August 09, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

ý QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2012

o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 0-15057

P.A.M. TRANSPORTATION SERVICES, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

71-0633135
(I.R.S. Employer Identification
no.)

297 West Henri De Tonti, Tontitown, Arkansas 72770
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (479) 361-9111

N/A
(Former name, former address and former fiscal year, if changed
since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to the filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting

Edgar Filing: PAM TRANSPORTATION SERVICES INC - Form 10-Q

company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company)

Accelerated filer
Smaller reporting
company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date:

Class	Outstanding at July 27, 2012
Common Stock, \$.01 Par Value	8,701,607

P.A.M. TRANSPORTATION SERVICES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements (unaudited)
June 30, 2012

NOTE A: BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In management's opinion, all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation have been included. The consolidated balance sheet at December 31, 2011 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Operating results for the six-month period ended June 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. For further information, refer to the consolidated financial statements and the footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2011.

NOTE B: RECENT ACCOUNTING PRONOUNCEMENTS

In June 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2011-05, Presentation of Comprehensive Income ("ASU 2011-05"). ASU 2011-05 eliminated the option to present the components of other comprehensive income as part of the statement of changes in shareholders' equity and also required presentation of reclassification adjustments from other comprehensive income to net income on the face of the financial statements. In December 2011, the FASB issued an amendment, Accounting Standards Update 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05 ("ASU 2011-12"), which deferred the presentation on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for annual and interim financial statements. The adoption of amended presentation requirements, which was effective for the Company on January 1, 2012, did not have a material effect on the Company's financial condition or results of operations.

NOTE C: MARKETABLE EQUITY SECURITIES

The Company accounts for its marketable securities in accordance with ASC Topic 320, Investments-Debt and Equity Securities. ASC Topic 320 requires companies to classify their investments as trading, available-for-sale or held-to-maturity. The Company's investments in marketable securities are classified as either trading or available-for-sale and consist of equity securities. Management determines the appropriate classification of these securities at the time of purchase and re-evaluates such designation as of each balance sheet date. The cost of securities sold is based on the specific identification method and interest and dividends on securities are included in non-operating income.

Marketable equity securities classified as available-for-sale are carried at fair value, with the unrealized gains and losses, net of tax, included as a component of accumulated other comprehensive income in shareholders' equity. Realized gains and losses, declines in value judged to be other-than-temporary on available-for-sale securities, and increases or decreases in value on trading securities, if any, are included in the determination of net income. A quarterly evaluation is performed in order to judge whether declines in value below cost should be considered temporary and when losses are deemed to be other-than-temporary. Several factors are considered in this evaluation process including the severity and duration of the decline in value, the financial condition and near-term outlook for the specific issuer and the Company's ability to hold the securities.

For the quarter ended June 30, 2012, the evaluation resulted in an impairment charge of approximately \$44,000 in the Company's non-operating income in its statement of operations. For the quarter ended June 30, 2011, the evaluation resulted in an impairment charge of approximately \$193,000 in the Company's non-operating income in its statement of operations.

For the six-month period ended June 30, 2012, the evaluation resulted in an impairment charge of approximately \$44,000 in the Company's non-operating income in its statement of operations. For the six-month period ended June 30, 2011, the evaluation resulted in an impairment charge of approximately \$193,000 in the Company's non-operating income in its statement of operations.

Table of contents

8

The following table sets forth cost, market value and unrealized gain/(loss) on equity securities classified as available-for-sale and equity securities classified as trading as of June 30, 2012 and December 31, 2011.

	June 30, 2012	December 31, 2011
	(in thousands)	
Available-for-sale securities		
Fair market value	\$ 18,931	\$ 20,123
Cost	11,337	12,539
Unrealized gain	\$ 7,594	\$ 7,584
Trading securities		
Fair market value	\$ 144	\$ 141
Cost	157	157
Unrealized loss	\$ (13)	\$ (16)
Total		
Fair market value	\$ 19,075	\$ 20,264
Cost	11,494	12,696
Unrealized gain	\$ 7,581	\$ 7,568

The following table sets forth the gross unrealized gains and losses on the Company's marketable securities that are classified as available-for-sale as of June 30, 2012 and December 31, 2011.

	June 30, 2012	December 31, 2011
	(in thousands)	
Available-for-sale securities:		
Gross unrealized gains	\$ 7,807	\$ 7,866
Gross unrealized losses	(213)	(282)
Total unrealized gains	\$ 7,594	\$ 7,584

As of June 30, 2012 and December 31, 2011, the total net unrealized gain, net of deferred income taxes, in accumulated other comprehensive income was approximately \$4,711,000 and \$4,705,000, respectively.

For the six months ended June 30, 2012, the Company had net unrealized gains in market value on securities classified as available-for-sale of approximately \$678,000, net of deferred income taxes. For the year ended December 31, 2011, the Company had net unrealized gains in market value on securities classified as available-for-sale of approximately \$825,000, net of deferred income taxes.

As of June 30, 2012, the Company's marketable securities that are classified as trading had gross recognized losses of approximately \$13,000 and no gross recognized gains. As of June 30, 2011, the Company's marketable securities that are classified as trading had gross recognized losses of approximately \$4,000 and no gross recognized gains. The following table shows recognized gains (losses) in market value for securities classified as trading for the periods indicated.

Edgar Filing: PAM TRANSPORTATION SERVICES INC - Form 10-Q

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)		(in thousands)	
Trading securities				
Recognized gain (loss) at beginning of period	\$2	\$16	\$(16)	\$14
Recognized loss at end of period	(13)	(4)	(13)	(4)
Net recognized (loss) gain for the period	\$(15)	\$(20)	\$3	\$(18)
Net recognized (loss) gain for the period, net of taxes	\$(9)	\$(12)	\$2	\$(11)

There were no reclassifications of marketable securities during the first six months of 2012 or 2011.

