THE CHUBB CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1) General

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles and include the accounts of The Chubb Corporation and its subsidiaries (collectively, the Corporation). Significant intercompany transactions have been eliminated in consolidation.

The amounts included in this report are unaudited but include those adjustments, consisting of normal recurring items, which management considers necessary for a fair presentation. These consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes in the Notes to Consolidated Financial Statements included in the Corporation's 2004 Annual Report on Form 10-K.

2) Investments

Short term investments, which have an original maturity of one year or less, are carried at amortized cost which approximates market value. Fixed maturities classified as held-to-maturity are carried at amortized cost. Fixed maturities classified as available-for-sale and equity securities are carried at market value as of the balance sheet date.

The net change in unrealized appreciation of investments carried at market value was as follows:

	Three Months Ended March 31	
	----- 2005	2004 -----
	(in millions)	
Change in unrealized appreciation of equity securities	\$ (12.4)	\$ 33.8
Change in unrealized appreciation of fixed maturities	(403.6)	157.9
	-----	-----
Deferred income tax (credit)	(416.0)	191.7
	(145.6)	67.2
	-----	-----
Change in unrealized appreciation of investments, net	\$ (270.4)	\$124.5
	=====	=====

3) Income Tax

In connection with the sale of a subsidiary a number of years ago, the Corporation agreed to indemnify the buyer for certain pre-closing tax liabilities. During the first three months of 2005, this obligation was settled with the purchaser. Accordingly, the income tax liability was reduced, which resulted in the recognition of a tax benefit of \$22 million.

4) Segments Information

The principal business of the Corporation is property and casualty insurance. The profitability of the property and casualty insurance business depends on the results of both underwriting operations and investments, which are viewed as two distinct operations. The underwriting operations are managed and evaluated separately from the investment function.

The reporting format for property and casualty underwriting results by business unit has been changed to more closely reflect the way the business is now managed. Prior period amounts have been reclassified to conform with the new presentation.

The property and casualty underwriting operations consist of four separate business units: personal insurance, commercial insurance, specialty insurance and reinsurance assumed. The personal segment targets the personal insurance market. The personal classes include automobile, homeowners and other personal coverages. The commercial segment includes those classes of business that are generally available in broad markets and are of a more commodity nature. Commercial classes include multiple peril, casualty, workers' compensation and property and marine. The specialty segment includes those classes of business that are available in more limited markets since they require specialized underwriting and claim settlement. Specialty classes include professional liability coverages and surety. Reinsurance assumed includes the business produced by Chubb Re.

Chubb Financial Solutions' non-insurance business was primarily structured credit derivatives, principally as a counterparty in portfolio credit default swap contracts. The Corporation has implemented a plan to exit the credit derivatives business.

Corporate and other includes investment income earned on corporate invested assets, corporate expenses and the Corporation's real estate and other non-insurance subsidiaries.

Revenues and income before income tax of the operating segments were as follows:

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations for the Quarters Ended March 31, 2005 and 2004

Certain statements in this document are "forward-looking statements" as that term is defined in the Private Securities Litigation Reform Act of 1995 (PSLRA). These forward-looking statements are made pursuant to the safe harbor provisions of the PSLRA and include estimates and assumptions related to economic, competitive, regulatory, judicial, legislative and other developments. These include statements relating to trends in, or representing management's beliefs about, our future strategies, operations and financial results, as well as other statements that include words such as "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "should," "will," or other similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning trends and future developments and their potential effects on us. These statements are not guarantees of future performance. Actual results may differ materially from those suggested by forward-looking statements as a result of risks and uncertainties, which include, among others, those discussed or identified from time to time in our public filings with the Securities and Exchange Commission and those associated with:

Edgar Filing: CHUBB CORP - Form 10-Q

- the availability of primary and reinsurance coverage, including the implications relating to terrorism legislation and regulation;
 - global political conditions and the occurrence of any terrorist attacks, including any nuclear, biological, chemical or radiological events;
 - the effects of outbreak or escalation of war or hostilities;
 - premium pricing and profitability or growth estimates overall or by lines of business or geographic area, and related expectations with respect to the timing and terms of any required regulatory approvals;
 - adverse changes in loss cost trends;
 - our ability to retain existing business;
 - our expectations with respect to cash flow projections and investment income and with respect to other income;
 - the adequacy of loss reserves including:
 - our expectations relating to reinsurance recoverables;
 - the effects of proposed asbestos liability legislation, including the impact of claims patterns arising from the possibility of legislation and those that may arise if legislation is not passed;
 - our estimates relating to ultimate asbestos liabilities;
 - the impact from the bankruptcy protection sought by various asbestos producers and other related businesses;
 - the willingness of parties, including us, to settle disputes;
 - developments in judicial decisions or regulatory or legislative actions relating to coverage and liability for asbestos, toxic waste and mold claims;
 - development of new theories of liability;
- Page 10
- the impact of economic factors on companies on whose behalf we have issued surety bonds, and, in particular, on those companies that have filed for bankruptcy or otherwise experienced deterioration in creditworthiness;
 - the effects of disclosures by, and investigations of, public companies relating to possible accounting irregularities, practices in the financial services industry and other corporate governance issues, including:
 - the effects on the capital markets and the markets for directors and officers and errors and omissions insurance;
 - claims and litigation arising out of actual or alleged accounting or other corporate malfeasance by other companies;
 - claims and litigation arising out of practices in the financial services industry;

