## Edgar Filing: ABB LTD - Form 6-K

This Form 6-K consists of the following:

1. Press release issued by ABB Ltd dated July 25, 2013.
2. Announcements regarding transactions in ABB Ltd's Securities made by the directors or the members of the Executive Committee.

The information provided by Item 1 above is deemed filed for all purposes under the Securities Exchange Act of 1934.

**Press Release**

**ABB Q2: Improved results on balanced portfolio**

- **Higher revenues(1), operational EBITDA(2) and EPS despite uncertain market environment**
- **Early-cycle product businesses trending sequentially higher in several key markets**
- **Orders reflect greater ABB project selectivity and lower utility and industrial large capex**
- **Thomas & Betts with positive contribution, synergies on track**

Zurich, Switzerland, July 25, 2013 ABB reported higher revenues and earnings in the second quarter of 2013 despite challenging global markets.

We continue to see the positive impact on our results from our balanced geographic and business portfolio, said ABB Chief Executive Officer Joe Hogan. We grew orders in a number of key sectors and geographies, including China, and we saw an encouraging trend with sequential order growth in most of our product business compared to the first quarter of the year.

At the same time, we executed from our strong order backlog to drive both revenues and earnings higher, and we continued to take out cost to maintain profitability despite the uncertain market conditions.

Orders were down as the strategic realignment in Power Systems launched at the end of last year started to take shape with our focus on greater project selectivity and higher profitability, Hogan said. We've seen the first results in higher gross margins in the division's order backlog.

Delays in the award of large orders, which is linked to the ongoing global macroeconomic uncertainty, also impacted orders this quarter. But our underlying demand drivers remain sound and we still generated a book-to-bill(3) ratio for the first half of the year of 0.99, and 1.06 excluding the Power Systems division.

In addition, we saw another good contribution from Thomas & Betts, with synergies on track. Both power divisions achieved a solid operational EBITDA margin, and we grew service revenues faster than total organic revenues, Hogan said. And our improving Net Promoter Scores show we are making progress to increase customer satisfaction.

## Edgar Filing: ABB LTD - Form 6-K

Our outlook for the rest of the year remains unchanged from the end of the first quarter. Macro indicators are increasingly mixed, which makes predicting the timing of orders more difficult, especially large project orders. However, our strong backlog will continue to partly mitigate that uncertainty, while we continue to focus on balancing cost and growth and increasing customer satisfaction. We remain confident that our business and regional balance will continue to provide us with profitable growth opportunities.

Key figures \$ millions unless otherwise indicated	Q2 13	Q2 12	US\$	Change			H1 13	H1 12	US\$	Change

## Summary of Q2 results

### Growth overview

Market conditions remained mixed in the second quarter. Demand increased in certain countries and industrial sectors and selective grid investments by utilities also continued, although major transmission investments are being postponed as the overall economic climate remains challenging and growth in electricity consumption remains at low levels. At the same time, industrial production continued to slow in many mature economies and emerging markets reduced their growth expectations.

ABB's geographic, technology and channel scope mitigated some of this market variability and allowed the company to tap opportunities for profitable growth. For example, the company increased orders in businesses serving the US construction market, general industry in China, and the automotive sector in both mature and emerging markets. Higher orders in key European markets, such as Germany and Sweden, partly offset some of the continued weakness in southern Europe.

ABB's total orders received in the quarter declined 11 percent on an organic basis (8 percent lower including T&B) compared to the second quarter of 2012, driven mainly by a 45-percent decrease in large orders (above \$15 million). Large orders represented 9 percent of total orders, compared to 15 percent in the year-earlier period.

Base orders (below \$15 million) were 5 percent lower on an organic basis (flat including T&B), partly reflecting increased selectivity in the power businesses. However, orders were higher in most of the product businesses. Service orders increased by 3 percent in the quarter and represented 17 percent of total orders, up from 16 percent in the same quarter in 2012.

Revenues rose 6 percent (up 2 percent organic) primarily on execution of the strong order backlog. T&B contributed approximately \$640 million to revenues. Service revenues increased by 3 percent in the quarter.

### Orders received and revenues by region

\$ millions	Orders received		Change		Revenues		Change	
	Q2 13	Q2 12	US\$	Local	Q2 13	Q2 12	US\$	Local
Europe	3,149	3,214	-2%	-4%	3,421	3,441	-1%	-2%
The Americas	2,736	2,934	-7%	-6%	3,052	2,577	18%	19%
<i>Organic</i>	2,221	2,676	-17%	-16%	2,526	2,319	9%	10%
Asia	2,494	2,759	-10%	-10%	2,783	2,708	3%	2%
Middle East and Africa	933	1,145	-19%	-17%	969	937	3%	6%
<b>Group total</b>	<b>9,312</b>	<b>10,052</b>	<b>-7%</b>	<b>-8%</b>	<b>10,225</b>	<b>9,663</b>	<b>6%</b>	<b>6%</b>

Orders declined regionally, mainly related to lower large orders. Europe declined on a total order basis as power utility investments remained cautious. Automation orders in Europe were steady compared to the same quarter in 2012, while total orders increased in key markets such as

## Edgar Filing: ABB LTD - Form 6-K

Germany and Sweden in the quarter. On an organic basis, orders in the Americas declined, also the result of lower capex by utilities and oil and gas customers. Asia orders fell by 10 percent compared to a strong quarter the year before, as modest growth in China was more than offset by the challenging market in India and declines related to large orders in a number of other countries. Orders grew in Egypt and Saudi Arabia, but overall orders in the Middle East and Africa were lower.

## 2013 Q2 orders received and revenues by division

\$ millions unless otherwise indicated	Orders received		Change in US\$	Change in local currency	Revenues		Change in US\$	Change in local currency
	Q2 2013	Q2 2012			Q2 2013	Q2 2012		
<b>Discrete Automation and Motion</b>	2,392	2,428	-1%	-2%	2,362	2,368	0%	-1%
<b>Low Voltage Products</b>	1,980	1,655	20%	19%	1,929	1,596	21%	20%
<i>Organic</i>	1,352	1,342	1%	0%	1,291	1,283	1%	0%
<b>Process Automation</b>	1,788	2,247	-20%	-21%	2,130	2,052	4%	4%
<b>Power Products</b>	2,596	2,791	-7%	-7%	2,781	2,610	7%	6%
<b>Power Systems</b>	1,307	1,890	-31%	-31%	1,962	1,872	5%	5%
<b>Corporate and other</b> <i>(incl. inter-division eliminations)</i>	-751	-959			-939	-835		
<b>ABB Group</b>	<b>9,312</b>	<b>10,052</b>	<b>-7%</b>	<b>-8%</b>	<b>10,225</b>	<b>9,663</b>	<b>6%</b>	<b>6%</b>
<i>Organic</i>				<i>-11%</i>				<i>2%</i>

**Discrete Automation and Motion:** Orders reflect generally weaker industrial activity in several large markets compared to a year ago, which was partly offset by large orders for power conversion equipment used in rail applications and robotics equipment in the automotive industry. Revenues were flat as execution of the order backlog compensated lower sales of early-cycle products such as industrial motors and drives. Service revenues increased 4 percent.

**Low Voltage Products:** Orders and revenues were flat on an organic basis as demand growth for many early-cycle products was offset by a decline in orders for low-voltage systems used in mid- to late-cycle sectors. Organic orders and revenues trended higher in a number of key markets in the quarter, including China, Russia and the US. Service orders and revenues grew at a double-digit pace.

**Process Automation:** Orders declined primarily as the result of fewer large orders in the oil and gas, mining and marine sectors compared to the same quarter a year earlier. Revenue growth was driven by the execution of the strong order backlog in marine and mining. Lifecycle service revenues increased 5 percent.

**Power Products:** Demand for power distribution and industrial applications remained steady. Utilities continued to make targeted investments in power transmission. The challenging market conditions combined with continued selectivity resulted in a lower order intake compared to the second quarter of the previous year. Higher revenues reflect execution of the order backlog and growth in service volumes.

**Power Systems:** The division's strategic repositioning to increase project selectivity and enhance margins was the primary reason for lower orders received in the quarter. In addition, economic uncertainties in most regions continued to result in project delays, although longer-term growth drivers to strengthen and interconnect power grids, increase reliability and integrate renewables remain intact. Revenues were higher across most businesses in the quarter on execution of the order backlog. Service revenues also grew.

## Earnings overview

### Operational EBITDA

Operational EBITDA in the second quarter of 2013 amounted to \$1.6 billion, an increase of 6 percent. T&B contributed approximately \$115 million to operational EBITDA.

The Group's operational EBITDA margin was flat compared to the same period in 2012. Cost savings from sourcing initiatives and operational improvements more than offset the negative impact of lower-margin orders being executed out of the power backlog. Margins were supported by improved capacity utilization and continuing discipline in selling, general and administrative (SG&A) expenses in response to current market conditions.

### Income from operations(7)

Income from operations amounted to approximately \$1.2 billion, 19 percent higher compared to the same quarter in 2012. The increase partly reflects the net impact of foreign exchange and commodity timing differences(8), which increased income from operations in the second quarter of 2013 by \$8 million compared with a negative impact in the same period a year earlier of \$82 million. In addition, acquisition-related expenses and certain non-operational items totaled \$28 million in the second quarter of 2013 compared with \$90 million in the same quarter a year earlier. Also included in income from operations is acquisition-related amortization of \$93 million, compared with \$82 million a year earlier.

### Net income

Net income for the quarter increased 16 percent to \$763 million, mainly related to foreign exchange and commodity timing differences as well as lower acquisition-related expenses and certain non-operational items. Basic earnings per share in the second quarter amounted to \$0.33 versus \$0.29 a year earlier. Operational EPS(9) increased 2 percent compared to the second quarter of 2012.