Table of contents

9

The following table shows the Company's realized gains for the periods indicated on certain securities which were held as available-for sale. The cost of securities sold is based on the specific identification method and interest and dividends on securities are included in non-operating income.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(in thousands)		(in thousands)	
Realized gains				
Sale proceeds	\$1,625	\$-	\$2,151	\$966
Cost of securities sold	882	-	1,111	189
Realized gains	\$743	\$-	\$1,040	\$777
Realized gains, net of taxes	\$445	\$-	\$624	\$489

The following table shows the Company's investments' approximate gross unrealized losses and fair value of those securities in a loss position at June 30, 2012 and December 31, 2011. These investments consist of equity securities. As of June 30, 2012 and December 31, 2011 there were no investments that had been in a continuous unrealized loss position for twelve months or longer.

	June 30, 2012		December 31, 2011	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in thousands)			
Equity securities – Available-for-sale	\$2,339	\$214	\$2,914	\$282
Equity securities – Trading	80	13	141	16
Totals	\$2,419	\$227	\$3,055	\$298

The market value of the Company's equity securities are periodically used as collateral against any outstanding margin account borrowings. As of June 30, 2012, the Company had outstanding borrowings of approximately \$6,381,000 under its margin account which were used for the purchase of marketable equity securities and as a source of short-term liquidity. The Company had no borrowings under its margin account as of December 31, 2011.

NOTE D: STOCK BASED COMPENSATION

The Company maintains a stock option plan under which incentive stock options and nonqualified stock options may be granted. On March 2, 2006, the Company's Board of Directors (the "Board") adopted, and shareholders later approved, the 2006 Stock Option Plan (the "2006 Plan"). Under the 2006 Plan 750,000 shares are reserved for the issuance of stock options to directors, officers, key employees, and others. The option exercise price under the 2006 Plan is the fair market value of the stock on the date the option is granted. The fair market value is determined by the average of the highest and lowest sales prices for a share of the Company's common stock, on its primary exchange, on the same date that the option is granted.

Outstanding incentive stock options at June 30, 2012, must be exercised within either five or ten years from the date of grant and vest in increments of 20% each year. Outstanding nonqualified stock options at June 30, 2012, must be exercised within either five or ten years from the date of grant.

During the first six months of 2012, options for 14,000 shares and 125,000 shares were issued under the 2006 Plan at a per-share option exercise price of \$11.54 and \$10.90, respectively. As of June 30, 2012, 401,000 shares were

available for granting future options.

Table of contents

10

The total grant date fair value of options vested during the first six months of 2012 was approximately \$199,000. Total pre-tax stock-based compensation expense, recognized in Salaries, wages and benefits during the second quarter of 2012 was approximately \$155,000 and includes approximately \$116,000 recognized as a result of the additional grant of 3,000 shares to each non-employee director during the second quarter of 2012. Total pre-tax stock-based compensation expense, recognized in Salaries, wages and benefits during the first six months of 2012 was approximately \$254,000 and includes approximately \$199,000 recognized as a result of the increased annual grant of 5,000 shares to each non-employee director during the first six months of 2012. The recognition of stock-based compensation expense decreased diluted and basic earnings per common share by approximately \$0.01 during the second quarter ending June 30, 2012 and by approximately \$0.02 during the first six months ending June 30, 2012. As of June 30, 2012, the Company had stock-based compensation plans with total unvested stock-based compensation expense of approximately \$846,000 which is being amortized on a straight-line basis over the remaining vesting period. As a result, the Company expects to recognize approximately \$97,000 in additional compensation expense related to unvested option awards during the remainder of 2012 and to recognize approximately \$195,000 in additional compensation expense related to unvested option awards during each of the years 2013 through 2014, \$189,000 in additional compensation expense related to unvested option awards during 2015, \$128,000 in additional compensation expense related to unvested option awards during 2016 and \$42,000 in additional compensation expense related to unvested option awards during 2017.

The total grant date fair value of options vested during the first six months of 2011 was approximately \$98,000. Total pre-tax stock-based compensation expense, recognized in Salaries, wages and benefits during the second quarter of 2011 was approximately \$18,000. Total pre-tax stock-based compensation expense, recognized in Salaries, wages and benefits during the first six months of 2011 was approximately \$135,000 and included approximately \$98,000 recognized as a result of the annual grant of 2,000 shares to each non-employee director during the first quarter of 2011. The recognition of stock-based compensation expense did not have a recognizable impact on diluted or basic earnings per share reported for the second quarter ending June 30, 2011 but did increase diluted and basic loss per common share by approximately \$0.01 during the six months ending June 30, 2011. As of June 30, 2011, the Company had stock-based compensation plans with total unvested stock-based compensation expense, excluding stock-based compensation related to the performance-based variable nonqualified stock option grant, of approximately \$280,000 which was being amortized on a straight-line basis over the remaining vesting period. Stock-based compensation expense recognized during the first six months of 2011 related to the grant of performance-based variable nonqualified stock options was approximately \$5,000 and was based on estimated performance criteria for 2011.

The weighted average grant date fair value of options granted during the first six months of 2012 and 2011 was \$5.96 per share and \$6.14 per share, respectively.

The fair value of the Company's employee stock options was estimated at the date of grant using a Black-Scholes-Merton ("BSM") option-pricing model using the following assumptions:

	Six Months Ended June 30,	
	2012	2011
Dividend yield	0%	0%
Volatility	57.88% - 65.89%	65.81%
Risk-free rate	0.64% - 1.09%	1.79%
	4.2 years - 6.5	4.3 years
Expected life	years	
Fair value of options	\$5.54 - \$6.06	\$6.14

The Company does not anticipate paying any additional cash dividends in the foreseeable future other than those dividends paid in April 2012. The estimated volatility is based on the historical volatility of our stock. The risk free rate for the periods within the expected life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The expected life of the options was calculated based on the historical exercise behavior.