Edgar Filing: CHUBB CORP - Form 10-Q

- legislative or regulatory proposals or changes, including the changes in law and regulation implemented under the Sarbanes-Oxley Act of 2002;
- the effects of investigations into market practices in the U.S. property and casualty insurance industry and any legal or regulatory proceedings arising therefrom;
- the occurrence of significant weather-related or other natural or human-made disasters, particularly in locations where we have concentrations of risk;
- any downgrade in our claims-paying, financial strength or other credit ratings;
- the ability of our subsidiaries to pay us dividends;
- general economic conditions including:
 - changes in interest rates, market credit spreads and the performance of the financial markets, generally and as they relate to credit risks assumed by our Chubb Financial Solutions unit in particular;
 - the effects of inflation;
 - changes in domestic and foreign laws, regulations and taxes;
 - changes in competition and pricing environments;
 - regional or general changes in asset valuations;
 - the inability to reinsure certain risks economically;
 - changes in the litigation environment;
 - general market conditions; and
- our ability to implement management's strategic plans and initiatives.

The Corporation assumes no obligation to update any forward looking information set forth in this document, which speak as of the date hereof.

Page 11

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The consolidated financial statements include amounts based on informed estimates and judgments of management for those transactions that are not yet complete. Such estimates and judgments affect the reported amounts in the financial statements. Those estimates and judgments that were most critical to the preparation of the financial statements involved the adequacy of loss reserves and the recoverability of related reinsurance recoverables, the fair value of future obligations under financial products contracts and the recoverability of the carrying value of real estate properties. These estimates and judgments, which are discussed within the following analysis of our results of operations, require the use of assumptions about matters that are highly uncertain and therefore are subject to change as facts and circumstances develop. If different estimates and judgments had been applied, materially different amounts might have been reported in the financial statements.

Edgar Filing: CHUBB CORP - Form 10-Q

EXECUTIVE SUMMARY

The following highlights do not address all of the matters covered in the other sections of Management's Discussion and Analysis of Financial Condition and Results of Operations or contain all of the information that may be important to the Corporation's shareholders or the investing public. This summary should be read in conjunction with the other sections of Management's Discussion and Analysis of Financial Condition and Results of Operations.

- Net income was \$470 million in the first quarter of 2005 compared with \$361 million in the comparable period of 2004.
- Premium growth was 1% in the first quarter of 2005, reflecting modest growth in our insurance business and a decrease in written premiums in our reinsurance assumed business. We maintained underwriting discipline in a more competitive market environment. Rates were generally stable in most classes of business.
- Underwriting results were highly profitable as evidenced by the combined loss and expense ratio of 89.4% in the first quarter of 2005 compared with 92.6% in the corresponding 2004 quarter.
- Property and casualty investment income after taxes increased by 14% in the first quarter of 2005.

Page 12

A summary of our consolidated net income is as follows:

	Quarter Ended March 31	
	2005	2004
	----	----
	(in millions)	
Property and Casualty Insurance.....	\$ 629	\$ 455
Chubb Financial Solutions Non-Insurance Business.....	-	(14)
Corporate and Other.....	(62)	(33)
Realized Investment Gains.....	45	81
	-----	-----
Consolidated Income Before Income Tax.....	612	489
Federal and Foreign Income Tax.....	142	128
	-----	-----
Consolidated Net Income.....	\$ 470	\$ 361
	=====	=====

Net income included realized investment gains after tax of \$29 million in the first quarter of 2005 and \$53 million in the first quarter of 2004. Decisions to sell securities are governed principally by considerations of investment opportunities and tax consequences. As a result, realized gains and losses on the sale of investments may vary significantly from period to period.

PROPERTY AND CASUALTY INSURANCE

A summary of the results of operations of our property and casualty insurance business is as follows:

Edgar Filing: CHUBB CORP - Form 10-Q

	=====	=====
Property and Casualty Investment Income After Tax	\$ 252	\$ 222
	=====	=====

Page 13

Earnings from our property and casualty business were significantly higher in the first quarter of 2005 compared with the same period of 2004.

Underwriting income was substantially higher in the first quarter of 2005 due primarily to improvement in our personal insurance business. Our commercial insurance business produced exceptionally strong results in the first quarter of 2005 and 2004.

Investment income also increased significantly in the first quarter of 2005 compared with 2004.

The profitability of the property and casualty insurance business depends on the results of both underwriting operations and investments. We view these as two distinct operations. The underwriting functions are managed separately from the investment function. Accordingly, in assessing our performance, management evaluates underwriting results separately from investment results.

UNDERWRITING RESULTS

We evaluate the underwriting results of our property and casualty insurance business in the aggregate and also for each of our business units.