## 2013 Q2 earnings and cash flows by division

\$ millions unless otherwise indicated	Operational EBITDA			Operational EBITDA margin		Cash flows from operating activities		Change in US\$
	Q2 2013	Q2 2012	Change in US\$	Q2 2013	Q2 2012	Q2 2013	Q2 2012	
<b>Discrete Automation and Motion</b>	428	446	-4%	18.1%	18.8%	326	332	-2%
<b>Low Voltage Products</b>	367	286	28%	19.0%	17.9%	255	161	58%
<i>Organic</i>	251	228	10%	19.4%	17.7%			
<b>Process Automation</b>	252	268	-6%	11.8%	13.1%	163	95	72%
<b>Power Products</b>	409	387	6%	14.7%	14.7%	223	224	0%
<b>Power Systems</b>	159	119	34%	7.9%	6.2%	-151	90	n.a
<b>Corporate and other</b> <i>(incl. inter-division eliminations)</i>	-54	-35				-273	-307	11%
<b>ABB Group</b>	<b>1,561</b>	<b>1,471</b>	<b>6%</b>	<b>15.2%</b>	<b>15.1%</b>	<b>543</b>	<b>595</b>	<b>-9%</b>

**Discrete Automation and Motion:** Earnings and margins partly reflect a change in revenue mix versus the year-earlier period, driven in part by an increased share of system revenues where margins are below the divisional average.

**Low Voltage Products:** The operational EBITDA margin excluding Thomas & Betts increased on a combination of successful cost management, growth in a number of higher-margin product businesses, and an increase in the share of service revenues.

**Process Automation:** Lower operational EBITDA and margins primarily reflect the timing of project revenues as well as some under-absorption of fixed costs in parts of the more profitable product business, which more than offset margin improvements in lifecycle services.

**Power Products:** Continued cost savings and a favorable product mix enabled the division to maintain its operational EBITDA margin at the same level as a year ago.

**Power Systems:** The increase in operational EBITDA margin mainly reflects improved project execution. Cash from operating activities was affected by the timing of project payments as well as initiatives related to the repositioning.

**Balance sheet and cash flow**

Total debt amounted to \$8.1 billion compared to \$10.1 billion at the end of 2012. The reduction primarily resulted from the maturity of 700 million bonds in June 2013 and a reduction in commercial paper outstanding of approximately \$710 million.

Net debt<sup>(10)</sup> was \$3.4 billion at the end of June 2013 versus \$1.6 billion at the end of December 2012. The primary contributor to the change was the payment of the annual dividend to shareholders of approximately \$1.7 billion.

ABB reported cash from operations of \$543 million versus \$595 million in the same quarter in 2012, reflecting a combination of higher net working capital needed to execute large projects and the timing of customer advances, both factors related mainly to Power Systems. Net working capital as a percentage of revenues<sup>(8)</sup> amounted to 17.5 percent, an increase of 1.8 percentage-points versus the end of the same quarter a year earlier.

In June, Moody's credit rating agency reiterated its A2 rating on ABB's long-term debt, with a stable outlook.

### **Acquisitions**

ABB announced in April the planned acquisition of US-based solar inverter manufacturer Power-One for approximately \$1 billion. The deal is aimed at positioning ABB as a global leader in what it expects to be a high-growth renewable-energy market. All shareholder and regulatory approvals have been received and the transaction is expected to close shortly.

### **Technology and innovation**

ABB continued to drive technology advances and launch new products aimed at helping customers improve productivity and energy efficiency. For example, the company announced the delivery of a new generation of multiplexers' devices used to increase the amount of data carried over existing communication lines to a Swiss utility. The products play a central role in the development of smarter and safer grids.

Other innovations include new software to help utilities and industries ensure the reliability of critical infrastructure. The solution combines ABB's expertise in technologies such as transformers and circuit breakers with business enterprise IT software to automate processes, manage critical assets more efficiently, and prioritize maintenance and repair activities. The technology is being deployed by American Electric Power (AEP), one of the leading power utilities in the US, in all of its transmission substations across the country.

ABB recently announced a project to supply chargers to more than 200 electric vehicle fast-charging stations in the Netherlands, bringing an EV fast charger within 50 kilometers of all of the country's 16.7 million inhabitants. The stations will be capable of charging electric vehicles in 15-30 minutes. ABB also developed a new boost charging technology that will be deployed for the first time on a large capacity electric bus in Geneva, Switzerland. The bus will be charged at selected stops with a 15-second energy boost.

ABB's advanced technology for high-efficiency motors helped the company strengthen its market leadership in low-voltage motors. According to a recent report from information and analytics provider IHS, in 2012 ABB boosted its share in an approximately \$15-billion market to 14 percent.

### **Management Changes**

During the second quarter, ABB announced the resignation of Joe Hogan as Chief Executive Officer (CEO) and the appointment of his successor, Ulrich Spiesshofer.

## Edgar Filing: ABB LTD - Form 6-K

Spiesshofer, who is currently an executive vice president and head of the Discrete Automation and Motion division, will succeed Hogan on September 15, 2013 in an orderly transition.

ABB also announced the resignation of Chief Technology Officer Prith Banerjee, whose successor is expected to be announced in due course.

### **Outlook**

Our long-term growth drivers such as the need for greater industrial productivity, more reliable and efficient power delivery and growth in renewables remain in place. Shorter-term trends such as industrial production growth and government policy are expected to remain the key drivers of demand over the rest of 2013. There are no clear changes in demand trends seen in the first half of the year as we head into the second half of 2013.

In a market environment in which near-term uncertainty is likely to remain, we will continue to focus on executing our large order backlog and taking advantage of our broad product and geographic scope to capture profitable growth opportunities in line with our 2011-15 targets.

This will be supported by our ongoing initiatives to improve margins and project selection and execution. Growing service revenues, securing the synergies from recent acquisitions, increasing customer satisfaction and successfully commercializing our pipeline of innovative technologies will remain important contributors to our growth and profitability targets.

We will continue to drive cost savings and productivity improvements equivalent to 3-5 percent of cost of sales every year through improved supply management, better quality and higher returns on investments in sales and R&D. We remain committed to delivering higher cash to shareholders and improving returns on our capital investments in both organic and inorganic growth.

**More information**

The 2013 Q2 results press release is available from July 25, 2013, on the ABB News Center at [www.abb.com/news](http://www.abb.com/news) and on the Investor Relations homepage at [www.abb.com/investorcenter](http://www.abb.com/investorcenter), where a presentation for investors will also be published.

A video from Chief Executive Officer Joe Hogan on ABB's second-quarter 2013 results will be available at 06:30 a.m. Central European Time (CET) today at [www.youtube.com/abb](http://www.youtube.com/abb).

ABB will host a media conference call starting at 10:30 a.m. CET. Callers from the US and Canada should dial +1 866 291 4166 (Toll-Free). U.K. callers should dial +44 203 059 58 62. From Sweden +46 85 051 0031, and from the rest of Europe, +41 58 310 50 00. Lines will be open 15 minutes before the conference starts. Playback of the call will start 1 hour after the call ends and will be available for 24 hours: Playback numbers: +44 207 108 6233 (U.K.), +41 91 612 4330 (rest of Europe) or +1 866 416 2558 (U.S./Canada). The code is 15047, followed by the # key. The recorded session will also be available as a podcast 1 hour after the end of the call and can be downloaded from [www.abb.com/news](http://www.abb.com/news).

A conference call for analysts and investors is scheduled to begin today at 3:00 p.m. CET (2:00 p.m. in the UK, 9:00 a.m. EDT). Callers should dial +1 866 291 4166 from the US/Canada (toll-free), +44 203 059 5862 from the U.K., +46 8 5051 0031 (Sweden) or +41 58 310 5000 from the rest of the world. Callers are requested to phone in 15 minutes before the start of the call. The recorded session will be available as a podcast one hour after the end of the conference call and can be downloaded from our website. You will find the link to access the podcast at [www.abb.com/investorcenter](http://www.abb.com/investorcenter).

**Supplemental financial information**

**June 30, 2013**

ABB presents the following financial measures to supplement its Interim Consolidated Financial Information (unaudited) which is prepared in accordance with United States generally accepted accounting principles (U.S. GAAP). These supplemental financial measures are, or may be, considered non-GAAP financial measures as defined in the rules of the U.S. Securities and Exchange Commission (SEC).

While ABB's management believes that the non-GAAP financial measures herein are useful in evaluating ABB's operating results, this information should be considered as supplemental in nature and not as a substitute for the related financial information prepared in accordance with U.S. GAAP. Therefore these measures should not be viewed in isolation but considered together with the Interim Consolidated Financial Information (unaudited) prepared in accordance with U.S. GAAP as of and for the six and three months ended June 30, 2013.

**Operational EBITDA margin**

**Definition**

**Operational EBITDA**

Operational EBITDA represents income from operations excluding depreciation and amortization, restructuring and restructuring-related expenses, and acquisition-related expenses and certain non-operational items, as well as foreign exchange/commodity timing differences in income from operations consisting of: (i) unrealized gains and losses on derivatives (foreign exchange, commodities, embedded derivatives), (ii) realized gains and losses on derivatives where the underlying hedged transaction has not yet been realized, and (iii) unrealized foreign exchange movements on receivables/payables (and related assets/liabilities).

**Operational revenues**

Operational revenues are total revenues adjusted for foreign exchange/commodity timing differences in total revenues of: (i) unrealized gains and losses on derivatives, (ii) realized gains and losses on derivatives where the underlying hedged transaction has not yet been realized, and (iii) unrealized foreign exchange movements on receivables (and related assets).