Table of contents

11

Information related to option activity for the six months ended June 30, 2012 is as follows:

	Shares Under Options	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value*
Outstanding-beginning of year	180,942	\$ 16.50		
Granted	139,000	10.96		
Exercised	(6,000)	9.04		
Cancelled/forfeited/expired	(12,000)	22.92		
Outstanding at June 30, 2012	301,942	\$ 13.85	5.8	\$23,240
Exercisable at June 30, 2012	153,500	\$ 16.60	2.3	\$23,240

* The intrinsic value of a stock option is the amount by which the market value of the underlying stock exceeds the exercise price of the option. The per share market value of our common stock, as determined by the closing price on June 30, 2012, was \$9.65.

The number, weighted average exercise price and weighted average remaining contractual life of options outstanding as of June 30, 2012 and the number and weighted average exercise price of options exercisable as of June 30, 2012 are as follows:

Exercise Price	Shares Under Outstanding Options	Weighted-Average Remaining Contractual Term (in years)	Shares Under Exercisable Options
\$3.84	4,000	1.7	4,000
\$10.90	21,000	4.9	21,000
\$10.90	104,000	9.9	-
\$11.22	54,442	8.4	10,000
\$11.54	12,000	4.7	12,000
\$11.75	12,000	3.7	12,000
\$14.32	14,000	2.7	14,000
\$14.98	14,000	0.7	14,000
\$19.88	12,500	0.2	12,500
\$23.22	54,000	0.2	54,000
	301,942	5.8	153,500

Cash received from option exercises totaled approximately \$55,000 and \$15,000 during the six months ended June 30, 2012 and June 30, 2011, respectively. The Company issues new shares upon option exercise.

NOTE E: SEGMENT INFORMATION

The Company follows the guidance provided by ASC Topic 280, Segment Reporting, in its identification of operating segments. The Company has determined that it has a total of two operating segments whose primary operations can be characterized as either Truckload Services or Brokerage and Logistics Services, however in accordance with the aggregation criteria provided by FASB ASC Topic 280, the Company has determined that the operations of the two operating segments can be aggregated into a single reporting segment, motor carrier operations. Truckload Services

Edgar Filing: PAM TRANSPORTATION SERVICES INC - Form 10-Q

revenues and Brokerage and Logistics Services revenues, each before fuel surcharges, were as follows:

	Three Months Ended June 30, 2012		2011		Six Months Ended June 30, 2012		2011	
	Amount	%	Amount	%	Amount	%	Amount	%
(in thousands, except percentage data)								
Truckload Services revenue	\$67,613	91.7	\$69,444	93.2	\$136,148	91.5	\$133,453	93.6
Brokerage and Logistics Services revenue	6,087	8.3	5,036	6.8	12,720	8.5	9,151	6.4
Total revenues	\$73,700	100.0	\$74,480	100.0	\$148,868	100.0	\$142,604	100.0

NOTE F: TREASURY STOCK

The Company accounts for Treasury stock using the cost method and as of June 30, 2012, 2,682,600 shares were held in the treasury at an aggregate cost of approximately \$37,239,000. During the six months ending June 30, 2012, the Company did not repurchase any shares of its common stock.

[Table of contents](#)

12

NOTE G: EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is computed based on the weighted average number of shares of common stock outstanding during the period. Diluted earnings (loss) per share is computed by adjusting the weighted average number of shares of common stock outstanding by common stock equivalents attributable to dilutive stock options. The computation of diluted earnings (loss) per share does not assume conversion, exercise, or contingent issuance of securities that would have an anti-dilutive effect on earnings (loss) per share. The computations of basic and diluted earnings (loss) per share were as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2012	2011	2012	2011
	(in thousands, except per share data)			
Net income (loss)	\$935	\$693	\$1,609	\$(1,286)
Basic weighted average common shares outstanding	8,702	9,098	8,699	9,245
Dilutive effect of common stock equivalents	1	4	2	-
Diluted weighted average common shares outstanding	8,703	9,102	8,701	9,245
Basic earnings (loss) per share	\$0.11	\$0.08	\$0.18	\$(0.14)
Diluted earnings (loss) per share	\$0.11	\$0.08	\$0.18	\$(0.14)

Options to purchase 297,942 and 249,500 shares of common stock were outstanding at June 30, 2012 and 2011, respectively, but were not included in the computation of diluted earnings per share because to do so would have an anti-dilutive effect.

NOTE H: INCOME TAXES

The Company and its subsidiaries are subject to U.S. and Canadian federal income tax laws as well as the income tax laws of multiple state jurisdictions. The major tax jurisdictions in which we operate generally provide for a deficiency assessment statute of limitation period of three years and as a result, the Company's tax years 2008 and forward remain open to examination in those jurisdictions.

The Company recognizes a tax benefit from an uncertain tax position only if it is more likely than not that the position will be sustained on examination by taxing authorities, based on the technical merits of the position. As of June 30, 2012, an adjustment to the Company's consolidated financial statements for uncertain tax positions has not been required as management believes that the Company's tax positions taken in income tax returns filed or to be filed are supported by clear and unambiguous income tax laws. The Company recognizes interest and penalties related to uncertain income tax positions, if any, in income tax expense. During the three and six months ended June 30, 2012 and 2011, the Company has not recognized or accrued any interest or penalties related to uncertain income tax positions.

NOTE I: FAIR VALUE OF FINANCIAL INSTRUMENTS

Our financial instruments consist of cash and cash equivalents, marketable equity securities, accounts receivable, trade accounts payable, and borrowings.

The Company adopted guidance effective January 1, 2008 for financial assets and liabilities measured on a recurring basis. This guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date and also establishes a fair value hierarchy which requires an

entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Inputs other than Level 1 inputs that are either directly or indirectly observable such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable; or other inputs not directly observable, but derived principally from, or corroborated by, observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity.

The Company utilizes the market approach to measure fair value for its financial assets and liabilities. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.

Table of contents

13

At June 30, 2012, the following items are measured at fair value on a recurring basis:

	Total	Level 1 (in thousands)	Level 2	Level 3
Marketable equity securities	\$ 19,075	\$ 19,075	-	-

The Company's investments in marketable securities are recorded at fair value based on quoted market prices. The carrying value of other financial instruments, including cash, accounts receivable, accounts payable, and accrued liabilities approximate fair value due to their short maturities.