The combined loss and expense ratio, expressed as a percentage, is the key measure of underwriting profitability traditionally used in the property and casualty insurance business. Management evaluates the performance of our

Edgar Filing: CHUBB CORP - Form 10-Q

underwriting operations and of each of our business units using, among other measures, the combined loss and expense ratio calculated in accordance with statutory accounting principles. It is the sum of the ratio of losses and loss expenses to premiums earned (loss ratio) plus the ratio of underwriting expenses to premiums written (expense ratio) after reducing both premium amounts by dividends to policyholders. When the combined ratio is under 100%, underwriting results are generally considered profitable; when the combined ratio is over 100%, underwriting results are generally considered unprofitable.

Statutory accounting principles applicable to property and casualty insurance companies differ in certain respects from generally accepted accounting principles (GAAP). Under statutory accounting principles, policy acquisition and other underwriting expenses are recognized immediately, not at the time premiums are earned. Management uses underwriting results determined in accordance with GAAP, among other measures, to assess the overall performance of our underwriting operations. To convert underwriting results to a GAAP basis, policy acquisition expenses are deferred and amortized over the period in which the related premiums are earned. Underwriting income determined in accordance with GAAP is defined as premiums earned less losses and loss expenses incurred and GAAP underwriting expenses incurred.

Net Premiums Written

Property and casualty net premiums written were \$3.1 billion in the first quarter of 2005, an increase of 1% compared with the first quarter of 2004.

Insurance premiums grew 3% in the first quarter of 2005 compared with the same period of 2004. Over 75% of our insurance premiums are written in the United States. Insurance premiums in the U.S. grew by 1% in the first quarter. Insurance premiums outside the U.S. grew 7% on a reported basis and 3% in local currencies.

Page 14

We experienced modest premium growth in the first quarter in each of our insurance business units, while maintaining underwriting discipline in a more competitive market environment. Rates were generally stable in most classes of business. We continued to retain a high percentage of our existing customers and to find opportunities to write new business at adequate rates. We expect that pricing pressure will continue throughout 2005.

As expected, reinsurance assumed premiums generated by Chubb Re decreased by 12% in the first quarter compared with the same period of 2004.

Reinsurance Ceded

Our premiums written are net of amounts ceded to reinsurers who assume a portion of the risk under the insurance policies that are subject to the reinsurance. After several years of significant price increases, the cost of reinsurance in the marketplace has leveled off. However, the reinsurance capacity for certain coverages, such as terrorism, continues to be limited and expensive.

We expect our reinsurance costs in 2005 to be less than those in 2004. In January 2005, we discontinued our executive protection per risk treaty. Underwriting actions we have taken in recent years have resulted in lower average limits on those large risks we write, which we believe made this treaty no longer economical. On our casualty clash treaty, which operates like a catastrophe treaty, we increased our retention from \$50 million to \$75 million. This treaty now provides \$125 million of coverage in excess of \$75 million per insured event. We did not renew a high excess surety per risk treaty as we

Edgar Filing: CHUBB CORP - Form 10-Q

believe the cost was not justified.

Our property reinsurance program was renewed in April 2005. On the property per risk treaty, our retention remained at \$15 million. Our property catastrophe treaty for events in the United States was modified to increase the coverage in the northeastern part of the country by \$100 million. The program now provides coverage of approximately 85% of losses between \$250 million and \$1.25 billion, with additional coverage of 80% of losses between \$1.25 billion and \$1.6 billion in the northeastern part of the country. Our property catastrophe treaty for events outside the United States was modified to increase our retention from \$25 million to \$50 million.

Our property reinsurance treaties generally contain terrorism exclusions. Since September 2001, we have changed our underwriting protocols to address terrorism and the limited availability of terrorism reinsurance. However, given the uncertainty of the potential threats, we cannot be sure that we have addressed all the possibilities.

It is unclear at this time whether Congress will reauthorize the Terrorism Risk Insurance Act of 2002 (TRIA) for periods subsequent to December 31, 2005. Regardless of whether or not TRIA is extended, we will continue to manage this type of catastrophic risk by monitoring and controlling terrorism risk aggregations. Nevertheless, given the unpredictable nature of terrorism, its targets, frequency and severity as well as the limited terrorism coverage in our reinsurance program, our future operating results could be more volatile.

Profitability

Underwriting results were highly profitable in the first quarter of both 2005 and 2004. Our combined loss and expense ratio was 89.4% in the first quarter of 2005 compared with 92.6% in 2004.

Page 15

The loss ratio was 60.6% for the first quarter of 2005 compared with 62.5% in 2004. The improvement in the loss ratio in 2005 was due to lower catastrophe losses. Catastrophe losses during the first quarter of 2005 amounted to \$20 million which represented 0.6 of a percentage point of the loss ratio compared with \$97 million or 3.5 percentage points in 2004.

Our expense ratio decreased to 28.8% for the first quarter of 2005 from 30.1% in 2004 due to lower contingent commissions as well as a modest decrease in overhead expenses as we continued to make progress in reducing our cost structure.

