Earnings Release Q3 2010

April 1 to June 30, 2010

Munich, Germany, July 29, 2010

Topline Growth, Record Sectors Profit

Orders grow in all three Sectors and all three regions

Total Sectors profit climbs 40%

Peter Löscher, President and Chief Executive Officer of Siemens AG

Siemens gained further momentum in the third quarter, said Siemens CEO Peter Löscher.

Such order growth last occurred in 2008.

Strong demand took our order backlog to a record level. At the same

time, Sectors profit reached its highest point ever, and will clearly exceed the level of the prior year.

<u>Outlook</u>	13
<u>Note and Disclaimer</u>	14

Financial Highlights:

For the first time in more than a year, both revenue and orders increased year-over-year. Revenue also increased sequentially for the second quarter in a row.

Orders of 20.871 billion were up 22% compared to the prior-year quarter (16% organically), including order growth in all three Sectors and all three reporting regions. The combined order backlog for the Sectors hit a new high of 89 billion.

Revenue of 19.170 billion was 4% higher (level organically), despite substantial order declines throughout the prior fiscal year.

Total Sectors profit for the quarter rose 40% year-over-year, to a record high 2.331 billion.

Income from continuing operations was 1.441 billion (basic EPS 1.63), up 18% from the third quarter a year earlier, and net income of 1.435 billion (basic EPS 1.62) was 9% higher.

Free cash flow from continuing operations improved substantially, to 2.145 billion from 1.064 billion in the third quarter a year ago.

Table of Contents

Siemens 2

Orders and Revenue**Strong order growth lifts****backlog to new high**

All Sectors delivered topline growth in the third quarter, particularly including Siemens' short-cycle businesses. Orders climbed 22%, the first quarterly increase in new orders compared to a prior-year period in more than a year. Revenue rose more modestly at 4%, due to lower order intake during prior periods. Both order and revenue growth benefited from currency translation effects. On an organic basis, excluding currency translation and portfolio effects, orders rose 16% and revenue came in level with the prior-year quarter. The combined book-to-bill ratio for the Sectors was 1.10, and their combined order backlog increased to a record-high \$89 billion, which also includes positive currency translation effects.

Sequential revenue growth**continues in all Sectors**

Revenue in Industry rose 7% compared to the prior-year period on higher sales in five of the Sector's six Divisions. Healthcare revenue increased 10% year-over-year with contributions from all Divisions. Reported revenue in Energy came in just above the prior-year level. All three Sectors posted their second straight quarter of sequential revenue growth in fiscal 2010.

On a geographic basis, higher revenue included double-digit increases in Asia, Australia and the Americas, again including strong growth in emerging markets. Within an overall decline in the region comprising Europe, the Commonwealth of Independent States, Africa and the Middle East (Europe/CAME), revenue rose 9% in Germany.

Double-digit order**growth in all Sectors**

Order intake increased in all Sectors, led by a 33% rise in Industry including double-digit growth in all Divisions. Energy reported order growth of 18%, due mainly to substantially higher volume from major orders. Healthcare also posted double-digit demand growth with all Divisions contributing to the increase.

Orders grew in all three regions. The Americas reported the sharpest increase, due in part to a number of large Energy contracts won during the quarter. Double-digit growth in Europe/CAME was led by Industry. Within an overall increase for Asia, Australia, orders came in lower in India due to a large power transmission order in the prior-year period.

Table of Contents

Siemens 3

Income and Profit**Record high for Total Sectors profit**

Total Sectors profit reached a new high of 2.331 billion in the third quarter, including profit increases in all three Sectors compared to the prior-year period. Energy remained the top earnings contributor, again executing well on its large order backlog. Industry produced high double-digit profit growth, due mainly to recovery of its short cycle businesses as well as tight cost management. Healthcare also posted high double-digit profit growth, in part because the prior-year period was burdened by charges of 128 million associated with particle therapy contracts.

Income climbs on strong rise in Total Sectors profit

Income from continuing operations for the third quarter rose 18% year-over-year, to 1.441 billion. Basic earnings per share (EPS) on a continuing basis rose to 1.63 from 1.35 a year earlier. Higher Total Sectors profit was the main driver of these increases. Corporate items and pensions for the third quarter improved year-over-year, and Centrally managed portfolio activities recorded a lower loss. These improvements were more than offset by significantly lower profit from Equity Investments, lower gains from disposals of real estate at Siemens Real Estate (SRE), a loss at Siemens IT Solutions and Services, and negative results from Corporate Treasury activities.