The carrying amount for the line of credit approximates fair value because the line of credit interest rate is adjusted frequently.

For long-term debt other than the lines of credit, the fair values are estimated using discounted cash flow analyses, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. The carrying value and estimated fair value of this other long-term debt at June 30, 2012 was as follows:

	Carrying Value (in thousands)	Estimated Fair Value
Long-term debt	\$ 74,263	\$ 74,274

The Company has not elected the fair value option for any of its financial instruments.

NOTE J: NOTES PAYABLE AND LONG-TERM DEBT

During the first six months of 2012, the Company's subsidiaries entered into installment obligations totaling approximately \$35.5 million for the purpose of purchasing revenue equipment. These obligations are payable in monthly installments ranging from 36 to 60 months at a weighted average interest rate of 2.91%.

NOTE K: SUBSEQUENT EVENTS

Subsequent events have been evaluated for recognition and disclosure through the date these financial statements were filed with the Securities and Exchange Commission.

NOTE L: DIVIDENDS

On March 20, 2012, the Board declared a special one-time cash dividend of \$1.00 per common share. This dividend was paid in cash on April 9, 2012 to shareholders of record at the close of business on March 30, 2012. The Company currently intends to retain future earnings to finance the growth, development and expansion of its business and does not anticipate paying cash dividends in the future. Any future determination to pay dividends will be at the discretion of the Board and will depend on its financial condition, results of operations, capital requirements, any legal or contractual restrictions on the payment of dividends and other factors the Board deems relevant.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

FORWARD-LOOKING INFORMATION

Certain information included in this Quarterly Report on Form 10-Q constitutes "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may relate to expected future financial and operating results or events, and are thus prospective. Such forward-looking statements are subject to risks, uncertainties and other factors which could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. Potential risks and uncertainties include, but are not limited to, excess capacity in the trucking industry; surplus inventories; recessionary economic cycles and downturns in customers' business cycles; increases or rapid fluctuations in fuel prices, interest rates, fuel taxes, tolls, license and registration fees; the resale value of the Company's used equipment and the price of new equipment; increases in compensation for and difficulty in attracting and retaining qualified drivers and owner-operators; increases in insurance premiums and deductible amounts relating to accident, cargo, workers' compensation, health, and other claims; unanticipated increases in the number or amount of claims for which the Company is self insured; inability of the Company to continue to secure acceptable financing arrangements; seasonal factors such as harsh weather conditions that increase operating costs; competition from trucking, rail, and intermodal competitors including reductions in rates resulting from competitive bidding; the ability to identify acceptable acquisition candidates, consummate acquisitions, and integrate acquired operations; a significant reduction in or termination of the Company's trucking service by a key customer; and other factors, including risk factors, included from time to time in filings made by the Company with the Securities and Exchange Commission ("SEC"). The Company undertakes no obligation to update or clarify forward-looking statements, whether as a result of new information, future events or otherwise.

CRITICAL ACCOUNTING POLICIES

There have been no material changes to our critical accounting policies and estimates from the information provided in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, included in our Form 10-K for the fiscal year ended December 31, 2011.

BUSINESS OVERVIEW

The Company's administrative headquarters are in Tontitown, Arkansas. From this location we manage operations conducted through wholly owned subsidiaries based in various locations around the United States, Mexico, and Canada. The operations of these subsidiaries can generally be classified into either truckload services or brokerage and logistics services. Truckload services include those transportation services in which we utilize company owned trucks or owner-operator owned trucks. Brokerage and logistics services consist of services such as transportation scheduling, routing, mode selection, transloading and other value added services related to the transportation of freight which may or may not involve the usage of company owned or owner-operator owned equipment. Both our truckload operations and our brokerage/logistics operations have similar economic characteristics and are impacted by virtually the same economic factors as discussed elsewhere in this report. All of the Company's operations are in the motor carrier segment.

For both operations, substantially all of our revenue is generated by transporting freight for customers and is predominantly affected by the rates per mile received from our customers. These aspects of our business are carefully managed and efforts are continuously underway to achieve favorable results. For the three and six month periods ended June 30, 2012, truckload services revenues, excluding fuel surcharges, represented 91.7% and 91.5%, respectively, of total revenues, excluding fuel surcharges, with remaining revenues, excluding fuel surcharges, being generated from brokerage and logistics services. For the three and six month periods ended June 30, 2011, truckload services revenues, excluding fuel surcharges, represented 93.2% and 93.6%, respectively, of total revenues, excluding fuel surcharges, with remaining revenues, excluding fuel surcharges, being generated from brokerage and logistics

services.

The main factors that impact our profitability on the expense side are costs incurred in transporting freight for our customers. Currently our most challenging costs include fuel, driver recruitment, training, wage and benefit costs, independent broker costs (which we record as purchased transportation), insurance, and maintenance and capital equipment costs.

In discussing our results of operations we use revenue, before fuel surcharge, (and fuel expense, net of surcharge), because management believes that eliminating the impact of this sometimes volatile source of revenue allows a more consistent basis for comparing our results of operations from period to period. During the three and six months ending June 30, 2012, approximately \$20.5 million and \$41.4 million, respectively, of the Company's total revenue was generated from fuel surcharges. During the three and six months ending June 30, 2011 approximately \$21.4 million and \$38.3 million, respectively, of the Company's total revenue was generated from fuel surcharges. We may also discuss certain changes in our expenses as a percentage of revenue, before fuel surcharge, rather than absolute dollar changes. We do this because we believe the high variable cost nature of certain expenses makes a comparison of changes in expenses as a percentage of revenue more meaningful than absolute dollar changes.