We have not yet concluded the negotiations with our brokers and agents on 2005 commission arrangements. At this point, we continue to expect that total producer compensation in 2005 will be at about 2004 levels and we accrued at that rate in the first quarter of 2005. The lower contingent commissions in the first quarter of 2005 compared with the same period in 2004 was due largely to the fact that we accrued contingent commissions in the first quarter of 2004 at a higher rate in anticipation of high premium growth during 2004.

REVIEW OF UNDERWRITING RESULTS BY BUSINESS UNIT

The reporting format for property and casualty underwriting results by business unit has been changed to more closely reflect the way the business is now managed. Prior period amounts have been reclassified to conform with the new presentation.

The changes to the reporting format are as follows:

Edgar Filing: CHUBB CORP - Form 10-Q

Personal Insurance

- Valuable articles results, which have been included in other personal, are now included in homeowners.
- Accident results, which have been included in other specialty, are now included in other personal.

Commercial Insurance

- Commercial insurance results for financial institutions, which have been included in financial institutions results in specialty insurance, are now included in the appropriate commercial insurance lines.

Specialty Insurance

- Executive protection results are now combined with the professional liability and financial fidelity results for financial institutions into a new professional liability line. Financial institutions results are no longer reported separately.
- Surety results, which have been included in other specialty, are now reported separately within specialty insurance.

Reinsurance Assumed

- Reinsurance assumed results, which have been included in other specialty, are now reported as a separate business unit.

Page 16

Underwriting results during 2005 and 2004 by business unit were as follows:

	Net Premiums Written			Combined Loss and Expense Ratios	
	2005	2004	% Increase (Decrease)	2005	2004
	(in millions)

	=====	=====		=====	=====

Personal Insurance

Premiums from personal insurance coverages, which represent 25% of total premiums written, increased by 5% in the first quarter of 2005 compared with the same quarter in 2004. Premium growth was driven by our homeowners business due to increased insurance-to-value and, to a lesser extent, modestly higher rates and an increase in the in force policy count. The low growth in personal automobile premiums was due to our maintaining underwriting discipline in a more competitive marketplace. The decrease in other personal premiums was attributable to our accident business, due in large part to the non-renewal of one large account.

Our personal insurance business produced highly profitable underwriting results in the first quarter of 2005 compared with modestly profitable results in 2004. The combined loss and expense ratio was 84.5% in the first quarter of 2005 compared with 97.5% in 2004. Excluding catastrophe losses, the combined ratio was 83.1% and 87.3% in the first quarter of 2005 and 2004, respectively.

Homeowners results were highly profitable in 2005 compared with modestly unprofitable results in 2004. The improvement was due to lower catastrophe losses as well as better pricing and contract wording changes related to mold damage that we have implemented over the past few years. Catastrophe losses represented 2.6 and 16.8 percentage points of the loss ratio for this class in the first quarter of 2005 and 2004, respectively. The catastrophe losses in 2004 were primarily from severe winter weather in the northeastern part of the United States where we have a significant market presence.

Page 17

Our personal automobile business produced similarly profitable results in 2005 and 2004. This business continues to experience stable claim frequency and severity. Other personal coverages, which include excess liability, yacht and accident insurance, produced highly profitable results in both years due to favorable loss experience.

Commercial Insurance

Premiums from commercial insurance, which represent 44% of our total writings, increased by 2% in the first quarter of 2005 compared with the same period a year ago. Rates were flat in the first quarter of 2005 compared with the first quarter of 2004 as we continued to experience more competition in the marketplace. Retention levels in the first quarter of 2005 were slightly higher than those in the comparable period of 2004. New business volume was down from 2004 levels as competitors have worked to retain their better accounts. We continued to get favorable terms and conditions on business written. We expect that rates will be relatively stable through the remainder of 2005.

Edgar Filing: CHUBB CORP - Form 10-Q

Our commercial insurance business produced highly profitable underwriting results in the first quarter of 2005 and 2004. The combined loss and expense ratio was 84.0% for the first quarter of 2005 compared with 82.9% in 2004. These results reflect the cumulative effect of price increases, better terms and conditions and more stringent risk selection in recent years. Results in both years also benefited from low property losses.

Multiple peril results were highly profitable in 2005 and 2004. The property component of this business was exceptionally profitable in both years. Catastrophe losses represented 0.5 of a percentage point of the loss ratio for this class in the first quarter of 2005 compared with 3.9 percentage points in 2004.

Our casualty business produced less profitable results in 2005 compared with 2004. The primary liability and automobile components of this business were highly profitable in both years but more so in 2004. The excess liability component produced breakeven results in 2005 compared with modestly profitable results in 2004.

Workers' compensation results were highly profitable in 2005 and 2004 due in large part to our disciplined risk selection during the past several years.

Property and marine results were highly profitable in both years due to few severe losses. Catastrophe losses represented 1.3 percentage points of the loss ratio for this class in 2005 compared with 3.7 percentage points in 2004.

