Forward-Looking Statements

Certain matters discussed in this Quarterly Report on Form 10-Q (“Form 10-Q”) contain or incorporate statements that East West Bancorp, Inc. (referred to herein on an unconsolidated basis as “East West” and on a consolidated basis as the “Company” or “EWBC”) believes are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder. These statements relate to the Company’s financial condition, results of operations, plans, objectives, future performance or business. They usually can be identified by the use of forward-looking language, such as “likely result in,” “expects,” “anticipates,” “estimates,” “forecasts,” “projects,” “intends to,” may include other similar words or phrases, such as “believes,” “plans,” “trend,” “objective,” “continues,” “remains,” or similar expressions, or future or conditional verbs, such as “will,” “would,” “should,” “could,” “may,” “might,” “can,” or similar verbs. You should not place undue reliance on these statements, as they are subject to risks and uncertainties, including, but not limited to, those described in the documents incorporated by reference. When considering these forward-looking statements, you should keep in mind these risks and uncertainties, as well as any cautionary statements the Company may make. Moreover, you should treat these statements as speaking only as of the date they are made and based only on information then actually known to the Company.

There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such differences, some of which are beyond the Company’s control, include, but are not limited to:

- the Company’s ability to compete effectively against other financial institutions in its banking markets;
- changes in the commercial and consumer real estate markets;
- changes in the Company’s costs of operation, compliance and expansion;
- changes in the U.S. economy, including inflation, employment levels, rate of growth and general business conditions;
- changes in government interest rate policies;
- changes in laws or the regulatory environment including regulatory reform initiatives and policies of the U.S. Department of Treasury, the Board of Governors of the Federal Reserve Board System, the Federal Deposit Insurance Corporation (“FDIC”), the U.S. Securities and Exchange Commission (“SEC”) and the Consumer Financial Protection Bureau;
- changes in the economy of and monetary policy in the People’s Republic of China;
- changes in accounting standards as may be required by the Financial Accounting Standards Board (“FASB”) or other regulatory agencies and their impact on critical accounting policies and assumptions;
- changes in the equity and debt securities markets;
- future credit quality and performance, including the Company’s expectations regarding future credit losses and allowance levels;
- fluctuations of the Company’s stock price;
- fluctuations in foreign currency exchange rates;
- success and timing of the Company’s business strategies;
- ability of the Company to adopt and successfully integrate new technologies into its business in a strategic manner;
- impact of reputational risk from negative publicity, fines and penalties and other negative consequences from regulatory violations and legal actions;
- impact of potential federal tax increases and spending cuts;
- impact of adverse judgments or settlements in litigation;
- impact of regulatory enforcement actions;
- changes in the Company’s ability to receive dividends from its subsidiaries;
- impact of political developments, wars or other hostilities that may disrupt or increase volatility in securities or otherwise affect economic conditions;
- impact of natural or man-made disasters or calamities or conflicts;
- continuing consolidation in the financial services industry;
- the Company’s capital requirements and its ability to generate capital internally or raise capital on favorable terms;

- impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act on the Company's business, business practices and cost of operations;
- impact of adverse changes to the Company's credit ratings from the major credit rating agencies;
- impact of failure in, or breach of, the Company's operational or security systems or infrastructure, or those of third parties with whom the Company does business, including as a result of cyber attacks; and other similar matters which could result in, among other things, confidential and/or proprietary information being disclosed or misused;
- adequacy of the Company's risk management framework, disclosure controls and procedures and internal control over financial reporting;

- the effect of the current low interest rate environment or changes in interest rates on the Company's net interest income and net interest margin;
- the effect of changes in the level of checking or savings account deposits on the Company's funding costs and net interest margin; and
- a recurrence of significant turbulence or disruption in the capital or financial markets, which could result in, among other things, a reduction in the availability of funding or increased funding costs, reduced investor demand for mortgage loans and declines in asset values and/or recognition of other-than-temporary impairment ("OTTI") on securities held in the Company's available-for-sale investment securities portfolio.

For a more detailed discussion of some of the factors that might cause such differences, see the Company's annual report on Form 10-K for the year ended December 31, 2015, filed with the SEC on February 26, 2016 (the "Company's 2015 Form 10-K"), under the heading "ITEM 1A. RISK FACTORS" and the information set forth under "ITEM 1A. RISK FACTORS" in this Form 10-Q. The Company does not undertake, and specifically disclaims any obligation to update any forward-looking statements to reflect the occurrence of events or circumstances after the date of such statements except as required by law.

EAST WEST BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1 — BASIS OF PRESENTATION

The unaudited interim Consolidated Financial Statements in this Form 10-Q include the accounts of East West and its subsidiaries, East West Bank and subsidiaries (referred to herein as “East West Bank” or the “Bank”) and East West Insurance Services, Inc. Intercompany transactions and balances have been eliminated in consolidation. As of June 30, 2016, East West has six wholly-owned subsidiaries that are statutory business trusts (the “Trusts”). In accordance with FASB Accounting Standards Codification (“ASC”) Topic 810, the Trusts are not consolidated into the Company.

The unaudited interim Consolidated Financial Statements presented in accordance with United States Generally Accepted Accounting Principles (“U.S. GAAP”), applicable guidelines prescribed by regulatory authorities, and general practices within the banking industry, reflect all adjustments that, in the opinion of management, are necessary for fair statement of the interim period financial statements. Certain prior year balances and notes have been reclassified to conform to current period presentation.

The current period’s results of operations are not necessarily indicative of results that may be expected for any other interim period or for the year as a whole. Events subsequent to the Consolidated Balance Sheet date have been evaluated through the date the financial statements are issued for inclusion in the accompanying financial statements. The unaudited Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements and notes thereto, included in the Company’s 2015 Form 10-K.

NOTE 2 — CURRENT ACCOUNTING DEVELOPMENTS

NEW ACCOUNTING PRONOUNCEMENTS ADOPTED

In February 2015, the FASB issued Accounting Standards Update (“ASU”) 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis that changes the analysis a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The amended guidance 1) modifies the evaluation of whether limited partnerships and similar legal entities are VIEs or voting interest entities; 2) eliminates the presumption that a general partner should consolidate a limited partnership; 3) affects the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships; and 4) provides a scope exception from consolidation guidance for reporting entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a7 of the Investment Company Act of 1940 for registered money market funds. The Company adopted this amended guidance in the first quarter of 2016 and the adoption of this guidance did not have a material impact on the Company’s Consolidated Financial Statements.

In April 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. ASU 2015-03 simplifies the presentation of debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of debt liability, consistent with debt discounts. The Company adopted this guidance retrospectively in the first quarter of 2016. The adoption of this guidance did not have a material impact on the Company’s Consolidated Financial Statements.

In April 2015, the FASB issued ASU 2015-05, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement. ASU 2015-05 amends ASC 350-40 and requires the Company to determine whether a cloud computing arrangement contains a software license. If the arrangement contains a software license, the Company should account for the fees related to the software license element consistent with how the acquisitions of other software licenses are accounted for under ASC 350-40. If the arrangement does not contain a software license, the Company should account for the arrangement as a service contract. The Company adopted this guidance prospectively to all arrangements entered into or materially modified in the first quarter of 2016. The adoption of this guidance did not have a material impact on the Company's Consolidated Financial Statements.

RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). The new guidance replaces existing revenue recognition guidance for contracts to provide goods or services to customers and amends existing guidance related to recognition of gains and losses on the sale of certain nonfinancial assets such as real estate. ASU 2014-09 clarifies the principles for recognizing revenue and replaces nearly all existing revenue recognition guidance in U.S. GAAP. Quantitative and qualitative disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers are also required. ASU 2014-09 as amended by ASU 2015-14, ASU 2016-08, ASU 2016-10 and ASU 2016-12, is effective for interim and annual periods beginning after December 15, 2017 and is applied on either a modified retrospective or full retrospective basis. Early adoption is permitted for interim and annual periods beginning after December 15, 2016. The Company's preliminary analysis suggests that the adoption of this accounting guidance is not expected to have a material impact on the Company's Consolidated Financial Statements. However, there are many aspects of the new accounting guidance that are still being interpreted and the FASB has recently issued updates to certain aspects of guidance. The results of our materiality analysis may change based on the conclusion reached as to the application of the new guidance.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. ASU 2016-01 requires equity investments, except those accounted for under the equity method of accounting or consolidated, to be measured at fair value with changes recognized in net income. If there is no readily determinable fair value, the guidance allows entities the ability to measure investments at cost less impairment, whereby impairment is based on a qualitative assessment. The guidance eliminates the requirement to disclose the methods and significant assumptions used to estimate the fair value of financial instruments measured at amortized cost and changes the presentation of financial assets and financial liabilities on the Consolidated Balance Sheet or in the footnotes. If an entity has elected the fair value option to measure liabilities, the new accounting guidance requires the portion of the change in the fair value of a liability resulting from credit risk to be presented in other comprehensive income. The Company has not elected to measure any of its liabilities at fair value. ASU 2016-01 is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is not permitted except for certain specific changes under the fair value option guidance. To adopt the amendments, the Company is required to make a cumulative-effect adjustment to the consolidated balance sheet as of the beginning of the fiscal year in which the guidance is effective. However, the amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the adoption date. The Company is currently evaluating the impact on its Consolidated Financial Statements.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which is intended to increase transparency and comparability in the accounting for lease transactions. ASU 2016-02 requires lessees to recognize all leases longer than twelve months on the Consolidated Balance Sheet as lease assets and lease liabilities and quantitative and qualitative disclosures regarding key information about leasing arrangements. Lessor accounting is largely unchanged. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years with an option to early adopt. The Company is currently evaluating the impact on its Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-05, Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships, to clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument in an existing hedging relationship would not be considered a termination of the derivative instrument or a change in a critical term of the hedging relationship provided that all other hedge accounting criteria in ASC 815 continue to be met. This clarification applies to both cash flow and fair value hedging relationships. ASU 2016-05 is effective for fiscal years beginning after December 15,

2016, including interim periods within those fiscal years with an option to early adopt. The Company has an option to adopt the amendments of this ASU either on a prospective basis or modified retrospective basis. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-06, Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments that requires an entity to use a four step decision model when assessing contingent call (put) options that can accelerate the payment of principal on debt instruments to determine whether they are clearly and closely related to their debt hosts. ASU 2016-06 will be effective for interim and annual reporting periods beginning after December 15, 2016 and must be implemented using a modified retrospective basis. Early adoption is permitted. The Company does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-07, Investments—Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting, to eliminate the requirement for an investor to retroactively apply the equity method when its increase in ownership interest (or degree of influence) in an investee triggers equity method accounting. The amendments in ASU 2016-07 also require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in AOCI at the date the investment becomes qualified for use of the equity method. ASU 2016-07 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years and should be applied prospectively. Early adoption is not permitted. The Company is currently evaluating the impact on its Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-09, Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, to simplify several aspects of the accounting for share-based payment transactions, including the accounting for income taxes, forfeitures, statutory tax withholding requirements, as well as classification in the statement of cash flows. ASU 2016-09 also eliminated certain guidance in ASC 718 on when awards cease to be within the scope of ASC 718 and instead become subject to other U.S. GAAP requirements. ASU 2016-09 is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the impact on its Consolidated Financial Statements.

In June 2016, the FASB issued ASU 2016-13 Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments to introduce a new approach based on expected losses to estimate credit losses on certain types of financial instruments, which modifies the impairment model for available-for-sale debt securities and provides for a simplified accounting model for purchased financial assets with credit deterioration since their origination. The new “expected credit loss” impairment model will apply to most financial assets measured at amortized cost and certain other instruments, including trade and other receivables, loans, held-to-maturity debt securities, net investments in leases and off-balance-sheet credit exposures. ASU 2016-13 also expands the disclosure requirements regarding an entity’s assumptions, models and methods for estimating the allowance for loans and lease losses and requires disclosure of the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination (i.e., by vintage year). ASU 2016-13 is effective for the fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Earlier adoption is permitted as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently evaluating the impact on its Consolidated Financial Statements.

NOTE 3 — FAIR VALUE MEASUREMENT AND FAIR VALUE OF FINANCIAL INSTRUMENTS

In determining fair value, the Company uses various methods including market and income approaches. Based on these approaches, the Company utilizes certain assumptions that market participants would use in pricing the asset or liability. These inputs can be readily observable, market corroborated, or generally unobservable. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The fair value hierarchy noted below is based on the quality and reliability of the information used to determine fair value. The fair value hierarchy gives the highest priority to quoted prices available in active markets and the lowest priority to data lacking transparency. The fair value of the Company’s assets and liabilities is classified and disclosed in one of the following three categories:

- Level 1 Valuation is based on quoted prices for identical instruments traded in active markets.
- Level 2 Valuation is based on quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable and can be corroborated by market data.

Level 3 Valuation is based on significant unobservable inputs for determining the fair value of assets or liabilities. These significant unobservable inputs reflect assumptions that market participants may use in pricing the assets or liabilities.

In determining the appropriate hierarchy levels, the Company performs an analysis of the assets and liabilities that are subject to fair value disclosure. The Company's assets and liabilities are classified in their entirety based on the lowest level of input that is significant to their fair value measurements.

The following tables present financial assets and liabilities that are measured at fair value on a recurring basis as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	Assets (Liabilities) Measured at Fair Value on a Recurring Basis as of June 30, 2016			
	Fair Value Measurements	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Interest rate swaps and options	\$ (67,325) \$ —	\$ (67,325) \$ —
Foreign exchange contracts	\$ (9,350) \$ —	\$ (9,350) \$ —
RPAs	\$ (4) \$ —	\$ (4) \$ —

At each reporting period, all assets and liabilities for which the fair value measurement is based on significant unobservable inputs are classified as Level 3. There were no assets or liabilities measured using significant unobservable inputs (Level 3) on a recurring basis for the three and six months ended June 30, 2016. The following table presents a reconciliation of the beginning and ending balances for major asset and liability categories measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and six months ended June 30, 2015:

(\$ in thousands)	Three Months Ended June 30, 2015		Six Months Ended June 30, 2015	
	Corporate Debt Securities	Embedded Debt Securities	Corporate Debt Securities	Embedded Debt Securities
Beginning balance	\$ —	\$ (3,412)	\$ 6,528	\$ (3,392)
Total gains (losses) for the period:				
Included in earnings ⁽¹⁾	—	—	960	(20)
Included in other comprehensive income ⁽²⁾	—	—	922	—
Sales and settlements:				
Sales	—	—	(7,219)	—
Settlements	—	3,412	(98)	3,412
Transfers in and/or out of Level 3	—	—	(1,093)	—
Ending balance	\$ —	\$ —	\$ —	\$ —
Change in unrealized losses included in earnings relating to assets and liabilities held for the period	\$ —	\$ —	\$ —	\$ —

Net gains or losses (realized and unrealized) of corporate debt securities and embedded derivative liabilities are (1) included in Net gains on sales of available-for-sale investment securities and Other operating expense, respectively, on the Consolidated Statements of Income.

(2) Unrealized gains or losses on available-for-sale investment securities are reported in Other comprehensive income, net of tax, on the Consolidated Statements of Comprehensive Income.

Transfers into or out of fair value hierarchy classifications are made if the significant inputs used in the financial models measuring the fair values of the assets and liabilities become unobservable or observable in the current marketplace. The Company's policy, with respect to transfers between levels of the fair value hierarchy, is to recognize transfers into and out of each level as of the end of the reporting period. There were no transfers of assets measured on a recurring basis in and out of Level 1, Level 2, or Level 3 for the three and six months ended June 30, 2016, and three months ended June 30, 2015. During the six months ended June 30, 2015, the Company transferred \$1.1 million of pooled trust preferred securities measured on a recurring basis out of Level 3 into Level 2 due to increased market liquidity and price observability.

Assets measured at fair value on a nonrecurring basis include certain non-purchased credit impaired ("non-PCI") loans that were impaired, OREO, and loans held for sale. These fair value adjustments result from impairments recognized during the period on certain non-PCI impaired loans, application of fair value less cost to sell on OREO and application of lower of cost or market ("LOCOM") valuation on loans held for sale.

The following tables present the carrying amounts of all assets that were still held as of June 30, 2016 and December 31, 2015 for which a nonrecurring fair value measurement was recorded:

Assets Measured at Fair Value on a Nonrecurring Basis
as of June 30, 2016

(\$ in thousands)	Fair Value Measurements	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Non-PCI impaired loans:				
Commercial real estate ("CRE")	\$ 21,443	\$ —	\$ —	\$ 21,443
Commercial and industrial ("C&I")	50,362	—	—	50,362
Residential	15,957	—	—	15,957
Consumer	1,531	—	—	1,531
Total non-PCI impaired loans	\$ 89,293	\$ —	\$ —	\$ 89,293
OREO	\$ 3,647	\$ —	\$ —	\$ 3,647
Loans held for sale	\$ 27,895	\$ —	\$ 27,895	\$ —

Assets Measured at Fair Value on a Nonrecurring Basis
as of December 31, 2015

(\$ in thousands)	Fair Value Measurements	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Non-PCI impaired loans:				
CRE	\$ 17,252	\$ —	\$ —	\$ 17,252
C&I	35,558	—	—	35,558

Consumer	1,180	—	—	1,180
Total non-PCI impaired loans	\$ 70,462	\$ —	\$ —	\$ 70,462
OREO	\$ 4,929	\$ —	\$ —	\$ 4,929
Loans held for sale	\$ 29,238	\$ —	\$ 29,238	\$ —

The following table presents fair value adjustments of certain assets measured on a nonrecurring basis recognized during the three and six months ended and still held as of June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Non-PCI impaired loans:				
CRE	\$(261)	\$(445)	\$1,908	\$(905)
C&I	(4,693)	(6,454)	(9,149)	(9,303)
Residential	(4)	(216)	27	(341)
Consumer	(2)	(1)	14	(1)
Total non-PCI impaired loans	\$(4,960)	\$(7,116)	\$(7,200)	\$(10,550)

OREO	\$(1,073)	\$(200)	\$(1,529)	\$(258)
Loans held for sale	\$—	\$(517)	\$(2,351)	\$(517)

The following table presents quantitative information about significant unobservable inputs used in the valuation of assets measured on a nonrecurring basis classified as Level 3 as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	Fair Value Measurements (Level 3)	Valuation Technique(s)	Unobservable Input(s)	Range of Inputs	Weighted Average
June 30, 2016					
Non-PCI impaired loans	\$ 48,169	Discounted cash flow	Discount rate	0% — 84%	20%
	\$ 41,124	Market comparables	Discount rate ⁽¹⁾	0% — 100%	18%
OREO	\$ 3,647	Appraisal	Selling cost	8%	8%
December 31, 2015					
Non-PCI impaired loans	\$ 27,522	Discounted cash flow	Discount rate	0% — 87%	30%
	\$ 42,940	Market comparables	Discount rate ⁽¹⁾	0% — 100%	17%
OREO	\$ 4,929	Appraisal	Selling cost	8%	8%

(1) Discount rate is adjusted for factors such as liquidation cost of collateral and selling cost.

The following tables present the carrying and fair values per the fair value hierarchy of certain financial instruments, excluding those measured at fair value on a recurring basis, as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016				Estimated Fair Value
	Carrying Amount	Level 1	Level 2	Level 3	
Financial assets:					
Cash and cash equivalents	\$1,592,796	\$1,592,796	\$—	\$—	\$1,592,796

FHLB advances	\$1,019,424	\$—	\$1,032,000	\$—	\$1,032,000
Accrued interest payable	\$8,848	\$—	\$8,848	\$—	\$8,848
Long-term debt	\$206,084	\$—	\$186,593	\$—	\$186,593

Resale and repurchase agreements are reported net pursuant to ASC 210-20-45, Balance Sheet Offsetting. As of (1) December 31, 2015, the carrying amount of \$450.0 million of repurchase agreements was eligible for netting against resale agreements, resulting in no repurchase agreements' balances reported.

The following is a description of the valuation methodologies and significant assumptions used to measure financial assets and liabilities at fair value and to estimate fair value for certain financial instruments not recorded at fair value. The description also includes the level of the fair value hierarchy in which the assets or liabilities are classified.

Cash and Cash Equivalents — The carrying amount approximates fair value due to the short-term nature of these instruments. As such, the estimated fair value is classified as Level 1.

Short-Term Investments — The fair value of short-term investments generally approximates their book value due to their short maturities. In addition, due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Resale Agreements — The fair value of resale agreements is estimated by discounting the cash flows based on expected maturities or repricing dates utilizing estimated market discount rates. In addition, due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Held-to-Maturity Investment Security — The fair value of a held-to-maturity investment security is determined by the discount cash flow approach. The discount rate is derived from conditional prepayment rate, constant default rate, loss severity and discount margin. Due to the significant unobservable inputs, the held-to-maturity investment security is classified as Level 3.

Available-for-Sale Investment Securities — When available, the Company uses quoted market prices to determine the fair value of available-for-sale investment securities; such items are classified as Level 1. Level 1 available-for-sale investment securities mainly include U.S. Treasury securities. The fair values of other available-for-sale investment securities are generally determined by independent external pricing service providers who have experience in valuing

these securities or by the average quoted market prices obtained from independent external brokers. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values. The available-for-sale investment securities valued using such methods are classified as Level 2.

