EBITDA represents earnings before interest, taxes, depreciation, and amortization. EBITDA is presented here because it can be used as an indication of a company's ability to incur and service debt and is commonly used as an analytical indicator in our industry. EBITDA measures presented may not be comparable to similar titled measures used by other companies. EBITDA is not a measurement presented in accordance with United States generally accepted accounting principles, or GAAP, and we do not intend EBITDA to represent net income or cash flows from operations as defined by GAAP. You should not consider EBITDA to be an alternative to net income, cash flows from operations or any other items calculated in accordance with GAAP or an indicator of our operating performance.