**Operational EBITDA margin**

Operational EBITDA margin is Operational EBITDA as a percentage of Operational revenues.

**Operational EPS****Definition****Operational net income**

Operational net income is calculated as Net income attributable to ABB adjusted for the net-of-tax impact (using the Group's effective tax rate) of:

- i) restructuring and restructuring-related expenses,
- ii) acquisition-related expenses and certain non-operational items,
- iii) foreign exchange/commodity timing differences in Income from operations consisting of: (a) unrealized gains and losses on derivatives (foreign exchange, commodities, embedded derivatives), (b) realized gains and losses on derivatives where the underlying hedged transaction has not yet been realized, and (c) unrealized foreign exchange movements on receivables/payables (and related assets/liabilities), and
- iv) amortization related to acquisitions.

**Amortization related to acquisitions**

Amortization expense on intangibles arising upon acquisitions.

**Operational EPS**

Operational EPS is calculated as Operational net income divided by the weighted-average number of shares used in determining Basic EPS.

**Reconciliation**

(1) EPS amounts are computed separately, therefore the sum of the per share amounts shown may not equal to the total.

(2) Net of tax at Group effective tax rate.

**Net debt****Definition****Net debt**

Net debt is defined as Total debt less Cash and marketable securities.

**Total debt**

Total debt is the sum of Short-term debt and current maturities of long-term debt, and Long-term debt.

**Cash and marketable securities**

Cash and marketable securities is the sum of Cash and equivalents and Marketable securities and short-term investments.

**Reconciliation**

**Net working capital as a percentage of revenues****Definition****Net working capital**

Net working capital is the sum of i) receivables, net, ii) inventories, net, and iii) prepaid expenses; less iv) accounts payable, trade, v) billings in excess of sales, vi) advances from customers, vii) non-trade payables, and viii) accrued expenses and deferred income.

**Adjusted revenues for the trailing twelve months**

Adjusted revenues for the trailing twelve months includes total revenues recorded by ABB in the twelve months preceding the relevant balance sheet date adjusted to estimate the impact of annualizing revenues of certain acquisitions which were completed in the same trailing twelve month period.

**Net working capital as a percentage of revenues**

Net working capital as a percentage of revenues is calculated as Net working capital divided by Adjusted revenues for the trailing twelve months.

**Reconciliation**

See Notes to the Interim Consolidated Financial Information

**Notes to the Interim Consolidated Financial Information (unaudited)**

**Note 1. The Company and basis of presentation**

ABB Ltd and its subsidiaries (collectively, the Company) together form a leading global company in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. The Company works with customers to engineer and install networks, facilities and plants with particular emphasis on enhancing efficiency, reliability and productivity for customers who generate, convert, transmit, distribute and consume energy.

The Company's Interim Consolidated Financial Information is prepared in accordance with United States of America generally accepted accounting principles (U.S. GAAP) for interim financial reporting. As such, the Interim Consolidated Financial Information does not include all the information and notes required under U.S. GAAP for annual consolidated financial statements. Therefore, such financial information should be read in conjunction with the audited consolidated financial statements in the Company's Annual Report for the year ended December 31, 2012.

The preparation of financial information in conformity with U.S. GAAP requires management to make assumptions and estimates that directly affect the amounts reported in the Interim Consolidated Financial Information. The most significant, difficult and subjective of such accounting assumptions and estimates include:

- assumptions and projections, principally related to future material, labor and project-related overhead costs, used in determining the percentage-of-completion on projects,
- estimates of loss contingencies associated with litigation or threatened litigation and other claims and inquiries, environmental damages, product warranties, regulatory and other proceedings,
- assumptions used in the calculation of pension and postretirement benefits and the fair value of pension plan assets,
- recognition and measurement of current and deferred income tax assets and liabilities (including the measurement of uncertain tax positions),
- growth rates, discount rates and other assumptions used in testing goodwill for impairment,
- assumptions used in determining inventory obsolescence and net realizable value,

- estimates and assumptions used in determining the fair values of assets and liabilities assumed in business combinations,
- growth rates, discount rates and other assumptions used to determine impairment of long-lived assets, and
- assessment of the allowance for doubtful accounts.

The actual results and outcomes may differ from the Company's estimates and assumptions.

A portion of the Company's activities (primarily long-term construction activities) has an operating cycle that exceeds one year. For classification of current assets and liabilities related to such activities, the Company elected to use the duration of the individual contracts as its operating cycle. Accordingly, there are accounts receivable, inventories and provisions related to these contracts which will not be realized within one year that have been classified as current.

In the opinion of management, the unaudited Interim Consolidated Financial Information contains all necessary adjustments to present fairly the financial position, results of operations and cash flows for the reported interim periods. Management considers all such adjustments to be of a normal recurring nature.

The Interim Consolidated Financial Information is presented in United States dollars (\$) unless otherwise stated. Certain amounts reported for prior periods in the Interim Consolidated Financial Information have been reclassified to conform to the current period's presentation. These changes primarily relate to current liabilities, where amounts previously reported in Employee and other payables and Accrued expenses have been reclassified to Other provisions and Other current liabilities.

**Notes to the Interim Consolidated Financial Information (unaudited)**

**Note 2. Recent accounting pronouncements**

**Applicable in current period**

*Disclosures about offsetting assets and liabilities*

As of January 2013, the Company adopted two accounting standard updates regarding disclosures about amounts of certain financial and derivative instruments recognized in the statement of financial position that are either (i) offset or (ii) subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset. The scope of these updates covers derivatives (including bifurcated embedded derivatives), repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending arrangements. These updates are applicable retrospectively and did not have a significant impact on the consolidated financial statements.

*Reporting of amounts reclassified out of accumulated other comprehensive income*

As of January 2013, the Company adopted an accounting standard update regarding the presentation of amounts reclassified out of accumulated other comprehensive income. Under the update, the Company is required to present, either in a single note or parenthetically on the face of the financial statements, significant amounts reclassified out of accumulated other comprehensive income by the respective income statement line item (if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the reporting period). If a component is not required to be reclassified to net income in its entirety, the Company would instead cross-reference to other U.S. GAAP required disclosures that provide additional information about the amounts. This update is applicable prospectively and resulted in the Company presenting, in a single note, significant reclassifications out of accumulated other comprehensive income (see Note 13).

**Applicable for future periods**

*Parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity*

In March 2013, an accounting standard update was issued regarding the release of cumulative translation adjustments of a parent when it ceases to have a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity (for the Company, a foreign entity is an entity having a functional currency other than U.S. dollars). Under the update, the Company would recognize cumulative translation adjustments in net income when it ceases to have a controlling financial interest in a subsidiary or group of assets within a consolidated foreign entity and if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. For foreign equity-accounted companies, a pro rata portion of the cumulative translation adjustment would be recognized in net income upon a partial sale of the equity-accounted company. This update is effective for the Company for annual and interim periods beginning January 1, 2014, and is applicable prospectively. The impact of this update on the consolidated financial statements is dependent on

## Edgar Filing: ABB LTD - Form 6-K

future transactions resulting in derecognition of foreign assets, subsidiaries or foreign equity-accounted companies completed on or after adoption.

*Presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists*

In July 2013, an accounting standard update was issued regarding the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. Under the update, the Company would present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except in certain defined circumstances. This update is effective for the Company for annual and interim periods beginning January 1, 2014, and is applicable prospectively. The Company is currently evaluating the impact of this update on its consolidated financial statements.

**Notes to the Interim Consolidated Financial Information (unaudited)****Note 3. Acquisitions**

Acquisitions were as follows:

(\$ in millions, except number of acquired businesses)(1)	Six months ended		Three months ended	
	2013	June 30, 2012	2013	June 30, 2012
Acquisitions (net of cash acquired)(2)	14	3,578		3,414
Aggregate excess of purchase price over fair value of net assets acquired(3)	(60)	3,260	(74)	3,168
Number of acquired businesses	1	4		3

(1) Amounts for the six and three months ended June 30, 2012, relate primarily to the acquisition of Thomas & Betts. For all periods presented, amounts include adjustments arising during the measurement period of acquisitions. In the six and three months ended June 30, 2013, adjustments included in Aggregate excess of purchase price over fair value of net assets acquired amounted to \$73 million and \$74 million, respectively, primarily in respect of a reduction in certain deferred tax liabilities related to Thomas & Betts. In the six and three months ended June 30, 2012, adjustments included in Aggregate excess of purchase price over fair value of net assets acquired amounted to \$27 million and \$30 million, respectively.

(2) Excluding changes in cost and equity investments but including \$5 million (in the six and three months ended June 30, 2012) representing the fair value of replacement vested stock options issued to Thomas & Betts employees at the acquisition date.

(3) Recorded as goodwill.

Acquisitions of controlling interests have been accounted for under the acquisition method and have been included in the Company's Interim Consolidated Financial Information since the date of acquisition.

While the Company uses its best estimates and assumptions as part of the purchase price allocation process to value assets acquired and liabilities assumed at the acquisition date, the purchase price allocation for acquisitions is preliminary for up to 12 months after the acquisition date and is subject to refinement as more detailed analyses are completed and additional information about the fair values of the assets and liabilities becomes available.

On May 16, 2012, the Company acquired all outstanding shares of Thomas & Betts Corporation (Thomas & Betts) for \$72 per share in cash. The resulting cash outflows for the Company amounted to \$3,700 million, representing \$3,282 million for the purchase of the shares (net of cash acquired of \$521 million), \$94 million related to cash settlement of Thomas & Betts options held at acquisition date and \$324 million for the repayment of debt assumed upon acquisition. Thomas & Betts designs, manufactures and markets components used to manage the connection, distribution, transmission and reliability of electrical power in industrial, construction and utility applications. The acquisition of Thomas & Betts supports the Company's strategy of expanding its Low Voltage Products operating segment into new geographies, sectors and products, and consequently the goodwill acquired represents the future benefits associated with the expansion of market access and product scope.