Specialty Insurance

Premiums from specialty insurance, which represent 23% of our total writings, increased by 1% in the first quarter of 2005 compared with the same period a year ago. Premium growth in the professional liability classes of business was constrained by the competitive pressure on rates and our commitment to maintain underwriting discipline. Rates for most classes were generally stable. However, rates in the for-profit directors and officers liability component were down, particularly for large public companies. New business volume in 2005 was similar to 2004 levels. In line with our strategy in recent years, we continue to focus on small and middle market publicly traded and privately held companies. Retention levels in 2005 were also similar to 2004 levels. We continued to get adequate rates and favorable terms and conditions on both new business and renewals.

Page 18

Our specialty insurance business produced unprofitable underwriting results in the first quarter of 2005 and 2004. The combined loss and expense ratio was 105.0% for the first quarter of 2005 compared with 103.7% in 2004.

Our professional liability results improved in 2005 but were modestly unprofitable. The improvement in 2005 was due to the cumulative effect of price increases, lower policy limits and better terms and conditions in recent years. Results in 2005 and 2004 were adversely affected by unfavorable development on loss reserves related to accident years 2002 and prior. The adverse development was due in large part to claims that have arisen due to corporate failures and allegations of management misconduct and accounting irregularities. The fidelity component of this business was highly profitable in both years but more so in 2005. Fidelity results in 2004 were adversely affected by several large losses outside the United States.

Surety results were highly unprofitable in 2005 compared with highly profitable results in 2004. Our surety business tends to be characterized by

Edgar Filing: CHUBB CORP - Form 10-Q

infrequent but potentially high severity losses. The unprofitable results in 2005 were due to one \$60 million loss.

Reinsurance Assumed

Premiums from our reinsurance assumed business generated by Chubb Re, which represent 8% of total premiums written, decreased by 12% in the first quarter of 2005 compared with the first quarter of 2004. The decrease in premiums was expected as there were fewer attractive opportunities in the reinsurance market.

Our reinsurance assumed business was highly profitable in the first quarter of 2005 and 2004, but more so in 2005. The combined loss and expense ratio was 88.0% in the first quarter of 2005 compared with 93.1% in 2004. The improvement in 2005 was largely the result of the favorable settlement of one loss.

LOSS RESERVES

Unpaid losses and loss expenses, also referred to as loss reserves, are the largest liability of our property and casualty subsidiaries.

Our loss reserves include the accumulation of individual case estimates for claims that have been reported and estimates of claims that have been incurred but not reported as well as estimates of the expenses associated with settling all reported and unreported claims. Estimates are based upon past loss experience modified for current trends as well as prevailing economic, legal and social conditions. Our loss reserves are not discounted to present value.

We continually review our loss reserves using a variety of statistical and actuarial techniques. We update the reserves as loss experience develops, additional claims are reported and new information becomes available. Any changes in estimates are reflected in operating results in the period in which the estimates are changed.

Page 19

Our loss reserves include significant amounts related to asbestos and toxic waste claims and the September 11, 2001 attack. The components of our loss reserves were as follows:

	March 31, 2005	December 31, 2004
	-----	-----
	(in millions)	
Gross loss reserves		
Related to asbestos and toxic waste claims.....	\$ 1,151	\$ 1,169
Related to September 11 attack.....	662	700
All other loss reserves.....	19,062	18,423
	-----	-----
	20,875	20,292
	-----	-----
Reinsurance recoverable		
Related to asbestos and toxic waste claims.....	53	55
Related to September 11 attack.....	581	582
All other reinsurance recoverable.....	2,922	2,846

Edgar Filing: CHUBB CORP - Form 10-Q

	----- 3,556 -----	----- 3,483 -----
Net loss reserves.....	\$17,319 =====	\$16,809 =====

Loss reserves, net of reinsurance recoverable, increased by \$510 million during the first quarter of 2005. The loss reserves related to asbestos and toxic waste claims and the September 11 attack are significant components of our total loss reserves, but they distort the growth trend in our loss reserves. Excluding such loss reserves, our loss reserves, net of reinsurance recoverable, increased by \$563 million during the first quarter of 2005.

The components of our net loss reserves were as follows:

	March 31, 2005 -----	December 31, 2004 -----
	(in millions)	
Reserves related to asbestos and toxic waste claims.....	\$ 1,098	\$ 1,114
Reserves related to September 11 attack...	81	118
All other loss reserves		
Personal insurance.....	1,606	1,579
Commercial insurance.....	6,829	6,596
Specialty insurance.....	6,512	6,280
Reinsurance assumed.....	1,193	1,122
	-----	-----
Net loss reserves.....	\$17,319 =====	\$16,809 =====

Loss reserves for each of our business units increased in the first quarter of 2005, with the most significant increases in the long tail liability classes of business within commercial and specialty insurance and reinsurance assumed. The relatively small increase in personal insurance loss reserves was due in part to a \$23 million reduction in unpaid claims related to catastrophes.