Table of contents

15

RESULTS OF OPERATIONS – TRUCKLOAD SERVICES

The following table sets forth, for truckload services, the percentage relationship of expense items to operating revenues, before fuel surcharges, for the periods indicated. Fuel costs are shown net of fuel surcharges.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
	(percentages)			
Operating revenues, before fuel surcharge	100.0	100.0	100.0	100.0
Operating expenses:				
Salaries, wages and benefits	49.8	42.2	48.2	43.5
Fuel expense, net of fuel surcharge	10.2	18.3	12.3	20.3
Rent and purchased transportation	0.8	1.6	0.9	1.6
Depreciation	13.8	12.4	13.6	12.4
Operating supplies and expenses	15.0	13.4	14.3	13.9
Operating taxes and licenses	1.8	1.8	1.9	1.9
Insurance and claims	4.8	5.0	4.8	5.0
Communications and utilities	0.8	0.9	0.8	1.0
Other	1.8	2.2	1.9	2.2
Gain on sale or disposal of property	(0.4)	-	(0.2)	-
Total operating expenses	98.4	97.8	98.5	101.8
Operating income (loss)	1.6	2.2	1.5	(1.8)
Non-operating income	1.3	0.0	1.1	0.8
Interest expense	(0.9)	(0.7)	(0.9)	(0.7)
Income (loss) before income taxes	2.0	1.5	1.7	(1.7)

THREE MONTHS ENDED JUNE 30, 2012 VS. THREE MONTHS ENDED JUNE 30, 2011

During the second quarter of 2012, truckload services revenue, before fuel surcharges, decreased 2.6% to \$67.6 million as compared to \$69.4 million during the second quarter of 2011. The decrease was primarily due to a decrease in the average rate charged to customers for our truckload services and to a decrease in the number of miles traveled as the average number of trucks utilized in operations decreased. The average rate charged per total mile during the second quarter of 2012 decreased by \$0.02 as compared to the average rate charged during the second quarter of 2011. The average number of trucks utilized in operations decreased from 1,769 trucks during the second quarter of 2011 to 1,739 trucks during the second quarter of 2012. Partially offsetting these decreases was an increase in equipment utilization as the average number of miles traveled each work day increased from 454 miles per truck during the second quarter of 2011 to 457 miles per truck during the second quarter of 2012.

Salaries, wages and benefits increased from 42.2% of revenues, before fuel surcharges, in the second quarter of 2011 to 49.8% of revenues, before fuel surcharges, during the second quarter of 2012. The increase relates primarily to an increase in driver lease expense, which is a component of salaries, wages and benefits, as the average number of owner operators under contract increased from 43 during the second quarter of 2011 to 122 during the second quarter of 2012. The increase in costs in this category, as they relate to the increase in the number owner operator drivers, are partially offset by a decrease in other cost categories, such as repairs and fuel, which are generally borne by the owner operator. Also contributing to the increase was an increase in costs associated with employee benefits, such as group health insurance and workers compensation, during the second quarter of 2012 as compared to the second quarter of 2011.

Fuel expense, net of fuel surcharge, decreased from 18.3% of revenues, before fuel surcharges, during the second quarter of 2011 to 10.2% of revenues, before fuel surcharges, during the second quarter of 2012. The decrease was primarily related to a decrease in the average surcharge-adjusted fuel price paid per gallon of diesel fuel and to an increase in the average miles-per-gallon (“mpg”) experienced. The average surcharge-adjusted fuel price paid per gallon of diesel fuel decreased from \$1.40 during the second quarter of 2011 to \$0.88 during the second quarter of 2012 as a result of a decrease in the national average price of a gallon of diesel fuel for the periods compared as well as more favorable fuel surcharge arrangements made with customers since the second quarter of 2011. Fuel surcharge collections can fluctuate significantly from period to period as they are generally based on changes in fuel prices from period to period so that during periods of rising fuel prices fuel surcharge collections increase while fuel surcharge collections decrease during periods of falling fuel prices. The average mpg experienced increased during the second quarter of 2012 as compared to the mpg experienced during the second quarter of 2011 as a result of replacing older trucks with newer trucks, which are more fuel efficient. The Company has also implemented driver bonus programs which are tied directly to fuel efficiency.

Rent and purchased transportation decreased from 1.6% of revenues, before fuel surcharges, during the second quarter of 2011 to 0.8% of revenues, before fuel surcharges, during the second quarter of 2012. The decrease relates primarily to a decrease in amounts paid for third-party equipment rentals and to third-party transportation service providers.

Table of contents

16

Depreciation increased from 12.4% of revenues, before fuel surcharges, during the second quarter of 2011 to 13.8% of revenues, before fuel surcharges, during the second quarter of 2012. The increase relates primarily to purchases of new trucks made since the second quarter of 2011 which replaced older trucks within the fleet. These new truck replacements have a significantly higher purchase price than those trucks that are being replaced and are also being depreciated over a shorter period of time as the Company accelerates its truck replacement cycle from every five years to a replacement cycle of every three years. This reduction in replacement cycle, combined with a higher purchase price, results in higher depreciation expense over a shorter period of time. The decrease in the truck replacement cycle time is intended to reduce fuel costs, improve driver and customer satisfaction, and to reduce long-term maintenance costs as well as increase fleet efficiency by reducing maintenance down-time.

Operating supplies and expenses increased from 13.4% of revenues, before fuel surcharges, during the second quarter of 2011 to 15.0% of revenues, before fuel surcharges, during the second quarter of 2012. The increase relates primarily to an increase in amounts paid for tolls and driver training schools during the second quarter of 2012 as compared to amounts paid during the second quarter of 2011. The increase in driver training and recruiting costs are a result of heightened competition for qualified drivers as industry demand has increased and increased regulations have forced some drivers to exit the profession.

Insurance and claims decreased from 5.0% of revenues, before fuel surcharges, during the second quarter of 2011 to 4.8% of revenues, before fuel surcharges, during the second quarter of 2012. The decrease relates primarily to a decrease in auto liability claims expenses incurred during the second quarter of 2012 as compared to the second quarter of 2011.

Other expenses decreased from 2.2% of revenues, before fuel surcharges, during the second quarter of 2011 to 1.8% of revenues, before fuel surcharges, during the second quarter of 2012. The decrease relates primarily to a decrease in amounts expensed for uncollectible revenue and for other supplies and expenses.

