2014, the corresponding interest rate charged on such borrowings as of that date and the length of time that it may take us to invest any proceeds in new or existing portfolio companies.

Table of Contents

Distributions on Common Stock

We intend to continue our monthly distributions to our common stockholders. Our monthly distributions, if any, are determined by our board of directors. See [Distributions](#) for more information.

Dividends on Preferred Stock

We may issue preferred stock from time to time, although we have no immediate intention to do so. Any such preferred stock will be a senior security for purposes of the 1940 Act and, accordingly, subject to the leverage test under that Act. If we issue shares of preferred stock, holders of such preferred stock will be entitled to receive cash dividends at an annual rate that will be fixed or will vary for the successive dividend periods for each series. In general, the dividend periods for fixed rate preferred stock can range from weekly to quarterly and is subject to extension. The dividend rate could be variable and determined for each dividend period. See [Risk Factors](#) [Risks Relating to our Business and Structure](#) for more information.

Dividend Reinvestment Plan

We have adopted an [opt-out](#) dividend reinvestment plan that provides for reinvestment of our distributions on behalf of our stockholders unless a stockholder elects to receive cash. As a result, if our board of directors authorizes, and we declare, a cash distribution, then our stockholders who have not [opted out](#) of our dividend reinvestment plan will have their cash distributions automatically reinvested in additional shares of our common stock rather than receiving the cash distribution. Registered stockholders must notify our transfer agent in writing if they wish to [opt-out](#) of the dividend reinvestment plan. See [Dividend Reinvestment Plan](#) for more information.

Table of Contents

Plan of Distribution

We may offer, from time to time, up to \$800 million of our securities, on terms to be determined at the time of each such offering and set forth in a supplement to this prospectus.

Securities may be offered at prices and on terms described in one or more supplements to this prospectus. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated. In compliance with the guidelines of the Financial Industry Regulatory Authority, Inc., or FINRA, the compensation to the underwriters or dealers in connection with the sale of our securities pursuant to this prospectus and the accompanying supplement to this prospectus may not exceed 8% of the aggregate offering price of the securities as set forth on the cover page of the supplement to this prospectus.

We may not sell securities pursuant to this prospectus without delivering a prospectus supplement describing the terms of the particular securities to be offered and the method of the offering of such securities. See [Plan of Distribution](#) for more information.

Our Corporate Information

Our administrative and principal executive offices are located at 590 Madison Avenue, 15th Floor, New York, NY 10022. Our common stock is quoted on the NASDAQ Global Select Market under the symbol PFLT. Our phone number is (212) 905-1000, and our Internet website address is www.pennantpark.com. Information contained on our website is not incorporated by reference into this prospectus or any supplements to this prospectus, and you should not consider information contained on our website to be part of this prospectus or any supplements to this prospectus. We file periodic reports, proxy statements and other information with the SEC and make such reports available on our website free of charge as soon as reasonably practicable. You may read and copy the materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet site at www.sec.gov that contains material that we file with the SEC on the EDGAR Database.

Table of Contents**FEES AND EXPENSES**

The following table will assist you in understanding the various costs and expenses that an investor in shares of our common stock will bear directly or indirectly. However, we caution you that some of the percentages indicated in the table below are estimates and may vary from actual results. The following table should not be considered a representation of our future expenses. Actual expenses may be greater or less than shown. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by you or us or that we will pay, stockholders will indirectly bear such fees or expenses as investors in us.

Stockholder transaction expenses (as a percentage of offering price)	
Sales load	%
Offering expenses	%(1)
Total stockholder expenses	%(2)
Estimated annual expenses (as a percentage of average net assets attributable to common shares)(3)	
Management fees	%
Incentive fees	1.69 %(4)
Interest on borrowed funds	2.04 %(5)
Other expenses	1.64 %(6)
Total estimated annual expenses	1.05 %(7)
	6.42 %(8)

(1) In the event that the securities to which this prospectus relates are sold to or through underwriters or agents, a corresponding prospectus supplement will disclose the applicable sales load.

(2) The related prospectus supplement will disclose the estimated amount of offering expenses, the offering price and the offering expenses borne by us as a percentage of the offering price.

(3) Net assets attributable to common shares equals average net assets for the three months ended September 30, 2014.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

- (4) The contractual management fee is calculated at an annual rate of 1.00% of our average adjusted gross assets on September 30, 2014. See [Certain Relationships and Transactions Investment Management Agreement](#) for more information.
- (5) The portion of incentive fees paid with respect to net investment income and capital gains, if any, is based on actual amounts incurred during the three months ended September 30, 2014, annualized for a full year. Such incentive fees are based on performance, vary from period to period and are not paid unless our performance exceeds specified thresholds. Incentive fees in respect of net investment income do not include incentive fees in respect of net capital gains. The portion of our incentive fee paid in respect of net capital gains is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date) and equals 20.0% of our realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. For purposes of this chart and our Consolidated Financial Statements, our incentive fees on capital gains are calculated in accordance with U.S. generally accepted accounting principles, or GAAP. As we cannot predict our future net investment income or capital gains, the incentive fee paid in future periods, if any, may be substantially different than the fee earned during the three months ended September 30, 2014. For more detailed information about the incentive fee, please see [Certain Relationships and Transactions Investment Management Agreement](#) for more information.
- (6) As of September 30, 2014, we had \$146.4 million in borrowings outstanding under our \$200 million Credit Facility. We may use proceeds of an offering of securities under this registration statement to repay outstanding obligations under our Credit Facility. After completing any such offering, we may continue to borrow under our Credit Facility to finance our investment objectives. We have estimated the annual interest expense on borrowed funds, and caution you that our actual interest expense will depend on prevailing interest rates and our rate of borrowing, which may be substantially higher than the estimate provided in this table. See [Risk Factors Risks Relating to our Business and Structure](#) We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage for more information.
- (7) Other expenses includes our general and administrative expenses, professional fees, directors fees, insurance costs, expenses of our dividend reinvestment plan and the expenses of the Investment Adviser reimbursable under our Investment Management Agreement and of the Administrator reimbursable under our Administration Agreement. Such expenses are based on actual other expenses for the three months ended September 30, 2014, annualized for a full year.
- (8) Total estimated annual expenses as a percentage of average net assets attributable to common shares, to the extent we borrow money to make investments, are higher than the total estimated annual expenses percentage would be for a company that is not leveraged. We may borrow money to leverage our net assets and increase our total assets. The SEC requires that the total estimated annual expenses percentage be calculated as a percentage of average net assets (defined as total assets less indebtedness) rather than total assets, which include assets that have been funded with borrowed money. For a presentation and calculation of total estimated annual expenses based on average total assets, see page 35 of this prospectus.

Table of Contents

Example

The following example illustrates the projected dollar amount of total cumulative expenses that you would pay on a \$1,000 hypothetical investment in common shares, assuming (1) a 3.00% sales load (underwriting discounts and commissions) and offering expenses totaling 0.51%, (2) total net estimated annual expenses of 4.38% of average net assets attributable to common shares as set forth in the table above (other than performance-based incentive fees) and (3) a 5% annual return.

You would pay the following expenses on a \$1,000 common stock investment:	1 year	3 years	5 years	10 years
Assuming a 5% annual return (assumes no return from net realized capital gains or net unrealized capital appreciation)	\$ 77	\$ 163	\$ 250	\$ 471
Assuming a 5% annual return (assumes return from only realized capital gains and thus subject to the capital gains incentive fee)	\$ 87	\$ 190	\$ 292	\$ 644

This example and the expenses in the table above should not be considered a representation of our future expenses. Actual expenses may be greater or less than those assumed. The table above is provided to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. If we were to earn an annual return equal to or less than 5% from net investment income, the incentive fee under our Investment Management Agreement would not be earned or payable. If our returns on our investments, including the realized capital gains, result in an incentive fee, our expenses, and returns to investors, would be higher. The example assumes that all distributions are reinvested at net asset value. Reinvestment of distributions under our dividend reinvestment plan may occur at a price per share that differs from net asset value. See [Distributions](#) for more information.

Table of Contents

RISK FACTORS

Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus, if any, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may have a material adverse effect on our business, financial condition and/or operating results. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our NAV, the trading price of our common stock or any securities we may issue, may decline, and you may lose all or part of your investment.

RISKS RELATING TO OUR BUSINESS AND STRUCTURE

Global capital markets could enter a period of severe disruption and instability. These market conditions have historically and could again have a materially adverse effect on debt and equity capital markets in the United States, which could have a materially negative impact on our business, financial condition and results of operations.

The U.S. capital markets have experienced periods of disruption characterized by the freezing of available credit, a lack of liquidity in the debt capital markets, significant losses in the principal value of investments, the re-pricing of credit risk in the broadly syndicated credit market and the failure of major financial institutions. During these periods of disruption, general economic conditions deteriorated with material and adverse consequences for the broader financial and credit markets, and the availability of debt and equity capital for the market as a whole, and financial services firms in particular, was reduced significantly. These conditions may reoccur for a prolonged period of time or materially worsen in the future. We may in the future have difficulty accessing debt and equity capital, and a severe disruption in the global financial markets, deterioration in credit and financing conditions or uncertainty regarding U.S. government spending and deficit levels could have a material adverse effect on our business, financial condition and results of operations.

Volatility or a prolonged disruption in the credit markets could materially damage our business.

We are required to record our assets at fair value, as determined in good faith by our board of directors in accordance with our valuation policy. As a result, volatility in the capital markets may have a material adverse effect on our valuations and our NAV, even if we hold investments to maturity. Volatility or dislocation in the capital markets may depress our stock price below our NAV per share and create a challenging environment in which to raise equity and debt capital. As a BDC, we are generally not able to issue additional shares of our common stock at a price less than our NAV without first obtaining approval for such issuance from our stockholders and our independent directors. Additionally, our ability to incur indebtedness is limited by the asset coverage ratio for a BDC, as defined under the 1940 Act. Declining portfolio values negatively impact our ability to borrow additional funds under our Credit Facility because our NAV is reduced for purposes of the asset coverage ratio. If the fair value of our assets declines substantially, we may fail to maintain the asset coverage ratio stipulated by the 1940 Act, which could, in turn, cause us to lose our status as a BDC and materially impair our business operations. A protracted disruption in the credit markets could also materially decrease demand for our investments.

The significant disruption in the capital markets experienced in the past had, and may in the future have a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. The debt capital that may be available to us in the future may be at a higher cost and have less favorable terms and conditions than those currently in effect. If our financing costs increase and we have no increase in interest income, then our net investment income will decrease. A prolonged inability to raise capital may require us to reduce the volume of investments we originate and could have a material adverse impact on our business, financial condition and results of operations. This may also increase the probability that other structural risks negatively impact us. These situations may arise due to circumstances that we may be unable to control, such as a protracted disruption in the credit markets, a severe decline in the value of the U.S. dollar, a sharp economic downturn or recession or an operational problem that affects third parties or us, and could materially damage our business, financial condition and results of operations.

Market developments may adversely affect our business and results of operations by reducing availability and/or triggering mandatory prepayment under Funding I's Credit Facility.

In addition to the applicable asset coverage ratio that restricts our ability to borrow under our Credit Facility, the Credit Facility contains various covenants applicable to Funding I. For example, the income coverage covenant, or test, compares the amount of interest received on the portfolio loans held by Funding I to the amount of interest payable under the Credit Facility to the lenders, or the Lenders, and certain other expenses. To meet this test, the aggregate amount of interest received on the portfolio loans must equal at least 125% of the interest payable in respect to the Lenders and other parties. Failure to satisfy the various covenants under the Credit Facility could accelerate repayment under the Credit Facility or otherwise require changes in the priority of distributions under the payment waterfall, which could materially and adversely

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

affect our liquidity, financial condition and results of operations. Funding I's borrowings under the Credit Facility are collateralized by the assets in Funding I's investment portfolio. The agreements governing the Credit Facility require Funding I to comply with certain financial and operational covenants. These covenants include:

Table of Contents

A requirement to retain our status as a RIC;

A requirement to maintain a minimum amount of stockholder's equity; and

A requirement that our outstanding borrowings under the Credit Facility not exceed a certain percentage of the values of our portfolio companies.

Our continued compliance with these covenants depends on many factors, some of which are beyond our control. A material decrease in our NAV in connection with additional borrowings could result in an inability to comply with our obligation to restrict the level of indebtedness that we are able to incur in relation to the value of our assets or to maintain a minimum level of stockholders' equity. This could have a material adverse effect on our operations, as it would reduce availability under the Credit Facility and could trigger mandatory prepayment obligations under the terms of the Credit Facility.

We operate in a highly competitive market for investment opportunities.

A number of entities compete with us to make the types of investments that we make in middle-market companies. We compete with public and private funds, including other BDCs, commercial and investment banks, commercial financing companies, CLO funds and, to the extent they provide an alternative form of financing, private equity funds. Additionally, alternative investment vehicles, such as hedge funds, also invest in middle-market companies. As a result, competition for investment opportunities at middle-market companies can be intense. Many of our potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some competitors have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objectives.

Participants in our industry compete on several factors, including price, flexibility in transaction structuring, customer service, reputation, market knowledge and speed in decision-making. We do not seek to compete primarily based on the interest rates we offer, and we believe that some of our competitors may make loans with interest rates that are lower than the rates we offer. We may lose investment opportunities if we do not match our competitors' pricing, terms and structure. However, if we match our competitors' pricing, terms and structure, we may experience decreased net interest income and increased risk of credit loss.

Our borrowers may default on their payments, which may have a materially negative effect on our financial performance.

Our primary business exposes us to credit risk, and the quality of our portfolio has a significant impact on our earnings. Credit risk is a component of our fair valuation of our portfolio companies. Negative credit events will lead to a decrease in the fair value of our portfolio companies.

In addition, market conditions have affected consumer confidence levels, which may harm the business of our portfolio companies and result in adverse changes in payment patterns. Increased delinquencies and default rates would negatively impact our results of operations. Deterioration in the credit quality of our portfolio could have a material adverse effect on our business, financial condition and results of operations. If interest rates rise, some of our portfolio companies may not be able to pay the escalating interest on our loans and may default.

We make long-term loans and debt investments, which may involve a high degree of repayment risk. We invest in companies that may have limited financial resources, may be highly leveraged and may be unable to obtain financing from traditional sources. Accordingly, a general economic downturn or severe tightening in the credit markets could materially impact the ability of our borrowers to repay their loans, which could significantly damage our business. Numerous other factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan or a downturn in its industry. A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans or foreclosure on the secured assets. This could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the loans or debt securities that we hold. In addition, our portfolio companies may have, or may be permitted to incur, other debt that ranks senior to or equally with our securities. This means that payments on such senior-ranking securities may have to be made before we receive any payments on our subordinated loans or debt securities. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral and may

have a material adverse effect on our financial condition and results of operations.

Table of Contents

Any unrealized losses we experience on our investment portfolio may be an indication of future realized losses, which could reduce our income available for distribution.

As a BDC, we are required to carry our investments at fair value, which is derived from a market value or, if no market value is ascertainable or if market value does not reflect the fair value of such investment in the bona fide determination of our board of directors, then we would carry our investments at fair value as determined in good faith by or under the direction of our board of directors. Decreases in the market values or fair values of our investments are recorded as unrealized depreciation or loss. Unrealized losses of any given portfolio company could be an indication of such company's inability in the future to meet its repayment obligations to us.

If the fair value of our portfolio companies reflects future realized losses, this would ultimately result in reductions of our income available for distribution in future periods and could materially harm our results of operations and cause a material decline in the value of our publicly traded common stock.

We may be the target of securities litigation.

If our stock price fluctuates significantly, we may be the target of securities litigation in the future. Securities litigation could result in substantial costs and divert management's attention and resources from our business and cause a material adverse effect on our business, financial condition and results of operations.

We are dependent upon our Investment Adviser's key personnel for our future success, and if our Investment Adviser is unable to hire and retain qualified personnel or if our Investment Adviser loses any member of its management team, our ability to achieve our investment objectives could be significantly harmed.

We depend on the diligence, skill and network of business contacts of the senior investment professionals of our Investment Adviser. We also depend, to a significant extent, on PennantPark Investment Advisers' access to the investment information and deal flow generated by these investment professionals and any others that may be hired by PennantPark Investment Advisers. Subject to the overall supervision of our board of directors, the managers of our Investment Adviser evaluate, negotiate, structure, close and monitor our investments. Our future success depends on the continued service of management personnel of our Investment Adviser. The departure of managers of PennantPark Investment Advisers could have a material adverse effect on our ability to achieve our investment objectives. In addition, we can offer no assurance that PennantPark Investment Advisers will remain our Investment Adviser. The Investment Adviser has the right, under the Investment Management Agreement, to resign at any time upon 60 days' written notice, whether we have found a replacement or not.

If our Investment Management Agreement is terminated, our costs under new agreements that we enter into may increase. In addition, we will likely incur significant time and expense in locating alternative parties to provide the services we expect to receive under our Investment Management Agreement. Any new investment management agreement would also be subject to approval by our stockholders.

We are exposed to risks associated with changes in interest rates that may affect our cost of capital and net investment income.

Since we borrow money to make investments, our net investment income depends, in part, upon the difference between the rate at which we borrow funds and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds will increase and the interest rate on investments with an interest rate floor will not increase until interest rates exceed the applicable floor, which could reduce our net investment income. We may use interest rate risk management techniques, such as total return swaps and interest rate swaps, in an effort to limit our exposure to interest rate fluctuations. These techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act and applicable commodities laws. These activities may limit our ability to participate in the benefits of lower interest rates with respect to the hedged portfolio. Adverse developments resulting from changes in interest rates or hedging transactions could have a material adverse effect on our business, financial condition and results of operations. Also, we have limited experience in entering into hedging transactions, and we will initially have to purchase or develop such expertise. See Management's Discussion and Analysis of Financial Condition and Results of Operations Quantitative and Qualitative Disclosures about Market Risk for more information.

A rise in the general level of interest rates can be expected to lead to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates would make it easier for us to meet or exceed the incentive fee hurdle and may result in a substantial increase of the amount of incentive fees payable to our Investment Adviser with respect to Pre-Incentive Fee Net Investment Income.

General interest rate fluctuations may have a substantial negative impact on our investments, the value of our common stock and our rate of return on invested capital. A reduction in interest rates may result in both lower interest rates on new investments and higher repayments on

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

current investments with higher interest rates which may have an adverse impact on our net investment income. An increase in interest rates could decrease the value of any investments we hold which earn fixed interest rates or are subject to interest rate floors and also could increase our interest expense, thereby decreasing our net income. Also, an increase in interest rates available to investors could make an investment in our common stock less attractive if we are not able to increase our dividend rate, which could reduce the value of our common stock.

Table of Contents

Our financial condition and results of operation depend on our ability to manage future growth effectively.

Our ability to achieve our investment objectives depends on our ability to grow, which depends, in turn, on our Investment Adviser's ability to identify, invest in and monitor companies that meet our investment criteria. Accomplishing this result on a cost-effective basis is largely a function of our Investment Adviser's structuring of the investment process, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. The management team of PennantPark Investment Advisers has substantial responsibilities under our Investment Management Agreement. In order to grow, our Investment Adviser will need to hire, train, supervise and manage new employees. However, we can offer no assurance that any such employees will contribute effectively to the work of the Investment Adviser. We caution you that the principals of our Investment Adviser or Administrator may also be called upon to provide and currently do provide managerial assistance to portfolio companies and other investment vehicles, including other BDCs, which are managed by the Investment Adviser. Such demands on their time may distract them or slow our rate of investment. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

We are highly dependent on information systems and systems failures could have a material adverse effect on our business, financial condition and results of operations.

Our business depends on the communications and information systems, including financial and accounting systems, of the Investment Adviser, the Administrator and our sub-administrator. Any failure or interruption of such systems could cause delays or other problems in our activities. This, in turn, could have a material adverse effect on our business, financial condition and results of operations.

We may not replicate the historical performance of other investment companies and funds with which our investment professionals have been affiliated.

The 1940 Act imposes numerous constraints on the investment activities of BDCs. For example, BDCs are required to invest at least 70% of their total assets primarily in securities of U.S. private companies or thinly traded public companies (public companies with a market capitalization of less than \$250 million), cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. These constraints may hinder the Investment Adviser's ability to take advantage of attractive investment opportunities and to achieve our investment objectives. In addition, the investment philosophy and techniques used by the Investment Adviser may differ from those used by other investment companies and funds advised by the Investment Adviser. Accordingly, we can offer no assurance that we will replicate the historical performance of other investment companies and funds with which our investment professionals have been affiliated, and we caution that our investment returns could be substantially lower than the returns achieved by such other companies.

Any failure on our part to maintain our status as a BDC would reduce our operating flexibility.

If we do not remain a BDC, we might be regulated as a closed-end investment company under the 1940 Act, which would subject us to substantially more regulatory restrictions under the 1940 Act and correspondingly decrease our operating flexibility, which could have a material adverse effect on our business, financial condition and results of operations.

Loss of RIC tax status would substantially reduce net assets and income available for debt service and distributions.

We have operated and continue to operate so as to maintain our election to be taxed as a RIC under Subchapter M of the Code. If we meet source of income, quarterly asset diversification, and distribution requirements, we generally will not be subject to corporate-level income taxation on income we timely distribute, or deem to distribute, to our stockholders as distributions. We would cease to qualify for such tax treatment if we were unable to comply with these requirements. In addition, we may have difficulty meeting the requirement to make distributions to our stockholders because in certain cases we may recognize income before or without receiving cash representing such income. If we fail to qualify as a RIC, we will have to pay corporate-level taxes on all of our income whether or not we distribute it, which would substantially reduce the amount of income available for debt service as well as reduce and/or affect the character and amount of our distributions to our stockholders. Even if we qualify as a RIC, we generally will be subject to a 4% nondeductible excise tax if we do not distribute an amount at least equal to the sum of (1) 98% of our net ordinary income (for the calendar year), (2) 98.2% of the sum of our net realized capital gains (during each 12-month period ending on October 31), and (3) the sum of any net ordinary income plus capital gains and net ordinary gains for preceding years that were not distributed during such years.

