NEW CONCEPT ENERGY, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

NOTE A: BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of New Concept Energy, Inc. and its majority-owned subsidiaries (collectively, “NCE” or the “Company”). All significant intercompany transactions and accounts have been eliminated.

The unaudited financial statements included herein have been prepared by the Company without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements reflect all adjustments that are, in the opinion of management, necessary to fairly present such information. All such adjustments are of a normal recurring nature. Although the Company believes that the disclosures are adequate to make the information presented not misleading, certain information and footnote disclosures, including a description of significant accounting policies normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America, have been condensed or omitted pursuant to such rules and regulations.

These financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ending December 31, 2016. Operating results for the nine month period ended September 30, 2017 are not necessarily indicative of the results that may be expected for any subsequent quarter or for the fiscal year ending December 31, 2017.

NOTE B: NATURE OF OPERATIONS

The Company operates oil and gas wells and mineral leases in Athens and Meigs Counties in Ohio and in Calhoun, Jackson and Roane Counties in West Virginia through its wholly owned subsidiaries Mountaineer State Energy, LLC and Mountaineer State Operations, LLC.

Until March 30, 2017 the Company leased and operated a retirement center in King City, Oregon with a capacity of 114 residents. The terms of the lease agreement provided that if the facility was sold to a third party the lease would be terminated. On March 30, 2017 the owners of the facility sold the facility. The operations of the retirement center have been reflected as a discontinued operation.

NOTE C: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

We consider accounting policies related to our estimates of depreciation amortization and depletion, segments, oil and gas properties, oil and gas reserves, gas gathering assets, office and field equipment, revenue recognition and gas imbalances, leases, revenue recognition for real estate operations, impairment, and sales of real estate as significant accounting policies. The policies include significant estimates made by management using information available at the time the estimates are made. However, these estimates could change materially if different information or assumptions were used. These policies are summarized in our Annual Report on Form 10-K for the year ended December 31, 2016.

NOTE D: OIL AND GAS RESERVES

The Company uses the full cost method of accounting for its investment in oil and natural gas properties. Under this method of accounting, all costs of acquisition, exploration and development of oil and natural gas properties (including such costs as leasehold acquisition costs, geological expenditures, dry hole costs, tangible and intangible development costs and direct internal costs) are capitalized as the cost of oil and natural gas properties when incurred.

The full cost method requires the Company to calculate quarterly, by cost center, a “ceiling,” or limitation on the amount of properties that can be capitalized on the balance sheet. To the extent capitalized costs of oil and natural gas properties, less accumulated depletion and related deferred taxes exceed the sum of the discounted future net revenues of proved oil and natural gas reserves, the lower of cost or estimated fair value of unproved properties subject to amortization, the cost of properties not being amortized, and the related tax amounts, such excess capitalized costs are charged to expense.

The standardized measure of discounted future net cash flows and changes in such cash flows are prepared using assumptions required by the Financial Accounting Standards Board and the Securities and Exchange Commission. Such assumptions include a standardized method for determining pricing and require that future cash flow be discounted using a 10% rate. The valuation that results may not represent management’s estimated current market value of proved reserves.

During the past few years the exploration, development and production of natural gas has resulted in an oversupply of natural gas which has resulted in a substantial reduction in the market price. Management of the Company believes that this oversupply will last for some time and does not anticipate an increase in the price we can receive in the market place. In April 2012 the Company entered into an agreement to fix the price it receives for the sale of its gas. For the five years ended April 2017 the Company received \$4.53 per MCF. For the month period June thru August the Company received \$3.77 per MCF and for the period September 1, 2017 through December 31, 2017 the Company is receiving \$3.40 per MCF.

NOTE E: CONTINGENCIES

Carlton Litigation

Since December 2006, Carlton Energy Group, LLC (“Carlton”), an individual, Eurenergy Resources Corporation (“Eurenergy”) and several other entities, including New Concept Energy, Inc., which was then known as CabelTel International Corporation (the “Company”), have been involved in contentious litigation alleging tortuous conduct, breach of contract and other matters and, as to the Company, that it was the alter ego of Eurenergy. The Carlton claims were based upon an alleged tortuous interference with a contract by the individual and Eurenergy related to the right to explore a coal bed methane concession in Bulgaria which had never (and has not to this day) produced any hydrocarbons. At no time during the pendency of this project or since did the Company or any of its officers or directors have any interest whatsoever in the success or failure of the so-called “Bulgaria Project.” However, in the litigation Carlton alleged that the Company was the alter ego of certain of the other defendants, including Eurenergy.

Following a jury trial in 2009, the Trial Court (295th District Court of Harris County, Texas) cross appeals were filed by Carlton, the individual and Eurenergy to the Court of Appeals for the First District of Texas (the “Court of Appeals”), which, in February 2012, rendered an opinion. The Company and the other defendants filed a Petition for Review of the Court of Appeals’ Opinion with the Supreme Court of the State of Texas. On May 8, 2015, the Supreme Court of Texas affirmed, in part, and reversed, in part, the Court of Appeals’ judgment, remanding the case to the Court of Appeals for further proceedings. On remand, the Court of Appeals reinstated a verdict on damages in the amount of \$31.16 million against the individual and Eurenergy.