Loans Held for Sale — The Company's loans held for sale are carried at the LOCOM. These loans are mainly comprised of student loans. The fair value of loans held for sale is derived from current market prices and comparative current sales. As such, the Company records any fair value adjustments on a nonrecurring basis. Loans held for sale are classified as Level 2.

Non-PCI Impaired Loans — The Company evaluates non-PCI impaired loans on a nonrecurring basis. The fair value of non-PCI impaired loans is measured using the market comparable technique. For CRE loans and C&I loans, the fair value is based on each loan's observable market price or the fair value of the collateral less cost to sell, if the loan is collateral dependent. The fair value of collateral is based on third party appraisals or evaluations which are reviewed by the Company's appraisal department. All appraisals include an "as is" market value without conditions as of the effective date of the appraisal. Updated appraisals and evaluations are generally obtained within the last 12 months. For certain impaired loans, the Company utilizes the discounted cash flow approach and applies a discount rate derived from historical data. For impaired loans with an unpaid balance below a certain threshold, the Company applies historical loss rates to derive the fair value. The significant unobservable inputs used in the fair value measurement of non-PCI impaired loans are discount rates applied based on the liquidation cost of collateral and selling cost. On a quarterly basis, all nonperforming assets are reviewed to assess whether the current carrying value is supported by the collateral or cash flow and to ensure that the current carrying value is appropriate. Non-PCI impaired loans are classified as Level 3.

Loans Receivable, Net — The fair value of loans is determined based on a discounted cash flow approach considered for an exit price value. The discount rate is derived from the associated yield curve plus spreads that reflect the rates in the market for loans with similar financial characteristics. No adjustments have been made for changes in credit within any of the loan portfolios. It is management's opinion that the allowance for loan losses pertaining to performing and nonperforming loans results in a fair value valuation of credit for such loans. Due to the unobservable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 3.

OREO — The Company's OREO represents properties acquired through foreclosure or through full or partial satisfaction of loans receivable, which are recorded at estimated fair value less the cost to sell at the time of foreclosure and at the lower of cost or estimated fair value less the cost to sell subsequent to acquisition. The fair values of OREO properties are based on third party appraisals, broker price opinions or accepted written offers. Please refer to the Non-PCI Impaired Loans section above for a detailed discussion on the Company's policies and procedures related to appraisals and evaluations. On a monthly basis, the current fair market value of each OREO property is reviewed to ensure that the current carrying value is appropriate. The Company uses the market comparable valuation technique to measure the fair value of OREO properties. The significant unobservable input used is the selling cost. OREO properties are classified as Level 3.

Investment in FHLB Stock and Federal Reserve Bank Stock — The carrying amounts of the Company's investments in FHLB Stock and Federal Reserve Bank Stock approximate fair value. The valuation of these investments is classified as Level 2. Ownership of these securities is restricted to member banks and the securities do not have a readily determinable fair value. Purchases and sales of these securities are at par value.

Accrued Interest Receivable — The carrying amount approximates fair value due to the short-term nature of these instruments. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Interest Rate Swaps and Options — The Company enters into interest rate swap and option contracts with institutional counterparties to hedge against interest rate swap and option products offered to bank customers. These products allow borrowers to lock in attractive intermediate and long-term interest rates by entering into an interest rate swap or option contract with the Company, resulting in the customer obtaining a synthetic fixed rate loan. The Company also enters into interest rate swap contracts with institutional counterparties to hedge against certificates of deposit issued. This product allows the Company to lock in attractive floating rate funding. The fair value of interest rate swaps is determined using the market standard methodology of netting the discounted future fixed cash payments (or receipts) and the discounted expected variable cash receipts (or payments). The variable cash receipts (or payments) are based on the expectation of future interest rates (forward curves) derived from observed market interest rate curves. The fair

value of interest rate options is determined using the market standard methodology of discounting the future expected cash receipts that would occur if variable interest rates fell below (rise above) the strike rate of the floors (caps). The variable interest rates used in the calculation of projected receipts on the floor (cap) are based on an expectation of future interest rates derived from observable market interest rate curves and volatilities. In addition, to comply with the provisions of ASC 820, the Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements of its derivatives. The credit valuation adjustments associated with the Company's derivatives utilize Level 3 inputs, model-derived credit spreads. As of June 30, 2016, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of these interest rate contracts' positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivative portfolios. As a result, the Company classifies these derivative valuations in Level 2 of the fair value hierarchy due to the observable nature of the significant inputs utilized.

Foreign Exchange Contracts — The Company enters into short-term foreign exchange contracts to purchase/sell foreign currencies at set rates in the future. These contracts economically hedge against foreign exchange rate fluctuations. The Company also enters into contracts with institutional counterparties to hedge against foreign exchange products offered to bank customers. These products allow customers to hedge the foreign exchange risk of their deposits and loans denominated in foreign currencies. The Company assumes minimal foreign exchange rate risk because the contracts with the customer and the institutional party mirror each other. The fair value is determined at each reporting period based on changes in the foreign exchange rate. These are over the counter contracts where quoted market prices are not readily available. Valuation is measured using conventional valuation methodologies with observable market data. Valuation depends on the type of derivative and the nature of the underlying rate and contractual terms including period of maturity, price and index upon which the derivative's value is based. Key inputs include foreign exchange rates (spot and/or forward rates), volatility of currencies, and the correlation of such inputs. The counterparties' credit risks are considered nominal and resulted in no adjustments to the valuation of the foreign exchange contracts. Due to the observable nature of the inputs used in deriving the fair value of these contracts, the valuation of foreign contracts is classified as Level 2.

Customer Deposits — The fair value of deposits with no stated maturity, such as demand deposits, interest checking, savings, and money market deposits, approximates the carrying amount as the amounts are payable on demand at the measurement date. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2. For time deposits, the fair value is based on the discounted value of contractual cash flows using current market rates for instruments with similar maturities. Due to the observable nature of the inputs used in deriving the estimated fair value, time deposits are classified as Level 2.

FHLB Advances — The fair value of FHLB advances is estimated based on the discounted value of contractual cash flows, using rates currently offered by the FHLB of San Francisco for advances with similar remaining maturities at each reporting date. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Repurchase Agreements — The fair value of the repurchase agreements is calculated by discounting future cash flows based on expected maturities or repricing dates, utilizing estimated market discount rates and taking into consideration the call features of each instrument. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Accrued Interest Payable — The carrying amount approximates fair value due to the short-term nature of these instruments. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

Long-Term Debt — The fair value of long-term debt is estimated by discounting the cash flows through maturity based on current market rates the Company would pay for new issuances. Due to the observable nature of the inputs used in deriving the estimated fair value, long-term debt is classified as Level 2.

Foreign currency forward contracts — The Company enters into foreign currency forward contracts to hedge its net investment in East West Bank (China) Limited, a non-U.S. Dollar ("USD") functional currency subsidiary in China. The fair value of foreign currency forward contracts is valued by comparing the contracted foreign exchange rate to the current market exchange rate. Inputs include spot rates, forward rates, and the interest rate curve of the domestic and foreign currency. Interest rate forward curves are used to determine which forward rate pertains to a specific maturity. Due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are classified as Level 2.

RPAs — The Company enters into RPAs, under which the Company assumes its pro-rata share of the credit exposure associated with the borrower's performance related to interest rate derivative contracts. The fair value of RPAs is calculated by determining the total expected liability exposure of the derivatives to the borrowers and applying the borrowers' credit spread to that exposure. Total expected exposure incorporates both the current and potential future exposure of the derivatives, derived from using observable inputs, such as yield curves and volatilities. The credit spreads of the borrowers used in the calculation are estimated by the Company based on current market conditions, including consideration of current borrowing spreads for similar customers and transactions, review of existing collateralization or other credit enhancements, and changes in credit sector and entity-specific credit information. The Company has determined that the majority of the inputs used to value RPAs fall within Level 2 of the fair value hierarchy.

The fair value estimates presented herein are based on pertinent information available to management as of each reporting date. Although the Company is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and therefore, current estimates of fair value may differ significantly from the amounts presented herein.

NOTE 4 SECURITIES PURCHASED UNDER RESALE AGREEMENTS AND SOLD UNDER REPURCHASE AGREEMENTS

Resale Agreements

Resale agreements are recorded at the balances at which the securities were acquired. The market values of the underlying securities collateralizing the related receivable of the resale agreements, including accrued interest, are monitored. Additional collateral may be requested by the Company from the counterparty when deemed appropriate. Gross resale agreements were \$2.10 billion and \$2.05 billion, respectively, as of June 30, 2016 and December 31, 2015. The weighted average interest rates were 1.73% and 1.61%, respectively, as of June 30, 2016 and December 31, 2015.

Repurchase Agreements

Long-term repurchase agreements are accounted for as collateralized financing transactions and recorded at the balances at which the securities were sold. The collateral for these agreements are primarily comprised of U.S. government agency and U.S. government sponsored enterprise mortgage-backed and debt securities. The Company may have to provide additional collateral for the repurchase agreements, as necessary. Gross repurchase agreements were \$450.0 million as of both June 30, 2016 and December 31, 2015, respectively. The weighted average interest rates were 2.90% and 2.60%, respectively, as of June 30, 2016 and December 31, 2015.

Balance Sheet Offsetting

The Company's resale and repurchase agreements are transacted under legally enforceable master repurchase agreements that provide the Company, in the event of default by the counterparty, the right to liquidate securities held and to offset receivables and payables with the same counterparty. The Company nets resale and repurchase transactions with the same counterparty on the Consolidated Balance Sheets when it has a legally enforceable master netting agreement and the transactions are eligible for netting under ASC 210-20-45. Collateral accepted includes securities that are not recognized on the Consolidated Balance Sheets. Collateral pledged consists of securities that are not netted on the Consolidated Balance Sheets against the related collateralized liability. Collateral accepted or pledged in resale and repurchase agreements with other financial institutions may also be sold or re-pledged by the secured party, but is usually delivered to and held by the third party trustees. The collateral amounts received/posted are limited for presentation purposes to the related recognized asset/liability balance for each counterparty, and accordingly, do not include excess collateral received/pledged.

The following tables present resale and repurchase agreements included on the Consolidated Balance Sheets as of June 30, 2016 and December 31, 2015:

(\$ in thousands)		As of June 30, 2016				
Assets	Gross Amounts of Recognized Assets	Gross Amounts Offset on the Consolidated Balance Sheets	Net Amounts of Assets Presented on the Consolidated Balance Sheets	Gross Amounts Not Offset on the Consolidated Balance Sheets		Net Amount
				Financial Instruments	Collateral Received	
Resale agreements	\$2,100,000	\$(250,000)	\$1,850,000	\$ —	\$(1,849,189)	(1) \$ 811

Liabilities	Gross Amounts of Recognized Liabilities	Gross Amounts Offset on the Consolidated Balance Sheets	Net Amounts of Liabilities Presented on the Consolidated Balance Sheets	Gross Amounts Not Offset on the Consolidated Balance Sheets		Net Amount
				Financial Instruments	Collateral Posted	
Repurchase agreements	\$450,000	\$(250,000)	\$200,000	\$ —	\$(200,000)	(2) \$ —

(\$ in thousands)		As of December 31, 2015				
Assets	Gross Amounts of Recognized Assets	Gross Amounts Offset on the Consolidated Balance Sheets	Net Amounts of Assets Presented on the Consolidated Balance Sheets	Gross Amounts Not Offset on the Consolidated Balance Sheets		Net Amount
				Financial Instruments	Collateral Received	
Resale agreements	\$2,050,000	\$(450,000)	\$1,600,000	\$ —	\$(1,593,503)	(1) \$ 6,497

Liabilities	Gross Amounts of Recognized Liabilities	Gross Amounts Offset on the Consolidated Balance Sheets	Net Amounts of Liabilities Presented on the Consolidated Balance Sheets	Gross Amounts Not Offset on the Consolidated Balance Sheets		Net Amount
				Financial Instruments	Collateral Posted	
Repurchase agreements	\$450,000	\$(450,000)	\$ —	\$ —	\$ —	(2) \$ —

(1) Represents the fair value of securities the Company has received under resale agreements, limited for table presentation purposes to the amount of the recognized asset due from each counterparty.

(2)

Represents the fair value of securities the Company has pledged under repurchase agreements, limited for table presentation purposes to the amount of the recognized liability owed to each counterparty.

In addition to the amounts included in the table above, the Company also has balance sheet netting related to derivatives, refer to Note 6 — Derivatives to the Consolidated Financial Statements for additional information.

NOTE 5 — INVESTMENT SECURITIES

The following table presents the amortized cost, gross unrealized gains and losses and fair value by major categories of available-for-sale investment securities, which are carried at fair value, and a held-to-maturity investment security, which is carried at amortized cost:

(\$ in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
As of June 30, 2016				
Available-for-sale investment securities:				
U.S. Treasury securities	\$485,137	\$ 3,423	\$—	\$488,560
U.S. government agency and U.S. government sponsored enterprise debt securities	701,085	3,035	(191)) 703,929
U.S. government agency and U.S. government sponsored enterprise mortgage-backed securities:				
Commercial mortgage-backed securities	305,724	3,443	(803)) 308,364
Residential mortgage-backed securities	1,050,583	10,041	(1,723)) 1,058,901
Municipal securities	149,711	4,246	(54)) 153,903
Non-agency residential mortgage-backed securities:				
Investment grade ⁽¹⁾	54,728	1,276	(29)) 55,975
Corporate debt securities:				
Investment grade ⁽¹⁾	418,104	475	(1,715)) 416,864
Non-investment grade ⁽¹⁾	10,191	—	(1,783)) 8,408
Other securities	44,785	706	(63)) 45,428
Total available-for-sale investment securities	3,220,048	26,645	(6,361)) 3,240,332
Held-to-maturity investment security:				
Non-agency commercial mortgage-backed security	159,208	—	(929)) 158,279
Total investment securities	\$3,379,256	\$ 26,645	\$ (7,290)) \$3,398,611
As of December 31, 2015				
Available-for-sale investment securities:				
U.S. Treasury securities	\$1,002,874	\$ 33	\$(4,392)) \$998,515
U.S. government agency and U.S. government sponsored enterprise debt securities	771,288	555	(2,994)) 768,849
U.S. government agency and U.S. government sponsored enterprise mortgage-backed securities:				
Commercial mortgage-backed securities	354,418	268	(3,024)) 351,662
Residential mortgage-backed securities	996,255	7,542	(6,401)) 997,396
Municipal securities	173,785	2,657	(793)) 175,649
Non-agency residential mortgage-backed securities:				
Investment grade ⁽¹⁾	62,133	433	(173)) 62,393
Corporate debt securities:				
Investment grade ⁽¹⁾	366,921	132	(2,340)) 364,713
Non-investment grade ⁽¹⁾	11,491	—	(1,849)) 9,642
Other securities	44,664	124	(381)) 44,407
Total available-for-sale investment securities	\$3,783,829	\$ 11,744	\$(22,347)) \$3,773,226

(1) Available-for-sale investment securities rated BBB- or higher by S&P or Baa3 or higher by Moody's are considered investment grade. Conversely, available-for-sale investment securities rated lower than BBB- by S&P or lower than Baa3 by Moody's are considered non-investment grade. Classifications are based on the lower of the credit ratings by S&P or Moody's.

Unrealized Losses

The following table presents the Company's investment portfolio's gross unrealized losses and related fair values, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position:

	Less Than 12 Months		12 Months or More		Total	
(\$ in thousands)	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
As of June 30, 2016						
Available-for-sale investment securities:						
U.S. Treasury securities	\$—	\$—	\$—	\$—	\$—	\$—
U.S. government agency and U.S. government sponsored enterprise debt securities	85,210	(191)	—	—	85,210	(191)
U.S. government agency and U.S. government sponsored enterprise mortgage-backed securities:						
Commercial mortgage-backed securities	50,477	(476)	24,377	(327)	74,854	(803)
Residential mortgage-backed securities	295,399	(1,097)	26,327	(626)	321,726	(1,723)
Municipal securities	4,398	(50)	2,896	(4)	7,294	(54)
Non-agency residential mortgage-backed securities:						
Investment grade	7,470	(29)	—	—	7,470	(29)
Corporate debt securities:						
Investment grade	149,452	(533)	91,236	(1,182)	240,688	(1,715)
Non-investment grade	—	—	8,408	(1,783)	8,408	(1,783)
Other securities	4,500	(1)	8,938	(62)	13,438	(63)
Total available-for-sale investment securities	\$596,906	\$ (2,377)	\$ 162,182	\$ (3,984)	\$ 759,088	\$ (6,361)
Held-to-maturity investment security:						
Non-agency commercial mortgage-backed security	158,279	\$ (929)	—	—	158,279	(929)
Total investment securities	\$755,185	\$ (3,306)	\$ 162,182	\$ (3,984)	\$ 917,367	\$ (7,290)
As of December 31, 2015						
Available-for-sale investment securities:						
U.S. Treasury securities	\$907,400	\$ (4,250)	\$ 20,282	\$ (142)	\$ 927,682	\$ (4,392)
U.S. government agency and U.S. government sponsored enterprise debt securities	541,385	(2,994)	—	—	541,385	(2,994)
U.S. government agency and U.S. government sponsored enterprise mortgage-backed securities:						
Commercial mortgage-backed securities	252,340	(2,562)	20,793	(462)	273,133	(3,024)
Residential mortgage-backed securities	535,842	(4,530)	58,315	(1,871)	594,157	(6,401)
Municipal securities	48,495	(437)	14,739	(356)	63,234	(793)
Non-agency residential mortgage-backed securities:						

Edgar Filing: EAST WEST BANCORP INC - Form 10-Q

Investment grade	5,123	(1)	6,242	(172)	11,365	(173)
Corporate debt securities:									
Investment grade	218,944	(1,189)	89,989	(1,151)	308,933	(2,340)
Non-investment grade	—	—		9,642	(1,849)	9,642	(1,849)
Other securities	17,990	(112)	8,731	(269)	26,721	(381)
Total available-for-sale investment securities	\$2,527,519	\$ (16,075)	\$ 228,733	\$ (6,272)	\$ 2,756,252	\$ (22,347)

For each reporting period, the Company examines all individual securities that are in an unrealized loss position for OTTI. For discussion of the factors and criteria the Company uses in analyzing securities for OTTI, please see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K.

The unrealized losses were primarily attributed to the widened liquidity spread and credit spread in addition to yield curve movement. The issuers of these securities have not, to the Company's knowledge, established any cause for default on these securities. These securities have fluctuated in value since their purchase dates as market interest rates have fluctuated.

The Company believes the gross unrealized losses detailed in the previous tables are temporary and are not due to reasons of credit quality. As a result, the Company expects to recover the entire amortized cost basis of these securities. Accordingly, no impairment loss has been recorded in the Company's Consolidated Statements of Income for the three and six months ended June 30, 2016 and 2015.

During the first quarter of 2016, the Company obtained a non-agency mortgage-backed investment security, through a securitization of multifamily real estate loans, which was classified as held-to-maturity and is measured at amortized cost. The Company has the intent and ability to hold the security to maturity. For detailed discussion, please refer to Note 7 — Loans Receivable And Allowance For Credit Losses to the Consolidated Financial Statements.

OTTI

The following table presents a rollforward of the amounts related to the OTTI credit losses recognized in earnings for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30, 2016	Six Months Ended June 30, 2015
Beginning balance	\$-106,688	\$-112,338
Addition of OTTI previously not recognized	—	—
Additional increase to the amount related to the credit loss for which an OTTI was previously recognized	—	—
Reduction for securities sold	—	—(5,650)
Ending balance	\$-106,688	\$-106,688

No OTTI credit losses were recognized for the three and six months ended June 30, 2016 and 2015. There were no sales of any investment securities with previously recognized OTTI credit losses for the three months ended June 30, 2016 and 2015. For the six months ended June 30, 2015, the Company realized a gain of \$960 thousand from the sale of a non-investment grade corporate debt security with previously recognized OTTI credit losses of \$5.7 million. There were no sale transactions of any investment securities with previously recognized OTTI credit losses for the six months ended June 30, 2016.

Realized Gains and Losses

The following table presents the proceeds, gross realized gains and losses related to the sales of available-for-sale investment securities for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months		Six Months Ended	
	Ended June 30,		June 30,	
	2016	2015	2016	2015
Proceeds from sales	\$211,990	\$292,561	\$864,743	\$473,062
Gross realized gains	\$2,836	\$5,554	\$6,803	\$9,958
Gross realized losses	\$—	\$—	\$125	\$—
Related tax expense	\$1,192	\$2,333	\$2,808	\$4,182

There were no sales of held-to-maturity investment securities for the three and six months ended June 30, 2016 and 2015.