The truckload services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, increased from 97.8% for the second quarter 2011 to 98.4% for the second quarter of 2012.

SIX MONTHS ENDED JUNE 30, 2012 VS. SIX MONTHS ENDED JUNE 30, 2011

For the first six months ended June 30, 2012, truckload services revenue, before fuel surcharges, increased 2.0% to \$136.1 million as compared to \$133.5 million for the first six months ended June 30, 2011. The increase was primarily due to an increase in equipment utilization as the average number of miles traveled each work day increased from 443 miles per truck during the first six months of 2011 to 455 miles per truck during the first six months of 2012.

Salaries, wages and benefits increased from 43.5% of revenues, before fuel surcharges, in the first six months of 2011 to 48.2% of revenues, before fuel surcharges, during the first six months of 2012. The increase relates primarily to an increase in driver lease expense, which is a component of salaries, wages and benefits, as the average number of owner-operators under contract increased from 37 during the first six months of 2011 to 109 during the first six months of 2012. Also contributing to the increase was an increase in employee group health insurance costs during the first six months of 2012 as compared to the first six months of 2011.

Fuel expense, net of fuel surcharge, decreased from 20.3% of revenues, before fuel surcharges, during the first six months of 2011 to 12.3% of revenues, before fuel surcharges, during the first six months of 2012. The decrease was primarily related to a decrease in the average surcharge-adjusted fuel price paid per gallon of diesel fuel and to an increase in the average miles-per-gallon ("mpg") experienced. The average surcharge-adjusted fuel price paid per gallon of diesel fuel decreased from \$1.48 during the first six months of 2011 to \$1.03 during the first six months of 2012 as

a result of a decrease in the national average price of a gallon of diesel fuel for the periods compared as well as more favorable fuel surcharge arrangements made with customers. Fuel surcharge collections can fluctuate significantly from period to period as they are generally based on changes in fuel prices from period to period so that during periods of rising fuel prices fuel surcharge collections increase while fuel surcharge collections decrease during periods of falling fuel prices. The average mpg experienced increased during the first six months of 2012 as compared to the mpg experienced during the first six months of 2011 as a result of replacing older trucks with newer trucks which are more fuel efficient. The Company has also implemented driver bonus programs which are tied directly to fuel efficiency.

Rent and purchased transportation decreased from 1.6% of revenues, before fuel surcharges, during the first six months of 2011 to 0.9% of revenues, before fuel surcharges, during the first six months of 2012. The decrease relates primarily to a decrease in amounts paid for third-party equipment rentals and third-party transportation companies for intermodal services as management continued to focus on its core business and placed less emphasis on the Company's intermodal service offering.

Table of contents

17

Depreciation increased from 12.4% of revenues, before fuel surcharges, during the first six months of 2011 to 13.6% of revenues, before fuel surcharges, during the first six months of 2012. The increase relates primarily to purchases of new trucks which replaced older trucks within the fleet. These new truck replacements have a significantly higher purchase price than those trucks that are being replaced and are being depreciated over a shorter period of time as the Company accelerates its truck replacement cycle from every five years to a replacement cycle of every three years. This reduction in replacement cycle, combined with a higher purchase price, results in higher depreciation expense over a shorter period of time. The decrease in the truck replacement cycle time is intended to reduce fuel costs, improve driver and customer satisfaction, and to reduce long-term maintenance costs as well as increase fleet efficiency by reducing maintenance down-time.

Operating supplies and expenses increased from 13.9% of revenues, before fuel surcharges, during the first six months of 2011 to 14.3% of revenues, before fuel surcharges, during the first six months of 2012. The increase relates primarily to an increase in amounts paid for tolls and driver training schools during the first six months of 2012 as compared to amounts paid during the first six months of 2011. The increase in driver training and recruiting costs are a result of heightened competition for qualified drivers as industry demand has increased and increased regulations have forced some drivers to exit the profession. The increase related to the above factors was partially offset by a decrease in equipment maintenance and repair costs for the periods compared as the Company continues to replace older equipment with newer equipment.

Insurance and claims decreased from 5.0% of revenues, before fuel surcharges, during the first six months of 2011 to 4.8% of revenues, before fuel surcharges, during the first six months of 2012. The decrease relates primarily to a decrease in auto liability claims expenses incurred during the first six months of 2012 as compared to the first six months of 2011.

Other expenses decreased from 2.2% of revenues, before fuel surcharges, during the first six months of 2011 to 1.9% of revenues, before fuel surcharges, during the first six months of 2012. The decrease relates primarily to a decrease in amounts expensed for cargo related insurance claims and for other supplies and expenses.

The truckload services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, decreased from 101.8% for the first six months 2011 to 98.5% for the first six months of 2012.

RESULTS OF OPERATIONS – LOGISTICS AND BROKERAGE SERVICES

The following table sets forth, for logistics and brokerage services, the percentage relationship of expense items to operating revenues, before fuel surcharges, for the periods indicated. Brokerage service operations occur specifically in certain divisions; however, brokerage operations occur throughout the Company in similar operations having substantially similar economic characteristics. Rent and purchased transportation, which includes costs paid to third party carriers, are shown net of fuel surcharges.

THREE MONTHS ENDED JUNE 30, 2012 VS. THREE MONTHS ENDED JUNE 30, 2011

During the second quarter of 2012, logistics and brokerage services revenue, before fuel surcharges, increased 20.9% to \$6.1 million as compared to \$5.0 million during the second quarter of 2011. The increase relates to an increase in the number of loads brokered during the second quarter of 2012 as compared to the second quarter of 2011.

Salaries, wages and benefits decreased from 2.1% of revenues, before fuel surcharges, in the second quarter of 2011 to 1.8% of revenues, before fuel surcharges, during the second quarter of 2012. The decrease relates to the effect of higher revenues without a corresponding increase in those wages with fixed cost characteristics, such as general and administrative wages.

Table of contents

18

Rent and purchased transportation decreased from 95.8% of revenues, before fuel surcharges, during the second quarter of 2011 to 94.7% of revenues, before fuel surcharges during the second quarter of 2012. The decrease relates to a decrease in amounts charged by third party logistics and brokerage service providers.