We may have difficulty paying our required distributions if we recognize income before or without receiving cash representing such income.

For federal income tax purposes, we include in income certain amounts that we have not yet received in cash, such as original issue discount, or OID, and payment-in-kind interest, or PIK interest, which represents interest added to the loan balance and due at the end of the loan term. OID,

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

which could be significant relative to our overall investment assets, and increases in loan balances as a result of PIK interest will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash, such as amounts attributable to foreign currency transactions.

Table of Contents

The part of the incentive fee payable by us that relates to our net investment income is computed and paid on income that may include interest that has been accrued but not yet received in cash. If a portfolio company defaults on a loan that is structured to provide accrued interest, it is possible that accrued interest previously used in the calculation of the incentive fee will become uncollectible.

In some cases we may recognize income before or without receiving cash representing such income. As a result, we may have difficulty meeting the Annual Distribution Requirement and obtaining RIC tax benefits. Accordingly, we may have to sell some of our investments at times or prices we would not consider advantageous, or raise additional debt or equity capital or reduce new investment originations to meet these distribution requirements, which could have a material adverse effect on our business, financial condition and results of operations. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax benefits and thus be subject to corporate-level income tax.

Because we intend to distribute substantially all of our income to our stockholders to maintain our status as a RIC, we will need to raise additional capital to finance our growth. If funds are not available to us, we may need to curtail new investments, and our common stock value could decline.

In order to satisfy the requirements applicable to a RIC, we intend to distribute to our stockholders substantially all of our net ordinary income and net capital gains. However, we may retain certain net long-term capital gains and pay applicable income taxes with respect thereto and elect to treat as deemed distributions to our stockholders. As a BDC, we generally are required to meet an asset coverage ratio of total assets to total senior securities, which includes all of our borrowings, and any preferred stock we may issue in the future. This requirement limits the amount we may borrow. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments or sell additional common stock and, depending on the nature of our leverage, to repay a portion of our indebtedness at a time when such sales and repayments may be disadvantageous. In addition, the issuance of additional securities could dilute the percentage ownership of our current stockholders in us.

We are partially dependent on our subsidiary Funding I for cash distributions to enable us to meet the RIC distribution requirements. Funding I may be limited by its covenants from making certain distributions to us that may be necessary to maintain our status as a RIC. We may have to request a waiver of these covenants' restrictions for Funding I to make certain distributions to maintain our RIC status. We cannot assure you that Funding I will be granted such a waiver, and if Funding I is unable to obtain a waiver, compliance with the covenants may result in a corporate-level income tax on us.

Regulations governing our operation as a BDC will affect our ability to, and the way in which we, raise additional capital.

Our business requires a substantial amount of capital. We may acquire additional capital from the issuance of additional senior securities or other indebtedness, the issuance of additional shares of our common stock, the issuance of warrants or subscription rights to purchase certain of our securities, or from securitization transactions. However, we may not be able to raise additional capital in the future on favorable terms or at all. We may issue debt securities or preferred securities, which we refer to collectively as senior securities, and we may borrow money from banks, or other financial institutions, up to the maximum amount permitted by the 1940 Act. The 1940 Act permits us to issue senior securities or incur indebtedness only in amounts permissible under the asset coverage definition under the 1940 Act. Our ability to pay dividends or issue additional senior securities would be restricted if our asset coverage ratio was not met. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to liquidate a portion of our investments and repay a portion of our indebtedness at a time when such sales may be disadvantageous, which could materially damage our business.

Senior Securities. As a result of issuing senior securities, we are exposed to typical risks associated with leverage, including an increased risk of loss. If we issue preferred securities, they would rank senior to common stock in our capital structure. Preferred stockholders would have separate voting rights and may have rights, preferences or privileges more favorable than those of holders of our common stock. Furthermore, the issuance of preferred securities could have the adverse effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for our common stockholders or otherwise be in your best interest. Our senior securities may include conversion features that cause them to bear risks more closely associated with an investment in our common stock.

Table of Contents

Additional Common Stock. Our board of directors may decide to issue common stock to finance our operations rather than issuing debt or other senior securities. As a BDC, we are generally not able to issue our common stock at a price below NAV per share without first obtaining certain approvals from our stockholders and our board of directors. Also, subject to the requirements of the 1940 Act, we may issue rights to acquire our common stock at a price below the current NAV per share of the common stock if our board of directors determines that such sale is in our best interests and the best interests of our common stockholders. In any such case, the price at which our securities are to be issued and sold may not be less than a price, that in the determination of our board of directors, closely approximates the market value of such securities. However, when required to be undertaken, the procedures used by the board of directors to determine the NAV per share of our common stock within 48 hours of each offering of our common stock may differ materially from and will necessarily be more abbreviated than the procedures used by the board of directors to determine the NAV per share of our common stock at the end of each quarter. Such procedures may yield a NAV that is less precise than the NAV determined at the end of each quarter. We will not offer transferable subscription rights to our stockholders at a price equivalent to less than the then current NAV per share of common stock, excluding underwriting commissions, unless we first file a post-effective amendment that is declared effective by the SEC with respect to such issuance and the common stock to be purchased in connection with such rights represents no more than one-third of our outstanding common stock at the time such rights are issued. In addition, we note that for us to file a post-effective amendment to a registration statement on Form N-2, we must then be qualified to register our securities under the requirements of Form S-3. We may actually issue shares above or below a future NAV. If we raise additional funds by issuing more common stock or warrants or senior securities convertible into, or exchangeable for, our common stock, the percentage ownership of our common stockholders at that time would decrease, and our common stockholders would experience voting dilution.

Securitization. In addition to issuing securities to raise capital as described above, we anticipate that in the future, as market conditions permit, we may securitize our loans to generate cash for funding new investments. To securitize loans, we may create a wholly-owned subsidiary, contribute a pool of loans to the subsidiary and have the subsidiary issue primarily investment grade debt securities to purchasers who we would expect to be willing to accept a substantially lower interest rate than the loans earn. Even though we expect the pool of loans that we contribute to any such securitization vehicle to be rated below investment grade, because the securitization vehicle's portfolio of loans would secure all of the debt issued by such vehicle, a portion of such debt may be rated investment grade, subject in each case to market conditions that may require such portion of the debt to be over collateralized and various other restrictions. If applicable accounting pronouncements or SEC staff guidance require us to consolidate the securitization vehicle's financial statements with our financial statements, any debt issued by it would be generally treated as if it were issued by us for purposes of the asset coverage ratio applicable to us. In such case, we would expect to retain all or a portion of the equity and/or subordinated notes in the securitization vehicle. Our retained equity would be exposed to any losses on the portfolio of loans before any of the debt securities would be exposed to such losses. Accordingly, if the pool of loans experienced a low level of losses due to defaults, we would earn an incremental amount of income on our retained equity but we would be exposed, up to the amount of equity we retained, to that proportion of any losses we would have experienced if we had continued to hold the loans in our portfolio. We may hold subordinated debentures in any such securitization vehicle and, if so, we would not consider such securities to be senior securities. An inability to successfully securitize our loan portfolio could limit our ability to grow our business and fully execute our business strategy and adversely affect our earnings, if any. Moreover, the successful securitization of a portion of our loan portfolio might expose us to losses as the residual loans in which we do not sell interests will tend to be those that are riskier and less liquid.

We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage.

Because we borrow funds through Funding I to make investments, we are exposed to increased risk of loss due to our use of debt to make investments. A decrease in the value of our investments will have a greater negative impact on the NAV attributable to our common stock than it would if we did not use debt. Our ability to pay distributions is restricted when our asset coverage ratio is not met and any cash that we use to service our indebtedness is not available for distribution to our common stockholders.

Our current debt is governed by the terms of the Credit Facility and may in the future be governed by an indenture or other instrument containing covenants restricting our operating flexibility. We, and indirectly our stockholders, bear the cost of issuing and servicing debt. Any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock.

Table of Contents

If we incur additional debt, it could increase the risk of investing in our shares.

We have indebtedness outstanding pursuant to our Credit Facility and expect in the future to borrow additional amounts under our Credit Facility or other debt securities, subject to market availability, and, may increase the size of our Credit Facility. We cannot assure you that our leverage will remain at current levels. The amount of leverage that we employ will depend upon our assessment of the market and other factors at the time of any proposed borrowing. Lenders have fixed dollar claims on our assets that are superior to the claims of our common stockholders or preferred stockholders, if any, and we have granted a security interest in Funding I's assets in connection with our Credit Facility borrowings. In the case of a liquidation event, those lenders would receive proceeds before our stockholders. Any future debt issuance will increase our leverage and may be subordinate to our Credit Facility. In addition, borrowings or debt issuances, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. Leverage is generally considered a speculative investment technique. If the value of our assets decreases, then leveraging would cause the NAV attributable to our common stock to decline more than it otherwise would have had we not utilized leverage. Similarly, any decrease in our revenue would cause our net income to decline more than it would have had we not borrowed funds and could negatively affect our ability to make distributions on our common or preferred stock. Our ability to service any debt that we incur depends largely on our financial performance and is subject to prevailing economic conditions and competitive pressures.

As of September 30, 2014, we had outstanding borrowings of \$146.4 million under our Credit Facility with a current interest rate on of 2.16% exclusive of the fees on the undrawn commitment of 0.375%. Accordingly, to cover the annual interest on our borrowings outstanding at September 30, 2014, at the then current rate, we would have to receive an annual yield of at least 0.88%. This example is for illustrative purposes only, and actual interest rates on our Credit Facility or any future borrowings are likely to fluctuate. The costs associated with our borrowings, including any increase in the management fee or incentive fee payable to our Investment Adviser, are and will be borne by our common stockholders.

The following table is designed to illustrate the effect on return to a holder of our common stock of the leverage created by our use of borrowing at September 30, 2014 of 39% of total assets (including such borrowed funds), at a current interest rate at the time of 2.16%, and assumes hypothetical annual returns on our portfolio of minus 10 to plus 10 percent. The table also assumes that we will maintain a constant level and weighted average rate of leverage. The amount of leverage and cost of borrowing that we use will vary from time to time. As can be seen, leverage generally increases the return to stockholders when the portfolio return is positive and decreases return when the portfolio return is negative. Actual returns may be greater or less than those appearing in the table.

Assumed return on portfolio (net of expenses) ⁽¹⁾	(10.0)%	(5.0)%	%	5.0%	10.0%
Corresponding return to common stockholders ⁽²⁾	(18.9)%	(10.2)%	(1.5)%	7.2%	15.9%

⁽¹⁾ The assumed portfolio return is required by regulation of the SEC and is not a prediction of, and does not represent, our projected or actual performance.

⁽²⁾ In order to compute the corresponding return to common stockholders, the assumed return on portfolio is multiplied by the total value of our assets at the beginning of the period to obtain an assumed return to us. From this amount, all interest expense expected to be accrued during the period is subtracted to determine the return available to stockholders. The return available to stockholders is then divided by the total value of our net assets as of the beginning of the period to determine the corresponding return to common stockholders.

We may in the future determine to fund a portion of our investments with debt securities, which would magnify the potential for loss and the risks of investing in us.

As a result of any issuance of debt securities, we would be exposed to typical risks associated with leverage, including an increased risk of loss and an increase in expenses, which are ultimately borne by our common stockholders. Payment of interest on such debt securities must take preference over any other distributions or other payments to our common stockholders. If we issue debt securities in the future, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. In addition, such securities may be rated by rating agencies, and in obtaining a rating for such securities, we may be required to abide by operating and investment guidelines that could further restrict our operating flexibility. Furthermore, any cash that we use to service our indebtedness would not be available for the payment of distributions to our common stockholders.

Table of Contents

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings, if any, are an assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of any publicly issued debt securities. Our credit ratings, generally may not reflect the potential impact of risks related to market conditions or other factors discussed above on the market value of, or trading market for, any publicly issued debt securities.

Market conditions may make it difficult to extend the maturity of or refinance our existing indebtedness and any failure to do so would have a material adverse effect on our business.

Our Credit Facility expires in May 2018. We utilize the Credit Facility to make investments in our portfolio companies. The life of our investments typically exceeds the duration of our indebtedness under our Credit Facility. This means that we will have to extend the maturity of our Credit Facility or refinance our indebtedness under our Credit Facility in order to avoid selling investments at a time when such sales may be at prices that are disadvantageous to us, which could materially damage our business. In addition, future market conditions may affect our ability to renew or refinance our Credit Facility on terms as favorable as those in our existing Credit Facility. If we fail to extend or refinance the indebtedness outstanding under our Credit Facility by the time it becomes due and payable, the administrative agent of the Credit Facility may elect to exercise various remedies, including the sale of all or a portion of the collateral securing the Credit Facility, subject to certain restrictions, any of which could have a material adverse effect on our business, financial condition and results of operations. The illiquidity of our investments may make it difficult for us to sell such investments. If we are required to sell our investments on short-term notice, we may not receive the value that we have recorded for such investments, and this could materially affect our results of operations.

We may in the future determine to fund a portion of our investments with preferred stock, which is another form of leverage and would magnify the potential for loss and the risks of investing in us.

Preferred stock, which is another form of leverage, has the same risks to our common stockholders as borrowings because the dividends on any preferred stock we issue must be cumulative. If we issue preferred securities they would rank senior to common stock in our capital structure. Payment of dividends on, and repayment of the liquidation preference of, such preferred stock would typically take preference over any dividends or other payments to our common stockholders. Also, preferred stockholders are not, typically, subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference. Furthermore, preferred stockholders would have separate voting rights and may have rights, preferences or privileges more favorable than those of our common stockholders. Also, the issuance of preferred securities could have the adverse effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for our common stockholders or otherwise be in your best interest.

Our interests in Funding I are subordinated.

We own 100% of the equity interests in Funding I. We consolidate Funding I in our Consolidated Financial Statements and treat the indebtedness of Funding I as our leverage. Our interests in Funding I (other than the management fees that the Investment Adviser has irrevocably directed to be paid to us) are subordinate in priority of payment to every other obligation of Funding I and are subject to certain payment restrictions set forth in the Credit Facility documents. We may receive cash distributions on our equity interests in Funding I only after it has made all (1) required cash interest and, if applicable, principal payments to the Lenders, (2) required administrative expenses and (3) claims of other unsecured creditors of Funding I. We cannot assure you that there will be sufficient funds available to make any distributions to us or that such distributions will meet our expectations.

Our equity interests in Funding I are subordinate to all of the secured and unsecured creditors, known or unknown, of Funding I, including the Lenders. Consequently, to the extent that the value of Funding I's portfolio of loan investments has been reduced as a result of conditions in the credit markets, defaulted loans, capital losses exceeding gains on the underlying assets, prepayments or changes in interest rates, the return on our investment in Funding I could be reduced. Accordingly, our investment in Funding I is subject to a complete risk of loss.

We may not receive cash on our equity interests from Funding I.

Except for management fees that PennantPark Investment Advisers has irrevocably directed to be paid to us, we receive cash from Funding I only to the extent that we receive distributions on our equity interests in Funding I. Funding I may make equity distributions on such interests only to the extent permitted by the payment priority provisions of the Credit Facility. The Credit Facility generally provides that payments on such interests may not be made on any payment date unless all amounts owing to the Lenders and other secured parties are paid in full. In the event that we fail to receive cash from Funding I, we could be unable to make distributions to our stockholders in amounts sufficient to qualify as a RIC. We also could be forced to sell investments in portfolio companies at less than their fair value in order to continue making such

distributions.

Table of Contents

If we issue preferred stock, debt securities or convertible debt securities the NAV and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock and/or debt securities would result in a higher yield or return to the holders of our common stock. The issuance of preferred stock, debt securities and/or convertible debt would likely cause the NAV and market value of our common stock to become more volatile. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of our common stock would be reduced or entirely eliminated. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to exceed the net rate of return on our portfolio, the use of leverage would result in a lower rate of return to the holders of common stock than if we had not issued the preferred stock or debt securities. Any decline in the NAV of our investment would be borne entirely by the holders of our common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in NAV to the holders of our common stock than if we were not leveraged through the issuance of preferred stock, debt securities or convertible debt. This decline in NAV would also tend to cause a greater decline in the market price for our common stock.

There is also a risk that, in the event of a sharp decline in the value of our net assets, we would be in danger of failing to maintain required asset coverage ratios or other covenants which may be required by the preferred stock, debt securities and/or convertible debt or risk a downgrade in the ratings of the preferred stock, debt securities and/or convertible debt or our current investment income might not be sufficient to meet the dividend requirements on the preferred stock or the interest payments on the debt securities. In order to counteract such an event, we might need to liquidate investments in order to fund redemption of some or all of the preferred stock, debt securities or convertible debt. In addition, we would pay (and the holders of our common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, debt securities, convertible debt or any combination of these securities. Holders of preferred stock, debt securities, convertible debt or any combination of these securities may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

Holders of any preferred stock that we may issue will have the right to elect members of the board of directors and have class voting rights on certain matters.

The 1940 Act requires that holders of shares of preferred stock must be entitled as a class to elect two directors at all times and to elect a majority of the directors if distributions on such preferred stock are in arrears by two years or more, until such arrearage is eliminated. In addition, certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock, including changes in fundamental investment restrictions and conversion to open-end status and, accordingly, preferred stockholders could veto any such changes. Restrictions imposed on the declarations and payment of distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies, might impair our ability to maintain our qualification as a RIC for U.S. federal income tax purposes, which could have a material adverse effect on our business, financial condition and results of operations.

We may in the future issue securities for which there is no public market and for which we expect no public market to develop.

In order to raise additional capital, we may issue debt or other securities for which no public market exists, and for which no public market is expected to develop. If we issue shares of our common stock as a component of a unit security, we would expect the common stock to separate from the other securities in such unit after a period of time or upon occurrence of an event and to trade publicly on the NASDAQ Global Select Market, which may cause volatility in our publicly traded common stock. To the extent we issue securities for which no public market exists and for which no public market develops, a purchaser of such securities may not be able to liquidate the investment without considerable delay, if at all. If a market should develop for our debt and other securities, the price may be highly volatile, and our debt and other securities may lose value.

Table of Contents

There are significant potential conflicts of interest which could impact our investment returns.

The professionals of the Investment Adviser and Administrator may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do or of investment funds managed by affiliates of us that currently exist or may be formed in the future. The Investment Adviser and Administrator may be engaged by such funds at any time and without the prior approval of our stockholders or our board of directors. Our board of directors monitors any potential conflict that may arise upon such a development. Accordingly, if this occurs, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of us or our stockholders. Currently, the executive officers and directors, as well as the current senior investment professionals of the Investment Adviser, may serve as officers and directors of our affiliated funds. In addition, we note that any affiliated investment vehicles currently formed or formed in the future and managed by the Investment Adviser or its affiliates may have overlapping investment objectives with our own and, accordingly, may invest in asset classes similar to those targeted by us. As a result, the Investment Adviser may face conflicts in allocating investment opportunities between us and such other entities. Although the Investment Adviser will endeavor to allocate investment opportunities in a fair and equitable manner, it is possible that, in the future, we may not be given the opportunity to participate in investments made by investment funds managed by the Investment Adviser or an investment manager affiliated with the Investment Adviser. In any such case, when the Investment Adviser identifies an investment, it is forced to choose which investment fund should make the investment. We may co-invest on a concurrent basis with any other affiliates that the Investment Adviser currently has or forms in the future, subject to compliance with applicable regulations and regulatory guidance and our allocation procedures.

In the ordinary course of our investing activities, we pay investment advisory and incentive fees to the Investment Adviser, and reimburse the Investment Adviser for certain expenses it incurs. As a result, investors in our common stock invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than an investor might achieve through direct investments. Accordingly, there may be times when the management team of the Investment Adviser has interests that differ from those of our stockholders, giving rise to a conflict.

We have entered into a License Agreement with PennantPark Investment Advisers, pursuant to which the Investment Adviser has agreed to grant us a royalty-free non-exclusive license to use the name PennantPark. The License Agreement will expire (i) upon expiration or termination of the Investment Management Agreement, (ii) if the Investment Adviser ceases to serve as our investment adviser, (iii) by either party upon 60 days written notice or (iv) by the Investment Adviser at any time in the event we assign or attempt to assign or sublicense the License Agreement or any of our rights or duties thereunder without the prior written consent of the Investment Adviser. Other than with respect to this limited license, we have no legal right to the PennantPark name.

In addition, we pay PennantPark Investment Administration, an affiliate of the Investment Adviser, our allocable portion of overhead and other expenses incurred by PennantPark Investment Administration in performing its obligations under the Administration Agreement, including rent and our allocable portion of the cost of our Chief Financial Officer and Chief Compliance Officer and their respective staffs. These arrangements may create conflicts of interest that our board of directors must monitor.

The ability to sell investments held by Funding I is limited.

The Credit Facility places restrictions on the collateral manager's ability to sell investments. As a result, there may be times or circumstances during which the collateral manager is unable to sell investments or take other actions that might be in our best interests.

The trading market or market value of any publicly issued debt or convertible debt securities may be volatile.

If we publicly issue debt or convertible debt securities, they initially will not have an established trading market. We cannot assure investors that a trading market for our publicly issued debt or convertible debt securities would develop or be maintained if developed. In addition to our creditworthiness, many factors may have a material adverse effect on the trading market for, and market value of, our publicly issued debt or convertible debt securities.

These factors include the following:

the time remaining to the maturity of these debt securities;

the outstanding principal amount of debt securities with terms identical to these debt securities;

the supply of debt securities trading in the secondary market, if any;

the redemption, repayment or convertible features, if any, of these debt securities;

the level, direction and volatility of market interest rates; and

market rates of interest higher or lower than rates borne by the debt securities.