Scheduled Maturities of Investment Securities

The following table presents the scheduled maturities of available-for-sale investment securities as of June 30, 2016:

(\$ in thousands)	Amortized Cost	Estimated Fair Value
Due within one year	\$854,642	\$854,787
Due after one year through five years	625,607	633,105
Due after five years through ten years	350,091	352,152
Due after ten years	1,389,708	1,400,288
Total available-for-sale investment securities	\$3,220,048	\$3,240,332

The following table presents the scheduled maturity of the held-to-maturity investment security as of June 30, 2016:

(\$ in thousands)	Amortized Cost	Estimated Fair Value
Due after ten years	\$ 159,208	\$ 158,279

Actual maturities of mortgage-backed securities can differ from contractual maturities because borrowers have the right to prepay obligations. In addition, such factors as prepayments and interest rates may affect the yields on the carrying values of mortgage-backed securities.

Available-for-sale investment securities with fair values of \$1.06 billion and \$873.0 million as of June 30, 2016 and December 31, 2015, respectively, were pledged to secure public deposits, repurchase agreements, the Federal Reserve Bank's discount window, and for other purposes required or permitted by law.

NOTE 6 — DERIVATIVES

The Company uses derivatives to manage exposure to market risk, including interest rate risk and foreign currency risk and to assist customers with their risk management objectives. The Company's goal is to manage interest rate sensitivity and volatility so that movements in interest rates are not significant to earnings or capital. The Company also uses foreign exchange contracts to manage the foreign exchange risk associated with certain foreign currency-denominated assets and liabilities, as well as the Company's investment in East West Bank (China) Limited, a non-USD functional currency subsidiary in China. The Company recognizes all derivatives on the Consolidated Balance Sheets at fair value. While the Company designates certain derivatives as hedging instruments in a qualifying hedge accounting relationship, other derivatives consist of economic hedges. For additional information on the Company's derivatives and hedging activities, please see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K.

The following table presents the total notional and fair values of the Company's derivatives as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016			December 31, 2015		
	Notional Amount	Fair Value Derivative Assets ⁽¹⁾	Derivative Liabilities ⁽¹⁾	Notional Amount	Fair Value Derivative Assets ⁽¹⁾	Derivative Liabilities ⁽¹⁾
Derivatives designated as hedging instruments:						
Interest rate swaps on certificates of deposit	\$48,365	\$—	\$ 810	\$112,913	\$—	\$ 5,213
Foreign currency forward contracts	85,451	1,732	—	86,590	2,365	—
Total derivatives designated as hedging instruments	\$133,816	\$1,732	\$ 810	\$199,503	\$2,365	\$ 5,213
Derivatives not designated as hedging instruments:						
Interest rate swaps and options	\$7,069,886	\$157,035	\$ 159,776	\$6,494,900	\$67,215	\$ 67,325
Foreign exchange contracts	782,104	10,078	8,634	652,993	10,254	9,350
RPA's	47,354	—	12	43,033	—	4
Total derivatives not designated as hedging instruments	\$7,899,344	\$167,113	\$ 168,422	\$7,190,926	\$77,469	\$ 76,679

Derivative assets are included in Other assets on the Consolidated Balance Sheets. Derivative liabilities are (1) included in Accrued expenses and other liabilities and Interest-bearing deposits on the Consolidated Balance Sheets.

Derivatives Designated as Hedging Instruments

Interest Rate Swaps on Certificates of Deposit — The Company is exposed to changes in the fair value of certain fixed rate certificates of deposit due to changes in the benchmark interest rate, London Interbank Offering Rate. Interest rate swaps designated as fair value hedges involve the receipt of fixed rate amounts from a counterparty in exchange for the Company making variable-rate payments over the life of the agreements without the exchange of the underlying notional amount.

The total notional amounts of the interest rate swaps on certificates of deposit were \$48.4 million and \$112.9 million, as of June 30, 2016 and December 31, 2015, respectively. The fair value liabilities of the interest rate swaps were \$810 thousand and \$5.2 million as of June 30, 2016 and December 31, 2015, respectively. This decrease was primarily due to \$24.3 million and \$63.7 million notional amounts of interest rate swaps on certificates of deposit that were called during the three and six months ended June 30, 2016, respectively.

The following table presents the net gains (losses) recognized on the Consolidated Statements of Income related to derivatives designated as fair value hedges for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
Gains (losses) recorded in interest expense:				
Recognized on interest rate swaps	\$142	\$(2,291)	\$4,371	\$757
Recognized on certificates of deposit	(7)	2,294	(3,362)	(401)
Net amount recognized on fair value hedges (ineffective portion)	\$135	\$3	\$1,009	\$356

Net Investment Hedges — Consistent with ASC 830-20, Foreign Currency Matters — Foreign Currency Transactions, ASC 815 allows hedging of the foreign currency risk of a net investment in a foreign operation. During the fourth quarter of 2015, the Company entered into foreign currency forward contracts to hedge its investment in East West Bank (China) Limited, a non-USD functional currency subsidiary in China. The hedging instruments designated as net investment hedges, involve hedging the risk of changes in the USD equivalent value of a designated monetary amount of the Company's net investment in China, against the risk of adverse changes in the foreign currency exchange rate. The Company expects that the hedging instrument will be highly effective in offsetting the changes in the value of the hedged net investment attributable to the hedged risk. The Company recorded the changes in the carrying amount of its China subsidiary in the Foreign Currency Translation Adjustment account within AOCI. Simultaneously, the effective portion of the hedge of this exposure was also recorded in the Foreign Currency Translation Adjustment account and the ineffective portion, if any, was recorded in current earnings.

As of June 30, 2016, the notional amounts and fair values of the foreign currency forward contracts were \$85.5 million and a \$1.7 million asset, respectively. The following table presents the losses recorded in the Foreign currency translation account within AOCI related to the effective portion of the net investment hedges and ineffectiveness recorded on the Consolidated Statements of Income for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Gains recognized in AOCI on net investment hedges (effective portion)	\$1,712	\$ —	—	\$ —
Gains (losses) recognized in Foreign exchange income (ineffective portion)	\$449	\$ —	—	\$ —

Derivatives Not Designated as Hedging Instruments

Interest Rate Swaps and Options — The Company enters into interest rate derivatives including interest rate swaps and options with its customers to allow them to hedge against the risk of rising interest rates on their variable rate loans. To economically hedge against the interest rate risks in the products offered to its customers, the Company enters into mirrored interest rate contracts with institutional counterparties. As of June 30, 2016, the total notional amounts of interest rate swaps and options, including mirrored transactions with institutional counterparties and the Company's customers totaled \$3.53 billion for derivatives that were in an asset valuation position and \$3.53 billion for derivatives that were in a liability valuation position. As of December 31, 2015, the total notional amounts of interest rate swaps and options, including mirrored transactions with institutional counterparties and the Company's customers totaled \$3.25 billion for derivatives that were in an asset valuation position and \$3.25 billion for derivatives that were in a liability valuation position. The fair values of interest rate swap and option contracts, including with institutional counterparties and the Company's customers amounted to a \$157.0 million asset and a \$159.8 million liability as of June 30, 2016. The fair values of interest rate swap and option contracts, including with institutional counterparties and the Company's customers amounted to a \$67.2 million asset and a \$67.3 million liability as of December 31, 2015.

Foreign Exchange Contracts — The Company enters into foreign exchange contracts on a regular basis to economically hedge against foreign exchange rate fluctuations. A majority of these contracts have original maturities of one year or less. As of June 30, 2016 and December 31, 2015, the notional amounts of short-term foreign exchange contracts were \$782.1 million and \$653.0 million, respectively. The fair values of the short-term foreign exchange contracts recorded were a \$10.1 million asset and an \$8.6 million liability as of June 30, 2016. The fair values of short-term foreign exchange contracts recorded were a \$10.3 million asset and a \$9.4 million liability as of December 31, 2015.

RPAs — The Company has entered into RPAs under which the Company assumed its pro-rata share of the credit exposure associated with the borrower's performance related to interest rate derivative contracts. The Company may or may not be a party to the interest rate derivative contract and enters into such RPAs in instances where the Company is a party to the related loan participation agreement with the borrower. The Company will make/receive payments under the RPAs if the borrower defaults on its obligation to perform under the interest rate derivative contract. The Company manages its credit risk on the RPAs by monitoring the credit worthiness of the borrowers, which is based on the normal credit review process. The notional amount of the RPAs reflects the Company's pro-rata share of the derivative instrument. As of June 30, 2016, the notional amount and the fair values of RPAs purchased were approximately \$33.4 million and a \$12 thousand liability, respectively. As of June 30, 2016, the notional amount of the RPAs sold was approximately \$14.0 million and the fair value of the derivative asset was insignificant. As of December 31, 2015, the notional amount and the fair values of RPAs purchased were approximately \$33.7 million and a \$4 thousand liability, respectively. As of December 31, 2015, the notional amount of the RPA sold was approximately \$9.3 million and the fair value of the derivative asset was insignificant. Assuming all underlying borrowers referenced in the interest rate derivative contracts defaulted as of June 30, 2016 and December 31, 2015, the exposures from the RPAs purchased would be \$610 thousand and \$257 thousand, respectively. As of June 30, 2016 and December 31, 2015, the weighted average remaining maturities of the outstanding RPAs were 2.6 years and 3.2 years, respectively.

Foreign Exchange Options — During 2010, the Company entered into foreign exchange option contracts with major brokerage firms to economically hedge against foreign exchange fluctuations in certain certificates of deposit available to its customers. These certificates of deposit had a term of five years and paid interest based on the performance of the Chinese Renminbi relative to the USD. These instruments expired in the second quarter of 2015.

The following table presents the net gains (losses) recognized on the Company's Consolidated Statements of Income related to derivatives not designated as hedging instruments for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Location in Consolidated Statements of Income	Three Months Ended June 30,		Six Months Ended June 30,	
		2016	2015	2016	2015
Derivatives not designated as hedging instruments:

Foreign exchange contracts	Foreign exchange income	3,069	908	8,277	2,216
RPA	Other fees and operating income	—	—	(8) —
Foreign exchange options	Foreign exchange income	—	37	—	236
Embedded derivative liabilities	Other operating expense	—	5	—	(136
Total net income		\$1,149	\$2,165	\$5,635	\$2,937

Credit-Risk-Related Contingent Features — Certain over-the-counter derivative contracts of the Company contain early termination provisions that may require the Company to settle any outstanding balances upon the occurrence of a specified credit-risk-related event. These events, which are defined by the existing derivative contracts, primarily relate to downgrades in the event that the credit rating of East West Bank falls below investment grade. In the event that East West Bank's credit rating is downgraded to below investment grade, minimal additional collateral would be required to be posted as of June 30, 2016. No additional collateral would be required to be posted as of as of December 31, 2015, since the liabilities related to such contracts were already fully collateralized.

Offsetting of Derivatives

The Company has entered into agreements with counterparty financial institutions, which include master netting agreements. However, the Company has elected to account for all derivatives with counterparty institutions on a gross basis. The following tables present gross derivatives on the Consolidated Balance Sheets and the respective collateral received or pledged in the form of other financial instruments, which are generally marketable securities and/or cash. The collateral amounts in these tables are limited to the outstanding balances of the related asset or liability (after netting is applied); thus instances of overcollateralization are not shown:

(\$ in thousands) As of June 30, 2016

(1) Represents the netting of derivative receivable and payable balances for the same counterparty under enforceable master netting arrangements if the Company has elected to net.

Represents \$553 thousand and \$3.1 million of cash collateral received against derivative assets with the same (2) counterparty that are subject to enforceable master netting arrangements as of June 30, 2016 and December 31, 2015, respectively.

Represents cash and securities pledged against derivative liabilities with the same counterparty that are subject to (3) enforceable master netting arrangements. Includes approximately \$52.0 million and \$21.1 million of cash collateral posted as of June 30, 2016 and December 31, 2015, respectively.

In addition to the amounts included in the table above, the Company also has balance sheet netting related to resale and repurchase agreements, please refer to Note 4 — Securities Purchased Under Resale Agreements And Sold Under Repurchase Agreements to the Consolidated Financial Statements. Please refer to Note 3 — Fair Value Measurement And Fair Value Of Financial Instruments to the Consolidated Financial Statements for fair value measurement disclosures on derivatives.

NOTE 7 — LOANS RECEIVABLE AND ALLOWANCE FOR CREDIT LOSSES

The Company's held-for-investment loan portfolio includes originated and purchased loans. Originated and purchased loans with no evidence of credit deterioration at their acquisition date are referred to collectively as non-PCI loans. Purchased credit impaired ("PCI") loans are loans acquired with evidence of credit deterioration since their origination and it is probable at the acquisition date that the Company would be unable to collect all contractually required payments. PCI loans are accounted for under ASC Subtopic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. The Company has elected to account for PCI loans on a pool level basis in accordance with ASC 310-30 at the time of acquisition.

The following table presents the composition of the Company's non-PCI and PCI loans as of June 30, 2016 and December 31, 2015:

(1) Loans net of ASC 310-30 discount.

The Company's CRE segment provides financing for income producing properties, construction properties and land. Commercial business and trade finance in the C&I segment provide financing to small and middle market businesses in a wide spectrum of industries. This includes loans for working capital, accounts receivable and inventory lines of credit, Small Business Administration loans, lease financing and financing to international trade companies with trade financial services and products, including letters of credit, revolving lines of credit, import loans, bankers' acceptances, working capital lines of credit, domestic purchase financing and pre-export financing.

The Company's adjustable rate mortgage ("ARM") single-family residential loans are comprised primarily of first mortgage loans secured by one-to-four unit residential properties. The Company's ARM single-family residential loan programs generally have a one-year, three-year or five-year initial fixed period. The Company's multifamily residential

loans are comprised primarily of variable rate loans that have a six-month or three-year initial fixed period. As of June 30, 2016 and December 31, 2015, consumer loans were comprised primarily of home equity lines of credit.

All loans originated are subject to the Company's underwriting guidelines and loan origination standards. Management believes that the Company's underwriting criteria and procedures adequately consider the unique risks which may come from these products. The Company conducts a variety of quality control procedures and periodic audits, including review of criteria for lending and legal requirements, to ensure it is in compliance with its origination standards.

As of June 30, 2016 and December 31, 2015, loans totaling \$16.05 billion and \$15.91 billion, respectively, were pledged to secure borrowings and to provide additional borrowing capacity from the FHLB and the Federal Reserve Bank.

Credit Quality Indicators

All loans are subject to the Company's internal and external credit review and monitoring. Loans are risk rated based on an analysis of the current state of the borrower's credit quality. The analysis of credit quality includes a review of all repayment sources, the borrower's current payment performance/delinquency, current financial and liquidity status and all other relevant information. For single-family residential loans, payment performance/delinquency is the driving indicator for the risk ratings. Risk ratings are the overall credit quality indicator for the Company and the credit quality indicator utilized for estimating the appropriate allowance for loan losses. The Company utilizes a risk rating system, which can be classified within the following categories: Pass, Watch, Special Mention, Substandard, Doubtful and Loss. The risk ratings reflect the relative strength of the repayment sources.

Pass and Watch loans are generally considered to have sufficient sources of repayment in order to repay the loan in full in accordance with all terms and conditions. These borrowers may have some credit risks that require monitoring, but full repayments are expected. Special Mention loans are considered to have potential weaknesses that warrant closer attention by management. Special Mention is considered a transitory grade. If potential weaknesses are resolved, the loan is upgraded to a Pass or Watch grade. If negative trends in the borrower's financial status or other information indicates that the repayment sources may become inadequate, the loan is downgraded to a Substandard grade. Substandard loans are considered to have well-defined weaknesses that jeopardize the full and timely repayment of the loan. Substandard loans have a distinct possibility of loss, if the deficiencies are not corrected. Additionally, when management has assessed a potential for loss but a distinct possibility of loss is not recognizable, the loan is still classified as Substandard. Doubtful loans have insufficient sources of repayment and a high probability of loss. Loss loans are considered to be uncollectible and of such little value that they are no longer considered bankable assets. These internal risk ratings are reviewed routinely and adjusted based on changes in the borrowers' financial status and collectability.

The following tables present the credit risk rating for non-PCI loans by portfolio segment as of June 30, 2016 and December 31, 2015:

For information on the policy for recording payments received and resuming accrual of interest on non-PCI loans that are placed on nonaccrual status, please see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K.

PCI loans are excluded from the above aging analysis tables as the Company has elected to account for these loans on a pool level basis in accordance with ASC 310-30 at the time of acquisition. Please refer to the discussion on PCI loans within this note for additional details on interest income recognition. As of June 30, 2016 and December 31, 2015, PCI loans on nonaccrual status totaled \$31.4 million and \$37.7 million, respectively.

Loans in Process of Foreclosure

As of June 30, 2016 and December 31, 2015, the Company had \$14.2 million and \$18.0 million, respectively, of recorded investment in consumer mortgage loans secured by residential real estate properties, for which formal foreclosure proceedings were in process according to local requirements of the applicable jurisdictions, which were not included in OREO. No foreclosed residential real estate properties were included in total net OREO of \$4.9 million as of June 30, 2016. In comparison, foreclosed residential real estate properties with a carrying amount of \$912 thousand were included in total net OREO of \$7.0 million as of December 31, 2015.

Troubled Debt Restructurings (“TDRs”)

Potential TDRs are individually evaluated and the type of restructuring is selected based on the loan type and the circumstances of the borrower’s financial difficulty in order to maximize the Company’s recovery. A TDR is a modification of the terms of a loan when the Company, for economic or legal reasons related to the borrower’s financial difficulties, grants a concession to the borrower, it would not otherwise consider.

The following tables present the additions to non-PCI TDRs for the three and six months ended June 30, 2016 and 2015:

(1) Principal modification includes forbearance payments, term extensions and principal deferments that modify the terms of the loan from principal and interest payments to interest payments only.

(2) Principal and interest modification includes principal and interest deferments or reductions.

Subsequent to restructuring, a TDR that becomes delinquent, generally beyond 90 days, is considered to have defaulted. There were no subsequent defaults during the three months ended June 30, 2016 and 2015 for non-PCI loans that were modified as TDRs within the previous 12 months. The following table presents information for loans modified as TDRs within the previous 12 months that have subsequently defaulted during the six months ended June 30, 2016 and 2015, and are still in default at period end:

Loans Modified as TDRs that Subsequently Defaulted During the Six Months Ended June 30,						
(\$ in thousands)	2016			2015		
	Number of Loans	Recorded Investment		Number of Loans	Recorded Investment	
C&I:						
Commercial business	3	\$	568	—	\$	—

The amount of additional funds committed to lend to borrowers whose terms have been modified was \$4.3 million as of June 30, 2016. The amount of additional funds committed to lend to borrowers whose terms have been modified was immaterial as of December 31, 2015.

Impaired Loans

The Company's loans are grouped into heterogeneous and homogeneous (mostly consumer loans) categories. Classified loans in the heterogeneous category are identified and evaluated for impairment on an individual basis. A loan is considered impaired when, based on current information and events, it is probable that the Company will not be able to collect all scheduled payments of principal or interest due in accordance with the original contractual terms. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as expedient, at the loan's observable market price or the fair value of the collateral, if the loan is collateral dependent, less costs to sell. When the value of an impaired loan is less than the recorded investment and the loan is classified as nonperforming and uncollectible, the deficiency is charged-off against the allowance for loan losses. Impaired loans exclude the homogeneous consumer loan portfolio, which is evaluated collectively for impairment. The Company's impaired loans include predominantly non-PCI loans held-for-investment on nonaccrual status and any non-PCI loans modified in a TDR, which may be on accrual or nonaccrual status.

The following tables present information on impaired non-PCI loans as of June 30, 2016 and December 31, 2015:

For further information on accounting policies and the methodology used to estimate the allowance for credit losses and loan charge-offs, please see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K.

The following table presents a summary of activities in the allowance for unfunded credit reserves during the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Beginning balance	\$21,414	\$15,632	\$20,360	\$12,712
(Reversal of) provision for unfunded lending commitments	(1,096)	4,109	(42)	7,029
Ending balance	\$20,318	\$19,741	\$20,318	\$19,741

The allowance for unfunded credit reserves is maintained at a level believed by management to be sufficient to absorb estimated probable losses related to unfunded credit facilities. The allowance for unfunded credit reserves is included in Accrued expense and other liabilities on the Consolidated Balance Sheets. Please refer to Note 10 — Commitments And Contingencies to the Consolidated Financial Statements for additional information related to unfunded credit reserves.

The following tables present the Company's allowance for loan losses and recorded investments by portfolio segment and impairment methodology as of June 30, 2016 and December 31, 2015:

(1)Loans net of ASC 310-30 discount.

42

PCI Loans

At the date of acquisition, PCI loans are pooled and accounted for at fair value, which represents the discounted value of the expected cash flows of the loan portfolio. The amount of expected cash flows over the initial investment in the loan represents the “accretable yield,” which is recognized as interest income on a level yield basis over the life of the loan. The excess of total contractual cash flows over the cash flows expected to be received at origination is deemed as the “nonaccretable difference.”

The following table presents the changes in accretable yield for PCI loans for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended		Six Months Ended	
	June 30, 2016	2015	June 30, 2016	2015
Beginning balance	\$185,991	\$293,155	\$214,907	\$311,688
Accretion	(16,254)	(23,359)	(38,683)	(53,928)
Changes in expected cash flows	(2,960)	2,066	(9,447)	14,102
Ending balance	\$166,777	\$271,862	\$166,777	\$271,862

Loans Held for Sale

Loans held for sale are carried at the LOCOM. When a determination is made at the time of commitment to originate or purchase loans as held-for-investment, it is the Company’s intent to hold these loans to maturity or for the “foreseeable future,” subject to periodic review under the Company’s management evaluation processes, including asset/liability management. When the Company subsequently changes its intent to hold certain loans, the loans are transferred from the loans held-for-investment portfolio to the loans held for sale portfolio at LOCOM.

