August 2005 Order Comments:

Orders reflected strength across the Company with increases from July in 4 of the 5 segments. The industrial end markets we serve continue to have robust growth and the Climate Technologies segment has recovered from the negative growth experienced in the early summer months. Currency exchange rates had a negligible impact on the order growth rates.

Process Management order levels remained strong globally with robust growth from the majority of businesses in the segment. The orders continued to be driven by strong project activity, particularly in the oil & gas and power markets.

Orders for Industrial Automation reflected continued solid demand in the commercial markets we serve. The growth was balanced across the businesses with particular strength in the power generating alternator and electrical distribution businesses.

Network Power orders increased from July on continued strength from the power systems and inbound power businesses as well as strong growth from the embedded power business.

Orders for Climate Technologies rebounded strongly driven by the United States residential air conditioning business. This business has seen a recovery over the last few months as a result of hot weather, reduced channel inventories, and 10 SEER demand in anticipation of conversion to 13 SEER.

Appliance and Tools segment orders were led by strength in the storage business and slight growth in the motors and appliance component businesses.