Page 20

Based on all information currently available, we believe that the aggregate loss reserves of our property and casualty subsidiaries at March 31, 2005 were adequate to cover claims for losses that had occurred, including both those known to us and those yet to be reported. In establishing such reserves, we consider facts currently known and the present state of the law and coverage litigation. However, given the judicial decisions and legislative actions that have broadened the scope of coverage and expanded theories of liability in the past and the possibilities of similar interpretations in the future, particularly as they relate to asbestos claims and, to a lesser extent, toxic waste claims, it is possible that management's estimate of the ultimate liability for losses that had occurred as of March 31, 2005 may increase in future periods. Such increases in estimates could have a material adverse effect on the Corporation's future operating results. However, management does not expect that any such increases would have a material effect on the Corporation's consolidated financial condition or liquidity.

INVESTMENT RESULTS

Edgar Filing: CHUBB CORP - Form 10-Q

Property and casualty investment income before taxes increased by 13% in the first quarter of 2005 compared with the same period in 2004. Growth was due to an increase in invested assets since the first quarter of 2004. The increase in invested assets was due to substantial cash flow from operations over the period. Growth in investment income in 2005 was dampened, however, by lower available reinvestment rates on fixed maturities that matured over the past year.

The effective tax rate on investment income was 19.5% in the first quarter of 2005 compared with 20.1% in the comparable period in 2004. The effective tax rate fluctuates as a result of our holding a different proportion of our investment portfolio in tax-exempt securities during each period.

On an after-tax basis, property and casualty investment income increased by 14% in the first quarter of 2005. Management uses property and casualty investment income after-tax, a non-GAAP financial measure, to evaluate its investment performance because it reflects the impact of any change in the proportion of the investment portfolio invested in tax-exempt securities and is therefore more meaningful for analysis purposes than investment income before income tax.

CHUBB FINANCIAL SOLUTIONS

Chubb Financial Solutions (CFS) was organized in 2000 to develop and provide customized products to address specific financial needs of corporate clients. CFS operated through both the capital and insurance markets.

In April 2003, the Corporation announced its intention to exit CFS's non-insurance business and to run-off the existing financial products portfolio.

CFS's non-insurance business was primarily structured credit derivatives, principally as a counterparty in portfolio credit default swap contracts. The Corporation guaranteed all of these obligations.

Page 21

Portfolio credit default swaps are derivatives and are carried in the financial statements at estimated fair value, which represents management's best estimate of the cost to exit our positions. Most of these credit default swaps tend to be unique transactions and there is no market for trading such exposures. To estimate the fair value of the obligation in each credit default swap, we use internal valuation models that are similar to external valuation models.

The fair value of our credit default swaps is subject to fluctuations arising from, among other factors, changes in credit spreads, the financial ratings of referenced asset-backed securities, actual credit events reducing subordination, credit correlation within a portfolio, anticipated recovery rates related to potential defaults and changes in interest rates. Changes in fair value are included in income in the period of the change.

The non-insurance business of CFS produced breakeven results in the first quarter of 2005 compared with a loss before taxes of \$14 million in the comparable period of 2004. The loss in the first quarter of 2004 was primarily related to the termination during the quarter of CFS's obligations under certain portfolio credit default swaps.

CFS's aggregate exposure, or retained risk, from each of its in-force portfolio credit default swaps is referred to as notional amount. Notional amounts are used to express the extent of involvement in swap transactions.

Edgar Filing: CHUBB CORP - Form 10-Q

These amounts are used to calculate the exchange of contractual cash flows and are not necessarily representative of the potential for gain or loss. The notional amounts are not recorded on the balance sheet.

The notional amount of CFS's credit default swaps was \$8.2 billion at March 31, 2005. Our realistic loss exposure is a very small portion of the \$8.2 billion notional amount as our position is senior to subordinated interests of \$5.3 billion in the aggregate. In addition, using our internal ratings models, we estimate that the credit ratings of the individual portfolio credit default swaps at March 31, 2005 were AAA.

In addition to portfolio credit default swaps, CFS entered into a derivative contract linked to an equity market index and a few other insignificant non-insurance transactions.

The notional amount and fair value of our future obligations under derivative contracts by type of risk were as follows:

	Notional Amount		Fair Value	
	March 31, 2005	December 31, 2004	March 31, 2005	December 31, 2004
	(in billions)		(in millions)	
Credit default swaps				
Corporate securities....	\$1.0	\$1.3	\$ 5	\$ 5
Asset-backed securities.	7.2	7.4	8	9
	-----	-----	---	---
	8.2	8.7	13	14
Other.....	.3	.3	8	8
	-----	-----	---	---
	\$8.5	\$9.0	\$21	\$22
	=====	=====	===	===

Page 22

In the fourth quarter of 2003, CFS terminated two asset-backed portfolio credit default swaps that had experienced deterioration in credit quality and simultaneously entered into a new contract that guaranteed principal and interest obligations. The Corporation has guaranteed CFS's obligations under the new contract. CFS's potential payment obligation extends to the date when the last of the underlying obligations expires. At March 31, 2005, the remaining notional amount of referenced securities was \$1.8 billion. Under the new agreement, CFS's maximum potential payment obligation is limited to \$500 million regardless of the amount of losses that might be incurred on the \$1.8 billion of referenced securities. Moreover, if losses are incurred, CFS's payment obligations are limited to an extended payment schedule under which no payment would be due until 2010 at the earliest.

