NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

(1) CONSOLIDATION AND BASIS OF PRESENTATION

On October 1, 2015, National Western Life Insurance Company ("National Western", "NWLIC", or "company") completed its previously announced holding company reorganization. As a result of the reorganization, National Western became a wholly owned subsidiary of National Western Life Group, Inc. ("NWLGI"), a Delaware Corporation, and NWLGI replaced National Western as the publicly held company.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for annual financial statements. In the opinion of management, the accompanying condensed consolidated financial statements contain all adjustments necessary to present fairly the financial position of NWLGI and its subsidiaries ("Company") as of June 30, 2016, and the results of its operations and its cash flows for the three and six months ended June 30, 2016 and 2015. Such adjustments are of a normal recurring nature. The results of operations for the six months ended June 30, 2016 are not necessarily indicative of the results to be expected for the full year. It is recommended that these condensed consolidated financial statements be read in conjunction with the audited consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 and are accessible free of charge through the Company's internet site at [www.nwlg.com](http://www.nwlg.com) or the Securities and Exchange Commission internet site at [www.sec.gov](http://www.sec.gov). The Condensed Consolidated Balance Sheet at December 31, 2015 has been derived from the audited consolidated financial statements as of that date.

Prior to the reorganization, the accompanying consolidated financial statements included the accounts of National Western and its wholly owned subsidiaries: The Westcap Corporation, Regent Care San Marcos Holdings, LLC, NWL Investments, Inc., NWL Services, Inc., NWLSM, Inc., and NWL Financial, Inc. During the fourth quarter of 2015, subsequent to the reorganization, National Western transferred ownership of Regent Care San Marcos Holdings, LLC, NWL Investments, Inc., and NWL Services, Inc. to NWLGI via a dividend transaction resulting in those entities becoming wholly owned subsidiaries of NWLGI.

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures of contingent assets and liabilities, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates. Significant estimates in the accompanying condensed consolidated financial statements include (1) liabilities for future policy benefits, (2) valuation of derivative instruments, (3) recoverability and amortization of deferred policy acquisition costs, (4) valuation allowances for deferred tax assets, (5) other-than-temporary impairment losses on debt securities, (6) commitments and contingencies, and (7) valuation allowances for mortgage loans and real estate.

The table below shows the unrealized gains and losses on available-for-sale securities that were reclassified out of accumulated other comprehensive income for the three and six months ended June 30, 2016 and 2015.

Affected Line Item in the Statements of Earnings	Amount Reclassified From Accumulated Other Comprehensive Income

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)

(2) NEW ACCOUNTING PRONOUNCEMENTS

In June 2014, the Financial Accounting Standards Board ("FASB") issued guidance that applies to all reporting entities that grant their employees share-based payments in which the terms of the award provide that a performance target that affects vesting could be achieved after the requisite service period. It requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition and follows existing accounting guidance for the treatment of performance conditions. The standard is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, with early adoption permitted. The Company adopted this standard during the three month period ended March 31, 2016. The adoption of this standard did not have a material impact on the Company's financial position, results of operations or cash flows.

In January 2016, the FASB released accounting standards update 2016-01 Recognition and Measurement of Financial Assets and Liabilities. The main provisions of the update are to eliminate the available for sale classification of accounting for equity securities and to adjust the fair value disclosures for financial instruments carried at amortized costs such that the disclosed fair values represent an exit price as opposed to an entry price. The provisions of this update will require that equity securities be carried at fair market value on the balance sheet and any periodic changes in value will be adjustments to the income statement. The provisions of this update become effective for interim and annual periods beginning after December 15, 2017. The Company does not expect the requirements of this update to have a material impact on the Company's financial position, results of operations or cash flows.

In June 2016, the FASB released accounting standards update 2016-13, Financial Instruments-Credit Losses, which revises the credit loss recognition criteria for certain financial assets measured at amortized cost. The new guidance replaces the existing incurred loss recognition model with an expected loss recognition model. The objective of the expected credit loss model is for the reporting entity to recognize its estimate of expected credit losses for affected financial assets in a valuation allowance deducted from the amortized cost basis of the related financial assets that results in presenting the net carrying value of the financial assets at the amount expected to be collected. The guidance is effective for interim and annual periods beginning after December 15, 2019, and for most affected instruments must be adopted using a modified retrospective approach, with a cumulative effect adjustment recorded to beginning retained income. Adoption of the guidance is not expected to have a material effect on the Company's results of operations or financial position.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, and the SEC did not, or are not believed by management to, have a material impact on the Company's present or future consolidated financial statements.

(3) STOCKHOLDERS' EQUITY

NWLIC is restricted by state insurance laws as to dividend amounts which may be paid to stockholders without prior approval from the Colorado Division of Insurance. The restrictions are based on the greater of statutory earnings from operations excluding capital gains or 10% of statutory surplus of the company. The maximum dividend payment which may be made without prior approval in 2016 is \$117.1 million. National Western did not declare or pay cash dividends on its common stocks during the six months ended June 30, 2016 and 2015.

As discussed in Note 1, Consolidation and Basis of Presentation, on October 1, 2015, NWLIC completed its previously announced holding company reorganization and became a wholly owned subsidiary of NWLGI. While

remaining under the same Colorado Division of Insurance restrictions pertaining to dividend amounts, dividends declared by NWLIC from that date forward are payable entirely to NWLGI as the sole owner of NWLIC.

The reorganization effective October 1, 2015 provided for the conversion of each share of Class A common stock, par value \$1.00 per share, and each share of Class B common stock, par value \$1.00 per share, of NWLIC issued and outstanding immediately prior to the effective time of the merger, into one duly issued, fully paid and non-assessable share of Class A common stock, par value \$0.01 per share, and Class B common stock, par value \$0.01 per share, of NWLGI. Consequently, NWLGI replaced NWLIC as the publicly held company and is the successor issuer to NWLIC.

## (4) EARNINGS PER SHARE

Basic earnings per share of common stock are computed by dividing net income by the weighted-average basic common shares outstanding during the period. Diluted earnings per share assumes the issuance of common shares applicable to stock options in the denominator. Net income for the periods shown is allocated between Class A shares and Class B shares based upon (1) the proportionate number of shares issued and outstanding as of the end of the period, and (2) the per share dividend rights of the two classes under the Company's Restated Certificate of Incorporation (the Class B dividend per share is equal to one-half the Class A dividend per share).

	Three Months Ended June 30,			
	2016		2015	
	Class A	Class B	Class A	Class B
	(In thousands except per share amounts)			
Numerator for Basic and Diluted Earnings Per Share:				
Net income	\$26,286		28,858	
Dividends - Class A shares	—		—	
Dividends - Class B shares	—		—	
Undistributed income	\$26,286		28,858	
Allocation of net income:				
Dividends	\$—	—	—	—
Allocation of undistributed income	25,543	743	28,042	816
Net income	\$25,543	743	28,042	816
Denominator:				
Basic earnings per share - weighted-average shares	3,436	200	3,436	200
Effect of dilutive stock options	—	—	1	—
Diluted earnings per share - adjusted weighted-average shares for assumed conversions	3,436	200	3,437	200
Basic Earnings Per Share	\$7.43	3.72	8.16	4.08
Diluted Earnings Per Share	\$7.43	3.72	8.16	4.08

Stock options that were outstanding during the three months ended June 30, 2016 and 2015, but were not included in the computation of diluted earnings per share because the effect was anti-dilutive, were approximately 20,800 and 20,800, respectively.

## (5) PENSION AND OTHER POSTRETIREMENT PLANS

## (A) Defined Benefit Pension Plans

National Western sponsors a qualified defined benefit pension plan covering employees enrolled prior to 2008. The plan provides benefits based on the participants' years of service and compensation. The company makes annual contributions to the plan that complies with the minimum funding provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). On October 19, 2007, National Western's Board of Directors approved an amendment to freeze the pension plan as of December 31, 2007. The freeze ceased future benefit accruals to all participants and closed the plan to any new participants. In addition, all participants became immediately 100% vested in their accrued benefits as of that date. Fair values of plan assets and liabilities are measured as of the prior December 31 for each respective year. The following table summarizes the components of net periodic benefit cost.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Service cost	\$27	51	53	102
Interest cost	250	246	500	492
Expected return on plan assets	(304 )	(330)	(608)	(660)
Amortization of prior service cost	—	1	—	2
Amortization of net loss	193	196	386	392
Net periodic benefit cost	\$166	164	331	328

The service costs shown in the above table represent plan expenses expected to be paid out of plan assets. Under the clarified rules of the Pension Protection Act, plan expenses paid from plan assets are to be included in the plan's service cost component.

The company's minimum required contribution for the 2016 plan year is \$0.2 million. There was no remaining contribution payable for the 2015 plan year as of June 30, 2016. As of June 30, 2016, the company had contributed a total of \$0.1 million to the plan for the 2016 plan year.

National Western also sponsors a nonqualified defined benefit plan primarily for senior officers. The plan provides benefits based on the participants' years of service and compensation. The pension obligations and administrative responsibilities of the plan are maintained by a pension administration firm, which is a subsidiary of American National Insurance Company ("ANICO"). ANICO has guaranteed the payment of pension obligations under the plan. However, the company has a contingent liability with respect to the plan should these entities be unable to meet their obligations under the existing agreements. Also, the company has a contingent liability with respect to the plan in the event that a plan participant continues employment with National Western beyond age seventy, the aggregate average annual participant salary increases exceed 10% per year, or any additional employees become eligible to participate in the plan. If any of these conditions are met, the company would be responsible for any additional pension obligations

resulting from these items. Amendments were made to the plan to allow an additional employee to participate and to change the benefit formula for the then Chairman of the company. As previously mentioned, these additional obligations are a liability to the company. Effective December 31, 2004, this plan was frozen with respect to the continued accrual of benefits of the then Chairman and the President of the company in order to comply with law changes under the American Jobs Creation Act of 2004 ("Act").

Effective July 1, 2005, National Western established a second nonqualified defined benefit plan for the benefit of the then Chairman and the President of the company. This plan is intended to provide for post-2004 benefit accruals that mirror and supplement the pre-2005 benefit accruals under the previously discussed nonqualified defined benefit plan, while complying with the requirements of the Act.

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

The following table summarizes the components of net periodic benefit costs for the then Chairman and President's nonqualified defined benefit plans.

	Three Months Ended June 30, 2016 2015		Six Months Ended June 30, 2016 2015	
	(In thousands)			
Service cost	\$109	64	218	128
Interest cost	264	219	529	438
Amortization of prior service cost	15	15	30	30
Amortization of net loss	501	379	1,002	757
Net periodic benefit cost	\$889	677	1,779	1,353

The company expects to contribute \$2.0 million to these plans in 2016. As of June 30, 2016, the company has contributed \$0.9 million to the plans.

## (B) Defined Benefit Postretirement Healthcare Plans

National Western sponsors two healthcare plans to provide postretirement benefits to certain fully-vested individuals. The following table summarizes the components of net periodic benefit costs.

	Three Months Ended June 30, 2016 2015		Six Months Ended June 30, 2016 2015	
	(In thousands)			
Interest cost	\$30	33	60	65
Amortization of prior service cost	26	26	52	52
Amortization of net loss	—	15	—	30
Net periodic benefit cost	\$56	74	112	147

The company expects to contribute minimal amounts to the plan in 2016.

**(7) SHARE-BASED PAYMENTS**

The Company had a stock and incentive plan ("1995 Plan") which provided for the grant of any or all of the following types of awards to eligible employees: (1) stock options, including incentive stock options and nonqualified stock options; (2) stock appreciation rights, in tandem with stock options or freestanding; (3) restricted stock or restricted stock units; and, (4) performance awards. The 1995 Plan began on April 21, 1995, and was amended on June 25, 2004 to extend the termination date to April 20, 2010. The number of shares of Class A, \$1.00 par value, common stock which were allowed to be issued under the 1995 Plan, or as to which stock appreciation rights ("SARs") or other awards were allowed to be granted, could not exceed 300,000. Effective June 20, 2008, the Company's shareholders approved a 2008 Incentive Plan ("2008 Plan"). The 2008 Plan is substantially similar to the 1995 Plan and authorized an additional number of Class A, \$0.01 par value, common stock shares eligible for issue not to exceed 300,000. These plans were assumed by NWLGI from National Western pursuant to the terms of the reorganization.

All of the employees of the Company and its subsidiaries are eligible to participate in the current 2008 Plan. In addition, directors of the Company are eligible to receive the same types of awards as employees except that they are not eligible to receive incentive stock options. Company directors, including members of the Compensation and Stock Option Committee, are eligible for nondiscretionary stock options. Employee grants vest 20% annually following three years of service following the grant date. Directors' grants vest 20% annually following one year of service from the date of grant.

Effective during March 2006, the Company adopted and implemented a limited stock buy-back program with respect to the 1995 Plan which provides option holders the additional alternative of selling shares acquired through the exercise of options directly back to the Company. Option holders may elect to sell such acquired shares back to the Company at any time within ninety (90) days after the exercise of options at the prevailing market price as of the date of notice of election. The buy-back program did not alter the terms and conditions of the 1995 Plan; however, the program necessitated a change in accounting from the equity classification to the liability classification. In August 2008, the Company implemented another limited stock buy-back program, substantially similar to the 2006 program, for shares issued under the 2008 Plan.

On February 17, 2016, the Company granted 14,643 SARs to officers of National Western at the closing market price per Class A common share of \$216.48. These SARs, unlike prior grants, will vest annually at a rate of 33.3% per year from the date of grant. No stock option or SAR awards were issued during the first six months of 2015.

While not previously utilized, the 2008 Plan allows for certain other share or unit awards which are solely paid out in cash based on the value of the Company's shares, or changes therein, as well as the financial performance of the Company under pre-determined target performance metrics. Certain awards, such as restricted stock units (RSUs) provide solely for cash settlement based upon the market price of the Company's Class A commons shares, often referred to as "phantom stock-based awards". Unlike share-settled awards, which have a fixed grant-date fair value, the fair value of unsettled or unvested liability awards is remeasured at the end of each reporting period based on the change in fair value of a share. The liability and corresponding expense are adjusted accordingly until the award is settled. Other awards may involve performance share units (PSUs) which are units granted at a specified dollar amount per unit, typically linked to the Company's Class A common share price, that are subsequently multiplied by an attained performance factor to derive the number of PSUs to be paid as cash compensation at the vesting date.

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

On February 17, 2016, the Company granted 5,727 performance stock units and 3,661 restricted stock units to officers of National Western based upon the closing market price per Class A common share of \$216.48. Both the PSUs and RSUs vest three years from the date of grant. The RSUs are payable in cash at the vesting date equal to the closing price of the Company's Class A common share at that time. For PSUs, the performance period begins the first day of the calendar year, in this case January 1, 2016, and runs three years. At that time, the three-year performance outcome will be measured against the pre-defined target amounts to determine the number of PSUs earned as compensation.

On April 14, 2016, the Company granted 2,563 restricted stock units to directors of NWLGI, based upon the closing market price per Class A common share of \$226.84. The RSUs vest one year from the date of grant, and are payable in cash at the vesting date equal to the closing price of the Company's Class A common share at that time.

The Company uses the current fair value method to measure compensation cost. As of June 30, 2016 and 2015, the liability balance was \$4.8 million and \$7.3 million, respectively. A summary of shares available for grant and activity is detailed below.

