ATLANTIC AMERICAN CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010
(Unaudited; Dollars in thousands, except per share amounts)

Note 1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of Atlantic American Corporation (the "Parent") and its subsidiaries (collectively with the Parent, the "Company"). All significant intercompany accounts and transactions have been eliminated in consolidation. The accompanying statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for audited financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. The unaudited condensed consolidated financial statements included herein and these related notes should be read in conjunction with the Company's consolidated financial statements, and the notes thereto, that are included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. Operating results for the three month and nine month periods ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010 or for any other future period.

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates.

Note 2. Impact of Recently Issued Accounting Standards

In October 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2010-26, Financial Services – Insurance (Topic 944) – Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts ("ASU 2010-26") which specifies which costs relating to the acquisition of new or renewal insurance contracts qualify for deferral. In accordance with ASU 2010-26, incremental direct costs of contract acquisition should be capitalized. Advertising costs should be included in deferred acquisition costs only if the capitalization criteria in the direct-response advertising guidance in Subtopic 340-20, Other Assets and Deferred Costs – Capitalized Advertising Costs, are met. All other acquisition related costs, including costs incurred by the insurer in soliciting potential customers, market research, training, administration, unsuccessful acquisition or renewal efforts, and product development, should be expensed as incurred. If the initial application of ASU 2010-26 results in the capitalization of acquisition costs that had not been capitalized previously, the entity may elect not to capitalize those types of costs. The amendments in ASU 2010-26 are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2011. The amendments in ASU 2010-26 should be applied prospectively upon adoption; although retrospective application to all prior periods presented upon the date of adoption is also permitted, but not required. Early adoption is permitted, but only at the beginning of an entity's annual reporting period. The Company will adopt the amendments to ASU 2010-26 on January 1, 2012 and does not expect the adoption to have a material impact on the Company's financial condition or results of operations.

In January 2010, the FASB issued ASU No. 2010-6, Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements ("ASU 2010-6"), which requires entities to make disclosures about recurring and nonrecurring fair value measurements. In accordance with ASU 2010-6, the reporting entity should disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value

measurements and describe the reasons for the transfers. ASU 2010-6 also requires an entity to present separately information about purchases, sales, issuances, and settlements in the reconciliation of fair value measurements using significant unobservable inputs (Level 3). The disclosures in ASU 2010-6 are effective for interim and annual reporting periods beginning after December 15, 2009, except for purchases, sales, issuances, and settlements in the roll forward activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. See Note 11, Investments, for expanded interim disclosures.

Table of Contents

In June 2009, the FASB issued amendments to Accounting Standards Codification (“ASC”) 810-10 (“ASC 810-10”), which amend the consolidation guidance applicable to variable interest entities (“VIEs”). Pursuant to these amendments, an entity would consolidate a VIE, as the primary beneficiary, when the entity has both of the following: (a) the power to direct the activities of a VIE that most significantly impact the entity’s economic performance and (b) the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE. Ongoing reassessment of whether an enterprise is the primary beneficiary of a VIE is required. The amendments to ASC 810-10 eliminate the quantitative approach previously required for determining the primary beneficiary of a VIE. The amendments to ASC 810-10 are effective for fiscal years and interim periods beginning after November 15, 2009. The Company adopted the amendments to ASC 810-10 on January 1, 2010. Adoption of the amendments to ASC 810-10 did not have a material impact on the Company’s financial condition or results of operations.

In June 2009, the FASB issued an amendment to ASC 860. The amendment to ASC 860 amends the derecognition guidance and eliminates the concept of a qualifying special purpose entity. The amendment to ASC 860 is effective for fiscal years and interim periods beginning after November 15, 2009. Early adoption of the amendment to ASC 860 was prohibited. The Company adopted the amendment to ASC 860 on January 1, 2010. Adoption of the amendment to ASC 860 did not have a material impact on the Company’s financial condition or results of operations.

Note 3. Segment Information

The Company’s primary operating subsidiaries, American Southern Insurance Company and American Safety Insurance Company (together known as “American Southern”) and Bankers Fidelity Life Insurance Company (“Bankers Fidelity”) operate in two principal business units, each focusing on a specific geographic region and/or specific products. American Southern operates in the property and casualty insurance market, while Bankers Fidelity operates in the life and health insurance market. Each business unit is managed independently and is evaluated on its individual performance. The following sets forth the revenue and pre-tax income (loss) for each business unit for the three month and nine month periods ended September 30, 2010 and 2009.

Revenues	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
American Southern	$ 9,825	$ 9,586	$ 28,924	$ 29,865
Bankers Fidelity	17,162	15,851	50,814	46,635
Corporate and Other	159	101	458	357

Income before income taxes	$ 581	$ 171	$ 1,218	$ 428

Table of Contents

Note 4. Credit Arrangements

Bank Debt

At September 30, 2010, the Company had a revolving credit facility (the "Credit Agreement") with Wells Fargo Bank, National Association ("Wells Fargo"), pursuant to which the Company is able to, subject to the terms and conditions thereof, borrow or reborrow up to $5,000. The interest rate on amounts outstanding under the Credit Agreement is, at the option of the Company, equivalent to either (a) the base rate (which equals the higher of the Prime Rate or 0.5% above the Federal Funds Rate, each as defined) or (b) the London Interbank Offered Rate ("LIBOR") determined on an interest period of 1-month, 2-months, 3-months or 6-months, plus 2.00%. Interest on amounts outstanding is payable quarterly. The Credit Agreement requires the Company to comply with certain covenants, including, among others, ratios that relate funded debt to both total capitalization and earnings before interest, taxes, depreciation and amortization, as well as the maintenance of minimum levels of tangible net worth. The Company must also comply with limitations on capital expenditures, certain payments, additional debt obligations, equity repurchases and certain redemptions, as well as minimum risk-based capital levels. Upon the occurrence of an event of default, Wells Fargo may terminate the Credit Agreement and declare all amounts outstanding due and payable in full. During the nine month period ended September 30, 2010, there was no balance outstanding under this Credit Agreement and the Company was in compliance with all terms of the Credit Agreement. The termination date of this Credit Agreement is June 30, 2011. The Company expects that it would seek to extend or renew the Credit Agreement on or prior to expiration, although no assurances can be provided that any extension or replacement would be available to the Company on acceptable terms, or at all.

Junior Subordinated Debentures

The Company has two unconsolidated Connecticut statutory business trusts, which exist for the exclusive purposes of: (i) issuing trust preferred securities ("Trust Preferred Securities") representing undivided beneficial interests in the assets of the trusts; (ii) investing the gross proceeds of the Trust Preferred Securities in junior subordinated deferrable interest debentures ("Junior Subordinated Debentures") of Atlantic American; and (iii) engaging in only those activities necessary or incidental thereto.

The financial structure of each of Atlantic American Statutory Trust I and II as of September 30, 2010 was as follows:

	Atlantic American Statutory Trust I	Atlantic American Statutory Trust II
JUNIOR SUBORDINATED DEBENTURES (1) (2)		
Principal amount owed	$ 18,042	$ 23,196
Balance September 30, 2010	18,042	23,196
Balance December 31, 2009	18,042	23,196
Coupon rate	LIBOR + 4.00%	LIBOR + 4.10%
Interest payable	Quarterly	Quarterly
Maturity date	December 4, 2032	May 15, 2033
Redeemable by issuer	Yes	Yes
TRUST PREFERRED SECURITIES		
Issuance date	December 4, 2002	May 15, 2003
Securities issued	17,500	22,500
Liquidation preference per security	$ 1	$ 1
Liquidation value	17,500	22,500
Coupon rate	LIBOR + 4.00%	LIBOR + 4.10%
Distribution payable	Quarterly	Quarterly

Distribution guaranteed by (3)	Atlantic American Corporation	Atlantic American Corporation

(1) For each of the respective debentures, the Company has the right at any time, and from time to time, to defer payments of interest on the Junior Subordinated Debentures for a period not exceeding 20 consecutive quarters up to the debentures' respective maturity dates. During any such period, interest will continue to accrue and the Company may not declare or pay any cash dividends or distributions on, or purchase, the Company's common stock nor make any principal, interest or premium payments on or repurchase any debt securities that rank equally with or junior to the Junior Subordinated Debentures. The Company has the right at any time to dissolve each of the trusts and cause the Junior Subordinated Debentures to be distributed to the holders of the Trust Preferred Securities.

(2) The Junior Subordinated Debentures are unsecured and rank junior and subordinate in right of payment to all senior debt of the Parent and are effectively subordinated to all existing and future liabilities of its subsidiaries.

(3) The Parent has guaranteed, on a subordinated basis, all of the obligations under the Trust Preferred Securities, including payment of the redemption price and any accumulated and unpaid distributions to the extent of available funds and upon dissolution, winding up or liquidation.

Table of Contents

Note 5. Derivative Financial Instruments

On February 21, 2006, the Company entered into a zero cost interest rate collar with Wells Fargo to hedge future interest payments on a portion of the Junior Subordinated Debentures. The notional amount of the collar was $18,042 with an effective date of March 6, 2006. The collar has a LIBOR floor rate of 4.77% and a LIBOR cap rate of 5.85% and adjusts quarterly on the 4th of each March, June, September and December through termination on March 4, 2013. The Company began making payments to Wells Fargo under the zero cost interest rate collar on June 4, 2008. As a result of interest rates remaining below the LIBOR floor rate of 4.77%, these payments to Wells Fargo under the zero cost interest rate collar have continued through September 30, 2010. While the Company may be exposed to counterparty risk should Wells Fargo fail to perform, based on the current level of interest rates, and coupled with the current macroeconomic outlook, the Company believes that its current counterparty risk exposure is minimal.

The estimated fair value and related carrying value of the Company's interest rate collar at September 30, 2010 was a liability of approximately $1,798 with a corresponding decrease in accumulated other comprehensive income in shareholders' equity, net of deferred tax.

Note 6. Reconciliation of Other Comprehensive Income (Loss)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net realized gains on investments included in net income	$211	$14	$224	$1

	Nine Months Ended September 30, 2010		
	Income	Shares (In thousands)	Per Share Amount
Basic Earnings Per Common Share:			
Net income	$ 1,018	22,286	
Less preferred stock dividends	(381)		
Net income applicable to common shareholders	637	22,286	$ .03
Diluted Earnings Per Common Share:			
Effect of dilutive stock options		32	
Net income applicable to common shareholders	$ 637	22,318	$ .03

Table of Contents

	Nine Months Ended September 30, 2009		
	Income	Shares (In thousands)	Per Share Amount
Basic and Diluted Loss Per Common Share:			
Net loss	$ (1,840)	22,311	
Less preferred stock dividends	(381)		
Net loss applicable to common shareholders	$ (2,221)	22,311	$ (.10)

The assumed conversion of the Company's Series D Preferred Stock was excluded from the earnings (loss) per common share calculation for all periods presented since its impact would have been antidilutive. All outstanding stock options were excluded from the earnings (loss) per common share calculation for the three month and nine month periods ended September 30, 2009 since their impact also would have been antidilutive.

Note 8. Income Taxes

A reconciliation of the differences between income taxes computed at the federal statutory income tax rate and the income tax expense is as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Federal income tax provision at statutory rate of 35%	$203	$60	$426	$150
Tax exempt interest and dividends received deductions	(55)	(56)	(147)	(174)
Other permanent differences	16	16	29	33
Change in asset valuation allowance due to change in judgment relating to realizability of deferred tax assets	-	1,755	-	1,755
Adjustment for prior years' estimates to actual	(108)	504	(108)	504
Income tax expense	$56	$2,279	$200	$2,268

The components of the income tax expense were:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Current - Federal	$ (659)	$ (15)	$ (653)	$ (15)
Deferred - Federal	715	539	853	528
Change in deferred tax asset valuation allowance	-	1,755	-	1,755
Total	$ 56	$ 2,279	$ 200	$ 2,268

The primary differences between the effective tax rate and the federal statutory income tax rate for the three month and nine month periods ended September 30, 2010 resulted from the dividends-received deduction ("DRD") and the provision-to-filed return adjustments. The current estimated DRD is adjusted as underlying factors change. The actual current year DRD can vary from the estimates based on, but not limited to, actual distributions from these investments as well as appropriate levels of taxable income. The provision-to-filed return adjustments are generally updated at the completion of the third quarter of each fiscal year and were $108 in the three month and nine month

periods ended September 30, 2010. The provision-to-filed-return adjustments for the three month and nine month periods ended September 30, 2010 were primarily due to adjustments related to the carryback and utilization of capital losses on investments in the Company's life and health operation.

Table of Contents

The primary differences between the effective tax rate and the federal statutory income tax rate for the three month and nine month periods ended September 30, 2009 resulted from the DRD, the change in deferred tax asset valuation allowance, and the provision-to-filed return adjustments. The change in deferred tax asset valuation allowance was due to reassessment of the realization of certain capital loss carryforward benefits. The Company has established a corresponding valuation allowance of $1,755 as it does not anticipate having sufficient future capital gains to offset these capital losses during the applicable carryforward period. The provision-to-filed return adjustments were $504 in the three month and nine month periods ended September 30, 2009. The provision-to-filed-return adjustments for the three month and nine month periods ended September 30, 2009 were primarily due to adjustments related to the 2008 sale of the Company's regional property and casualty operations.

Note 9. Employee Retirement Plans

Effective May 31, 2008, the Company froze all benefits related to its qualified pension plan, as well as its supplemental executive retirement plan ("SERP"). In May 2009, the Company terminated the SERP and distributed the accumulated benefits to those participating employees. On March 11, 2010, the Company received a determination letter from the Internal Revenue Service approving the termination of the Company's qualified pension plan. In May 2010, the Company distributed the accumulated benefits to participating employees, and terminated the qualified pension plan. In connection with the May 2010 termination and settlement of the qualified pension plan, the Company incurred a non-recurring charge of $319 during the nine month period ended September 30, 2010.

Note 10. Commitments and Contingencies

From time to time, the Company is involved in various claims and lawsuits incidental to and in the ordinary course of its businesses. In the opinion of management, any such known claims are not expected to have a material effect on the business or financial condition of the Company.

Table of Contents

Note 11. Investments

The following tables set forth the carrying value, gross unrealized gains, gross unrealized losses and amortized cost of the Company's investments, aggregated by type and industry, as of September 30, 2010 and December 31, 2009.

Investments were comprised of the following:

	September 30, 2010			
	Carrying Value	Gross Unrealized Gains	Gross Unrealized Losses	Amortized Cost
Fixed Maturity Securities:				
U.S. Treasury securities and obligations of U.S. Government agencies and authorities	$64,197	$4,419	$-	$59,778
Obligations of states and political subdivisions	14,613	300	23	14,336
Corporate securities				
Utilities and telecom	24,659	2,709	-	21,950

Common and non-redeemable preferred stocks	-	-	3,683	2,798	3,683	2,798

Total temporarily impaired securities	$109,871	$3,909	$20,495	$5,983	$130,366	$9,892

Table of Contents

The following is a summary of investment impairments the Company recorded due to other than temporary declines in values for the three month and nine month periods ended September 30, 2010 and 2009.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Redeemable preferred stocks	$ -	$ -	$ -	$ 44
Other invested assets	-	-	-	17
Total	$ -	$ -	$ -	$ 61

During the nine month period ended September 30, 2009, the Company recorded a $61 realized loss due to other than temporary impairments in its investment in redeemable preferred securities of General Motors Corporation and certain other invested assets. There were no impairments recorded during the three month and nine month periods ended September 30, 2010.

The evaluation for an other than temporary impairment is a quantitative and qualitative process, which is subject to risks and uncertainties in the determination of whether declines in the fair value of investments are other than temporary. The risks and uncertainties include, among other things, changes in general economic conditions, an issuer’s financial condition or near term recovery prospects and the effects of changes in interest rates. In evaluating a potential impairment, the Company considers, among other factors, the intent and ability to hold these securities until price recovery, the nature of the investment and the prospects for the issuer and its industry, the status of an issuer’s continued satisfaction of the investment obligations in accordance with their contractual terms, and management’s expectation as to the issuer’s ability and intent to continue to do so, as well as ratings actions that may affect the issuer’s credit status.

As of September 30, 2010, securities in an unrealized loss position were primarily related to the Company’s investments in fixed maturity securities, and common and non-redeemable preferred stocks within the financial services and media sectors. The media sector includes related party investments in Gray Television, Inc. which had unrealized losses of $2,282 as of September 30, 2010 and accounted for the majority of the unrealized loss position in that sector. The Company does not intend to sell nor does it expect to be required to sell the securities referenced previously. In addition, the Company asserts its intent and ability to retain the above equity securities until price recovery. Furthermore, based upon the Company’s expected continuation of receipt of contractually required principal and interest payments, the Company has deemed these securities to be temporarily impaired as of September 30, 2010.

The following describes the fair value hierarchy and provides information as to the extent to which the Company uses fair value to measure financial instruments and information about the inputs used to value those financial instruments. The fair value hierarchy prioritizes the inputs in the valuation techniques used to measure fair value into three broad levels.

Level 1 Observable inputs that reflect quoted prices for identical assets or liabilities in active markets that the Company has the ability to access at the measurement date. The Company’s Level 1 instruments consist of short-term investments.

Level 2 Observable inputs, other than quoted prices included in Level 1, for the asset or liability or prices for similar assets or liabilities. The Company’s Level 2 instruments include most of its fixed maturity securities, which consist of U.S. Treasury securities and U.S. Government securities, municipal bonds, and certain corporate fixed maturity securities, as well as its common and non-redeemable preferred stocks. In determining Level 2 fair value measurements, the Company utilizes various external pricing services.

Level 3	Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk). The Company's Level 3 financial instruments include certain fixed maturity securities and a zero cost interest rate collar. Fair value is based on criteria that use assumptions or other data that are not readily observable from objective sources. As of September 30, 2010, the value of the Company's fixed maturity securities valued using Level 3 criteria was $2,035 and the value of the zero cost interest rate collar was a liability of $1,798 (See Note 5). The use of different criteria or assumptions regarding data may have yielded different valuations.

Table of Contents

As of September 30, 2010, investments carried at fair value were measured on a recurring basis as summarized below:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Fixed maturity securities	$ -	$ 149,546	$ 2,035	$ 151,581
Equity securities	-	7,591	-	7,591
Short-term investments	14,703	-	-	14,703
Total	$ 14,703	$ 157,137	$ 2,035	$ 173,875

As of December 31, 2009, investments carried at fair value were measured on a recurring basis as summarized below:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Fixed maturity securities	$ -	$ 182,281	$ 1,779	$ 184,060
Equity securities	-	6,914	-	6,914
Short-term investments	14,697	-	-	14,697
Total	$ 14,697	$ 189,195	$ 1,779	$ 205,671

The following is a roll-forward of the financial instruments measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three month and nine month periods ended September 30, 2010.

	Fixed Maturity Securities	Derivative (Liability)
Balance, December 31, 2009	$ 1,779	$ (1,547)
Total unrealized gains (losses) included in other comprehensive income	14	(88)
Balance, March 31, 2010	1,793	(1,635)
Total unrealized gains (losses) included in other comprehensive income	155	(98)
Balance, June 30, 2010	1,948	(1,733)
Total unrealized gains (losses) included in other comprehensive income	87	(65)
Balance, September 30, 2010	$ 2,035	$ (1,798)

The Company's fixed maturity securities valued using Level 3 inputs consist solely of issuances of pooled debt obligations of multiple, smaller financial services companies. They are not actively traded and valuation techniques used to measure fair value are based on future estimated cash flows discounted at a reasonably estimated rate of

interest. Other qualitative and quantitative information received from the original underwriter of the pooled offerings is also considered, as applicable. As the derivative is an interest rate collar, changes in valuation are more closely correlated with changes in interest rates and, accordingly, values are estimated using projected cash flows at current interest rates discounted at a reasonably estimated rate of interest. Fair value quotations are also obtained from the counterparty to the transaction.

Item 2.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of the financial condition and results of operations of Atlantic American Corporation ("Atlantic American" or the "Parent") and its subsidiaries (collectively with the Parent, the "Company") for the three month and nine month periods ended September 30, 2010. This discussion should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere herein, as well as with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Atlantic American is an insurance holding company whose operations are conducted primarily through its insurance subsidiaries: American Southern Insurance Company and American Safety Insurance Company (together known as "American Southern") and Bankers Fidelity Life Insurance Company ("Bankers Fidelity"). Each operating company is managed separately, offers different products and is evaluated on its individual performance.

Critical Accounting Policies

The accounting and reporting policies of the Company are in accordance with accounting principles generally accepted in the United States of America and, in management's belief, conform to general practices within the insurance industry. The following is an explanation of the Company's accounting policies and the resultant estimates considered most significant by management. These accounting policies inherently require significant judgment and assumptions and actual operating results could differ significantly from management's initial estimates determined using these policies. Atlantic American does not expect that changes in the estimates determined using these policies will have a material effect on the Company's financial condition or liquidity, although changes could have a material effect on its consolidated results of operations.

Unpaid loss and loss adjustment expenses comprised 27% of the Company's total liabilities at September 30, 2010. This liability includes estimates for: 1) unpaid losses on claims reported prior to September 30, 2010, 2) future development on those reported claims, 3) unpaid ultimate losses on claims incurred prior to September 30, 2010 but not yet reported and 4) unpaid loss adjustment expenses for reported and unreported claims incurred prior to September 30, 2010. Quantification of loss estimates for each of these components involves a significant degree of judgment and estimates may vary, materially, from period to period. Estimated unpaid losses on reported claims are developed based on historical experience with similar claims by the Company. Development on reported claims, estimates of unpaid ultimate losses on claims incurred prior to September 30, 2010 but not yet reported, and estimates of unpaid loss adjustment expenses are developed based on the Company's historical experience, using actuarial methods to assist in the analysis. The Company's actuaries develop ranges of estimated development on reported and unreported claims as well as loss adjustment expenses using various methods, including the paid-loss development method, the reported-loss development method, the paid Bornhuetter-Ferguson method and the reported Bornhuetter-Ferguson method. Any single method used to estimate ultimate losses has inherent advantages and disadvantages due to the trends and changes affecting the business environment and the Company's administrative policies. Further, a variety of external factors, such as legislative changes, medical cost inflation, and others may directly or indirectly impact the relative adequacy of liabilities for unpaid losses and loss adjustment expenses. The Company's approach is to select an estimate of ultimate losses based on comparing results of a variety of reserving methods, as opposed to total reliance on any single method. Unpaid loss and loss adjustment expenses are reviewed periodically for significant lines of business, and when current results differ from the original assumptions used to develop such estimates, the amount of the Company's recorded liability for unpaid loss and loss adjustment expenses is adjusted. In the event the Company's actual reported losses in any period are materially in excess of the previous estimated amounts, such losses, to the extent reinsurance coverage does not exist, could have a material adverse effect

on the Company’s results of operations.

Future policy benefits comprised 32% of the Company’s total liabilities at September 30, 2010. These liabilities relate primarily to life insurance products and are based upon assumed future investment yields, mortality rates, and withdrawal rates after giving effect to possible risks of adverse deviation. The assumed mortality and withdrawal rates are based upon the Company’s experience. If actual results differ from the initial assumptions, the amount of the Company’s recorded liability could require adjustment.

Table of Contents

Deferred acquisition costs comprised 8% of the Company's total assets at September 30, 2010. Deferred acquisition costs are commissions, premium taxes, and other costs that vary with and are primarily related to the acquisition of new and renewal business and are generally deferred and amortized. The deferred amounts are recorded as an asset on the balance sheet and amortized to expense in a systematic manner. Traditional life insurance and long-duration health insurance deferred policy acquisition costs are amortized over the estimated premium-paying period of the related policies using assumptions consistent with those used in computing the related liability for policy benefit reserves. The deferred acquisition costs for property and casualty insurance and short-duration health insurance are amortized over the effective period of the related insurance policies. Deferred policy acquisition costs are expensed when such costs are deemed not to be recoverable from future premiums (for traditional life and long-duration health insurance) and from the related unearned premiums and investment income (for property and casualty and short-duration health insurance). Assessments of recoverability for property and casualty and short-duration health insurance are extremely sensitive to the estimates of a subsequent year's projected losses related to the unearned premiums. Projected loss estimates for a current block of business for which unearned premiums remain to be earned may vary significantly from the indicated losses incurred in any previous calendar year.

Receivables are amounts due from reinsurers, insureds and agents, and comprised 7% of the Company's total assets at September 30, 2010. Insured and agent balances are evaluated periodically for collectibility. Annually, the Company performs an analysis of the creditworthiness of the Company's reinsurers using various data sources. Failure of reinsurers to meet their obligations due to insolvencies, disputes or otherwise could result in uncollectible amounts and losses to the Company. Allowances for uncollectible amounts are established, as and when a loss has been determined probable, against the related receivable. Losses are recognized when determined on a specific account basis and a general provision for loss is made based on the Company's historical experience.

Cash and investments comprised 84% of the Company's total assets at September 30, 2010. Substantially all of the Company's investments are in bonds and common and preferred stocks, the values of which are subject to significant market fluctuations. The Company carries all investments as available for sale and, accordingly, at their estimated fair values. The Company owns certain fixed maturity securities that do not have publicly quoted values, but had an estimated fair value as determined by management of $2.0 million at September 30, 2010. Such values inherently involve a greater degree of judgment and uncertainty and therefore ultimately greater price volatility. On occasion, the value of an investment may decline to a value below its amortized purchase price and remain at such value for an extended period of time. When an investment's indicated fair value has declined below its cost basis for a period of time, the Company evaluates such investment for an other than temporary impairment. The evaluation for an other than temporary impairment is a quantitative and qualitative process, which is subject to risks and uncertainties in the determination of whether declines in the fair value of investments are other than temporary. The risks and uncertainties include, among other things, changes in general economic conditions, an issuer's financial condition or near term recovery prospects and the effects of changes in interest rates. In evaluating a potential impairment, the Company considers, among other factors, the intent and ability to hold these securities until price recovery, the nature of the investment and the prospects for the issuer and its industry, the status of an issuer's continued satisfaction of the obligations in accordance with the contractual terms of the investment, and management's expectation as to the issuer's ability and intent to continue to do so, as well as ratings actions that may affect the issuer's credit status. If an other than temporary impairment is deemed to exist, then the Company will write down the amortized cost basis of the investment to its estimated fair value. While such write down does not impact the reported value of the investment in the Company's balance sheet, it is reflected as a realized investment loss in the Company's consolidated statements of operations.

The Company determines the fair values of certain financial instruments based on the fair market hierarchy established in Accounting Standards Codification ("ASC") 820-10-20, Fair Value Measurements and Disclosures ("ASC 820-10-20"). The fair values for fixed maturity and equity securities are largely determined by either independent methods prescribed by the National Association of Insurance Commissioners, which do not differ materially from

nationally quoted market prices, when available, or independent broker quotations. See Note 11 of the accompanying notes to consolidated financial statements with respect to assets and liabilities carried at fair value and information about the inputs used to value those financial instruments, by hierarchy level, in accordance with ASC 820-10-20.

Deferred income taxes comprised less than 1% of the Company's total assets at September 30, 2010. Deferred income taxes reflect the effect of temporary differences between assets and liabilities that are recognized for financial reporting purposes and the amounts that are recognized for tax purposes. These deferred income taxes are measured by applying currently enacted tax laws and rates. Valuation allowances are recognized to reduce the deferred tax assets to the amount that is deemed more likely than not to be realized. In assessing the likelihood of realization, management considers estimates of future taxable income and tax planning strategies.

Recently Issued Accounting Standards

For a discussion of recently issued accounting standards applicable to the Company, see Note 2 of the accompanying notes to the consolidated financial statements.

Table of Contents

OVERALL CORPORATE RESULTS

On a consolidated basis, the Company had net income of $0.5 million, or $0.02 per diluted share, for the three month period ended September 30, 2010, compared to a net loss of $2.1 million, or a loss of $0.10 per diluted share, for the three month period ended September 30, 2009. The Company had net income of $1.0 million, or $0.03 per diluted share, for the nine month period ended September 30, 2010, compared to a net loss of $1.8 million, or $0.10 per diluted share, for the nine month period ended September 30, 2009. The net loss in the three month and nine month periods ended September 30, 2009 was primarily attributable to a $1.8 million increase in the Company's deferred tax asset valuation allowance. The change in deferred tax asset valuation allowance was due to reassessment of the realization of certain capital loss carryforward benefits. Income before taxes was $0.6 million in the three month period ended September 30, 2010, compared to $0.2 million in the three month period ended September 30, 2009. Income before taxes for the nine month period ended September 30, 2010 was $1.2 million compared to $0.4 million for the nine month period ended September 30, 2009. The increase in income before taxes in the three month and nine month periods ended September 30, 2010 was primarily due to an increase in premium revenue and realized investment gains with a relatively consistent level of fixed expenses. Also contributing to the increase in income before taxes in the nine month period ended September 30, 2010 was a decrease in discretionary compensation accruals. Partially offsetting the increase in income before taxes in the three month and nine month periods ended September 30, 2010 was a decrease in investment income due to declining yields from invested assets. During the three month and nine month periods ended September 30, 2010, a large number of securities held by the Company were called by the issuers, the proceeds from which the Company was not able to reinvest at equivalent rates.

