The company is not a tax paying entity; thus there is no provision for federal or state income taxes recorded in the financial statements. The income of the company is allocated to the income interest members in accordance with the terms of the company's operating agreement and reported on their respective income tax returns.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The agreements contain covenants with respect to the maintenance of certain financial ratios, additional borrowings, and capital expenditures.
