Section 1 - Registrant’s Business and Operations

Item 1.01- Entry into a Material Definitive Agreement.

On July 7, 2009, our subsidiary, Embryome Sciences, Inc., entered into an agreement under which Millipore Corporation will become a worldwide distributor of ACTCellerate™ human progenitor cell lines. Millipore’s initial offering of Embryome Sciences’ products will include six novel progenitor cell lines and optimized ESpan™ growth media for the in vitro propagation of each progenitor cell line. The companies anticipate jointly launching 35 cell lines and associated ESpan™ growth media within the coming 12 months.

Derived from human embryonic stem cells but not fully differentiated into specific cell types, each ACTCellerate™ line provides a convenient, highly purified source of progenitor cells that may have applications in drug discovery, research, and the development of therapeutic products.

Millipore will be Embryome Sciences’ exclusive third party distributor of the products covered by the agreement, although Embryome Sciences retains the right to sell the products to its own customers. Embryome Sciences will provide the products to Millipore on consignment and will be paid on a quarterly basis for products sold. Embryome Sciences will receive additional annual payments from Millipore, based on a percentage of annual sales, if annual sales exceed certain milestone amounts.

The agreement will have a term of five years, subject to annual renewal if the parties so elect, and subject to Millipore’s right to terminate the agreement at any time upon 60 days notice. Either party may also terminate the agreement in the case of an uncured breach or default by the other party.