There also may be a limited number of buyers for our debt securities. This too may have a material adverse effect on the market value of the debt securities or the trading market for the debt securities. Our debt securities may include convertible features that cause them to more closely bear risks associated with an investment in our common stock.

Table of Contents

Terms relating to redemption may have a material adverse effect on the return on any debt securities.

If we issue debt securities that are redeemable at our option, we may choose to redeem the debt securities at times when prevailing interest rates are lower than the interest rate paid on the debt securities. In addition, if the debt securities are subject to mandatory redemption, we may be required to redeem the debt securities at times when prevailing interest rates are lower than the interest rate paid on the debt securities. In this circumstance, a holder of our debt securities may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the debt securities being redeemed.

If we issue subscription rights or warrants for our common stock, your interest in us may be diluted as a result of such rights or warrants offering.

Stockholders who do not fully exercise rights or warrants issued to them in an offering of subscription rights or warrants to purchase our common stock should expect that they will, at the completion of an offering, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights or warrants. We cannot state precisely the amount of any such dilution in share ownership because we do not know what proportion of the common stock would be purchased as a result of any such offering.

In addition, if the subscription price or warrant exercise price is less than our NAV per share of common stock at the time of an offering, then our stockholders would experience an immediate dilution of the aggregate NAV of their shares as a result of the offering. The amount of any such decrease in NAV is not predictable because it is not known at this time what the subscription price, warrant exercise price or NAV per share will be on the expiration date of such rights offering or what proportion of our common stock will be purchased as a result of any such offering.

We may experience fluctuations in our quarterly results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in, and the timing of the recognition of, realized and unrealized gains or losses, the degree to which we encounter competition in our markets and general economic conditions. However, as a result of our irrevocable election to apply the fair value option to our Credit Facility future decreases of fair value of our debt will have a corresponding increase to our NAV. Further increases of fair value of our debt will have the opposite effect. Any future indebtedness that we elect the fair value option for may have similar effects on our NAV as our Credit Facility. This will tend to mitigate volatility in our earnings and NAV. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

The impact of recent financial reform legislation on us is uncertain.

In light of current conditions in the U.S. and global financial markets and the U.S. and global economy, legislators, the presidential administration and regulators have increased their focus on the regulation of the financial services industry. The Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act, became effective in 2010. Although many provisions of the Dodd-Frank Act have delayed effectiveness or will not become effective until the relevant federal agencies issue new rules to implement the Dodd-Frank Act, the Dodd-Frank Act may nevertheless have a material adverse impact on the financial services industry as a whole and on our business, financial condition and results of operations. Accordingly, we are continuing to evaluate the effect the Dodd-Frank Act or implementing its regulations will have on our business, financial condition and results of operations.

Changes in laws or regulations governing our operations may adversely affect our business.

We and our portfolio companies are subject to regulation by laws at the local, state and federal levels. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any change in these laws or regulations could have a material adverse effect on our business. See Regulation for more information.

Our board of directors may change our investment objectives, operating policies and strategies without prior notice or stockholder approval.

Our board of directors has the authority to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval (except as required by the 1940 Act). However, absent stockholder approval, under the 1940 Act we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and value of our stock. Nevertheless, the effects may adversely affect our business and impact our ability to make distributions.

Table of Contents

RISKS RELATING TO THE ILLIQUID NATURE OF OUR PORTFOLIO ASSETS

We invest in illiquid assets, and our valuation procedures with respect to such assets may result in recording values that are materially different than the values we ultimately receive upon disposition of such assets.

All of our investments are recorded using broker or dealer quotes, or at fair value as determined in good faith by our board of directors. We expect that primarily most, if not all, of our investments (other than cash and cash equivalents) and the fair value of the Credit Facility will be classified as Level 3 under the Financial Accounting Standards Board, or FASB, Accounting Standards Codification, or ASC, Topic 820, Fair Value Measurements and Disclosures, or ASC 820. This means that the portfolio valuations will be based on unobservable inputs and our own assumptions about how market participants would price the asset or liability. We expect that inputs into the determination of fair value of our portfolio investments and Credit Facility borrowings will require significant management judgment or estimation. Even if observable market data are available, such information may be the result of consensus pricing information or broker quotes, which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by such a disclaimer materially reduces the reliability of such information.

Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. In determining fair value in good faith, we generally obtain financial and other information from portfolio companies, which may represent unaudited, projected or pro forma financial information. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses; we are instead required by the 1940 Act to specifically fair value each individual investment on a quarterly basis. We record unrealized appreciation if we believe that the underlying portfolio company has appreciated in value. Likewise, we record unrealized depreciation if we believe that the underlying portfolio company has depreciated in value. As a result, there will be uncertainty as to the value of our portfolio investments.

We adjust quarterly the valuation of our portfolio to reflect our board of directors' determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded on our Consolidated Statements of Operations as net change in unrealized appreciation or depreciation.

At September 30, 2014, all of our investments were recorded at fair value as approved in good faith by our board of directors. Our board of directors uses the services of one or more nationally recognized independent valuation firms to aid it in determining the fair value of our investments. The factors that may be considered in fair value pricing of our investments include the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and cash flows, the markets in which the portfolio company does business, comparison to publicly traded companies and other relevant factors. Because valuations may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the value received in an actual transaction. Additionally, valuations of private securities and private companies are inherently uncertain. Our NAV could be adversely affected if our determinations regarding the fair value of our investments were materially higher or lower than the values that we ultimately realize upon the disposal of such investments.

The lack of liquidity in our investments may adversely affect our business.

We may acquire our investments directly from the issuer in privately negotiated transactions. Substantially all of these securities are subject to legal and other restrictions on resale or are otherwise less liquid than publicly traded securities. We typically exit our investments when the portfolio company has a liquidity event such as a sale, refinancing, or initial public offering of the company, but we are not required to do so.

The illiquidity of our investments may make it difficult or impossible for us to sell such investments if the need arises, particularly at times when the market for illiquid securities is substantially diminished. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments, which could have a material adverse effect on our business, financial condition and results of operations. In addition, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we have material non-public information regarding such portfolio company.

Investments purchased by us that are liquid at the time of purchase may subsequently become illiquid due to events relating to the issuer of the investments, market events, economic conditions or investor perceptions. Domestic and foreign markets are complex and interrelated, so that events in one sector of the world markets or economy, or in one geographical region, can reverberate and have materially negative consequences for other market, economic or regional sectors in a manner that may not be foreseen and which may materially harm our business.

Table of Contents

A general disruption in the credit markets could materially damage our business.

We are susceptible to the risk of significant loss if we are forced to discount the value of our investments in order to provide liquidity to meet our liability maturities. Funding I's borrowings under its Credit Facility are collateralized by the assets in our investment portfolio. A general disruption in the credit markets could result in a diminished appetite for our securities. In addition, with respect to over-the-counter traded securities, the continued viability of any over-the-counter secondary market depends on the continued willingness of dealers and other participants to purchase the securities.

If the fair value of our assets declines substantially, we may fail to maintain the asset coverage ratio stipulated by the 1940 Act, which could, in turn, cause us to lose our status as a BDC and materially impair our business operations. Our liquidity could be impaired further by an inability to access the capital markets or to draw down Funding I's Credit Facility. These situations may arise due to circumstances that we may be unable to control, such as a general disruption in the credit markets, a severe decline in the value of the U.S. dollar, a sharp economic downturn or an operational problem that affects third parties or us, and could materially damage our business.

We rely in part on our over-the-counter securities, which have and may continue to face liquidity constraints under recent market conditions, to provide us with adequate liquidity.

The market for over-the-counter traded securities has and may continue to experience limited liquidity and other weakness as the viability of any over-the-counter secondary market depends on the continued willingness of dealers and other participants to purchase the securities.

RISKS RELATED TO OUR INVESTMENTS

Our investments in prospective portfolio companies may be risky, and you could lose all or part of your investment.

We intend to invest primarily in Floating Rate Loans, which may consist of senior secured loans, mezzanine debt and selected equity investments issued by U.S. middle-market companies.

1. ***Floating Rate Loans:*** The Floating Rate Loans we invest in are usually rated below investment grade or may also be unrated. Investments in Floating Rate Loans rated below investment grade are considered speculative because of the credit risk of their issuers. Such companies are more likely than investment grade issuers to default on their payments of interest and principal owed to us, and such defaults could reduce our NAV and income distributions. An economic downturn would generally lead to a higher non-payment rate by portfolio companies, and a Floating Rate Loan may lose significant market value before a default occurs and we may experience losses due to the inherent illiquidity of the investments. Moreover, any specific collateral used to secure a Floating Rate Loan may decline in value or become illiquid, which would adversely affect the Floating Rate Loan's value. Floating Rate Loans are subject to a number of risks, including liquidity risk and the risk of investing in below investment-grade, variable-rate securities.

Floating Rate Loans are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to us, a reduction in the value of the investment and a potential decrease in our NAV. There can be no assurance that the liquidation of any collateral securing a Floating Rate Loan would satisfy the borrower's obligation in the event of non-payment of scheduled interest or principal payments, or that the collateral could be readily liquidated. In the event of bankruptcy or insolvency of a borrower, we could experience delays or limitations with respect to our ability to realize the benefits of the collateral securing a Floating Rate Loan. The collateral securing a Floating Rate Loan may lose all or substantially all of its value in the event of the bankruptcy or insolvency of a borrower. Some loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the rights in collateral of such loans to presently existing or future indebtedness of the borrower or take other action detrimental to the holders of loans including, in certain circumstances, invalidating such loans or causing interest previously paid to be refunded to the borrower. Either such step could materially negatively affect our performance.

Table of Contents

We may acquire Floating Rate Loans through assignments or participations of interests in such loans. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to such debt obligation. However, the purchaser's rights can be more restricted than those of the assigning institution, and we may not be able to unilaterally enforce all rights and remedies under an assigned debt obligation and with regard to any associated collateral. A participation typically results in a contractual relationship only with the institution participating out the interest and not directly with the borrower. Sellers of participations typically include banks, broker-dealers, other financial institutions and lending institutions. In purchasing participations, we generally will have no right to enforce compliance by the borrower with the terms of the loan agreement against the borrower, and we may not directly benefit from the collateral supporting the debt obligation in which we have purchased the participation. As a result, we will be exposed to the credit risk of both the borrower and the institution selling the participation. Further, in purchasing participations in lending syndicates, we will not be able to conduct the same level of due diligence on a borrower or the quality of the Floating Rate Loan with respect to which we are buying a participation as we would conduct if we were investing directly in the Floating Rate Loan. This difference may result in us being exposed to greater credit or fraud risk with respect to such Floating Rate Loans than we expected when initially purchasing the participation.

2. **Senior Secured Loans:** When we extend senior secured loans, which we define to include first lien debt, we will generally take a security interest in the available assets of these portfolio companies, including the equity interests of their subsidiaries, although this will not always be the case. We expect this security interest, if any, to help mitigate the risk that we will not be repaid. However, there is a risk that the collateral securing our loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of the portfolio company to raise additional capital. Also, in some circumstances, our lien could be subordinated to claims of other creditors. In addition, deterioration in a portfolio company's financial condition and prospects, including its inability to raise additional capital, may be accompanied by deterioration in the value of the collateral for the loan. Consequently, the fact that a loan is secured does not guarantee that we will receive principal and interest payments according to the loan's terms, or at all, or that we will be able to collect on the loan should we be forced to enforce our remedies.
3. **Mezzanine Debt:** Our mezzanine debt investments, which we define to include second lien secured and subordinated debt, will generally be subordinated to senior secured loans and will generally be unsecured. Our second lien debt is subordinated debt that benefits from a collateral interest in the borrower. As such, other creditors may rank senior to us in the event of insolvency. This may result in an above average amount of risk and volatility or a loss of principal. These investments may involve additional risks that could adversely affect our investment returns. To the extent interest payments associated with such debt are deferred, such debt may be subject to greater fluctuations in valuations, and such debt could subject us and our stockholders to non-cash income. Since we may not receive cash interest or principal prior to the maturity of some of our mezzanine debt investments, such investments may be of greater risk than cash paying loans.
4. **Equity Investments:** We have made and expect to continue to make select equity investments, all of which are subordinated to debt investments. In addition, when we invest in senior secured loans or mezzanine debt, we may acquire warrants to purchase equity investments from time to time. Our goal is ultimately to dispose of these equity investments and realize gains upon our disposition of such interests. However, the equity investments we receive may not appreciate in value and, in fact, may decline in value. Accordingly, we may not be able to realize gains from our equity investments, and any gains that we do realize on the disposition of any equity investments may not be sufficient to offset any other losses we experience. In addition, many of the equity securities in which we invest may not pay dividends on a regular basis, if at all.

Table of Contents

In addition, investing in middle-market companies involves a number of significant risks, including:

companies may be highly leveraged, have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of us realizing any guarantees we may have obtained in connection with our investment;

they typically have shorter operating histories, more limited publicly-available information, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and changing market conditions, as well as general economic downturns;

they are more likely to depend on the management talents and efforts of a small group of persons; therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us;

they generally have less predictable operating results, may from time to time be parties to litigation, may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence, and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position. In addition, our executive officers, directors and our Investment Adviser may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies; and

they may have difficulty accessing the capital markets to meet future capital needs, which may limit their ability to grow or to repay their outstanding indebtedness upon maturity.

Under the 1940 Act we may invest up to 30% of our assets in investments that are not qualifying assets for business development companies. If we do not invest a sufficient portion of our assets in qualifying assets, we could be precluded from investing in assets that we deem to be attractive.

As a BDC, we may not acquire any asset other than qualifying assets, as defined under the 1940 Act, unless at the time the acquisition is made such qualifying assets represent at least 70% of the value of our total assets. Qualifying assets include investments in U.S. operating companies whose securities are not listed on a national securities exchange and companies listed on a national securities exchange subject to a maximum market capitalization of \$250 million. Qualifying assets also include cash, cash equivalents, government securities and high quality debt securities maturing in one year or less from the time of investment.

We believe that most of our debt and equity investments do and will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we will be prohibited from making any additional investment that is not a qualifying asset and could be forced to forgo attractive investment opportunities. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to comply with the 1940 Act. If we need to dispose of such investments quickly, it would be difficult to dispose of such investments on favorable terms. For example, we may have difficulty in finding a buyer and, even if we do find a buyer, we may have to sell the investments at a substantial loss.

We are a non-diversified investment company within the meaning of the 1940 Act, and therefore we generally are not limited with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer, excluding limitations on investments in other investment companies. To the extent that we assume large positions in the securities of a small number of issuers, our NAV may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market's assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond our

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

income tax diversification requirements, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may be unable to repay loans from us during these periods. Therefore, our non-performing assets are likely to increase, and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions also may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a material decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing investments and materially harm our operating results.

Table of Contents

A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and potential termination of its loans and foreclosure on its secured assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. Depending on the facts and circumstances of our investments and the extent of our involvement in the management of a portfolio company, upon the bankruptcy of a portfolio company, a bankruptcy court may recharacterize our debt investments as equity investments and subordinate all or a portion of our claim to that of other creditors. This could occur regardless of how we may have structured our investment.

If we fail to make follow-on investments in our portfolio companies, this could materially impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in order to:

increase or maintain in whole or in part our equity ownership percentage;

exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or

attempt to preserve or enhance the value of our investment.

We have the discretion to make any follow-on investments, subject to the availability of capital resources and regulatory considerations. We may elect not to make follow-on investments or otherwise lack sufficient funds to make those investments. Any failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with BDC requirements or the desire to maintain our RIC status.

Because we do not generally hold controlling equity interests in our portfolio companies, we are not in a position to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

Because we do not generally have controlling equity positions in our portfolio companies, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and the stockholders and management of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity for the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company, and may therefore suffer a decrease in the value of our investments.

An investment strategy focused primarily on privately held companies, including controlling equity interests, presents certain challenges, including the lack of available or comparable information about these companies, a dependence on the talents and efforts of only a few key portfolio company personnel and a greater vulnerability to economic downturns.

We have invested and intend to continue to invest primarily in privately held companies. Generally, little public information exists about these companies, and we rely on the ability of our Investment Adviser's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. If they are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose value on our investments. Also, privately held companies frequently have less diverse product lines and smaller market presence than larger competitors. These factors could have a material adverse impact on our investment returns as compared to companies investing primarily in the securities of public companies.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We invest primarily in Floating Rate Loans issued by our portfolio companies. The portfolio companies usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, our investments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company,

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying such senior creditors, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Table of Contents

Our incentive fee may induce the Investment Adviser to make speculative investments.

The incentive fee payable by us to PennantPark Investment Advisers may create an incentive for PennantPark Investment Advisers to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The incentive fee payable to our Investment Adviser is calculated based on a percentage of our return on invested capital. This may encourage our Investment Adviser to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor the holders of our common stock. In addition, our Investment Adviser will receive the incentive fee based, in part, upon net capital gains realized on our investments. Unlike that portion of the incentive fee based on income, there is no hurdle applicable to the portion of the incentive fee based on net capital gains. As a result, the Investment Adviser may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

The part of our incentive fee payable by us to PennantPark Investment Advisers that relates to our investment income is computed and paid on income that has been accrued but that has not been received in cash. PennantPark Investment Advisers is not obligated to reimburse us for any such incentive fees even if we subsequently incur losses or never receive in cash the deferred income that was previously accrued. As a result, there is a risk that we will pay incentive fees with respect to income that we never receive in cash.

Our investments in foreign securities may involve significant risks in addition to the risks inherent in U.S. investments.

Our investment strategy contemplates potential investments in securities of companies located outside of the United States. Investments in securities located outside the United States would not be qualifying assets under Section 55(a) of the 1940 Act. Investing in companies located outside of the United States may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations, political and social instability, expropriation, imposition of foreign taxes, less liquid markets and less available information than is generally the case in the United States, higher transaction costs, less government supervision of exchanges, brokers and issuers, less developed bankruptcy laws, difficulty in enforcing contractual obligations, lack of uniform accounting and auditing standards and greater price volatility.

Although most of our investments will be U.S. dollar-denominated, any investments denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques such as using our Credit Facility's multicurrency capability to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk or, that if we do, such strategies will be effective.

We may make investments that cause our stockholders to bear investment advisory fees and other expenses on such investments in addition to our management fees and expenses.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies and companies that would be investment companies but are excluded from the definition of an investment company provided in Section 3(c) of the 1940 Act. To the extent we do so invest, we will bear our ratable share of any such investment company's expenses, including management and performance fees. We will also remain obligated to pay investment advisory fees, consisting of a base management fee and an incentive fee, to PennantPark Investment Advisers with respect to investments in the securities and instruments of other investment companies under our Investment Management Agreement. With respect to any such investments, each of our stockholders will bear his or her share of the investment advisory fees of PennantPark Investment Advisers as well as indirectly bearing the investment advisory fees and other expenses of any investment companies in which we invest.

The effect of global climate change may impact the operations of our portfolio companies.

There may be evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies' financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions.

Table of Contents

We may be obligated to pay our Investment Adviser incentive compensation even if we incur a loss.

Our Investment Adviser is entitled to incentive compensation for each fiscal quarter in an amount equal to a percentage of the excess of our investment income for that quarter (before deducting incentive compensation, net operating losses and certain other items) above a threshold return for that quarter. Our Pre-Incentive Fee Net Investment Income for incentive compensation purposes excludes realized and unrealized capital losses that we may incur in the fiscal quarter, even if such capital losses result in a net loss on our Consolidated Statements of Operations for that quarter. Thus, we may be required to pay the Investment Adviser incentive compensation for a fiscal quarter even if there is a decline in the value of our portfolio or we incur a net loss for that quarter.

We may expose ourselves to risks if we engage in hedging transactions.

If we engage in hedging transactions, we may expose ourselves to risks associated with such transactions. We may borrow under a multicurrency credit facility in currencies selected to minimize our foreign currency exposure or, to the extent permitted by the 1940 Act and applicable commodities laws, use instruments such as forward contracts, currency options and interest rate swaps, caps, collars and floors to seek to hedge against fluctuations in the relative values of our portfolio positions from changes in currency exchange rates and market interest rates. Hedging against a decline in the values of our interest rate or currency positions does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline. However, such hedging designed to gain from those changes in interest rates or foreign currency exposures, for instance, may also limit the opportunity for gain if the changes in the underlying positions should move against such hedges. Moreover, it may not be possible to hedge against an exchange rate or interest rate fluctuation that is so generally anticipated that we are not able to enter into a hedging transaction at an acceptable price.

While we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged may vary. Moreover, for a variety of reasons, we may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation may prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it may not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations. Our ability to engage in hedging transactions may also be adversely affected by recent rules adopted by the Commodity Futures Trading Commission.

Any investments in distressed debt may not produce income and may require us to bear large expenses in order to protect and recover our investment.

Distressed debt investments may not produce income and may require us to bear certain additional expenses in order to protect and recover our investment. Therefore, to the extent we invest in distressed debt, our ability to achieve current income for our stockholders may be diminished. We also will be subject to significant uncertainty as to when and in what manner and for what value the distressed debt in which we invest will eventually be satisfied (e.g., through liquidation of the obligor's assets, an exchange offer or plan of reorganization involving the distressed debt securities or a payment of some amount in satisfaction of the obligation). In addition, even if an exchange offer is made or plan of reorganization is adopted with respect to distressed debt we hold, there can be no assurance that the securities or other assets received by us in connection with such exchange offer or plan of reorganization will not have a lower value or income potential than may have been anticipated when the investment was made. Moreover, any securities received by us upon completion of an exchange offer or plan of reorganization may be restricted as to resale. If we participate in negotiations with respect to any exchange offer or plan of reorganization with respect to an issuer of distressed debt, we may be restricted from disposing of such securities.