Net income rose to 1.435 billion in the third quarter. A year earlier, net income of 1.317 billion included 93 million in income from discontinued operations, which benefited from a 154 million effect related to the sale of a stake in the enterprise networks business. Basic EPS increased to 1.62 compared to 1.45 a year earlier.

Table of Contents

Siemens 4

Cash, Return on Capital Employed (ROCE), Pension Funded Status**Sectors generate substantial****increase in free cash flow**

Free cash flow at the Sector level climbed to 2.867 billion in the third quarter, taking Free cash flow from continuing operations up to 2.145 billion from 1.064 billion in the prior-year period.

Free cash flow from continuing operations rose on the strong increase in Total Sectors profit compared to the prior-year period and positive changes in net working capital. The current period included approximately 0.1 billion in outflows related to severance charges. The prior-year quarter included approximately 0.3 billion in outflows stemming from previous charges related to project reviews and structural initiatives as well as to SG&A reduction. The cash conversion rate climbed to 1.49 compared to 0.87 in the same quarter a year earlier.

ROCE rises on higher income

On a continuing basis, return on capital employed (ROCE) rose to 14.2% from 11.7% in the third quarter a year earlier. The increase was due mainly to higher income from continuing operations. To a lesser extent, ROCE improved on a decline in average capital employed.

Pension underfunding increases

The estimated underfunding of Siemens' principal pension plans as of June 30, 2010, amounted to approximately 6.1 billion, compared to an underfunding of approximately 4.0 billion at the end of fiscal 2009 and approximately 4.6 billion at the end of the second quarter.

The decline in funded status since March 31, 2010 is due primarily to an increase in Siemens' defined benefit obligation (DBO) and, to a minor extent, a negative return on plan assets. The DBO rose due to a decrease in the discount rate assumption as of June 30, 2010 as well as with accrued service and interest costs. While the change in funded status generally does not affect earnings for the current fiscal year, it affects Other comprehensive income within equity on the balance sheet.

Table of Contents

Sectors 5

Industry Sector**Broad-based growth,
strong profit performance**

Industry clearly increased its third-quarter profit, revenue and orders compared to the prior-year period, when the Sector saw substantial weakness in its end markets. With an improved macroeconomic environment in the current quarter and continued execution on profitability initiatives, Industry generated Sector profit of \$900 million. The Sector's steadily recovering short-cycle businesses posted strong revenue growth and volume-driven profit increases, led by Industry Automation and OSRAM. Revenue grew more slowly for Industry overall, at 7%. New orders climbed 33% year-over-year on growth at all Divisions. In addition to organic growth, the Sector's revenue and order totals benefited from currency translation effects amounting to seven percentage points for orders and five percentage points for revenue. Growth in orders was well-distributed geographically, with all three regions posting double-digit increases. While all three regions posted higher revenue, growth was driven by a double-digit increase in Asia, Australia, particularly including China. Industry's book-to-bill ratio was above 1 for the quarter, and its order backlog increased to \$2.9 billion.

**Profit climbs on
strong revenue growth**

Industry Automation was the Sector's top profit contributor, delivering third-quarter profit of \$278 million. Profit rose sharply compared to the prior-year period, due in part to economies of scale on significantly higher revenue. The Division also improved its business mix while maintaining cost discipline. Industry Automation recorded double-digit increases in revenue and orders in all three regions, with the fastest growth coming from Asia, Australia. Purchase price accounting (PPA) effects related to the fiscal 2007 acquisition of UGS Corp. were \$37 million compared to \$34 million in the third quarter a year earlier.

**Longer-cycle businesses
bottoming out**

Third-quarter profit at **Drive Technologies** rose 28% year-over-year, to \$219 million. The increase was driven by a strong earnings improvement in the Division's fast-growing short-cycle activities, which increased capacity utilization on higher revenue. Third-quarter revenue rose slowly for the Division overall due to the Division's longer cycle businesses. Against a low basis of comparison in the prior-year quarter, orders came in 37% higher with increases in all business units and all three regions.

Table of Contents

Sectors 6

Profit rises, volume stabilizing

Building Technologies increased its third-quarter profit year-over-year to 93 million, due mainly to earnings improvement in its low-voltage business. Revenue and orders grew in Asia, Australia and the Americas, even though the commercial construction market in the U.S. remained weak.

Global demand drives profit growth in lighting

Strong demand for **OSRAM**'s LEDs and automotive solutions fueled a 27% rise in third quarter revenue at OSRAM. The Division combined higher capacity utilization with an improved product mix and streamlined cost structure to generate 127 million in profit. Revenue climbed strongly in all geographic regions compared to the prior-year quarter. With increasing demand for next-generation solid-state and LED lighting solutions, OSRAM intends to continue investing in market expansion and LED production capacity in coming quarters.

