#### **Note on Non-GAAP Financial Information**

This presentation contains financial information determined by methods other than in accordance with accounting principles generally accepted in the United States of America (GAAP). The Company's management uses these non-GAAP measures in its analysis of the Company's performance. These measures typically adjust GAAP performance measures to exclude the effects of charges and expenses related to the consummation of mergers and acquisitions and costs related to the integration of merged entities, as well as the amortization of intangible assets in the case of cash basis performance measures. These non-GAAP measures also may exclude other significant gains or losses that are unusual in nature, such as security gains and prepayment penalties incurred in connection with deleveraging strategies. Because these items and their impact on the Company's performance are difficult to predict, management believes that presentations of financial measures excluding the impact of these items provide useful supplemental information that is essential to a proper understanding of the operating results of the Company's core businesses. These disclosures should not be viewed as a substitute for operating results determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures which may be presented by other companies.