During August 2017, the parties to the litigation reached an arrangement, the final terms of which will not be determined until the outcome of another appeal to the Supreme Court. Under the terms of the arrangement, the Company should have no financial responsibility, nor should any potential final outcome materially adversely affect the Company, in management’s opinion.

Other

The Company has been named as a defendant in other lawsuits in the ordinary course of business. Management is of the opinion that these lawsuits will not have a material effect on the financial condition, results of operation or cash flows of the Company.

NOTE F: NEWLY ISSUED ACCOUNTING STANDARDS

We have considered all other newly issued accounting guidance that is applicable to our operations and the preparation of our consolidated statements, including that which we have not yet adopted. We do not believe that any such guidance will have a material effect on our financial position or results or operation.

NOTE G: SUBSEQUENT EVENTS

During the fourth quarter the Company, in a private placement, sold 90,000 newly issued shares for \$1.80 per share. The proceeds were used for general working capital purposes.

The Company has evaluated subsequent events through November 14, 2017, the date the financial statements were available to be issued, and has determined that there are none to be reported.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Policies and Estimates

The Company's discussion and analysis of its financial condition and results of operations are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. Certain of the Company's accounting policies require the application of judgment in selecting the appropriate assumptions for calculating financial estimates. By their nature, these judgments are subject to an inherent degree of uncertainty. These judgments and estimates are based upon the Company's historical experience, current trends and information available from other sources that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The Company's significant accounting policies are summarized in Note B to our consolidated financial statements in our annual report on Form 10-K. The Company believes the following critical accounting policies are more significant to the judgments and estimates used in the preparation of its consolidated financial statements. Revisions in such estimates are recorded in the period in which the facts that give rise to the revisions become known.

Oil and Gas Property Accounting

The Company uses the full cost method of accounting for its investment in oil and natural gas properties. Under this method of accounting, all costs of acquisition, exploration and development of oil and natural gas properties (including such costs as leasehold acquisition costs, geological expenditures, dry hole costs, tangible and intangible development costs and direct internal costs) are capitalized as the cost of oil and natural gas properties when incurred.

The full cost method requires the Company to calculate quarterly, by cost center, a "ceiling," or limitation on the amount of properties that can be capitalized on the balance sheet. To the extent capitalized costs of oil and natural gas properties, less accumulated depletion and related deferred taxes exceed the sum of the discounted future net revenues of proved oil and natural gas reserves, the lower of cost or estimated fair value of unproved properties subject to amortization, the cost of properties not being amortized, and the related tax amounts, such excess capitalized costs are charged to expense.

The standardized measure of discounted future net cash flows and changes in such cash flows are prepared using assumptions required by the Financial Accounting Standards Board and the Securities and Exchange Commission. Such assumptions include a standardized method for determining pricing and require that future cash flow be discounted using a 10% rate. The valuation that results may not represent management's estimated current market value of proved reserves.

Doubtful Accounts

The Company's allowance for doubtful accounts receivable and notes receivable is based on an analysis of the risk of loss on specific accounts. The analysis places particular emphasis on past due accounts. Management considers such information as the nature and age of the receivable, the payment history of the tenant, customer or other debtor and the financial condition of the tenant or other debtor. Management's estimate of the required allowance, which is reviewed on a quarterly basis, is subject to revision as these factors change.

Deferred Tax Assets

Significant management judgment is required in determining the provision for income taxes, deferred tax assets and liabilities and any valuation allowance recorded against net deferred tax assets. The future recoverability of the Company's net deferred tax assets is dependent upon the generation of future taxable income prior to the expiration of the loss carry forwards. At September 30, 2017 the Company had a deferred tax asset due to tax deductions available to it in future years. However, as management could not determine that it was more likely than not that the benefit of the deferred tax asset would be realized, a 100% valuation allowance was established.

Liquidity and Capital Resources

At September 30, 2017, the Company had current assets of \$617,000 and current liabilities of \$677,000.

Cash and cash equivalents at September 30, 2017 were \$427,000 as compared to \$113,000 at December 31, 2016.

Net cash provided from operating activities was \$378,000 for the nine months ended September 30, 2017. During the nine-month period, the Company had a net loss of \$397,000.

Net cash used in investing activities was \$12,000 for the nine months ended September 30, 2017. This represents land and fixed assets acquired to support the Company's oil & gas operation

Net cash used in financing activities was \$52,000 for the nine months ended September 30, 2017, consisting of the repayment of bank loans.

Results of Operations

The following discussion is based on our Consolidated Statements of Operations for the three and nine months ended September 30, 2017 and 2016 as included in Part 1, Item 1: Financial statements of this report.

