Citigroup Global  
Markets Holdings Inc.

**Registration Statement Nos. 333-216372 and 333-216372-01**

**Autocallable Contingent Coupon Equity Linked Securities Based on the Worst Performing of the EURO STOXX 50® Index and the Russell 2000® Index Due October-----, 2019 Filed Pursuant to Rule 433**

Overview. The securities are unsecured senior debt securities issued by Citigroup Global Markets Holdings Inc. and guaranteed by Citigroup Inc. The securities offer the potential for quarterly contingent coupon payments at an annualized rate that, if all are paid, would produce a yield that is generally higher than the yield on our conventional debt securities of the same maturity. In exchange for this higher potential yield, you must be willing to accept the risks that (i) your actual yield may be lower than the yield on our conventional debt securities of the same maturity because you may not receive one or more, or any, contingent coupon payments; (ii) your actual yield may be negative because you may receive significantly less than the stated principal amount of your securities, and possibly nothing, at maturity; and (iii) the securities may be automatically redeemed prior to maturity. Each of these risks will depend on the performance of the worst performing of the EURO STOXX 50® Index and the Russell 2000® Index (each, an “underlying index”), as described below. You will be subject to risks associated with both underlying indices and will be negatively affected by adverse movements in either underlying index regardless of the performance of the other underlying index. Although you will be exposed to downside risk with respect to the worst performing underlying index, you will not participate in any appreciation of either underlying index or receive any dividends paid on the stocks included in either underlying index.

All payments on the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. The securities will not be listed on any securities exchange and may have limited or no liquidity.

**Selected Risk Considerations**

You may lose some or all of your investment. If the securities are not automatically redeemed prior to maturity and a knock-in event has occurred, you will be fully exposed to any depreciation of the worst performing underlying index. If a knock-in event has occurred, you will lose 1% of the stated principal amount of the securities for every 1% by which the worst performing underlying index has declined from its initial index level, regardless of the performance of the other underlying index. There is no minimum payment at maturity on the securities, and you may lose up to all of your investment.

The securities do not pay interest.

You will not receive any contingent coupon payment for any quarter in which the closing level of the worst performing underlying index is less than the applicable coupon barrier level on the related valuation date.

You will not benefit in any way from the performance of the better performing underlying index. You will be subject to risks relating to the relationship between the underlying indices.

The securities may be automatically called prior to maturity, limiting your opportunity to receive contingent coupon payments.

The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If we default on our obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.

The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.

The estimated value of the securities on the pricing date will be less than the issue price. For more information about the estimated value of the securities, see the accompanying preliminary pricing supplement.

The value of the securities prior to maturity will fluctuate based on many unpredictable factors.