	Shares Available For Grant	Options Outstanding Shares	Weighted- Average Exercise Price
Stock Options:			
Balance at January 1, 2016	291,000	27,768	\$ 243.26
Exercised	—	—	\$ —
Forfeited	—	—	\$ —
Expired	—	—	\$ —
Stock options granted	—	—	\$ —
Balance at June 30, 2016	291,000	27,768	\$ 243.26

	SAR	RSU	PSU
Liability Awards			
Balance at January 1, 2016	86,261	—	—
Exercised	(375 )	—	—
Forfeited	(982 )	(45 )	—
Granted	14,643	6,224	5,727
Balance at June 30, 2016	99,547	6,179	5,727

Stock options and SARs shown as forfeited in the above tables represent vested and unvested awards not exercised by plan participants prior to their termination from the Company. Forfeited stock options, if any, are not shown as being added back to the "Shares Available For Grant" balance as they were awarded under the 1995 Plan which was terminated during calendar year 2010.

The total intrinsic value of SARs exercised was \$0.0 million and \$0.4 million for the six months ended June 30, 2016 and 2015, respectively. The total share-based liabilities paid for the exercised SARs were \$0.0 million and \$0.4 million for the six months ended June 30, 2016 and 2015, respectively. The total fair value of stock options and SARs vested during the six months ended June 30, 2016 and 2015 was \$0.3 million and \$0.6 million, respectively. For the six months ended June 30, 2016 and 2015, the total cash received from the exercise of stock options under the Plans was \$0.0 million and \$0.0 million, respectively.

114.64 (SARs)	23,168	2.6 years	23,168
132.56 (SARs)	27,918	5.5 years	13,508
210.22 (SARs)	34,000	7.5 years	3,600
216.48 (SARs)	14,461	9.6 years	—
Totals	127,315		68,044
Aggregate intrinsic value (in \$3,619 thousands)			\$ 2,715

The aggregate intrinsic value in the table above is based on the closing stock price of \$195.27 per share on June 30, 2016.

In estimating the fair value of the share based awards outstanding at June 30, 2016 and December 31, 2015, the Company employed the Black-Scholes option pricing model with assumptions detailed below.

	June 30, 2016		December 31, 2015	
Expected term of options	1.8 to 9.6 years		2.3 to 8.0 years	
Expected volatility:				
Range	22.53% to 28.81%		21.11% to 37.77%	
Weighted-average	23.83	%	23.89	%
Expected dividend yield	0.18	%	0.14	%
Risk-free rate:				
Range	0.54% to 1.52%		0.22% to 1.67%	
Weighted-average	1.03	%	0.63	%

The Company reviewed the contractual term relative to the options as well as perceived future behavior patterns of exercise. Volatility is based on the Company's historical volatility over the expected term of the option's expected exercise date.

The pre-tax compensation cost (benefit) recognized in the financial statements related to the two plans defined above was \$(1.3) million and \$(2.8) million for the three and six months ended June 30, 2016, and \$(0.8) million and \$(1.6) million for the three and six months ended June 30, 2015, respectively. The related tax (expense)/benefit recognized was \$0.5 million and \$1.0 million for the three and six months ended June 30, 2016 and to \$0.3 million and \$0.6 million for the three and six months ended June 30, 2015, respectively.

NATIONAL WESTERN LIFE GROUP, INC.  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(UNAUDITED)

As of June 30, 2016, the total compensation cost related to nonvested share based awards not yet recognized was \$3.7 million. This amount is expected to be recognized over a weighted-average period of 1.6 years. The Company recognizes compensation cost over the graded vesting periods.

(8) COMMITMENTS AND CONTINGENCIES

(A) Legal Proceedings

In the normal course of business, the Company is involved or may become involved in various legal actions in which claims for alleged economic and punitive damages have been or may be asserted, some for substantial amounts. In recent years, carriers offering life insurance and annuity products have faced litigation, including class action lawsuits, alleging improper product design, improper sales practices, and similar claims. Given the uncertainty involved in these types of actions, the ability to make a reliable evaluation of the likelihood of an unfavorable outcome or an estimate of the amount of or range of potential loss is endemic to the particular circumstances and evolving developments of each individual matter on its own merits.

On October 26, 2011 the Brazilian Superintendence of Private Insurance (“SUSEP”) attempted to serve National Western with a subpoena regarding an administrative proceeding initiated by SUSEP in which it alleged that National Western was operating as an insurance company in Brazil without due authorization. National Western had been informed that SUSEP was attempting to impose a penal fine, based on currency exchange rates at that time, of approximately \$6.0 billion on the company. SUSEP unsuccessfully attempted to serve National Western with notice regarding this matter. National Western does not transact business in Brazil and has no officers, employees, property, or assets in Brazil. National Western believes that SUSEP has no jurisdiction over the company, that SUSEP's attempts at service of process were invalid, and that any penal fine would be unenforceable. In addition, a new law recently enacted in Brazil would limit the amount of any penal fine to 3 million reais (approximately \$800,000 based on current exchange rates). For the reasons described above, the Company does not believe that this matter meets the definition of a material pending legal proceeding as such term is defined in Item 103 of Regulation S-K but has included the foregoing description solely due to the purported amount of the fine sought at that time. Nonetheless, National Western is in discussions with SUSEP in an effort to resolve this matter. No conclusion can be drawn at this time as to the outcome of these discussions, or whether they will continue, or how any such outcome may impact the Company's business, results of operations, or financial condition. However, in light of the pendency of discussions with Brazilian authorities, National Western has ceased accepting new applications from residents in Brazil.

National Western was the named defendant in the case of Damaris Maldonado Vinas, et al. vs. National Western Life Insurance, in which the plaintiffs, after National Western had paid the death benefits to the beneficiary (Francisco Iglesias-Alvarez) upon the annuitant's (Carlos Iglesias-Alvarez) death, sought to annul two annuity policies issued by National Western at the behest of Carlos Iglesias-Alvarez and which named Francisco Iglesias-Alvarez as their beneficiary. On March 31, 2016, the United States District Court for the District of Puerto Rico (the “Court”) issued its Opinion and Order on the pending Motions for Summary Judgment submitted by the parties, and therein denied National Western's motion and granted plaintiffs' motion voiding the two annuities and requesting a refund of the premiums paid (\$2.9 million). National Western vigorously defended the case and believes that the Court's Opinion and Order is contrary to applicable law. As such, National Western filed a Motion for Reconsideration of Opinion and Order and Corresponding Judgment with the Court on April 27, 2016, which the Court denied on May 5, 2016. National Western filed a Notice of Appeal on May 31, 2016.

Although there can be no assurances, at the present time, the Company does not anticipate that the ultimate liability arising from such other potential, pending, or threatened legal actions will have a material adverse effect on the financial condition or operating results of the Company.

Separately, the Brazilian authorities have commenced an investigation into possible violations of Brazilian criminal law in connection with the issuance of National Western insurance policies to Brazilian residents, and in assistance of such investigation a Commissioner appointed by the U.S. District Court for the Western District of Texas has issued a subpoena upon the company to provide information relating to such possible violations. No conclusion can be drawn at this time as to its outcome or how such outcome may impact the Company's business, results of operations, or financial condition. National Western is cooperating with the relevant governmental authorities in regard to this matter.

## (B) Financial Instruments

In order to meet the financing needs of its customers in the normal course of business, the Company is a party to financial instruments with off-balance sheet risk. These financial instruments are commitments to extend credit which involve elements of credit and interest rate risk in excess of the amounts recognized in the Condensed Consolidated Balance Sheets.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual amounts, assuming that the amounts are fully advanced and that collateral or other security is of no value. Commitments to extend credit are legally binding agreements to lend to a customer that generally have fixed expiration dates or other termination clauses and may require payment of a fee. Commitments do not necessarily represent future liquidity requirements, as some could expire without being drawn upon. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The Company controls the credit risk of these transactions through credit approvals, limits, and monitoring procedures.

The Company had \$20.0 million commitments to fund new loans and \$1.2 million commitments on existing loans to extend credit relating to loans at June 30, 2016. The Company evaluates each customer's creditworthiness on a case-by-case basis.

## (9) INVESTMENTS

## (A) Investment Gains and Losses

The table below presents realized investment gains and losses, excluding impairment losses, for the periods indicated.

Total temporarily impaired securities	\$43,098	(1,761)	139,152	(6,944)	182,250	(8,705)

Unrealized losses for securities held to maturity and securities available for sale decreased during the first six months of 2016 primarily due to the downward movement in market interest rates (which increases the market price of debt securities). The Company does not consider investments with unrealized losses to be other-than-temporarily impaired

since it does not anticipate selling these securities prior to maturity and expects to receive all amounts due relative to principal and interest.

Total temporarily impaired securities	\$ 886,421	(33,399 )	156,796	(22,077 )	1,043,217	(55,476 )

The Company does not consider securities to be other-than-temporarily impaired when the market decline is attributable to factors such as interest rate movements, market volatility, liquidity, spread widening and credit quality and when recovery of all amounts due under the contractual terms of the security is anticipated. Based on the review and the Company's ability and intent not to sell these securities until maturity, the Company does not consider these

investments to be other-than-temporarily impaired at June 30, 2016. The Company will monitor the investment portfolio for future changes in issuer facts and circumstances that could result in future impairments beyond those currently identified.

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

During the three and six months ended 2016, the Company recorded no other-than-temporary impairment on debt and equity securities.

Debt securities. The gross unrealized losses for debt securities are made up of 67 individual issues, or 5.0% of the total debt securities held by the Company at June 30, 2016. The market value of these bonds as a percent of amortized cost averages 96.6%. Of the 67 securities, 52, or 77.6%, fall in the 12 months or greater aging category; and 56 were rated investment grade at June 30, 2016.

Equity securities. The gross unrealized losses for equity securities are made up of 27 individual issues at June 30, 2016. These holdings are reviewed quarterly for impairment.

The amortized cost and fair value of investments in debt securities at June 30, 2016, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Total	\$2,848,895	3,011,002	7,177,135	7,634,961

## (C) Transfer of Securities

During the three and six months ended June 30, 2016 and 2015, the Company made no transfers from the held to maturity category to securities available for sale.

## (D) Mortgage Loans and Real Estate

A financing receivable is a contractual right to receive money on demand or on fixed or determinable dates that is recognized as an asset in a company's statement of financial position. Mortgage, equity, participation and mezzanine loans on real estate are considered financing receivables reported by the Company.

Credit and default risk is minimized through strict underwriting guidelines and diversification of underlying property types and geographic locations. In addition to being secured by the property, mortgage loans with leases on the underlying property are often guaranteed by the lease payments and also by the borrower. This approach has proved to

result in quality mortgage loans with few defaults. Mortgage loan interest income is recognized on an accrual basis with any premium or discount amortized over the life of the loan. Prepayment and late fees are recorded on the date of collection.

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

Loans in foreclosure, loans considered impaired or loans past due 90 days or more are placed on a non-accrual status. If a mortgage loan is determined to be on non-accrual status, the mortgage loan does not accrue any revenue into the Condensed Consolidated Statements of Earnings. The loan is independently monitored and evaluated as to potential impairment or foreclosure. If delinquent payments are made and the loan is brought current, then the Company returns the loan to active status and accrues income accordingly. The Company had no mortgage loans past due 90 days or more at June 30, 2016 or 2015 and as a result all interest income was recognized at June 30, 2016 and 2015.

The following table represents the mortgage loan portfolio by loan-to-value ratio.

	June 30, 2016		December 31, 2015	
	Amount (In thousands)	%	Amount (In thousands)	%
Mortgage Loans by Loan-to-Value Ratio (1):				
Less than 50%	\$49,830	37.9	\$64,986	59.7
50% to 60%	7,553	5.8	9,714	8.9
60% to 70%	46,694	35.6	10,134	9.3
70% to 80%	3,366	2.5	4,843	4.4
80% to 90%	23,884	18.2	19,284	17.7
Greater than 90%	—	—	—	—
Gross balance	131,327	100.0	108,961	100.0
Allowance for possible losses	(650 )	(0.5 )	(650 )	(0.6 )
Totals	\$130,677	99.5	\$108,311	99.4

(1) Loan-to-Value Ratio is determined using the most recent appraised value. Appraisals are required at the time of funding and may be updated if a material change occurs from the original loan agreement.

All mortgage loans are analyzed quarterly in order to monitor the financial quality of these assets. Based on ongoing monitoring, mortgage loans with a likelihood of becoming delinquent are identified and placed on an internal “watch list”. Among the criteria that may indicate a potential problem include: major tenant vacancies or bankruptcies, late payments, and loan relief/restructuring requests. The mortgage loan portfolio is analyzed for the need for a valuation allowance on any loan that is on the internal watch list, in the process of foreclosure or that currently has a valuation allowance.

Mortgage loans are considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. When it is determined that a loan is impaired, a loss is recognized for the difference between the carrying amount of the mortgage loan and the estimated value reduced by the cost to sell. Estimated value is typically based on the loan's observable market price or the fair value of the collateral less cost to sell. Impairments and changes in the valuation allowance are reported in net realized investment gains (losses) in the Condensed Consolidated Statements of Earnings.

The Company's direct investments in real estate are not a significant portion of its total investment portfolio totaling approximately \$32.1 million and \$16.3 million at June 30, 2016 and December 31, 2015, respectively. During the first six months of 2016 the Company purchased two properties, one located in Cypress, Texas and the other in Tupelo, Mississippi for a total of \$16.8 million. The Company recognized operating income on real estate properties of approximately \$1.3 million for the first six months of 2016. In addition, the Company recorded a net realized investment gain on disposed properties located in Brazoria County (Texas), Ruidoso, New Mexico, and Austin, Texas, totaling \$2.9 million during the first six months of 2016.

#### (10) FAIR VALUES OF FINANCIAL INSTRUMENTS

For financial instruments the FASB provides guidance which defines fair value, establishes a framework for measuring fair value under GAAP, and requires additional disclosures about fair value measurements. In compliance with this GAAP guidance, the Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into the required three level hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value on the Condensed Consolidated Balance Sheets are categorized as follows:

**Level 1:** Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. These generally provide the most reliable evidence and are used to measure fair value whenever available. The Company's Level 1 assets are equity securities that are traded in an active exchange market. Valuations are obtained from readily available pricing sources for market transactions involving identical assets.

**Level 2:** Fair value is based upon significant inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable for substantially the full term of the asset or liability through corroboration with observable market data as of the reporting date. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, model-derived valuations whose inputs are observable or whose significant value drivers

are observable and other observable inputs. The Company's Level 2 assets include fixed maturity debt securities (corporate and private bonds, government or agency securities, asset-backed and mortgage-backed securities), and preferred stock. Valuations are generally obtained from third party pricing services for identical or comparable assets or determined through use of valuation methodologies using observable market inputs.

Level 3: Fair value is based on significant unobservable inputs which reflect the entity's or third party pricing service's assumptions about the assumptions market participants would use in pricing an asset or liability. The Company's Level 3 assets are over-the-counter derivative contracts and the Company's Level 3 liabilities consist of share-based compensation obligations and certain product-related embedded derivatives. Valuations are estimated based on non-binding broker prices or internally developed valuation models or methodologies, discounted cash flow models and other similar techniques.

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

The following tables set forth the Company's assets and liabilities that are measured at fair value on a recurring basis as of the date indicated:

	June 30, 2016			
	Total	Level 1	Level 2	Level 3
	(In thousands)

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

The following tables show the quantitative information about the Company's level 3 assets and liabilities.

	June 30, 2016		
	Fair Value	Valuation Technique	Unobservable Input
	(In thousands)		
Derivatives, index options	\$63,319	Broker prices	Implied volatility Inputs from broker proprietary models
Total assets	\$63,319		
Policyholder account balances	\$76,237	Deterministic cash flow model	Projected option cost
Other liabilities	4,819	Black-Scholes model	Expected term Forfeiture assumptions
Total liabilities	\$81,056		
	December 31, 2015		
	Fair Value	Valuation Technique	Unobservable Input
	(In thousands)		
Derivatives, index options	\$38,409	Broker prices	Implied volatility Inputs from broker proprietary models
Total assets	\$38,409		
Policyholder account balances	\$58,359	Deterministic cash flow model	Projected option cost
Other liabilities	7,669	Black-Scholes model	Expected term Forfeiture assumptions
Total liabilities	\$66,028		

Realized gains (losses) on debt and equity securities are reported in the Condensed Consolidated Statements of Earnings as net investment gains (losses). Unrealized gains (losses) on available for sale debt and equity securities are reported as other comprehensive income (loss) within the stockholders' equity section of the Condensed Consolidated Balance Sheet.