RISKS RELATING TO AN INVESTMENT IN OUR COMMON STOCK

We may obtain the approval of our stockholders to issue shares of our common stock at prices below the then current NAV per share of our common stock. If we receive such approval from stockholders in the future, we may issue shares of our common stock at a price below the then current NAV per share of common stock. Any such issuance could materially dilute your interest in our common stock and reduce our NAV per share.

We intend to seek to obtain from our stockholders and they may approve a proposal that authorizes us to issue shares of our common stock at prices below the then current NAV per share of our common stock in one or more offerings for a 12-month period. Such approval would allow us to access the capital markets in a way that we were previously unable to do as a result of restrictions that, absent stockholder approval, apply to BDCs under the 1940 Act.

Table of Contents

Any sale or other issuance of shares of our common stock at a price below NAV per share will result in an immediate dilution to your interest in our common stock and a reduction of our NAV per share. This dilution would occur as a result of a proportionately greater decrease in a stockholder's interest in our earnings and assets and voting interest in us than the increase in our assets resulting from such issuance. Because the number of future shares of common stock that may be issued below our NAV per share and the price and timing of such issuances are not currently known, we cannot predict the actual dilutive effect of any such issuance. We also cannot determine the resulting reduction in our NAV per share of any such issuance at this time. We caution you that such effects may be material, and we undertake to describe all the material risks and dilutive effects of any offerings we make at a price below our then current NAV in the future in a prospectus supplement issued in connection with any such offering.

The determination of NAV in connection with an offering of shares of common stock will involve the determination by our board of directors or a committee thereof that we are not selling shares of our common stock at a price below the then current NAV of our common stock at the time at which the sale is made or otherwise in violation of the 1940 Act unless we have previously received the consent of the majority of our common stockholders to do so and the board of directors decides such an offering is in the best interests of our common stockholders. Whenever we do not have current stockholder approval to issue shares of our common stock at a price per share below our then current NAV per share, the offering price per share (exclusive of any distributing commission or discount) will equal or exceed our then current NAV per share, based on the value of our portfolio securities and other assets determined in good faith by our board of directors as of a time within 48 hours (excluding Sundays and holidays) of the sale.

There is a risk that our stockholders may not receive distributions or that our distributions may not grow over time.

We intend to make distributions on a monthly basis to our stockholders out of assets legally available for distribution. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. In addition, due to the asset coverage ratio applicable to us as a BDC, we may be limited in our ability to make distributions. Further, if more stockholders opt to receive cash dividends and other distributions rather than participate in our dividend reinvestment plan, we may be forced to liquidate some of our investments and raise cash in order to make distribution payments, which could materially harm our business. Finally, to the extent we make distributions to stockholders which include a return of capital, that portion of the distribution essentially constitutes a return of the stockholders' investment. Although such return of capital may not be taxable, such distributions may increase an investor's tax liability for capital gains upon the future sale of our common stock.

Investing in our shares may involve an above average degree of risk.

The investments we make in accordance with our investment objectives may result in a higher amount of risk and volatility than alternative investment options or loss of principal. Our investments in portfolio companies may be highly speculative and aggressive and therefore, an investment in our shares may not be suitable for someone with lower risk tolerance.

We may allocate the net proceeds from any offering of our securities in ways with which you may not agree.

We have significant flexibility in investing the net proceeds of any offering of our securities and may use the net proceeds from an offering in ways with which you may not agree or for purposes other than those contemplated at the time of the offering.

Our shares may trade at discounts from NAV or at premiums that are unsustainable over the long term.

Shares of BDCs may trade at a market price that is less than the NAV that is attributable to those shares. Our shares have traded above and below our NAV. Our shares closed on the NASDAQ Global Select Market at \$13.78 on both September 30, 2014 and 2013. Our NAV per share was \$14.40 and \$14.10 for the same periods. The possibility that our shares of common stock will trade at a discount from NAV or at a premium that is unsustainable over the long term is separate and distinct from the risk that our NAV will decrease. It is not possible to predict whether our shares will trade at, above or below NAV in the future.

The market price of our common stock may fluctuate significantly.

The market price and liquidity of the market for shares of our common stock may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

significant volatility in the market price and trading volume of securities of BDCs or other companies in our sector, which are not necessarily related to the operating performance of these companies;

changes in regulatory policies or tax guidelines, particularly with respect to RICs or BDCs;

any loss of our BDC or RIC status;

Table of Contents

changes in earnings or variations in operating results;

changes in prevailing interest rates;

changes in the value of our portfolio of investments;

any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;

the inability of our Investment Adviser to employ additional experienced investment professionals or the departure of any of the Investment Adviser's key personnel;

operating performance of companies comparable to us;

general national and international economic trends and other external factors;

general price and volume fluctuations in the stock markets, including as a result of short sales;

conversion features of subscription rights, warrants or convertible debt; and

loss of a major funding source.

Since our initial listing on the NASDAQ Global Select Market, our shares of common stock have traded at a wide range of prices. We can offer no assurance that our shares of common stock will not display similar volatility in future periods.

We may be unable to invest the net proceeds raised from offerings on acceptable terms, which would harm our financial condition and operating results.

Until we identify new investment opportunities, we intend to either invest the net proceeds of future offerings in cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less or use the net proceeds from such offerings to reduce then-outstanding obligations under our Credit Facility. We cannot assure you that we will be able to find enough appropriate investments that meet our investment criteria or that any investment we complete using the proceeds from an offering will produce a sufficient return.

Sales of substantial amounts of our securities may have an adverse effect on the market price of our securities.

Sales of substantial amounts of our securities, or the availability of such securities for sale, could adversely affect the prevailing market prices for our securities. If this occurs and continues it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

You may have current tax liabilities on distributions you reinvest in our common stock.

Under the dividend reinvestment plan, if you own shares of our common stock registered in your own name, you will have all cash distributions automatically reinvested in additional shares of our common stock unless you opt out of the dividend reinvestment plan by delivering a written notice to the plan administrator prior to the record date of the next dividend or distribution. If you have not opted out of the dividend reinvestment plan, you will be deemed to have received, and for federal income tax purposes will be taxed on, the amount reinvested in our common stock to the extent the amount reinvested was not a tax-free return of capital. As a result, you may have to use funds from other sources

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

to pay your federal income tax liability on the value of the common stock received. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Distributions for more information.

Table of Contents

There is a risk that our common stockholders may receive our stock as distributions in which case they may be required to pay taxes in excess of the cash they receive.

We may distribute our common stock as a dividend of our taxable income and a stockholder could receive a portion of the dividends declared and distributed by us in shares of our common stock with the remaining amount in cash. A stockholder will be considered to have recognized dividend income equal to the fair market value of the stock paid by us plus cash received with respect to such dividend. The total dividend declared would be taxable income to a stockholder even though he or she may only receive a relatively small portion of the dividend in cash to pay any taxes due on the dividend. We have not elected to distribute stock as a dividend but reserve the right to do so.

We incur significant costs as a result of being a publicly traded company.

As a publicly traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002, as amended, or the Sarbanes-Oxley Act, and other rules implemented by the SEC and the listing standards of the NASDAQ Stock Market LLC.

Provisions of the Maryland General Corporation Law and of our charter and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Maryland General Corporation Law, our charter and our bylaws contain provisions that may discourage, delay or make more difficult a change in control of us or the removal of our directors. We are subject to the Maryland Business Combination Act, the application of which is subject to any applicable requirements of the 1940 Act. Our board of directors has adopted a resolution exempting from the Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our board does not approve a business combination, the Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer.

In addition, our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our common stock by any person. If we amend our bylaws to repeal the exemption from such act, it may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer. Our bylaws require us to consult with the SEC staff before we repeal such exemption. Also, our charter provides for classifying our board of directors in three classes serving staggered three-year terms, and provisions of our charter authorize our board of directors to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our charter, without stockholder approval, to increase or decrease the number of shares of stock that we have authority to issue.

These anti-takeover provisions may inhibit a change of control in circumstances that could give our stockholders the opportunity to realize a premium over the market price for our common stock.

FORWARD-LOOKING STATEMENTS

This prospectus contains statements that constitute forward-looking statements, which relate to us and our consolidated subsidiary regarding future events or our future performance or future financial condition. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about our Company, our industry, our beliefs and our assumptions. The forward-looking statements contained in this prospectus involve risks and uncertainties, including statements as to:

our future operating results;

our business prospects and the prospects of our prospective portfolio companies;

the dependence of our future success on the general economy and its impact on the industries in which we invest;

the impact of a protracted decline in the liquidity of credit markets on our business;

the impact of investments that we expect to make;

the impact of fluctuations in interest rates on our business and our portfolio companies;

our contractual arrangements and relationships with third parties;

the valuation of our investments in portfolio companies, particularly those having no liquid trading market;

the ability of our prospective portfolio companies to achieve their objectives;

our expected financings and investments;

the adequacy of our cash resources and working capital;

the timing of cash flows, if any, from the operations of our prospective portfolio companies;

the impact of price and volume fluctuations in the stock markets;

the ability of our Investment Adviser to locate suitable investments for us and to monitor and administer our investments;

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

the impact of future legislation and regulation on our business and our portfolio companies; and

the impact of European sovereign debt issues.

We use words such as anticipates, believes, expects, intends, seeks, plans, estimates and similar expressions to identify forward-looking statements. You should not place undue influence on the forward looking statements as our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors set forth in Risk Factors and elsewhere in this prospectus.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new loans and investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus should not be regarded as a representation by us that our plans and objectives will be achieved.

We have based the forward-looking statements included in this prospectus on information available to us on the date of this prospectus, and we assume no obligation to update any such forward-looking statements. Although we undertake no obligation to revise or update any forward-looking statements in this prospectus, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through a supplemental prospectus or through periodic reports that we in the future may file with the SEC, including annual and quarterly reports on Form 10-K/Q and current reports on Form 8-K.

You should understand that, under Section 27A(b)(2)(B) of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E(b)(2)(B) of the Exchange Act, the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 do not apply to forward-looking statements made in connection with any offering of securities pursuant to this prospectus or in periodic reports we file under the Exchange Act.

Table of Contents

USE OF PROCEEDS

We may use the net proceeds from selling securities pursuant to this prospectus to reduce our then-outstanding obligations under our Credit Facility, to invest in new or existing portfolio companies, or for other general corporate or strategic purposes. Any supplements to this prospectus relating to an offering may more fully identify the use of the proceeds from such offering.

As of September 30, 2014, we had \$146.4 million in borrowings outstanding under our \$200 million Credit Facility. Borrowings under our Credit Facility bear interest at LIBOR plus 200 basis points per annum during the revolving period, and the rate resets to LIBOR plus 425 basis points per annum for the remaining two years. At September 30, 2014, the interest rate was 2.16%, excluding the 0.375% undrawn commitment fee. The Credit Facility is a revolving facility maturing in May 2018 and is secured by all of the assets held by Funding I. Amounts repaid under our Credit Facility remain available for future borrowings during the revolving period. See Management's Discussion and Analysis of Financial Condition and Results of Operations for more information.

We may invest the proceeds from an offering of securities in new or existing portfolio companies, and such investments may take up to a year from the closing of such offering, in part because privately negotiated investments in illiquid securities or private middle-market companies require substantial due diligence and structuring. During this period, we may use the net proceeds from our offering to reduce then-outstanding obligations under our Credit Facility or to invest such proceeds in cash equivalents, U.S. government securities and other high-quality debt investments that mature in one year or less. We expect to earn yields on such investments, if any, that are lower than the interest income that we anticipate receiving in respect of investments in non-temporary investments. As a result, any distributions we make during this investment period may be lower than the distributions that we would expect to pay when such proceeds are fully invested in non-temporary investments. See Regulation Temporary Investments for more information.

Table of Contents**SELECTED FINANCIAL DATA**

We have derived the other data below from our audited and unaudited financial data and, in the opinion of management, such information reflects all adjustments (consisting of normal recurring adjustments) that are necessary to present fairly the results of such periods. The Consolidated Statement of Operations data, per share data and Consolidated Statement of Assets and Liabilities data presented are derived from our audited Consolidated Financial Statements. These selected financial data should be read in conjunction with our Consolidated Financial Statements and related notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations.

	Year ended September 30, 2014	Year ended September 30, 2013	Year ended September 30, 2012	For the period March 4, 2011 (commencement of operations) to September 30, 2011

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

The information contained in this section should be read in conjunction with the selected financial data and our consolidated financial statements and notes thereto appearing elsewhere in this prospectus.

Overview

PennantPark Floating Rate Capital Ltd. is a BDC whose objectives are to generate current income and capital appreciation by investing primarily in Floating Rate Loans and other investments made to U.S. middle-market companies.

We believe that Floating Rate Loans to U.S. middle-market companies offer attractive risk adjusted returns due to a limited amount of capital available for such companies and the potential for rising interest rates. We use the term "middle-market" to refer to companies with annual revenues between \$50 million and \$1 billion. Our investments are typically rated below investment grade. Securities rated below investment grade are often referred to as "leveraged loans" or "high yield" securities or "junk bonds" and are often higher risk compared to debt instruments that are rated above investment grade and have speculative characteristics. However, when compared to junk bonds and other non-investment grade debt, senior secured Floating Rate Loans typically have more robust capital-preserving qualities, such as historically lower default rates than junk bonds, represent the senior source of capital in a borrower's capital structure and often have certain of the borrower's assets pledged as collateral. Our debt investments may generally range in maturity from three to ten years and are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions.

Under normal market conditions, we generally expect that at least 80% of the value of our Managed Assets will be invested in Floating Rate Loans and other investments bearing a variable-rate of interest. We generally expect that senior secured loans, or first lien loans, will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including second lien, high yield, mezzanine and distressed debt securities and, to a lesser extent, equity investments. Our investment size may generally range between \$1 million and \$15 million, on average, although we expect that this investment size will vary proportionately with the size of our capital base.

Our investment activity depends on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. We have used, and expect to continue to use our Credit Facility, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives.

Organization and Structure of PennantPark Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd., a Maryland corporation organized in October 2010, is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for federal income tax purposes we elected to be treated, and intend to qualify annually, as a RIC under the Code.

Table of Contents

Our investment activities are managed by the Investment Adviser. Under our Investment Management Agreement, we have agreed to pay our Investment Adviser an annual base management fee based on our average adjusted gross total assets as well as an incentive fee based on our investment performance. We have also entered into an Administration Agreement with the Administrator. Under our Administration Agreement, we have agreed to reimburse the Administrator for our allocable portion of overhead and other expenses incurred by the Administrator in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Compliance Officer, Chief Financial Officer and their respective staffs. Our board of directors, a majority of whom are independent of us, provides overall supervision of our activities, and the Investment Adviser supervises our day-to-day activities.

Revenues

We generate revenue in the form of interest income on the debt securities we hold and capital gains and dividends, if any, on investment securities that we hold in portfolio companies. Our debt investments, whether in the form of senior secured loans or mezzanine debt, typically have a term of three to ten years and bear interest at a fixed or floating rate. Interest on debt securities is generally payable quarterly or semiannually. In some cases, some of our investments provide for deferred interest payments or PIK interest. The principal amount of the debt securities and any accrued but unpaid interest generally becomes due at the maturity date. In addition, we may generate revenue in the form of amendment, commitment, origination, structuring or diligence fees, fees for providing managerial assistance and possibly consulting fees. Loan origination fees, OID and market discount or premium are capitalized, and we accrete or amortize such amounts as income. We record prepayment penalties on loans and debt securities as income. Dividend income, if any, is recognized on an accrual basis on the ex-dividend date to the extent that we expect to collect such amounts.

Expenses

Our primary operating expenses include the payment of a management fee to our Investment Adviser, the payment of an incentive fee to our Investment Adviser, if any, our allocable portion of overhead under our Administration Agreement and other operating costs as detailed below. Our management fee compensates our Investment Adviser for its work in identifying, evaluating, negotiating, consummating and monitoring our investments. Additionally, we pay interest expense on the outstanding debt and unused commitment fees under our Credit Facility. We bear all other direct or indirect costs and expenses of our operations and transactions, including:

the cost of calculating our NAV, including the cost of any third-party valuation services;

the cost of effecting sales and repurchases of shares of our common stock and other securities;

fees payable to third parties relating to, or associated with, making investments, including fees and expenses associated with performing due diligence and reviews of prospective investments or complimentary businesses;

expenses incurred by the Investment Adviser in performing due diligence and reviews of investments;

transfer agent and custodial fees;

fees and expenses associated with marketing efforts;

federal and state registration fees and any stock exchange listing fees;

fees and expenses associated with independent audits and outside legal costs;

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

federal, state and local taxes;

independent directors' fees and expenses;

brokerage commissions;

fidelity bond, directors and officers, errors and omissions liability insurance and other insurance premiums;

direct costs such as printing, mailing, long distance telephone and staff;

costs associated with our reporting and compliance obligations under the 1940 Act and applicable federal and state securities laws; and

Table of Contents

all other expenses incurred by either the Administrator or us in connection with administering our business, including payments under our Administration Agreement that will be based upon our allocable portion of overhead, and other expenses incurred by the Administrator in performing its obligations under our Administration Agreement, including rent and our allocable portion of the costs of compensation and related expenses of our Chief Compliance Officer, Chief Financial Officer and their respective staffs. Generally, during periods of asset growth, we expect our general and administrative expenses to be relatively stable or to decline as a percentage of total assets and increase during periods of asset declines. Incentive fees, interest expense and costs relating to future offerings of securities would be additive to the expenses described above.

The SEC requires that Total Estimated Annual Expenses be calculated as a percentage of average net assets in the table on page 4 of this prospectus rather than as a percentage of average total assets. Total assets include assets that have been funded with borrowed money (leverage). For reference, the table below illustrates our Total Estimated Annual Expenses as a percentage of average total assets:

Estimated Annual Expenses (as a Percentage of Average Total Assets⁽¹⁾)

Base management fees	1.00 % ⁽²⁾
Incentive fees	1.20 % ⁽³⁾
Interest on borrowed funds	0.97 % ⁽⁴⁾
Other expenses	0.62 % ⁽⁵⁾
Total estimated annual expenses	3.79 % ⁽⁶⁾

- (1) Average total assets attributable to common shares equals average adjusted gross assets for the three months ended September 30, 2014.
- (2) The contractual management fee is calculated at an annual rate of 1.00% of our average adjusted gross assets. See Certain Relationships and Transactions Investment Management Agreement for more information.
- (3) The portion of incentive fees paid with respect to net investment income and capital gains, if any, is based on actual amounts incurred during the three months ended September 30, 2014, annualized for a full year. Such incentive fees are based on performance, vary from period to period and are not paid unless our performance exceeds specified thresholds. Incentive fees in respect of net investment income do not include incentive fees in respect of net capital gains. The portion of our incentive fee paid in respect of net capital gains is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date) and equals 20.0% of our realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. For purposes of this chart and our Consolidated Financial Statements, our incentive fees on capital gains are calculated in accordance with GAAP. As we cannot predict our future net investment income or capital gains, the incentive fee paid in future periods, if any, may be substantially different than the fee earned during the three months ended September 30, 2014. For more detailed information about the incentive fee, please see Certain Relationships and Transactions Investment Management Agreement for more information.
- (4) As of September 30, 2014, we had \$146.4 million in borrowings outstanding under our \$200 million Credit Facility. We may use proceeds of an offering of securities under this registration statement to repay outstanding obligations under our Credit Facility. After completing any such offering, we may continue to borrow under our Credit Facility to finance our investment objectives. We have estimated the annual interest expense on borrowed funds, and caution you that our actual interest expense will depend on prevailing interest rates and our rate of borrowing, which may be substantially higher than the estimate provided in this table. See Risk Factors Risks Relating to our Business and Structure We currently use borrowed funds to make investments and are exposed to the typical risks associated with leverage for more information.
- (5) Other expenses includes our general and administrative expenses, professional fees, directors fees, insurance costs, expenses of our dividend reinvestment plan and the expenses of the Investment Adviser reimbursable under our Investment Management Agreement and of the Administrator reimbursable under our Administration Agreement. Such expenses are based on actual other expenses for the three months ended September 30, 2014, annualized for a full year.
- (6)

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

The table above is intended to assist you in understanding the various costs and expenses that an investor in shares of our common stock will bear as a percentage of our average gross assets as of September 30, 2014. However, we caution you that these percentages are estimates and may vary with changes in the market value of our investments, the amount of equity capital raised and used to invest in portfolio companies and changes in the level of expenses as a percentage of our gross assets. We may borrow money to leverage our net assets and increase our total assets and such leverage will affect both the total annual expenses and gross assets used in deriving the ratios in the above table. Thus, any differences in the estimated expenses and the corresponding level of average asset balances will affect the estimated percentages and those differences could be material.

PORTFOLIO AND INVESTMENT ACTIVITY

As of September 30, 2014, our portfolio totaled \$348.4 million and consisted of \$302.5 million of senior secured loans, \$36.5 million of second lien secured debt and \$9.4 million of subordinated debt, preferred and common equity. Our debt portfolio consisted of 95% variable-rate investments (including 92% with a LIBOR or prime floor) and 5% fixed-rate investments. As of September 30, 2014, we had one non-accrual debt investment, representing 0.6% of our overall portfolio on a cost basis. Overall, the portfolio had net unrealized appreciation of \$0.1 million. Our overall portfolio consisted of 72 companies with an average investment size of \$4.8 million, had a weighted average yield on debt investments of 8.2%, and was invested 87% in senior secured loans, 10% in second lien secured debt and 3% in subordinated debt, preferred and common equity.

Table of Contents

As of September 30, 2013, our portfolio totaled \$317.8 million and consisted of \$281.0 million of senior secured loans, \$27.5 million of second lien secured debt and \$9.3 million of subordinated debt, preferred and common equity. Our debt portfolio consisted of 92% variable-rate investments (including 89% with a LIBOR or prime floor) and 8% fixed-rate investments. Overall, the portfolio had net unrealized depreciation of \$1.5 million. Our overall portfolio consisted of 83 companies with an average investment size of \$3.8 million, had a weighted average yield on debt investments of 8.1%, and was invested 88% in senior secured loans, 9% in second lien secured debt and 3% in subordinated debt, preferred and common equity.