Process industries still challenging

Industry Solutions posted profit of 75 million in the third quarter, below the level of the prior-year period. Third-quarter revenue declined 6% year-over-year, strongly influenced by lower order intake in recent periods particularly in the metals technologies business. Against a low basis of comparison, orders came in 27% above the level of the prior-year quarter on growth in Asia, Australia and the Americas.

Steady profit performance, stable revenue generation

Mobility increased third-quarter profit to 107 million on level revenue, as the Division benefited from the execution of programs to improve performance in its project business. Order growth came primarily from significantly higher orders in the rolling stock business, including a major order in Russia.

Table of Contents

Sectors 7

Energy Sector**Continued profit performance, double-digit order growth**

The **Energy Sector** was again the top contributor to Total Sectors profit, generating 925 million in profit in the third quarter. The Sector continued to execute well on its substantial order backlog, particularly at Fossil Power Generation, Renewable Energy and Power Transmission. As a result, third-quarter profit was up 7% year-over-year on higher earnings in nearly all Divisions.

The broad energy market showed signs of improvement, and for the first time in more than a year the Sector posted a quarterly increase in new orders compared to a prior-year period. Major orders played a substantial role in the Sector's 18% order increase, most notably in Power Transmission, Renewable Energy and Oil & Gas. In addition to organic growth, the Sector's order total benefited from currency translation effects amounting to six percentage points. On a geographic basis, orders in the current period rose in Europe/CAME and the Americas, and declined in Asia, Australia. Third-quarter revenue remained flat year-over-year, due in part to a currency translation tailwind that added five percentage points to reported revenue. This result was due primarily to lower order intake in prior periods. Revenue was higher in the Americas and came in lower in Asia, Australia and Europe/CAME. Energy's book-to-bill ratio was 1.25 for the quarter. In combination with positive currency translation effects, this took the Sector's order backlog up to a new high at 54 billion.

Profit climbs on strong execution

Fossil Power Generation led all Siemens Divisions with 379 million in profit, an increase of 9% compared to the third quarter a year earlier. The Division continued to execute well in its project business and benefited from a more favorable revenue mix. While the fossil power generation market remained challenging, the Division's 14% decline in new orders was smaller than the declines in recent quarters. Third-quarter revenue came in only slightly lower year-over-year, in part due to cushioning from Fossil Power Generation's large order backlog.

Exceptional order intake, profit at record level

Renewable Energy delivered an impressive performance in the third quarter, reaching new highs for profit, revenue and orders. Third-quarter profit climbed 29% year-over-year, to 129 million, on a 25% rise in revenue. The Division demonstrated its global leadership in the off-shore wind-farm market by winning a number of major orders in Europe, and also took in its largest-ever onshore order. New orders overall came in at 2.271 billion, a 26% increase compared to the third quarter a year earlier.

Table of Contents

Sectors 8

Profit declines on lower revenue

Oil & Gas posted third-quarter profit of 108 million, a volume-driven decline compared to the prior-year period. The Division's 9% revenue decline was strongly influenced by a drop in orders in prior periods. Against a low basis of comparison, third-quarter orders came in higher year-over-year due in part to a higher volume from major orders.

Profit growth, large contract wins

Power Transmission increased its third-quarter profit to 205 million on higher revenue and strong project performance. Orders surged 47% on the strength of two large contract wins for grid access to off-shore wind-farms.

Profit rises, order development stabilizing

Third-quarter profit at **Power Distribution** rose to 102 million on a more favorable revenue mix, even as overall revenue came in lower due to weak order development during prior periods. The power distribution market continued to show signs of stabilization, and third-quarter orders came in 4% higher year-over-year.

Table of Contents

Sectors 9

Healthcare Sector**Solid growth drives strong earnings conversion**

The **Healthcare Sector** showed strong growth in profit, revenue and orders in a more favorable market environment. Third-quarter profit rose to 506 million on higher revenue and strong execution, including continued cost discipline. For comparison, profit in the same period a year earlier was burdened by 128 million in charges at the Workflow & Solutions Division, while the current period benefited from a gain of 40 million, taken at the Sector level, related to a joint venture. PPA effects related to past acquisitions at Diagnostics were 46 million in the third quarter. In addition, Healthcare recorded 18 million of integration costs associated with the next phase of integration activities at Diagnostics. In the same quarter a year earlier, PPA effects and integration costs totaled 52 million.