**Notes to the Interim Consolidated Financial Information (unaudited)**

The final allocation of the purchase consideration for Thomas & Betts is as follows:

(\$ in millions)	Allocated amounts	Weighted-average useful life
Customer relationships	1,169	18 years
Technology	179	5 years
Trade names	155	10 years
Order backlog	12	7.5 months
<b>Intangible assets</b>	<b>1,515</b>	<b>15 years</b>
Fixed assets	458	
Debt acquired	(619)	
Deferred tax liabilities	(971)	
Inventories	300	
Other assets and liabilities, net(1)	49	
Goodwill(2)	2,649	
<b>Total consideration (net of cash acquired)(3)</b>	<b>3,381</b>	

(1) Gross receivables from the acquisition totaled \$387 million; the fair value of which was \$344 million after rebates and allowance for estimated uncollectable receivables.

(2) Goodwill recognized is not deductible for income tax purposes.

(3) Cash acquired in the acquisition totaled \$521 million. Additional consideration included \$94 million related to the cash settlement of stock options held by Thomas & Betts employees at the acquisition date and \$5 million representing the fair value of replacement vested stock options issued to Thomas & Betts employees at the acquisition date. The fair value of these stock options was estimated using a Black-Scholes model.

The Company's Consolidated Income Statements for both the six and three months ended June 30, 2012, include total revenues of \$313 million and a net loss (including acquisition-related charges) of \$38 million, related to Thomas & Betts since the date of acquisition.

The unaudited pro forma financial information in the table below summarizes the combined pro forma results of the Company and Thomas & Betts for the six and three months ended June 30, 2012, as if Thomas & Betts had been acquired on January 1, 2011.

(\$ in millions)	Six months ended June 30, 2012	Three months ended June 30, 2012
Total revenues	19,485	9,971
Income from continuing operations, net of tax	1,485	726

**Notes to the Interim Consolidated Financial Information (unaudited)**

The unaudited pro forma results above include certain adjustments related to the Thomas & Betts acquisition. The table below summarizes the adjustments necessary to present the pro forma financial information of the Company and Thomas & Betts combined, as if Thomas & Betts had been acquired on January 1, 2011.

(\$ in millions)	Six months ended June 30, 2012	Adjustments Three months ended June 30, 2012
Impact on cost of sales from additional amortization of intangible assets (excluding order backlog capitalized upon acquisition)	(26)	(9)
Impact on cost of sales from amortization of order backlog capitalized upon acquisition	2	2
Impact on cost of sales from fair valuing acquired inventory	15	15
Impact on cost of sales from additional depreciation of fixed assets	(12)	(4)
Interest expense on Thomas & Betts debt	5	1
Impact on selling, general and administrative expenses from Thomas & Betts stock-option plans adjustments	16	16
Impact on selling, general and administrative expenses from acquisition-related costs	54	45
Impact on interest and other finance expense from bridging facility costs	13	11
Other	(5)	
Income taxes		(7)
<b>Total pro forma adjustments</b>	<b>62</b>	<b>70</b>

The pro forma results are for information purposes only and do not include any anticipated cost synergies or other effects of the planned integration of Thomas & Betts. Accordingly, such pro forma amounts are not necessarily indicative of the results that would have occurred had the acquisition been completed on the date indicated, nor are they indicative of the future operating results of the combined company.

Changes in total goodwill were as follows:

(\$ in millions)	Total goodwill
<b>Balance at January 1, 2012</b>	<b>7,269</b>
Additions during the period <sup>(1)</sup>	2,873
Measurement period adjustments related to prior year acquisitions	22
Exchange rate differences	62
<b>Balance at December 31, 2012</b>	<b>10,226</b>
Additions during the period	13
Measurement period adjustments related to prior year acquisitions	(73)
Exchange rate differences	(138)
<b>Balance at June 30, 2013</b>	<b>10,028</b>

(1) Includes primarily goodwill of \$2,723 million in respect of Thomas & Betts, acquired in May 2012, which has been allocated to the Low Voltage Products operating segment and goodwill in respect of Newave, acquired in February 2012, which has been allocated to the Discrete Automation and Motion operating segment.

**ABB to acquire Power-One, Inc.**

On April 22, 2013, the Company announced that it had reached an agreement to acquire Power-One, Inc. Power-One is a provider of renewable energy and energy-efficient power conversion and power management solutions and a designer and manufacturer of photovoltaic inverters. The anticipated cash outflows for the Company upon closing the transaction amount to approximately \$1 billion, based on a purchase price of \$6.35 per share. Shareholder and regulatory approvals have been received and the transaction is expected to close in the third quarter of 2013.

## Notes to the Interim Consolidated Financial Information (unaudited)

## Note 4. Cash and equivalents, marketable securities and short-term investments

## Current assets

Cash and equivalents, marketable securities and short-term investments consisted of the following:

June 30, 2013						
(\$ in millions)	Cost basis	Gross unrealized gains	Gross unrealized losses	Fair value	Cash and equivalents	Marketable securities and short-term investments

## Non-current assets

Included in Other non-current assets are certain held-to-maturity marketable securities pledged in respect of a certain non-current deposit liability. At June 30, 2013, the amortized cost, gross unrecognized gain and fair value (based on quoted market prices) of these securities were \$100 million, \$20 million and \$120 million, respectively. At December 31, 2012, the amortized cost, gross unrecognized gain and fair value (based on quoted market prices) of these securities were \$97 million, \$27 million and \$124 million, respectively. The maturity dates of these securities range from 2014 to 2021.

**Note 5. Financial instruments**

The Company is exposed to certain currency, commodity, interest rate and equity risks arising from its global operating, financing and investing activities. The Company uses derivative instruments to reduce and manage the economic impact of these exposures.

**Currency risk**

Due to the global nature of the Company's operations, many of its subsidiaries are exposed to currency risk in their operating activities from entering into transactions in currencies other than their functional currency. To manage such currency risks, the Company's policies require the subsidiaries to hedge their foreign currency exposures from binding sales and purchase contracts denominated in foreign currencies. For forecasted foreign currency denominated sales of standard products and the related foreign currency

**Notes to the Interim Consolidated Financial Information (unaudited)**

denominated purchases, the Company's policy is to hedge up to a maximum of 100 percent of the forecasted foreign currency denominated exposure, depending on the length of the forecasted exposures. Forecasted exposures greater than 12 months are not hedged. Forward foreign exchange contracts are the main instrument used to protect the Company against the volatility of future cash flows (caused by changes in exchange rates) of contracted and forecasted sales and purchases denominated in foreign currencies. In addition, within its treasury operations, the Company primarily uses foreign exchange swaps and forward foreign exchange contracts to manage the currency and timing mismatches arising in its liquidity management activities.

**Commodity risk**

Various commodity products are used in the Company's manufacturing activities. Consequently it is exposed to volatility in future cash flows arising from changes in commodity prices. To manage the price risk of commodities other than electricity, the Company's policies require that the subsidiaries hedge the commodity price risk exposures from binding contracts, as well as at least 50 percent (up to a maximum of 100 percent) of the forecasted commodity exposure over the next 12 months or longer (up to a maximum of 18 months). In certain locations where the price of electricity is hedged, up to a maximum of 90 percent of the forecasted electricity needs, depending on the length of the forecasted exposures, are hedged. Swap and futures contracts are used to manage the associated price risks of commodities.

**Interest rate risk**

The Company has issued bonds at fixed rates. Interest rate swaps are used to manage the interest rate risk associated with certain debt and generally are designated as fair value hedges. In addition, from time to time, the Company uses instruments such as interest rate swaps, interest rate futures, bond futures or forward rate agreements to manage interest rate risk arising from the Company's balance sheet structure but does not designate such instruments as hedges.

**Equity risk**

The Company is exposed to fluctuations in the fair value of its warrant appreciation rights (WARs) issued under its management incentive plan. A WAR gives its holder the right to receive cash equal to the market price of an equivalent listed warrant on the date of exercise. To eliminate such risk, the Company has purchased cash-settled call options which entitle the Company to receive amounts equivalent to its obligations under the outstanding WARs.

**Volume of derivative activity**

In general, while the Company's primary objective in its use of derivatives is to minimize exposures arising from its business, certain derivatives are designated and qualify for hedge accounting treatment while others either are not designated or do not qualify for hedge accounting.

*Foreign exchange and interest rate derivatives:*

The gross notional amounts of outstanding foreign exchange and interest rate derivatives (whether designated as hedges or not) were as follows:

Type of derivative (\$ in millions)	Total notional amounts		
	June 30, 2013	December 31, 2012	June 30, 2012
Foreign exchange contracts	18,814	19,724	19,431
Embedded foreign exchange derivatives	3,414	3,572	3,548
Interest rate contracts	1,289	3,983	2,646

**Notes to the Interim Consolidated Financial Information (unaudited)***Derivative commodity contracts:*

The following table shows the notional amounts of outstanding commodity derivatives (whether designated as hedges or not), on a net basis, to reflect the Company's requirements in the various commodities:

Type of derivative	Unit	Total notional amounts		
		June 30, 2013	December 31, 2012	June 30, 2012
Copper swaps	metric tonnes	46,222	45,222	43,307
Aluminum swaps	metric tonnes	5,886	5,495	8,211
Nickel swaps	metric tonnes	12	21	12
Lead swaps	metric tonnes	9,900	13,025	13,025
Zinc swaps	metric tonnes	325	225	125
Silver swaps	ounces	2,037,511	1,415,322	1,758,485
Electricity futures	megawatt hours	380,898	334,445	409,500
Crude oil swaps	barrels	119,450	135,471	177,476

*Equity derivatives:*

At June 30, 2013, December 31, 2012, and June 30, 2012, the Company held 75 million, 67 million and 70 million cash-settled call options on ABB Ltd shares with a total fair value of \$42 million, \$26 million and \$16 million, respectively.