CFS established a liability of \$186 million related to the principal and interest contract, which represented the estimated fair value of the guarantee at its inception. The principal and interest guarantee is not a derivative contract. Therefore, the liability related to this contract is not marked-to-market each period and remained at \$186 million at March 31, 2005. Due to the nature of the guarantee, we will reduce this liability only upon either the expiration or settlement of the guarantee. If actual losses are incurred, a liability for the losses will be established, and a portion of the guarantee

Edgar Filing: CHUBB CORP - Form 10-Q

liability will be released. The amount released will depend on our evaluation of expected ultimate loss experience.

CORPORATE AND OTHER

Corporate and other includes investment income earned on corporate invested assets, interest expense and other expenses not allocated to the operating subsidiaries and the results of our real estate and other non-insurance subsidiaries. It also includes income from our investment in Allied World Assurance Company, Ltd.

Corporate and other produced a loss before taxes of \$62 million in the first quarter of 2005 compared with a loss of \$33 million in the first quarter of 2004. The significantly higher loss in 2005 was due to the recognition of a real estate impairment loss, which is discussed below. Results in the first quarter of 2004 included a loss at The Chubb Institute, Inc., our post-secondary educational subsidiary, which we sold in the third quarter of 2004.

REAL ESTATE

Real estate operations resulted in a loss before taxes of \$43 million in the first quarter of 2005 compared with a loss of \$5 million in the same period in 2004, which amounts are included in the corporate and other results.

During the first quarter of 2005, we committed to a plan to sell a parcel of land in New Jersey that we had previously intended to hold and develop. The decision to sell the property was based on our assessment of the current real estate market and our concern about zoning issues. As a result of our decision to sell this property in the near term, we reassessed the recoverability of its carrying value. Based on our reassessment, we recognized an impairment loss of \$43 million to reduce the carrying value of the property to its estimated fair value.

Page 23

In addition to the aforementioned parcel of land that we plan to dispose of in the near term, we own approximately \$190 million of land that we expect will be developed in the future. Our real estate assets also include approximately \$155 million of commercial properties and land parcels under lease, of which \$22 million relates to a variable interest entity in which we are the primary beneficiary.

The recoverability of the carrying value of our real estate assets, other than the parcel of land that we plan to dispose of in the near term, is assessed based on our ability to fully recover costs through a future revenue stream. The assumptions used reflect future improvement in demand for office space, an increase in rental rates and the ability and intent to obtain financing in order to hold and develop such remaining properties and protect our interests over the long term. Management believes that it has made adequate provisions for impairment of real estate assets. However, if the assets are not sold or developed or if leased properties do not perform as presently contemplated, it is possible that additional impairment losses may be recognized that would have a material adverse effect on the Corporation's results of operations.

REALIZED INVESTMENT GAINS AND LOSSES

Net investment gains realized were as follows:

Quarter Ended March 31

Edgar Filing: CHUBB CORP - Form 10-Q

	2005	2004
	(in millions)	
Net realized gains (losses)		
Equity securities.....	\$52	\$56
Fixed maturities.....	(7)	25
	---	---
Realized investment gains before tax...	\$45	\$81
	===	===
Realized investment gains after tax....	\$29	\$53
	===	===

Of the net realized gains on sales of equity securities, \$47 million and \$46 million in the first quarter of 2005 and 2004, respectively, related to our share of gains recognized by investment partnerships in which we have an interest.

We regularly review those invested assets whose fair value is less than cost to determine if an other than temporary decline in value has occurred. In evaluating whether a decline in value of any investment is other than temporary, we consider various quantitative and qualitative factors including the length of time and the extent to which the fair value has been less than the cost, the financial condition and near term prospects of the issuer, whether the issuer is current on contractually obligated interest and principal payments, and our intent and ability to hold the investment for a period of time sufficient to allow us to recover our cost. If a decline in the fair value of an individual security is deemed to be other than temporary, the difference between cost and estimated fair value is charged to income as a realized investment loss. The fair value of the investment becomes its new cost basis. There were no other than temporary impairment writedowns in the first quarter of 2005 or 2004.

Page 24

INCOME TAXES

In connection with the sale of a subsidiary a number of years ago, we agreed to indemnify the buyer for certain pre-closing tax liabilities. During the first quarter of 2005, we settled this obligation with the purchaser. Accordingly, we reduced our income tax liability, which resulted in the recognition of a benefit of \$22 million.

CAPITAL RESOURCES AND LIQUIDITY

Capital resources and liquidity represent the overall financial strength of the Corporation and its ability to generate cash flows from its operating subsidiaries, borrow funds at competitive rates and raise new capital to meet operating and growth needs.

CAPITAL RESOURCES

Capital resources provide protection for policyholders, furnish the financial strength to support the business of underwriting insurance risks and facilitate continued business growth. At March 31, 2005, the Corporation had shareholders' equity of \$10.4 billion and total debt of \$2.8 billion.