Third-quarter orders for Healthcare climbed 18% and revenue rose 10%. Orders came in higher in all three geographic regions compared to the prior-year quarter, while revenue rose in Asia, Australia and the Americas. In addition to organic growth, the Sector's order and revenue totals benefited from currency translation effects amounting to seven percentage points for orders and seven percentage points for revenue. Healthcare's book-to bill ratio was 1.03 for the quarter, and its order backlog was 7 billion.

Strong execution in an improving environment

Imaging & IT delivered strong profit growth and double-digit increases in revenue and orders compared to the third quarter a year ago. Profit climbed to 329 million on higher revenue and structural cost savings. Third-quarter revenue came in 11% higher year-over-year, and orders climbed 21%, with most business units recording increases in both revenue and orders. Growth was driven by strong demand in Asia, Australia, particularly including China, and in the Americas region, which saw rapid growth in Brazil from a small base. On an organic basis, revenue was up 4% and orders rose 13% compared to the prior-year quarter.

Growth in the solutions business

Workflow & Solutions contributed 22 million to Sector profit compared to a loss of 107 million in the prior-year period, when the Division took the 128 million in project charges mentioned earlier. Double-digit order growth included a major order for hospital equipment in Spain.

Table of Contents

Sectors 10

**Stable profit performance on
slow organic growth**

Revenue at **Diagnostics** rose 8% compared to the third quarter a year earlier, or 1% on an organic basis, excluding currency translation effects. The increase came from the Americas and Asia, Australia, particularly including double-digit growth in Brazil and China from a small base. Revenue declined in Europe/CAME.

Profit rose to 121 million despite an increase in total PPA effects and integration costs. In the third quarter a year earlier, these impacts were 45 million and 7 million, respectively. In the current period, PPA effects were 46 million, and the Division also recorded 18 million in costs for integration activities.

Table of Contents

Equity Investments and Cross-Sector Businesses 11

Equity Investments and Cross-Sector Businesses

Profit at **Equity Investments** was 2 million in the third quarter compared to 157 million a year earlier. The difference year-over-year is mainly due to a gain of 309 million in the prior-year period from the sale of Siemens stake in Fujitsu Siemens Computers (Holding) B.V., partly offset by an equity investment loss of 121 million related to Enterprise Networks Holding B.V.

Both periods included equity investment losses related to Nokia Siemens Networks B.V. (NSN), amounting to 81 million in the current period and 72 million a year earlier. NSN reported to Siemens that it took restructuring charges and integration costs totaling 114 million in the current quarter, compared to 69 million in the same period a year earlier. Profit

from Equity Investments is expected to be volatile in coming quarters.

After the end of the quarter, NSN announced that it entered into an agreement with Motorola, Inc. to acquire the majority of Motorola's wireless network infrastructure assets subject to regulatory approval.

**Loss on lower revenue at Siemens
IT Solutions and Services**

Siemens IT Solutions and Services posted a loss of 81 million in the third quarter, including charges of 38 million related to a loss contract in Europe/CAME. The business continued to face operational challenges while operating in highly competitive external markets, and expects substantial charges in coming quarters related to a previously announced plan to reduce its global workforce.

Exceptional results in the commercial finance business

Siemens Financial Services delivered 113 million in profit (defined as income before income taxes) in the third quarter, up from 87 million in the prior-year quarter. The increase in profit compared to the prior-year period came mainly from the commercial finance business, which benefited from a favorable credit environment as well as early terminations of financings.

These factors more than offset lower results from SFS's internal services business. Total assets rose to 13.050 billion, due primarily to currency translation effects.

Table of Contents

Centrally Managed Portfolio Activities, Corporate Activities and Eliminations 12

Centrally Managed Portfolio Activities, Corporate Activities and Eliminations**Lower loss at electronics assembly systems**

Centrally managed portfolio activities posted a loss of 16 million in the third quarter compared to a loss of 99 million in the prior-year period. The current period includes a loss of 13 million related to electronics assembly systems. For comparison, the third quarter a year earlier included a higher loss related to electronics assembly systems, primarily including 59 million in operating losses and severance expenses. Divestment of the electronics assembly systems business is expected to result in a loss.

Lesser gains from real estate disposals

Income before income taxes at **Siemens Real Estate (SRE)** was 107 million in the third quarter. For comparison, income before income taxes of 244 million in the same period a year earlier included a gain of 221 million on the disposal of Siemens residential real estate holdings. Assets with a book value of 130 million were transferred to SRE during the quarter as part of Siemens program to bundle its real estate assets into SRE. SRE will continue to incur costs associated with the program in coming quarters, and expects to continue with real estate disposals depending on market conditions.