**Cash flow hedges**

As noted above, the Company mainly uses forward foreign exchange contracts to manage the foreign exchange risk of its operations, commodity swaps to manage its commodity risks and cash-settled call options to hedge its WAR liabilities. Where such instruments are designated and qualify as cash flow hedges, the effective portion of the changes in their fair value is recorded in Accumulated other comprehensive loss and subsequently reclassified into earnings in the same line item and in the same period as the underlying hedged transaction affects earnings. Any ineffectiveness in the hedge relationship, or hedge component excluded from the assessment of effectiveness, is recognized in earnings during the current period.

At June 30, 2013, and December 31, 2012, Accumulated other comprehensive loss included net unrealized gains of \$18 million and \$37 million, respectively, net of tax, on derivatives designated as cash flow hedges. Of the amount at June 30, 2013, net gains of \$15 million are expected to be reclassified to earnings in the following 12 months. At June 30, 2013, the longest maturity of a derivative classified as a cash flow hedge was 72 months.

## Edgar Filing: ABB LTD - Form 6-K

The amounts of gains or losses, net of tax, reclassified into earnings due to the discontinuance of cash flow hedge accounting and recognized in earnings due to ineffectiveness in cash flow hedge relationships were not significant in the six and three months ended June 30, 2013 and 2012.

The pre-tax effects of derivative instruments, designated and qualifying as cash flow hedges, on Accumulated other comprehensive loss (OCI) and the Consolidated Income Statements were as follows:

Type of derivative designated as a cash flow hedge	Gains (losses) recognized in OCI on derivatives (effective portion) (\$ in millions)	Six months ended June 30, 2013		Gains (losses) recognized in income (ineffective portion and amount excluded from effectiveness testing) (\$ in millions)	
		Gains (losses) reclassified from OCI into income (effective portion)		Location	
		Location	(\$ in millions)	Location	(\$ in millions)
Foreign exchange contracts		Total revenues	24	Total revenues	
		Total cost of sales	(6)	Total cost of sales	
Commodity contracts	(13)	Total cost of sales	(1)	Total cost of sales	
Cash-settled call options	7	SG&A expenses(1)	2	SG&A expenses(1)	
<b>Total</b>	<b>(6)</b>		<b>19</b>		

Notes to the Interim Consolidated Financial Information (unaudited)

Foreign exchange contracts	20	Total revenues	27	Total revenues
Commodity contracts	2	Total cost of sales	(2)	Total cost of sales
<b>Total</b>	<b>9</b>		<b>12</b>	

Foreign exchange contracts	(17)	Total revenues	13	Total revenues
Commodity contracts	(11)	Total cost of sales	(2)	Total cost of sales
<b>Total</b>	<b>(28)</b>		<b>9</b>	

Foreign exchange contracts	(12)	Total revenues	16	Total revenues
Commodity contracts	(7)	Total cost of sales		Total cost of sales
<b>Total</b>	<b>(30)</b>		<b>7</b>	<b>1</b>

(1) SG&A expenses represent Selling, general and administrative expenses .

Derivative gains of \$16 million and \$6 million, both net of tax, were reclassified from Accumulated other comprehensive loss to earnings during the six months ended June 30, 2013 and 2012, respectively. During the three months ended June 30, 2013 and 2012, derivative gains of \$7 million and \$3 million, both net of tax, were reclassified from Accumulated other comprehensive loss to earnings respectively.

**Fair value hedges**

To reduce its interest rate exposure arising primarily from its debt issuance activities, the Company uses interest rate swaps. Where such instruments are designated as fair value hedges, the changes in fair value of these instruments, as well as the changes in fair value of the risk component of the underlying debt being hedged, are recorded as offsetting gains and losses in Interest and other finance expense. Hedge ineffectiveness of instruments designated as fair value hedges for the six and three months ended June 30, 2013 and 2012, was not significant.

**Notes to the Interim Consolidated Financial Information (unaudited)**

The effect of derivative instruments, designated and qualifying as fair value hedges, on the Consolidated Income Statements was as follows:

Type of derivative designated as a fair value hedge	Six months ended June 30, 2013			
	Gains (losses) recognized in income on derivatives designated as fair value hedges		Gains (losses) recognized in income on hedged item	
	Location	(\$ in millions)	Location	(\$ in millions)
Interest rate contracts	Interest and other finance expense	(40)	Interest and other finance expense	40
				
Interest rate contracts	Interest and other finance expense	10	Interest and other finance expense	(10)
				
Interest rate contracts	Interest and other finance expense	(22)	Interest and other finance expense	23
				
Interest rate contracts	Interest and other finance expense	3	Interest and other finance expense	(3)

**Derivatives not designated in hedge relationships**

Derivative instruments that are not designated as hedges or do not qualify as either cash flow or fair value hedges are economic hedges used for risk management purposes. Gains and losses from changes in the fair values of such derivatives are recognized in the same line in the income statement as the economically hedged transaction.

Furthermore, under certain circumstances, the Company is required to split and account separately for foreign currency derivatives that are embedded within certain binding sales or purchase contracts denominated in a currency other than the functional currency of the subsidiary and the counterparty.

Notes to the Interim Consolidated Financial Information (unaudited)

The gains (losses) recognized in the Consolidated Income Statements on derivatives not designated in hedging relationships were as follows:

(\$ in millions)		Gains (losses) recognized in income			
		Six months ended June 30,		Three months ended June 30,	
Type of derivative not designated as a hedge	Location	2013	2012	2013	2012
Foreign exchange contracts	Total revenues	(206)	52	(214)	(120)
	Total cost of sales	70	(85)	152	(21)
	SG&A expenses(1)	(2)	(1)	1	(1)

<b>Total</b>	<b>59</b>	<b>67</b>	<b>15</b>	<b>8</b>
<i>Derivatives not designated as hedging instruments:</i>				
Foreign exchange contracts	204	62	84	20
Commodity contracts	7	1	11	1
Cash-settled call options		1		
Embedded foreign exchange derivatives	26	13	86	40
<b>Total</b>	<b>237</b>	<b>77</b>	<b>181</b>	<b>61</b>
<b>Total fair value</b>	<b>296</b>	<b>144</b>	<b>196</b>	<b>69</b>
<b>Thereof, subject to close-out netting agreements</b>	<b>245</b>	<b>113</b>	<b>93</b>	<b>28</b>

Close-out netting agreements provide for the termination, valuation and net settlement of some or all outstanding transactions between two counterparties on the occurrence of one or more pre-defined trigger events.

Although the Company is party to close-out netting agreements with most derivative counterparties, the fair values in the tables above and in the Consolidated Balance Sheets at June 30, 2013, and December 31, 2012, have been presented on a gross basis.

**Note 6. Fair values**

The Company uses fair value measurement principles to record certain financial assets and liabilities on a recurring basis and, when necessary, to record certain non-financial assets at fair value on a non-recurring basis, as well as to determine fair value disclosures for certain financial instruments carried at amortized cost in the financial statements. Financial assets and liabilities recorded at fair value on a recurring basis include foreign currency, commodity and interest rate derivatives as well as cash-settled call options and available-for-sale securities. Non-financial assets recorded at fair value on a non-recurring basis include long-lived assets that are reduced to their estimated fair value due to impairments.

Fair value is the price that would be received when selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various valuation techniques including the market approach (using observable market data for identical or similar assets and liabilities), the income approach (discounted cash flow models) and the cost approach (using costs a market participant would incur to develop a comparable asset). Inputs used to determine the fair value of assets and liabilities are defined by a three-level hierarchy, depending on the reliability of those inputs. The Company has categorized its financial assets and liabilities and non-financial assets measured at fair value within this hierarchy based on whether the inputs to the valuation technique are observable or unobservable. An observable input is based on market data obtained from independent sources, while an unobservable input reflects the Company's assumptions about market data.

The levels of the fair value hierarchy are as follows:

Level 1: Valuation inputs consist of quoted prices in an active market for identical assets or liabilities (observable quoted prices). Assets and liabilities valued using Level 1 inputs include exchange-traded equity securities, listed derivatives which are actively traded such as commodity futures and interest rate futures, and certain actively-traded debt securities.

**Notes to the Interim Consolidated Financial Information (unaudited)**

Level 2: Valuation inputs consist of observable inputs (other than Level 1 inputs) such as actively quoted prices for similar assets, quoted prices in inactive markets and inputs other than quoted prices such as interest rate yield curves, credit spreads, or inputs derived from other observable data by interpolation, correlation, regression or other means. The adjustments applied to quoted prices or the inputs used in valuation models may be both observable and unobservable. In these cases, the fair value measurement is classified as Level 2 unless the unobservable portion of the adjustment or the unobservable input to the valuation model is significant, in which case the fair value measurement would be classified as Level 3. Assets and liabilities valued using Level 2 inputs include investments in certain funds, certain debt securities that are not actively traded, interest rate swaps, commodity swaps, cash-settled call options, foreign exchange forward contracts and foreign exchange swaps, as well as financing receivables and debt.

Level 3: Valuation inputs are based on the Company's assumptions of relevant market data (unobservable inputs).

