

Edgar Filing: TEVA PHARMACEUTICAL INDUSTRIES LTD - Form FWP

TEVA PHARMACEUTICAL INDUSTRIES LTD

Form FWP

July 13, 2016

Teva Pharmaceutical Industries 2016-2019 Preliminary Financial Outlook July 13, 2016 Issuer Free Writing Prospectus Filed Pursuant to Rule 433 Registration Nos. 333-201984 and 333-201984-09 July 13, 2016

Safe Harbor Statement under the U.S. Private Securities Litigation Reform Act of 1995: Important Notice: Teva Pharmaceutical Industries Limited (Teva) has filed a registration statement (including a prospectus) with the SEC for the offering to which this presentation relates. Before you invest, you should read the preliminary prospectus supplement and accompanying prospectus when available, together with the information incorporated by reference therein, and the other documents that Teva has filed with the SEC for more complete information about Teva and this offering. You may get these documents for free by visiting EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, Teva will arrange to send you these documents if you request them by calling (215) 591-8912.

**Non-GAAP Financial Measures** This presentation includes certain non-GAAP financial measures as defined by SEC rules. Please see our Annual Report on Form 20-F for the year ended December 31, 2015, our Report on Form 6-K relating to the three months ended March 31, 2016 (filed with the SEC on May 9, 2016 (second report)) and the Appendix attached hereto for a reconciliation of those historical measures to the most directly comparable GAAP measures. The estimates contained in this presentation are non-GAAP financial measures, which exclude the amortization of purchased intangible assets, costs related to certain regulatory actions, inventory step-up, legal settlements and reserves, impairments and related tax effects. The non-GAAP data presented by Teva are the results used by Teva's management and board of directors to evaluate the operational performance of the company, to compare against the company's work plans and budgets, and ultimately to evaluate the performance of management. Teva provides such non-GAAP data to investors as supplemental data and not in substitution or replacement for GAAP measure, because management believes such data provides useful information to investors. A reconciliation of such forward-looking non-GAAP estimates to the corresponding GAAP measures is not being provided, due to the unreasonable efforts required to prepare it. This presentation contains forward-looking statements, which are based on management's current beliefs and expectations and involve a number of known and unknown risks and uncertainties that could cause our future results, performance or achievements to differ significantly from the results, performance or achievements expressed or implied by such forward-looking statements. Important factors that could cause or contribute to such differences include risks relating to: our ability to develop and commercialize additional pharmaceutical products; competition for our specialty products, especially Copaxone® (which faces competition from orally-administered alternatives and a generic version); our ability to consummate the acquisition of Allergan plc's worldwide generic pharmaceuticals business ("Actavis Generics") and to realize the anticipated benefits of such acquisition (and the timing of realizing such benefits); the fact that following the consummation of the Actavis Generics acquisition, we will be dependent to a much larger extent than previously on our generic pharmaceutical business; potential restrictions on our ability to engage in additional transactions or incur additional indebtedness as a result of the substantial amount of debt we will incur to finance the Actavis Generics acquisition; the fact that for a period of time following the consummation of the Actavis Generics acquisition, we will have significantly less cash on hand than previously, which could adversely affect our ability to grow; the possibility of material fines, penalties and other sanctions and other adverse consequences arising out of our ongoing FCPA investigations and related matters; our ability to achieve expected results from investments in our pipeline of specialty and other products; our ability to identify and successfully bid for suitable acquisition targets or licensing opportunities, or to consummate and integrate acquisitions; the extent to which any manufacturing or quality control problems damage our reputation for quality production and require costly remediation; increased government scrutiny in both the U.S. and Europe of our patent settlement agreements; our exposure to currency fluctuations and restrictions as well as credit risks; the effectiveness of our patents, confidentiality agreements and other measures to protect the intellectual property rights of our specialty medicines; the effects of reforms in healthcare regulation and pharmaceutical pricing, reimbursement and coverage; competition for our generic products, both from other pharmaceutical companies and as a result of increased governmental pricing pressures; governmental investigations into sales and marketing practices, particularly for our specialty pharmaceutical products; adverse effects of political or economic instability, major hostilities or acts of terrorism on our significant worldwide operations; interruptions in our supply chain or problems with internal or third-party information technology systems that adversely affect our complex manufacturing processes; significant disruptions of our information technology systems or breaches of our data security; competition for our specialty pharmaceutical businesses from companies with greater resources and capabilities; the impact of continuing consolidation of our distributors and customers; decreased opportunities to obtain U.S. market exclusivity for

significant new generic products; potential liability in the U.S., Europe and other markets for sales of generic products prior to a final resolution of outstanding patent litigation; our potential exposure to product liability claims that are not covered by insurance; any failure to recruit or retain key personnel, or to attract additional executive and managerial talent; any failures to comply with complex Medicare and Medicaid reporting and payment obligations; significant impairment charges relating to intangible assets, goodwill and property, plant and equipment; the effects of increased leverage and our resulting reliance on access to the capital markets; potentially significant increases in tax liabilities; the effect on our overall effective tax rate of the termination or expiration of governmental programs or tax benefits, or of a change in our business; variations in patent laws that may adversely affect our ability to manufacture our products in the most efficient manner; environmental risks; and other factors that are discussed in our Annual Report on Form 20-F for the year ended December 31, 2015 and in our other filings with the U.S. Securities and Exchange Commission (the SEC). Forward-looking statements speak only as of the date on which they are made and we assume no obligation to update or revise any forward-looking statements or other information, whether as a result of new information, future events or otherwise.

2016-2019 Preliminary Financial Outlook - Agenda Erez Vigodman, President & CEO Eyal Desheh, Group Executive VP and CFO Q&A with Management Team

Erez Vigodman, President & CEO