For the fiscal year ended September 30, 2014, we invested \$248.1 million of investments in 36 new and 33 existing portfolio companies with a weighted average yield on debt investments of 8.2%. Sales and repayments of investments for the year ended September 30, 2014 totaled \$225.6 million.

For the fiscal year ended September 30, 2013, we invested \$316.5 million of investments in 75 new and 19 existing portfolio companies with a weighted average yield on debt investments of 7.9%. Sales and repayments of investments for the year ended September 30, 2013 totaled \$174.9 million.

For the fiscal year ended September 30, 2012, we invested \$128.7 million of investments in 47 new and seven existing portfolio companies with a weighted average yield on debt investments of 8.9%. Sales and repayments of investments for the year ended September 30, 2012 totaled \$71.3 million.

CRITICAL ACCOUNTING POLICIES

The preparation of our Consolidated Financial Statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of our assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of income and expenses during the reporting periods. Actual results could differ from these estimates due to changes in the economic and regulatory environment, financial markets and any other parameters used in determining such estimates. We reclassified certain prior period amounts to conform to the current period presentation. We have eliminated all intercompany balances and transactions. References to the ASC serve as a single source of accounting literature. Subsequent events are evaluated and disclosed as appropriate for events occurring through the date the Consolidated Financial Statements are issued. In addition to the discussion below, we describe our critical accounting policies in the notes to our Consolidated Financial Statements.

Valuation of Portfolio Investments

We expect that there may not be readily available market values for many of our investments which are or will be in our portfolio, and we value such investments at fair value as determined in good faith by or under the direction of our board of directors using a documented valuation policy described below and a consistently applied valuation process. With respect to investments for which there is no readily available market value, the factors that the board of directors may take into account in pricing our investments at fair value include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we consider the pricing indicated by the external event to corroborate or revise our valuation. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and the difference may be material.

Our investments generally consist of illiquid securities, including debt and equity investments, With respect to investments for which market quotations are not readily available, or for which market quotations are deemed not reflective of the fair value, our board of directors undertakes a multi-step valuation process each quarter, as described below:

- (1) Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of our Investment Adviser responsible for the portfolio investment;
- (2) Preliminary valuation conclusions are then documented and discussed with the management of our Investment Adviser;

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

- (3) Our board of directors also engages independent valuation firms to conduct independent appraisals of our investments for which market quotations are not readily available or are readily available but deemed not reflective of the fair value of an investment. The independent valuation firms review management's preliminary valuations in light of its own independent assessment and also in light of any market quotations obtained from an independent pricing service, broker, dealer or market maker;
- (4) The audit committee of our board of directors quarterly reviews the preliminary valuations of our Investment Adviser and those of the independent valuation firms on a quarterly basis, periodically assesses the valuation methodologies of the independent valuation firms, and responds to and supplements the valuation recommendations of the independent valuation firms to reflect any comments; and

Table of Contents

(5) Our board of directors discusses these valuations and determines the fair value of each investment in our portfolio in good faith, based on the input of our Investment Adviser, the respective independent valuation firms and the audit committee. Our board of directors generally uses market quotations to assess the value of our investments for which market quotations are readily available. We obtain these market values from independent pricing services or at the bid prices obtained from at least two brokers/dealers, if available, or otherwise from a principal market maker or a primary market dealer. The Investment Adviser assesses the source and reliability of bids from brokers or dealers. If the board of directors has a bona fide reason to believe any such market quote does not reflect the fair value of an investment, it may independently value such investments by using the valuation procedure that it uses with respect to assets for which market quotations are not readily available. Investments of sufficient credit quality purchased within 60 days of maturity are valued at cost plus accreted discount, or minus amortized premium, which approximates fair value.

Fair value, as defined under ASC 820, is the price that we would receive upon selling an investment or pay to transfer a liability in an orderly transaction to a market participant in the principal or most advantageous market for the investment or liability. ASC 820 emphasizes that valuation techniques maximize the use of observable market inputs and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing an asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of us. Unobservable inputs reflect the assumptions market participants would use in pricing an asset or liability based on the best information available to us on the reporting period date.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchies:

- Level 1: Inputs that are quoted prices (unadjusted) in active markets for identical assets or liabilities, accessible by us at the measurement date.
- Level 2: Inputs that are quoted prices for similar assets or liabilities in active markets, or that are quoted prices for identical or similar assets or liabilities in markets that are not active and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term, if applicable, of the financial instrument.
- Level 3: Inputs that are unobservable for an asset or liability because they are based on our own assumptions about how market participants would price the asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Generally, most of our investments and our Credit Facility are classified as Level 3. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the price used in an actual transaction may be different than our valuation and those differences may be material. A review of fair value hierarchy classifications is conducted on a quarterly basis.

In addition to using the above inputs in cash equivalents, investments and our Credit Facility valuations, we employ the valuation policy approved by our board of directors that is consistent with ASC 820. Consistent with our valuation policy, we evaluate the source of inputs, including any markets in which our investments are trading, in determining fair value.

The carrying value of our consolidated financial liabilities approximates fair value. We adopted ASC 825-10, which provides companies with an option to report selected financial assets and liabilities at fair value, and made an irrevocable election to apply ASC 825-10 to our Credit Facility. We elected to use the fair value option for our Credit Facility to align the measurement attributes of both our assets and liabilities while mitigating volatility in earnings from using different measurement attributes. Due to that election and in accordance with GAAP, we incurred expenses of \$0.7 million, \$0.4 million and \$0.3 million, relating to amendment fees on the Credit Facility during the years ended September 30, 2014, 2013 and 2012, respectively. ASC 825-10 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect on earnings of a company's choice to use fair value. ASC 825-10 also requires entities to display the fair value of the selected assets and liabilities on the face of the Consolidated Statements of Assets and Liabilities and changes in fair value of the Credit Facility are reported in our Consolidated Statements of Operations. We elected not to apply ASC 825-10 to any other financial assets or liabilities. For the fiscal years ended September 30, 2014, 2013 and 2012, our Credit Facility had a net change in unrealized (appreciation) depreciation of \$(0.5) million, \$(0.4) million and \$0.4 million, respectively. As of September 30, 2014 and 2013, the net unrealized appreciation on our Credit Facility totaled \$0.5 million and zero, respectively. We use a nationally recognized independent valuation service to measure the fair value of our Credit Facility in a manner consistent with the valuation process that the board of directors uses to value our investments.

Table of Contents

Revenue Recognition

We record interest income on an accrual basis to the extent that we expect to collect such amounts. For loans and debt investments with contractual PIK interest which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity, we will generally not accrue PIK interest when the portfolio company valuation indicates that such PIK interest is not collectible. We do not accrue as a receivable interest on loans and debt investments if we have a reason to doubt our ability to collect such interest. Loan origination fees, OID and market discount or premium and deferred financing costs are capitalized, on liabilities which we do not fair value, and then accreted or amortized using the effective interest method. We record prepayment penalties on loans and debt investments as income. Dividend income, if any, is recognized on an accrual basis on the ex-dividend date to the extent that we expect to collect such amounts.

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation

We measure realized gains or losses by the difference between the net proceeds from the repayment or sale and the amortized cost basis of the investment, using the specific identification method, without regard to unrealized appreciation or depreciation previously recognized, but considering unamortized upfront fees and prepayment penalties. Net change in unrealized appreciation or depreciation reflects the change in the fair value of our portfolio investment and Credit Facility during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation, when gains or losses are realized.

Payment-in-Kind Interest or PIK

We have investments in our portfolio which contain a PIK interest provision. PIK interest is added to the principal balance of the investment and is recorded as income. For us to maintain our status as a RIC, substantially all of this income must be paid out to stockholders in the form of distributions, even though we may not collect any cash with respect to interest on PIK securities.

Federal Income Taxes

We have elected to be taxed, and intend to qualify annually to maintain our election to be taxed, as a RIC under Subchapter M of the Code. To maintain our RIC tax election, we must, among other requirements, meet certain source-of-income and quarterly asset diversification requirements. We also must annually distribute at least 90% of the sum of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. Although not required for us to maintain our RIC tax status, in order to preclude the imposition of a 4% nondeductible federal excise tax imposed on RICs, we must distribute during each calendar year an amount at least equal to the sum of (1) 98% of our net ordinary income for the calendar year, (2) 98.2% of the sum of our net capital gain income (i.e., the excess, if any, of capital gains over capital losses) for the one-year period ending on October 31 of the calendar year and (3) the sum of any net ordinary income plus net capital gain income for preceding years that were not distributed during such years. In addition, although we may distribute realized net capital gains (i.e., net long-term capital gains in excess of short-term capital losses), if any, at least annually, out of the assets legally available for such distributions in the manner described above, we have retained and may continue to retain such net capital gains or net ordinary income to provide us with additional liquidity.

Because federal income tax regulations differ from GAAP, distributions in accordance with tax regulations may differ from net investment income and realized gains recognized for financial reporting purposes. Differences may be permanent or temporary. Permanent differences are reclassified among capital accounts in the Consolidated Financial Statements to reflect their tax character. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future.

Table of Contents

RESULTS OF OPERATIONS

Set forth below are the results of operations for the years ended September 30, 2014, 2013 and 2012.

Investment Income

Investment income for the year ended September 30, 2014 was \$30.4 million and was attributable to \$24.5 million from senior secured loans, \$4.2 million from second lien secured debt and \$1.7 million from subordinated debt. The increase in investment income over the prior year is primarily due to the growth of our portfolio.

Investment income for the year ended September 30, 2013 was \$18.9 million and was attributable to \$16.0 million from senior secured loans, \$1.6 million from second lien secured debt and \$1.3 million from subordinated debt. The increase in investment income over the prior year is primarily the result of deploying our proceeds from our equity offerings and increased borrowings under our Credit Facility.

Investment income for the year ended September 30, 2012 was \$12.1 million and was attributable to \$9.9 million from senior secured loans, \$1.0 million from second lien secured debt and \$1.2 million from subordinated debt. The increase in interest income over the prior year was due to both a full year of operation and the increased size of our portfolio.

Expenses

Expenses for the year ended September 30, 2014 totaled \$13.7 million. Base management fee for the same period totaled \$3.7 million, incentive fee totaled \$3.5 million (including \$0.1 million on net unrealized gains accrued but not payable), Credit Facility expenses totaled \$4.2 million (including \$0.7 million of Credit Facility amendment expenses), general and administrative expenses totaled \$1.8 million and excise taxes were \$0.5 million. The increase in base management fee, incentive fee and Credit Facility expenses was due to the growth of our portfolio and expanding our borrowing capacity under our Credit Facility.

Expenses for the year ended September 30, 2013 totaled \$8.3 million. Base management fee for the same period totaled \$2.2 million, incentive fee totaled \$1.9 million, Credit Facility expenses totaled \$2.3 million (including \$0.4 million of Credit Facility amendment expenses), general and administrative expenses totaled \$1.8 million and excise taxes were \$0.1 million. The increase in expenses was due to the growth of our portfolio and expanding our borrowing capacity under our Credit Facility.

Expenses for the year ended September 30, 2012 totaled \$5.8 million. Base management fee for the same period totaled \$1.5 million, incentive fee totaled \$0.6 million, Credit Facility expenses totaled \$1.8 million (including \$0.3 million of Credit Facility amendment expenses) and general and administrative expenses totaled \$1.9 million. We expect our Credit Facility expenses and management fee to continue to increase as a result of growth in our portfolio. Additionally, general and administrative costs increased over the prior year due to a full year of operation.

Net Investment Income

Net investment income totaled \$16.6 million or \$1.12 per share, \$10.5 million or \$1.10 per share and \$6.3 million or \$0.92 per share, for the fiscal years ended September 30, 2014, 2013 and 2012, respectively. The increase in net investment income was due to a larger portfolio, which was partially offset by Credit Facility amendment costs.

Table of Contents

Net Realized Gains or Losses

Sales and repayments of investments for the years ended September 30, 2014, 2013 and 2012 totaled \$225.6 million, \$174.9 million and \$71.3 million, respectively. Net realized gains totaled \$2.9 million, \$3.6 million and \$0.9 million for the same periods, respectively. The decrease in realized gains over the prior year was driven by changes in market conditions of our investments.

Unrealized Appreciation or Depreciation on Investments and Credit Facility

For the years ended September 30, 2014, 2013 and 2012, we reported unrealized appreciation (depreciation) on investments of \$1.6 million, \$(1.7) million and \$4.4 million, respectively. As of September 30, 2014 and 2013, net unrealized appreciation (depreciation) on investments totaled \$0.1 million and \$(1.5) million, respectively. The change compared to prior year was the result of the overall variation in the leveraged finance markets.

For the years ended September 30, 2014, 2013 and 2012, our Credit Facility had a change in unrealized (appreciation) depreciation of \$(0.5) million, \$(0.4) million and \$0.4 million, respectively. As of September 30, 2014 and 2013, net unrealized appreciation on our Credit Facility totaled \$0.5 million and zero, respectively. The change compared to prior year was due to changes in the capital markets.

Net Change in Net Assets Resulting from Operations

Net change in net assets resulting from operations totaled \$20.5 million or \$1.38 per share, \$12.0 million or \$1.25 per share and \$12.0 million or \$1.75 per share, for the fiscal years ended September 30, 2014, 2013 and 2012, respectively. We found attractive investment opportunities to grow net assets from operations.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity and capital resources are derived from public offerings, our Credit Facility, cash flows from operations, including investment sales and repayments, and income earned. Our primary use of funds from operations includes investments in portfolio companies and payments of fees and other operating expenses we incur. We have used, and expect to continue to use, our Credit Facility, the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives.

As of September 30, 2014, Funding I's Credit Facility with the Lenders is \$200 million, subject to satisfaction of certain conditions and the regulatory restrictions that the 1940 Act imposes on us as a BDC, has an interest rate spread above LIBOR of 200 basis points, a maturity date of May 2018 and a revolving period that ends in May 2016. As of September 30, 2014 and 2013, Funding I had \$146.4 million and \$99.6 million of outstanding borrowings under the Credit Facility, respectively, and carried an interest rate of 2.16% and 2.18%, respectively, excluding the 0.375% undrawn commitment fee. The weighted average cost of debt for the years ended September 30, 2014, 2013 and 2012, inclusive of the fee on the undrawn commitment on the Credit Facility but excluding amendment costs, was 2.35%, 2.59% and 3.21%, respectively. As of September 30, 2014 and 2013, we had \$53.6 million and \$25.4 million of unused borrowing capacity, respectively, subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC.

During the Credit Facility's revolving period, which extends to May 2016, the Credit Facility bears interest at LIBOR plus 200 basis points and, after the revolving period, the rate sets to LIBOR plus 425 basis points for the remaining two years, maturing in May 2018. The Credit Facility is secured by all of the assets of Funding I. Both PennantPark Floating Rate Capital Ltd. and Funding I have made customary representations and warranties and are required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities.

The Credit Facility contains covenants, including, but not limited to, restrictions of loan size, industry requirements, average life of loans, geographic and individual portfolio concentrations, minimum portfolio yield and loan payment frequency. Additionally, the Credit Facility requires the maintenance of a minimum equity investment in Funding I and income ratio as well as restrictions on certain payments and issuance of debt. For instance, we must maintain at least \$25 million in equity and must maintain an interest coverage ratio of at least 125%. The Credit Facility compliance reporting is prepared on a basis of accounting other than GAAP. For a complete list of such covenants see the second amended and restated revolving credit and security agreement filed as exhibit 10.1 to our Form 10-K filed November 14, 2013. As of September 30, 2014, we were in compliance with the covenants relating to our Credit Facility.

We own 100% of the equity interest in Funding I and treat the indebtedness of Funding I as our leverage. In accordance with the 1940 Act, with certain limited exceptions, we are only allowed to borrow amounts such that we are in compliance with our asset coverage ratio after such borrowing. Our Investment Adviser serves as collateral manager to Funding I under the Credit Facility.

Our interest in Funding I (other than the management fee) is subordinate in priority of payment to every other obligation of Funding I and is subject to certain payment restrictions set forth in the Credit Facility. We may receive cash distributions on our equity interests in Funding I only after it has made (1) all required cash interest and, if applicable, principal payments to the Lenders, (2) required administrative expenses and (3) claims of other unsecured creditors of Funding I. We cannot assure you that there will be sufficient funds available to make any distributions to us or that such distributions will meet our expectations from Funding I. The Investment Adviser has irrevocably directed that the management fee owed with respect to such services is to be paid to the Company so long as the Investment Adviser remains the collateral manager.

We may raise equity or debt capital through both registered offerings and private offerings of securities and by securitizing a portion of our investments among other considerations. Furthermore, our Credit Facility availability depends on various covenants and restrictions as discussed in the preceding paragraphs. The primary use of existing funds and any funds raised in the future is expected to be for repayment of indebtedness, investments in portfolio companies, cash distributions to our stockholders or for other general corporate purposes.

Table of Contents

In 2013, we completed follow-on public offerings of 8,038,700 shares of common stock for gross proceeds of \$113.4 million and net proceeds of \$112.3 million after offering expenses. Our Investment Adviser paid an aggregate of \$2.9 million of the sales load associated with these offerings.

On September 30, 2014 and September 30, 2013, we had cash equivalents of \$13.1 million and \$4.6 million, respectively, available for investing and general corporate purposes. We believe our liquidity and capital resources are sufficient to take advantage of market opportunities.

Our operating activities used cash of \$22.3 million for the year ended September 30, 2014, and our financing activities provided cash of \$30.8 million for the same period. Our operating activities used cash primarily for our investment activities and our financing activities provided cash primarily from net draws under the Credit Facility.

Our operating activities used cash of \$124.4 million for the year ended September 30, 2013, and our financing activities provided cash of \$125.1 million for the same period. Our operating activities used cash primarily for net investing that was provided from public offerings and net draws under the Credit Facility.

Our operating activities used cash of \$47.8 million for the year ended September 30, 2012, and our financing activities provided cash of \$44.7 million for the same period. Our operating activities used cash primarily for net investing that was provided from net draws under the Credit Facility.

Contractual Obligations

A summary of our significant contractual payment obligations as of September 30, 2014, including borrowings under our Credit Facility and other contractual obligations, is as follows:

	Payments due by period (millions)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Credit Facility	\$ 146.4	\$	\$	\$ 146.4	\$
Unfunded investments ⁽¹⁾	2.7			2.7	
Total contractual obligations	\$ 149.1	\$	\$	\$ 149.1	\$

(1) Unfunded investments described in the Consolidated Statements of Assets and Liabilities represent unfunded delayed draws on investments and/or revolving lines of credit.

Table of Contents

We have entered into certain contracts under which we have material future commitments. Under our Investment Management Agreement, which was reapproved by our board of directors, including a majority of our directors who are not interested persons of us or the Investment Adviser, in February 2014, PennantPark Investment Advisers serves as our Investment Adviser. Payments under our Investment Management Agreement in each reporting period are equal to (1) a management fee equal to a percentage of the value of our gross assets and (2) an incentive fee based on our performance.

Under our Administration Agreement, which was reapproved by our board of directors, including a majority of our directors who are not interested persons of us, in February 2014, the Administrator furnishes us with office facilities and administrative services necessary to conduct our day-to-day operations. If requested to provide managerial assistance to our portfolio companies, we or the Administrator will be paid an additional amount based on the services provided. Payment under our Administration Agreement is based upon our allocable portion of the Administrator's overhead in performing its obligations under our Administration Agreement, including rent, technology systems, insurance and our allocable portion of the costs of our Chief Compliance Officer, Chief Financial Officer and their respective staffs.

If any of our contractual obligations discussed above are terminated, our costs under new agreements that we enter into may increase. In addition, we will likely incur significant time and expense in locating alternative parties to provide the services we expect to receive under our Investment Management Agreement and our Administration Agreement. Any new investment management agreement would also be subject to approval by our stockholders.

In connection with our initial public offering, the Investment Adviser paid to the underwriters 2% of the sales load, or approximately \$2.1 million in the aggregate, with respect to the offering of shares of our common stock. We (and indirectly our stockholders) agreed to repay this amount (a) if during any four consecutive calendar quarter-periods ending on or after April 13, 2012 our Pre-Incentive Fee Net Investment Income equaled or exceeded 1.75% (7.0% annualized) of our net assets at the beginning of such period (as adjusted for any issuances or repurchases of shares of our common stock) or (b) upon our liquidation. Based on actual returns, we met the conditions for repayment to the Investment Adviser at the end of the quarter ended December 31, 2012 and repaid approximately \$2.1 million to the Investment Adviser, which then purchased shares of our common stock in the secondary market.

Off-Balance Sheet Arrangements

We currently engage in no off-balance sheet arrangements.

Distributions

In order to qualify as a RIC and to not be subject to corporate-level tax on income, we are required, under Subchapter M of the Code, to annually distribute at least 90% of the sum of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. Although not required for us to maintain our RIC tax status, in order to preclude the imposition of a 4% nondeductible federal excise tax imposed on RICs, we must distribute during each calendar year an amount at least equal to the sum of (1) 98% of our net ordinary income for the calendar year, (2) 98.2% of our capital gain net income (i.e., the excess, if any, of capital gains over capital losses) for the one-year period ending on October 31 of the calendar year and (3) the sum of any net ordinary income plus capital gain net income for preceding years that were not distributed during such years. In addition, although we may distribute realized net capital gains (i.e., net long-term capital gains in excess of short-term capital losses), if any, at least annually, out of the assets legally available for such distributions in the manner described above, we have retained and may continue to retain such net capital gains or net ordinary income to provide us with additional liquidity.