Expenses for Corporate items again lower than prior year

Corporate items and pensions totaled a negative 266 million in the third quarter compared to a negative 431 million in the same period a year earlier. The difference was due primarily to Corporate items, which were a negative 223 million compared to a negative 326 million in the third quarter of fiscal 2009. Results related to an asset retirement obligation swung from a loss in the prior-year period to a 64 million positive result in the current quarter, which was partly offset by carve-out costs related to Siemens IT Solutions and Services. For comparison, the third quarter a year earlier included a charge of 54 million related to a legal settlement as well as severance expenses of 33 million.

Interest rate derivatives effect burdens Corporate Treasury results

Income before income taxes from **Eliminations, Corporate Treasury and other reconciling items** was a negative 125 million in the third quarter compared to a positive 18 million in the same period a year earlier. The difference is due primarily to changes in fair market values for interest rate derivatives not qualifying for hedge accounting, which resulted from a decline in interest rates within the current quarter.

Table of Contents

Outlook 13

Outlook

We continue to expect a mid-single-digit percentage decline in organic revenue in fiscal 2010 due in part to the stabilizing effect of our strong order backlog. We expect Total Sectors profit for fiscal 2010 above the prior-year level of 7.466 billion. This increase from our earlier guidance of 6.0 to 6.5 billion correspondingly raises our expectation for after-tax growth in income from continuing operations. This outlook excludes major impacts that may arise from restructuring, portfolio transactions, impairments, and legal and regulatory matters.

Such statements are based on the current expectations and certain assumptions of Siemens' management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens' control, affect Siemens' operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For Siemens, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas and recessionary trends); the possibility that customers may delay the conversion of booked orders into revenue or that prices will decline as a result of continued adverse market conditions to a greater extent than currently anticipated by Siemens' management; developments in the financial markets, including fluctuations in interest and exchange rates, commodity and equity prices, debt prices (credit spreads) and financial assets generally; continued volatility and a further deterioration of the capital markets; a worsening in the conditions of the credit business and, in particular, additional uncertainties arising out of the subprime, financial market and liquidity crises; future financial performance of major industries that Siemens serves, including, without limitation, the Sectors Industry, Energy and Healthcare; the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; the introduction of competing products or technologies by other companies; a lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings and actions resulting from the findings of these investigations; the potential impact of such investigations

and proceedings on Siemens' ongoing business including its relationships with governments and other customers; the potential impact of such matters on Siemens' financial statements; as well as various other factors. More detailed information about certain of the risk factors affecting Siemens is contained throughout this report and in Siemens' other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.

(1) This supplementary information on *New orders* is provided on a voluntary basis. It is not part of the Interim Consolidated Financial Statements subject to the review opinion.

(2) *Profit of the Sectors* as well as of **Equity Investments, Siemens IT Solutions and Services and Centrally managed portfolio activities** is earnings before financing interest, certain pension costs and income taxes. Certain other items not considered performance indicative by Management may be excluded. *Profit of SFS and SRE* is Income before income taxes.

(3) *Assets of the Sectors* as well as of **Equity Investments, Siemens IT Solutions and Services and Centrally managed portfolio activities** is defined as Total assets less income tax assets, less

non-interest bearing liabilities/provisions other than tax liabilities. *Assets of SFS and SRE* is Total assets.

- (4) *Free cash flow* represents net cash provided by (used in) operating activities less additions to intangible assets and property, plant and equipment. *Free cash flow* of the **Sectors, Equity Investments, Siemens IT Solutions and Services and Centrally managed portfolio activities** primarily exclude income tax, financing interest and certain pension related payments and proceeds. *Free cash flow* of **SFS**, a financial services business, and of **SRE** includes related financing interest payments and proceeds; income tax payments and proceeds of **SFS** and **SRE** are excluded.
- (5) To correspond with the presentation in the Consolidated Statements of Cash Flow, with the beginning of fiscal year 2010, additions to intangible assets and property, plant and equipment are

reported excluding additions to assets held for rental in operating leases. Additions to assets held for rental in operating leases amount to 183 and 95 in the three months ended June 30, 2010 and 2009, respectively. For further information, see Notes to Condensed Interim Consolidated Financial Statements.

- (6) *Amortization, depreciation and impairments* contains amortization and impairments, net of reversals of impairments, of intangible assets other than goodwill as well as depreciation and impairments of property, plant and equipment, net of reversals of impairments.

