América Móvil's fourth quarter of 2018 financial and operating report

Mexico City, February 12th, 2019 - América Móvil, S.A.B. de C.V. ("América Móvil") [BMV: AMX] [NYSE: AMX, AMOV], announced today its financial and operating results for the fourth quarter of 2018.

- We gained 1.5 million postpaid subscribers in the fourth quarter, including 1.2 million in Brazil, and nearly 200 thousand in Mexico. Our postpaid base increased 7.2% year-on-year. Prepaid net subscriber gains accelerated sharply in Mexico, Colombia, the Argentinean block and the U.S. from the prior quarter, while postpaid gains did so in Brazil.
- Fixed-broadband is still the main driver on the fixed-line platform; we connected 590 thousand new accesses, a 5.6% increase.
- Revenues of 262 billion pesos were nearly flat in Mexican peso terms from the year-earlier quarter. At constant exchange rates, service revenues expanded 3.0%, roughly the same pace observed the prior quarter.
- Fixed-broadband and mobile postpaid were the main drivers of revenue growth, increasing 9.5% and 7.9%, respectively, followed by mobile prepaid revenues, up 3.2%. PayTV revenues were down 2.5%.
- EBITDA came in at 70.6 billion pesos in the quarter and remained practically unchanged relative to last year in Mexican peso terms, whereas at constant exchange rates, it rose 6.8%.
- Our operating profit increased by 25.6% to 35.9 billion pesos, partly on account of reduced depreciation charges in Brazil.
- Comprehensive financing costs declined 68% over the year to 12.1 billion pesos. This reduction arises from the release of provisions in Brazil related to a tax dispute that was resolved favorably.
- We obtained a net profit of 9.5 billion pesos in the quarter, bringing the total for the year to 45.7 billion pesos, up 8.4%.
- Our cash flow covered our capital expenditures of 152 billion pesos and allowed us to significantly reduce our liabilities, funneling 41.6 billion pesos to the amortization of financial debt and 14.3 billion pesos to pension obligations.

- At year-end our net debt stood at 568.2 billion pesos; it was equivalent to 1.88 times the year's EBITDA.
-

Access Lines

Our wireless subscriber base comprised 75.7 million postpaid clients at year-end and just over 200 million prepaid subs. The former figure rose 7.2% year-on-year while the latter declined 4.0%. Net additions in the contract segment totaled 1.5 million subs and include 1.2 million in Brazil and almost 200 thousand in Mexico.

Prepaid net subscriber gains accelerated sharply in Mexico, Colombia, the Argentinean block and the U.S. from the prior quarter, with 547 thousand in Mexico, 398 thousand in Colombia, 90 thousand in the Argentinean block and 66 thousand in the U.S. (excluding Safelink). In Brazil and Central America we had a subscriber clean up, which explains the net loss of 5.1 million prepaid subs in the quarter.

Fixed RGUs increased 1.5% driven by broadband services as we connected 590 thousand new accesses. They were up 5.6% year-on-year.

América Móvil Consolidated Results

In the fourth quarter, amid continued economic expansion in the U.S. and strong employment gains, renewed fears about impending interest rate increases by the Fed surfaced again leading to a significant depreciation of equities and other financial assets and to the strengthening of the dollar against most currencies. Other than the Brazilian real, that recovered by nearly 4% from its election-driven lows, all other currencies in Latin America were down vs. the U.S. dollar, with the Colombian peso falling on average 6.4% from the previous quarter and the Mexican peso 4.1%.

Revenues of 262 billion pesos were nearly flat in Mexican peso terms from the year-earlier quarter. At constant exchange rates, service revenues expanded 3.0%, roughly the same pace observed the prior quarter, as the acceleration of service-revenue growth in Colombia, the U.S. and Argentina was compensated by a slight deceleration in Brazil and Mexico, stemming from aggressive holiday promotions that included large allotments of data and airtime.

Mobile service revenues accelerated in the U.S.—it was their best performance in at least six quarters— Argentina and the Dominican Republic. On the fixed-line platform, Colombia, Chile and Ecuador maintained their positive trend. Brazil's, while still slightly negative, improved from the prior quarters, but this was not the case in Mexico.

Fixed-broadband and mobile postpaid were the main drivers of revenue growth, increasing 9.5% and 7.9%, respectively, followed by mobile prepaid revenues, up 3.2%. On the other hand, PayTV revenues were down 2.5% .