During the years ended September 30, 2014, 2013 and 2012, we declared distributions of \$1.08, \$1.03 and \$0.91 per share, respectively, for total distributions of \$16.1 million, \$10.0 million and \$6.2 million, respectively. We monitor available net investment income to determine if a tax return of capital may occur for the fiscal year. To the extent our taxable earnings fall below the total amount of our distributions for any given fiscal year, a portion of those distributions may be deemed to be a tax return of capital to our common stockholders. Tax characteristics of all distributions will be reported to stockholders on Form 1099-DIV after the end of the calendar year and in our periodic reports filed with the SEC.

We intend to continue to make monthly distributions to our stockholders. Our monthly distributions, if any, are determined by our board of directors quarterly.

Table of Contents

We maintain an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, then stockholders cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash distributions.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, we may be limited in our ability to make distributions due to the asset coverage test for borrowings applicable to us as a BDC under the 1940 Act and due to provisions in future credit facilities. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of RIC status. We cannot assure stockholders that they will receive any distributions at a particular level.

We may distribute our common stock as a dividend of our taxable income and a stockholder could receive a portion of the dividends declared and distributed by us in shares of our common stock with the remaining amount in cash. A stockholder will be considered to have recognized dividend income equal to the fair market value of the stock paid by us plus cash received with respect to such dividend. We have not elected to distribute stock as a dividend but reserve the right to do so.

Quantitative And Qualitative Disclosures About Market Risk

We are subject to financial market risks, including changes in interest rates. As of September 30, 2014, our debt portfolio consisted of 95% variable-rate investments (including 92% with a LIBOR or prime floor) and 5% fixed-rate investments. The variable-rate loans are usually based on a LIBOR rate and typically have durations of three months after which they reset to current market interest rates. Variable-rate investments subject to a floor generally reset by reference to the current market index after one to nine months only if the index exceeds the floor. In regards to variable-rate instruments with a floor, we do not benefit from increases in interest rates until such rates exceed the floor and thereafter benefit from market rates above any such floor. In contrast, our cost of funds, to the extent it is not fixed, will fluctuate with changes in interest rates.

Assuming that the most recent statement of assets and liabilities was to remain constant, and no actions were taken to alter the existing interest rate sensitivity, the following table shows the annualized impact of hypothetical base rate changes in interest rates.

Change In Interest Rates	Change In Interest Income, Net Of Interest Expense (in thousands)	Per Share
Up 1%	\$ (1,372)	\$ (0.09)
Up 2%	\$ 455	\$ 0.03
Up 3%	\$ 2,282	\$ 0.15
Up 4%	\$ 4,109	\$ 0.28

Although management believes that this measure is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in the credit market, credit quality, size and composition of the assets on the Consolidated Statements of Assets and Liabilities and other business developments that could affect net increase in net assets resulting from operations or net investment income. Accordingly, no assurances can be given that actual results would not differ materially from those shown above.

Because we borrow money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds as well as our level of leverage. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income or net assets.

We may hedge against interest rate fluctuations by using standard hedging instruments such as futures, options and forward contracts subject to the requirements of the 1940 Act and applicable commodities laws. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in benefits of lower interest rates with respect to our portfolio of investments with fixed interest rates. During the periods covered by this prospectus, we did not engage in interest rate hedging activities.

Table of Contents**SENIOR SECURITIES**

Information about our senior securities shown in the following table as of September 30, 2014, 2013, 2012 and 2011 is from our Consolidated Financial Statements which have been audited by an independent registered public accounting firm for those periods. This information about our senior securities should be read in conjunction with our Consolidated Financial Statements and related notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for more information.

Class and Year Credit Facility	Total Amount	Asset Coverage per Unit ⁽²⁾	Average Market Value Per Unit ⁽³⁾
	Outstanding ⁽¹⁾	(unaudited)	
Fiscal 2014			
	\$146,400	\$2,460	N/A
Fiscal 2013			
	\$99,600	\$3,109	N/A
Fiscal 2012			
	\$75,500	\$2,275	N/A
Fiscal 2011			
	\$24,650	\$4,735	N/A

(1) Total cost of each class of senior securities outstanding at the end of the period presented in thousands (000s).

(2) The asset coverage ratio for a class of senior securities representing indebtedness is calculated as our consolidated total assets, less all liabilities and indebtedness not represented by senior securities, divided by senior securities representing indebtedness. This asset coverage ratio is multiplied by \$1,000 to determine the Asset Coverage Per Unit.

(3) Not applicable, as senior securities are not registered for public trading.

Table of Contents**PRICE RANGE OF COMMON STOCK**

Our common stock is traded on the NASDAQ Global Select Market under the symbol PFLT. The following table lists the high and low closing sale prices for our common stock, the closing sale prices as a premium or (discount) to our NAV per share and distributions per share since October 1, 2012. On November 20, 2014, the last reported closing price of our common stock was \$14.19 per share.

Period	NAV ⁽¹⁾	Closing Sales Price		Premium / (Discount) of High Sales	Premium / (Discount) of Low Sales	Distributions Declared
		High	Low	Price to NAV ⁽²⁾	Price to NAV ⁽²⁾	
Fiscal Year Ending September 30, 2015						
First quarter (as of November 20, 2014)	\$ N/A	\$ 14.23	\$ 13.48	N/A%	N/A%	\$ 0.1800 ⁽³⁾
Fiscal Year Ended September 30, 2014						
Fourth quarter	14.40	14.39	13.75		(5)	0.2700
Third quarter	14.52	14.29	13.61	(2)	(6)	0.2700
Second quarter	14.46	14.27	13.51	(1)	(7)	0.2700
First quarter	14.24	13.93	13.14	(2)	(8)	0.2675
Fiscal Year Ended September 30, 2013						
Fourth quarter	14.10	14.60	13.01	4	(8)	0.2625
Third quarter	13.98	14.90	13.82	7	(1)	0.2625
Second quarter	14.10	14.43	12.94	2	(8)	0.2550
First quarter	13.99	13.30	12.35	(5)	(12)	0.2475

(1) NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per share on the date of the high and low sales prices. The NAVs shown are based on outstanding shares at the end of each period.

(2) Calculated as the respective high or low closing sales price less NAV per share, divided by the quarter-end NAV per share.

(3) Includes a dividend of \$0.0900 per share payable on December 1, 2014 to stockholders of record as of November 19, 2014.

Shares of BDCs may trade at a market price both above and below the NAV that is attributable to those shares. Our shares have traded above and below our NAV. Our shares closed on the NASDAQ Global Select Market at \$13.78 on both September 30, 2014 and 2013. Our NAV per share was \$14.40 and \$14.10 as of September 30, 2014 and 2013, respectively. The possibility that our shares of common stock will trade at a discount from NAV or at a premium that is unsustainable over the long term is separate and distinct from the risk that our NAV will decrease. It is not possible to predict whether our shares will trade at, above or below our NAV in the future. As of September 30, 2014 we had five stockholders of record.

Table of Contents

SALES OF COMMON STOCK BELOW NET ASSET VALUE

Our stockholders may approve our ability to sell shares of our common stock below our then current NAV per share in one or more public offerings of our common stock. In making a determination that an offering below NAV per share is in our and our stockholders' best interests, our board of directors, a majority of our directors who have no financial interest in the sale and a majority of our independent directors considered a variety of factors, including:

The effect that an offering below NAV per share would have on our stockholders, including the potential dilution they would experience as a result of the offering;

The amount per share by which the offering price per share and the net proceeds per share are less than the most recently determined NAV per share;

The relationship of recent market prices of our common stock to NAV per share and the potential impact of the offering on the market price per share of our common stock;

Whether the estimated offering price would closely approximate the market value of our shares, less distributing commissions or discounts, and would not be below current market price;

The potential market impact of being able to raise capital in the current financial market;

The nature of any new investors anticipated to acquire shares in the offering;

The anticipated rate of return on and quality, type and availability of investments;

The leverage available to us both before and after the offering and other borrowing terms; and

The potential investment opportunities available relative to the potential dilutive effect of additional capital at the time of the offering. Our board of directors will also consider the fact that a sale of shares of common stock at a discount will benefit our Investment Adviser, as the Investment Adviser will earn additional investment management fees on the proceeds of such offerings, as it would from the offering of any other securities of PennantPark Floating Rate Capital Ltd. or from the offering of common stock at a premium to NAV per share.

Sales by us of our common stock at a discount from NAV pose potential risks for our existing stockholders whether or not they participate in the offering, as well as for new investors who participate in the offering.

We will not seek to sell shares under a prospectus supplement to the registration statement, or a post-effective amendment to the registration statement, of which this prospectus forms a part (the "current registration statement") if the cumulative dilution to our NAV per share arising from offerings from the effective date of the current registration statement through and including any follow-on offering would exceed 15% based on the anticipated pricing of such follow-on offering. This limit would be measured separately for each offering pursuant to the current registration statement by calculating the percentage dilution or accretion to aggregate NAV from that offering and then summing the anticipated percentage dilution from each subsequent offering. For example, if our most recently determined NAV per share at the time of the first offering is \$10.00, and we have 100 million shares outstanding, the sale of an additional 25 million shares at net proceeds to us of \$5.00 per share (a 50% discount) would produce dilution of 10.0%. If we subsequently determined that our NAV per share increased to \$11.00 on the then outstanding 125 million shares and contemplated an additional offering, we could, for example, propose to sell approximately 31.25 million additional shares

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

at a price that would be expected to yield net proceeds to us of \$8.25 per share, resulting in incremental dilution of 5.0%, before we would reach the aggregate 15% limit. If we file a new post-effective amendment, the threshold would reset.

The following three headings and accompanying tables explain and provide hypothetical examples assuming proceeds are temporarily invested in cash equivalents on the impact of an offering at a price less than NAV per share on three different sets of investors:

existing stockholders who do not purchase any shares in the offering;

existing stockholders who purchase a relatively small amount of shares in the offering or a relatively large amount of shares in the offering; and

new investors who become stockholders by purchasing shares in the offering.

Table of Contents**Impact on Existing Stockholders who do not Participate in the Offering**

Our existing stockholders who do not participate, or who are not given the opportunity to participate, in an offering below NAV per share or who do not buy additional shares in the secondary market at the same or lower price we obtain in the offering (after any underwriting discounts and commissions) face the greatest potential risks. All stockholders will experience an immediate decrease (often called dilution) in the NAV of the shares they hold. Stockholders who do not participate in the offering will also experience a disproportionately greater decrease in their participation in our earnings and assets and their voting power than stockholders who do participate in the offering. All stockholders may also experience a decline in the market price of their shares, which often reflects, to some degree, announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discounts increase.

The following examples illustrate the level of NAV dilution that would be experienced by a nonparticipating stockholder in three different hypothetical common stock offerings of different sizes and levels of discount from NAV per share, although it is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

The examples assume that Company XYZ has 1,000,000 shares of common stock outstanding, \$15.0 million in total assets and \$5.0 million in total liabilities. The current NAV and NAV per share are thus \$10.0 million and \$10.00, respectively. The table below illustrates the dilutive effect on nonparticipating stockholder A of (1) an offering of 50,000 shares (5% of the outstanding shares) at \$9.50 per share after any underwriting discounts and commissions (a 5% discount from NAV); (2) an offering of 100,000 shares (10% of the outstanding shares) at \$9.00 per share after any underwriting discounts and commissions (a 10% discount from NAV); and (3) an offering of 250,000 shares (25% of the outstanding shares) at \$7.50 per share after any underwriting discounts and commissions (a 25% discount from NAV).

	Prior to Sale Below NAV	Example 1 5% Offering at 5% Discount		Example 2 10% Offering at 10% Discount		Example 3 25% Offering at 25% Discount	
		Following Sale	% Change	Following Sale	% Change	Following Sale	% Change
Offering Price							
Price per share to public		\$ 10.00		\$ 9.47		\$ 7.89	
Net offering proceeds per share to issuer		\$ 9.50		\$ 9.00		\$ 7.50	
Decrease to NAV							
Total shares outstanding	1,000,000	1,050,000	5.00 %	1,100,000	10.00 %	1,250,000	25.00 %
NAV per share	\$ 10.00	\$ 9.98	(0.20)%	\$ 9.91	(0.90)%	\$ 9.50	(5.00)%
Dilution to Stockholder A							
Shares held by stockholder A	10,000	10,000		10,000		10,000	
Percentage held by stockholder A	1.00%	0.95%	(5.00)%	0.91%	(9.00)%	0.80%	(20.00)%

Total Asset Values

Total NAV held by stockholder A

\$ 100,000	\$ 99,800	(0.20)%	\$ 99,100	(0.90)%	\$ 95,000	(5.00)%
------------	-----------	---------	-----------	---------	-----------	---------

Table of Contents

	Prior to Sale Below NAV	Example 1 5% Offering at 5% Discount		Example 2 10% Offering at 10% Discount		Example 3 25% Offering at 25% Discount	
		Following Sale	% Change	Following Sale	% Change	Following Sale	% Change
Total investment by stockholder A (assumed to be \$10.00 per share)	\$ 100,000	\$ 100,000		\$ 100,000		\$ 100,000	
Total dilution to stockholder A (total NAV less total investment)		\$ (200)		\$ (900)		\$ (5,000)	
Per Share Amounts							
NAV per share held by stockholder A		\$ 9.98		\$ 9.91		\$ 9.50

Dilution per share held by stockholder A (NAV per share less investment per share)		\$ (0.02)		\$ (0.09)		\$ (0.50)	
Percentage dilution to stockholder A (dilution per share divided by investment per share)			(0.20)%		(0.90)%		(5.00)%

Impact on Existing Stockholders who Participate in the Offering

Our existing stockholders who participate in an offering below NAV per share or who buy additional shares in the secondary market at the same or lower price as we obtain in the offering (after any underwriting discounts and commissions) will experience the same types of NAV dilution as the nonparticipating stockholders, albeit at a lower level, to the extent they purchase less than the same percentage of the offering below NAV as their interest in our shares immediately prior to the offering. The level of NAV dilution on an aggregate basis will decrease as the number of shares such stockholders purchase increases. Existing stockholders who buy more than such percentage will experience NAV dilution but will, in contrast to existing stockholders who purchase less than their proportionate share of the offering, experience an increase (often called accretion) in NAV per share over their investment per share and will also experience a disproportionately greater increase in their participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests due to the offering. The level of accretion will increase as the excess number of shares such stockholder purchases increases. Even a stockholder who over-participates will, however, be subject to the risk that we may make additional offerings below NAV in which such stockholder does not participate, in which case such a stockholder will experience NAV dilution as described above in such subsequent offerings. These stockholders may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. This decrease could be more pronounced as the size of the offering and level of discount to NAV increases.

The examples assume that Company XYZ has 1,000,000 shares of common stock outstanding, \$15.0 million in total assets and \$5.0 million in total liabilities. The current NAV and NAV per share are thus \$10.0 million and \$10.00, respectively. The table below illustrates the (dilutive) and accretive effect in the hypothetical offering of 25% of the shares outstanding at a 25% discount to NAV from the prior chart for stockholder A that acquires shares equal to (1) 50% of their proportionate share of the offering (i.e. 1,250 shares which is 0.50% of the offering of 250,000 shares rather than their 1.00% proportionate share) and (2) 150% of their proportionate share of the offering (i.e. 3,750 shares which is 1.50% of the offering of 250,000 shares rather than their 1.00% proportionate share).

Impact on New Investors

The following examples illustrate the level of NAV dilution or accretion that would be experienced by a new stockholder in three different hypothetical common stock offerings of different sizes and levels of discount from NAV per share, although it is not possible to predict the level of market price decline that may occur. Actual sales prices and discounts may differ from the presentation below.

Investors who are not currently stockholders, but who participate in an offering below NAV and whose investment per share is greater than the resulting NAV per share due to any underwriting discounts and commissions paid by us will experience an immediate decrease, albeit small, in the NAV of their shares and their NAV per share compared to the price they pay for their shares. Investors who are not currently stockholders and who participate in an offering below NAV per share and whose investment per share is also less than the resulting NAV per share due to any underwriting discounts and commissions paid by us being significantly less than the discount per share, will experience an immediate increase in the NAV of their shares and their NAV per share compared to the price they pay for their shares. All these investors will experience a disproportionately greater participation in our earnings and assets and their voting power than our increase in assets, potential earning power and voting interests. These investors will, however, be subject to the risk that we may make additional offerings below NAV in which such new stockholder does not participate, in which case such new stockholder will experience dilution as described above in such subsequent offerings. These investors may also experience a decline in the market price of their shares, which often reflects to some degree announced or potential increases and decreases in NAV per share. Their decrease could be more pronounced as the size of the offering and level of discounts increases.

Table of Contents

The following examples illustrate the level of NAV dilution or accretion that would be experienced by a new stockholder who purchases the same percentage (1.00%) of the shares in the three different hypothetical offerings of common stock of different sizes and levels of discount from NAV per share. The examples assume that Company XYZ has 1,000,000 shares of common stock outstanding, \$15.0 million in total assets and \$5.0 million in total liabilities. The current NAV and NAV per share are thus \$10.0 million and \$10.00, respectively. The table below illustrates the (dilutive) and accretive effects on a stockholder A at (1) an offering of 50,000 shares (5% of the outstanding shares) at \$9.50 per share after any underwriting discounts and commissions (a 5% discount from NAV); (2) an offering of 100,000 shares (10% of the outstanding shares) at \$9.00 per share after any underwriting discounts and commissions (a 10% discount from NAV); and (3) an offering of 250,000 shares (25% of the outstanding shares) at \$7.50 per share after any underwriting discounts and commissions (a 25% discount from NAV).

Table of Contents**DISTRIBUTIONS**

We intend to continue making monthly distributions to our stockholders. The timing and amount of our monthly distributions, if any, is determined by our board of directors. Any distributions to our stockholders are declared out of assets legally available for distribution. We monitor available net investment income to determine if a tax return of capital may occur for the fiscal year. To the extent our taxable earnings fall below the total amount of our distributions for any given fiscal year, a portion of those distributions may be deemed to be a tax return of capital to our common stockholders. The following table reflects the cash distributions, including dividends and returns of capital per share that we have declared on our common stock since October 1, 2012.

Total		\$ 1.0275

In January 2015, a Form 1099-DIV will be sent to stockholders that will state the amount and composition of distributions and provide information with respect to appropriate tax treatment of our distributions.

In accordance with Section 19(a) under the 1940 Act, \$2.6 million and \$0.1 million of our distributions paid to stockholders during the fiscal years ended September 30, 2014 and 2013, respectively, represents a distribution of long-term realized capital gains.

We maintain an opt out dividend reinvestment plan for our common stockholders. As a result, if we declare a dividend or other distribution, then stockholders' cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically opt out of the dividend reinvestment plan so as to receive cash distributions.

Table of Contents

We may not be able to achieve operating results that will allow us to make dividends and distributions at a specific level or to increase the amount of these dividends and distributions from time to time. In addition, we may be limited in our ability to make dividends and distributions due to the asset coverage ratio for borrowings when applicable to us as a BDC under the 1940 Act and due to provisions in future credit facilities. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of our RIC status. We cannot assure stockholders that they will receive any dividends and distributions at a particular level.

Sale of Unregistered Securities

We did not engage in any sales of unregistered securities during the fiscal year ended September 30, 2014.

Table of Contents

BUSINESS

Pennant Park Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd. is a BDC whose objectives are to generate current income and capital appreciation by investing primarily in Floating Rate Loans and other investments made to U.S. middle-market companies.

We believe that Floating Rate Loans to U.S. middle-market companies offer attractive risk adjusted returns due to a limited amount of capital available for such companies and the potential for rising interest rates. We use the term "middle-market" to refer to companies with annual revenues between \$50 million and \$1 billion. Our investments are typically rated below investment grade. Securities rated below investment grade are often referred to as "leveraged loans" or "high yield" securities or "junk bonds" and are often higher risk compared to debt instruments that are rated above investment grade and have speculative characteristics. However, when compared to junk bonds and other non-investment grade debt, senior secured Floating Rate Loans typically have more robust capital-preserving qualities, such as historically lower default rates than junk bonds, represent the senior source of capital in a borrower's capital structure and often have certain of the borrower's assets pledged as collateral. Our debt investments may generally range in maturity from three to ten years and are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions.

Under normal market conditions, we generally expect that at least 80% of the value of our Managed Assets will be invested in Floating Rate Loans and other instruments bearing a variable-rate of interest. We generally expect that senior secured loans, or first lien loans, will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including mezzanine securities and, to a lesser extent, equity investments. Our investment size may generally range between \$1 million and \$15 million, on average, although we expect that this investment size will vary proportionately with the size of our capital base.

Our investment activity depends on many factors, including the amount of debt and equity capital available to middle-market companies, the level of merger and acquisition activity for such companies, the general economic environment and the competitive environment for the types of investments we make. We have used, and expect to continue to use, our Credit Facility, proceeds from the rotation of our portfolio and proceeds from public and private offerings of securities to finance our investment objectives.

Organization and Structure of PennantPark Floating Rate Capital Ltd.

PennantPark Floating Rate Capital Ltd., a Maryland corporation organized in October 2010, is a closed-end, externally managed, non-diversified investment company that has elected to be treated as a BDC under the 1940 Act. In addition, for federal income tax purposes we have elected to be treated, and intend to qualify annually, as a RIC under the Code.

Our Investment Adviser and Administrator

We utilize the investing experience and contacts of PennantPark Investment Advisers in developing what we believe is an attractive and diversified portfolio. The senior investment professionals of the Investment Adviser have worked together for many years and average over 25 years of experience in the mezzanine lending, leveraged finance, distressed debt and private equity businesses. In addition, our senior investment professionals have been involved in originating, structuring, negotiating, managing and monitoring investments in each of these businesses across economic and market cycles. We believe this experience and history has resulted in a strong reputation with financial sponsors, management teams, investment bankers, attorneys and accountants, which provides us with access to substantial investment opportunities across the capital markets. Our Investment Adviser has a rigorous investment approach, which is based upon intensive financial analysis with a focus on capital preservation, diversification and active management. Since our Investment Adviser's inception in 2007, it has raised approximately \$2.3 billion in debt and equity capital and has invested \$4.1 billion in 344 companies with 140 different financial sponsors through its managed funds.