The fair value hierarchy classifications are reviewed each reporting period. Reclassification of certain financial assets and liabilities may result based on changes in the observability of valuation attributes. Reclassifications are reported as transfers into and out of Level 3 at the beginning fair value for the reporting period in which the changes occur.

Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

**(11) DERIVATIVE INVESTMENTS**

Fixed-index products provide traditional fixed annuities and universal life contracts with the option to have credited interest rates linked in part to an underlying equity index or a combination of equity indices. The equity return component of such policy contracts is identified separately and accounted for in future policy benefits as embedded derivatives on the Condensed Consolidated Balance Sheets. The remaining portions of these policy contracts are considered the host contracts and are recorded separately as fixed annuity or universal life contracts. The host contracts are accounted for under debt instrument type accounting in which future policy benefits are recorded as discounted debt instruments and accreted, using the effective yield method, to their minimum account values at their projected maturities or termination dates.

The Company purchases over-the-counter index options, which are derivative financial instruments, to hedge the equity return component of its fixed-index annuity and life products. The index options act as hedges to match closely the returns on the underlying index or indices. The amounts which may be credited to policyholders are linked, in part, to the returns of the underlying index or indices. As a result, changes to policyholders' liabilities are substantially

offset by changes in the value of the options. Cash is exchanged upon purchase of the index options and no principal or interest payments are made by either party during the option periods. Upon maturity or expiration of the options, cash may be paid to the Company depending on the performance of the underlying index or indices and terms of the contract.

Table of Contents

NATIONAL WESTERN LIFE GROUP, INC.  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (UNAUDITED)

The Company does not elect hedge accounting relative to these derivative instruments. The index options are reported at fair value in the accompanying condensed consolidated financial statements. The changes in the values of the index options and the changes in the policyholder liabilities are both reflected in the Condensed Consolidated Statements of Earnings. Any changes relative to the embedded derivatives associated with policy contracts are reflected in contract interest in the Condensed Consolidated Statements of Earnings. Any gains or losses from the sale or expiration of the options, as well as period-to-period changes in values, are reflected as net investment income in the Condensed Consolidated Statements of Earnings.

Although there is credit risk in the event of nonperformance by counterparties to the index options, the Company does not expect any of its counterparties to fail to meet their obligations given their high credit ratings. In addition, credit support agreements are in place with all counterparties which further reduces the Company's credit exposure.

The tables below present the fair value of derivative instruments as of June 30, 2016 and December 31, 2015, respectively.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS  
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a “safe harbor” for forward-looking statements. Certain information contained herein or in other written or oral statements made by or on behalf of National Western Life Group, Inc. or its subsidiaries (the "Company") are or may be viewed as forward-looking. Although the Company has taken appropriate care in developing any such information, forward-looking information involves risks and uncertainties that could significantly impact actual results. These risks and uncertainties include, but are not limited to, matters described in the Company's SEC filings such as exposure to market risks, anticipated cash flows or operating performance, future capital needs, and statutory or regulatory related issues. However, as a matter of policy, the Company does not make any specific projections as to future earnings, nor does it endorse any projections regarding future performance that may be made by others. Whether or not actual results differ materially from forward-looking statements may depend on numerous foreseeable and unforeseeable events or developments. Also, the Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future developments, or otherwise.

Management's discussion and analysis of the financial condition and results of operations (“MD&A”) of National Western Life Group, Inc. (formerly National Western Life Insurance Company and subsidiaries) for the three and six months ended June 30, 2016 follows. Where appropriate, discussion specific to the insurance operations of National Western Life Insurance Company is denoted by "National Western" or "company". This discussion should be read in conjunction with the Company's condensed consolidated financial statements and related notes beginning on page 3 of this report and with the 2015 Annual Report filed on Form 10-K with the SEC.

Overview

National Western provides life insurance products on a global basis for the savings and protection needs of policyholders and annuity contracts for the asset accumulation and retirement needs of contract holders, both domestically and internationally. The company accepts funds from policyholders or contract-holders and establishes a liability representing future obligations to pay the policy or contract-holders and their beneficiaries. To ensure the company will be able to pay these future commitments, the funds received as premium payments and deposits are invested in high quality investments, primarily fixed income securities.

Due to the business of accepting funds to pay future obligations in later years and the underlying economics, the relevant factors affecting the company's business and profitability include the following:

- the level of sales and premium revenues collected
- persistency of policies and contracts
- returns on investments sufficient to produce acceptable spread margins over interest crediting rates
- investment credit quality which minimizes the risk of default or impairment
- levels of policy benefits and costs to acquire business
- the level of operating expenses
- effect of interest rate changes on revenues and investments including asset and liability matching
- maintaining adequate levels of capital and surplus
- actual levels of surrenders, withdrawals, claims and interest spreads
- changes in assumptions for amortization of deferred policy acquisition expenses and deferred sales inducements
- changes in the fair value of derivative index options and embedded derivatives pertaining to fixed-index life and annuity products
- pricing and availability of adequate reinsurance

litigation subject to unfavorable judicial development, including the time and expense of litigation

The Company monitors these factors continually as key business indicators. The discussion that follows in this Item 2 includes these indicators and presents information useful to an overall understanding of the Company's business performance for the six months ended June 30, 2016, incorporating required disclosures in accordance with the rules and regulations of the Securities and Exchange Commission.

Table of Contents

Insurance Operations - Domestic

National Western is currently licensed to do business in all states and the District of Columbia except for New York. Products marketed are annuities, universal life insurance, fixed-index universal life, and traditional life insurance, which include both term and whole life products. The company's domestic sales have historically been more heavily weighted toward annuity products, which include single and flexible premium deferred annuities, single premium immediate annuities, and fixed-index annuities. Most of these annuities can be sold either as tax qualified or nonqualified products. At June 30, 2016, the Company maintained approximately 136,820 annuity contracts in force and 53,300 domestic life insurance policies in force representing \$3.0 billion in face amount of coverage.

National Western markets and distributes its domestic products primarily through independent national marketing organizations ("NMOs"). These NMOs assist the company in recruiting, contracting, and managing independent agents. The company's agents are independent contractors who are compensated on a commission basis. The company currently has approximately 23,000 domestic independent agents contracted.

Insurance Operations - International

The company's international clientèle consists mainly of foreign nationals in upper socioeconomic classes. Insurance products are issued currently to residents of countries in South America, the Caribbean, Eastern Europe, and Asia based upon applications received in the Company's home office in Austin, Texas. Issuing policies to residents of countries in these different regions provides diversification that helps to minimize large fluctuations that could arise due to various economic, political, and competitive pressures that may occur from one country to another. Products issued to international residents are almost entirely universal life and traditional life insurance products. However, certain annuity and investment contracts are also available. At June 30, 2016, the company had approximately 66,400 international life insurance policies in force representing approximately \$18.4 billion in face amount of coverage.

International applications are submitted by independent contractor consultants and broker-agents. The company has approximately 2,400 independent international consultants and brokers currently contracted.

There are some inherent risks of accepting international applications, which are not present within the domestic market, that are reduced substantially by the company in several ways. As previously described, National Western accepts applications from foreign nationals in upper socioeconomic classes who have substantial financial resources. This targeted customer base coupled with the company's conservative underwriting practices have historically resulted in claims experience, due to natural causes, similar to that in the United States. The company minimizes exposure to foreign currency risks by requiring payment of premiums, claims and other benefits entirely in United States dollars (except for a small block of business in Haiti whose policies are denominated in Haitian gourdes). National Western's fifty plus years of experience with the international products and its longstanding independent consultant and broker-agent relationships further serve to minimize risks.

Table of Contents

## SALES

## Life Insurance

The following table sets forth information regarding National Western's life insurance sales activity as measured by annualized first year premiums. While the figures shown below are in accordance with industry practice and represent the amount of new business sold during the periods indicated, they are considered a non-GAAP financial measure. The Company believes sales are a measure of distribution productivity and are a leading indicator of future revenue trends. However, revenues are driven by sales in prior periods as well as in the current period and therefore, a reconciliation of sales to revenues is not meaningful or determinable.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2016	
	2015		2015	
	(In thousands)			
International:				
Universal life	\$718	742	1,195	1,427
Traditional life	572	656	980	1,493
Equity-index life	2,468	4,077	4,601	7,241
	3,758	5,475	6,776	10,161
Domestic:				
Universal life	7	16	10	34
Traditional life	30	(8)	57	91
Equity-index life	4,059	4,903	7,978	8,894
	4,096	4,911	8,045	9,019
Totals	\$7,854	10,386	14,821	19,180

Life insurance sales, as measured by annualized first year premiums, decreased 24% in the second quarter of 2016 as compared to the second quarter of 2015. By market segment, the domestic life insurance line of business declined 17% while the international life insurance line of business posted a 31% decrease over the comparable results during the second quarter of 2015. For the six months ended June 30, 2016 total life sales decreased 23% from 2015 levels as domestic life insurance sales declined 11% during this period and international life insurance sales decreased 33%.

The company's domestic operations life insurance product portfolio includes single premium universal life ("SPUL") and equity-index universal life ("EIUL") products as well as hybrids of the EIUL and SPUL products, combining features of these core products. Equity-index universal life products continue to be the predominant product sold in the domestic life market. Most of these sales are single premium mode products (one year, five year, or ten year) designed for transferring accumulated wealth tax efficiently into life insurance policies with limited underwriting due to lesser net insurance amounts at risk (face amount of the insurance policy less cash premium contributed). These products were designed and implemented several years ago targeting the accumulated savings of the Baby Boomer segment of the population entering their retirement years. The wealth transfer life products have been valuable offerings for the Company's distributors as evidenced by comprising 99% of total domestic life sales in the first six months of 2016. The company also began offering in its domestic line of business graded death benefit whole life and term insurance (traditional) products in 2015.

The company's international life business consists of applications accepted from residents of various regions outside of the United States, the volume of which typically varies based upon changes in the socioeconomic climates of these regions. Historically, the company has experienced a simultaneous combination of rising and declining sales in various countries; however, the appeal of the company's dollar-denominated life insurance products overcomes many of the local and national difficulties.

Table of Contents

Applications submitted from residents of Latin America have historically comprised the majority of the company's international life insurance sales. As noted previously, the company's international sales by geographic market tend to fluctuate with the socio and economic climates in these regions. The company's mix of international sales by geographic region is as follows.

	Six Months	
	Ended June 30,	
	2016	2015
Percentage of International Sales:		
Latin America	96.0 %	86.7 %
Pacific Rim	—	10.2
Eastern Europe/Asia	4.0	3.1
Totals	100.0%	100.0%

Year-to-date, the company has accepted new business from residents outside of the United States in over thirty different countries with Venezuela (30%), Peru (16%), Chile (12%), and Argentina (10%) comprising the regions with contributions of 10% or more of total international sales.

As previously disclosed in prior SEC filings, the Brazilian Superintendence of Private Insurance ("SUSEP") attempted to serve National Western in 2011 with a subpoena regarding an administrative proceeding initiated by SUSEP in which it alleged the company was operating as an insurance company in Brazil without due authorization. While the company believes that SUSEP has no jurisdiction over the company, the company has been in discussions with SUSEP in an effort to resolve this matter. In light of the pendency of discussions with Brazilian authorities, the company ceased accepting new applications from residents in Brazil in the fourth quarter of 2015. Additionally, after careful consideration of various factors, including segment performance and the volume of application submissions, the company ceased accepting applications from residents in certain other countries, primarily in Central America and the Pacific Rim. Sales of new policies issued to residents in these countries, including Brazil, represented approximately 24% of total international life insurance new business placed during 2015. The actions taken with regard to ceasing the acceptance of applications in the areas mentioned above occurred in the fourth quarter of 2015. Consequently, the international life insurance declines in sales for the quarter and six months ended June 30, 2016 in comparison to like periods in 2015 reflect the discontinuance of business.

The average new policy face amounts since 2010 are as shown in the following table.

	Average New Policy	
	Face Amount	
	Domestic	International
Year ended December 31, 2010	\$164,800	338,600
Year ended December 31, 2011	178,500	363,600
Year ended December 31, 2012	254,900	380,200
Year ended December 31, 2013	286,000	384,000
Year ended December 31, 2014	286,600	382,600
Year ended December 31, 2015	274,500	342,500
Six months ended June 30, 2016	316,300	338,700

The company's efforts are directed toward maintaining its competitive advantages in accepting applications from upper socio-economic residents of international countries and to its wealth transfer strategies for domestic life sales. In both of these strategies the company's portfolio of fixed-index (equity indexed) life insurance products plays an important role. Fixed-index life products accounted for 85% of total life sales in the first six months of 2016, as compared to 84% for the same period in 2015.

Table of Contents

The table below sets forth information regarding National Western's life insurance in force for each date presented.

	Insurance In Force as of	
	June 30,	
	2016	2015
	(\$ in thousands)	
Universal life:		
Number of policies	45,780	49,330
Face amounts	\$5,198,880	6,388,970
Traditional life:		
Number of policies	34,860	36,490
Face amounts	\$3,546,250	3,623,850
Fixed-index life:		
Number of policies	39,040	39,220
Face amounts	\$9,571,240	9,824,820
Rider face amounts	\$3,132,250	3,066,080
Total life insurance:		
Number of policies	119,680	125,040
Face amounts	\$21,448,620	22,903,720

At June 30, 2016, the company's face amount of life insurance in force was comprised of \$18.4 billion from the international line of business and \$3.0 billion from the domestic line of business. At June 30, 2015, these amounts were \$19.8 billion and \$3.1 billion for the international and domestic lines of business, respectively.

Annuities

The following table sets forth information regarding the company's annuity sales activity as measured by single and annualized first year premiums. Similar to life insurance sales, these figures are considered a non-GAAP financial measure but are shown in accordance with industry practice and depict National Western's sales productivity.

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Fixed-index annuities	\$185,121	183,140	341,889	337,502
Other deferred annuities	11,493	17,035	22,404	29,913
Immediate annuities	1,262	1,060	2,391	2,017
Totals	\$197,876	201,235	366,684	369,432

Table of Contents

Annuity sales in the second quarter as well as the first six months of 2016 were comparatively level with those of 2015. The company's mix of annuity sales have historically shifted with interest rate levels and the relative performance of the equity market. Over the past several years, sales of fixed-index products have accounted for 60% to 90% of all annuity sales. During the first six months of 2016, this percentage reached 93% reflecting the ongoing bull market run in equities since bottoming out in 2009 and the persisting low level of fixed interest rates. For all fixed-index products, the company purchases over the counter call options to hedge the equity return feature. The options are purchased relative to the issuance of the annuity contracts in such a manner to minimize timing risk. Generally, the index return during the indexing period (if the underlying index increases) becomes a component in a formula (set forth in the annuity), the result of which is credited as interest to contract holders electing the index formula crediting method at the beginning of the indexing period. The formula result can never be less than zero with these products. The company does not deliberately mismatch or under hedge for the equity feature of the products. Fixed-index products also provide the contract holder the alternative to elect a fixed interest rate crediting option.

With the advent of a low interest rate policy engineered by the Federal Reserve in response to the last financial crisis, company management evaluated the potential ramifications of continuing a high level of annuity sales in a depressed interest rate environment. Under the auspices of the company's enterprise risk management (ERM) processes, taking into consideration the Federal Reserve's announced intention to maintain interest rates at historically reduced levels over a prolonged period of time, the decision was made to curtail new sales to desired levels in order to minimize the level of assets added at low yield rates. While National Western does not subsidize its interest crediting rates on new policies in order to obtain market share, the Company's ERM considerations determined that managing to a lower level of annuity sales was prudent given the environment.