Whenever quoted prices involve bid-ask spreads, the Company ordinarily determines fair values based on mid-market quotes. However, for the purpose of determining the fair value of cash-settled call options serving as hedges of the Company's management incentive plan, bid prices are used.

When determining fair values based on quoted prices in an active market, the Company considers if the level of transaction activity for the financial instrument has significantly decreased, or would not be considered orderly. In such cases, the resulting changes in valuation techniques would be disclosed. If the market is considered disorderly or if quoted prices are not available, the Company is required to use another valuation technique, such as an income approach.

**Recurring fair value measures**

The fair values of financial assets and liabilities measured at fair value on a recurring basis were as follows:

(\$ in millions)	June 30, 2013			Total fair value
	Level 1	Level 2	Level 3	
<b>Assets</b>				
Available-for-sale securities in Cash and equivalents				
Debt securities Corporate				
Available-for-sale securities in Marketable securities and short-term investments				
Equity securities		155		155
Debt securities U.S. government obligations	104			104
Debt securities European government obligations	131			131
Debt securities Other government obligations		2		2
Debt securities Corporate		142		142
Available-for-sale securities in Other non-current assets				
Equity securities	7			7

Edgar Filing: ABB LTD - Form 6-K

Derivative assets	current in	Other current assets	242	242
Derivative assets	non-current in	Other non-current assets	117	117

**Liabilities**

Derivative liabilities	current in	Other current liabilities	4	272	276
Derivative liabilities	non-current in	Other non-current liabilities		69	69

## Notes to the Interim Consolidated Financial Information (unaudited)

(\$ in millions)	December 31, 2012			Total fair value
	Level 1	Level 2	Level 3	
<b>Assets</b>				
Available-for-sale securities in Cash and equivalents				
Debt securities Corporate		128		128
Available-for-sale securities in Marketable securities and short-term investments				
Equity securities	3	1,279		1,282
Debt securities U.S. government obligations	159			159
Debt securities Other government obligations		3		3
Debt securities European government obligations				
Debt securities Corporate		117		117
Available-for-sale securities in Other non-current assets				
Equity securities	2			2
Derivative assets current in Other current assets		296		296
Derivative assets non-current in Other non-current assets		144		144
<b>Liabilities</b>				
Derivative liabilities current in Other current liabilities	4	192		196
Derivative liabilities non-current in Other non-current liabilities		69		69

The Company uses the following methods and assumptions in estimating fair values of financial assets and liabilities measured at fair value on a recurring basis:

- *Available-for-sale securities in Cash and equivalents*, *Marketable securities and short-term investments* and *Other non-current assets*: If quoted market prices in active markets for identical assets are available, these are considered Level 1 inputs; however, when markets are not active, then these inputs are considered Level 2. If such quoted market prices are not available, fair value is determined using market prices for similar assets or present value techniques, applying an appropriate risk-free interest rate adjusted for nonperformance risk. The inputs used in present value techniques are observable and fall into the Level 2 category.

- *Derivatives*: The fair values of derivative instruments are determined using quoted prices of identical instruments from an active market, if available (Level 1). If quoted prices are not available, price quotes for similar instruments, appropriately adjusted, or present value techniques, based on available market data, or option pricing models are used. Cash-settled call options hedging the Company's WAR liability are valued based on bid prices of the equivalent listed warrant. The fair values obtained using price quotes for similar instruments or valuation techniques represent a Level 2 input unless significant unobservable inputs are used.

**Non-recurring fair value measures**

There were no significant non-recurring fair value measurements during the six and three months ended June 30, 2013 and 2012.

## Notes to the Interim Consolidated Financial Information (unaudited)

## Disclosure about financial instruments carried on a cost basis

The fair values of financial instruments carried on a cost basis were as follows:

(\$ in millions)	Carrying value	June 30, 2013			Total fair value
		Level 1	Level 2	Level 3	
<b>Assets</b>					
Cash and equivalents (excluding available-for-sale securities with original maturities up to 3 months)					
Cash	2,589	2,589			2,589
Time deposits	1,559		1,559		1,559

(\$ in millions)	Carrying value	December 31, 2012			Total fair value
		Level 1	Level 2	Level 3	
<b>Assets</b>					
Cash and equivalents (excluding available-for-sale securities with original maturities up to 3 months)					
Cash	2,784	2,784			2,784
Time deposits	3,963		3,963		3,963
Marketable securities and short-term investments (excluding available-for-sale securities)					
Time deposits	30		30		30
Other short-term investments	15	15			15
Short-term loans in Receivables, net	7		7		7
Other non-current assets					
Loans granted	58		59		59
Held-to-maturity securities	97		124		124
Restricted cash and cash deposits	271	80	230		310
<b>Liabilities</b>					
Short-term debt and current maturities of long-term debt, excluding finance lease liabilities					
	2,512	1,328	1,184		2,512
Long-term debt, excluding finance lease liabilities	7,449	7,870	39		7,909

**Notes to the Interim Consolidated Financial Information (unaudited)**

The Company uses the following methods and assumptions in estimating fair values of financial instruments carried on a cost basis:

- *Cash and equivalents (excluding available-for-sale debt securities with original maturities up to 3 months), Marketable securities and short-term investments (excluding available-for-sale securities), and Short-term loans in Receivables, net* : The carrying amounts approximate the fair values, as the items are short-term in nature.
- *Other non-current assets*: Includes financing receivables (including loans granted) whose fair values are based on the carrying amount adjusted using a present value technique to reflect a premium or discount based on current market interest rates (Level 2 inputs). Includes held-to-maturity securities (see Note 4) whose fair values are based on quoted market prices in inactive markets (Level 2 inputs). Includes restricted cash whose fair values approximates the carrying amounts and a cash deposit pledged in respect of a certain non-current deposit liability whose fair value is determined using a discounted cash flow methodology based on current market rates (Level 2 inputs).
- *Short-term debt and current maturities of long-term debt, excluding finance lease liabilities*: Includes commercial paper, bank borrowings and overdrafts as well as bonds maturing in the next 12 months. The carrying amounts of short-term debt and current maturities of long-term debt, excluding finance lease liabilities, approximate their fair values.
- *Long-term debt excluding finance lease liabilities*: Fair values of outstanding bonds are determined using quoted market prices (Level 1 inputs). The fair values of other debt are determined using a discounted cash flow methodology based upon borrowing rates of similar debt instruments and reflecting appropriate adjustments for non-performance risk (Level 2 inputs).

**Note 7. Credit quality of receivables**

**Accounts receivable and allowance for doubtful accounts**

Accounts receivable are recorded at the invoiced amount. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in existing accounts receivable. The Company determines the allowance based on historical write-off experience and customer specific data. If an amount has not been settled within its contractual payment term then it is considered past due. The Company reviews the allowance for doubtful accounts regularly and past due balances are reviewed for collectability. Accounts receivable balances are charged off against the related allowance when the Company believes that the amount will not be recovered.

The Company has a group-wide policy on the management of credit risk. The policy includes a credit assessment methodology to assess the creditworthiness of customers and assign to those customers a risk category on a scale from A (lowest likelihood of loss) to E (highest likelihood of loss), as shown in the following table:

	Equivalent Standard & Poor's rating
<i>Risk category:</i>	
A	AAA to AA-
B	A+ to BBB-
C	BB+ to BB-
D	B+ to CCC-
E	CC+ to D

Third-party agencies' ratings are considered, if available. For customers where agency ratings are not available, the customer's most recent financial statements, payment history and other relevant information are considered in the assignment to a risk category. Customers are assessed at least annually or more frequently when information on significant changes in the customer's financial position becomes known. In addition to the assignment to a risk category, a credit limit per customer is set.

Information on the credit quality of trade receivables (excluding those with a contractual maturity of one year or less) and other financing receivables is presented below.

## Notes to the Interim Consolidated Financial Information (unaudited)

## Receivables classified as current assets

The gross amounts of trade receivables (excluding those with a contractual maturity of one year or less), the related allowance for doubtful accounts, and other receivables (excluding tax and other receivables which are not considered to be of a financing nature), recorded in receivables, net, were as follows:

(\$ in millions)	June 30, 2013		
	Trade receivables (excluding those with a contractual maturity of one year or less)	Other receivables	Total
<i>Recorded gross amount:</i>			
- Individually evaluated for impairment	359	122	481

Other receivables	2	4	2	12	2	183	205
<b>Total gross amount</b>	<b>39</b>	<b>5</b>	<b>5</b>	<b>69</b>	<b>14</b>	<b>748</b>	<b>880</b>

(\$ in millions)	December 31, 2012						
	0 30 days	30 60 days	Past due 60 90 days	> 90 days and not accruing interest	> 90 days and accruing interest	Not due at December 31, 2012(1)	Total
Trade receivables (excluding those with a contractual maturity of one year or less)	83	3	4	38	14	519	661
Other receivables	3	3	2	10	1	196	215
<b>Total gross amount</b>	<b>86</b>	<b>6</b>	<b>6</b>	<b>48</b>	<b>15</b>	<b>715</b>	<b>876</b>

(1) Trade receivables (excluding those with a contractual maturity of one year or less) principally represent contractual retention amounts that will become due subsequent to the completion of the long-term contract.

## Receivables classified as non-current assets

## Edgar Filing: ABB LTD - Form 6-K

At June 30, 2013, and December 31, 2012, the net recorded amounts of loans granted were \$63 million and \$58 million, respectively, and were included in other non-current assets (see Note 6). The related allowance for doubtful accounts was not significant at both dates. The changes in such allowance were not significant during the six and three months ended June 30, 2013 and 2012.

**Notes to the Interim Consolidated Financial Information (unaudited)****Note 8. Debt**

The Company's total debt at June 30, 2013, and December 31, 2012, amounted to \$8,129 million and \$10,071 million, respectively.