Due to rounding, numbers presented may not add up precisely to totals provided.

- (1) Profit of the Sectors and Divisions as well as Siemens IT Solutions and Services is earnings before financing interest, certain pension costs and income taxes. Certain other items not considered performance indicative by Management may be excluded.
- (2) Excluding currency translation and portfolio effects.
- (3) In fiscal 2010, the profit margin effect from PPA was 1.5 percentage points and profit margin excluding PPA was 17.5%. In fiscal 2009, the profit margin effect from PPA and integration costs was 1.8 percentage points and profit margin excluding PPA effects and integration costs was 11.2%.
- (4) In fiscal 2010, the profit

margin effect
from PPA was
4.8 percentage
points and profit
margin
excluding PPA
was 17.4%. In
fiscal 2009, the
profit margin
effect from PPA
and integration
costs was
5.9 percentage
points and profit
margin
excluding PPA
effects and
integration costs
was 17.6%.

Legal Proceedings

For information regarding investigations and other legal proceedings in which Siemens is involved, as well as the potential risks associated with such proceedings and their potential financial impact on the Company, please refer to Siemens Annual Report for the fiscal year ended September 30, 2009 (Annual Report) and its annual report on Form 20-F for the fiscal year ended September 30, 2009 (Form 20-F), and, in particular, to the information contained in Item 3: Key Information Risk factors and Item 4: Information on the Company Legal proceedings.

Significant developments regarding investigations and other legal proceedings that have occurred since the publication of Siemens Annual Report and Form 20-F are described below.

Public corruption proceedings

Governmental and related proceedings

On March 9, 2009, Siemens received a decision by the Vendor Review Committee of the United Nations Secretariat Procurement Division (UNPD) suspending Siemens from the UNPD vendor database for a minimum period of six months. The suspension applies to contracts with the UN Secretariat and stems from Siemens guilty plea in December 2008 to violations of the U.S. Foreign Corrupt Practices Act. Siemens does not expect a significant impact on its business, results of operations or financial condition from this decision. On December 22, 2009, Siemens filed a request to lift the existing suspension.

In April 2009, the Company received a Notice of Commencement of Administrative Proceedings and Recommendations of the Evaluation and Suspension Officer from the World Bank, which comprises the International Bank for Reconstruction and Development as well as the International Development Association, in connection with allegations of sanctionable practices during the period 2004-2006 relating to a World Bank-financed project in Russia. On July 2, 2009, the Company entered into a global settlement agreement with the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation and the Multilateral Investment Guarantee Agency (collectively, the World Bank Group) to resolve World Bank Group investigations involving allegations of corruption by Siemens.

In the agreement, Siemens voluntarily undertakes to refrain from bidding in connection with any project, program, or other investment financed or guaranteed by the World Bank Group (Bank Group Projects) for a period of two years, commencing on January 1, 2009 and ending on December 31, 2010. Siemens is not prohibited by the voluntary restraint from continuing work on existing contracts under Bank Group Projects or concluded in connection with World Bank Group corporate procurement provided such contracts were signed by Siemens and all other parties thereto prior to January 1, 2009. The agreement provides for exemptions to the voluntary restraint in exceptional circumstances upon approval of the World Bank Group. Siemens must also withdraw all pending bids, including proposals for consulting contracts, in connection with Bank Group Projects and World Bank Group corporate procurement where the World Bank Group has not provided its approval prior to July 2, 2009. Furthermore, Siemens is also required to voluntarily disclose to the World Bank Group any potential misconduct in connection with any Bank Group Projects. Finally, Siemens has undertaken to pay US\$100 million to agreed anti-corruption organizations over a period of not more than 15 years. In fiscal 2009, the Company took a charge to Other operating expense to accrue a provision in the amount of 53 million relating to the global settlement agreement with the World Bank Group. In November 2009, Siemens Russia OOO and all its controlled subsidiaries were, in a separate proceeding before the World Bank Group, debarred for four years from participating in Bank Group Projects. Siemens Russia OOO did not contest the debarment.

In November 2009 and in February 2010, a subsidiary of Siemens AG voluntarily self-reported possible violations of South African anti-corruption regulations in the period before 2007 to the responsible South African authorities. On December 30, 2009, the Anti Corruption Commission of Bangladesh (ACC) sent a request for information to Siemens Bangladesh Ltd. (Siemens Bangladesh) related to telecommunications projects of Siemens former Communications (Com) Group undertaken prior to 2007. On January 4, 2010, Siemens Bangladesh was informed that in a related move the Anti Money Laundering Department of the Central Bank of Bangladesh is conducting a special investigation into certain accounts of Siemens Bangladesh and of former employees of Siemens Bangladesh in connection with transactions for Com projects undertaken in the period from 2002 to 2006. On February 16, 2010, the ACC sent a request for additional information.