Management continuously monitors the amount of capital resources that the Corporation maintains both for itself and its operating subsidiaries. In connection with our long-term capital strategy, the Corporation from time to

Edgar Filing: CHUBB CORP - Form 10-Q

time contributes capital to its property and casualty subsidiaries. In addition, in order to satisfy its capital needs as a result of any rating agency capital adequacy or other future rating issues, or in the event the Corporation were to need additional capital to make strategic investments in light of market opportunities, the Corporation may take a variety of actions, which could include the issuance of additional debt and/or equity securities.

In June 2003, a shelf registration statement that the Corporation filed in March 2003 was declared effective by the Securities and Exchange Commission. Under the registration statement, up to \$2.5 billion of various types of securities may be issued. At March 31, 2005, the Corporation had approximately \$650 million remaining under the shelf registration statement.

In July 1998, the Board of Directors authorized the repurchase of up to 12,500,000 shares of the Corporation's common stock. The authorization has no expiration. The Corporation made no share repurchases during the first quarter of 2005. As of March 31, 2005, 3,287,100 shares remained under the share repurchase authorization.

RATINGS

The Corporation and its insurance subsidiaries are rated by major rating agencies. These ratings reflect the rating agency's opinion of our financial strength, operating performance, strategic position and ability to meet our obligations to policyholders.

Ratings are an important factor in establishing our competitive position in the insurance markets. There can be no assurance that our ratings will continue for any given period of time or that they will not be changed.

Page 25

It is possible that positive or negative ratings actions by one or more of the rating agencies may occur in the future. If our ratings were downgraded, the Corporation may incur higher borrowing costs and may have more limited means to access capital. In addition, reductions in our ratings could adversely affect the competitive position of our insurance operations, including a possible reduction in demand for our products in certain markets.

LIQUIDITY

Liquidity is a measure of our ability to generate sufficient cash flows to meet the short and long term cash requirements of our business operations.

Our property and casualty operations provide liquidity in that premiums are generally received months or even years before losses are paid under the policies purchased by such premiums. Historically, cash receipts from operations, consisting of insurance premiums and investment income, have provided more than sufficient funds to pay losses, operating expenses and dividends to the Corporation. After satisfying our cash requirements, excess cash flows are used to build the investment portfolio and thereby increase future investment income.

New cash from operations available for investment by the property and casualty subsidiaries was approximately \$900 million in the first quarter of 2005 compared with \$825 million in the same period in 2004.

Our property and casualty subsidiaries maintain investments in highly liquid, short-term and other marketable securities to provide for immediate cash needs.

Edgar Filing: CHUBB CORP - Form 10-Q

The Corporation's liquidity requirements in the past have been met by dividends from its property and casualty subsidiaries and the issuance of commercial paper and debt and equity securities. It is expected that our liquidity requirements in the future will be met by these sources of funds or, if necessary, borrowings from our credit facilities.

INVESTED ASSETS

The main objectives in managing our investment portfolios are to maximize after-tax investment income and total investment returns while minimizing credit risks in order to provide maximum support to the insurance underwriting operations. Investment strategies are developed based on many factors including underwriting results and our resulting tax position, regulatory requirements, fluctuations in interest rates and consideration of other market risks. Investment decisions are centrally managed by investment professionals based on guidelines established by management and approved by the boards of directors.

Our investment portfolios are primarily comprised of high quality bonds, principally tax-exempt, U.S. Treasury and government agency, mortgage-backed securities and corporate issues as well as foreign bonds that support our international operations. In addition, the portfolios include equity securities held primarily with the objective of capital appreciation.

In the first quarter of 2005, we invested new cash in tax-exempt bonds and, to a lesser extent, taxable bonds and equity securities. Taxable bonds we invested in were primarily mortgage-backed securities and corporate bonds. Our objective is to achieve the appropriate mix of taxable and tax-exempt securities in our portfolio to balance both investment and tax strategies.

Page 26

The unrealized appreciation before tax of investments carried at market value, which includes fixed maturities classified as available-for-sale and equity securities, was \$545 million and \$961 million at March 31, 2005 and December 31, 2004, respectively. Such unrealized appreciation is reflected in a separate component of other comprehensive income, net of applicable deferred income tax.

The unrealized market appreciation before tax of those fixed maturities carried at amortized cost was \$17 million at March 31, 2005 and \$21 million at December 31, 2004. Such unrealized appreciation was not reflected in the consolidated financial statements.

Changes in unrealized market appreciation or depreciation of fixed maturities were due primarily to fluctuations in interest rates.

Item 4 - Controls and Procedures

As of March 31, 2005, an evaluation of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures was performed under the supervision and with the participation of the Corporation's management, including the chief executive officer and chief financial officer. Based on that evaluation, the chief executive officer and chief financial officer concluded that the Corporation's disclosure controls and procedures were effective as of the evaluation date.

During the three month period ended March 31, 2005, there were no changes in internal control over financial reporting that have materially affected, or

Edgar Filing: CHUBB CORP - Form 10-Q

are reasonably likely to materially affect, the Corporation's internal control over financial reporting.