The level of annuity business in force requires a focused discipline on asset/liability analysis. The company monitors its asset/liability matching within the self-constraints of desired capital levels and risk tolerance. Despite the amounts of new business generated over the past several years, the company's capital level remains substantially above industry averages and regulatory targets. Management has performed analyses of the capital strain associated with incrementally higher levels of annuity new business and determined that the company's capital position is more than sufficient to handle increased sales activity.

The following table sets forth information regarding annuities in force for each date presented.

	Annuities In Force as of June 30,	
	2016	2015
	(\$ in thousands)	
Fixed-index annuities

Total annuities

Number of policies	136,820	138,400
GAAP annuity reserves	\$7,984,322	7,914,808

## Table of Contents

### Impact of Recent Business Environment

The Company's business is generally aided by an economic environment undergoing expansion, whether moderate or vibrant, characterized by metrics which indicate improving employment data and increases in personal income. The unemployment rate dropped slightly during the second quarter from 5.0% to 4.9% and job creation averaged slightly over 150,000 jobs per month during this period. While respectable figures, they are not necessarily harbingers to above average growth in the immediate future. Investor sentiment, however, improved as net outflows from money market mutual funds were redirected into bond and stock market funds during the quarter.

Industry analysts and observers generally agree that a sudden jump in interest rate levels, while currently not thought to be a likely scenario, would be harmful to life insurers with interest-sensitive products as it could provide an impetus for abnormal levels of product surrenders and withdrawals at the same time fixed debt securities held by insurers declined in market value. At present, the concern has been redirected toward the possibility that low interest rates will not go away as fast as expected and pressure on insurers' investment income could remain, potentially for an extended period of time. The Federal Reserve deferred further rate increases in June on the heels of weaker-than-expected May job unemployment figures and the uncertainty stemming from Britain's unexpected decision to leave the European Union. While recent commentary from the Federal Reserve presents an upgraded assessment on the economy's recent performance, the significant decline in bullish positions in the U.S. dollar reveals a high degree of market skepticism that rate increases will be put in place by the Federal Reserve during the remainder of the calendar year. It is uncertain what direction and at what pace interest rate movements may occur in the future and what impact, if any, such movements would have on the Company's business, results of operations, cash flows or financial condition.

The Company's operating strategy continues to be to maintain capital levels substantially above regulatory and rating agency requirements in order to maintain its solid independent financial strength insurance ratings. Our business model is predicated upon steady growth in invested assets while managing the block of business within profitability objectives. A key premise of our financial management is maintaining a high quality investment portfolio, well matched in terms of duration with policyholder obligations, that continues to outperform the industry with respect to adverse impairment experience. This discipline enables the Company to sustain resources more than adequate to fund future growth and absorb abnormal periods of cash outflows.

### RESULTS OF OPERATIONS

The Company's condensed consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). In addition, the Company regularly evaluates operating performance using non-GAAP financial measures which exclude or segregate derivative and realized investment gains and losses from operating revenues. Similar measures are commonly used in the insurance industry in order to assess profitability and results from ongoing operations. The Company believes that the presentation of these non-GAAP financial measures enhances the understanding of the Company's results of operations by highlighting the results from ongoing operations and the underlying profitability factors of the Company's business. The Company excludes or segregates derivative and realized investment gains and losses because such items are often the result of events which may or may not be at the Company's discretion and the fluctuating effects of these items could distort trends in the underlying profitability of the Company's business. Therefore, in the following sections discussing condensed consolidated operations and segment operations, appropriate reconciliations have been included to report information management considers useful in enhancing an understanding of the Company's operations to reportable GAAP balances reflected in the condensed consolidated financial statements.

Table of Contents

## Consolidated Operations

Revenues. The following details Company revenues.

	Three Months		Six Months Ended	
	Ended June 30,		June 30,	
	2016	2015	2016	2015
	(In thousands)			
Universal life and annuity contract charges	\$41,448	38,345	83,458	75,658
Traditional life premiums	4,917	5,162	9,090	9,509
Net investment income (excluding derivatives)	111,157	111,041	219,558	219,251
Other revenues	4,696	5,194	9,574	10,523
Operating revenues	162,218	159,742	321,680	314,941
Derivative gain (loss)	2,094	(8,782 )	(10,807 )	(17,069 )
Net realized investment gains (losses)	2,782	4,258	5,163	5,236
Total revenues	\$167,094	155,218	316,036	303,108

Universal life and annuity contract charges - Revenues for universal life and annuity contracts were higher for the first six months in 2016 compared to 2015 primarily due to an increase in surrender charge revenue. Revenues for universal life and annuity products consist of policy charges for the cost of insurance, administration charges, and surrender charges assessed against policyholder account balances, less reinsurance premiums, as shown in the following table.

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Contract Revenues:				
Cost of insurance and administrative charges	\$33,136	33,239	66,289	66,243
Surrender charges	12,168	9,778	23,607	18,725
Other charges	(147 )	(1,080 )	1,318	(1,802 )
Gross contract revenues	45,157	41,937	91,214	83,166
Reinsurance premiums	(3,709 )	(3,592 )	(7,756 )	(7,508 )
Net contract revenues	\$41,448	38,345	83,458	75,658

Cost of insurance charges typically trend with the size of the life insurance block in force and the amount of new business issued during the period. Life insurance in force during the six months ended June 30, 2016 averaged approximately \$21.7 billion while for the same period of 2015 averaged \$23.0 billion. Countering the decline in insurance in force, the Company implemented higher cost of insurance charges on international life insurance products during the second quarter of 2016. Accordingly, for the three months ended June 30, 2016, cost of insurance charges increased to \$26.3 million from \$26.1 million in the comparable quarter of 2015. For the six months ended June 30, 2016, cost of insurance charges increased slightly to \$52.7 million from \$52.3 million at June 30, 2015. In addition to the increase in international cost of insurance charges, the increase reflects larger domestic face amounts of

insurance being added to the in force block of business replacing smaller face amounts terminated through death, surrender or lapsation. Administrative charges pertaining to new business issued declined marginally to \$13.6 million for the six months ended June 30, 2016 versus \$14.0 million for the six months ended June 30, 2015 due to the lower amount of life insurance policies issued.

Table of Contents

Surrender charges assessed against policyholder account balances upon withdrawal increased 26% in the first six months of 2016 versus the comparable prior year period. While the Company earns surrender charge income that is assessed upon policy terminations, the Company's overall profitability is enhanced when policies remain in force and additional contract revenues are realized and the Company continues to make an interest rate spread equivalent to the difference it earns on its investment and the amount that it credits to policyholders. In the first half of 2016, lapse rates on domestic life insurance and annuity policies were generally consistent with the prior year. The increase in surrender charge income recognized in the current period reflects an increase in the international life insurance lapse rate, most noticeably in the countries from which the Company ceased accepting applications from residents in the fourth quarter of 2015. Surrender charge income recognized is also dependent upon the duration of policies at the time of surrender (i.e. later duration policy surrenders having a lower surrender charge assessed and earlier duration surrenders having a higher surrender charge).

Traditional life premiums - Traditional life premiums were down slightly in the three and six months ended June 30, 2016 compared to the same periods in 2015. Most of the decline was incurred in renewal life insurance premiums reflecting the increase in international policy lapses noted above. Traditional life insurance premiums for products such as whole life and term life are recognized as revenues over the premium-paying period. The Company's life insurance sales focus has historically been primarily centered around universal life products, although additional term products have been added to the Company's portfolio recently. Universal life products, especially the Company's equity indexed universal life products which offer the opportunity for consumers to acquire life insurance protection and receive credited interest linked in part to an outside market index, have been more popular product offerings in the Company's markets representing in excess of 90% of new life insurance sales for the periods shown.

Net investment income - To ensure the Company will be able to honor future commitments to policyholders and provide a financial return, the funds received as premium payments and deposits are invested in high quality investments, primarily fixed maturity debt securities. The income from these investments is closely monitored by the Company due to its significant impact on the business. A detail of net investment income (with and without index option gains and losses) is provided below.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Gross investment income:				
Debt and equities	\$ 104,217	104,160	209,183	207,387
Mortgage loans	1,848	2,150	3,506	4,856
Policy loans	945	998	1,864	1,950
Short-term investments	198	46	255	155
Other invested assets	4,204	3,938	5,276	5,456
Total investment income	111,412	111,292	220,084	219,804
Less: investment expenses	255	251	526	553
Net investment income (excluding derivatives)	111,157	111,041	219,558	219,251
Derivative gain (loss)	2,094	(8,782 )	(10,807 )	(17,069 )
Net investment income	\$ 113,251	102,259	208,751	202,182

For the six months ended June 30, 2016, debt and equity securities generated approximately 95% of total investment income, excluding derivative gain (loss). The Company's strategy is to invest substantially all of its cash flows in fixed debt securities consistent with its guidelines for credit quality, duration, and diversification. The relatively stable level of investment income from debt and equity securities through the second quarter of 2016 versus 2015 despite higher portfolio balances in the current period reflects higher yielding debt securities maturing or being called by borrowers and being replaced with lower yielding securities in the current interest rate environment. Investment yields on new bond purchases during the first six months of 2016 remained below the portfolio's weighted average yield of 4.20%.

Table of Contents

Mortgage loan investment income for the six months ended June 30, 2016 decreased over the comparable period in 2015 reflecting a gradual decline in the portfolio balance from \$132.3 million at June 30, 2015 to \$108.3 million at December 31, 2015 and \$110.5 million at March 31, 2016. The Company's new mortgage loan activity has been relatively low in recent years given the low level of rates and the higher level of risk associated with commercial properties in the current economic environment. However, this has been identified as an area of investment focus going forward. During the six months ended June 30, 2016 the Company originated new mortgage loans in the amount of \$38.6 million compared to \$1.6 million in the comparable period of 2015 lifting the portfolio balance to \$130.7 million at June 30, 2016.

In order to evaluate underlying profitability and results from ongoing operations, net investment income performance is analyzed excluding derivative gain (loss), which is a common practice in the insurance industry. Net investment income and average invested assets shown below includes cash and cash equivalents. Net investment income performance is summarized as follows.

	Six Months Ended June 30,			
	2016	2015		
	(In thousands)			
Excluding derivatives:				
Net investment income	\$219,558	219,251		
Average invested assets, at amortized cost	\$10,383,587	10,044,392		
Annual yield on average invested assets	4.23	% 4.37	%	%
Including derivatives:				
Net investment income	\$208,751	202,182		
Average invested assets, at amortized cost	\$10,434,451	10,137,799		
Annual yield on average invested assets	4.00	% 3.99	%	%

The lower yield on average invested assets, excluding derivatives, through the second quarter of 2016 compared to 2015 is due to ongoing lower yields obtained on new fixed maturity debt securities investments. During 2015, the average yield on bond purchases to fund insurance operations was 3.51% representing a 1.36% spread over treasury rates. Insurance operation bond purchases through the second quarter of 2016 increased somewhat with an average yield of 3.55% primarily the result of spreads increasing to 1.76% over treasury rates. The yield rates during both 2015 and 2016 are below the weighted average bond portfolio rate which was 4.20% at June 30, 2016. The weighted average quality of new purchases during the first six months was "BBB+", which was slightly lower than the "A-" overall quality rating of purchases during 2015. The composite duration of purchases during the first six months of 2016 was approximately the same as that for 2015 purchases. The Company's general investment strategy is to purchase securities with maturity dates approximating ten years in the future. Accordingly, an appropriate measure for benchmarking the direction of interest rate levels for the Company's debt security purchases is the ten year treasury bond rate. After ending 2015 at a rate of 2.27%, the daily closing yield of the ten year treasury bond ranged from a low of approximately 1.35% to a high of 2.25% during the first six months of 2016, and ended the second calendar quarter at 1.47%.

The pattern in average invested asset yield, including derivatives, incorporates increases and decreases in the fair value of index options purchased by the Company to support its fixed-index products. Fair values of the purchased call options decreased during the periods shown corresponding to the movement in equity market indices. Refer to the derivatives discussion below for a more detailed explanation of these instruments.

Other revenues - Other revenues primarily pertain to the Company's two nursing home operations in Reno, Nevada and San Marcos, Texas. Revenues associated with these operations were \$9.2 million and \$10.4 million for the six months ended June 30, 2016 and 2015, respectively. Lower nursing home revenues reflect lower census figures at the facilities thus far in 2016 given local competition for residents and a change in mix of payor sources toward lower reimbursement patient types.

Derivative gain (loss) - Index options are derivative financial instruments used to hedge the equity return component of the Company's fixed-index products. Derivative gain or loss includes the amounts realized from the sale or expiration of the options. Since the index options do not meet the requirements for hedge accounting under GAAP, they are marked to fair value on each reporting date and the resulting unrealized gain or loss is also reflected as a component of net investment income.

Table of Contents

Gains and losses from index options are substantially due to changes in equity market conditions. Index options are intended to act as hedges to match the returns on the product's underlying reference index and the rise or decline in the index relative to the index level at the time of the option purchase which causes option values to likewise rise or decline. As income from index options fluctuates with the underlying index, the contract interest expense to policyholder accounts for the Company's fixed-index products also fluctuates in a similar manner and direction. For the quarter ended June 30, 2016, the reference indices increased and the Company recorded an overall gain from index options as shown below.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2015	2016	2015	2016
	(In thousands)			
Derivatives:				
Unrealized gain (loss)	\$23,567	(26,701)	27,300	(48,119)
Realized gain (loss)	(21,473)	17,919	(38,107)	31,050
Total gain (loss) included in net investment income	\$2,094	(8,782)	(10,807)	(17,069)
Total contract interest	\$62,799	49,431	111,816	98,470

The economic impact of option performance in the Company's financial statements is not generally determined solely by the option gain or loss included in net investment income as there is a corresponding amount recorded in the contract interest expense line. Rather, the Company's profitability with respect to these options is dependent upon the purchase cost of the option remaining within the financial budget for purchasing options embedded in the product pricing. Option prices vary with interest rates, volatility, and dividend yields among other things. As option prices vary, the Company manages for the variability by making offsetting adjustments to product caps, participation rates, and management fees. For the periods shown, the Company's option costs have been within the product pricing budgets.

Net realized investment gains (losses) - Realized gains on investments in 2016 primarily resulted from bond calls and sales. The net gains reported for the six months ended June 30, 2016 consisted of gross gains of \$5.3 million offset by gross losses of \$0.1 million. No other-than-temporary credit impairment losses were recorded during the six months ended June 30, 2016 and 2015.

The Company records impairment write-downs when a decline in value is considered to be other-than-temporary and full recovery of the investment is not expected. Impairments due to credit factors are recorded in the Company's Condensed Consolidated Statements of Earnings while non-credit (liquidity) impairment losses are included in Condensed Consolidated Statement of Comprehensive Income (Loss). Impairment and valuation write-downs reflected in the Company's Condensed Consolidated Statements of Earnings are summarized in the following table.

Three Months Ended June 30, 2016	Six Months Ended June 30, 2015
(In thousands)	

Impairment or valuation write-downs:

Bonds	\$—	—
Equities	—107	—107
Total	\$—107	—107

As shown in the table above, the Company recognized no impairments during the first six months of 2016. While the Company frequently impairs equity securities in reporting periods, the level of potential impairments in 2016 thus far did not approach the threshold of materiality. Equity securities (common stocks) represent 0.1% of invested assets and individual common stock holdings have an average cost basis of approximately \$40,000.

Table of Contents

Benefits and Expenses. The following table details benefits and expenses.