Comparison of the three months ended September 30, 2017 to the same period ended 2016

The Company reported a net loss of \$101,000 for the three months ended September 2017, as compared to a net loss of \$170,000 for the similar period in 2016.

For the three months ended September 30, 2017, the Company recorded oil and gas revenues, net of royalty expenses of \$194,000 as compared to \$190,000 for the comparable period of 2016.

For the three months ended September 30, 2017, the Company recorded oil and gas operating expenses of \$254,000 as compared to \$295,000 for the comparable period of 2016. The decrease was principally due to a reduction of depletion expenses.

For the three months ended September 30, 2017, corporate general & administrative expenses were \$95,000 as compared to \$52,000 for the comparable periods in 2016. The increase was due to overall operating expenses during the quarter.

For the three months ended September 30, 2017 other income was \$66,000 as compared to an expense of \$11,000 for the comparable period of 2016. The most significant item is in August 2017 the Company received a payment of \$64,000 for a receivable it had written of a number of years ago.

Comparison of the nine months ended September 30, 2017 to the same period ended 2016

The Company reported a net loss of \$397,000 for the nine months ended September 2017, as compared to a net loss of \$694,000 for the similar period in 2016.

For the nine months ended September 30, 2017, the Company recorded oil and gas revenues, net of royalty expenses of \$632,000 as compared to \$579,000 for the comparable period of 2016. The increase in oil and gas revenue was principally due to an increase production in 2017 as compared to 2016.

For the nine months ended September 30, 2017, the Company recorded oil and gas operating expenses of \$766,000 as compared to \$924,000 for the comparable period of 2016. The decrease was due to a decrease in depletion expense and in overall operating expenses as the Company has actively been reducing costs.

For the nine months ended September 30, 2017, corporate general & administrative expenses were \$317,000 as compared to \$319,000 for the comparable periods in 2016.

For the nine months ended September 30, 2017 other income was \$51,000 as compared to an expense of \$21,000 for the comparable period of 2016. The most significant item is in August 2017 the Company received a payment of \$64,000 for a receivable it had written of a number of years ago.

Forward Looking Statements

“Safe Harbor” Statement under the Private Securities Litigation Reform Act of 1995: A number of the matters and subject areas discussed in this filing that are not historical or current facts deal with potential future circumstances, operations and prospects. The discussion of such matters and subject areas is qualified by the inherent risks and uncertainties surrounding future expectations generally, and also may materially differ from the Company’s actual future experience involving any one or more of such matters and subject areas relating to interest rate fluctuations, the ability to obtain adequate debt and equity financing, demand, pricing, competition, construction, licensing, permitting, construction delays on new developments, contractual and licensure, and other delays on the disposition, transition, or restructuring of currently or previously owned, leased or managed properties in the Company’s portfolio, and the ability of the Company to continue managing its costs and cash flow while maintaining high occupancy rates and market rate charges in its retirement community. The Company has attempted to identify, in context, certain of the factors that it currently believes may cause actual future experience and results to differ from the Company’s current expectations regarding the relevant matter of subject area. These and other risks and uncertainties are detailed in the Company’s reports filed with the Securities and Exchange Commission (“SEC”), including the Company’s Annual

Reports on Form 10-K and Quarterly Reports on Form 10-Q.

Inflation

The Company's principal source of revenue is rents from a retirement community and fees for services rendered. The real estate operation is affected by rental rates that are highly dependent upon market conditions and the competitive environment in the areas where the property is located. Compensation to employees and maintenance are the principal cost elements relative to the operation of this property. Although the Company has not historically experienced any adverse effects of inflation on salaries or other operating expenses, there can be no assurance that such trends will continue or that, should inflationary pressures arise, the Company will be able to offset such costs by increasing rental rates in its real estate operation.

Environmental Matters

The Company has conducted environmental assessments on most of its existing owned or leased properties. These assessments have not revealed any environmental liability that the Company believes would have a material adverse effect on the Company's business, assets or results of operations. The Company is not aware of any such environmental liability. The Company believes that all of its properties are in compliance in all material respects with all federal, state and local laws, ordinances and regulations regarding hazardous or toxic substances or petroleum products. The Company has not been notified by any governmental authority and is not otherwise aware of any material non-compliance, liability or claim relating to hazardous or toxic substances or petroleum products in connection with any of its communities.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

Nearly all of the Company's debt is financed at fixed rates of interest. Therefore, the Company has minimal risk from exposure to changes in interest rates.

Item 4. CONTROLS AND PROCEDURES

(a) Based on an evaluation by our management (with the participation of our Principal Executive Officer and Principal Financial Officer), as of the end of the period covered by this report, our Principal Executive Officer and

Principal Financial Officer concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)). Were effective to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, to allow timely decisions regarding required disclosures.

(b) There has been no change in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 6. Exhibits

The following exhibits are filed herewith or incorporated by reference as indicated below.

Exhibit Designation	Exhibit Description