On June 23, 2010, the Frankfurt public prosecutor searched premises of Siemens in Germany in response to allegations of questionable payments relating to an Industry project in Thailand. Siemens is cooperating with the authority.

The Company remains subject to corruption-related investigations in several jurisdictions around the world.

Table of Contents

As a result, additional criminal or civil sanctions could be brought against the Company itself or against certain of its employees in connection with possible violations of law. In addition, the scope of pending investigations may be expanded and new investigations commenced in connection with allegations of bribery and other illegal acts. The Company's operating activities, financial results and reputation may also be negatively affected, particularly due to imposed penalties, fines, disgorgements, compensatory damages, third-party litigation, including by competitors, the formal or informal exclusion from public tenders or the loss of business licenses or permits. Additional expenses and provisions, which could be material, may need to be recorded in the future for penalties, fines, damages or other charges in connection with the investigations.

As previously reported, the Company investigates evidence of bank accounts at various locations, as well as the amount of the funds. Certain funds have been frozen by authorities. During the first nine months of fiscal 2010, based on binding agreements including with the relevant authority, the Company recognized an amount of \$40 million in *Other operating income* from the agreed recovery of funds from one of these accounts.

Civil litigation

As already disclosed by the Company in press releases, Siemens AG asserted claims for damages against former members of the Managing and Supervisory Board. The Company based its claims on breaches of organizational and supervisory duties in view of the accusations of illegal business practices that occurred in the course of international business transactions in the years 2003 to 2006 and the resulting financial burdens for the Company. On December 2, 2009 Siemens reached a settlement with nine out of eleven former members of the Managing and Supervisory Board. As required by law, the settlements between the Company and individual board members were subject to approval by the Annual Shareholders' Meeting. The Company reached a settlement agreement with its directors and officers (D&O) insurers regarding claims in connection with the D&O insurance of up to \$100 million. The Annual Shareholders' Meeting approved all nine settlements between the Company and the former members of the Managing and Supervisory Board on January 26, 2010. The shareholders also agreed to the settlement with respect to claims under the D&O insurance. During the second quarter of fiscal 2010, Siemens AG received certain benefits as required under the aforementioned settlement agreements with the result that an amount of \$96 million net of related cost was recognized primarily in *Other operating income*. Thereof \$84 million resulted from the settlement agreement with the D&O insurers and \$12 million resulted from settlement agreements with former board members. The former board members used claims they had against the Company to set off a portion of their obligations under the aforementioned settlement agreements. The remaining amount was or will be settled by the former board members in cash.

On January 25, 2010 Siemens AG filed a lawsuit with the Munich District Court I against the two former board members who were not willing to settle, Thomas Ganswindt and Heinz-Joachim Neubürger. The defendants have not yet replied to the complaint filed by Siemens AG.

As previously disclosed, in June 2008, the Republic of Iraq filed an action requesting unspecified damages against 93 named defendants with the United States District Court for the Southern District of New York on the basis of findings made in the Report of the Independent Inquiry Committee into the United Nations Oil-for-Food Programme. Siemens S.A.S. France, Siemens A. Ş. Turkey and OSRAM Middle East FZE, Dubai are among the 93 named defendants. Process was served upon all three Siemens affiliates.

As previously reported, the Company has been approached by a competitor to discuss claims it believes it has against the Company. The alleged claims relate to allegedly improper payments by the Company in connection with the procurement of public and private contracts. The Company is assessing whether any basis exists for such claims. A securities class action was filed in December 2009 against Siemens AG with the United States District Court for the Eastern District of New York seeking damages for alleged violations of U.S. securities laws. The Company will defend itself against the lawsuit.

Antitrust proceedings

As previously reported, on October 25, 2007, upon the Company's appeal, a Hungarian competition court reduced administrative fines imposed on Siemens AG for alleged antitrust violations in the market of high-voltage gas-insulated switchgear from 0.320 million to 0.120 million and from 0.640 million to 0.110 million regarding VA Technologie AG. The Company and the Competition Authority both appealed the decision. In November 2008, the Court of Appeal confirmed the reduction of the fines. On December 5, 2008, the Competition Authority filed an extraordinary appeal with the Supreme Court. In December 2009, Siemens AG was notified that the Supreme Court had remanded the case to the Court of Appeal, with instructions to take a new decision on the amount of the fines. The extraordinary appeal from the Competition Authority was rejected with legally binding effect by the Court of Appeal on January 27, 2010. On April 6, 2010, the Competition Authority filed another extraordinary appeal with the Supreme Court.