**Short-term debt and current maturities of long-term debt**

The Company's Short-term debt and current maturities of long-term debt consisted of the following:

(\$ in millions)	June 30, 2013	December 31, 2012
Short-term debt	685	1,531
Current maturities of long-term debt	27	1,006
<b>Total</b>	<b>712</b>	<b>2,537</b>

Short-term debt primarily represents issued commercial paper and short-term loans from various banks.

In June 2013, the Company repaid at maturity the EUR 700 million 4.625% bonds.

**Long-term debt**

The Company's long-term debt at June 30, 2013, and December 31, 2012, amounted to \$7,417 million and \$7,534 million, respectively.

**Note 9. Commitments and contingencies****Contingencies Environmental**

The Company is engaged in environmental clean-up activities at certain sites arising under various United States and other environmental protection laws and under certain agreements with third parties. In some cases, these environmental remediation actions are subject to legal proceedings, investigations or claims, and it is uncertain to what extent the Company is actually obligated to perform. Provisions for these unresolved matters have been set up if it is probable that the Company has incurred a liability and the amount of loss can be reasonably

## Edgar Filing: ABB LTD - Form 6-K

estimated. If a provision has been recognized for any of these matters the Company records an asset when it is probable that it will recover a portion of the costs expected to be incurred to settle them. Management is of the opinion, based upon information presently available, that the resolution of any such obligation and non-collection of recoverable costs would not have a further material adverse effect on the Company's consolidated financial statements.

The Company is involved in the remediation of environmental contamination at present or former facilities, primarily in the United States. The clean-up of these sites involves primarily soil and groundwater contamination. A significant portion of the provisions in respect of these contingencies reflects the provisions of acquired companies. A portion of one of the acquired entities' remediation liability is indemnified by a prior owner. Accordingly, an asset equal to that portion of the remediation liability is included in Other non-current assets.

The total effect of the above environmental obligations on the Company's Consolidated Balance Sheets was as follows:

(\$ in millions)	June 30, 2013	December 31, 2012
<b>Environmental provisions included in:</b>		
Other provisions	42	33
Other non-current liabilities	85	73
	<b>127</b>	<b>106</b>

Provisions for the above estimated losses have not been discounted as the timing of payments cannot be reasonably estimated.

**Notes to the Interim Consolidated Financial Information (unaudited)**

**Contingencies Regulatory, Compliance and Legal**

*Antitrust*

In January 2007, the European Commission granted the Company full immunity from fines under its leniency program for the Company's involvement in anti-competitive practices in the Gas Insulated Switchgear (GIS) business. The Company's GIS business remains under investigation for alleged anti-competitive practices in certain other jurisdictions, including Brazil. An informed judgment about the outcome of these investigations or the amount of potential loss or range of loss for the Company, if any, relating to these investigations cannot be made at this stage.

In October 2009, the European Commission fined the Company euro 33.75 million (equivalent to \$49 million on date of payment) for its involvement in anti-competitive practices in the power transformers business. In September 2012, the German Antitrust Authority (Bundeskartellamt) fined one of the Company's German subsidiaries euro 8.7 million (equivalent to approximately \$11 million on date of payment) for its involvement in anti-competitive practices in the German power transformers business. The Company did not appeal either decision and it paid both fines in full.

The Company's cables business is under investigation for alleged anti-competitive practices in a number of jurisdictions, including the European Union and Brazil. The Company has received the European Commission's Statement of Objections concerning its investigation into the cables business and in June 2012 participated in the related Oral Hearing before the European Commission. The Company has also received an initial summary of the Brazilian Antitrust Authority's (CADE) allegations regarding its investigation into the cables business. An informed judgment about the outcome of these investigations or the amount of potential loss or range of loss for the Company, if any, relating to these investigations cannot be made at this stage, except, with respect to the Brazilian investigation, where the Company expects an unfavorable outcome.

In May 2012, the Brazilian Antitrust Authority opened an investigation into certain power businesses of the Company, including its FACTS and power transformers business. An informed judgment about the outcome of this investigation or the amount of potential loss or range of loss for the Company, if any, relating to this investigation cannot be made at this stage.

With respect to the foregoing matters which are still ongoing, management is cooperating fully with the antitrust authorities.

*Suspect payments*

In April 2005, the Company voluntarily disclosed to the United States Department of Justice (DoJ) and the United States Securities and Exchange Commission (SEC) certain suspect payments in its network management unit in the United States. Subsequently, the Company made additional voluntary disclosures to the DoJ and the SEC regarding suspect payments made by other Company subsidiaries in a number of countries in the Middle East, Asia, South America and Europe (including to an employee of an Italian power generation company) as well as by

## Edgar Filing: ABB LTD - Form 6-K

its former Lummus business. These payments were discovered by the Company as a result of the Company's internal audit program and compliance reviews.

In September 2010, the Company reached settlements with the DoJ and the SEC regarding their investigations into these matters and into suspect payments involving certain of the Company's subsidiaries in the United Nations Oil-for-Food Program. In connection with these settlements, the Company agreed to make payments to the DoJ and SEC totaling \$58 million, which were settled in the fourth quarter of 2010. One subsidiary of the Company pled guilty to one count of conspiracy to violate the anti-bribery provisions of the U.S. Foreign Corrupt Practices Act and one count of violating those provisions. The Company entered into a deferred prosecution agreement and settled civil charges brought by the SEC. These settlements resolved the foregoing investigations. In lieu of an external compliance monitor, the DoJ and SEC have agreed to allow the Company to report on its continuing compliance efforts and the results of the review of its internal processes through September 2013.

### *General*

In addition, the Company is aware of proceedings, or the threat of proceedings, against it and others in respect of private claims by customers and other third parties with regard to certain actual or alleged anti-competitive practices. Also, the Company is subject to other various legal proceedings, investigations, and claims that have not yet been resolved. With respect to the above-mentioned regulatory matters and

**Notes to the Interim Consolidated Financial Information (unaudited)**

commercial litigation contingencies, the Company will bear the costs of the continuing investigations and any related legal proceedings.

*Liabilities recognized*

At June 30, 2013, and December 31, 2012, the Company had aggregate liabilities of \$189 million and \$211 million, respectively, included in Other provisions and Other non-current liabilities, for the above regulatory, compliance and legal contingencies. As it is not possible to make an informed judgment on the outcome of certain matters and as it is not possible, based on information currently available to management, to estimate the maximum potential liability on other matters, there could be material adverse outcomes beyond the amounts accrued.

**Guarantees***General*

The following table provides quantitative data regarding the Company's third-party guarantees. The maximum potential payments represent a worst-case scenario, and do not reflect management's expected results. The carrying amount of liabilities recorded in the Consolidated Balance Sheets reflects the Company's best estimate of future payments, which it may incur as part of fulfilling its guarantee obligations.

(\$ in millions)	Maximum potential payments	
	June 30, 2013	December 31, 2012
Performance guarantees	147	149
Financial guarantees	78	83
Indemnification guarantees	50	190
<b>Total</b>	<b>275</b>	<b>422</b>

In respect of the above guarantees, the carrying amounts of liabilities at June 30, 2013, and December 31, 2012, were not significant.

*Performance guarantees*

Performance guarantees represent obligations where the Company guarantees the performance of a third party's product or service according to the terms of a contract. Such guarantees may include guarantees that a project will be completed within a specified time. If the third party does not fulfill the obligation, the Company will compensate the guaranteed party in cash or in kind. Performance guarantees include surety bonds, advance payment guarantees and standby letters of credit. The significant performance guarantees are described below.

The Company retained obligations for guarantees related to the Power Generation business contributed in mid-1999 to the former ABB Alstom Power NV joint venture (Alstom Power NV). The guarantees primarily consist of performance guarantees and other miscellaneous guarantees under certain contracts such as indemnification for personal injuries and property damages, taxes and compliance with labor laws, environmental laws and patents. The guarantees are related to projects which are expected to be completed by 2013 but in some cases have no definite expiration date. In May 2000, the Company sold its interest in Alstom Power NV to Alstom SA (Alstom). As a result, Alstom and its subsidiaries have primary responsibility for performing the obligations that are the subject of the guarantees. Further, Alstom, the parent company and Alstom Power NV, have undertaken jointly and severally to fully indemnify and hold harmless the Company against any claims arising under such guarantees. Management's best estimate of the total maximum potential amount payable of quantifiable guarantees issued by the Company on behalf of its former Power Generation business was \$65 million and \$78 million at June 30, 2013, and December 31, 2012, respectively, and is subject to foreign exchange fluctuations. The Company has not experienced any losses related to guarantees issued on behalf of the former Power Generation business.

The Company is engaged in executing a number of projects as a member of consortia that include third parties. In certain of these cases, the Company guarantees not only its own performance but also the work of third parties. The original maturity dates of these guarantees range from one to six years. At June 30, 2013, and December 31, 2012, the maximum potential amount payable under these guarantees as a result of third-party non-performance was \$69 million and \$57 million, respectively.

**Notes to the Interim Consolidated Financial Information (unaudited)**

*Financial guarantees*

Financial guarantees represent irrevocable assurances that the Company will make payment to a beneficiary in the event that a third party fails to fulfill its financial obligations and the beneficiary under the guarantee incurs a loss due to that failure.

At June 30, 2013, and December 31, 2012, the Company had a maximum potential amount payable of \$78 million and \$83 million, respectively, under financial guarantees outstanding. Of each of these amounts, \$15 million and \$19 million, respectively, was in respect of guarantees issued on behalf of companies in which the Company formerly had or has an equity interest. The guarantees outstanding have various maturity dates up to 2020.