The logistics and brokerage services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, decreased from 98.3% for the second quarter of 2011 to 96.8% for the second quarter of 2012.

SIX MONTHS ENDED JUNE 30, 2012 VS. SIX MONTHS ENDED JUNE 30, 2011

For the first six months ended June 30, 2012, logistics and brokerage services revenue, before fuel surcharges, increased 39.0% to \$12.7 million as compared to \$9.2 million for the first six months ended June 30, 2011. The increase relates to an increase in the number of loads brokered during the first six months of 2012 as compared to the first six months of 2011.

Salaries, wages and benefits decreased from 2.5% of revenues, before fuel surcharges, during the first six months of 2011 to 1.6% of revenues, before fuel surcharges, during the first six months of 2012. The decrease relates to the effect of higher revenues without a corresponding increase in those wages with fixed cost characteristics, such as general and administrative wages.

Rent and purchased transportation increased from 94.8% of revenues, before fuel surcharges, during the first six months of 2011 to 95.2% of revenues, before fuel surcharges during the first six months of 2012. The increase relates to an increase in amounts charged by third party logistics and brokerage service providers.

The logistics and brokerage services division operating ratio, which measures the ratio of operating expenses, net of fuel surcharges, to operating revenues, before fuel surcharges, decreased from 97.9% for the first six months of 2011 to 97.1% for the first six months of 2012.

RESULTS OF OPERATIONS – COMBINED SERVICES

THREE MONTHS ENDED JUNE 30, 2012 VS. THREE MONTHS ENDED JUNE 30, 2011

Net income for all divisions was approximately \$0.9 million, or 1.3% of revenues, before fuel surcharge for the second quarter of 2012 as compared to net income of \$0.7 million or 0.9% of revenues, before fuel surcharge for the second quarter of 2011. The increase in income resulted in diluted earnings per share of \$0.11 for the second quarter of 2012 as compared to diluted earnings per share of \$0.08 for the second quarter of 2011.

SIX MONTHS ENDED JUNE 30, 2012 VS. SIX MONTHS ENDED JUNE 30, 2011

Net income for all divisions was approximately \$1.6 million, or 1.1% of revenues, before fuel surcharge for the first six months of 2012 as compared to net loss of \$1.3 million or 0.9% of revenues, before fuel surcharge for the first six months of 2011. The increase in income resulted in diluted earnings per share of \$0.18 for the first six months of 2012 as compared to diluted loss per share of \$0.14 for the first six months of 2011.

LIQUIDITY AND CAPITAL RESOURCES

The growth of our business has required, and will continue to require, a significant investment in new revenue equipment. Our primary sources of liquidity have been funds provided by operations, proceeds from the sales of revenue equipment, issuances of equity securities, borrowings under our line of credit, installment note agreements, and borrowings under our investment margin account.

During the first six months of 2012, we generated \$22.4 million in cash from operating activities. Investing activities used \$29.1 million in cash in the first six months of 2012. Financing activities provided \$10.4 million in cash in the first six months of 2012.

Our primary use of funds is for the purchase of revenue equipment. We typically use installment notes, our existing line of credit on an interim basis, proceeds from the sale or trade of equipment, and cash flows from operations to finance capital expenditures and repay long-term debt. During the first six months of 2012, we utilized cash on hand, installment notes, and our lines of credit to finance revenue equipment purchases of approximately \$40.9 million.

Occasionally, we finance the acquisition of revenue equipment through installment notes with fixed interest rates and terms ranging from 36 to 60 months. During the first six months of 2012, the Company's subsidiary, P.A.M. Transport, Inc. entered into installment obligations totaling approximately \$35.5 million for the purpose of purchasing revenue equipment. These obligations are payable in monthly installments ranging from 36 months to 60 months and at interest rates ranging from 2.68% to 3.35%.

Table of contents

19

During the remainder of 2012, we expect to purchase 270 new trucks and 290 new trailers while continuing to sell or trade older equipment, which we expect to result in net capital expenditures of approximately \$23.6 million. Management believes we will be able to finance our near term needs for working capital over the next twelve months, as well as any planned capital expenditures during such period, with cash balances, cash flows from operations, and borrowings believed to be available from financing sources. We will continue to have significant capital requirements over the long-term, which may require us to incur debt or seek additional equity capital. The availability of additional capital will depend upon prevailing market conditions, the market price of our common stock and several other factors over which we have limited control, as well as our financial condition and results of operations. Nevertheless, based on our recent operating results, current cash position, anticipated future cash flows, and sources of financing that we expect will be available to us, we do not expect that we will experience any significant liquidity constraints in the foreseeable future.

We currently intend to retain our future earnings to finance our growth and do not anticipate paying additional cash dividends in the foreseeable future other than those dividends paid in April 2012.

During the first six months of 2012, the Company negotiated an increase in its revolving line of credit from \$30 million to \$35 million. Amounts outstanding under the line of credit bear interest at LIBOR (determined as of the first day of each month) plus 1.95% (2.19% at June 30, 2012), are secured by our accounts receivable and mature on June 1, 2014. At June 30, 2012 outstanding advances on the line of credit were approximately \$1.1 million, which consisted entirely of letters of credit, with availability to borrow \$33.9 million.

Cash and cash equivalents increased from \$0.2 million at December 31, 2011 to \$3.9 million at June 30, 2012. The increase relates to the timing of the payment of outstanding invoices with payment due dates after the close of the current period.

Trade accounts receivable increased from \$48.0 million at December 31, 2011 to \$51.5 million at June 30, 2012. The increase relates to a general increase in freight revenue and fuel surcharge revenue, which flows through the accounts receivable account, during the first six months of 2012 as compared to the freight revenue and fuel surcharge revenue generated during the last six months of 2011.