In January 2010, the European Commission launched an investigation related to previously reported investigations into potential antitrust violations involving producers of flexible current transmission systems in New Zealand and the USA including, among others, Siemens AG.

In April 2010, authorities in Korea and Mexico informed the company that similar proceedings had been initiated. Siemens is cooperating with the authorities. On June 1, 2010, the New Zealand Commerce Commission notified Siemens that their investigation had been closed.

On February 11, 2010, the Italian Antitrust Authority searched the premises of several healthcare companies, including Siemens Healthcare Diagnostics S.r.l. and Siemens S.p.A., in response to allegations of anti-competitive agreements relating to a 2009 public tender process for the supply of medical equipment to the procurement entity for the public healthcare sector in the region of Campania, So.Re.Sa. Siemens is cooperating with the authority.

Other proceedings

As previously reported, the Company is a member of a supplier consortium that has contracted to construct the nuclear power plant Olkiluoto 3 in Finland for Teollisuuden Voima Oyj (TVO) on a turnkey basis. The Company's share of the consideration to be paid to the supplier consortium under the contract is approximately 27%. The other member of the supplier consortium is a further consortium consisting of Areva NP S.A.S. and its wholly-owned affiliate, Areva NP GmbH. The agreed completion date for the nuclear power plant was April 30, 2009. Completion of the power plant has been delayed for reasons which are disputed. In December 2008 the supplier consortium filed a request for arbitration against TVO demanding an extension of the construction time, additional compensation and damages in the amount of approximately 1 billion. TVO rejected the demand for an extension of time and made counterclaims against the supplier consortium. These consist primarily of damages due to the delay, claimed to amount to 1.4 billion based on estimated completion of the plant in June 2012 with a delay of 38 months. Assuming the full cooperation of all involved parties, nuclear fuel is expected to be loaded into the reactor at the end of 2012 in order to commence the commissioning phase of the overall plant. This testing phase will last several months. As of today, completion is expected to occur by the end of the 2013 calendar year.

Investigations and proceedings currently being conducted by the Greek Parliamentary Investigation Committee, the public prosecutor and the criminal courts in Greece against among others former board members and executives of Siemens A.E. based on bribery and fraud allegations might have a negative impact on civil proceedings currently pending against Siemens AG and Siemens A.E. and also affect the future business activities of Siemens A.E. in Greece.

The Greek tax authorities have audited Siemens A.E.'s books for the 1997 to 2003 and 2004 to 2007 tax years.

Table of Contents

In the third quarter of fiscal 2010, based on a preliminary communication of the findings of the tax audits, Siemens A.E. made payments under a tax act enacted in April 2010 to settle certain matters for which provisions had been established.

The EU Anti-Fraud Office OLAF, its Romanian equivalent DELAF and the Romanian prosecutor DNA are currently investigating allegations of fraud in connection with the 2007 award of a contract to FORTE Business Services (now SIS Romania) to modernize the IT infrastructure of the Romanian judiciary.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on the current expectations and certain assumptions of Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. For Siemens, particular uncertainties arise, among others, from changes in general economic and business conditions (including margin developments in major business areas and recessionary trends); the possibility that customers may delay the conversion of booked orders into revenue or that prices will decline as a result of continued adverse market conditions to a greater extent than currently anticipated by Siemens management; developments in the financial markets, including fluctuations in interest and exchange rates, commodity and equity prices, debt prices (credit spreads) and financial assets generally; continued volatility and a further deterioration of the capital markets; a worsening in the conditions of the credit business and, in particular, additional uncertainties arising out of the subprime, financial market and liquidity crises; future financial performance of major industries that Siemens serves, including, without limitation, the Sectors Industry, Energy and Healthcare; the challenges of integrating major acquisitions and implementing joint ventures and other significant portfolio measures; the introduction of competing products or technologies by other companies; a lack of acceptance of new products or services by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations and legal proceedings and actions resulting from the findings of these investigations; the potential impact of such investigations and proceedings on Siemens ongoing business including its relationships with governments and other customers; the potential impact of such matters on Siemens financial statements; as well as various other factors. More detailed information about certain of the risk factors affecting Siemens is contained throughout this report and in Siemens other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens does not intend or assume any obligation to update or revise these forward-looking statements in light of developments which differ from those anticipated.