Loans held for sale amounted to \$51.3 million as of June 30, 2016, and comprised mainly of multifamily residential and consumer loans. In comparison, as of December 31, 2015 loans held for sale amounted to \$32.0 million and comprised of consumer loans. Transfers of loans held-for-investment to loans held for sale were \$267.1 million and \$575.8 million, respectively, for the three and six months ended June 30, 2016. These loans transfers were comprised of multifamily residential, C&I and CRE loans. In comparison, loans held-for-investment transferred to loans held for sale of \$335.7 million and \$1.16 billion, respectively, for the three and six months ended June 30, 2015, were comprised primarily of single-family residential loans and C&I loans. The Company recorded \$37 thousand and \$1.9 million in write-downs to the allowance for loan losses related to loans transferred from loans held-for-investment to loans held for sale for the three and six months ended June 30, 2016, respectively. In comparison, the Company recorded \$441 thousand and \$2.1 million in write-downs to the allowance for loan losses related to loans transferred from loans held-for-investment to loans held for sale for the three and six months ended June 30, 2015, respectively.

During the three months ended June 30, 2016 and 2015, the Company sold \$166.0 million and \$232.3 million, respectively, in originated loans resulting in net gains of \$2.8 million and \$5.8 million, respectively. During the six months ended June 30, 2016 the Company sold or securitized approximately \$422.2 million in originated loans resulting in net gains of \$7.1 million. During the six months ended June 30, 2016, the Company recorded \$1.1 million in net gains and \$641 thousand in mortgage servicing rights, and retained \$160.1 million of the senior tranche of the resulting securities from the securitization of \$201.7 million of multifamily residential loans. Originated loans sold or securitized during the six months ended June 30, 2016 were primarily comprised of multifamily residential, CRE and C&I loans. In comparison, during the six months ended June 30, 2015, the Company sold \$559.1 million in originated loans, which were primarily comprised of single-family residential and C&I loans, resulting in net gains of \$14.3

million.

From time to time, the Company purchases loans (including participation loans) and sells loans in the secondary market. The Company sold approximately \$79.7 million and \$133.6 million of loans in the secondary market, respectively, resulting in gains on sales of loans of \$69 thousand for both the three and six months ended June 30, 2016. In comparison, the Company sold approximately \$103.1 million and \$446.1 million of loans in the secondary market at net gains of \$30 thousand and \$1.0 million for the three and six months ended June 30, 2015, respectively.

No LOCOM adjustments related to the loans held for sale portfolio were recorded for three months ended June 30, 2016, compared to the \$517 thousand recorded for the three months ended June 30, 2015. For the six months ended June 30, 2016 and 2015, the Company recorded \$2.4 million and \$517 thousand, respectively, in LOCOM adjustments related to the loans held for sale portfolio. LOCOM adjustments are recorded in Net gains on sales of loans on the Consolidated Statements of Income.

NOTE INVESTMENTS IN QUALIFIED AFFORDABLE HOUSING PARTNERSHIPS, TAX CREDIT AND
8 OTHER INVESTMENTS, NET

The Community Reinvestment Act (“CRA”) encourages banks to meet the credit needs of their communities for housing and other purposes, particularly in neighborhoods with low or moderate income. The Company invests in certain affordable housing limited partnerships that qualify for CRA credits. Such limited partnerships are formed to develop and operate apartment complexes designed as high-quality affordable housing for lower income tenants throughout the United States. Each of the partnerships must meet the regulatory requirements for affordable housing for a minimum 15-year compliance period to fully utilize the tax credits. In addition to affordable housing limited partnerships, the Company invests in new market tax credit projects that qualify for CRA credits and eligible projects that qualify for renewable energy and historic tax credits. Investments in renewable energy tax credits help promote the development of renewable energy sources, while the investments in historic tax credits promote the rehabilitation of historic buildings and economic revitalization of the surrounding areas.

Investments in Qualified Affordable Housing Partnerships, Net

The Company records its investments in qualified affordable housing partnerships, net using the proportional amortization method. Under the proportional amortization method, the Company amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received, and recognizes the amortization on the Consolidated Statements of Income as a component of income tax expense. The following table presents the balances of the Company’s investments in qualified affordable housing partnerships, net and related unfunded commitments as of the periods indicated:

(\$ in thousands)	June 30, 2016	December 31, 2015
Investments in qualified affordable housing partnerships, net	\$ 179,657	\$ 193,978
Accrued expenses and other liabilities — Unfunded commitments	\$ 45,995	\$ 61,525

The following table presents additional information related to the Company’s investments in qualified affordable housing partnerships, net for the periods indicated:

(\$ in thousands)	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
Tax credits and other tax benefits recognized	\$ 8,518	\$ 8,605	\$ 17,970	\$ 17,380
Amortization expense included in income tax expense	\$ 7,345	\$ 6,152	\$ 14,311	\$ 12,396

Investments in Tax Credit and Other Investments, Net

Investments in tax credit and other investments, net were \$177.9 million and \$187.2 million as of June 30, 2016 and December 31, 2015, respectively, and were included in Other assets on the Consolidated Balance Sheets. The Company is not the primary beneficiary in these partnerships and, therefore, is not required to consolidate its investments in tax credit and other investments on the Consolidated Financial Statements. Depending on the ownership percentage and the influence the Company has on the limited partnership, the Company applies either the equity method or cost method of accounting.

Total unfunded commitments for these investments were \$102.9 million and \$113.2 million as of June 30, 2016 and December 31, 2015, respectively, and were included in Accrued expenses and other liabilities on the Consolidated Balance Sheets. Amortization of tax credit and other investments were \$14.0 million and \$3.0 million for the three months ended June 30, 2016 and 2015, respectively. Amortization of tax credits and other investments were \$28.2 million and \$9.3 million for the six months ended June 30, 2016 and 2015, respectively.

NOTE 9 — GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

Total goodwill of \$469.4 million remained unchanged as of June 30, 2016 compared to December 31, 2015. Goodwill is tested for impairment on an annual basis as of December 31st, or more frequently as events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The Company's three operating segments, Retail Banking, Commercial Banking, and Other, are equivalent to the Company's reporting units. For complete discussion and disclosure, please refer to Note 14 — Business Segments to the Consolidated Financial Statements.

Impairment analysis

The Company performed its annual impairment analysis as of December 31, 2015 and concluded that there was no goodwill impairment as the fair values of all reporting units exceeded the carrying amounts of goodwill. There were no triggering events during the six months ended June 30, 2016 and therefore, no additional goodwill impairment analysis was performed. No assurance can be given that goodwill will not be written down in future periods. Please refer to Note 10 - Goodwill and Other Intangible Assets to the Consolidated Financial Statements of the Company's 2015 Form 10-K for additional details related to the Company's annual goodwill impairment analysis.

Premiums on Acquired Deposits

Premiums on acquired deposits represent the intangible value of depositor relationships resulting from deposit liabilities assumed in various acquisitions. These intangibles are tested for impairment on an annual basis, or more frequently as events occur, or as current circumstances and conditions warrant. There were no impairment write-downs on deposit premiums for the six months ended June 30, 2016 and 2015.

The following table presents the gross carrying value of intangible assets and accumulated amortization as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016	December 31, 2015
Gross balance	\$108,814	\$108,814
Accumulated amortization	76,893	72,739
Net carrying balance	\$31,921	\$36,075

Amortization Expense

The Company amortizes premiums on acquired deposits based on the projected useful lives of the related deposits. The amortization expense related to the intangible assets was \$2.1 million and \$2.3 million for the three months ended June 30, 2016 and 2015, respectively, and \$4.2 million and \$4.7 million for the six months ended June 30, 2016 and 2015, respectively.

The following table presents the estimated future amortization expense of premiums on acquired deposits:

Year Ended December 31,	Amount
(\$ in thousands)	
Remainder of 2016	\$3,932

Edgar Filing: EAST WEST BANCORP INC - Form 10-Q

2017	6,935
2018	5,883
2019	4,864
2020	3,846
Thereafter	6,461
Total	\$31,921

NOTE 10 — COMMITMENTS AND CONTINGENCIES

Credit Extensions — In the normal course of business, the Company has various outstanding commitments to extend credit that are not reflected in the accompanying Consolidated Financial Statements. While the Company does not anticipate losses as a result of these transactions, commitments to extend credit are included in determining the appropriate level of the allowance for unfunded commitments and unissued commercial letters of credit and standby letters of credit (“SBLCs”). For further information about these commitments, including their terms, see Note 14 — Commitments, Contingencies and Related Party Transactions Policies to the Consolidated Financial Statements of the Company’s 2015 Form 10-K. The following table presents the Company’s credit-related commitments as of the periods indicated:

(\$ in thousands)	June 30, 2016	December 31, 2015
Loan commitments	\$4,758,116	\$3,370,271
Commercial letters of credit and SBLCs	\$1,447,447	\$1,293,547

Loan commitments are agreements to lend to a customer provided there is no violation of any condition established in the agreement. Commitments generally have fixed expiration dates or other termination clauses and may require maintenance of compensatory balances. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements.

Commercial letters of credit are issued to facilitate domestic and foreign trade transactions while SBLCs generally are contingent upon the failure of the customers to perform according to the terms of the underlying contract with the third party. As a result, the total contractual amounts do not necessarily represent future funding requirements. The Company’s historical experience is that SBLCs typically expire without being funded. Additionally, in many cases, the Company holds collateral in various forms against these SBLCs. As a part of its risk management activities, the Company monitors the creditworthiness of customers in conjunction with its SBLC exposure. Customers are obligated to reimburse the Company for any payment made on the customers’ behalf. If customers fail to pay, the Company would, as applicable, liquidate the collateral and/or offset accounts. Total letters of credit of \$1.45 billion consisted of commercial letters of credit of \$43.7 million and SBLCs of \$1.40 billion as of June 30, 2016.

The Company uses the same credit underwriting criteria in extending loans, commitments, and conditional obligations to customers. Each customer’s creditworthiness is evaluated on a case-by-case basis. Collateral may be obtained based on management’s assessment of the customer’s credit. Collateral may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial property.

Estimated exposure to loss from these commitments is included in the allowance for unfunded credit reserves and amounted to \$19.8 million as of both June 30, 2016 and December 31, 2015. These amounts are included in Accrued expenses and other liabilities on the Consolidated Balance Sheets.

Guarantees — The Company has sold or securitized loans with recourse in the ordinary course of business. The recourse component in the loans sold or securitized with recourse is considered a guarantee. As the guarantor, the Company is obligated to make payments when the loans default. As of June 30, 2016 and December 31, 2015, the unpaid principal balance of total loans sold or securitized with recourse amounted to \$168.6 million and \$191.3 million, respectively. The maximum potential future payments of loans subject to full recourse, which generally represents the unpaid principal balance of total loans sold or securitized with recourse, were \$26.4 million and \$29.8 million as of June 30, 2016 and December 31, 2015, respectively. The maximum potential future payments of loans subject to limited recourse were \$5.2 million and \$5.9 million as of June 30, 2016 and December 31, 2015, respectively. The recourse

provision on multifamily loans varies by loan sale and is limited to 4% of the top loss on the underlying loans. The Company's recourse reserve related to these guarantees is included in the allowance for unfunded credit reserves and totaled \$499 thousand and \$630 thousand as of June 30, 2016 and December 31, 2015, respectively. The allowance for unfunded credit reserves is included in Accrued expenses and other liabilities on the Consolidated Balance Sheets. The Company continues to experience minimal losses from the single-family and multifamily residential loan portfolios sold or securitized with recourse.

Litigation — The Company is a party to various legal actions arising in the normal course of business. In accordance with ASC 450, Contingencies, the Company accrues reserves for currently outstanding lawsuits, claims, and proceedings when a loss contingency is probable and can be reasonably estimated. The outcome of such legal actions is inherently difficult to predict and it is possible that one or more of the currently pending, threatened legal or regulatory matters could have a material adverse effect on the Company's liquidity, consolidated financial position, and/or results of operations. Based on the information currently available, advice of counsel and established reserves, the Company believes that the eventual outcome of pending legal matters will not individually or in the aggregate have a material adverse effect on the Company's consolidated financial position. On September 8, 2014, a jury in the case titled "F&F, LLC and 618 Investment, Inc. v. East West Bank," Superior Court of the State of California for the County of Los Angeles, Case No. BC462714, delivered a verdict in favor of plaintiff F&F, LLC. The case is being appealed. The litigation accrual was \$37.2 million and \$35.4 million as of June 30, 2016 and December 31, 2015, respectively.

Other Commitments — The Company has commitments to invest in qualified affordable housing partnerships and other tax credit investments qualifying for historic rehabilitation tax credits or other types of tax credits. These commitments are payable on demand. As of June 30, 2016 and December 31, 2015, these commitments were \$148.9 million and \$174.7 million, respectively. These commitments are included in Accrued expenses and other liabilities on the Consolidated Balance Sheets.

NOTE 11 — STOCK COMPENSATION PLANS

Pursuant to the Company's 2016 Stock Incentive Plan, as amended, the Company may issue stock options, restricted stock awards ("RSAs") and restricted stock units ("RSUs") to employees. The Company did not issue any stock options or RSAs during the six months ended June 30, 2016 and 2015. All RSAs have vested during 2015.

RSUs are granted under the Company's long-term incentive plan at no cost to the recipient. RSUs vest ratably over three years or cliff vest after three or five years of continued employment from the date of the grant. RSUs entitle the recipient to receive cash dividends equivalent to any dividends paid on the underlying common stock. The RSU dividends are accrued during the vesting period and are paid at the time of vesting. While a portion of the RSUs are time-vesting awards, others vest subject to the attainment of specified performance goals. All RSUs are subject to forfeiture until vested.

The following table presents the total stock compensation expense and the related net tax benefit associated with the Company's various employee share-based compensation plans for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
Stock compensation costs	\$4,635	\$3,698	\$9,210	\$7,652
Net tax benefit recognized in equity for stock compensation plans	\$19	\$51	\$1,005	\$3,196

The following table presents a summary of the activity for the Company's time-based and performance-based RSUs for the six months ended June 30, 2016 based on the target amount of awards:

Six Months Ended June 30, 2016
Time-Based RSUs

	Performance-Based RSUs			
	Shares	Weighted Average Grant-Date Fair Value	Shares	Weighted Average Grant-Date Fair Value
Outstanding at beginning of period	933,312	\$ 36.83	389,358	\$ 34.21
Granted	486,607	31.37	159,407	29.18
Vested	(114,824)	25.12	(138,019)	25.25
Forfeited	(56,581)	35.95	—	—
Outstanding at end of period	1,248,514	\$ 35.82	410,746	\$ 35.27

Compensation cost for the time-based awards is based on the quoted market price of the Company's stock at the grant date. Performance-based awards granted that include discretionary performance-based vesting conditions are subject to variable accounting. As of June 30, 2016, total unrecognized compensation cost related to time-based and performance-based RSUs amounted to \$31.0 million and \$11.4 million, respectively. This cost is expected to be recognized over a weighted average period of 2.01 years and 1.86 years, respectively.

NOTE 12 — STOCKHOLDERS' EQUITY AND EARNINGS PER SHARE

Warrant — The Company acquired MetroCorp Bancshares, Inc., ("MetroCorp") on January 17, 2014. Prior to the acquisition, MetroCorp had an outstanding warrant to purchase 771,429 shares of its common stock. Upon the acquisition, the rights of the warrant holder were converted into the right to acquire 230,282 shares of East West's common stock until January 16, 2019. The warrant has not been exercised as of June 30, 2016.

EPS — Basic EPS is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during each period. Diluted EPS is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during each period, plus common share equivalents calculated for stock options, warrants and RSUs outstanding using the treasury stock method. The Company has issued RSAs, which are unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents. These RSAs are considered participating securities. Accordingly, the Company applied the two-class method in the computation of basic and diluted EPS in periods where RSAs are outstanding. RSUs do not contain nonforfeitable rights to dividends when granted. As of June 30, 2016, there were no RSAs outstanding.

The following table presents EPS calculations for the three and six months ended June 30, 2016 and 2015:

	Three Months Ended June 30,		Six Months Ended June 30,	
(\$ in thousands, except per share data, shares in thousands)	2016	2015	2016	2015
Basic				
Net income	\$103,284	\$98,748	\$210,800	\$198,775
Less: Earnings allocated to participating securities	—	—	—	3
Net income allocated to common stockholders	\$103,284	\$98,748	\$210,800	\$198,772
Basic weighted average number of shares outstanding	144,101	143,846	144,029	143,751
Basic EPS	\$0.72	\$0.69	\$1.46	\$1.38
Diluted				
Net income allocated to diluted common stockholders	\$103,284	\$98,748	\$210,800	\$198,772
Basic weighted average number of shares outstanding	144,101	143,846	144,029	143,751
Diluted potential common shares ⁽¹⁾	977	634	944	657
Diluted weighted average number of shares outstanding	145,078	144,480	144,973	144,408
Diluted EPS	\$0.71	\$0.68	\$1.45	\$1.38

⁽¹⁾ Includes dilutive shares from RSUs and warrants for the three and six months ended June 30, 2016 and 2015. Also includes dilutive shares from stock options for the three and six months ended June 30, 2015.

For the three months ended June 30, 2016 and 2015, approximately 3 thousand weighted average anti-dilutive shares of RSUs were excluded from the diluted EPS computation for both periods. For the six months ended June 30, 2016 and 2015, approximately 10 thousand and 3 thousand weighted average anti-dilutive shares from RSUs, respectively, were excluded from the diluted EPS computation.

NOTE 13 — ACCUMULATED OTHER COMPREHENSIVE INCOME

The following tables present the changes in the components of AOCI balances for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30, 2016			2015

⁽¹⁾ For the three and six months ended June 30, 2016 and 2015, the pretax amount was reported in Net gains on sales of available-for-sale investment securities on the Consolidated Statements of Income.

NOTE 14 — BUSINESS SEGMENTS

The Company utilizes an internal reporting system to measure the performance of various operating segments within the Bank and the Company. The Company has identified three operating segments for purposes of management reporting: (1) Retail Banking; (2) Commercial Banking; and (3) Other. These three business divisions meet the criteria of an operating segment: the segment engages in business activities from which it earns revenues and incurs expenses; its operating results are regularly reviewed by the Company's chief operating decision-maker to render decisions about resources to be allocated to the segment and assess its performance; and discrete financial information is available.

The Retail Banking segment focuses primarily on retail operations through the Bank's branch network. The Commercial Banking segment, which includes CRE, primarily generates commercial loans through the commercial lending offices located in the Bank's production offices. Furthermore, the Company's Commercial Banking segment offers a wide variety of international finance and trade services and products. The remaining centralized functions,

including treasury activities and eliminations of inter-segment amounts, have been aggregated and included in the “Other” segment, which provides broad administrative support to the two core segments.

The Company's funds transfer pricing assumptions are intended to promote core deposit growth and to reflect the current risk profiles of various loan categories within the credit portfolio. Transfer pricing assumptions and methodologies are reviewed at least annually to ensure that the Company's process is reflective of current market conditions. The transfer pricing process is formulated with the goal of incenting loan and deposit growth that is consistent with the Company's overall growth objectives, as well as to provide a reasonable and consistent basis for the measurement of the Company's business segments and product net interest margins.

The accounting policies of the segments are the same as those described in Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K. Operating segment results are based on the Company's internal management reporting process, which reflects assignments and allocations of certain operating and administrative costs and the provision for credit losses. Net interest income is based on the Company's internal funds transfer pricing system which assigns a cost of funds or a credit for funds to assets or liabilities based on their type, maturity or repricing characteristics. Noninterest income and noninterest expense, including depreciation and amortization, directly attributable to a segment are assigned to that business segment. Indirect costs, including overhead expense, are allocated to the segments based on several factors, including, but not limited to, full-time equivalent employees, loan volume and deposit volume. The provision for credit losses is allocated based on actual charge-offs for the period as well as average loan balances for each segment during the period. The Company evaluates overall performance based on profit or loss from operations before income taxes excluding nonrecurring gains and losses.

Changes in the Company's management structure or reporting methodologies may result in changes in the measurement of operating segment results. Results for prior periods are generally restated for comparability for changes in management structure or reporting methodologies unless it is not deemed practicable to do so.

The following tables present the operating results and other key financial measures for the individual operating segments as of and for the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30, 2016

NOTE 15 — SUBSEQUENT EVENTS

On July 20, 2016, the Company's Board of Directors declared third quarter 2016 cash dividends of \$0.20 per share for the Company's common stock which is payable on August 15, 2016 to stockholders of record as of August 1, 2016.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion provides information about the results of operations, financial condition, liquidity, and capital resources of East West Bancorp, Inc. (referred to herein on an unconsolidated basis as "East West" and on a consolidated basis as the "Company") and its wholly-owned subsidiaries, East West Bank and subsidiaries (referred to herein as "East West Bank" or the "Bank") and East West Insurance Services, Inc. This information is intended to facilitate the understanding and assessment of significant changes and trends related to the Company's financial condition and the results of operations. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and the accompanying notes presented elsewhere in this report and the Company's annual report on Form 10-K for the year ended December 31, 2015, filed with the U.S. Securities and Exchange Commission on February 26, 2016 (the "Company's 2015 Form 10-K").