EBITDA came in at 70.6 billion pesos in the quarter. As with service revenues, EBITDA was almost flat year-on-year in Mexican peso terms, whereas at constant exchange rates, it rose 6.8%. The latter figure includes the net effect of the release of certain provisions in Brazil and some new charges in Central America. Correcting for one-off moves, EBITDA increased by 6.1%, slightly less than it had the prior quarter when correcting for one-off moves. Greater commercial dynamism in certain countries including Mexico, Brazil, Colombia and the U.S. ended up dampening the expansion of EBITDA relative to the third quarter.

Our operating profit increased by 25.6% to 35.9 billion pesos, partly reflecting reduced depreciation charges in Brazil stemming from a thorough revision of the useful lives of various assets. Our comprehensive financing costs were down 68% from the year-earlier quarter to 12.1 billion pesos. This reduction arises from the release of provisions in Brazil linked to the judicial resolution of tax disputes in which our old subsidiary Embratel had claimed that PIS-Cofins taxes should not be considered as part of the base for the computation of the ICMS value-added taxes.

We obtained a net profit of 9.5 billion pesos in the quarter, bringing the total for the year to 45.7 billion pesos, 8.4% more than a year before.

n.m. Not meaningful

Our capital expenditures totaled 152 billion pesos throughout 2018 whereas our overall shareholder distributions—share buybacks and net dividend payments—totaled 21.0 billion pesos. We directed a significant part of our cash flow to the reduction of liabilities, funneling a total of 14.3 billion pesos to pension obligations and 41.6 billion pesos to our net debt. Altogether, and after taking into account foreign exchange variations on the peso value of our outstanding obligations, our net debt came down by 46.2 billion pesos from the close of 2017, to 568.2 billion pesos, equivalent to 1.88 times the year's EBITDA.

(2) On February 2018, TKA called its 600 million euro hybrid bond and on September AMX called its 900 million euro hybrid bond.

Mexico

We added 744 thousand net mobile subscribers, 38% more than in the year-earlier quarter, to finish the year with 75.4 million mobile subscribers. Postpaid net adds came in at 197 thousand subscribers, bringing our postpaid base up 5.8 in the period. Prepaid net additions of 547 thousand were 63% higher than a year before. On the fixed-line platform RGUs totaled 22.3 million—a 2.2% year-on-year increase—after adding 248 thousand broadband subscribers.

Fourth quarter revenues were up 5.3% to 75.8 billion pesos, with mobile service revenues expanding 7.6% even though Christmas promotions had considerable allotments of data and airtime. On the prepaid segment, revenues accelerated to a pace of 7.6% whereas postpaid revenues maintained their trend, expanding 6.6% year-on-year. Mobile ARPU reached 150 pesos and was up 5.7% in the period.

Fixed-line service revenues decreased 5.1% on the back of an 11% reduction in international long-distance revenue and a 25.9% decline in interconnection revenues. On the other hand, fixed broadband revenues were up 0.8% and corporate network revenues, 3.1%.

EBITDA rose 3.3% from the year-earlier quarter to 23.9 billion pesos. Relative to total revenues, the EBITDA margin was slightly off, 0.6 percentage points, to 31.5% but this effect was mostly to do with the notable increase in equipment revenues in the quarter, partly reflecting the sales of TVs and other electronic device through Telmex. Relative to service revenues, the EBITDA margin actually rose by 0.3 percentage points. The EBITDA margin for the full year rose 1.4 percentage points.

We continue to benefit from mobile number portability as Telcel remains the leader in coverage, quality and technology. In 2018, we launched our 4.5G network—the only 4.5G Network in the country—that covers 74 cities offering the best customer experience.

*Fixed Line and Broadband.

Argentina, Paraguay and Uruguay

We gained 135 thousand net additions in the fourth quarter—48.1% more than in the prior year—to finish December with 24.3 million wireless subscribers, up 0.7%. On the postpaid segment our base grew 3.0% annually, after postpaid net additions of 45 thousand in the period. We also had 775 thousand fixed RGUs, an increase of 15.7% year-on-year driven by broadband accesses that were up 29.7%.

Fourth quarter revenues of 19.1 billion Argentinean pesos were 36.9% higher than in the year-earlier quarter, with service revenues rising 39.2%. Equipment revenues rose 28.2% over the year. Although from a small base, fixed line revenues more than doubled on the back of strong demand from both corporate and residential clients.

EBITDA increased 41.7% year-on-year to 6.5 billion Argentinean pesos. We have been very focused on containing costs in the face of rising inflation and managed to post a 1.1 percentage points increase in our EBITDA margin that reached 33.9%.

We continue with the rollout of 4G -LTE networks to offer the best coverage, quality and speed. We have been investing heavily on the deployment of fiber to provide top line convergent solutions.

Brazil

Leading market share growth in the postpaid segment, Claro added 1.2 million mobile postpaid subs in the quarter to end the year with 23.5 million postpaid clients, 15.6% more than at the end of 2017. Brazil was our best performer in the development of a greater postpaid mobile subscriber base. In the same period we disconnected 3.8 million prepaid subs.

On the fixed-line platform we ended 2018 with 35.3 million RGUs after adding 82 thousand broadband clients and disconnecting 175 thousand voice and 224 thousand PayTV clients, mostly DTH.

Our revenues totaled 9.0 billion reais in the quarter, 0.8% more than a year before, as mobile service revenues expanded 7.3% and fixed-line service revenues declined by 1.3% from the year-earlier quarter—less than they had fallen in at least five quarters—as the effects of the country’s long economic recession are slowly left behind.

The most dynamic business line was fixed-broadband, which posted 15.3% revenue growth as Net Serviços continued to grow steadily; in the ultrabroadband market we captured 61.9% of the market’s new accesses. Then came mobile postpaid revenues, up 11.2% and prepaid revenues inching up 1.5% after a long period of stagnation—also a sign of the economic recovery. Altogether mobile ARPU rose 10.3% from the year before, to 17 reais.

At 2.9 billion reais, EBITDA was up 7.7% year-on-year, with the EBITDA margin increasing to 32.2% from 30.1% in the year-earlier quarter. The latter increase was driven partly by the release of provisions associated with tax disputes of our old subsidiary Embratel. Correcting for this, our EBITDA margin would have been 30.7% in the quarter, 0.6 percentage points higher than a year before. For the full year 2018 the EBITDA margin increased 1.4 percentage

points in relation to the prior year.

We hit a record high on mobile number portability for postpays in the fourth quarter. Claro is attracting high value customers with top convergent solutions running on the fastest network in Brazil. Our networks offer the greatest 4G and 4.5G coverage in the country.

Chile

We ended the year with 6.7 million wireless subscribers, 4.0% less than a year before after net disconnections of 165 thousand prepaid subs. Conversely, our contract base rose 9.6%. Fixed-line RGUs came in at 1.4 million, up 5.2% with broadband accesses rising 8.0%.

Total revenues declined 3.0% as compared to the prior year, to 221 million Chilean pesos, with service revenues falling 0.7%. Wireless service revenues declined 4.4% pulled down by prepaid revenues that plummeted from the year-earlier quarter. Competition in the prepaid segment intensified in the second half of 2018 and peaked in the Christmas season. On the postpaid segment we have introduced some unique features in our plans and have been able

to maintain stable revenues.

Fixed-line revenues increased 5.3% on an annual basis and now represent almost 40% of the total. We have seen very solid growth on the corporate segment offering cloud services and tailor-made solutions. On the residential division we resumed the build out of homes-passed in 2018, which has enabled us to grow broadband revenues by 3.1% and PayTV revenues by 1.7%.

EBITDA rose 9.8% year-over-year and reached 38.6 billion Chilean pesos. The EBITDA margin stood at 17.4%, two percentage points higher than the prior year. In a very competitive environment, we continue to focus our efforts on controlling costs and generating operating efficiencies.

Colombia

Our wireless subscriber base rose 1.1% annually to reach 29.7 million subs at year-end. We added 448 thousand subs including 50 thousand contract clients taking our postpaid base up 3.7%. Fixed RGUs came in at 7.2 million—6.2% more than last year—after connecting 34 thousand new broadband accesses and 23 thousand PayTV units.

Fourth quarter revenues grew 2.8% year-on-year to nearly three trillion Colombian pesos. Service revenues rose 2.4% on the back of fixed service revenues—which account for 37% of the total—that expanded 8.6%. Fixed broadband revenues continued to accelerate, increasing 11.0%, while voice revenues and PayTV revenues were up 7.3% and 6.5%, respectively.

Mobile service revenues declined 1.7% in the quarter. Our postpaid revenues were up 0.6%, but declined 9.3% on the prepaid segment, which has become very competitive following the introduction of virtual players.

Leveraging our convergent platform and containing commercial costs we managed to increase our EBITDA 3.5% over the year bringing the figure for the quarter to 1.2 trillion Colombian pesos. The EBITDA margin stood at 40.1%, 30 basis points more than the prior year.

We have kept on investing in our platforms to offer the best coverage, quality and speed, and this has enabled us to make greater progress in mobile number portability.

Ecuador

We finished the year with 8.2 million wireless subscribers, 3.6% more than a year before after adding 85 thousand subs. On the fixed segment we had 384 thousand RGUs, 4.7% above last year.

Fourth quarter revenues of 330 million dollars were 3.1% higher than a year before, supported by equipment revenues that rose 38.0%. Competitive conditions in the mobile market in Ecuador continued to be intense. On the fixed-line platform service revenues were up 5.2% annually to 21 million dollars, with broadband revenues increasing 9.1%.

EBITDA declined 4.3% to 137 million dollars. This figure reflects a provision of regulatory contingencies in the absence of which EBITDA would have risen 1.7% relative to the year-earlier quarter. The EBITDA margin for the period was equivalent to 41.6% of revenues.

Peru

With 12.1 million subscribers, our wireless base declined 2.4% relative to December 2017 following disconnections of 612 thousand subscribers in the fourth quarter. On the fixed-line segment, RGUs grew 5.3% to 1.5 million, with broadband accesses rising nearly 10% in the period.

Total revenues of 1.4 billion soles were 2.8% lower than in the prior year, with equipment revenues rising 16% and service revenues declining 6.1%. Wireless service revenues fell 8.6% relative to the prior year on account of an interconnection cut of 62% and the introduction of more competitive commercial promotions. On the fixed-line platform, service revenues were 0.8% lower than a year before; they account for 19% of total service revenues.

Fourth quarter EBITDA came in at 339 million soles, 10.6% higher than in the prior year. The improvement is based mostly on a net reduction of interconnection costs, and an important decline in subsidies, which are high in Peru.

Central America

Our combined operations in Central America ended the year with 14.4 million wireless subscribers after net disconnections of 1.6 million subscribers—almost all prepaid—that resulted from a clean up of our subscriber base. Most of the disconnections, 1.3 million, came from Honduras and Nicaragua. On the fixed-line platform we increased by 11.3% the number of RGUs, to 6.5 million, with solid growth of broadband accesses, up 16.0% year-on-year.

Total revenues for the block came down 3.8% with service revenues declining 3.2%. At constant exchange rates, service revenues would have increased 0.4% and total revenues would have been down 0.2% as a result of equipment revenue losses.

Mobile service revenues came down 2.7%. We saw a sharp decline in Nicaragua given the overall situation of the country. Fixed service revenues declined 4.4% relative to the precedent year as voice revenues dropped 14.3%. Long distance revenues continued to fall but now represent only 2% of fixed service revenues. Broadband and PayTV

revenues increased 3.4% and 1.3%, respectively, in spite of the decline observed in Nicaragua.

EBITDA of 177 million dollars was 15.9% lower than a year before, dragged by Nicaragua and Honduras. We booked in the quarter extraordinary charges in Honduras derived from tax credits that are currently under litigation with the tax authorities. Additionally, in the fourth quarter of 2017, we cancelled miscellaneous provisions in Guatemala and Honduras. Correcting for the aforementioned one-time items, EBITDA would have been 7.3% below last year. Fourth quarter EBITDA margin stood at 30.4%.

Caribbean

Our operations in the Caribbean added 77 thousand wireless subscribers bringing the base to 5.9 million at the end of December, 4.4% above the precedent year. On the fixed-line platform the Dominican operation increased its RGU base by 1.5% while in Puerto Rico we had disconnections of 36 thousand RGUs. Total accesses came in at 2.5 million, 5.7% below 2017.

Total revenues in the Dominican Republic increased 4.9% with equipment revenues rising 17.3% and service revenues growing 4.6%. Wireless service revenue growth continued to accelerate in the last quarter on the back of data growth, especially in the prepaid segment. Fixed-line service revenues were 1.4% higher than a year before as broadband and PayTV revenues more than compensated for the decline in fixed voice revenues. EBITDA in the island was up 6.1% and reached 5.5 billion Dominican pesos, equivalent to 45.3% of revenues.

Service revenues in Puerto Rico continued to recover and were close to the levels observed prior to hurricane Maria. On the wireless segment, service revenues grew 4.7% relative to the same quarter of last year mostly driven by postpaid revenues. On the fixed platform, in which service took longer to be reinstated after the hurricane, revenues increased 29.0% with a strong performance of broadband revenues. EBITDA came in at 31 million dollars and the EBITDA margin stood at 13.6%. A year before, Puerto Rico had posted an EBITDA loss.

United States

Our subscriber base ended December with 21.7 million subscribers—6.2% lower than in the prior year—following net disconnections of 106 thousand. Excluding SafeLink, we registered net additions of 66 thousand subscribers.

Total revenues of two billion dollars rose 3.1% over the year with service revenues increasing 2.7%. ARPU was up 10.8% to 26 dollars per subscriber as the mix of clients continued to shift towards high usage brands.

EBITDA of 160 million dollars declined 9.1% year-on-year, partly on account of much better subscriber figures than in the year-earlier quarter when we had net disconnections of 600 thousand subs. The EBITDA margin stood at 8.0% of revenues.

Telekom Austria Group

Our operations in Europe ended the year with 21 million wireless subscribers after net disconnections of 99 thousand prepaid subs; most of them in Bulgaria as a result of measures introduced in 2018 related to the registration of prepaid lines. Our postpaid subscriber base increased 4.1% with growth in all markets boosted by A1 digital M2M subscriber growth and high demand of mobile WiFi routers. Fixed RGUs rose 3.7% driven by CEE markets.

Total group revenues, 1.2 billion euros, rose 3.1% year-on-year. The annual comparison is affected by minor one-off effects, most of them booked in the last quarter of 2017, and by foreign exchange variations stemming mostly from Belarus. Adjusting for these, revenues would have been 3.9% higher than a year before.

In Austria, service revenues increased 3.8% as compared to the prior year. The fixed line segment outpaced mobile as we saw solid growth of corporate solutions and connectivity products. Mobile service revenues were up 3.4% driven by high-value clients and greater adoption of mobile WiFi.

In CEE we saw strong service revenue growth in Bulgaria, Croatia, Serbia and Macedonia. Slovenia remains a challenging market on the mobile segment while in Belarus we had great improvements in the fixed-line segment.

Fourth quarter EBITDA rose 1.6% over the year. EBITDA includes 13.9 million euros related to restructuring charges in Austria. In absence of such charges in both 4Q18 and 4Q17, EBITDA growth would have been 8.3% higher than a year before. Almost all operations had a positive contribution. EBITDA growth has been the result of our ability to grow service revenues while keeping costs at check.

Glossary of Terms

ARPU	Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.
ARPM	Average Revenue per Minute. The ratio of service revenues to airtime traffic.
Capex	Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.
Churn	Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.
EBIT	Earnings Before Interest and Taxes, also known as Operating Profit.
EBIT	The ratio of EBIT to total operating revenue.

margin	
EBITDA	Earnings Before Interest, Taxes, Depreciation, and Amortization.
EBITDA	The ratio of EBITDA to total operating revenue.
margin	
EPS	Earnings per share. Total earnings in Mexican pesos divided by total shares.
(Mexican	
pesos)	
Earnings	Total earnings in U.S. dollars divided by total ADRs equivalent.
per ADR	
(US\$)	
Equity	Subscribers weighted by the economic interest held in each company.
subscribers	

Gross additions	Total number of subscribers acquired during the period.
Licensed pops	Licensed population. Population covered by the licenses that each of the companies manage.
LTE	Long-term evolution is a 4th generation standard for wireless communication of high-speed data for mobile phones and data terminals.
Market share	A company's subscriber base divided by the total number of subscribers in that country.
MBOU	Megabytes of Use per subscriber. The ratio of wireless data in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.
MOU	Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.
Net subscriber additions	The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.
Net debt	Total short and long term debt minus cash and marketable securities.
Net debt / EBITDA	The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.
Prepaid	Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.
Postpaid	Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.
SMS	Short Message Service.
SAC	Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.
Wireless penetration	The ratio of total wireless subscribers in any given country divided by the total population in that country.
