If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82- _____

GOLD FIELDS AND OREZONE ANNOUNCE INCREASE IN GOLD RESOURCES AT THE ESSAKAN PROJECT IN BURKINA FASO.

Indicated Resource increases 45 per cent to 1.9 million ounces.

August 3, 2004 - Gold Fields Limited (GFI:NYSE, JSE) and **Orezone Resources Inc. (OZN:TSX, AMEX)** are pleased to announce an increase in resources for the Essakan Main Zone ("EMZ"), located on the Essakan property in Burkina Faso, West Africa. Based on a 1.0 g/t cut off, Indicated Resources now total 30.5 Mt at 1.95 g/t (1.9 Moz) and Inferred Resources total 4.4 Mt at 2.00 g/t (0.3 Moz).

Measured and Indicated Resources in the EMZ had been calculated by previous operators as being 18.9 Mt at 2.14 g/t (1.3 Moz) with Inferred Resources at 5.2 Mt at 1.8 g/t (0.29 Moz), both based on the JORC Code and a 1.0 g/t cut off. The increase in total resources is the result of geological re-modelling and subsequent revision of the resource estimate after drilling confirmed a NNE plunging high-grade core to the EMZ. The higher grade zones exhibit reasonable continuity in longitudinal section and can be correlated from section to section. Additional drilling along extensions of these higher grade zones is expected to further enhance resources.

Mr. Martin Pittuck, CEng MIMMM, Principal Resource Geologist with SRK Consulting in Cardiff, UK, prepared the resource estimate in accordance with the guidelines set out in National Instrument 43-101 and acted as the "Independent Consultant" as defined therein. A full report will be filed on SEDAR within 30 days.

Vic King, Gold Fields' Regional Exploration Manager for Africa stated that: "Our improved understanding of the orientation and geometry of the higher grade zones has highlighted the potential for significantly extending resources down dip and on similar targets along strike on the EMZ. This will be the primary focus of our efforts during the next phase of drilling. Drilling will also be carried out at the Falagountou, Gossey and Sokadie prospects, which are all located around the EMZ on the Essakan property. Infill drilling at the exciting Falagountou prospect will be carried out to confirm the geometry and continuity of the discovery and also extend this highly prospective zone southward." He added that "We are very pleased with Orezone's

performance in operating this project and Essakan is one of Gold Field's top ranked exploration projects."

Ron Little, Orezone's President and CEO commented that: "While the existence of high grade veins in the EMZ has always been known, they have now been better reflected in the resource calculation which has resulted in the indicated resource increasing by almost 50 per cent. Alternatively, the grade of the indicated resource can be increased to 2.42 g/t by raising the cut off to 1.5 g/t and we still have more ounces than were in the previous estimate."

The Essakan Project is a joint venture in which Gold Fields can earn a 50 per cent interest by spending US \$8 million over five years, and can increase its interest to 60 per cent by completing a bankable feasibility study. Gold Fields has spent approximately US \$2.8 million to date. Orezone is currently the operator and expects to make an announcement shortly on the budget for the next phase of drilling.

Gold Fields Limited (GFI:NYSE, JSE) is one of the world's largest unhedged gold companies with annual gold production of 4.3 million ounces, mineral resources of 196 million ounces and mineral reserves of 85 million ounces. Gold Fields has operations in South Africa, Australia and Ghana (West Africa) and has an exciting growth project pipeline. This includes exploration projects in all of the major gold provinces of the world as well as 100% ownership of the 12 million ounce Arctic Platinum Project, an advanced stage PGM project in Northern Finland, and 92% of the developing Cerro Corona Project in Peru, a 4 million ounce copper/gold project. Gold Fields has its primary listing on the JSE Securities Exchange in South Africa (GFI) with secondary listings on the London, Euronext, Paris, Brussels, and Swiss exchanges. The company's American Depositary shares are listed on the New York Stock Exchange, where it also trades under the symbol GFI.

Orezone Resources Inc. (OZN:TSX, Amex) is an emerging Canadian gold producer with three advanced projects moving rapidly toward the pre-feasibility stage in Burkina Faso, West Africa. Orezone has a very large and strategic land position in Burkina Faso, which is a relatively unexplored part of one of the world's fastest growing gold producing regions. The Company's mission is to create wealth by discovering and developing the earth's resources in an efficient and responsible manner.

FORWARD-LOOKING STATEMENTS: This news release contains certain "forward-looking statements" within the meaning of Section 21E of the United States Securities Exchange Act of 1934, as amended. Except for statements of historical fact relating to the company, certain

information contained herein constitutes forward-looking statements. Forward-looking statements are frequently characterized by words such as "plan," "expect," "project," "intend," "believe," "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward-looking statements are based on the opinions and estimates of management at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. These factors include the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drilling results and other geological data, fluctuating metal prices, the possibility of project cost overruns or unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future and other factors. The Company undertakes no obligation to update forward- looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on forward-looking statements.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