Overview

The Company's vision is to serve as the financial bridge between the United States and Greater China. The Company's primary strategy to achieve this vision is to expand the Company's global network of contacts and resources to better meet its customers' diverse financial needs in and between the world's two largest markets. With over 130 locations in the United States and Greater China and a full range of cross-border products and services, the Company is well equipped to fulfill its customers' business needs.

Financial Highlights

The Company successfully completed another quarter with strong earnings and financial results for the three and six months ended June 30, 2016, achieving healthy growth and an increase in revenues. It is the Company's priority to focus on strengthening its risk management infrastructure, compliance, and the Bank Secrecy Act ("BSA")/Anti-Money Laundering ("AML") programs in order to meet increasing regulatory expectations. The Company continues making efforts to address BSA concerns and making the necessary investments for internal programs to ensure the Company is in compliance with BSA rules and regulations, while still providing strong return to stockholders.

Noteworthy items on the Company's performance included:

- Net income totaled \$103.3 million and \$210.8 million for the three and six months ended June 30, 2016, which reflected increases of 5% and 6%, respectively, compared to the prior year periods.

- Diluted earnings per share were \$0.71 and \$1.45 for the three and six months ended June 30, 2016, which reflected increases of 4% and 5%, respectively, compared to the prior year periods.

- Revenue, the sum of net interest income before provision for credit losses and noninterest income increased \$29.8 million or 11% to \$297.8 million for the three months ended June 30, 2016, compared to the prior year period, and \$42.6 million or 8% to \$590.6 million for the six months ended June 30, 2016, compared to the prior year period.

- Noninterest expense increased \$28.7 million or 24% to \$148.9 million for the three months ended June 30, 2016 compared to the prior year period. For the six months ended June 30, 2016, noninterest expense increased \$47.3 million or 19% to \$295.5 million compared to the prior year period.

- The Company's effective tax rate for the three and six months ended June 30, 2016 was 27.7% and 26.7%, respectively, compared to 31.6% and 31.8% for the prior year periods. The decreases in the effective tax rate were mainly attributable to a larger benefit from tax credit investments in 2016 compared to 2015.

- Cost of funds improved eight basis points to 0.35% for the three months ended June 30, 2016, compared to the same period last year. Cost of funds improved nine basis points to 0.34% for the six months ended June 30, 2016, compared to the same period last year.

Additionally, the Company experienced a \$601.3 million or 2% growth in total assets as of June 30, 2016 compared to December 31, 2015. This was largely attributable to increases in net loans held-for-investment, securities purchased under resale agreements (“resale agreements”), cash and cash equivalents and a held-to-maturity investment security, partially offset by a decrease in available-for-sale investment securities.

Gross loans held-for-investment increased \$576.5 million or 2% to \$24.24 billion as of June 30, 2016, compared to \$23.66 billion as of December 31, 2015, while the allowance for loan losses to loans held-for-investment ratio improved by two basis points to 1.10% compared to 1.12% as of December 31, 2015. The overall balance sheet growth was fueled by solid deposit growth during the six months ended June 30, 2016. Deposits increased \$741.3 million or 3% to \$28.22 billion as of June 30, 2016 compared to \$27.48 billion as of December 31, 2015, primarily due to a \$1.63 billion or 8% increase in core deposits. This was partially offset by time deposits which decreased \$884.5 million or 13% from \$6.61 billion as of December 31, 2015 to \$5.73 billion as of June 30, 2016. Core deposits comprised 80% and 76% of total deposits as of June 30, 2016 and December 31, 2015, respectively.

From a capital management perspective, the Company continued to maintain a strong capital position with Common equity tier 1 (“CET1”) capital of \$2.80 billion, risk-weighted assets of \$26.16 billion and a CET1 capital ratio of 10.7% as of June 30, 2016, compared to \$2.65 billion, \$25.23 billion and 10.5%, respectively, as of December 31, 2015, as measured under Basel III Capital Rules.

The strong balance sheet growth and increased revenues placed the Company in a better position to focus on its bridge banking strategy and target future growth opportunities. As the Company remains focused on its continued growth, the Company continues to meet its customers’ financial needs. In July 2016, the Company’s Board of Directors (the “Board”) declared third quarter cash dividends for the Company’s common stock. The cash dividend of \$0.20 per share is payable on August 15, 2016 to stockholders of record as of August 1, 2016.

Results of Operations

The Company’s net income increased \$4.5 million or 5% to \$103.3 million and \$12.0 million or 6% to \$210.8 million for the three and six months ended June 30, 2016, compared to \$98.7 million and \$198.8 million for the three and six months ended June 30, 2015. The earnings performance during 2016 reflected the Company’s continued effort in maintaining operating expense discipline and executing its business strategy.

Revenue, the sum of net interest income before provision for credit losses and noninterest income, was \$297.8 million for the three months ended June 30, 2016, an increase of \$29.8 million or 11% from \$268.1 million for the three months ended June 30, 2015. The \$29.8 million increase in revenue was comprised of a \$26.1 million increase in net interest income and a \$3.7 million increase in noninterest income. The \$26.1 million increase in net interest income for the three months ended June 30, 2016 was primarily due to higher interest revenue, primarily generated from loan portfolio growth and a decrease in interest expense on securities sold under repurchase agreements (“repurchase agreements”). The \$3.7 million increase in noninterest income for the three months ended June 30, 2016 was primarily due to a reduction in expenses related to changes in Federal Deposit Insurance Corporation (“FDIC”) indemnification asset and receivable/payable, partially offset by decreases in net gains on sales of available-for-sale investment securities and net gains on sales of loans.

For the six months ended June 30, 2016, revenue was \$590.6 million, an increase of \$42.6 million or 8% from \$547.9 million for the six months ended June 30, 2015. The \$42.6 million increase in net interest income for the six months ended June 30, 2016 was primarily due to higher interest revenue, but at lower margins, primarily generated from loan portfolio growth and a decrease in interest expense from repurchase agreements.

Noninterest expense increased \$28.7 million or 24% to \$148.9 million for the three months ended June 30, 2016, and \$47.3 million or 19% to \$295.5 million for the six months ended June 30, 2016 compared to the same periods last year. The increase for both periods were primarily due to increases in amortization of tax credit and other investments, compensation and employee benefits, other real estate owned (“OREO”) expense and consulting expense, partially offset by a decrease in repurchase agreements’ extinguishment costs.

The Company's return on average assets decreased seven basis points to 1.27% and 1.30% for the three and six months ended June 30, 2016, compared to 1.34% and 1.37% for the same periods in 2015. Return on average equity decreased 54 basis points to 12.71% and 43 basis points to 13.15% for the three and six months ended June 30, 2016, respectively, compared to 13.25% and 13.58% for the same periods in 2015.

Components of Net Income

	Three Months Ended June 30,		Six Months Ended June 30,	
(\$ in millions)	2016	2015	2016	2015
Net interest income	\$253.6	\$227.5	\$505.8	\$463.2
Provision for credit losses	(6.1)	(3.5)	(7.5)	(8.5)
Noninterest income	44.3	40.6	84.8	84.7
Noninterest expense	(148.9)	(120.2)	(295.5)	(248.2)
Income tax expense	(39.6)	(45.7)	(76.8)	(92.4)
Net income	\$103.3	\$98.7	\$210.8	\$198.8
Annualized return on average assets	1.27 %	1.34 %	1.30 %	1.37 %
Annualized return on average equity	12.71 %	13.25 %	13.15 %	13.58 %

Net Interest Income

The Company's primary source of revenue is net interest income, which is the difference between interest earned on loans, investment securities, resale agreements and other interest-earning assets less interest expense on customer deposits, repurchase agreements, long-term debt and other interest-bearing liabilities. Net interest margin is calculated by dividing the annualized net interest income by average interest-earning assets. Net interest income and net interest margin are affected by several factors, including changes in average balances and composition of interest-earning assets and funding sources, market interest rate fluctuations and slope of the yield curve, repricing characteristics and maturity of interest-earning assets and interest-bearing liabilities, volume of noninterest-bearing sources of funds and asset quality.

Net interest income for the three months ended June 30, 2016 was \$253.6 million, an increase of \$26.1 million or 11% compared to \$227.5 million for the same period in 2015. Net interest income for the six months ended June 30, 2016 was \$505.8 million, an increase of \$42.6 million or 9% compared to \$463.2 million for the same period in 2015. The increases in net interest income during the three and six months ended June 30, 2016 were primarily due to greater interest income resulting from the growth of the loan portfolio and a decrease in interest expense on repurchase agreements that were paid off during 2015.

Net interest margin was 3.31% for both the three months ended June 30, 2016 and 2015. Net interest margin was 3.31% for the six months ended June 30, 2016, a 10 basis points decrease from 3.41% for the six months ended June 30, 2015. The decrease in net interest margin was primarily due to a 12 basis points reduction in loan yield from 4.40% for the six months ended June 30, 2015 to 4.28% for the six months ended June 30, 2016. The decrease in loan yield during the six months ended June 30, 2016 was primarily due to the prolonged low interest rate environment and lower accretion income from the loans accounted for under Accounting Standard Codification ("ASC") 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality ("ASC 310-30"). During the six months ended June 30, 2016, total accretion income from the loans accounted for under ASC 310-30 was \$26.7 million compared to \$28.4 million for the same period in 2015.

For the three months ended June 30, 2016, average interest-earning assets increased \$3.26 billion or 12% to \$30.78 billion from \$27.53 billion for the same period in 2015. The increase was primarily due to a \$2.02 billion or 9% increase in average loan balances to \$23.89 billion for the three months ended June 30, 2016, compared to \$21.87 billion for the same period in 2015. For the six months ended June 30, 2016, average interest-earning assets increased \$3.30 billion or 12% to \$30.69 billion from \$27.39 billion for the same period in 2015. The increase was primarily due to a \$2.05 billion or 9% increase in average loan balances to \$23.85 billion for the six months ended June 30,

2016, compared to \$21.80 billion for the same period in 2015.

Customer deposits are an important source of low-cost funding and affect both net interest income and net interest margin. Average deposits, which consist of noninterest-bearing demand, interest-bearing checking, money market, savings and time deposits, increased by \$3.29 billion or 13% to \$28.08 billion for the three months ended June 30, 2016, compared to \$24.78 billion for the same period in 2015. The ratio of average noninterest-bearing demand deposits to total deposits increased from 30% for the three months ended June 30, 2015 to 33% for the three months ended June 30, 2016. Average loans were 118% funded by average deposits for the three months ended June 30, 2016, higher than the funding of 113% for the same period in 2015. For the six months ended June 30, 2016, average deposits increased by \$3.35 billion or 14% to \$27.95 billion, compared to \$24.60 billion for the same period in 2015. The ratio of average noninterest-bearing demand deposits to total deposits increased from 30% for the six months ended June 30, 2015 to 32% for the six months ended June 30, 2016. Average loans were 117% funded by average deposits for the six months ended June 30, 2016, higher than the funding of 113% for the same period in 2015. Cost of deposits remained stable at 0.29% during each of the three and six months ended June 30, 2016 and 2015.

The following table presents the interest spread, net interest margin, average balances, interest income and expense, and the average yield/rates by asset and liability components for the three months ended June 30, 2016 and 2015:

(5) Average balance includes nonperforming loans.

(6) Includes the accretion of discount and amortization of net deferred loan costs which totaled \$31.2 million and \$30.7 million for the six months ended June 30, 2016 and 2015, respectively.

The following table presents the extent to which changes in interest rates and changes in average interest-earning assets and average interest-bearing liabilities affected the Company's net interest income for the periods presented. The total change for each category of interest-earning assets and interest-bearing liabilities is segmented into the change attributable to variations in volume and the change attributable to variations in interest rates. Changes that are not solely due to either volume or rate are allocated proportionally based on the absolute value of the change related to average volume and average rate. Nonaccrual loans are included in average loans used to compute the table below:

(\$ in thousands)	Three Months Ended June 30, 2016 vs. 2015			Six Months Ended June 30, 2016 vs. 2015		
	Total Change	Changes Due to Volume	Yield/Rate	Total Change	Changes Due to Volume	Yield/Rate
Interest-earning assets:						
Due from banks and short-term investments	\$(1,814)	\$381	\$(2,195)	\$(3,275)	\$1,784	\$(5,059)
Resale agreements	3,288	1,888	1,400	5,116	2,384	2,732
Investment securities	3,368	2,394	974	4,377	4,733	(356)
Loans	20,282	21,537	(1,255)	32,258	43,953	(11,695)
FHLB and Federal Reserve Bank stock	(1,704)	(145)	(1,559)	(2,145)	(169)	(1,976)
Total interest and dividend income	\$23,420	\$26,055	\$(2,635)	\$36,331	\$52,685	\$(16,354)
Interest-bearing liabilities:						
Checking deposits	\$1,046	\$651	\$395	\$2,111	\$1,305	\$806
Money market deposits	1,789	818	971	3,791	1,467	2,324

Long-term debt	104	(110)	214	198	(216)	414
Total interest expense	\$(2,672)	\$(3,320)	\$648	\$(6,248)	\$(8,847)	\$2,599
Change in net interest income	\$26,092	\$29,375	\$(3,283)	\$42,579	\$61,532	\$(18,953)

Noninterest Income

Noninterest income increased by \$3.7 million or 9% to \$44.3 million for the three months ended June 30, 2016 compared to \$40.6 million for the same period in 2015 and increased \$58 thousand to \$84.8 million for the six months ended June 30, 2016 compared to \$84.7 million for the same period in 2015. The increases were mainly attributable to a reduction in expenses related to changes in FDIC indemnification asset and receivable/payable and an increase in letters of credit fees and foreign exchange income, partially offset by decreases in net gains on sales of loans, net gains on sales of available-for-sale investment securities and wealth management fees.

The following table presents the components of noninterest income for the periods indicated:

(\$ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Branch fees	\$10.4	\$9.8	\$20.6	\$19.2
Letters of credit fees and foreign exchange income	10.9	8.8	20.5	17.5
Ancillary loan fees	4.3	2.8	7.9	5.5
Wealth management fees	2.8	4.8	5.8	9.9
Derivative commission income	3.4	2.7	6.6	7.8
Changes in FDIC indemnification asset and receivable/payable	—	(6.7)	—	(15.1)
Net gains on sales of loans	2.9	5.3	4.8	14.8
Net gains on sales of available-for-sale investment securities	2.8	5.6	6.7	10.0
Other fees and operating income	6.8	7.5	11.9	15.1
Total noninterest income	\$44.3	\$40.6	\$84.8	\$84.7

The following discussion provides the composition of the major changes in noninterest income and the factors contributing to the changes.

For the three and six months ended June 30, 2016, there was no expense related to the changes in FDIC indemnification asset and receivable/payable, compared to \$6.7 million and \$15.1 million of expense for the same periods in 2015, respectively. In 2015, the Company reached an agreement with the FDIC to early terminate the Washington First International Bank and United Commercial Bank shared-loss agreements. There were no remaining shared-loss agreements with the FDIC as of December 31, 2015.

Letters of credit fees and foreign exchange income increased by \$2.1 million or 24% to \$10.9 million for the three months ended June 30, 2016 from \$8.8 million for the three months ended June 30, 2015. Letters of credit fees and foreign exchange income increased by \$3.0 million or 17% to \$20.5 million for the six months ended June 30, 2016 from \$17.5 million for the six months ended June 30, 2015. The growth in both periods was mainly attributable to increases in credit enhancement fees due to higher letter of credit volume and gains on foreign exchange mainly due to the impact of U.S. Dollar (“USD”) appreciation against the Chinese Renminbi (“RMB”).

Net gains on sales of loans for the three months ended June 30, 2016 amounted to \$2.9 million, compared to \$5.3 million for the three months ended June 30, 2015, which included lower of cost or market (“LOCOM”) valuation adjustments. Net gains on sales of loans for the six months ended June 30, 2016, which included LOCOM valuation adjustments, amounted to \$4.8 million, compared to \$14.8 million for the six months ended June 30, 2015. The decrease in net gains on sales of loans for the three and six months ended June 30, 2016, compared to the same periods in 2015, was primarily related to a decrease in loans sold. Refer to Management’s Discussion and Analysis of the Financial Condition and Results of Operations (“MD&A”) — Total Loan Portfolio for details.

Net gains on sales of available-for-sale investment securities decreased by \$2.8 million or 50% to \$2.8 million for the three months ended June 30, 2016 from \$5.6 million for the three months ended June 30, 2015, and decreased by \$3.3 million or 33% to \$6.7 million for the six months ended June 30, 2016 from \$10.0 million for the six months ended June 30, 2015. Proceeds from sales of available-for-sale investment securities for the three months ended June 30, 2016 and 2015 amounted to \$212.0 million and \$292.6 million, respectively. Proceeds from sales of available-for-sale investment securities for the six months ended June 30, 2016 and 2015 were \$864.7 million and \$473.1 million,

respectively. The available-for-sale investment securities sold for the three and six months ended June 30, 2016 and 2015 were primarily comprised of U.S. Treasury and U.S. government agency and U.S. government sponsored enterprise mortgage-backed securities.

Wealth management fees decreased by \$2.0 million or 42% to \$2.8 million for the three months ended June 30, 2016 from \$4.8 million for the three months ended June 30, 2015. Wealth management fees decreased by \$4.1 million or 41% to \$5.8 million for the six months ended June 30, 2016 from \$9.9 million for the six months ended June 30, 2015. The decrease for both periods was mainly attributable to lower alternative investment fee income due to the modification of the Company's business products.

Noninterest Expense

Noninterest expense totaled \$148.9 million for the three months ended June 30, 2016, an increase of \$28.7 million or 24%, compared to \$120.2 million for the same period in 2015. Noninterest expense totaled \$295.5 million for the six months ended June 30, 2016, an increase of \$47.3 million or 19%, compared to \$248.2 million for the same period in 2015. The increase for both periods was the result of higher amortization of tax credit and other investments, compensation and employee benefits, OREO expense and consulting expense, partially offset by lower repurchase agreements' extinguishment costs.

The following table presents the components of noninterest expense for the periods indicated:

(\$ in millions)	Three Months		Six Months	
	Ended June 30,	Ended June 30,	Ended June 30,	Ended June 30,
	2016	2015	2016	2015
Compensation and employee benefits	\$73.3	\$62.9	\$145.1	\$127.1
Occupancy and equipment expense	15.7	15.2	30.2	30.6
Amortization of tax credit and other investments	14.0	3.0	28.2	9.3
Amortization of premiums on deposits acquired	2.1	2.3	4.2	4.7
Deposit insurance premiums and regulatory assessments	5.5	3.3	10.9	9.0
Deposit related expenses	2.3	2.4	4.6	4.9
OREO expense (income)	1.0	(5.1)	1.6	(6.1)
Legal expense	4.3	4.1	7.4	11.0
Data processing	3.3	2.4	6.0	5.0
Consulting expense	6.0	2.2	14.4	4.6
Repurchase agreements' extinguishment costs	—	6.6	—	6.6
Other operating expense	21.4	20.9	42.9	41.5
Total noninterest expense	\$148.9	\$120.2	\$295.5	\$248.2

The following provides a discussion of the major changes in noninterest expense and the factors contributing to the changes.

Amortization of tax credit and other investments increased by \$11.0 million to \$14.0 million for the three months ended June 30, 2016, compared to \$3.0 million for the same period in 2015, and increased by \$18.9 million to \$28.2 million for the six months ended June 30, 2016, compared to \$9.3 million for the same period in 2015. The increases were primarily due to additional tax credit investments placed in service for the three and six months ended June 30, 2016.

Compensation and employee benefits increased by \$10.4 million or 17% to \$73.3 million for the three months ended June 30, 2016, compared to \$62.9 million for the same period in 2015, and increased by \$18.0 million or 14% to \$145.1 million for the six months ended June 30, 2016, compared to \$127.1 million for the same period in 2015. The increases were primarily attributable to the increased headcount to support the Company's growing business and regulatory compliance requirements.

OREO expenses were \$1.0 million and \$1.6 million, respectively, for the three and six months ended June 30, 2016, compared to OREO income of \$5.1 million and \$6.1 million, respectively, for three and six months ended June 30, 2015. The increases were mainly attributable to lower net gains on OREO sales for three and six months ended June 30, 2016.

Consulting expense increased \$3.8 million to \$6.0 million for the three months ended June 30, 2016, compared to \$2.2 million for the same period in 2015, and increased \$9.8 million to \$14.4 million for the six months ended June 30, 2016, compared to \$4.6 million for the same period in 2015. The increases were primarily due to BSA and AML consulting expenses incurred to implement a more robust BSA/AML compliance program in order to address the requirements of the Written Agreement and Memorandum of Understanding (“MOU”). Refer to MD&A — Regulatory Matters for details.