Accounts receivable-other increased from \$2.2 million at December 31, 2011 to \$3.6 million at June 30, 2012. The increase relates primarily to an increase in amounts receivable from the Company's third-party qualified intermediary. The Company contracts with a third-party qualified intermediary in order to accomplish like-kind exchanges related to its revenue equipment. Under the program, dispositions of eligible trucks or trailers and acquisitions of replacement trucks or trailers are made in a form whereby any associated tax gains related to the disposal are deferred. To qualify for like-kind exchange treatment, we exchange, through our qualified intermediary, eligible trucks or trailers being disposed with trucks or trailers being acquired. Amounts held by the Company's third-party qualified intermediary are dependent on the timing and extent of the Company's revenue equipment sales and/or purchase activities which can fluctuate significantly from period-to-period.

Prepaid expenses and deposits decreased from \$11.0 million at December 31, 2011 to \$8.3 million at June 30, 2012. The decrease relates to the amortization of prepaid tractor and trailer license fees and auto liability insurance premiums. During late 2011, approximately \$2.6 million of the 2012 license fees and approximately \$0.8 million of the 2012 auto liability insurance premiums were paid in advance. These prepaid expenses will continue to be amortized to expense through the remainder of the year.

Revenue equipment, which generally consists of trucks, trailers, and revenue equipment accessories such as Qualcomm™ satellite tracking units, decreased from \$324.6 million at December 31, 2011 to \$315.8 million at June 30, 2012. The decrease relates primarily to dispositions of older, fully depreciated, Qualcomm™ units as part of the

Company's plan to replace older units with newer units offering more advanced capabilities.

Accounts payable increased from \$23.8 million at December 31, 2011 to \$27.2 million at June 30, 2012. The increase was primarily related to an increase in amounts accrued for the purchase of revenue equipment.

Accrued expenses and other liabilities increased from \$9.7 million at December 31, 2011 to \$18.0 million at June 30, 2012. The increase was primarily related to an increase in amounts borrowed under the Company's investment margin account. The Company periodically uses this margin account for the purchase of marketable equity securities and as a source of short-term liquidity. Also contributing to the increase was an increase in amounts accrued at the end of the period for employee wages and benefits which can vary significantly throughout the year depending on many factors, including the timing of the actual date employees are paid in relation to the last day of the reporting period.

Table of contents

20

Current maturities of long term-debt and long-term debt fluctuations are reviewed on an aggregate basis as the classification of amounts in each category are typically affected merely by the passage of time. Current maturities of long-term debt and long-term debt, on an aggregate basis, increased from \$61.6 million at December 31, 2011 to \$74.3 million at June 30, 2012. The increase was related to additional borrowings received during the first six months of 2012 net of the principal portion of scheduled installment note payments made during the first six months of 2012.

NEW ACCOUNTING PRONOUNCEMENTS

See Note B to the condensed consolidated financial statements for a description of the most recent accounting pronouncements and their impact, if any, on the Company.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Our primary market risk exposures include equity price risk, interest rate risk, commodity price risk (the price paid to obtain diesel fuel for our trucks), and foreign currency exchange rate risk. The potential adverse impact of these risks and the general strategies we employ to manage such risks are discussed below.

The following sensitivity analyses do not consider the effects that an adverse change may have on the overall economy nor do they consider additional actions we may take to mitigate our exposure to such changes. Actual results of changes in prices or rates may differ materially from the hypothetical results described below.

Equity Price Risk

We hold certain actively traded marketable equity securities which subjects the Company to fluctuations in the fair market value of its investment portfolio based on the current market price of such securities. The recorded value of marketable equity securities decreased to \$19.1 million at June 30, 2012 from \$20.3 million at December 31, 2011. The decrease during the first six months of 2012 includes sales of equity securities with a cost basis of \$1.1 million and a decrease in the fair market value of \$0.1 million. A 10% decrease in the market price of our marketable equity securities would cause a corresponding 10% decrease in the carrying amounts of these securities, or approximately \$1.9 million. For additional information with respect to the marketable equity securities, see Note C to our condensed consolidated financial statements.

Interest Rate Risk

Our line of credit bears interest at a floating rate equal to LIBOR plus a fixed percentage. Accordingly, changes in LIBOR, which are affected by changes in interest rates, will affect the interest rate on, and therefore our costs under, the line of credit. Assuming \$1.0 million of variable rate debt was outstanding, a hypothetical 100 basis point increase in LIBOR for a one year period would result in approximately \$10,000 of additional interest expense.

Commodity Price Risk

Prices and availability of all petroleum products are subject to political, economic, and market factors that are generally outside of our control. Accordingly, the price and availability of diesel fuel, as well as other petroleum products, can be unpredictable. Because our operations are dependent upon diesel fuel, significant increases in diesel fuel costs could materially and adversely affect our results of operations and financial condition. Based upon our 2011 fuel consumption, a 10% increase in the average annual price per gallon of diesel fuel would increase our annual fuel expenses by \$12.5 million.

Foreign Currency Exchange Rate Risk

We are exposed to foreign currency exchange rate risk related to the activities of our branch office located in Mexico. Currently, we do not hedge our exchange rate exposure through any currency forward contracts, currency options, or currency swaps as all of our revenues, and substantially all of our expenses and capital expenditures, are transacted in U.S. dollars. However, certain operating expenditures and capital purchases related to our Mexico branch office are

incurred in or exposed to fluctuations in the exchange rate between the U.S. dollar and the Mexican peso. Based on 2011 expenditures denominated in pesos, a 10% increase in the exchange rate would increase our annual operating expenses by \$30,000.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures. Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Table of contents

21

Based on management's evaluation, our chief executive officer and chief financial officer concluded that, as of June 30, 2012, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in internal controls over financial reporting. We regularly review our system of internal control over financial reporting and make changes to our processes and systems to improve controls and increase efficiency, while ensuring that we maintain an effective internal control environment. Changes may include such activities as implementing new, more efficient systems, consolidating activities, and migrating processes.

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

The nature of our business routinely results in litigation, primarily involving claims for personal injuries and property damage incurred in the transportation of freight. We believe that all such routine litigation is adequately covered by insurance and that adverse results in one or more of those cases would not have a material adverse effect on our financial condition.