*Indemnification guarantees*

The Company has indemnified certain purchasers of divested businesses for potential claims arising from the operations of the divested businesses. To the extent the maximum potential loss related to such indemnifications could not be calculated, no amounts have been included under maximum potential payments in the table above. Indemnifications for which maximum potential losses could not be calculated include indemnifications for legal claims. The significant indemnification guarantees for which maximum potential losses could be calculated are described below.

The Company issued, to the purchasers of Lummus Global, guarantees related to assets and liabilities divested in 2007. The maximum potential amount payable relating to this business, pursuant to the sales agreement, at each of June 30, 2013, and December 31, 2012, was \$50 million.

The Company issued, to the purchasers of its interest in Jorf Lasfar, guarantees related to assets and liabilities divested in 2007. The maximum potential amount payable under such guarantees was \$140 million at December 31, 2012. During the second quarter of 2013, a settlement agreement was reached and the Company has no further obligations with respect to these guarantees at June 30, 2013.

*Product and order-related contingencies*

The Company calculates its provision for product warranties based on historical claims experience and specific review of certain contracts.

The reconciliation of the Provisions for warranties, including guarantees of product performance, was as follows:

Edgar Filing: ABB LTD - Form 6-K

(\$ in millions)	2013	2012
Balance at January 1,	1,291	1,324
Warranties assumed through acquisitions		4
Claims paid in cash or in kind	(126)	(86)
Net increase in provision for changes in estimates, warranties issued and warranties expired	87	30
Exchange rate differences	(33)	(17)
<b>Balance at June 30,</b>	<b>1,219</b>	<b>1,255</b>

**Note 10. Employee benefits**

The Company operates defined benefit and defined contribution pension plans and termination indemnity plans, in accordance with local regulations and practices. These plans cover a large portion of the Company's employees and provide benefits to employees in the event of death, disability, retirement, or termination of employment. Certain of these plans are multi-employer plans. The Company also operates other postretirement benefit plans including postretirement health care benefits, and other employee-related benefits for active employees including long-service award plans. The measurement date used for the Company's employee benefit plans is December 31. The funding policies of the Company's plans are consistent with the local government and tax requirements. The Company also has several pension plans that are not required to be funded by local government and tax requirements.

## Notes to the Interim Consolidated Financial Information (unaudited)

Net periodic benefit cost of the Company's defined benefit pension and other postretirement benefit plans consisted of the following:

(\$ in millions)	2013	Six months ended June 30,		2012
		Defined pension benefits	2013	
Service cost	124	109	1	1
Interest cost	184	187	4	5
Expected return on plan assets	(237)	(235)		
Amortization of prior service cost	16	20	(4)	(4)
Amortization of net actuarial loss	63	41	2	2
<b>Net periodic benefit cost</b>	<b>150</b>	<b>122</b>	<b>3</b>	<b>4</b>

(\$ in millions)	2013	Three months ended June 30,		2012
		Defined pension benefits	2013	
Service cost	62	52	1	1
Interest cost	92	91	2	2
Expected return on plan assets	(119)	(115)		
Amortization of prior service cost	8	10	(2)	(2)
Amortization of net actuarial loss	30	20	1	1
<b>Net periodic benefit cost</b>	<b>73</b>	<b>58</b>	<b>2</b>	<b>2</b>

Employer contributions were as follows:

(\$ in millions)	2013	Six months ended June 30,		2012
		Defined pension benefits	2013	
Total contributions to defined benefit pension and other postretirement benefit plans	123	171	7	9
Of which, discretionary contributions to defined benefit pension plans		39		

(\$ in millions)	2013	Three months ended June 30,		2012
		Defined pension benefits	2013	
Total contributions to defined benefit pension and other postretirement benefit plans	63	87	3	5
Of which, discretionary contributions to defined benefit pension plans		7		

The Company expects to make contributions totaling approximately \$387 million and \$18 million to its defined benefit pension plans and other postretirement benefit plans, respectively, for the full year 2013.

**Notes to the Interim Consolidated Financial Information (unaudited)****Note 11. Stockholders' equity**

At the Annual General Meeting of Shareholders in April 2013, shareholders approved the payment of a dividend of 0.68 Swiss francs per share. The dividend was paid in May 2013 and amounted to \$1,667 million.

**Note 12. Earnings per share**

Basic earnings per share is calculated by dividing income by the weighted-average number of shares outstanding during the period. Diluted earnings per share is calculated by dividing income by the weighted-average number of shares outstanding during the period, assuming that all potentially dilutive securities were exercised, if dilutive. Potentially dilutive securities comprise outstanding written call options and outstanding options and shares granted subject to certain conditions under the Company's share-based payment arrangements.

**Basic earnings per share**

## Notes to the Interim Consolidated Financial Information (unaudited)

## Note 13. Reclassifications out of accumulated other comprehensive loss

The following table shows changes in Accumulated other comprehensive loss (OCI) attributable to ABB, by component, net of tax:

(\$ in millions)	Foreign currency translation adjustments	Unrealized gains (losses) on available- for-sale securities	Pension and other postretirement plan adjustments	Unrealized gains (losses) of cash flow hedge derivatives	Total OCI
<b>Balance at January 1, 2013</b>	(580)	24	(2,004)	37	(2,523)
Other comprehensive (loss) income before reclassifications	(490)	(4)	49	(3)	(448)
Amounts reclassified from OCI		(7)	54	(16)	31
Total other comprehensive (loss) income	(490)	(11)	103	(19)	(417)
<i>Less:</i>					
Amounts attributable to noncontrolling interests	(8)		1		(7)
<b>Balance at June 30, 2013</b>	<b>(1,062)</b>	<b>13</b>	<b>(1,902)</b>	<b>18</b>	<b>(2,933)</b>

The amounts reclassified out of OCI in respect of Unrealized gains (losses) on available-for-sale securities and Unrealized gains (losses) of cash flow hedge derivatives are not significant for the six and three months ended June 30, 2013. The following table shows details of amounts reclassified out of OCI in respect of Pension and other postretirement plan adjustments:

(\$ in millions)	Location of (gains) losses reclassified from OCI	Six months ended June 30, 2013	Three months ended June 30, 2013
<i>Pension and other postretirement plan adjustments:</i>			
Amortization of prior service costs	Net periodic benefit cost(1)	12	6
Amortization of net actuarial losses	Net periodic benefit cost(1)	65	31
Total before tax		77	37
Tax	Provision for taxes	(23)	(12)
<b>Amounts reclassified from OCI</b>		<b>54</b>	<b>25</b>

(1) These components are included in the computation of net periodic benefit cost (see Note 10).

**Notes to the Interim Consolidated Financial Information (unaudited)**

**Note 14. Operating segment data**

The Chief Operating Decision Maker (CODM) is the Company's Executive Committee. The CODM allocates resources to and assesses the performance of each operating segment using the information outlined below. The Company's operating segments consist of Discrete Automation and Motion, Low Voltage Products, Process Automation, Power Products and Power Systems. The remaining operations of the Company are included in Corporate and Other.

A description of the types of products and services provided by each reportable segment is as follows:

- **Discrete Automation and Motion:** manufactures and sells motors, generators, variable speed drives, rectifiers, excitation systems, robotics, programmable logic controllers, and related services for a wide range of applications in factory automation, process industries, and utilities.
- **Low Voltage Products:** manufactures products and systems that provide protection, control and measurement for electrical installations, as well as enclosures, switchboards, electronics and electromechanical devices for industrial machines, plants and related service. In addition the segment manufactures products for wiring and cable management, cable protection systems, power connection and safety. The segment also makes intelligent building control systems for home and building automation.
- **Process Automation:** develops and sells control and plant optimization systems, automation products and solutions, including instrumentation, as well as industry-specific application knowledge and services for the oil, gas and petrochemicals, metals and minerals, marine and turbocharging, pulp and paper, chemical and pharmaceuticals, and power industries.
- **Power Products:** manufactures and sells high- and medium- voltage switchgear and apparatus, circuit breakers for all current and voltage levels, power and distribution transformers and sensors for electric, gas and water utilities and for industrial and commercial customers.
- **Power Systems:** designs, installs and upgrades high-efficiency transmission and distribution systems and power plant automation and electrification solutions, including monitoring and control products, software and services and incorporating components manufactured by both the Company and by third parties.
- **Corporate and Other:** includes headquarters, central research and development, the Company's real estate activities, Group treasury operations and other minor activities.

## Edgar Filing: ABB LTD - Form 6-K

The Company evaluates the profitability of its segments based on Operational EBITDA, which represents income from operations excluding depreciation and amortization, restructuring and restructuring-related expenses, and acquisition-related expenses and certain non-operational items, as well as foreign exchange/commodity timing differences in income from operations consisting of: (i) unrealized gains and losses on derivatives (foreign exchange, commodities, embedded derivatives), (ii) realized gains and losses on derivatives where the underlying hedged transaction has not yet been realized, and (iii) unrealized foreign exchange movements on receivables/payables (and related assets/liabilities).

The CODM primarily reviews the results of each segment on a basis that is before the elimination of profits made on inventory sales between segments. Segment results below are presented before these eliminations, with a total deduction for intersegment profits to arrive at the Company's consolidated Operational EBITDA. Intersegment sales and transfers are accounted for as if the sales and transfers were to third parties, at current market prices.

## Notes to the Interim Consolidated Financial Information (unaudited)

The following tables present segment revenues, Operational EBITDA, the reconciliations of consolidated Operational EBITDA to income from continuing operations before taxes for the six and three months ended June 30, 2013 and 2012, as well as total assets at June 30, 2013, and December 31, 2012.

(\$ in millions)	Six months ended June 30, 2013		
	Third-party revenues	Intersegment revenues	Total revenues