Table of Contents

Our Administrator has experienced professionals with substantial backgrounds in finance and administration of registered investment companies. In addition to furnishing us with clerical, bookkeeping and record keeping services, the Administrator also oversees our financial records as well as the preparation of our reports to stockholders and reports filed with the SEC. The Administrator assists in the determination and publication of our NAV, oversees the preparation and filing of our tax returns, and monitors the payment of our expenses as well as the performance of administrative and professional services rendered to us by others. Furthermore, our Administrator provides, on our behalf, managerial assistance to those portfolio companies to which we are required to offer such assistance. See Risk Factors Risks Relating to our Business and Structure There are significant potential conflicts of interest which could impact our investment returns for more information.

Market Opportunity

We believe that the limited amount of capital available to middle-market companies, coupled with the desire of these companies for flexible sources of capital, creates an attractive investment environment for us.

We believe middle-market companies have faced difficulty in raising debt through the capital markets. Many middle-market companies look to raise funds by issuing high-yield bonds. We believe this approach to financing has become more difficult from time to time to the extent institutional investors seek to invest in larger, more liquid offerings. We believe this has made it harder for middle-market companies to raise funds by issuing high-yield securities from time to time.

We believe middle-market companies have faced difficulty raising debt in private markets. From time to time, banks, finance companies, hedge funds and CLO funds have, and may again, withdraw capital from the middle-market, resulting in opportunities for alternative funding sources.

We believe that credit market dislocation for middle-market companies improves the risk-adjusted returns of our investments. From time to time, market participants have reduced lending to middle-market and non-investment grade borrowers. As a result, we believe there is less competition in our market, more conservative capital structures, higher yields and stronger covenants.

We believe there is a large pool of uninvested private equity capital likely to seek to combine their capital with sources of debt capital to complete private investments. We expect that private equity firms will continue to be active investors in middle-market companies. These private equity funds generally seek to leverage their investments by combining their capital with senior secured loans and/or mezzanine debt provided by other sources, and we believe that our capital is well-positioned to partner with such equity investors.

We believe there is substantial supply of opportunities resulting from maturing loans that seek refinancing. A high volume of financings will come due in the next few years. Additionally, we believe that demand for debt financing from middle-market companies will remain strong because these companies will continue to require credit to refinance existing debt, to support growth initiatives and to finance acquisitions. We believe the combination of strong demand by middle-market companies and from time to time the reduced supply of credit described above should increase lending opportunities for us. We believe this supply of opportunities coupled with a lack of demand offers attractive risk-adjusted returns to investors.

Competitive Advantages

We believe that we have the following competitive advantages over other capital providers to middle-market companies:

a) Experienced Management Team

The senior investment professionals of our Investment Adviser have worked together for many years and average over 25 years of experience in mezzanine lending, leveraged finance, distressed debt and private equity businesses. These senior investment professionals have been involved in originating, structuring, negotiating, managing and monitoring investments in each of these businesses across economic and market cycles. We believe this extensive experience and history has resulted in a strong reputation across the capital markets.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

Lending to middle-market companies requires in depth diligence, credit expertise, restructuring experience and active portfolio management. For example, lending to middle-market companies in the United States is generally more labor intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of the information available with respect to such companies. Specialized due diligence, underwriting capabilities and more extensive ongoing monitoring are required by the lender.

Table of Contents

b) Disciplined Investment Approach with Strong Value Orientation

We employ a disciplined approach in selecting investments that meet the long-standing, consistent value-oriented investment criteria employed by our Investment Adviser. Our value-oriented investment philosophy focuses on preserving capital and ensuring that our investments have an appropriate return profile in relation to risk. When market conditions make it difficult for us to invest according to our criteria, we are highly selective in deploying our capital. We believe this approach continues to enable us to build an attractive investment portfolio that meets our return and value criteria over the long-term.

We believe it is critical to conduct extensive due diligence on investment targets. In evaluating new investments we, through our Investment Adviser, conduct a rigorous due diligence process that draws from our Investment Adviser's experience, industry expertise and network of contacts. Among other things, our due diligence is designed to ensure that each prospective portfolio company will be able to meet its debt service obligations. See "Investment Objectives and Policies" "Investment Selection Criteria" for more information.

In addition to engaging in extensive due diligence, our Investment Adviser seeks to reduce risk by focusing on businesses with:

strong competitive positions;

positive cash flow that is steady and stable;

experienced management teams with strong track records;

potential for growth and viable exit strategies; and

capital structures offering appropriate risk-adjusted terms and covenants.

c) Ability to Source and Evaluate Transactions through our Investment Adviser's Research Capability and Established Network

The management team of the Investment Adviser has long-term relationships with financial sponsors, management consultants and management teams that we believe enable us to evaluate investment opportunities effectively in numerous industries, as well as provide us access to substantial information concerning those industries. We identify potential investments both through active origination and through dialogue with numerous financial sponsors, management teams, members of the financial community and corporate partners with whom the professionals of our Investment Adviser have long-term relationships.

d) Flexible Transaction Structuring

We are flexible in structuring investments and tailor investments to meet the needs of a portfolio company while also generating attractive risk-adjusted returns. We can invest in all parts of a capital structure and our Investment Adviser has extensive experience in a wide variety of securities for leveraged companies throughout economic and market cycles.

Our Investment Adviser seeks to minimize the risk of capital loss without foregoing potential for capital appreciation. In making investment decisions, we seek to invest in companies that we believe can generate positive risk-adjusted returns.

We believe that the in-depth coverage and experience of our Investment Adviser will enable us to invest throughout various stages of the economic and market cycles and to provide us with ongoing market insights in addition to a significant investment sourcing engine.

Table of Contents

Competition

Our primary competitors provide financing to middle-market companies and include other BDCs, commercial and investment banks, commercial finance companies, CLO funds and, to the extent they provide an alternative form of financing, private equity funds. Additionally, alternative investment vehicles, such as hedge funds, frequently invest in middle-market companies. As a result, competition for investment opportunities at middle-market companies can be intense. However, we believe that from time to time there has been a reduction in the amount of debt capital available to middle-market companies. We believe this has resulted in a less competitive environment for making new investments.

Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, we believe some competitors have a lower cost of funds and access to funding sources that are not available to us. In addition, some of our competitors have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC. See [Risk Factors](#) [Risks Relating to our Business and Structure](#) We operate in a highly competitive market for investment opportunities for more information.

Leverage

As of September 30, 2014, we maintained a \$200 million Credit Facility, which matures in May 2018, with the Lenders. During the Credit Facility's revolving period, which extends to May 2016, it bears interest at LIBOR plus 200 basis points, and after the revolving period, the rate sets to LIBOR plus 425 basis points for the remaining two years. The Credit Facility is secured by all of the assets held by Funding I, under which we had \$146.4 million outstanding with an annual current interest rate of 2.16%, excluding the undrawn commitment fee of 0.375%, as of September 30, 2014. We believe that our capital resources provide us with the flexibility to take advantage of market opportunities when they arise. Our use of leverage, as calculated under the asset coverage ratio of the 1940 Act, may generally range between 70% and 90% of our net assets, or 40% and 50% of our Managed Assets. We cannot assure investors that our leverage will remain within the range. The amount of leverage that we employ will depend on our assessment of the market and other factors at the time of any proposed borrowing. See [Management's Discussion and Analysis of Financial Condition and Results of Operations](#) for more information.

Table of Contents

INVESTMENT OBJECTIVES AND POLICIES

Investment Policy Overview

We seek to create a diversified portfolio primarily of Floating Rate Loans by generally targeting an investment size of \$1 million to \$15 million in securities, on average, of middle-market companies. We expect this investment size to vary proportionately with the size of our capital base. We generally expect that senior secured loans, or first lien loans, will represent at least 65% of our overall portfolio. We also generally expect to invest up to 35% of our overall portfolio opportunistically in other types of investments, including mezzanine securities and, to a lesser extent, equity investments. The companies in which we invest are typically highly leveraged, and, in most cases, are not rated by national rating agencies. If such companies were rated, we believe that they would typically receive a rating below investment grade (between BB and CCC under the Standard & Poor's system) from the national rating agencies. In addition, we expect our debt investments to range in maturity from three to ten years.

Over time, we expect that our portfolio will continue to consist primarily of Floating Rate Loans in qualifying assets such as private or thinly traded or small market-capitalization, U.S. middle-market public companies. In addition, we may invest up to 30% of our portfolio in non-qualifying assets. See Regulation Qualifying Assets for more information. These non-qualifying assets may include investments in public companies whose securities are not thinly traded or do not have a market capitalization of less than \$250 million, securities of middle-market companies located outside of the United States and investment companies as defined in the 1940 Act. Moreover, we may acquire investments in the secondary market. See Investment Selection Criteria for more information.

Our board of directors has the authority to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval (except as required by the 1940 Act). However, absent stockholder approval, under the 1940 Act we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results and value of our stock. Nevertheless, the effects of changes to our operating policies and strategies may adversely affect our business, our ability to make distributions and the value of our stock.

Senior Secured Debt

Structurally, senior secured debt (which we define to include first lien debt) ranks senior in priority of payment to mezzanine debt and equity, and benefits from a senior security interest in the assets of the borrower. As such, other creditors rank junior to our investments in these securities in the event of insolvency. Due to its lower risk profile and often more restrictive covenants as compared to mezzanine debt, senior secured debt generally earns lower return than mezzanine debt. In some cases senior secured lenders receive opportunities to invest directly in the equity securities of borrowers and from time to time may also receive warrants to purchase equity securities. We evaluate these investment opportunities on a case-by-case basis.

Mezzanine Debt

Structurally, mezzanine debt (which we define to include second lien secured debt and subordinated debt) usually ranks subordinate in priority of payment to senior secured loans. Our second lien secured debt is subordinated debt that benefits from a security interest in the borrower. As such, other creditors may rank senior to us in the event of insolvency. Mezzanine debt ranks senior to common and preferred equity in borrowers capital structures. Due to its higher risk profile and often less restrictive covenants as compared to senior secured loans, mezzanine debt generally earns a higher return than senior secured loans. In many cases mezzanine investors receive opportunities to invest directly in the equity securities of borrowers and from time to time may also receive warrants to purchase equity securities. We evaluate these investment opportunities on a case-by-case basis.

Table of Contents

Investment Selection Criteria

We are committed to a value-oriented philosophy used by the senior investment professionals who manage our portfolio and seek to minimize the risk of capital loss without foregoing potential for capital appreciation.

We have identified several criteria, discussed below, that we believe are important in identifying and investing in prospective portfolio companies. These criteria provide general guidelines for our investment decisions. However, we caution that not all of these criteria will be met by each prospective portfolio company in which we choose to invest. Generally, we seek to use our experience and access to market information to identify investment candidates and to structure investments efficiently and effectively.

a) Leading and defensible competitive market positions

The Investment Adviser invests in portfolio companies that it believes have developed strong positions within their markets and exhibit the potential to maintain sufficient cash flows and profitability to service their obligations in a range of economic environments. The Investment Adviser also seeks to invest in portfolio companies that it believes possess competitive advantages in scale, scope, customer loyalty, product pricing or product quality as compared to their competitors to protect their market position.

b) Investing in stable borrowers with positive cash flow

Our investment philosophy places a premium on fundamental analysis and has a distinct value-orientation. The Investment Adviser invests in portfolio companies it believes to be stable and well-established, with strong cash flows and profitability. The Investment Adviser believes these attributes indicate portfolio companies that may be well-positioned to maintain consistent cash flow to service and repay their liabilities and maintain growth in their businesses or their relative market share. The Investment Adviser currently does not expect to invest significantly in start-up companies, companies in turnaround situations or companies with speculative business plans, although we are permitted to do so.

c) Proven management teams

The Investment Adviser focuses on investments in which the portfolio company has an experienced management team with an established track record of success. The Investment Adviser typically requires that portfolio companies have in place proper incentives to align management's goals with our goals, including having equity interests.

d) Financial sponsorship

The Investment Adviser may seek to cause us to participate in transactions sponsored by what it believes to be high-quality financial sponsors. The Investment Adviser believes that a financial sponsor's willingness to invest significant equity capital in a portfolio company is an implicit endorsement of the quality of that portfolio company. Further, financial sponsors of portfolio companies with significant investments at risk may have an ability, and a strong incentive, to contribute additional capital in difficult economic times should financial or operational issues arise so as to maintain their ownership position.

e) Investments in different borrowers and industries

The Investment Adviser seeks to invest our assets broadly among portfolio companies and across industries. The Investment Adviser believes that this diversified approach may reduce the risk that a downturn in any one portfolio company or industry will have a disproportionate impact on the value of our portfolio, although we are permitted to be a non-diversified investment company.

f) Viable exit strategy

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

The Investment Adviser seeks to invest in portfolio companies that it believes will provide a steady stream of cash flow to repay our loans while also reinvesting in their respective businesses. The Investment Adviser expects that such internally generated cash flow, leading to the payment of interest on, and the repayment of the principal of, our investments in portfolio companies to be a key means by which we will exit from our investments over time. In addition, the Investment Adviser also seeks to invest in portfolio companies whose business models and expected future cash flows offer attractive exit possibilities. These companies include candidates for strategic acquisition by other industry participants and companies that may repay our investments through an initial public offering of common stock, refinancing or other capital markets transaction.

Due Diligence

We believe it is critical to conduct extensive due diligence on investment targets and in evaluating new investments. Our Investment Adviser conducts a rigorous due diligence process that is applied to prospective portfolio companies and draws from our Investment Adviser's experience, industry expertise and network of contacts. In conducting due diligence, our Investment Adviser uses information provided by companies, financial sponsors and publicly available information as well as information from relationships with former and current management teams, consultants, competitors and investment bankers.

Table of Contents

Our due diligence typically includes:

review of historical and prospective financial information;

research relating to the company's management, industry, markets, products and services and competitors;

interviews with management, employees, customers and vendors of the potential portfolio company;

on-site visits;

review of loan documents; and

background checks.

Additional due diligence with respect to any investment may be conducted on our behalf by attorneys and independent auditors prior to the closing of the investment, as well as other outside advisers, as appropriate.

Upon the completion of due diligence in a portfolio company, the team leading the investment presents the investment opportunity to our Investment Adviser's investment committee. This committee determines whether to pursue the potential investment. All new investments are required to be reviewed by the investment committee of our Investment Adviser. The members of the investment committee receive no compensation from us. These members are employees of our Investment Adviser and receive compensation from our Investment Adviser.

Investment Structure

Once we determine that a prospective portfolio company is suitable for investment, we work with the management of that company and its other capital providers, including senior, junior and equity capital providers, to structure an investment. We negotiate with these parties to agree on how our investment is structured relative to the other capital in the portfolio company's capital structure.

We expect our Floating Rate Loans to have terms of three to ten years. We generally obtain security interests in the assets of our portfolio companies that will serve as collateral in support of the repayment of these loans. This collateral may take the form of first priority liens on the assets of a portfolio company.

Typically, our mezzanine debt has maturities of three to ten years. Mezzanine debt may take the form of a second priority lien on the assets of a portfolio company and have interest-only payments in the early years with cash or PIK payments with amortization of principal deferred to the later years. In some cases, we may invest in debt securities that, by their terms, convert into equity or additional debt securities or defer payments of interest for the first few years after our investment. Also, in some cases, our mezzanine debt may be collateralized by a subordinated lien on some or all of the assets of the borrower.

We seek to tailor the terms of the investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its profitability. For example, in addition to seeking a senior position in the capital structure of our portfolio companies, we seek to limit the downside potential of our investments by:

requiring a total return on our investments (including both interest in the form of a floor and potential equity appreciation) that compensates us for credit risk;

incorporating put rights and call protection into the investment structure; and

negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with our focus on preserving our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or participation rights.

Table of Contents

Our investments may include equity features, such as direct investments in the equity securities of borrowers or warrants or options to buy a minority interest in a portfolio company. Any warrants we may receive with our debt securities generally require only a nominal cost to exercise, so as a portfolio company appreciates in value, we may achieve additional investment return from these equity investments. We may structure the warrants to provide provisions protecting our rights as a minority-interest holder, as well as puts, or rights to sell such securities back to the company, upon the occurrence of specified events. In many cases, we may also obtain registration rights in connection with these equity investments, which may include demand and piggyback registration rights.

We expect to hold most of our investments to maturity or repayment, but we may exit certain investments earlier if a liquidity event takes place, such as the sale or refinancing of a portfolio company. We also may turn over investments to better position the portfolio in light of market conditions.

Ongoing Relationships with Portfolio Companies

Monitoring

The Investment Adviser monitors our portfolio companies on an ongoing basis. The Investment Adviser also monitors the financial trends of each portfolio company to determine if it is meeting its respective business plans and to assess the appropriate course of action for each portfolio company.

The Investment Adviser has several methods of evaluating and monitoring the performance and fair value of our investments, which may include the following:

assessment of success in adhering to portfolio company's business plan and compliance with covenants;

periodic or regular contact with portfolio company management and, if appropriate, the financial or strategic sponsor, to discuss financial position, requirement and accomplishments;

comparisons to other portfolio companies in the industry, if any;

attendance at and participation in board meetings or presentations by portfolio companies; and

review of monthly and quarterly financial statements and financial projections for portfolio companies.

The Investment Adviser monitors credit risk of each portfolio company regularly with a goal toward identifying early, and when able and appropriate, exiting investments with potential credit problems. This monitoring process may include reviewing: (1) a portfolio company's financial resources and operating history; (2) comparing a portfolio company's current operating results with the Investment Adviser's initial thesis for the investment and its expectations for the performance of the investment; (3) a portfolio company's sensitivity to economic conditions; (4) the performance of a portfolio company's management; (5) a portfolio company's debt maturities and borrowing requirements; (6) a portfolio company's interest and asset coverage; and (7) the relative value of an investment based on a portfolio company's anticipated cash flow.

Under normal market conditions, we expect that at least 80% of our Managed Assets will be invested in Floating Rate Loans and other instruments bearing a variable rate of interest which may, from time to time, include variable rate derivative instruments. This policy is not fundamental and may be changed by our board of directors with at least 60 days prior written notice provided to stockholders.

While our investment objectives are to seek high current income and capital appreciation through investments in Floating Rate Loans, we may invest up to 35% of the portfolio in opportunistic investments. These investments may include investments in high-yield bonds, distressed debt, private equity or securities of public companies and securities of companies located outside of the United States. We expect that these public foreign companies generally will have debt securities that are non-investment grade.

Managerial assistance

We offer managerial assistance to our portfolio companies. As a BDC, we are required to make available such managerial assistance within the meaning of section 55 of the 1940 Act. See Regulation for more information.

Staffing

We do not currently have any employees. Our Investment Adviser and Administrator have hired and expect to continue to hire professionals with skills applicable to our business plan, including experience in middle-market investing, mezzanine lending, leveraged finance, distressed debt and private equity businesses.

Table of Contents

Our Portfolio

Our principal investment focus is to invest in Floating Rate Loans to U.S. middle-market companies in a variety of industries. We generally seek to target companies that generate positive cash flows from the broad variety of industries in which our Investment Adviser has direct expertise. The following is an illustrative list of the industries in which the Investment Adviser has invested:

Aerospace and Defense	Environmental Services
Auto Sector	Financial Services
Beverage, Food and Tobacco	Grocery
Broadcasting and Entertainment	Healthcare, Education and Childcare
Buildings and Real Estate	High Tech Industries
Building Materials	Home & Office Furnishings, Housewares & Durable Consumer Products
Business Services	Hotels, Motels, Inns and Gaming
Cable Television	Insurance
Cargo Transportation	Leisure, Amusement, Motion Picture & Entertainment
Chemicals, Plastics and Rubber	Logistics
Communications	Manufacturing/Basic Industries
Consumer Goods: Durable	Media: Broadcasting and Subscription
Consumer Goods: Non-Durable	Mining, Steel, Iron and Non-Precious Metals
Containers, Packaging & Glass	Oil and Gas
Distribution	Other Media
Diversified/Conglomerate Manufacturing	Personal, Food and Miscellaneous Services
Diversified/Conglomerate Services	Printing and Publishing
Education	Retail
Energy/Utilities	Telecommunications

Listed below are our top ten portfolio companies and industries represented as a percentage of our consolidated portfolio assets (excluding cash equivalents) as of September 30:

Portfolio Company	2014	Portfolio Company	2013
Patriot National, Inc. (f/k/a Old Guard Risk Services, Inc.)	4%	SCE Partners, LLC	4%

Table of Contents

Our executive officers and directors, as well as the senior investment professionals of the Investment Adviser and Administrator, may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do. Currently, the executive officers and directors, as well as the current senior investment professionals of the Investment Adviser and Administrator, serve as officers and directors of PennantPark Investment Corporation, a publicly traded BDC, and other managed funds, as applicable. Accordingly, they may have obligations to investors in those entities, the fulfillment of which obligations might not be in the best interest of us or our stockholders. In addition, we note that any affiliated investment vehicle currently existing, or formed in the future, and managed by the Investment Adviser and or its affiliates may, notwithstanding different stated investment objectives, have overlapping investment objectives with our own and, accordingly, may invest in asset classes similar to those targeted by us. As a result, the Investment Adviser may face conflicts in allocating investment opportunities among us and such other entities. The Investment Adviser allocates investment opportunities in a fair and equitable manner consistent with our allocation policy, and we have received exemptive relief with respect to certain co-investment transactions. In any such case, when the Investment Adviser identifies an investment, it will choose which investment fund should receive the allocation. See [Risk Factors](#) [Risks Relating to our Business and Structure](#) There are significant potential conflicts of interest which could impact our investment returns for more information.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies and companies that would be investment companies but are excluded from the definition of an investment company provided in Section 3(c) of the 1940 Act. We may also co-invest in the future on a concurrent basis with our affiliates, subject to compliance with applicable regulations and our trade allocation procedures.