During the three and six months ended June 30, 2015, the Company recorded \$6.6 million in extinguishment costs related to \$100.0 million of repurchase agreements. There was no debt extinguishment during the three and six months ended June 30, 2016.

Income Taxes

Provision for income taxes was \$39.6 million and \$76.8 million for the three and six months ended June 30, 2016, respectively, compared to \$45.7 million and \$92.5 million for the same periods in 2015. The effective tax rate was 27.7% and 26.7% for the three and six months ended June 30, 2016, respectively, compared to 31.6% and 31.8% for the same periods in 2015. The lower effective tax rate for the three and six months ended June 30, 2016, compared to the same periods in 2015 was mainly attributable to additional tax credit investments entered in the latter part of 2015 and the first half of 2016. Included in the income tax expense recognized for the three and six months ended June 30, 2016 was \$26.1 million and \$50.4 million, respectively, compared to \$12.9 million and \$23.7 million for the same periods in 2015, of tax credits generated mainly from investments in qualified affordable housing partnerships and other tax credit investments.

Management regularly reviews the Company's tax positions and deferred tax assets. Factors considered in this analysis include future reversals of existing temporary differences, future taxable income exclusive of reversing differences, taxable income in prior carryback years, and tax planning strategies. The Company accounts for income taxes using the asset and liability approach, the objective of which is to establish deferred tax assets and liabilities for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities at enacted rates expected to be in effect when such amounts are realized and settled. As of June 30, 2016 and December 31, 2015, the Company had net deferred tax assets of \$123.0 million and \$135.9 million, respectively.

A valuation allowance is established for deferred tax assets if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. A valuation allowance is used, as needed, to reduce the deferred tax assets to the amount that is more likely than not to be realized. Management has concluded that it is more likely than not that all of the benefits of the deferred tax assets will be realized, with the exception of the deferred tax assets related to net operating losses in certain states. Accordingly, a valuation allowance has been recorded for these amounts. The Company believes that adequate provisions have been made for all income tax uncertainties consistent with the standards of ASC 740-10, Income Taxes.

Operating Segment Results

The Company's operations are strategically aligned into three major business segments: Retail Banking, Commercial Banking and Other. These business segments are differentiated primarily based upon the products and services provided.

The Retail Banking segment focuses primarily on retail operations through the Bank's branch network. The Commercial Banking segment, which includes commercial and industrial ("C&I") and commercial real estate ("CRE"), primarily generates commercial loans through the domestic commercial lending offices located in California, New York, Texas, Washington, Massachusetts, Nevada and Georgia, and the foreign commercial lending offices located in China and Hong Kong. Furthermore, the Commercial Banking segment offers a wide variety of international finance and trade services and products. The remaining centralized functions, including the treasury operations of the Company and eliminations of intersegment amounts have been aggregated and included in the "Other" segment.

Changes in the Company's management structure or reporting methodologies may result in changes in the measurement of operating segment results. Results for prior periods are generally restated for comparability when there are changes in management structure or reporting methodologies, unless it is not deemed practicable to do so.

The Company's transfer pricing process is formulated to incentivize loan and deposit growth that is consistent with the Company's overall growth objectives, as well as to provide a reasonable and consistent basis for measurement of the Company's business segments and product net interest margins. The Company's transfer pricing assumptions and

methodologies are reviewed at least annually to ensure that the process is reflective of current market conditions.

Note 14 — Business Segments to the Consolidated Financial Statements describes the Company's segment reporting methodology as well as the business activities of each business segment and presents financial results of these business segments for the three and six months ended June 30, 2016 and 2015.

The following table presents the selected segment information for the periods indicated:

(\$ in millions)	Three Months Ended					
	2016	2015	2016	2015	2016	2015
	Retail Banking		Commercial Banking		Other	
Net interest income (loss)	\$109.9	\$109.3	\$129.0	\$122.3	\$14.7	\$(4.1)
Noninterest income	\$13.5	\$10.5	\$20.9	\$20.8	\$9.9	\$9.2
Noninterest expense	\$57.0	\$46.6	\$43.9	\$33.9	\$48.0	\$39.7
Pretax income (loss)	\$36.3	\$55.3	\$95.2	\$97.3	\$11.5	\$(8.2)

(\$ in millions)	Six Months Ended					
	2016	2015	2016	2015	2016	2015
	Retail Banking		Commercial Banking		Other	
Net interest income (loss)	\$222.5	\$218.9	\$258.2	\$247.5	\$25.1	\$(3.2)
Noninterest income	\$23.1	\$23.4	\$44.2	\$40.4	\$17.5	\$21.0
Noninterest expense	\$117.4	\$101.2	\$100.4	\$83.9	\$77.7	\$63.1
Pretax income (loss)	\$82.2	\$108.3	\$188.0	\$190.4	\$17.4	\$(7.5)

Retail Banking

The Retail Banking segment reported pretax income of \$36.3 million and \$82.2 million for the three and six months ended June 30, 2016, compared to \$55.3 million and \$108.3 million for the same periods in 2015. The decrease in pretax income for this segment for the three months ended June 30, 2016 was driven by increases in noninterest expense and provision for credit losses, partially offset by increases in noninterest income and net interest income. The decrease in pretax income for this segment for the six months ended June 30, 2016 was driven by increases in noninterest expense and provision for credit losses, partially offset by an increase in net interest income.

Net interest income for this segment increased \$618 thousand or 1% to \$109.9 million and \$3.6 million or 2% to \$222.5 million for the three and six months ended June 30, 2016, compared to \$109.3 million and \$218.9 million for the same periods in 2015. The increase in net interest income for the three and the six months ended June 30, 2016 was primarily due to growth in core deposits for the segment, partially offset by a reduction in the loan portfolio due to sales of single-family residential loans in 2015.

Noninterest income for this segment increased \$3.0 million or 29% to \$13.5 million for the three months ended June 30, 2016, compared to \$10.5 million for the same period in 2015. The increase in noninterest income was attributable to a decrease in the reduction of changes in FDIC indemnification asset and receivable/(payable) as all remaining shared-loss agreements with the FDIC were early terminated as of December 31, 2015, and an increase in derivative commission income, partially offset by decreases in wealth management fees and net gains on sales of loans.

Noninterest income for this segment decreased \$300 thousand or 1% to \$23.1 million for the six months ended June 30, 2016, compared to \$23.4 million for the same period in 2015. The decrease in noninterest income was attributable to higher write-downs to the student loan portfolio and a decrease in wealth management fees, partially offset by no expense having been recorded to the changes in FDIC indemnification asset and receivable/payable and an increase in derivative commission income.

Noninterest expense for this segment increased \$10.4 million or 22% to \$57.0 million for the three months ended June 30, 2016, compared to \$46.6 million for the same period in 2015. This increase was primarily due to higher consulting expense, compensation and employee benefits, and deposit insurance premium and regulatory assessments.

Noninterest expense for this segment increased \$16.2 million or 16% to \$117.4 million for the six months ended June 30, 2016, compared to \$101.2 million for the same period in 2015. This increase was mainly a result of higher

consulting, compensation and employee benefits, deposit insurance premium and regulatory assessments, and computer software expenses.

Commercial Banking

The Commercial Banking segment reported pretax income of \$95.2 million and \$188.0 million for the three and six months ended June 30, 2016, compared to \$97.3 million and \$190.4 million for the same periods in 2015. The decrease in pretax income for this segment for the three and six months ended June 30, 2016 was attributable to higher noninterest expense, partially offset by increases in net interest income and noninterest income and a decrease in provision for credit losses.

Net interest income for this segment increased \$6.7 million or 5% to \$129.0 million and \$10.7 million or 4% to \$258.2 million for the three and six months ended June 30, 2016, compared to \$122.3 million and \$247.5 million for the same periods in 2015. The increase in net interest income for the three and the six months ended June 30, 2016 was due to the growth of commercial loans.

Noninterest income for this segment remained stable at \$20.9 million for the three months ended June 30, 2016, compared to \$20.8 million for the same period in 2015. For the six months ended June 30, 2016, noninterest income for this segment increased \$3.9 million or 10% to \$44.2 million, compared to \$40.4 million for the same period in 2015. The increase in noninterest income for the three and the six months ended June 30, 2016 for this segment was primarily due to a decrease in the reduction of changes in FDIC indemnification asset and receivable/(payable), as previously discussed in the Retail Banking segment, and increases in ancillary loan fees, letters of credit fees and foreign exchange income, partially offset by decreases in derivative commission income and net gains on sales of loans.

Noninterest expense for this segment increased \$10.0 million or 30% to \$43.9 million and \$16.5 million or 20% to \$100.4 million for the three and six months ended June 30, 2016, compared to \$33.9 million and \$83.9 million for the same periods in 2015. The increase in noninterest expense for the three and the six months ended June 30, 2016 was primarily due to higher compensation and employee benefits, OREO and legal expenses, and consulting expense, partially offset by a decrease in loan related expenses.

Other

The Other segment reported pretax income of \$11.5 million and \$17.4 million for the three and six months ended June 30, 2016, compared to pretax loss of \$8.2 million and \$7.5 million for the same periods in 2015.

Net interest income for this segment increased \$18.8 million to \$14.7 million and \$28.3 million to \$25.1 million for the three and six months ended June 30, 2016, compared to a net interest loss of \$4.1 million and \$3.2 million for the same periods in 2015. The increase in net interest income for the three and six months ended June 30, 2016 was primarily due to the increase in interest income from investment securities and the decrease in interest expense from repurchase agreements. The Other segment includes the activities of the treasury function, which is responsible for the liquidity and interest rate risk management of the Company, and supports the Retail Banking and Commercial Banking segments through funds transfer pricing which is included in net interest income. In addition, it bears the cost of adverse movements in interest rates which affect the net interest margin.

Noninterest income for this segment increased \$624 thousand or 7% to \$9.9 million for the three months ended June 30, 2016, compared to \$9.2 million for the same period in 2015. This increase was primarily due to net gains on sales of premises and equipment and higher rental income, partially offset by lower net gains on sales of available-for-sale investment securities. Noninterest income for this segment decreased \$3.5 million or 17% to \$17.5 million for the six months ended June 30, 2016, compared to \$21.0 million for the same period in 2015. The decrease in noninterest income was primarily due to lower net gains on sales of available-for-sale investment securities.

Noninterest expense for this segment increased \$8.3 million or 21% to \$48.0 million and \$14.6 million or 23% to \$77.7 million for the three and six months ended June 30, 2016, compared to \$39.7 million and \$63.1 million for the same periods in 2015. This increase in noninterest expense for the three and six months ended June 30, 2016 was primarily due to higher amortization of tax credit and other investments, and compensation and employee benefits, partially offset by repurchase agreements' extinguishment costs incurred in 2015 and lower legal expense.

Balance Sheet Analysis

Total assets increased \$601.3 million, or 2%, to \$32.95 billion as of June 30, 2016, compared to \$32.35 billion as of December 31, 2015. The net increase in total assets was primary due to increases of \$590.8 million or 3% in net loans held-for-investment, \$250.0 million or 16% in resale agreements, and \$231.9 million or 17% in cash and cash equivalents and \$159.2 million or 100% in held-to-maturity investment security, partially offset by a \$532.9 million or 14% decrease in available-for-sale investment securities.

The increase in net loans held-for-investment was primarily driven by growth in the loan portfolio, mainly from increases in CRE loans of \$365.9 million, C&I loans of \$160.8 million and consumer loans of \$107.3 million, partially offset by a decrease in residential loans of \$57.6 million.

The increase in cash and cash equivalents was largely due to the timing of cash inflows versus outflows from fundings, payments, and cash requirements related to normal operating activities. The increase in resale agreements was mainly due to a \$200.0 million decrease in resale and repurchase agreements that were eligible for netting as of June 30, 2016 compared to December 31, 2015 and \$50.0 million in additional purchases of resale agreements during the six months ended June 30, 2016.

The increase in the held-to-maturity investment security was the result of a securitization of multifamily real estate loans entered into by the Company during the first quarter of 2016. The decrease in available-for-sale investment securities of \$532.9 million was primarily due to a \$510.0 million decrease in U.S. Treasury securities.

Total liabilities increased \$427.3 million, or 1%, to \$29.66 billion as of June 30, 2016, compared to \$29.23 billion as of December 31, 2015. The increase in total liabilities funded our asset growth. This increase is primarily due to a \$741.3 million increase in customer deposit growth, a \$200.0 million increase in repurchase agreements' balances as a result of the decrease in resale and repurchase agreements that were eligible for netting as of June 30, 2016 compared to December 31, 2015 and \$165.3 million in accrued expenses and other liabilities, partially offset by a \$698.9 million decrease in FHLB advances. Total customer deposits increased to \$28.22 billion as of June 30, 2016. The net increase in customer deposits was largely due to increases in noninterest-bearing demand deposits of \$830.4 million, money market deposits of \$477.6 million, and savings and interest checking accounts of \$317.8 million, partially offset by a decrease in time deposits of \$884.5 million. The decrease in FHLB advances was primarily due to the repayment of a short-term FHLB advance of \$700.0 million which matured in the first quarter of 2016.

Investment Securities

Income from investment securities provides a significant portion of the Company's total income, primarily from available-for-sale investment securities.

The Company's available-for-sale investment securities are liquid in nature and available to meet funding needs that arise during the normal course of business. The Company aims to maintain an investment portfolio with an appropriate mix of fixed-rate and adjustable-rate securities with relatively short durations to minimize overall interest rate and liquidity risk. The Company's available-for-sale investment securities portfolio consists primarily of U.S. government agency and U.S. government sponsored enterprise mortgage-backed securities, U.S. government agency and U.S. government sponsored enterprise debt securities, U.S. Treasury securities, corporate debt securities and municipal securities. Investments classified as available-for-sale are carried at their estimated fair values with the corresponding changes in fair values recorded in accumulated other comprehensive income or loss, as a component of stockholders' equity.

During the first half of 2016, the Company securitized \$201.7 million of multifamily residential loans and retained a \$160.1 million senior tranche of the securities. The resulting security is classified as a held-to-maturity investment, which is carried at amortized cost. The held-to-maturity security is a non-agency commercial mortgage-backed security maturing on April 25, 2046. Management intends to and has the ability to hold the security to maturity.

Total available-for-sale investment securities decreased \$532.9 million or 14% to \$3.24 billion as of June 30, 2016, compared with \$3.77 billion as of December 31, 2015, primarily due to the decrease in U.S. Treasury securities. During the six months ended June 30, 2016, the Company sold \$659.4 million of available-for-sale U.S. Treasury securities and realized gains of \$3.9 million. The \$659.4 million in sales and \$60.0 million in maturities were partially offset by \$203.5 million in available-for-sale U.S. Treasury securities purchases during the six months ended June 30, 2016.

As of June 30, 2016, the available-for-sale investment portfolio had net unrealized gains of \$20.3 million compared to net unrealized losses of \$10.6 million as of December 31, 2015. The change in the net unrealized amount was primarily attributed to a decline in interest rates. As of June 30, 2016 and December 31, 2015, available-for-sale investment securities with fair values of \$1.06 billion and \$873.0 million, respectively, were pledged to secure public deposits, repurchase agreements, the Federal Reserve Bank's discount window, and for other purposes required or permitted by law.

Total repayments/maturities and sales of available-for-sale investment securities amounted to \$285.4 million and \$209.2 million, respectively, for the three months ended June 30, 2016. In comparison, total repayments/maturities and amounts sold were \$258.4 million and \$287.0 million, respectively, for the three months ended June 30, 2015. Purchases of available-for-sale investment securities during the three months ended June 30, 2016 and 2015 were \$527.2 million and \$704.2 million, respectively. The Company recorded net gains on sales of available-for-sale investment securities totaling \$2.8 million and \$5.6 million for the three months ended June 30, 2016 and 2015, respectively.

Total repayments/maturities and sales of available-for-sale investment securities amounted to \$443.6 million and \$858.1 million, respectively, for the six months ended June 30, 2016. In comparison, total repayments/maturities and amounts sold were \$396.8 million and \$463.1 million, respectively, for the six months ended June 30, 2015. Purchases of available-for-sale investment securities during the six months ended June 30, 2016 and 2015 were \$751.1 million and \$1.22 billion, respectively. The Company recorded net gains on sales of available-for-sale investment securities totaling \$6.7 million and \$10.0 million for the six months ended June 30, 2016 and 2015, respectively.

Securities in an unrealized loss position are analyzed periodically for other-than-temporary impairment ("OTTI"). No OTTI was recognized for the three and six months ended June 30, 2016 and 2015. For complete discussion and disclosure, please see Note 3 — Fair Value Measurement And Fair Value Of Financial Instruments and Note 5 — Investment Securities to the Consolidated Financial Statements.

Total Loan Portfolio

The Company offers a broad range of financial products designed to meet the credit needs of its borrowers. The Company's loan portfolio segments include CRE, C&I, residential and consumer.

CRE Loans. CRE loans include income producing real estate, construction and land loans. Interest rates on CRE loans may be fixed, variable, or hybrid. Although real estate loans are collateralized by real property, these transactions are subject to similar credit evaluation, underwriting and monitoring standards as those for commercial business loans. Approximately 73% of CRE loans are secured by real estate in California. Consequently, changes in the California economy and real estate values could have a significant impact on the collectability of these loans and the required level of allowance for loan losses.

C&I Loans. C&I loans include commercial business and trade finance loans. Included in C&I loans are working capital, accounts receivable and inventory lines of credit, small business administration loans, lease financing and financing to international trade companies with trade financial services and products, including letters of credit, revolving lines of credit, import loans, bankers' acceptances, working capital lines of credit, domestic purchase financing and pre-export financing.

Most trade finance activities are related to trade with Asian countries. However, a majority of the Company's loans are made to companies domiciled in the U.S. A substantial portion of these are companies based in California that engage in import and export businesses. Additionally, the Company offers export-import financing to various customers. The Company's trade finance portfolio consists primarily of loans made to borrowers that import goods into the U.S. and export goods to China. Certain C&I loans may be guaranteed by the Export-Import Bank of the U.S. or direct obligations of the Export-Import Bank of China.

Residential Loans. Adjustable rate mortgage ("ARM") residential loans consist of both single-family and multifamily loans. The Company offers first mortgage loans secured by one-to-four unit residential properties located in its primary lending areas. The Company offers ARM single-family residential loan programs with one-year, three-year or five-year initial fixed periods. In addition, the Company offers ARM multifamily residential loan programs with six-month or three-year initial fixed periods.

Consumer Loans. Consumer loans include home equity lines of credit ("HELOCs"), auto loans, and insurance premium financing loans. The Company's ARM loans and HELOCs are secured by one-to-four unit residential properties located in its primary lending areas. The program is a low documentation program that requires low loan to value ratios, typically 50% or less. These loans have historically experienced low delinquency and default rates.

The following table presents the composition of the Company's total loan portfolio by segment as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016			December 31, 2015		
	Amount	Percent		Amount	Percent

Total loans, net	\$24,020,889			\$23,410,747		

(1) Loans net of ASC 310-30 discount.

The Company's total loan portfolio includes originated and purchased loans. Originated and purchased loans, for which there was no evidence of credit deterioration at their acquisition date, are referred to collectively as non-purchased credit impaired ("non-PCI") loans. Acquired loans for which there was, at the acquisition date, evidence of credit deterioration are referred to as purchased credit impaired ("PCI") loans. PCI loans are recorded net of ASC 310-30 discount and totaled \$794.0 million and \$970.8 million, respectively, as of June 30, 2016 and December 31, 2015. For additional details regarding PCI loans, please see Note 7 — Loans Receivable And Allowance For Credit Losses to the Consolidated Financial Statements.

Loans held in the Company's overseas offices include the branch in Hong Kong and the subsidiary bank in China. As of June 30, 2016 and December 31, 2015, loans held in the Hong Kong branch totaled \$616.8 million and \$694.6 million, respectively. As of June 30, 2016 and December 31, 2015, loans held in the subsidiary bank in China totaled \$370.8 million and \$356.5 million, respectively. In total, these loans represent approximately 3% of total consolidated assets as of both June 30, 2016 and December 31, 2015. These loans are included in the total loan portfolio table.

Net loans, including loans held for sale, increased \$610.1 million to \$24.02 billion as of June 30, 2016 from \$23.41 billion as of December 31, 2015. The increase was largely attributable to increases of \$365.9 million or 5% in CRE loans, \$160.8 million or 2% in C&I loans and \$107.3 million or 5% in consumer loans, partially offset by a decrease of \$57.6 million or 1% in residential loans.

During the three months ended June 30, 2016 and 2015, the Company sold approximately \$166.0 million and \$232.3 million, respectively, in originated loans resulting in net gains of \$2.8 million and \$5.8 million, respectively. During the six months ended June 30, 2016 and 2015, the Company sold or securitized approximately \$422.2 million and \$559.1 million, respectively, in originated loans resulting in net gains of \$7.1 million and \$14.3 million, respectively. The Company recorded \$1.1 million in net gains and \$641 thousand in mortgage servicing rights, and retained \$160.1 million of the senior tranche of the resulting securities from the securitization of \$201.7 million of multifamily residential loans during the six months ended June 30, 2016. Originated loans sold or securitized during the six months ended June 30, 2016, were comprised mainly of \$247.5 million of multifamily residential loans, \$91.9 million of CRE loans and \$79.7 million of C&I loans. In comparison, originated loans sold during the six months ended June 30, 2015 were primarily comprised of single-family residential and C&I loans. Excluding the impact of the \$422.2 million in originated loans sold and securitized, organic loan growth during the six months ended June 30, 2016 was \$998.7 million or 8% annualized.

The Company purchases loans (including participation loans) and sells loans in the secondary market. During the three and six months ended June 30, 2016, the Company purchased approximately \$663.7 million and \$1.04 billion of loans, respectively, compared to \$183.5 million and \$365.5 million, respectively, for the same periods last year. The Company sold approximately \$79.7 million and \$133.6 million of loans in the secondary market, respectively, resulting in gains on sales of loans of \$69 thousand for both the three and six months ended June 30, 2016. In comparison, the Company sold approximately \$103.1 million and \$446.1 million of loans in the secondary market resulting in net gains of \$30 thousand and \$1.0 million for the three and six months ended June 30, 2015, respectively.

No LOCOM adjustments related to the loans held for sale portfolio were recorded for three months ended June 30, 2016, compared to the \$517 thousand recorded for the three months ended June 30, 2015. For the six months ended June 30, 2016 and 2015, the Company recorded \$2.4 million and \$517 thousand, respectively, in LOCOM adjustments related to the loans held for sale portfolio. LOCOM adjustments are recorded in Net gains on sales of loans on the Consolidated Statements of Income.

Non-PCI Nonperforming Assets

Non-PCI nonperforming assets are comprised of nonaccrual loans and OREO, net. Loans are placed on nonaccrual status when they become 90 days past due or when the full collection of principal or interest becomes uncertain regardless of the length of past due status. The following table presents information regarding non-PCI nonperforming assets and performing troubled debt restructurings (“TDRs”) as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016	December 31, 2015
Nonaccrual loans	\$171,580	\$121,369
OREO, net	4,877	7,034
Total nonperforming assets	\$176,457	\$128,403
Performing TDRs	\$64,267	\$43,575
Non-PCI nonperforming assets to total assets	0.54 %	0.40 %
Non-PCI nonaccrual loans to loans held-for-investment	0.71 %	0.51 %
Allowance for loan losses to non-PCI nonaccrual loans	155.48 %	218.31 %

Typically, changes to nonaccrual loans period-over-period represent inflows for loans that are placed on nonaccrual status in accordance with the Company’s accounting policy, offset by reductions for loans that are paid down, charged off, sold, foreclosed, or no longer classified as nonaccrual as a result of continued performance and improvement in the borrower’s financial condition and loan repayment capabilities. Nonaccrual loans increased by \$50.2 million or 41% to \$171.6 million as of June 30, 2016 from \$121.4 million as of December 31, 2015. The overall increase in nonaccrual loans during the six months ended June 30, 2016 was largely due to CRE and C&I loans that became 90 days or more past due and the increase in loans that were placed into nonaccrual due to cash flow concerns. This increase was partially offset by payoffs and principal paydowns during the same period.

As of June 30, 2016, \$91.9 million or 54% of the \$171.6 million non-PCI nonaccrual loans consisted of loans which were less than 90 days past due. In comparison, approximately \$69.2 million or 57% of the \$121.4 million non-PCI nonaccrual loans consisted of loans which were less than 90 days past due as of December 31, 2015. For additional details regarding the Company’s non-PCI nonaccrual loans policy, please see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company’s 2015 Form 10-K.

TDRs may be designated as performing or nonperforming. A TDR may be designated as performing, if the loan has demonstrated sustained performance under the modified terms. The period of sustained performance may include the periods prior to modification if prior performance has met or exceeded the modified terms. A loan will remain on nonaccrual status until the borrower demonstrates a sustained period of performance, generally six consecutive months of payments.

The following table presents the accruing and nonaccruing TDRs by loan segments as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016		December 31, 2015	
	Performing TDRs	Nonperforming TDRs	Performing TDRs	Nonperforming TDRs
CRE	\$19,107	\$ 13,884	\$11,470	\$ 8,310
C&I	28,668	44,682	17,095	34,285
Residential	14,924	9,864	13,770	10,508
Consumer	1,568	—	1,240	—

Total	\$64,267	\$ 68,430	\$43,575	\$ 53,103
-------	----------	-----------	----------	-----------

Performing TDR loans increased \$20.7 million to \$64.3 million as of June 30, 2016, primarily due to one CRE loan and one C&I loan becoming TDRs during the six months ended June 30, 2016. Nonperforming TDR loans increased \$15.3 million to \$68.4 million as of June 30, 2016 primarily due to one CRE loan and one C&I loan becoming TDRs during the six months ended June 30, 2016.

Impaired loans exclude the homogeneous consumer loan portfolio which is evaluated collectively for impairment. The Company's impaired loans predominantly include non-PCI loans held-for-investment on nonaccrual status and non-PCI loans modified as a TDR, on both accrual and nonaccrual status. Please see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K for additional information regarding the Company's TDR and impaired loan policies. As of June 30, 2016, the allowance for loan losses included \$22.5 million for impaired loans with a total recorded balance of \$106.4 million. As of December 31, 2015, the allowance for loan losses included \$20.3 million for impaired loans with a total recorded balance of \$85.8 million.

The following table presents the recorded investment balances for non-PCI impaired loans as of June 30, 2016 and December 31, 2015:

(\$ in thousands)	June 30, 2016			December 31, 2015		
	Amount	Percent		Amount	Percent	
CRE:						
Income producing	\$77,753	33	%	\$40,067	24	%
Construction	—	—	%	14	—	%
Land	6,393	3	%	1,315	1	%
Total CRE impaired loans	84,146	36	%	41,396	25	%
C&I:						
Commercial business	98,003	41	%	71,156	43	%
Trade finance	13,031	6	%	10,675	7	%

Residential:						
Single-family	12,672	5	%	15,012	9	%
Multifamily	24,688	11	%	23,727	15	%
Total residential impaired loans	37,360	16	%	38,739	24	%
Consumer	1,577	1	%	1,240	1	%
Total gross impaired loans	\$234,117	100	%	\$163,206	100	%

Allowance for Credit Losses

Allowance for credit losses consists of allowance for loan losses and allowance for unfunded credit reserves. Unfunded credit reserves include reserves provided for unfunded lending commitments, unissued commercial letters of credit and standby letters of credit ("SBLCs") and recourse obligations for loans sold. The allowance for credit losses is increased by the provision for credit losses which is charged against current period operating results, and is increased or decreased by the amount of net recoveries or charge-offs, respectively, during the period. The allowance for unfunded credit reserves is included in Accrued expenses and other liabilities on the Consolidated Balance Sheets. Net adjustments to the allowance for unfunded credit reserves are included in the provision for credit losses.

The Company is committed to maintaining the allowance for credit losses at a level that is commensurate with the estimated inherent loss in the loan portfolio, including unfunded credit reserves. In addition to regular quarterly reviews of the adequacy of the allowance for credit losses, the Company performs an ongoing assessment of the risks inherent in the loan portfolio. While the Company believes that the allowance for loan losses is appropriate as of June 30, 2016, future allowance levels may increase or decrease based on a variety of factors, including loan growth, portfolio performance and general economic conditions. For additional details on the Company's allowance for credit losses, including the methodologies used, please see Note 7 — Loans Receivable And Allowance For Credit Losses to

the Consolidated Financial Statements and Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K.

The following table presents a summary of activities in the allowance for credit losses during the three and six months ended June 30, 2016 and 2015:

(\$ in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Allowance for loan losses, beginning of period	\$260,238	\$257,738	\$264,959	\$261,679
Provision for (reversal of) loan losses	7,149	(615)	7,535	1,452
Gross charge-offs:				
CRE	(139)	(348)	(195)	(1,350)
C&I	(2,214)	(2,843)	(8,074)	(9,432)
Residential	—	(1)	(137)	(747)
Consumer	(3)	—	(4)	(463)
Total gross charge-offs	(2,356)	(3,192)	(8,410)	(11,992)
Gross recoveries:				
CRE	142	365	239	1,177
C&I	1,217	5,607	1,903	6,134
Residential	297	997	394	2,448
Consumer	81	329	148	331
Total gross recoveries	1,737	7,298	2,684	10,090
Net (charge-offs) recoveries	(619)	4,106	(5,726)	(1,902)
Allowance for loan losses, end of period	266,768	261,229	266,768	261,229
Allowance for unfunded credit reserves, beginning of period	21,414	15,632	20,360	12,712
(Reversal of) provision for unfunded credit reserves	(1,096)	4,109	(42)	7,029
Allowance for unfunded credit reserves, end of period	20,318	19,741	20,318	\$19,741
Allowance for credit losses	\$287,086	\$280,970	\$287,086	\$280,970
Average loans held-for-investment	\$23,859,992	\$21,685,781	\$23,823,678	\$21,686,572
Loans held-for-investment	\$24,236,216	\$21,964,612	\$24,236,216	\$21,964,612
Annualized net charge-offs (recoveries) to average loans held-for-investment	0.01	% (0.08)	% 0.05	% 0.02
Allowance for loan losses to loans held-for-investment	1.10	% 1.19	% 1.10	% 1.19

As of June 30, 2016, the allowance for loan losses amounted to \$266.8 million or 1.10% of total loans held-for-investment, compared to \$265.0 million or 1.12% and \$261.2 million or 1.19% of total loans held-for-investment as of December 31, 2015 and June 30, 2015, respectively. Provision for credit losses includes provision for loan losses and unfunded credit reserves. Provision for credit losses is charged to income to bring the allowance for credit losses to a level deemed appropriate by the Company based on the factors described above. The fluctuation in the provision for credit losses is dependent on the historical loss rates trend along with the net charge-offs experienced during the period. Provision for loan losses was \$7.1 million and \$7.5 million for the three and six months ended June 30, 2016, compared to a reversal of provision for loan losses of \$615 thousand and provision for loan losses of \$1.5 million for the three and six months ended June 30, 2015. The increases in provision for loan losses comparing the three and six months ended June 30, 2016 and 2015 were primarily due to overall loan portfolio growth and changes in qualitative factors.

The following table presents the Company's allocation of the allowance for loan losses by segment and the ratio of each loan segment to total loans as of June 30, 2016 and December 31, 2015:

	June 30, 2016		December 31, 2015	
(\$ in thousands)	Allowance Allocation	% of Total Loans	Allowance Allocation	% of Total Loans
CRE	\$78,345	35 %	\$81,538	35 %
C&I	148,435	37 %	134,606	38 %
Residential	31,567	19 %	39,295	19 %
Consumer	8,421	9 %	9,520	8 %
Total	\$266,768	100 %	\$264,959	100 %

The Company maintains an allowance on non-PCI and PCI loans. Based on the Company's estimates of cash flows expected to be collected, an allowance for the PCI loans is established, with a charge to income through the provision for loan losses. PCI loan losses are estimated collectively for groups of loans with similar characteristics. As of June 30, 2016, the Company established an allowance of \$257 thousand on \$794.0 million of PCI loans. As of December 31, 2015, an allowance of \$359 thousand was established on \$970.8 million of PCI loans. The allowance balances for both periods were attributed mainly to the PCI CRE loans.

Deposits

The Company offers a wide variety of deposit products to both consumer and commercial customers. The following table presents the balances for customer deposits as of the dates indicated:

(\$ in thousands)	June 30, 2016	December 31, 2015	Change Amount	Percent
Core deposits:				
Noninterest-bearing demand	\$9,487,180	\$8,656,805	\$830,375	10 %
Interest-bearing checking	3,515,065	3,336,293	178,772	5 %
Money market	7,410,574	6,932,962	477,612	7 %
Savings	2,072,065	1,933,026	139,039	7 %
Total core deposits	22,484,884	20,859,086	1,625,798	8 %
Time deposits	5,732,359	6,616,895	(884,536)	(13)%
Total deposits	\$28,217,243	\$27,475,981	\$741,262	3 %

As of June 30, 2016, total deposits totaled \$28.22 billion, an increase of \$741.3 million or 3% from \$27.48 billion as of December 31, 2015. Core deposits totaled \$22.48 billion as of June 30, 2016, an increase of \$1.63 billion or 8% from \$20.86 billion as of December 31, 2015. Core deposits grew largely due to increases of \$830.4 million or 10% in noninterest-bearing demand deposits and \$477.6 million or 7% in money market deposits accounts.

The increase in core deposits was partially offset by a decrease in time deposits of \$884.5 million or 13% to \$5.73 billion as of June 30, 2016 from \$6.62 billion as of December 31, 2015, largely due to reductions in public funds and brokered deposits.

Borrowings

The Company utilizes short-term and long-term borrowings to manage its liquidity position. Borrowings include short-term borrowings, long-term FHLB advances and repurchase agreements.

During the six months ended June 30, 2016, the Company's subsidiary, East West Bank (China) Limited, entered into several short-term borrowings totaling \$29.4 million with interest rates ranging from 2.80% to 2.82%. Of the total short-term borrowings, \$9.9 million will mature on August 31, 2016; \$9.8 million will mature on March 13, 2017; and \$9.8 million will mature on April 27, 2017.

FHLB advances decreased by \$698.9 million or 69% to \$320.5 million as of June 30, 2016 from \$1.02 billion as of December 31, 2015. The decrease was primarily due to the repayment of short-term FHLB advances of \$700.0 million which matured in February 2016. As of June 30, 2016, FHLB advances had floating interest rates ranging from 0.69% to 1.02% with remaining maturities between 2.6 and 6.4 years.

Gross repurchase agreements totaled \$450.0 million as of June 30, 2016 and December 31, 2015. Resale and repurchase agreements are reported net pursuant to ASC 210-20-45, Balance Sheet Offsetting. Repurchase agreements totaled \$200.0 million as of June 30, 2016. In comparison, there were no repurchase agreements reported as of December 31, 2015. As of June 30, 2016, \$250.0 million of repurchase agreements were eligible for netting against resale agreements, resulting in \$200.0 million of net repurchase agreements. In comparison, all \$450.0 million of gross repurchase agreements were eligible for netting against resale agreements, resulting in no repurchase agreements reported as of December 31, 2015. As of June 30, 2016 gross repurchase agreements outstanding amounted to \$450.0 million with interest rates ranging from 2.87% to 2.91% and original terms between 10.0 years and 16.5 years. The remaining maturity terms of the repurchase agreements range between 6.3 and 7.2 years. Repurchase agreements are accounted for as collateralized financing transactions and recorded at the balances at which the securities were sold. The collateral for these agreements were primarily comprised of U.S. government agency and U.S. government sponsored enterprise debt and mortgage-backed securities. Refer to Note 4 — Securities Purchased Under Resale Agreements And Sold Under Repurchase Agreements to the Consolidated Financial Statements for additional details.

Long-Term Debt

Long-term debt, consisting of junior subordinated debt and a term loan, decreased \$9.9 million or 5% from \$206.1 million as of December 31, 2015 to \$196.2 million as of June 30, 2016. The decrease was primarily due to the quarterly repayment totaling \$10.0 million on the term loan.

The junior subordinated debt was issued in connection with the Company's various pooled trust preferred securities offerings. Junior subordinated debt is recorded as a component of long-term debt and includes the value of the common stock issued by six wholly-owned subsidiaries in conjunction with these transactions. The junior subordinated debt totaled \$146.2 million and \$146.1 million as June 30, 2016 and December 31, 2015, respectively. The junior subordinated debt had a weighted average interest rate of 2.17% and 1.84% for the six months ended June 30, 2016 and 2015, respectively, and remaining maturity terms of 18.4 years to 21.2 years as of June 30, 2016. Beginning in 2016, trust preferred securities no longer qualify as Tier I capital and are limited to Tier II capital for regulatory purposes, based on Basel III Capital Rules. For further discussion, please see Item 1. Business — Supervision and Regulation — Capital Requirements of the Company's 2015 Form 10-K.

In 2013, the Company entered into a \$100.0 million three-year term loan agreement. The terms of the agreement were modified in 2015 to extend the term loan maturity from July 1, 2016 to December 31, 2018, where principal repayments of \$5.0 million are due quarterly. The term loan bears interest at the rate of the three-month London Interbank Offering Rate plus 150 basis points and the weighted average interest rate was 2.17% and 1.81% for the six months ended June 30, 2016 and 2015, respectively. The outstanding balance of the term loan was \$50.0 million and \$60.0 million as of June 30, 2016 and December 31, 2015, respectively.

Capital

The Company maintains an adequate capital base to support its anticipated asset growth, operating needs and credit risks and to ensure that East West and the Bank are in compliance with all regulatory capital guidelines. The Company engages in regular capital planning processes to optimize the use of available capital and to appropriately plan for future capital needs. The capital plan considers capital needs for the foreseeable future and allocates capital to both existing and future business activities. In addition, the Company conducts capital stress tests as part of its annual capital planning process. The stress tests enable the Company to assess the impact of adverse changes in the economy and interest rates on its capital base.

The Company's primary source of capital is retention of its operating earnings. Retained earnings increased \$152.5 million or 8% to \$2.03 billion as of June 30, 2016, compared to \$1.87 billion as of December 31, 2015. The increase was primarily due to net income of \$210.8 million, reduced by \$58.3 million of common stock dividends. Total stockholders' equity increased \$174.0 million or 6% to \$3.30 billion as of June 30, 2016, compared to \$3.12 billion as of December 31, 2015. The increase was primarily due to the \$152.5 million increase in retained earnings, as discussed earlier and the \$13.2 million increase in other comprehensive income primarily due to unrealized gains on available-for-sale securities, partially offset by the \$3.1 million repurchase of 96,277 treasury shares related to shares withheld from employees' vested restricted stock units for income tax withholdings.

Regulatory Capital and Ratios

The federal banking agencies have risk-based capital adequacy guidelines that are designed to reflect the degree of risk associated with a banking organization's operations and transactions. The guidelines cover transactions that are reported on the balance sheet as well as those recorded as off-balance sheet items. In 2013, the Federal Reserve Board, FDIC, and Office of the Comptroller of the Currency issued the final Basel III Capital Rules establishing a new comprehensive capital framework for strengthening international capital standards as well as implementing certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). Please see Item 1. Business — Supervision and Regulation — Capital Requirements of the Company's 2015 Form 10-K for additional information. The Basel III Capital Rules became effective for the Company and the Bank on January 1, 2015 (subject to phase-in periods for certain of their components).

The Basel III Capital Rules require that banking organizations maintain a minimum CET1 ratio of 4.5%, a Tier 1 capital ratio of 6.0%, and a total capital ratio of 8.0%. Beginning in 2016, the rules require banking organizations to maintain a capital conservation buffer of 2.5% above the capital minimums, phased-in over four years. When fully phased-in in 2019, the banking organizations will be required to maintain a CET1 capital ratio of at least 7.0%, a Tier 1 capital ratio of at least 8.5%, and a total capital ratio of at least 10.5% to avoid limitations on capital distributions (including common stock dividends and share repurchases) and certain discretionary incentive compensation payments.

The Company is committed to maintaining capital at a level sufficient to assure the Company's stockholders, customers and regulators that the Company and the Bank are financially sound. As of June 30, 2016 and December 31, 2015, both the Company and the Bank met all capital requirements under the Basel III Capital Rules on a fully phased-in basis, and were both considered "well capitalized." The following tables present the Company's and the Bank's capital ratios as of June 30, 2016 and December 31, 2015 under Basel III capital rules, and those required by regulatory agencies for capital adequacy and well capitalized classification purposes:

	Basel III Capital Rules									
	June 30, 2016		December 31, 2015		Minimum Regulatory Requirements		Well Capitalized Requirements		Fully Phased-in Minimum Regulatory Requirement	
	East	West	East	West						
	Company	Bank	Company	Bank						
CET1 risk-based capital	10.7%	11.0%	10.5%	11.0%	4.5	%	6.5	%	7.0	%
Tier 1 risk-based capital	10.7%	11.0%	10.7%	11.0%	6.0	%	8.0	%	8.5	%
Total risk-based capital	12.4%	12.1%	12.2%	12.1%	8.0	%	10.0	%	10.5	%
Tier 1 leverage capital	8.7 %	8.9 %	8.5 %	8.8 %	4.0	%	5.0	%	4.0	%

The growth in the Company's balance sheet contributed to the \$927.1 million or 4% increase in risk-weighted assets from \$25.23 billion as of December 31, 2015 to \$26.16 billion as of June 30, 2016. As of June 30, 2016, the Company's CET1 capital, Tier 1 risk-based capital, total risk-based capital ratios and Tier 1 leverage capital ratios were 10.7%, 10.7%, 12.4% and 8.7%, respectively, well above the well-capitalized requirements of 6.5%, 8.0%, 10.0% and 5.0%, respectively.

Regulatory Matters

The Bank entered into a written agreement, dated November 9, 2015, with the Federal Reserve Bank of San Francisco (the “Written Agreement”), to correct less than satisfactory BSA and AML programs detailed in a joint examination by the Federal Reserve Bank of San Francisco (“FRB”) and the California Department of Business Oversight (“DBO”). The Bank also entered into a related Memorandum of Understanding (“MOU”) with the DBO. Please see Item 7. MD&A — Regulatory Matters, and Note 19 — Regulatory Requirements and Matters to the Consolidated Financial Statements of the Company’s 2015 Form 10-K for further details.

We believe the Bank is making progress in executing the compliance plans and programs required by the Written Agreement and MOU, although there can be no assurances that our plans and progress will be found to be satisfactory by our regulators. As a result, the Bank will continue to require significant management and third party consultant resources to comply with the Written Agreement and MOU and to address any additional findings or recommendations by the regulators. The Bank has already added significant resources to meet the monitoring and reporting obligations imposed by the Written Agreement. The Bank expects these incremental administrative and third party costs, as well as the operational restrictions imposed by the Written Agreement, to adversely affect the Bank’s results of operations.

If additional compliance issues are identified or if the regulators determine that the Bank has not satisfactorily complied with the terms of the Written Agreement, the regulators could take further actions with respect to the Bank and, if such further actions were taken, such actions could have a material adverse effect on the Bank. The operating and other conditions of the Written Agreement could lead to an increased risk of being subject to additional regulatory actions by the DBO and FRB or other government agencies, as well as additional actions resulting from future regular annual safety and soundness and compliance examinations by the federal and state regulators that downgrade the regulatory ratings of the Bank.

Off-Balance Sheet Arrangements

In the course of the Company’s business, the Company may enter into or be a party to transactions that are not recorded on the balance sheet and are considered to be off-balance sheet arrangements. Off-balance sheet arrangements are any contractual arrangements whereby an unconsolidated entity is a party, under which the Company has: (1) any obligation under a guarantee contract; (2) a retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to that entity for such assets; (3) any obligation under certain derivative instruments; or (4) any obligation under a material variable interest held by the Company in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company, or engages in leasing, hedging or research and development services with the Company.

As a financial service provider, the Company routinely enters into commitments to extend credit to customers, such as loan commitments, commercial letters of credit for foreign and domestic trade, SBLCs and financial guarantees. Many of these commitments to extend credit may expire without being drawn upon. The credit policies used in underwriting loans to customers are also used to extend these commitments. Under some of these contractual agreements, the Company may also have liabilities contingent upon the occurrence of certain events. The Company’s liquidity sources have been, and are expected to be, sufficient to meet the cash requirements of its lending activities. The following table presents the Company’s commitments, commercial letters of credit and SBLCs as of June 30, 2016:

(\$ in thousands)	Commitments
	Outstanding
Loan commitments	\$ 4,758,116
Commercial letters of credit and SBLCs	\$ 1,447,447

A discussion of significant contractual arrangements under which the Company may be held contingently liable is included in Note 10 — Commitments And Contingencies to the Consolidated Financial Statements. In addition, the Company has contractual obligations for future payments on debts, borrowings and lease obligations as detailed in Item 7 — MD&A— Off-Balance Sheet Arrangements and Aggregate Contractual Obligations of the Company’s 2015 Form 10-K.

Asset Liability and Market Risk Management

Liquidity

Liquidity refers to the Company's ability to meet its contractual and contingent financial obligations, on or off-balance sheet, as they become due. The Company's primary liquidity management objective is to provide sufficient funding for its businesses throughout market cycles and be able to manage both expected and unexpected cash flow needs and requirements without adversely impacting the financial health of the Company. To achieve this objective, the Company analyzes its liquidity risk, maintains readily available liquid assets and accesses diverse funding sources including its stable core deposit base. The Company's Asset/Liability Committee ("ALCO") sets the liquidity guidelines that govern the day-to-day active management of the Company's liquidity position. The ALCO regularly monitors the Company's liquidity status and related management process, and provides regular reports to the Board.

The Company maintains liquidity in the form of cash and cash equivalents, short-term investments and available-for-sale investment securities. These assets totaled \$5.06 billion and \$5.43 billion as of June 30, 2016 and December 31, 2015, respectively, accounting for 15% and 17% of total assets as of June 30, 2016 and December 31, 2015, respectively. Traditional forms of funding such as deposits and borrowings augment these liquid assets. Total deposits amounted to \$28.22 billion as of June 30, 2016, compared to \$27.48 billion as of December 31, 2015, of which core deposits comprised 80% and 76% of total deposits as of June 30, 2016 and December 31, 2015, respectively. As a means of augmenting the Company's liquidity, the Company maintains available borrowing capacity under secured borrowing lines with the FHLB and FRB of San Francisco, unsecured federal funds' lines of credit with various correspondent banks for purchase of overnight funds, and several master repurchase agreements with major brokerage companies. The Company's available borrowing capacity with the FHLB and FRB of San Francisco was \$5.59 billion and \$3.00 billion, respectively, as of June 30, 2016. The Bank's unsecured federal funds' lines of credit, subject to availability, were \$716.0 million with correspondent banks. The Company believes that its liquidity sources are sufficient to meet all reasonable foreseeable short-term and intermediate-term needs.

During the six months ended June 30, 2016 and 2015, the Company experienced net cash inflows from operating activities of \$271.3 million and \$289.5 million, respectively. The difference between net income of \$210.8 million and net cash provided by operating activities of \$271.3 million for the six months ended June 30, 2016 was primarily due to a \$32.3 million increase in cash inflows from accrued expenses and other liabilities and \$31.4 million of non-cash charges during the six months ended June 30, 2016. Though net income increased \$12.0 million comparing the six months ended June 30, 2016 and 2015, net cash inflows from operating activities decreased \$18.2 million. This difference between net income and net cash inflows from operating activities was primarily due to an \$81.2 million decrease in cash flows from accrued interest receivable and other assets, partially offset by a \$29.2 million increase in cash flows from accrued expenses and other liabilities and a \$25.8 million increase in non-cash charges that contributed to a reduction in net income.

Net cash used in investing activities totaled \$49.7 million and \$798.6 million during the six months ended June 30, 2016 and 2015, respectively. The \$748.9 million reduction in net cash used in investing activities during the six months ended June 30, 2016 compared to the same period last year, was primarily due to a \$966.8 million increase in net cash inflows from available-for-sale investment securities and a \$120.0 million increase in net cash inflows from resale agreements, partially offset by a \$310.2 million increase in net cash outflows from loans receivable.

During the six months ended June 30, 2016 and 2015, the Company experienced net cash inflows from financing activities of \$13.7 million and \$1.35 billion, respectively. The \$1.33 billion decrease in net cash inflows from financing activities for the six months ended June 30, 2016 compared to the same period last year, was primarily due to a \$766.6 million decrease in net cash provided by deposits and \$700.0 million repayment of short-term FHLB advances during the six months ended June 30, 2016.

As of June 30, 2016, the Company is not aware of any trends, events or uncertainties that had or were reasonably likely to have a material effect on its liquidity position. Furthermore, the Company is not aware of any material commitments for capital expenditures in the foreseeable future.

East West's liquidity has historically been dependent on the payment of cash dividends by its subsidiary, East West Bank, subject to applicable statutes, regulations and special approval. East West Bank paid total dividends of \$100.0 million to East West during the six months ended June 30, 2016 and no dividend was paid for the six months ended June 30, 2015. In addition, in July 2016, the Board declared a quarterly cash dividend of \$0.20 per share for the Company's common stock payable on August 15, 2016 to stockholders of record on August 1, 2016.

Interest Rate Risk Management

Interest rate risk results primarily from the Company's traditional banking activities of gathering deposits and extending loans, and is the primary market risk for the Company. Economic and financial conditions, movements in interest rates and consumer preferences affect the difference between the interest the Company earns on interest-earning assets and pays on interest-bearing liabilities, and the level of the noninterest-bearing funding sources. In addition, changes in interest rate can influence the rate of principal prepayments on loans and speed of deposit withdrawals. Due to the pricing term mismatches and embedded options inherent in certain products, changes in market interest rates not only affect expected near-term earnings, but also the economic value of these interest-earning assets and interest-bearing liabilities. Other market risks include foreign currency exchange risk and equity price risk. These risks are not considered significant to the Company's interest rate risk and no separate quantitative information concerning these risks is presented herein.

With oversight by the Company's Board, the ALCO coordinates the overall management of the Company's interest rate risk. The ALCO meets regularly and is responsible for reviewing the Company's open market positions and establishing policies to monitor and limit exposure to market risk. Management of interest rate risk is carried out primarily through strategies involving the Company's investment securities portfolio, loan portfolio, available funding channels and capital market activities. In addition, the Company's policies permit the use of off-balance sheet derivative instruments to assist in managing interest rate risk.

The interest rate risk exposure is measured and monitored through various risk management tools which include a simulation model that performs interest rate sensitivity analysis under multiple scenarios. The model includes the Company's loans, customer deposits, investment securities and borrowing portfolios, including the repurchase and resale agreements. The financial instruments from the Company's domestic and foreign operations, forecasted noninterest income and noninterest expense items are also incorporated in the simulation. The interest rate scenarios simulated include an instantaneous parallel shift and non-parallel shift in the yield curve. In addition, the Company also performs various simulations using alternative interest rate scenarios. The alternative interest rate scenarios include yield curve flattening, yield curve steepening and yield curve inverting. In order to apply the assumed interest rate environment, adjustments are made to reflect the shift in the U.S. Treasury and other appropriate yield curves. The Company incorporates both a static balance sheet and a forward growth balance sheet in order to perform these evaluations. Results of these various simulations are used to formulate and gauge strategies to achieve a desired risk profile within the Company's capital and liquidity guidelines.

The simulation model is based on the actual maturity and re-pricing characteristics of the Company's interest-rate sensitive assets, liabilities and related derivative contracts. The modeled results are highly sensitive to the deposit decay assumptions used for deposits that do not have specific maturities. The Company uses historical regression analysis of the Company's internal deposit data as a guide to set deposit decay assumptions. In addition, the model is also highly sensitive to certain assumptions on the correlation of the change in interest rates paid on core deposits to changes in benchmark market interest rates, commonly referred to as deposit beta assumptions. Deposit beta assumptions are based on the Company's historical experience. The model is also sensitive to the loan and investment prepayment assumption. The loan and investment assumption, which relates to anticipated prepayments under different interest rate environments, is based on an independent model, as well as the Company's historical prepayment experiences.

Existing investment securities, loans, customer deposits and borrowings are assumed to roll into new instruments at a similar spread relative to benchmark interest rates and internal pricing guidelines. The assumptions applied in the model are documented and supported for reasonableness. Changes to key model assumptions are reviewed by the ALCO. Due to the sensitivity of the model results, the Company performs periodic testing to assess the impact of the assumptions. The Company also makes appropriate calibrations when necessary. Scenarios do not reflect strategies

that management could employ to limit the impact as interest rate expectations change. Simulation results are highly dependent on these assumptions. To the extent actual behavior is different from the assumptions in the models, there could be a change in interest rate sensitivity.

The following table presents the Company's net interest income and economic value of equity ("EVE") sensitivity at June 30, 2016 and December 31, 2015 related to an instantaneous and sustained non-parallel shift in market interest rates of 100 and 200 basis points in both directions. The results of the simulation are presented in the table below:

Change in Interest Rates (Basis Points)	Net Interest Income				EVE			
	Volatility ⁽¹⁾				Volatility ⁽²⁾			
	June 30, 2016		December 31, 2015		June 30, 2016		December 31, 2015	
+200	22.1	%	18.5	%	10.9	%	9.8	%
+100	11.0	%	9.6	%	6.2	%	5.3	%
-100	(3.8))%	(4.0))%	(3.8))%	(4.2))%
-200	(4.1))%	(4.6))%	(9.0))%	(6.9))%

(1) The percentage change represents net interest income over 12 months in a stable interest rate environment versus net interest income in the various rate scenarios.

(2) The percentage change represents net portfolio value of the Company in a stable interest rate environment versus net portfolio value in the various rate scenarios.

Twelve-Month Net Interest Income Simulation

The Company's estimated twelve-month net interest income sensitivity increased at June 30, 2016, compared to December 31, 2015, for both upward interest rate scenarios. In a simulated downward interest rate scenario, sensitivity remained relatively unchanged overall for both downward interest rate scenarios, mainly due to rates being at or near the floor rate in the current rate environment. The increase in sensitivity between June 30, 2016 and December 31, 2015 was primarily due to the increase in core deposits. This increase of core deposits caused the portfolio to become more sensitive, since these deposits are either noninterest-bearing demand deposits or have a low deposit beta.

Under most rising interest rate environments, the Company would expect some customers to move balances in demand deposits into higher interest-bearing deposits such as money market, savings or time deposits. The models are particularly sensitive to the assumption about the rate of such migration. The following table presents the Company's net interest income sensitivity as of June 30, 2016 for the +100 and +200 interest rate scenarios assuming a \$1.00 billion, \$2.00 billion and \$3.00 billion demand deposit migration:

Change in Interest Rates (Basis Points)	Net Interest Income Volatility					
	\$1.00 Billion		\$2.00 Billion		\$3.00 Billion	
	Migration 12 Months		Migration 12 Months		Migration 12 Months	
+200	19.1	%	16.1	%	13.1	%
+100	9.1	%	7.2	%	5.2	%

EVE at Risk

The Company's EVE sensitivity increased as of June 30, 2016, compared to December 31, 2015, for both upward interest rate scenarios. In the simulated upward 100 basis point and 200 basis point interest rate scenarios, sensitivity increased 6.2% and 10.9%, respectively. The increase in sensitivity as of June 30, 2016 compared to December 31,

2015 in the upward interest rate scenario was primarily due to changes in the balance sheet portfolio mix. Overall, sensitivity in the downward interest rate scenarios remained relatively flat at a decrease of 3.8% and 9.0% of the base level as of June 30, 2016 in declining rate scenarios of 100 and 200 basis points, respectively.

The Company's net interest income and EVE profile as of June 30, 2016, as presented in the net interest income and EVE tables, reflects an asset sensitive net interest income position and an asset sensitive EVE position. The Company is naturally asset sensitive due to its large portfolio of rate-sensitive loans that are funded in part by noninterest-bearing and rate-stable core deposits. As a result, if there are no significant changes in the mix of assets and liabilities, net interest income increases when interest rates increase and decreases when interest rates decrease. As of June 30, 2016, the federal funds target rate was at a range of 0.25% to 0.50% which was unchanged from the range as of December 31, 2015. Further declines in interest rates are not expected to significantly reduce earning asset yield or liability costs, nor have a meaningful impact on net interest income. Given the uncertainty of the magnitude, timing and direction of future interest rate movements and the shape of the yield curve, actual results may vary from those predicted by the Company's model.

Derivatives

It is the Company's policy not to speculate on the future direction of interest rates or foreign currency exchange rates. However, the Company will, from time to time, enter into derivatives transactions in order to reduce its exposure to market risks, including interest rate risk and foreign currency risk. The Company believes these transactions, when properly structured and managed, may provide a hedge against inherent risk in assets or liabilities and against risk in specific transactions. Hedging transactions may be implemented using swaps, caps, floors, financial futures, forwards and options. Prior to entering into any hedging activities, the Company analyzes the costs and benefits of the hedge in comparison to alternative strategies.

As of June 30, 2016 and December 31, 2015, the Company had cancellable interest rate swaps with original terms of 20 years and between 20 and 25 years, respectively. The objective of these interest rate swap contracts, which were designated as fair value hedges, was to obtain low-cost floating rate funding on the Company's brokered certificates of deposit. As of June 30, 2016 and December 31, 2015, the swap contracts called for the Company to receive a fixed interest rate and pay a variable interest rate. As of June 30, 2016 and December 31, 2015, the notional amounts of the Company's brokered certificates of deposit interest rate swaps were \$48.4 million and \$112.9 million, respectively. The fair values were an \$810 thousand liability and a \$5.2 million liability as of June 30, 2016 and December 31, 2015, respectively. This decrease was primarily due to \$63.7 million notional amounts of interest rate swaps on certificates of deposit that were called during the six months ended June 30, 2016.

The Company also offers various interest rate derivative products to clients. When derivative transactions are executed with clients, the derivative contracts are offset by paired trades with registered swap dealers. These contracts allow borrowers to lock in attractive intermediate and long term fixed rate financing while not increasing the interest rate risk to the Company. These transactions are not linked to specific Company assets or liabilities on the Consolidated Balance Sheets or to forecasted transactions in a hedge relationship and, therefore, are economic hedges and hedge accounting does not apply. The contracts are marked to market each reporting period with changes in fair value recorded as part of Noninterest income on the Consolidated Statements of Income. Fair values are determined from verifiable third-party sources that have considerable experience with derivative markets. The Company provides data to the third party source for purposes of calculating the credit valuation component of the fair value measurement of client derivative contracts. As of June 30, 2016 and December 31, 2015, the Company had entered into derivative contracts with clients and offsetting derivative contracts with counterparties having a notional balance totaling \$7.07 billion and \$6.49 billion, respectively. Since these contracts are primarily back-to-back interest rate swaps, the Company's net exposures as of June 30, 2016 and December 31, 2015 to interest rate derivative contracts were \$2.7 million and \$110 thousand liability, respectively.

The Company enters into foreign exchange contracts with its clients and counterparty banks primarily for the purpose of allowing its clients to hedge transactions in foreign currencies from fluctuations in foreign exchange rates and also to allow the Company to economically hedge against foreign exchange fluctuations in certain certificates of deposit and loans that it offers to its customers that are denominated in foreign currencies. These transactions are economic hedges and the Company does not apply hedge accounting. The Company's policies also permit taking proprietary currency positions within approved limits, in compliance with the proprietary trading exemption provided under Section 619 of the Dodd-Frank Act. The Company does not speculate in the foreign exchange markets, and actively manages its foreign exchange exposures within prescribed risk limits and defined controls. As of June 30, 2016 and December 31, 2015, the Company's outstanding foreign exchange contracts that were not designated as hedging instruments, totaled \$782.1 million and \$653.0 million, respectively. The fair values of the foreign exchange contracts, included in Other assets and Accrued expenses and other liabilities on the Consolidated Balance Sheets, totaled \$10.1 million and \$8.6 million, respectively, as of June 30, 2016 and \$10.3 million and \$9.4 million, respectively, as of December 31, 2015.

As of June 30, 2016 and December 31, 2015, the Company had two foreign exchange contracts, which were designated as net investment hedges to mitigate the risk of adverse changes in the USD-RMB exchange rate to hedge a portion of the Company's net investment in its subsidiary, East West Bank (China) Limited. As of June 30, 2016 and December 31, 2015, the Company's currency hedge had a notional value of 560.0 million RMB, the equivalent of 85.5 million USD, and a 560.0 million RMB, the equivalent of 86.6 million USD, respectively. The fair values were a \$1.7 million liability and a \$2.4 million asset of June 30, 2016 and December 31, 2015, respectively. As of June 30, 2016, the contracts have a weighted average strike price of 6.5535 RMB to USD and expire in September 2016.

Additional information on the Company's derivatives is presented in Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements of the Company's 2015 Form 10-K, Note 3 — Fair Value Measurement And Fair Value Of Financial Instruments and Note 6 — Derivatives to the Consolidated Financial Statements.

Critical Accounting Policies and Estimates

Our significant accounting policies (see Note 1 — Summary of Significant Accounting Policies to the Consolidated Financial Statements and Item 7. MD&A — Critical Accounting Policies and Estimates of the Company's 2015 Form 10-K) are fundamental to understanding our MD&A. A portion of the Company's significant accounting policies require the use of estimates and assumptions that may affect the value of the Company's assets or liabilities and financial results. In addition, certain accounting policies require significant judgment in applying complex accounting principles to individual transactions to determine the most appropriate treatment. There are procedures and processes in place to facilitate the application of such judgments. Changes in underlying factors, assumptions or estimates could have a material impact on the Company's future financial condition and results of operations. The following is a list of the more judgmental and complex accounting estimates and principles:

- fair value of financial instruments;
- available-for-sale investment securities;
- PCI loans;
- allowance for credit losses;
- goodwill impairment; and
- income taxes.

Recently Issued Accounting Standards

For detailed discussion and disclosure on new accounting pronouncements adopted and recent accounting standards, please see Note 2 — Current Accounting Developments to the Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For quantitative and qualitative disclosures regarding market risk in the Company's portfolio, please see Item 1. Consolidated Financial Statements — Note 6 — Derivatives and Item 2. MD&A — Asset Liability and Market Risk Management in Part I of this report.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of June 30, 2016, pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company conducted an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of June 30, 2016.

The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the U.S. Securities and Exchange Commission. The Company's disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that the Company files under the Exchange Act is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Change in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the quarter ended June 30, 2016, that has materially affected or is reasonably likely to materially affect the Company's internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Please see Note 10 — Commitments and Contingencies - Litigation, in Part I of this report, incorporated herein by reference.

ITEM 1A. RISK FACTORS

The Company's 2015 Form 10-K contains disclosure regarding the risks and uncertainties related to the Company's business under the heading Item 1A. Risk Factors. There has been no material change to the Company's risk factors as presented in the Company's 2015 Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no unregistered sales of equity securities or repurchase activities during the three months ended June 30, 2016.

ITEM 6. EXHIBITS
