Notwithstanding anything in the indenture to the contrary, Genco may not increase the conversion rate to more than 62.5 shares per \$1,000 principal amount of notes as a result of a make whole adjustment, subject to adjustments for the same events for which Genco must adjust the conversion price as set forth under Description of Notes Conversion of Notes Conversion Price Adjustments in the preliminary prospectus supplement relating to the notes, by the inverse of the adjustment factor applied to the conversion price under that section.

The exact stock prices and effective dates may not be set forth in the table above, in which case if the stock price is:

- between two stock price amounts in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365-day year;
- in excess of \$45.00 per share (subject to adjustment), no additional shares will be issued upon conversion; and