As of September 30, 2014, there was no portfolio company in which we have made an investment that represents greater than 5% of our total assets.

Table of Contents**PORTFOLIO COMPANIES**

The following is a listing of each portfolio company or its affiliate, together referred to as portfolio companies, in which we had an investment at September 30, 2014. Percentages shown for class of investment securities held by us represent percentage of voting ownership and not economic ownership. Percentages shown for equity securities, other than warrants or options held, if any, represent the actual percentage of the class of security held before dilution. For additional information see our Consolidated Schedule of Investments in our September 30, 2014 Consolidated Financial Statements included elsewhere in this prospectus.

The portfolio companies are presented in three categories: Companies less than 5% owned which represent portfolio companies where we directly or indirectly own less than 5% of the outstanding voting securities of such portfolio company and where we have no other affiliations with such portfolio company; Companies 5% to 24% owned which represent portfolio companies where we directly or indirectly own 5% or more but less than 25% of the outstanding voting securities of such portfolio company or where we hold one or more seats on the portfolio company's board of directors and, therefore, are deemed to be an affiliated person under the 1940 Act; and Companies 25% or more owned which represent portfolio companies where we directly or indirectly own 25% or more of the outstanding voting securities of such portfolio company and, therefore, are presumed to be controlled by us under the 1940 Act. We make available significant managerial assistance to our portfolio companies. Certain assets are pledged as collateral under our Credit Facility as disclosed in our Consolidated Schedule of Investments. Unless otherwise noted, we held no voting board membership on any of our portfolio companies.

Table of Contents**MANAGEMENT**

Our business and affairs are managed under the direction of our board of directors. The board of directors currently consists of five members, or directors, four of whom are not interested persons of the Company as defined in Section 2(a)(19) of the 1940 Act. We refer to these individuals as our Independent Directors. Our board of directors elects our officers, who serve at the discretion of the board of directors.

Board of Directors

Under our charter, our directors are divided into three classes and are elected for staggered terms of three years each, with a term of office of one of the three classes of directors expiring each year. Each director holds office for the term to which he or she is elected and until his or her successor is duly elected and qualifies.

Information regarding the board of directors is as follows:

Name	Age	Position	Director Since	Expiration of Term
Independent Directors				
Adam K. Bernstein	51	Director	2010	2016
Marshall Brozost	47	Director	2010	2015
Jeffrey Flug	52	Director	2010	2016
Samuel L. Katz	49	Director	2010	2015

Interested director

Arthur H. Penn	51	Chairman of the Board and Chief Executive Officer	2010	2017
----------------	----	---	------	------

Executive Officer Who is Not a Director

The following information pertains to our executive officer who is not a director of PennantPark Floating Rate Capital Ltd.

Name	Age	Position
Aviv Efrat	50	Chief Financial Officer and Treasurer

Officer Who is Not a Director

The following information pertains to our officer who is not a director of PennantPark Floating Rate Capital Ltd.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

Name	Age	Position
Guy F. Talarico	59	Chief Compliance Officer

The executive office is located at 590 Madison Avenue, 15th Floor, New York, New York 10022.

Board of Directors Composition and Leadership Structure

The 1940 Act requires that at least a majority of our directors not be interested persons (as defined in the 1940 Act) of the Company. Currently, four of our five directors are Independent Directors. The Chairman of our board of directors is our Chief Executive Officer and therefore an interested person of us. The Independent Directors believe that the combined position of Chief Executive Officer and Chairman of the board of directors results in greater efficiencies in managing us by eliminating the need to transfer substantial information quickly and repeatedly between the Chief Executive Officer and the Chairman and by offering the ability to capitalize on the specialized knowledge acquired from the duties of the roles. The board of directors has not identified a lead Independent Director; however, it has determined that its leadership structure, in which 80% of the directors are Independent Directors and, as such, are not affiliated with the Investment Adviser or the Administrator, is appropriate in light of the services that the Investment Adviser and the Administrator provide us and the potential conflicts of interest that could arise from these relationships.

Table of Contents

Board of Directors Risk Oversight Role

The board of directors performs its risk oversight function primarily through (1) its three standing committees, described more fully below, which report to the entire board of directors and are comprised solely of Independent Directors and (2) monitoring by our Chief Compliance Officer in accordance with our compliance policies and procedures.

As described below in more detail under Audit Committee, Nominating and Corporate Governance Committee and Compensation Committee, the board of directors Audit Committee, Nominating and Corporate Governance Committee and Compensation Committee assist the board of directors in fulfilling its risk oversight responsibilities. The Audit Committee's risk oversight responsibilities include overseeing our accounting and financial reporting processes, including the annual audit of our financial statements and systems of internal controls regarding finance and accounting, pre-approving the engagement of an independent registered public accounting firm to render audit and/or permissible non-audit services; and evaluating the qualifications, performance and independence of the independent registered public accounting firm. The Nominating and Corporate Governance Committee's risk oversight responsibilities include selecting, researching and nominating directors for election by our stockholders, developing and recommending to the board of directors a set of corporate governance principles and overseeing the evaluation of the directors and our management. The Compensation Committee's risk oversight responsibilities include determining, or recommending to the board of directors for determining, the compensation of the Company's chief executive officer and all other executive officers, paid directly by the Company, if any, and assisting the board of directors with matters related to compensation, as directed by the board of directors. The Audit Committee, Nominating and Corporate Governance Committee and Compensation Committee consist solely of Independent Directors.

The board of directors also performs its risk oversight responsibilities with the assistance of the Chief Compliance Officer. Our Chief Compliance Officer prepares a written report annually discussing the adequacy and effectiveness of our compliance policies and procedures and certain of our service providers. The Chief Compliance Officer's report, which is reviewed by the board of directors, addresses at a minimum (1) the operation of our compliance policies and procedures and certain of our service providers since the last report; (2) any material changes to such policies and procedures since the last report; (3) any recommendations for material changes to such policies and procedures as a result of the Chief Compliance Officer's annual review; and (4) any compliance matter that has occurred since the date of the last report about which the board of directors would reasonably need to know to oversee our compliance activities and risks. In addition, the Chief Compliance Officer meets separately in executive session with the Independent Directors at least once each year.

We believe that the board of directors' role in risk oversight is effective and appropriate given the extensive regulation to which it is already subject as a BDC. Specifically, as a BDC, we must comply with certain regulatory requirements that controls the levels of risk in our business and operations. For example, our ability to incur indebtedness is limited by the asset coverage ratio set forth in the 1940 Act (including any relief thereto provided by the SEC), and we generally must invest at least 70% of our total assets in qualifying assets. In addition, we elected to be treated as a RIC under the Code. As a RIC, we must, among other things, meet certain income source and asset diversification requirements.

We believe that the extent of the board of directors' and its committees' roles in risk oversight complements the board of directors' leadership structure. Because they are comprised solely of Independent Directors, the Audit Committee, the Nominating and Corporate Governance Committee and the Compensation Committee are able to exercise their oversight responsibilities without any conflict of interest that might discourage critical questioning and review. Through regular executive session meetings with our independent auditors, Chief Compliance Officer and Chief Executive Officer, the Independent Directors have similarly established direct communication and oversight channels that the board of directors believes foster open communication and early detection of issues of concern.

We believe that the board of directors' role in risk oversight must be evaluated on a case by case basis and that the current configuration and allocation of responsibilities among the board of directors and its committees with respect to the oversight of risk is appropriate. However, the board of directors and its committees continually re-examine the manner in which they administer their respective risk oversight functions, including through formal annual assessments of performance, to ensure that they meet our needs.

Biographical Information

The board of directors believes that, collectively, the directors have balanced and diverse experience, qualifications, attributes and skills, which allow the board of directors to operate effectively in governing us and protecting the interests of our stockholders. Below is a description of the various experiences, qualifications, attributes and/or skills with respect to each director considered by the board of directors. Our directors have been divided into two groups-interested directors and Independent Directors. Interested directors are interested persons as defined in the 1940 Act.

Table of Contents

Independent Directors

Adam K. Bernstein (51), Director. Mr. Bernstein became a Director of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation in October 2010 and February 2007, respectively. Mr. Bernstein is currently President of The Bernstein Companies, a Washington, D.C.-based real estate investment and development firm which he joined in 1986. Mr. Bernstein runs a diversified company that includes a Hotel division, a Private Real Estate Investment Trust, and a structured financed group that focuses on tax credit syndication and project lending for community development projects nationwide. In 2012, Mr. Bernstein was appointed to the Board of Overseers of the School of Arts and Sciences at the University of Pennsylvania.

Marshall Brozost (47), Director. Mr. Brozost became a Director of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation in October 2010 and February 2007, respectively. Since May 2012, Mr. Brozost has been a Partner at Schulte Roth & Zabel, LLP, where he practices in the real estate and private equity groups. Prior to Schulte Roth & Zabel, Mr. Brozost practiced law at O Melveny & Myers LLP from 2001 to 2004; Solomon & Weinberg LLP from 2004 to 2005; Dewey & LeBoeuf LLP from 2005 to 2012. Mr. Brozost also served as a Vice President of Nomura Asset Capital Corporation from 1997 through 2000.

Jeffrey Flug (52), Director. Mr. Flug became a Director of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation in October 2010 and February 2007, respectively. Since 2009, Mr. Flug has held a variety of senior positions, including, currently, President of Union Square Hospitality Group, an exclusive chain of restaurants. Since October 2012, Mr. Flug has been a director of Sears Hometown and Outlet Stores, Inc. Mr. Flug was Chief Executive Officer and Executive Director of Millennium Promise Alliance, Inc. from 2006 to 2008. Millennium Promise is a non-profit organization whose mission is to eradicate extreme global poverty. Mr. Flug was Managing Director and Head of North American Institutional Sales at JP Morgan's Investment Bank from 2000 to 2006. From 1988 to 2000, Mr. Flug was Managing Director for Goldman Sachs & Co. in its Fixed Income Division.

Samuel L. Katz (49), Director. Mr. Katz became a Director of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation in October 2010 and February 2007, respectively. Mr. Katz is the Managing Partner of TZP Group, LLC, a private equity fund he formed in 2007. Prior to joining TZP Group, Mr. Katz was Chief Executive Officer of MacAndrews & Forbes Acquisition Holdings, Inc. from 2006 through 2007. From 1996 through 2005, Mr. Katz held a variety of senior positions at Cendant Corporation, including, most recently, Chairman and Chief Executive Officer of the Cendant Travel Distribution Services Division from 2001 to 2005. From 1992 to 1995, Mr. Katz invested in private and public equity as Co-Chairman of Saber Capital, Inc. and Vice President of Dickstein Partners Inc. From 1988 to 1992, Mr. Katz was an Associate and Vice President at The Blackstone Group, where he worked on numerous private equity transactions, including the initial leveraged buyouts of several hotel franchise brands which created the predecessor to Cendant Corporation. From 1986 to 1988, Mr. Katz was a Financial Analyst at Drexel Burnham Lambert.

Interested Director

Arthur H. Penn (51), Founder, Chief Executive Officer and Chairman of the board of directors. Mr. Penn became the Chief Executive Officer and a Director of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation at their inception in 2010 and 2007, respectively. He also founded and became Managing Member of PennantPark Investment Advisers in January 2007. Mr. Penn co-founded Apollo Investment Management in 2004, where he was a Managing Partner from 2004 to 2006. He also served as Chief Operating Officer of Apollo Investment Corporation from its inception in 2004 to 2006 and served as President and Chief Operating Officer of that company in 2006. Mr. Penn was formerly a Managing Partner of Apollo Value Fund L.P. (formerly Apollo Distressed Investment Fund, L.P.) from 2003 to 2006. From 2002 to 2003, prior to joining Apollo, Mr. Penn was a Managing Director of CDC-IXIS Capital Markets. Mr. Penn previously served as Global Head of Leveraged Finance at UBS Warburg LLC (now UBS Investment Bank) from 1999 through 2001. Prior to joining UBS Warburg, Mr. Penn was Global Head of Fixed Income Capital markets for BT Securities and BT Alex Brown Incorporated from 1994 to 1999. From 1992 to 1994, Mr. Penn served as Head of High-Yield Capital Markets at Lehman Brothers.

Executive Officer and Officer who are not Directors

Aviv Efrat (50), Chief Financial Officer and Treasurer. Mr. Efrat became the Chief Financial Officer and Treasurer of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation in October 2010 and February 2007, respectively. Mr. Efrat is also a Managing Director of PennantPark Investment Administration, LLC. Mr. Efrat was a Director at BlackRock, Inc., where he was responsible for a variety of administrative, operational, and financial aspects of closed-end and open-end registered investment companies, from 1997 to 2007. From 1994 to 1997, Mr. Efrat was in the Investment Companies Business Unit at Deloitte & Touche LLP. He is a member of the American Institute of Certified Public Accountants and the New York State Society of Certified Public Accountants.

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

Guy F. Talarico (59), Chief Compliance Officer. Mr. Talarico became the Chief Compliance Officer of PennantPark Floating Rate Capital Ltd. and PennantPark Investment Corporation in March 2011 and May 2008, respectively. Mr. Talarico has held the position of Chief Compliance Officer for a number of investment advisers, private funds and investment companies from 2004 when he founded Alaric Compliance Services, LLC.

Committees of the Board of Directors

For the fiscal year ended September 30, 2014, we held five board of directors meetings, five Audit Committee meetings and one Nominating and Corporate Governance Committee Meeting and one Compensation Committee meeting. All directors attended at least 75% of the aggregate number of meetings of the board of directors and of the respective committees on which they served. We require each director to make a diligent effort to attend all board of directors and committee meetings, and encourage directors to attend the annual stockholders meeting. For the fiscal year ended September 30, 2014, all of the directors attended the annual stockholders meeting.

Table of Contents

Audit Committee

The members of the Audit Committee are Messrs. Bernstein, Brozost, Flug and Katz, each of whom is independent for purposes of the 1940 Act and the NASDAQ corporate governance rules. Messrs. Flug and Katz serve as Co-Chairmen of the Audit Committee. The Audit Committee operates pursuant to an Audit Committee Charter approved by the board of directors. The charter sets forth the responsibilities of the Audit Committee, which include selecting or retaining each year an independent registered public accounting firm (the auditors) to audit our accounts and records; reviewing and discussing with management and the auditors our annual audited financial statements, including disclosures made in management's discussion and analysis of financial condition and results of operations, and recommending to the board of directors whether the audited financial statements should be included in our annual report on Form 10-K; reviewing and discussing with management and the auditors our quarterly financial statements prior to the filings of our quarterly reports on Form 10-Q; pre-approving the auditors' engagement to render audit and/or permissible non-audit services; reviewing and approving all related party transactions; and evaluating the qualifications, performance and independence of the auditors. The Audit Committee is also responsible for aiding our board of directors in fair valuing our portfolio securities that are not publicly traded or for which current market values are not readily available. The board of directors and Audit Committee use the services of nationally recognized independent valuation firms to help them determine the fair value of certain securities. Our board of directors has determined that each of Messrs. Flug and Katz is an audit committee financial expert as that term is defined under Item 407 of Regulation S-K under the Exchange Act. The Audit Committee Charter is available on our website www.pennantpark.com.

Nominating and Corporate Governance Committee

The members of the Nominating and Corporate Governance Committee are Messrs. Bernstein, Brozost, Flug and Katz, each of whom is independent for purposes of the 1940 Act and the NASDAQ corporate governance rules. Messrs. Bernstein and Brozost serve as Co-Chairmen of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee is responsible for selecting, researching and nominating directors for election by our stockholders, selecting nominees to fill vacancies on the board of directors or a committee of the board of directors, developing and recommending to the board of directors a set of corporate governance principles and overseeing the evaluation of the board of directors and our management. The Nominating and Corporate Governance Committee has adopted a written Nominating and Corporate Governance Committee Charter that is available on our website www.pennantpark.com.

The Nominating and Corporate Governance Committee will consider stockholder recommendations for possible nominees for election as directors when such recommendations are submitted in accordance with the Company's bylaws, the Nominating and Corporate Governance Committee Charter and any applicable law, rule or regulation regarding director nominations. Nominations should be sent to Thomas Friedmann, Secretary, c/o PennantPark Floating Rate Capital Ltd., 590 Madison Avenue, 15th Floor, New York, New York 10022. When submitting a nomination to the Company for consideration, a stockholder must provide all information that would be required under applicable SEC rules to be disclosed in connection with election of a director, including the following minimum information for each director nominee: full name, age and address; principal occupation during the past five years; directorships on publicly held companies and investment companies during the past five years; number of shares of our common stock owned, if any; and a written consent of the individual to stand for election if nominated by the board of directors and to serve if elected by the stockholders.

Criteria considered by the Nominating and Corporate Governance Committee in evaluating the qualifications of individuals for election as director of the board of directors include compliance with the independence and other applicable requirements of the NASDAQ corporate governance rules and the 1940 Act, and all other applicable laws, rules, regulations and listing standards; the criteria, policies and principles set forth in our Nominating and Corporate Governance Committee Charter; and the ability to contribute to our effective management, taking into account our needs and such factors as the individual's experience, perspective, skills and knowledge of the industry in which we operate. The Nominating and Corporate Governance Committee has not adopted a formal policy with regard to the consideration of diversity in identifying individuals for election as members of the board of directors, but the Nominating and Corporate Governance Committee will consider such factors as it may deem are in the best interests of us and our stockholders. Those factors may include a person's differences of viewpoint, professional experience, education and skills, as well as his or her race, gender and national origin. In addition, as part of the board of directors annual-self assessment, the members of the Nominating and Corporate Governance Committee evaluate the membership of the board of directors and whether the board of directors maintains satisfactory policies regarding membership selection.

Compensation Committee

The Compensation Committee is responsible for determining, or recommending to the board of directors for determining, the compensation of the Company's chief executive officer and all other executive officers, paid directly by the Company, if any. The Compensation Committee also assists the board of directors with all matters related to compensation, as directed by the board of directors. The current members of the Compensation Committee are Messrs. Bernstein, Brozost, Flug and Katz, each of whom is independent for purposes of the 1940 Act and the NASDAQ corporate governance rules. As discussed below, none of our executive officers is directly compensated by the Company and, as a result, the Compensation Committee does not produce and/or review and report on executive compensation practices. The Compensation

(1) We do not have a profit sharing or retirement plan, and directors do not receive any pension or retirement benefits from us.

(2) Mr. Efrat is an employee of the Administrator.

Each Independent Director receives an annual payment of \$50,000 for services performed on behalf of us as a director. The Independent Directors also receive \$2,500 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with attending each board of directors meeting and receive \$500 plus reimbursement of reasonable out-of-pocket expenses incurred in connection with attending each committee meeting (unless combined with a board of directors meeting). In addition, each Co-Chairman of the Audit Committee receives an annual fee of \$3,750 and each Co-Chairman of any other committee receives an annual fee of \$1,250 for his additional services in these capacities. Also, we have purchased directors' and officers' liability insurance on behalf of our directors and officers. Independent Directors have the option to receive their directors' fees paid in shares of our common stock issued at a price per share equal to the greater of net asset value or the market price at the time of payment. No compensation is expected to be paid to directors who are interested persons (as defined in the 1940 Act). Prior to May 7, 2014, each Independent Director received \$1,250 for services performed on behalf of us as a director.

Portfolio Managers, or Senior Investment Professionals, Biographical Information.

Our Investment Adviser has three experienced senior investment professionals in addition to Mr. Penn. These senior investment professionals of the Investment Adviser have worked together for many years, and average over 25 years of experience in the mezzanine lending, leveraged finance, distressed debt and private equity businesses. In addition, our senior investment professionals have been involved in originating, structuring, negotiating, managing and monitoring investments in each of these businesses across economic and market cycles. We believe this experience and history has resulted in a strong reputation with financial sponsors, management teams, investment bankers, attorneys and accountants, which provides us with access to substantial investment opportunities across the capital markets. Below is a summary of their biographical information. Our investment professionals receive no compensation from us. The compensation of these individuals is paid by our Investment Adviser and compensation includes a base salary and a bonus contingent upon past and future performance.

Jose A. Briones joined PennantPark Investment Advisers in December 2009. Previously, Mr. Briones was a Partner of Apollo Investment Management, L.P. and a member of its investment committee since 2006. He was a Managing Director with UBS Securities LLC in the Financial Sponsors and Leveraged Finance Group from 2001 to 2006. Prior to joining UBS he was a Vice President with JP Morgan in the Global Leveraged Finance Group from 1999 to 2001. From 1992 to 1999, Mr. Briones was a Vice President at BT Securities and BT Alex Brown Inc. in the Corporate Finance Department.

Salvatore Giannetti III joined PennantPark Investment Advisers in February 2007. Previously, Mr. Giannetti was a Partner in the private equity firm Wilton Ivy Partners since 2004. He was a Managing Director at UBS Securities LLC in its Financial Sponsors and Leveraged Finance Group from 2000 to 2001. From 1997 to 2000, Mr. Giannetti was a Managing Director in the Investment Banking Division at Deutsche Bank (joining BT Securities and BT Alex Brown Inc.). From 1986 to 1997, Mr. Giannetti worked in the Investment Banking, Syndicated Loan &

Edgar Filing: PennantPark Floating Rate Capital Ltd. - Form POS 8C

Private Equity groups at Chase Securities Inc. and its predecessor firms, Chemical Securities and Manufacturers Hanover.

P. Whitridge Williams, Jr. joined PennantPark Investment Advisers in March 2007. Previously, Mr. Williams was a Managing Director in the Financial Sponsors and Leveraged Finance Group at UBS Securities LLC. Mr. Williams worked at UBS and predecessor firms, including Dillon Read and Co. Inc. from 1996 to 2007. During Mr. Williams' tenure at UBS, he spent four years as a senior member of the Telecom, Media and Technology Group.

Table of Contents

In addition to managing our investments, as of September 30, 2014 our portfolio managers also managed investments on behalf of the following entities:
