Item 5.02 **Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.**

(e) On February 25, 2014, the Organization and Compensation Committee (the Committee) of the Board of Directors of Textron Inc. approved the design of the annual and long-term incentive compensation program for 2014 with respect to Textron Inc.'s executive officers, including grant levels under these arrangements, the mix of grant type and the type of performance targets for 2014 and for the 2014-2016 performance share unit cycle and applicable performance targets. Other than as described herein, awards of stock options, restricted stock units and performance share units operate on substantially the same terms as those granted in prior years.

Annual Incentive Compensation

Incentive payments to executive officers for 2014 under the Textron Inc. Short-Term Incentive Plan (As amended and restated effective January 3, 2010) will be based on the following:

- Achieving enterprise net operating profit target: 60%
- Achieving manufacturing free cash flow target: 35%
- Achieving workforce diversity target: 5%

Enterprise net operating profit is defined as profits from all of our segments, as determined under generally accepted accounting principles (GAAP).

Our definition of Manufacturing free cash flow adjusts net cash from operating activities of continuing operations for dividends received from, and certain capital contributions made to, Textron Financial Corporation (TFC), capital expenditures, proceeds from the sale of property, plant and equipment and contributions to our pension plans. This measure is not a financial measure under GAAP.

Achieving TFC non-captive finance targets has been removed as a target as the liquidation of our non-captive finance receivables has been substantially accomplished.

Target payouts for the named executive officers range from 60% to 130% of the executive's base salary. The amount actually paid generally can range from zero, if the threshold level of actual performance relative to target performance objectives is not achieved, to no more than twice the target award level. Payouts are made in cash following review and certification of performance results by the Committee.

Long-Term Incentive Compensation

Edgar Filing: TEXTRON INC - Form 8-K

2014 awards under the Textron Inc. 2007 Long-Term Incentive Plan (amended and restated as of April 28, 2010) will consist of the following (consistent with recent years) 30% of the grant value for each executive officer will be in the form of stock options,

30% in the form of restricted stock units and 40% in the form of performance share units (PSUs).

Stock options awarded in 2014 to executive officers will vest ratably over three years beginning on the first anniversary of the date of grant. Stock options are granted with an exercise price equal to the closing price of common stock traded on the New York Stock Exchange on the date of grant.

Restricted stock units awarded in 2014 to executive officers will vest over five years, with three equal installments vesting on the third, fourth and fifth anniversaries of the date of grant. Each of the three installments will be settled in stock upon vesting. These awards will also receive dividend equivalent payments on a quarterly basis prior to vesting.

PSUs will be earned based upon performance during a three-year performance period, with vesting at the end of the third fiscal year. Executive officers may earn from 0% to 150% of the units originally granted based upon the achievement of performance targets established by the Committee. Upon vesting, all earned PSUs are valued based on the price of our common stock and are paid in cash in the first quarter following the performance period. The Committee will set the performance targets on an annual basis. 2014 performance targets for the PSUs granted for the 2014-2016 cycle will be based 60% on achievement of the enterprise net operating profit target, 40% on the manufacturing free cash flow target.

Failure to attain the threshold performance level with respect to any of the performance targets will result in the failure to earn any PSUs related to that target's portion of the award with respect to the related year. Attainment between the threshold and maximum performance levels with respect to any of the targets will result in earning a portion of the PSUs related to the related target's portion of the award as defined by a pre-established mathematical formula. The Committee may determine an award less than that determined by the formula but may not determine an award more than that derived by the formula.

The Committee again included a total shareholder return (TSR) metric for the PSUs which links the entire PSU payout with performance versus a performance peer group. The Committee may exercise negative discretion linked to TSR for the entire three-year performance period by up to -40%.

The Committee also approved certain changes to provisions in the award agreements for long-term incentive awards related to termination events. Awards granted on or after March 1, 2014 will no longer have a single trigger vesting upon a change in control. Instead, awards will vest by reason of a change in control only if an involuntary termination of the executive, without cause, or a termination by the executive for good reason occurs within two years of the change in control.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