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Life and other policy benefits	\$15,540	16,120	31,141	35,386
Amortization of deferred policy acquisition costs	28,966	28,070	64,186	55,722
Universal life and annuity contract interest	62,799	49,431	111,816	98,470
Other operating expenses	19,403	18,802	42,710	39,312
Totals	\$126,708	112,423	249,853	228,890

Life and other policy benefits - Death claim benefits, the largest component of policy benefits, decreased to \$17.9 million in the first six months of 2016 compared to \$21.5 million for the first six months of 2015. Death claim amounts are generally subject to variation from period to period. For the three months ended June 30, 2016 and 2015, death claim benefits were \$9.9 million and \$8.5 million. The Company's overall mortality experience has generally been consistent with or better than its product pricing assumptions.

Amortization of deferred policy acquisition costs - Life insurance companies are required to defer certain expenses that vary with, and are primarily related to, the cost of acquiring new business. The majority of these acquisition expenses consist of commissions paid to agents, underwriting costs, and certain marketing expenses. Recognition of these deferred policy acquisition costs ("DPAC") as an expense in the condensed consolidated financial statements occurs over future periods in relation to the expected emergence of profits priced into the products sold. This emergence of profits is based upon assumptions regarding premium payment patterns, mortality, persistency, investment performance, and expense patterns. Companies are required to review universal life and annuity contract assumptions periodically to ascertain whether actual experience has deviated significantly from that assumed. If it is determined that a significant deviation has occurred, the emergence of profits pattern is to be "unlocked" and reset based upon the actual experience. DPAC balances are also adjusted each period to reflect current policy lapse or termination rates, expense levels and credited rates on policies compared to anticipated experience ("true-up") with the adjustment reflected in current period amortization expense. In accordance with GAAP guidance, the Company must also write-off deferred acquisition costs and unearned revenue liabilities upon internal replacement of certain contracts as well as annuitizations of deferred annuities.

The following table identifies the effects of unlocking and true-up adjustments on DPAC balances recorded through amortization expense for the three and six months ended June 30, 2016 and 2015.

	Three Months		Six Months	
	Ended June		Ended June	
Increase (Decrease) in DPAC Balance	30,	30,	30,	30,
	2016	2015	2016	2015
	(In thousands)			
Unlocking	\$3,620	—	3,620	1,810
True-up	(1,380)	4,100	(1,020)	5,520
Totals	\$2,240	4,100	2,600	7,330

True-up adjustments were recorded in 2016 and 2015 relative to partial surrender rates, mortality rates, credited interest rates and earned rates for the current year's experience. In the second quarter, true-up adjustments resulted in a \$1.4 million increase in amortization expense for 2016 and a \$4.1 million decrease for 2015. These adjustments further produced a \$1.0 million increase in amortization expense for the six months ended June 30, 2016, and a \$5.5 million decrease for the six months ended June 30, 2015. The true-up adjustments for the life insurance lines of business were positive (decrease to amortization expense) by \$9.9 million in the first six months of 2016 whereas the true-up adjustments for the annuity line of business during the same period were negative by \$11.0 million incrementally adding to amortization expense. For the six months ended June 30, 2015, true-up adjustments for the life insurance lines of business were positive (decrease to amortization expense) by \$9.7 million while true-up adjustments for the annuity line of business increased amortization expense by \$4.2 million. The annuity true-up adjustments in the 2016 period relative to 2015 were a larger negative amount due to increased spread compression on the block of business.

Table of Contents

In the quarter and six months ended June 30, 2016, the Company unlocked the DPAC balance associated with its International Life insurance segment for favorable mortality, increased cost of insurance charges that had been implemented, and higher lapse assumptions for policies associated with residents in "disengaged countries" (countries which the Company ceased accepting applications from residents during 2015). The effect of the prospective unlocking was to increase DPAC balances by \$7.3 million (and decrease amortization expense). Concurrently, the Company also unlocked the DPAC balance for its Annuity segment for surrender and annuitization rates on its indexed, single tier, and two tier annuities. The effect of this prospective unlocking was to decrease DPAC balances by \$3.7 million (and increase amortization expense).

In the six months ended June 30, 2015, the Company unlocked the DPAC balance associated with its International Life insurance segment for favorable mortality experience on one of its universal life products. The effect of the prospective unlocking was to increase DPAC balances by \$7.1 million (and decrease amortization expense). In addition, the Company unlocked the DPAC balance associated with its annuity segment for future assumptions pertaining to product development override costs (trailer commissions) which it is obligated to pay to certain contracted National Marketing Organizations. The effect of the prospective unlocking was to decrease DPAC balances by \$5.3 million (and increase amortization expense).

The Company is required to evaluate its emergence of profits continually and management believes that the current amortization patterns of deferred policy acquisition costs, incorporating these unlocking adjustments, are reflective of actual experience.

As the DPAC balance is an asset on the Company's Condensed Consolidated Balance Sheet, generally accepted accounting principles (GAAP) provide for an earned interest return on the unamortized balance each period. The earned interest serves to increase the DPAC balance and reduce amortization expense. The rate at which the DPAC balance earns interest is the average credited interest rate on the Company's universal life and annuity policies in force, including credited interest on equity-index policies. Since the Company's crediting rates have declined, both due to lower fixed interest rates as well as lower equity-index credits, the amount of earned interest on DPAC balances has declined resulting in higher amortization expense.

Universal life and annuity contract interest - The Company closely monitors its credited interest rates on interest sensitive policies, taking into consideration such factors as profitability goals, policyholder benefits, product marketability, and economic market conditions. As long term interest rates change, the Company's credited interest rates are often adjusted accordingly, taking into consideration the factors described above. The difference between yields earned on investments over policy credited rates is often referred to as the "interest spread".

The Company's approximated average credited rates through the first six months, excluding and including fixed-index (derivative) products, were as follows:

	June 30, 2016		June 30, 2015	
	(Excluding fixed-index products)	2.47%	(Including fixed-index products)	1.84%
Annuity	2.32%	2.47%	1.98%	1.84%
Interest sensitive life	3.63%	3.73%	2.86%	3.52%

Contract interest including fixed-index products also encompasses the performance of the index options associated with the Company's fixed-index products. As previously noted, the market performance of these derivative features resulted in net realized and unrealized gains/(losses) of \$2.1 million and \$(8.8) million for the quarters ended June 30, 2016 and 2015, respectively.

Similar to deferred policy acquisition costs, the Company defers sales inducements in the form of first year credited interest bonuses on annuity products that are directly related to the production of new business. These bonus interest charges are deferred and amortized using the same methodology and assumptions used to amortize other capitalized acquisition costs and the amortization is included in contract interest. In addition, deferred sales inducement balances are also reviewed periodically to ascertain whether actual experience has deviated significantly from that assumed (unlock) and are adjusted to reflect current policy lapse or termination rates, expense levels and credited rates on policies compared to anticipated experience (true-up). These adjustments, plus or minus, are included in contract interest expense. For the six months ended June 30, 2016 and 2015, the Company recorded true-up adjustments of its deferred sales inducement balances resulting in decreased balance sheet amounts of \$3.5 million and \$1.1 million, respectively, which thereby increased contract interest expense by a like amount. For the quarter ended June 30, 2016 and 2015, the true-up adjustments recorded decreased balance sheet amounts by \$1.6 million and \$0.6 million, respectively.

Table of Contents

The Company unlocked its deferred sales inducement balance during the quarter ended June 30, 2016 associated with its annuity segment for surrender and annuitization rate changes as noted in the discussion on deferred policy acquisition costs. The effect of the prospective unlocking was to decrease the deferred sales inducement balance by \$1.7 million. In addition, as part of this unlocking, benefit reserves for international universal life and deferred annuities (two tier) were increased by a net amount of \$6.0 million. This reserve change increased the contract interest charge for the period.

The Company also unlocked its deferred sales inducement balance in the first six months of 2015 associated with its annuity segment for future expense assumptions pertaining to product development override costs as previously discussed. The effect of the prospective unlocking was to decrease the deferred sales inducement balance by \$1.8 million which increased contract interest expense by the same amount.

Other operating expenses - Other operating expenses consist of general administrative expenses, licenses and fees, commissions not subject to deferral, nursing home expenses and compensation costs. These expenses for the three and six months ended June 30, 2016 and 2015 are summarized in the table that follows.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
General insurance expenses	\$6,784	4,718	17,785	11,911
Nursing home expenses	4,503	4,714	9,119	9,409
Compensation expenses	3,761	4,688	7,154	9,185
Commission expenses	2,819	2,958	5,437	5,704
Taxes, licenses and fees	1,536	1,724	3,215	3,103
Totals	\$19,403	18,802	42,710	39,312

General insurance expenses include provisions for litigation and other settlement payments made in lieu of litigation. As discussed in the Legal Proceedings section of the footnotes to the condensed consolidated financial statements, the Company charged \$2.9 million against earnings in the first quarter of 2016 related to litigation involving an annuity contract matter in Puerto Rico. General insurance expenses also include expenditures for software and amortization of previously capitalized information technology expenditures. In 2016, the Company began processing new policy applications for certain lines of business on a proprietary policy administration system that had been under development for a number of years. Amortization of the costs capitalized in development of this system therefore commenced in 2016 and approximated \$2.6 million for the first six months of 2016. This amortization will continue for the next seven years.

Nursing home expenses reflect the operations of the two facilities owned by the Company. Expenses during the first six months of 2016 were slightly below the previous period reflecting cost containment measures coinciding with lower census figures.

Compensation expenses include share-based compensation costs related to outstanding vested and nonvested stock options and SARs. As further discussed in Note 7 to the condensed consolidated financial statements, the Company awarded 14,643 new SARs to officers of National Western during the first quarter of 2016. No stock options or SARs were awarded in the first six months of 2015. The related share-based compensation costs move in tandem not only with the number of stock options and SARs outstanding but also with the movement in the market price of the

Company's Class A common stock as a result of marking the stock options and SARs to fair value under the liability method of accounting. Consequently, the related expense amount varies positive or negative in any given period. During the second quarter of 2016, the Company's closing stock price declined from \$230.63 at March 31, 2016 to \$195.27 at June 30, 2016. For the three months ended June 30, 2016 share-based compensation expense was \$(1.3) million while for the comparable period in 2015 share based-compensation expense was \$(0.8) million. For the six months ended June 30, 2016 share-based compensation expense was \$(2.8) million versus \$(1.6) million in the same period for 2015.

Taxes, licenses and fees include premium taxes and licensing fees paid to state insurance departments, guaranty fund assessments, the company portion of social security and Medicare taxes, and other state and municipal taxes. For the six months ended June 30, 2016, these amounts increased from the comparable period in 2015 largely due to higher premium tax remittances to state insurance departments which were \$1.5 million in the current year compared to \$1.4 million in the prior year.

Table of Contents

Federal Income Taxes. Federal income taxes on earnings from operations reflect an effective tax rate of 34.2% for the six months ended June 30, 2016 compared to 32.4% for the six months ended June 30, 2015. The Company's effective tax rate is typically lower than the Federal rate of 35% due to tax-exempt investment income related to municipal securities and dividends-received deductions on income from stocks.

## Segment Operations

## Summary of Segment Earnings

A summary of segment earnings for the three and six months ended June 30, 2016 and 2015 is provided below. The segment earnings exclude realized gains and losses on investments, net of taxes.

	Domestic Life Insurance (In thousands)	International Life Insurance	Annuities	All Others	Totals
Segment earnings (losses):					
Three months ended:					
June 30, 2016	\$(195 )	19,407	877	4,388	24,477
June 30, 2015	\$997	10,303	10,420	4,371	26,091
Six months ended:					
June 30, 2016	\$319	31,612	500	7,758	40,189
June 30, 2015	\$(1,232)	24,184	15,771	8,058	46,781

<b>Segment earnings (loss)</b>	<b>\$(195 )</b>	<b>997</b>	<b>319</b>	<b>(1,232 )</b>

Revenues from domestic life insurance operations include life insurance premiums on traditional type products and contract revenues from universal life insurance. Revenues from traditional products are simply premiums collected, while revenues from universal life insurance consist of policy charges for the cost of insurance, policy administration fees, and surrender charges assessed during the period. A comparative detail of premiums and contract revenues is provided below.

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Universal life insurance revenues	\$9,134	7,207	17,525	14,404
Traditional life insurance premiums	1,471	2,464	2,664	3,447
Reinsurance premiums	(1,957 )	(1,734)	(3,882 )	(3,427 )
<b>Totals</b>	<b>\$8,648</b>	<b>7,937</b>	<b>16,307</b>	<b>14,424</b>

Table of Contents

The Company's domestic life insurance in force in terms of policy count has been declining for several years. The pace of new policies issued has lagged the number of policies terminated from death or surrender by roughly a two-to-one rate over the past couple of years causing a declining level of insurance in force from which contract charge revenue is received. Consequently, the number of domestic life insurance policies in force has declined from 55,700 at December 31, 2014 to 54,300 at December 31, 2015, and to 53,300 at June 30, 2016. Universal life insurance revenues are also generated with the issuance of new business based upon amounts per application and percentages of the face amount (volume) of insurance issued. Revenues associated with issuing new business are typically greater than that realized in a renewal period for in force policies. The number of domestic life policies issued in the first six months of 2016 was 22% lower than in the comparable period for 2015 and the volume of insurance issued was 10% less than that in 2015. Universal life insurance revenues also include surrender charge income realized on terminating policies and, in the case of Domestic universal life, amortization into income of the premium load on single premium policies which the Company began deferring in 2013.

Premiums collected on universal life products are not reflected as revenues in the Company's Condensed Consolidated Statements of Earnings in accordance with GAAP. Actual domestic universal life premiums collected are detailed below.

Three Months Ended June 30,		Six Months Ended June 30,	
2016	2015	2016	2015

(In thousands)

Universal life insurance:

First year and single premiums	\$28,016	34,250	55,542	60,729
Renewal premiums	5,079	5,426	10,346	10,487
Totals	\$33,095	39,676	65,888	71,216

During the past couple of years the Company has achieved some success in growing its domestic life insurance business with the number of new policies issued trending higher. Sales have been substantially weighted toward single premium policies which do not have much in the way of recurring premium payments. These products are targeting wealth transfer strategies involving the movement of accumulated wealth in alternative investment vehicles, including annuities, into life insurance products. As a result, renewal premium levels have not been exhibiting a corresponding level of increase.

Net investment income for this segment of business, excluding derivative gain/(losses), has been gradually increasing due to the increased new business activity described above and a higher level of investments needed to support the corresponding growth in policy obligations, especially those for single premium policies. The increase in net investment income has been partially muted by lower investment yields from debt security investment purchases during this time frame. Net investment income also includes the gains and losses on index options purchased to back the index crediting mechanism on fixed-index universal products.

A detail of net investment income for domestic life insurance operations is provided below.

Three Months Ended June 30,		Six Months Ended June 30,	
2016	2015	2016	2015

Edgar Filing: National Western Life Group, Inc. - Form 10-Q

Net investment income	\$9,584	8,005	15,717	15,170

64

---

Table of Contents

Life and policy benefits for a smaller block of business are subject to variation from quarter to quarter. Claim activity during the first six months of 2016 was in line with historical trends and slightly lower compared to the first half of 2015. The number of incurred claims during the first six months of 2016 increased 2% compared to the first six months of 2015 while the average net claim amount decreased from \$23,000 to \$22,000, respectively. The low face amount per claim reflects the older block of domestic life insurance policies sold which were final expense type products (i.e. purchased to cover funeral costs) and fewer claims from more recent policy sales which have much higher face amounts of insurance coverage per policy. The Company's overall mortality experience for this segment is in line with pricing assumptions.

As noted previously in the discussion of Results of Operations, the Company records true-up adjustments to DPAC balances each period to reflect current policy lapse or termination rates, expense levels and credited rates on policies as compared to anticipated experience with the adjustment reflected in current period amortization expense. To the extent required, the Company may also record unlocking adjustments to DPAC balances. The following table identifies the effects of unlocking and true-up adjustments on domestic life insurance DPAC balances recorded through amortization expense for the three and six months ended June 30, 2016 and 2015.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Increase (Decrease) in DPAC Balance				
Unlocking	\$—	—	—	—
True-up	940	2,240	2,800	3,190
Totals	\$940	2,240	2,800	3,190

As noted in the table above, the true-up adjustments recorded increased the DPAC balance on the Condensed Consolidated Balance Sheets which conversely reduced amortization expense in current earnings by a like amount for the periods shown.

#### International Life Insurance Operations

The Company's international life operations have been a significant factor in the Company's overall earnings performance and represents a niche where the Company believes it has a competitive advantage. A stable population of distribution relationships has been developed providing the Company with a consistent foundation for development of the block of business over a number of years .

Table of Contents

A comparative analysis of results of operations for the Company's international life insurance segment is detailed below.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Premiums and other revenues:				
Premiums and contract revenues	\$31,437	29,364	64,225	59,697
Net investment income	10,593	8,785	17,440	17,399
Other revenues	4	(25 )	40	61
Total revenues	42,034	38,124	81,705	77,157
Benefits and expenses:				
Life and other policy benefits	4,583	5,587	9,751	11,792
Amortization of deferred policy acquisition costs	(681 )	5,163	4,424	4,513
Universal life insurance and annuity contract interest	2,673	6,927	8,356	14,057
Other operating expenses	5,650	5,212	11,176	11,134
Total benefits and expenses	12,225	22,889	33,707	41,496
Segment earnings (losses) before Federal income taxes	29,809	15,235	47,998	35,661
Provision (benefit) for Federal income taxes	10,402	4,932	16,386	11,477
Segment earnings (loss)	\$19,407	10,303	31,612	24,184

As with domestic life operations, revenues from the international life insurance segment include both premiums on traditional type products and contract revenues from universal life insurance. A comparative detail of premiums and contract revenues is provided below.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Universal life insurance revenues	\$31,740	29,532	61,672	58,724
Traditional life insurance premiums	1,447	1,699	6,426	5,062
Reinsurance premiums	(1,750 )	(1,867 )	(3,873 )	(4,089 )
Totals	\$31,437	29,364	64,225	59,697

In general, universal life revenues and operating earnings are anticipated to emerge with growth in the amount of international life insurance in force. The volume of insurance in force contracted from \$20.0 billion at December 31, 2014 to \$19.0 billion at December 31, 2015 and further decreased to \$18.4 billion at June 30, 2016. Universal life insurance revenues are also generated with the issuance of new business based upon amounts per application and percentages of the face amount (volume) of insurance issued. The number of international life policies issued in the

first six months of 2016 was 29% lower than in the first six months of 2015 while the volume of insurance issued was 32% less than that issued in 2015 during the same period as a result of ceasing the acceptance of applications from residents from certain countries in the fourth quarter of 2015.

Table of Contents

A third component of international universal life revenues include surrender charges assessed upon surrender of contracts by policyholders. At the height of the financial crisis in 2008 through 2010 the Company's international policyholders exhibited concern regarding the developments in U.S. financial markets. This evidenced itself in the Company's termination activity in its international life policies in force. The Company incurred higher termination experience than is typical which resulted in recognition of increased surrender charge fee income. This level of termination activity subsequently subsided in 2011 with the termination activity over the following years remaining relatively stable. In 2015, termination activity revisited the levels last seen during the 2008 through 2010 period resulting in additional surrender charge fee revenues. The following table illustrates the Company's recent international life termination experience.

	Amount in \$'s (millions)	Annualized Termination Rate	
Volume In Force Terminations			
Year ended December 31, 2011	\$ 1,465.1	7.3	%
Year ended December 31, 2012	1,828.4	8.7	%
Year ended December 31, 2013	1,838.5	8.6	%
Year ended December 31, 2014	1,825.5	8.4	%
Year ended December 31, 2015	2,659.1	12.3	%
Six months ended June 30, 2016	1,175.1	11.7	%

As noted previously, premiums collected on universal life products are not reflected as revenues in the Company's Condensed Consolidated Statements of Earnings in accordance with GAAP. Actual international universal life premiums collected are detailed below.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
(In thousands)				
Universal life insurance:				
First year and single premiums	\$4,935	6,782	9,101	12,456
Renewal premiums	23,309	26,961	46,510	51,996
Totals	\$28,244	33,743	55,611	64,452

The Company's most popular international products have been its fixed-index universal life products in which the policyholder can elect to have the interest rate credited to their policy account values linked in part to the performance of an outside equity index. Included in the totals in the above table are collected premiums for fixed-index universal life products of approximately \$35.1 million and \$41.8 million for the first six months of 2016 and 2015, respectively. The decline in renewal premiums during the first six months of 2016 compared to 2015 corresponds with the increased termination activity discussed above.

Table of Contents

As previously noted, net investment income and contract interest include period-to-period changes in fair values pertaining to call options purchased to hedge the interest crediting feature on the fixed-index universal life products. With the growth in the fixed-index universal life block of business, the period-to-period changes in fair values of the underlying options have had an increasingly greater impact on net investment income and universal life contract interest. A detail of net investment income for international life insurance operations is provided below.

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Net investment income (excluding derivatives)	\$9,542	9,651	18,517	19,404
Derivative gain (loss)	1,051	(866 )	(1,077 )	(2,005 )
Net investment income	\$10,593	8,785	17,440	17,399

For liability purposes, the embedded option in the Company's policyholder obligations for this feature is bifurcated and reserved for separately. Accordingly, the impact for the embedded derivative component in the equity-index universal life product is reflected in the contract interest expense for each respective period.

Life and policy benefits primarily consist of death claims on policies. The Company's clientèle for international products are generally wealthy individuals with access to U.S. dollars and quality medical care. Consequently, the amounts of coverage purchased tend to be larger amounts than those for domestic life insurance. In the year ended December 31, 2015, the average face amount of insurance purchased was \$343,000, and in the first six months of 2016, the average was \$339,000. While life and policy benefit expense for the international life segment reflects the larger policies purchased, mortality due to natural causes is comparable to that in the United States. The Company's maximum risk exposure per insured life is capped at \$500,000 through reinsurance. Similar to the domestic life line of business, the average international life net claim amount in the first six months of 2016 decreased from that in the first six months of 2015 to \$144,000 from \$186,000. The number of claims incurred during the first six months of 2016 increased 5% from the prior year level.

The Company records true-up adjustments to DPAC balances each period to reflect current policy lapse or termination rates, expense levels and credited rates on policies as compared to anticipated experience as well as unlocking adjustments as necessary. The following table identifies the effects of unlocking and true-up adjustments on international life insurance DPAC balances recorded through amortization expense for the three and six months ended June 30, 2016 and 2015.

	Three Months		Six Months	
	Ended June		Ended June	
	30,	30,	30,	30,
	2016	2015	2016	2015
	(In thousands)			
Increase (Decrease) in DPAC Balance				
Unlocking	\$7,270	—	7,270	7,120
True-up	2,830	3,940	7,140	6,540
Totals	\$10,100	3,940	14,410	13,660

As noted in the Consolidated Operations discussion, the Company unlocked the DPAC balance for this segment during the second quarter of 2016 for favorable mortality, higher cost of insurance charges which had been implemented, and increased lapse rates for disengaged countries. The effect of the prospective unlocking was to increase DPAC balances by \$7.3 million (and decrease amortization expense). Similarly, in the six months ended June 30, 2015, the Company unlocked the DPAC balance associated with its International Life segment for favorable mortality experience on one of its universal life products. The effect of the prospective unlocking was to increase DPAC balances by \$7.1 million (and decrease amortization expense).

True-up adjustments in the first six months of 2016 and 2015 were favorable and increased the DPAC balance on the Condensed Consolidated Balance Sheet and decreased amortization expense in current earnings by a like amount.

Table of Contents

As indicated in the discussion concerning net investment income, contract interest expense includes fluctuations that are the result of the effect upon the embedded derivative for the performance of underlying equity indices associated with fixed-index universal life products. The amounts realized on purchased call options approximate the amounts the Company credits to policyholders. In addition, as part of the unlocking mentioned above, the Company's benefit reserves for the International Life segment were decreased by \$6.2 million. The effect of this decrease was to correspondingly decrease contract interest during the period by a like amount.

## Annuity Operations

The Company's annuity operations are almost exclusively in the United States. Although some of the Company's investment contracts are available to international residents, current sales of these are small relative to total annuity sales. A comparative analysis of results of operations for the Company's annuity segment is detailed below.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Premiums and other revenues:				
Premiums and contract revenues	\$6,280	6,206	12,016	11,046
Net investment income	86,556	79,509	164,195	158,745
Other revenues	(54 )	4	6	19
Total revenues	92,782	85,719	176,217	169,810
Benefits and expenses:				
Life and other policy benefits	6,287	6,651	13,099	14,599
Amortization of deferred policy acquisition costs	26,338	21,209	54,442	46,330
Annuity contract interest	52,909	37,044	92,400	74,014
Other operating expenses	5,927	5,434	15,517	11,612
Total benefits and expenses	91,461	70,338	175,458	146,555
Segment earnings (loss) before Federal income taxes	1,321	15,381	759	23,255
Provision (benefit) for Federal income taxes	444	4,961	259	7,484
Segment earnings (loss)	\$877	10,420	500	15,771

Premiums and contract charges primarily consist of surrender charge income recognized on terminated policies. The amount of the surrender charge income recognized is determined by the volume of surrendered contracts as well as the duration of each contract at the time of surrender given the pattern of declining surrender charge rates over time that is common to most annuity contracts. The Company's lapse rate for annuity contracts in the first six months of 2016 was 6.7% compared to 6.6% during the same period in 2015.

Table of Contents

Deposits collected on annuity contracts are not reflected as revenues in the Company's Condensed Consolidated Statements of Earnings, in accordance with GAAP. Actual annuity deposits collected for the three and six months ended June 30, 2016 and 2015 are detailed below.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Fixed-index annuities	\$191,939	194,630	345,969	354,937
Other deferred annuities	12,684	12,709	24,212	22,838
Immediate annuities	2,185	2,135	3,710	4,925
Totals	\$206,808	209,474	373,891	382,700

Fixed-index products are more attractive for consumers when interest rate levels remain low and equity markets produce positive returns. Since the Company does not offer variable products or mutual funds, fixed-index products provide an important alternative to the Company's existing fixed interest rate annuity products. Fixed-index annuity deposits as a percentage of total annuity deposits were 93% for each of the six months ended June 30, 2016 and 2015, respectively. The percentage of fixed-index products of total annuity sales reflects the low interest rate environment and the ongoing bull market in equities.

As a selling inducement, some of the deferred products, including fixed-index annuity products, contain a first year interest bonus ranging from 1% to 7% depending upon the product, in addition to the base first year interest rate. Other products include a premium bonus ranging from 2% to 10% which is credited to the account balance when premiums are applied. These bonus rates are deferred in conjunction with other capitalized policy acquisition costs. The amounts deferred to be amortized over future periods amounted to approximately \$9.3 million and \$8.1 million during the first six months of 2016 and 2015, respectively. Amortization of deferred sales inducements is included as a component of annuity contract interest as described later in this discussion of Annuity Operations.

A detail of net investment income for annuity operations is provided below.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Net investment income (excluding derivatives)	\$86,607	87,313	172,878	173,712
Derivative gain (loss)	(51 )	(7,804 )	(8,683 )	(14,967 )
Net investment income	\$86,556	79,509	164,195	158,745

As previously described, derivatives are call options purchased to hedge the equity return component of the Company's fixed-index annuity products with any gains or losses from the sale or expiration of the options, as well as period-to-period changes in fair values, reflected in net investment income. Since the embedded derivative option in the policies is bifurcated when determining the contract reserve liability, the impact of the market value change of index options on asset values generally aligns closely with the movement of the embedded derivative liability such that the net effect upon pretax earnings is negligible (i.e. net realized and unrealized gains/(losses) included in net investment income approximate the change in contract interest associated with the corresponding embedded derivative

liability change). See further discussion below regarding contract interest activity.

70

---

Table of Contents

Consistent with the domestic and international life segments, the Company records true-up adjustments to DPAC balances each period to reflect current policy lapse or termination rates, expense levels and credited rates on policies as compared to anticipated experience as well as unlocking adjustments as necessary. The following table identifies the effects of unlocking and true-up adjustments on annuity DPAC balances recorded through amortization expense for the three and six months ended June 30, 2016 and 2015.

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Increase (Decrease) in DPAC Balance				
Unlocking	\$(3,650)	—	(3,650)	(5,310)
True-up	(5,150)	(2,080)	(10,960)	(4,210)
Totals	\$(8,800)	(2,080)	(14,610)	(9,520)

The Company unlocked the DPAC balance associated with its annuity segment in the second quarter of 2016 for surrender and annuitization rates. The effect of the prospective unlocking was to decrease DPAC balances by \$3.7 million (and increase amortization expense). The Company also unlocked in the first quarter of 2015 for future expense assumptions pertaining to product development override costs (trailer commissions) which it is obligated to pay to certain contracted National Marketing Organizations. The effect of the prospective unlocking was to decrease DPAC balances by \$5.3 million (and increase amortization expense).

As the true-up adjustments decreased the DPAC balances on the Condensed Consolidated Balance Sheet for the six months ended June 30, 2016 and 2015, a corresponding increase in DPAC amortization expense was recorded in the Company's Condensed Consolidated Statements of Earnings in each respective period. The increase in the negative true-up adjustment for the Annuity line of business is due to the impact of spread compression on the Company's interest rate margin. The effect of spread compression is to reduce the estimated gross profits for the product line and result in higher amortization of DPAC balances than expected.

Annuity contract interest includes the equity component return associated with the call options purchased to hedge the Company's fixed-index annuities. The detail of fixed-index annuity contract interest as compared to contract interest for all other annuities is as follows:

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
	(In thousands)			
Fixed-index annuities	\$25,513	11,621	41,594	21,658
All other annuities	24,432	23,218	45,450	45,481
Gross contract interest	49,945	34,839	87,044	67,139
Bonus interest deferred and capitalized	(5,139)	(4,311)	(9,344)	(8,147)
Bonus interest amortization	8,104	6,516	14,701	15,022
Total contract interest	\$52,910	37,044	92,401	74,014

The fluctuation in reported contract interest amounts for fixed-index annuities is driven by sales levels, the level of the business in force and the effect of positive or negative market returns of option values on projected interest credits. As noted above in the net investment income discussion the amounts shown for contract interest for fixed-index annuities generally align with the derivative gains/(losses) included in net investment income.

## Table of Contents

Annuity contract interest includes true-up adjustments for the deferred sales inducement balance. True-up adjustments for the deferred sales inducement balance are made each period similar to that done with respect to DPAC balances. For the six months ended June 30, 2016 and 2015, deferred sales inducement balances on the Condensed Consolidated Balance Sheet were reduced by \$3.5 million and \$1.1 million, respectively, for true-up adjustments. These adjustments are included in the above table as an addition to bonus interest amortization. The Company also unlocked its deferred sales inducement balance in the second quarter of 2016 for surrender and annuitization rates. The effect of the prospective unlocking was to decrease the deferred sales inducement balance by \$1.7 million which increased contract interest expense by a like amount. This same unlocking, in addition to impacting the DPAC and deferred sales inducement balances, also increased the Company's benefit reserves by \$12.2 million for the two-tier deferred annuity block of business. This reserve increase added \$12.2 million to contract interest expense in the quarter and six months ended June 30, 2016.

The Company also unlocked deferred sales inducement balances in the first quarter of 2015 associated with the annuity segment for future expense assumptions pertaining to product development override costs as previously discussed. The effect of the prospective unlocking was to decrease the deferred sales inducement balance by \$1.8 million which increased contract interest expense by the same amount.

The majority of litigation and legal matters the Company is involved with emanate from annuity products. The \$2.9 million litigation provision discussed in the Consolidated Operations section of this report was allocated to the Annuity Operations segment and is included in other operating expenses in 2016.

## Other Operations

The Company's primary business encompasses its domestic and international life insurance operations and its annuity operations of National Western. However, NWLGI and National Western also have small real estate, nursing home, and other investment operations through their wholly owned subsidiaries. Nursing home operations generated \$0.1 million and \$1.0 million of operating earnings in the first six months of 2016 and 2015, respectively. The remaining pre-tax earnings of \$11.7 million and \$10.9 million in Other Operations during the six month periods represent investment income from real estate, municipal bonds, and common and preferred equities held in subsidiary company portfolios principally for tax advantage purposes. Included in these amounts are semi-annual distributions from a life interest in the Libby Shearn Moody Trust which is an asset held in NWLSM, Inc. Pretax distributions from this trust were \$2.9 million and \$3.5 million in the six months periods ended June 30, 2016 and 2015, respectively.

## INVESTMENTS

### General

The Company's investment philosophy emphasizes the careful handling of policyowners' and stockholders' funds to achieve security of principal, to obtain the maximum possible yield while maintaining security of principal, and to maintain liquidity in a measure consistent with current and long-term requirements of the Company.

Table of Contents

The Company's overall conservative investment philosophy is reflected in the allocation of its investments, which is detailed below. The Company emphasizes investment grade debt securities.

	June 30, 2016		December 31, 2015	
	Carrying Value (In thousands)	%	Carrying Value (In thousands)	%
Debt securities	\$10,188,137	96.3	\$10,035,189	97.4
Mortgage loans	130,677	1.2	108,311	1.1
Policy loans	60,587	0.6	61,957	0.6
Derivatives, index options	63,319	0.6	38,409	0.4
Real estate	32,105	0.3	16,333	0.2
Equity securities	19,657	0.2	18,361	0.2
Other	85,206	0.8	10,454	0.1
Totals	\$10,579,688	100.0	\$10,289,014	100.0

## Debt and Equity Securities

The Company maintains a diversified portfolio which consists mostly of corporate, mortgage-backed, and public utility fixed income securities. Investments in mortgage-backed securities primarily include U.S. Government agency pass-through securities and collateralized mortgage obligations ("CMO"). The Company's investment guidelines prescribe limitations by type of security as a percent of the total investment portfolio and all holdings were within these threshold limits. As of June 30, 2016 and December 31, 2015, the Company's debt securities portfolio consisted of the following classes of securities:

	June 30, 2016		December 31, 2015	
	Carrying Value (In thousands)	%	Carrying Value (In thousands)	%
Corporate	\$7,024,958	69.0	\$6,814,793	68.0
Residential mortgage-backed securities	1,477,288	14.5	1,542,587	15.4
Public utilities	1,193,435	11.7	1,178,622	11.7
State and political subdivisions	444,540	4.4	436,493	4.3
U.S. agencies	10,005	0.1	15,019	0.1
Asset-backed securities	25,306	0.2	35,393	0.4
Foreign governments	10,675	0.1	10,355	0.1
U.S. Treasury	1,930	—	1,927	—
Totals	\$10,188,137	100.0	\$10,035,189	100.0

Table of Contents

Substantially all of the Company's investable cash flows are directed toward the purchase of long-term debt securities. The Company's investment policy calls for investing in debt securities that are investment grade, meet quality and yield objectives, and provide adequate liquidity for obligations to policyholders. Debt securities with intermediate maturities are targeted by the Company as they more closely match the intermediate nature of the Company's policy liabilities and provide an appropriate strategy for managing cash flows. Long-term debt securities purchased to fund insurance company operations are summarized below.

	Six Months Ended June 30, 2016	Year Ended December 31, 2015		

(\$ In thousands)

Cost of acquisitions	\$299,444		\$1,309,930	
Average credit quality	BBB+		A-	
Effective annual yield	3.55	%	3.51	%
Spread to treasuries	1.76	%	1.36	%
Effective duration	8.1 years		8.5 years	

Rating agencies generally view mortgage-backed securities as having additional risk for insurers holding interest sensitive liabilities given the potential for asset/liability disintermediation. Consequently, the Company holds predominantly agency mortgage-backed securities. Because mortgage-backed securities are subject to prepayment and extension risk, the Company has substantially reduced these risks by investing in collateralized mortgage obligations ("CMO"), which have more predictable cash flow patterns than pass-through securities. These securities, known as planned amortization class I ("PAC I"), very accurately defined maturity ("VADM") and sequential tranches are designed to amortize in a more predictable manner than other CMO classes or pass-throughs. The Company does not purchase tranches, such as PAC II and support tranches, that subject the portfolio to greater than average prepayment risk. Using this strategy, the Company can more effectively manage and reduce prepayment and extension risks, thereby helping to maintain the appropriate matching of the Company's assets and liabilities.

In addition to diversification, an important aspect of the Company's investment approach is managing the credit quality of its investment in debt securities. Thorough credit analysis is performed on potential corporate investments including examination of a company's credit and industry outlook, financial ratios and trends, and event risks. This emphasis is reflected in the high average credit rating of the Company's debt securities portfolio with 98.1%, as of June 30, 2016, held in investment grade securities. In the table below, investments in debt securities are classified according to credit ratings by nationally recognized statistical rating organizations.

	June 30, 2016		December 31, 2015	
	Carrying Value (In thousands)	%	Carrying Value (In thousands)	%
AAA	\$88,611	0.9	\$97,068	1.0
AA	2,267,666	22.3	2,361,417	23.5
A	3,419,351	33.6	3,399,230	33.9
BBB	4,218,544	41.4	4,016,665	40.0
BB and other below investment grade	193,965	1.8	160,809	1.6

Totals	\$10,188,137	100.0	\$10,035,189	100.0

74

---

Table of Contents

The Company's investment guidelines do not allow for the purchase of below investment grade securities. The investments held in debt securities below investment grade are the result of subsequent downgrades of the securities. These holdings are further summarized below.

Below Investment Grade Debt  
Securities

Amortized Cost	Carrying Value	Fair Value	% of Invested Assets
-------------------	-------------------	---------------	----------------------------

(In thousands, except percentages)

June 30, 2016	\$ 196,541	193,965	194,460	1.8	%
---------------	------------	---------	---------	-----	---

December 31, 2015	\$ 166,508	160,809	160,867	1.6	%
-------------------	------------	---------	---------	-----	---

The Company's percentage of below investment grade securities as of June 30, 2016 compared with the percentage at December 31, 2015 increased marginally due to downgrade of several securities principally energy-related entities. The Company's holdings of below investment grade securities are relatively small and as a percentage of total invested assets low compared to industry averages.

Holdings in below investment grade securities by category as of June 30, 2016 are summarized below, including June 30, 2016 and December 31, 2015 fair values for comparison. The Company continually monitors developments in these industries for issues that may affect security valuation.

Industry Category	Below Investment Grade Debt Securities			
	Amortized Cost	Carrying Value	Fair Value	Fair Value
	June 30, 2016	June 30, 2016	June 30, 2016	December 31, 2015
	(In thousands)			
Retail	\$ 14,975	15,975	15,975	15,525

Manufacturing	39,013	39,425	41,249	41,768
Banking/finance	15,000	15,000	12,000	13,800
Other	74,182	73,627	73,778	50,829
<b>Totals</b>	<b>\$ 196,541</b>	<b>193,965</b>	<b>194,460</b>	<b>160,867</b>

The Company closely monitors its below investment grade holdings by reviewing investment performance indicators, including information such as issuer operating performance, debt ratings, analyst reports and other economic factors that may affect these specific investments. While additional losses are not currently anticipated, based on the existing status and condition of these securities, continued credit deterioration of some securities or the markets in general is possible, which may result in further write-downs.

In the energy sector, oil prices have incurred a precipitous drop in prices over the past two years. While prices have troughed and come off of their lows, this severe downturn affected the credit quality of individual companies. At June 30, 2016 and December 31, 2015, the Company's aggregate holdings in this sector approximated \$955 million and \$939 million, respectively. These holdings represented debt securities issued by approximately forty companies in the oil and gas industry. The Company's oil and gas debt securities were 96.7% investment grade as of the balance sheet date. Further mitigating the risk of the Company's holdings in this sector was ample diversification by subsector (integrated, independent, pipeline, servicer, and equipment).

Table of Contents

Certain European countries have experienced varying degrees of financial stress. Risks, while not as highly publicized recently, could continue to disrupt financial markets and have a detrimental impact on global conditions as well as on sovereign and non-sovereign obligations. The Company has no exposure to the sovereign debt of Portugal, Ireland, Italy, Greece or Spain. These countries in particular had been experiencing the more significant economic, fiscal and political strains that increase the likelihood of default for sovereign countries. Additionally, the Company has no exposure to the debt of financial institutions domiciled in these countries.

However, the Company does have exposure to the debt of non-financial companies in certain of these countries. The following tables show bond holdings at June 30, 2016 of non-financial companies that are domiciled in Portugal, Ireland, Italy, or Spain held in the available for sale and held to maturity debt security portfolios.

Securities Available for Sale		Amortized Cost	Fair Value	Country

Totals		\$ 133,981	140,715	

Generally accepted accounting principles require that investments in debt securities be written down to fair value when declines in value are judged to be other-than-temporary. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price methodology). Refer to Note 10, Fair Values of Financial Instruments, of the accompanying condensed consolidated financial statements for further discussion.

During the six months ended June 30, 2016 the Company recorded no other-than-temporary impairment credit related write-downs on debt or equity securities. See Note 9, Investments, of the accompanying condensed consolidated financial statements for further discussion. Since the Company's adoption of the GAAP guidance on the recognition and accounting for other-than-temporary impairments due to credit loss versus non-credit loss, the Company has recognized a total of \$2.3 million of other-than-temporary impairments of which \$1.6 million was deemed credit related and recognized as realized investment losses in earnings, and \$0.7 million, net of amortization, was deemed a non-credit related impairment and recognized in other comprehensive income.

Table of Contents

The Company is required to classify its investments in debt and equity securities into one of three categories: (a) trading securities; (b) securities available for sale; or (c) securities held to maturity. The Company purchases securities with the intent to hold to maturity and accordingly does not maintain a portfolio of trading securities. Of the remaining two categories, available for sale and held to maturity, the Company makes a determination on categorization based on various factors including the type and quality of the particular security and how it will be incorporated into the Company's overall asset/liability management strategy. As shown in the table below, at June 30, 2016, 28.4% of the Company's total debt and equity securities, based on fair values, were classified as securities available for sale. The holdings in available for sale provide flexibility to the Company to react to market opportunities and conditions and to practice active management within the portfolio to provide adequate liquidity to meet policyholder obligations and other cash needs.

	June 30, 2016		
	Fair Value	Amortized Cost	Unrealized Gains (Losses)
	(In thousands)		
Securities held to maturity:			
Debt securities	\$7,634,961	7,177,135	457,826
Securities available for sale:			
Debt securities	3,011,002	2,848,895	162,107
Equity securities	19,657	14,144	5,513
Totals	\$10,665,620	10,040,174	625,446

## Asset-Backed Securities

The Company holds approximately \$25.3 million in asset-backed securities as of June 30, 2016. This portfolio includes \$2.6 million of manufactured housing bonds and \$22.7 million of home equity loans (also referred to as subprime securities). The Company does not have any holdings in collateralized bond obligations ("CBO"s), collateralized debt obligations ("CDO"s), or collateralized loan obligations ("CLO"s). Principal risks in holding asset-backed securities are structural, credit, and capital market risks. Structural risks include the securities' priority in the issuer's capital structure, the adequacy of and ability to realize proceeds from collateral and the potential for prepayments. Credit risks include corporate credit risks or consumer credit risks for financing such as subprime mortgages. Capital market risks include the general level of interest rates and the liquidity for these securities in the marketplace.

The Company's exposure to the subprime sectors has been limited to investments in the senior tranches of subprime residential mortgage loans. The subprime sector is generally categorized under the asset-backed sector. This sector lends to borrowers who do not qualify for prime interest rates due to poor or insufficient credit history. The slowing housing market, rising interest rates, and relaxed underwriting standards for loans originated after 2005 resulted in higher delinquency rates and losses beginning in 2007. These events caused illiquidity in the market and volatility in the market prices of subprime securities. The housing market subsequently stabilized and an improvement in the prices of subprime securities occurred as the bond market regained more liquidity. All of the loans classified as subprime in the Company's portfolio as of June 30, 2016 were underwritten prior to 2005 as noted in the table below.

Total	\$22,666	24,240	31,985	33,684

77

---

Table of Contents

During the first six months of 2016, the Company reduced its exposure to the subprime sector through sales of securities held. As of June 30, 2016, the Company held ten subprime issues of which 3 were rated AA, 1 was rated BBB, 3 were rated CCC, 2 were rated CC and 1 was not rated.

## Mortgage Loans and Real Estate

In general, the Company originates loans on high quality, income-producing properties such as shopping centers, freestanding retail stores, office buildings, industrial and sales or service facilities, selected apartment buildings, motels, and health care facilities. The location of these properties is typically in major metropolitan areas that offer a potential for property value appreciation. Credit and default risk is minimized through strict underwriting guidelines and diversification of underlying property types and geographic locations. In addition to being secured by the property, mortgage loans with leases on the underlying property are often guaranteed by the lease payments and also by the borrower. This approach has proved over time to result in quality mortgage loans with few defaults. Mortgage loan interest income is recognized on an accrual basis with any premium or discount amortized over the life of the loan. Prepayment and late fees are recorded on the date of collection.

The Company requires a minimum specified yield on mortgage loan investments determined by reference to currently available debt security instrument yields. During the past several years, the low interest rate environment has resulted in fewer loan opportunities being available that meet the Company's required rate of return. Mortgage loans originated by the Company totaled \$38.5 million for the year ended December 31, 2015 and \$38.6 million for the six months ended June 30, 2016. The increase in new originations during 2016 reflects a concerted effort by the Company to grow this part of its investment portfolio. Principal repayments on mortgage loans for the six months ended June 30, 2016 were \$16.3 million.

Loans in foreclosure, loans considered impaired or loans past due 90 days or more are placed on a non-accrual status. If a mortgage loan is determined to be on non-accrual status, the mortgage loan does not accrue any revenue into the Condensed Consolidated Statements of Earnings. The loan is independently monitored and evaluated as to potential impairment or foreclosure. If delinquent payments are made and the loan is brought current, then the Company returns the loan to active status and accrues income accordingly. The Company has no loans past due 90 days which are accruing interest.

The Company held net investments in mortgage loans totaling \$130.7 million and \$108.3 million at June 30, 2016 and December 31, 2015, respectively. The diversification of the portfolio by geographic region and by property type was as follows:

	June 30, 2016		December 31, 2015

Totals	\$130,677	99.5	\$108,311	99.4

The Company's direct investments in real estate are not a significant portion of its total investment portfolio. The Company also participates in several real estate joint ventures, limited partnerships, and other loans that invest primarily in income-producing retail properties. These investments have enhanced the Company's overall investment portfolio returns. The Company's real estate investments totaled approximately \$32.1 million and \$16.3 million at June 30, 2016 and December 31, 2015, respectively. The Company purchased two properties, one located in Cypress, Texas and the other in Tupelo, Mississippi for a total of \$16.8 million during the first six months of 2016.

