MEDIA RELEASE

Eskom Reinstates Authority for Mines to Increase

Power Load from 80% to 90%

Johannesburg, Friday, February 1, 2008: Gold Fields Limited (“Gold Fields”) (NYSE, JSE, DIFX: GFI) reports that Eskom last night reinstated the authorisation for mines to increase their power load from 80% to 90%. This follows after authorisation was withdrawn late yesterday morning.

Gold Fields operations are cautiously remobilising towards the 90% level, with due consideration for the safety implications of an erratic

and uncertain power supply.

Terence Goodlace, head of Gold Fields' South African operations said:

“While we welcome the reinstatement of the 90% power levels, we urgently need a guarantee of a sustainable level of supply. We need to have a consistent guaranteed supply to re-establish our operations safely at these levels.”

About Gold Fields

Gold Fields Limited is one of the world's largest unhedged producers of gold with attributable production of more than four million ounces per annum from eight operating mines in South Africa, Ghana and Australia.

A ninth mine, the Cerro Corona Gold/Copper mine in Peru, is expected to commence production by mid 2008 at an initial rate of approximately 400,000 gold equivalent ounces per annum.

The company has total attributable ore reserves of 92 million ounces and mineral resources of 252 million ounces.

Gold Fields employs some 47,000 permanent employees across its operations and is listed on the JSE Limited South Africa (primary listing), the New York Stock Exchange (NYSE) and the Dubai International Financial Exchange (DIFX).

All of Gold Fields' operations are ISO14001 certified. For more information please visit the Gold Fields website at www.goldfields.co.za.

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