The Company recognized operating income of approximately \$1.3 million on real estate properties in the first six months of 2016. The Company monitors the conditions and market values of these properties on a regular basis and makes repairs and capital improvements to keep the properties in good condition. The Company recorded a net realized investment gain on disposed properties located in Brazoria County (Texas), Ruidoso, New Mexico, and Austin, Texas, totaling \$2.9 million during the first six months of 2016.

### Market Risk

Market risk is the risk of change in market values of financial instruments due to changes in interest rates, currency exchange rates, commodity prices, or equity prices. The most significant market risk exposure for National Western is interest rate risk. Substantial and sustained increases and decreases in market interest rates can affect the profitability of insurance products and fair value of investments. The yield realized on new investments generally increases or decreases in direct relationship with interest rate changes. The fair values of fixed income debt securities correlate to external market interest rate conditions as market values typically increase when market interest rates decline and decrease when market interest rates rise. However, market values may fluctuate for other reasons, such as changing economic conditions, market dislocations or increasing event-risk concerns.

### Interest Rate Risk

A gradual increase in interest rates from current levels would generally be a positive development for the Company. Rate increases would be expected to provide incremental net investment income, produce increased sales of fixed rate products, and limit the potential erosion of the Company's interest rate spread on products due to minimum guaranteed crediting rates in products. Alternatively, a rise in interest rates would reduce the fair value of the Company's investment portfolio and if long-term rates rise dramatically within a relatively short time period could expose the

Company to disintermediation risk. Disintermediation risk is the risk that policyholders will surrender their policies in a rising interest rate environment forcing the Company to liquidate assets when they are in an unrealized loss position.

A decline in interest rates could cause certain mortgage-backed securities in the Company's portfolio to be more likely to pay down or prepay. In this situation, the Company typically will be unable to reinvest the proceeds at comparable yields. Lower interest rates will likely also cause lower net investment income, subject the Company to reinvestment rate risks, and possibly reduce profitability through reduced interest rate margins associated with products with minimum guaranteed crediting rates. Alternatively, the fair value of the Company's investment portfolio will increase when interest rates decline.

Table of Contents

The correlation between fair values and interest rates for debt securities is reflected in the tables below.

	June 30, 2016	March 31, 2016	December 31, 2015		
	(In thousands except percentages)				
Debt securities - fair value	\$ 10,645,963	10,431,775	10,196,658		
Debt securities - amortized cost	\$ 10,026,030	10,001,686	10,007,665		
Fair value as a percentage of amortized cost	106.18	% 104.30	% 101.89	%	
Net unrealized gain balance	\$ 619,933	430,089	188,993		
Ten-year U.S. Treasury bond – (decrease) increase in yield for the period	(0.30	)%	(0.50	)%	0.10 %

	Net Unrealized Gain Balance				
	At June 30, 2016	At March 31, 2016	At December 31, 2015	Quarter Change in Unrealized Balance	Year-to-date Change in Unrealized Balance
Debt securities held to maturity	\$ 457,826	330,632	161,469	127,194	296,357
Debt securities available for sale	162,107	99,457	27,524	62,650	134,583
Totals	\$ 619,933	430,089	188,993	189,844	430,940

Changes in interest rates typically have a sizable effect on the fair values of the Company's debt securities. The market interest rate of the ten-year U.S. Treasury bond decreased approximately 80 basis points from 2.27% at year-end 2015 to 1.47% by the end of the first six months of 2016 and the Company's unrealized gain position increased \$430.9 million on a portfolio with an amortized cost basis of approximately \$10.0 billion. Given that the majority of the Company's debt securities are classified as held to maturity, which are recorded at amortized cost, changes in fair values have a relatively small effect on the Company's Condensed Consolidated Balance Sheet.

The Company manages interest rate risk principally through ongoing cash flow testing as required for insurance regulatory purposes. Computer models are used to perform cash flow testing under various commonly used stress test interest rate scenarios to determine if existing assets would be sufficient to meet projected liability outflows. Sensitivity analysis allows the Company to measure the potential gain or loss in fair value of its interest-sensitive instruments and to protect its economic value and achieve a predictable spread between what is earned on invested assets and what is paid on liabilities. The Company seeks to minimize the impact of interest risk through surrender charges that are imposed to discourage policy surrenders. Interest rate changes can be anticipated in the computer models and the corresponding risk addressed by management actions affecting asset and liability instruments. However, potential changes in the values of financial instruments indicated by hypothetical interest rate changes will likely be different from actual changes experienced, and the differences could be significant.

The Company has the ability to adjust interest rates, participation rates, and asset management fees and caps, as applicable, in response to changes in investment portfolio yields for a substantial portion of its business in force. The ability to adjust these rates is subject to competitive forces in the market for the Company's products. Surrender rates could increase and new sales could be negatively affected if crediting rates are not competitive with the rates on competing products offered by other insurance companies and financial service entities. The Company designs its products with features encouraging persistency. Interest sensitive life and annuity products have surrender and withdrawal penalty provisions. Typically, surrender charge rates gradually decrease each year the contract is in force.

The Company performed detailed sensitivity analysis as of December 31, 2015, for its interest rate-sensitive assets and liabilities. The changes in market values of the Company's debt securities in the first six months of 2016 were reasonable given the expected range of results of this analysis.

## Table of Contents

### Credit Risk

The Company is exposed to credit risk through counterparties and within its investment portfolio. Credit risk relates to the uncertainty associated with an obligor's continued ability to make timely payments of principal and interest in accordance with the contractual terms of an instrument or contract. As previously discussed, the Company manages credit risk through established investment credit policies and guidelines which address the quality of creditors and counterparties, concentration limits, diversification practices and acceptable risk levels. These policies and guidelines are regularly reviewed and approved by senior management and National Western's Board of Directors.

In connection with the Company's use of call options to hedge the equity return component of its fixed-indexed annuity and life products, the Company is exposed to the risk that a counterparty fails to perform under terms of the option contract. The Company purchases one-year option contracts from multiple counterparties and evaluates the creditworthiness of all counterparties prior to the purchase of the contracts. For consideration in contracting with a counterparty the rating required by the Company is a credit rating of "A" or higher. Accordingly, all options are purchased from nationally recognized financial institutions with a demonstrated performance for honoring their financial obligations and possessing substantial financial capacity. In addition, each counterparty is required to execute a credit support agreement obligating the counterparty to provide collateral to the Company when the fair value of the Company's exposure to the counterparty exceeds specified amounts. Counterparty credit ratings and credit exposure are monitored continuously by the Company's Investment department with adjustments to collateral levels managed as incurred under the credit support agreements.

The Company is also exposed to credit spread risk related to market prices of investment securities and cash flows associated with changes in credit spreads. Credit spread tightening will reduce net investment income associated with new purchases of fixed debt securities and increase the fair value of the investment portfolio. Credit spread widening will reduce the fair value of the investment portfolio and will increase net investment income on new purchases.

## LIQUIDITY AND CAPITAL RESOURCES

### Liquidity

Liquidity requirements are met primarily by funds provided from operations. Premium deposits and annuity considerations, investment income, and investment maturities and prepayments are the primary sources of funds while investment purchases, policy benefits in the form of claims, and payments to policyholders and contract holders in connection with surrenders and withdrawals as well as operating expenses are the primary uses of funds. To ensure the Company will be able to pay future commitments, the funds received as premium payments and deposits are invested in high quality investments, primarily fixed income securities. Funds are invested with the intent that the income from investments, plus proceeds from maturities, will meet the ongoing cash flow needs of the Company. The approach of matching asset and liability durations and yields requires an appropriate mix of investments. Although the Company historically has not been put in the position of having to liquidate invested assets to provide cash flow, its investments consist primarily of marketable debt securities that could be readily converted to cash for liquidity needs. The Company (National Western) may also borrow up to \$40 million on its bank line of credit for short-term cash needs. There were no borrowings outstanding under the line of credit at June 30, 2016.

A primary liquidity concern for life insurers is the risk of an extraordinary level of early policyholder withdrawals, particularly with respect to annuity products whose funds tend to move more rapidly with interest rate changes. The Company includes provisions within its annuity and universal life insurance policies, such as surrender and market value adjustments, that help limit and discourage early withdrawals.

Table of Contents

The actual amounts paid by product line in connection with surrenders and withdrawals for the three and six month periods ended June 30, for each respective year, are noted in the table below.

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
	(In thousands)			
Product Line:				
Traditional Life	\$1,628	1,355	2,980	2,677
Universal Life	30,485	21,857	54,950	36,186
Annuities	134,710	132,382	261,827	240,130
Total	\$166,823	155,594	319,757	278,993

The above contractual withdrawals, as well as the level of surrenders experienced, were generally consistent with the Company's assumptions in asset/liability management, and the associated cash outflows did not have an adverse impact on overall liquidity. Individual life insurance policies are less susceptible to withdrawal than annuity reserves and deposit liabilities because policyholders may incur surrender charges and undergo a new underwriting process in order to obtain a new insurance policy. Cash flow projections and tests under various market interest rate scenarios are also performed to assist in evaluating liquidity needs and adequacy. The Company currently expects available liquidity sources and future cash flows to be more than adequate to meet the demand for funds.

Cash flows from the Company's insurance operations have historically been sufficient to meet current needs. Cash flows from operating activities were \$185.5 million and \$158.2 million for the six months ended June 30, 2016 and 2015, respectively. The Company also has significant cash flows from both scheduled and unscheduled investment security maturities, redemptions, and prepayments. These cash flows totaled \$287.4 million and \$420.1 million for the six months ended June 30, 2016 and 2015, respectively. Operating and investing activity cash flow items could be reduced if interest rates rise at an accelerated rate in the future. Net cash flows from the Company's universal life and investment annuity deposit product operations totaled \$(39.5) million and \$6.3 million during the six months ended June 30, 2016 and 2015, respectively.

#### Capital Resources

The Company relies on stockholders' equity for its capital resources as there is no long-term debt outstanding and the Company does not anticipate the need for any long-term debt in the near future. As of June 30, 2016, the Company had no commitments beyond its normal operating and investment activities.

#### OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

It is not Company practice to enter into off-balance sheet arrangements or to issue guarantees to third parties, other than in the normal course of issuing insurance contracts. Commitments related to insurance products sold are reflected as liabilities for future policy benefits. Insurance contracts guarantee certain performances by the Company.

Insurance reserves are the means by which life insurance companies determine the liabilities that must be established to assure that future policy benefits are provided for and can be paid. These reserves are required by law and based upon standard actuarial methodologies to ensure fulfillment of commitments guaranteed to policyholders and their beneficiaries, even though the obligations may not be due for many years. Refer to Note 1 in the Notes to the

Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 for a discussion of reserving methods.

Table of Contents

The table below summarizes future estimated cash payments under existing contractual obligations.

	Payment Due by Period				
	Total	Less Than 1 Year	1 - 3 Years	3 - 5 Years	More Than 5 Years
	(In thousands)				
Loan commitments	\$21,249	21,249	—	—	—
Operating lease obligations	1,205	145	578	386	96
Life claims payable (1)	68,462	68,462	—	—	—
Other long-term reserve liabilities reflected on the balance sheet (2)	11,437,490	939,315	1,741,710	1,746,498	7,009,967
<b>Total</b>	<b>\$11,528,406</b>	<b>1,029,171</b>	<b>1,742,288</b>	<b>1,746,884</b>	<b>7,010,063</b>

(1) Life claims payable include benefit and claim liabilities for which the Company believes the amount and timing of the payment is essentially fixed and determinable. Such amounts generally relate to incurred and reported death and critical illness claims including an estimate of claims incurred but not reported.

(2) Other long-term liabilities include estimated life and annuity obligations related to death claims, policy surrenders, policy withdrawals, maturities and annuity payments based on mortality, lapse, annuitization, and withdrawal assumptions consistent with the Company's historical experience. These estimated life and annuity obligations are undiscounted projected cash outflows that assume interest crediting and market growth consistent with assumptions used in amortizing deferred acquisition costs. They do not include any offsets for future premiums or deposits. Other long-term liabilities also include determinable payout patterns related to immediate annuities. Due to the significance of the assumptions used, the actual cash outflows will differ both in amount and timing, possibly materially, from these estimates.

## CHANGES IN ACCOUNTING PRINCIPLES AND CRITICAL ACCOUNTING POLICIES

### Changes in Accounting Principles

There were no changes in accounting principles during the periods reported in this Form 10-Q.

## REGULATORY AND OTHER ISSUES

### Statutory Accounting Practices

Regulations that affect the Company and the insurance industry are often the result of efforts by the National Association of Insurance Commissioners ("NAIC"). The NAIC routinely publishes new regulations as model acts or laws which states subsequently adopt as part of their insurance regulations. Currently, the Company is not aware of any NAIC regulatory matter material to its operations or reporting of financial results.

### Risk-Based Capital Requirements

The NAIC established risk-based capital ("RBC") requirements to help state regulators monitor the financial strength and stability of life insurers by identifying those companies that may be inadequately capitalized. Under the NAIC's requirements, each insurer must maintain its total capital above a calculated threshold or take corrective measures to achieve the threshold. The threshold of adequate capital is based on a formula that takes into account the amount of risk each company faces on its products and investments. The RBC formula takes into consideration four major areas of risk which are: (i) asset risk which primarily focuses on the quality of investments; (ii) insurance risk which encompasses mortality and morbidity risk; (iii) interest rate risk which involves asset/liability matching issues; and (iv) other business risks. Statutory laws prohibit public dissemination of certain RBC information. However, current statutory capital and surplus is significantly in excess of the threshold RBC requirements.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES  
ABOUT MARKET RISK

This information is included in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, in the Investments in Debt and Equity Securities section.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective in recording, processing, summarizing, and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

During the quarter ended March 31, 2016, the Company implemented an internally developed policy administration system with respect to the processing of its annuity and traditional life new business policy applications and paying commissions on such business. This constitutes a change in the Company's internal controls over financial reporting as defined in Rules 13a-15(f) and 15d-15(e) under the Exchange Act. Prior to implementation, the Company performed model office testing encompassing the new processes and procedures to be employed using the new system and defined its internal controls with respect to such processing in this environment. During the course of the quarter ended June 30, 2016, management performed post-implementation testing and analysis of the processing and internal controls implemented and determined that the change did not materially affect the Company's internal controls over financial reporting such that the information required to reported and disclosed in its reports under the Exchange Act was adversely impacted. Internal controls over financial reporting change as the Company modifies or enhances its systems and processes to meet business needs. Any significant changes in controls are evaluated prior to implementation to help ensure continued effectiveness of internal controls and the control environment.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Refer to Note 8(A) "Legal Proceedings" of the accompanying condensed consolidated financial statements included in this Form 10-Q.

ITEM 1A. RISK FACTORS

There have been no substantial changes relative to the risk factors disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Effective August 22, 2008, National Western adopted and implemented a limited stock buy-back program associated with the company's 2008 Incentive Plan which provides Option Holders the additional alternative of selling shares acquired through the exercise of options directly back to the company. This program succeeded a similar buy-back program implemented March 10, 2006 associated with the company's 1995 Stock Option and Incentive Plan. Option Holders may elect to sell such acquired shares back to the company at any time within ninety (90) days after the exercise of options at the prevailing market price as of the date of notice of election. These plans and programs were assumed by National Western Life Group, Inc. from National Western pursuant to the terms of the reorganization.

Table of Contents

The following table sets forth the Company's repurchase of its Class A common shares from Option Holders for the quarter ended June 30, 2016. There were no shares repurchased during the period.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May yet Be Purchased Under the Plans or Programs
April 1, 2016 through April 30, 2016	—	—	N/A	N/A
May 1, 2016 through May 31, 2016	—	—	N/A	N/A
June 1, 2016 through June 30, 2016	—	—	N/A	N/A
Total	—	—	N/A	N/A

Purchased shares are reported in the Company's condensed consolidated financial statements as authorized and unissued.

ITEM 4. Removed and Reserved.

#### ITEM 6. EXHIBITS