Premium revenue for the three month period ended September 30, 2010 increased $1.8 million, or 7.9%, to $24.6 million. For the nine month period ended September 30, 2010, premium revenue increased $3.8 million, or 5.6%, to $72.3 million. The increase in premiums in the three month and nine month periods ended September 30, 2010 was primarily attributable to new business generated by the Company's life and health operation as a result of increased marketing initiatives. Property and casualty premiums also increased during the three month period ended September 30, 2010 over the comparable period in 2009 primarily due to an increase in commercial automobile business. Partially offsetting the increase in the life and health premiums during the nine month period ended September 30, 2010 was a decrease in property and casualty premiums due to the decline in general liability and surety business.

A more detailed analysis of the individual operating companies and other corporate activities is provided below.

American Southern

The following is a summary of American Southern's premiums for the three month and nine month periods ended September 30, 2010 and the comparable periods in 2009 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Gross written premiums	$ 11,050	$ 8,860	$ 32,003	$ 31,110
Ceded premiums	(1,412)	(1,573)	(4,052)	(4,875)
Net written premiums	$ 9,638	$ 7,287	$ 27,951	$ 26,235
Net earned premiums	$ 8,775	$ 8,394	$ 25,621	$ 26,214

Gross written premiums at American Southern increased $2.2 million, or 24.7%, during the three month period ended September 30, 2010, and $0.9 million, or 2.9%, during the nine month period ended September 30, 2010, over the comparable periods in 2009. The increase in gross written premiums during the three month and nine month periods ended September 30, 2010 was primarily attributable to an increase in commercial automobile business marketed through a newly appointed general agent. Partially offsetting the increase in gross written premiums was the continued decline in the general liability line of business resulting from continued weakness in the construction industry as well as decreases in business writings from certain targeted agencies due to the strengthening of the company's underwriting guidelines.

Ceded premiums decreased $0.2 million, or 10.2%, during the three month period ended September 30, 2010, and $0.8 million, or 16.9%, during the nine month period ended September 30, 2010, from the comparable periods in 2009. The decrease in ceded premiums during the three month and nine month periods ended September 30, 2010 was primarily due to lower cession rates resulting from a new reinsurance agreement with a new carrier which incepted in the fourth quarter of 2009.

Table of Contents

The following presents American Southern's net earned premiums by line of business for the three month and nine month periods ended September 30, 2010 and the comparable periods in 2009 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Commercial automobile	$ 5,401	$ 4,759	$ 15,421	$ 14,413
General liability	1,254	1,417	3,847	4,610
Property	632	616	1,847	1,822
Surety	1,488	1,602	4,506	5,369
Total	$ 8,775	$ 8,394	$ 25,621	$ 26,214

Net earned premiums increased $0.4 million, or 4.5%, during the three month period ended September 30, 2010 over the three month period ended September 30, 2009, and decreased $0.6 million, or 2.3%, during the nine month period ended September 30, 2010, from the comparable period in 2009. The increase in net earned premiums during the three month period ended September 30, 2010 was primarily due to the increase in commercial automobile business discussed previously. The decrease in net earned premiums in the 2010 year to date period was primarily attributable to the decline in the general liability and surety lines of business resulting from continued weakness in the construction industry. Premiums are earned ratably over their respective policy terms, and therefore premiums earned in the current year are related to policies written during both the current and prior years.

The following sets forth American Southern's loss and expense ratios for the three month and nine month periods ended September 30, 2010 and for the comparable periods in 2009:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Loss ratio	56.6 %	60.1 %	58.7 %	53.9 %
Expense ratio	41.0 %	40.4 %	42.0 %	46.6 %
Combined ratio	97.6 %	100.5 %	100.7 %	100.5 %

The loss ratio for the three month period ended September 30, 2010 decreased to 56.6% from 60.1% in the three month period ended September 30, 2009 and increased to 58.7% in the nine month period ended September 30, 2010 from 53.9% in the comparable period of 2009. The decrease in the loss ratio for the three month period ended September 30, 2010 as compared to the three month period ended September 30, 2009 was primarily due to more favorable loss experience in the commercial automobile line of business as well as a significant unanticipated loss recovery in 2010 in the surety line of business. The increase in the loss ratio for the nine month period ended September 30, 2010 was primarily attributable to several large claims in the surety line of business, specifically related to subdivision performance bonds.

The expense ratio for the three month period ended September 30, 2010 increased to 41.0% from 40.4% in the three month period ended September 30, 2009 and decreased to 42.0% in the nine month period ended September 30, 2010 from 46.6% in the comparable period of 2009. The increase in the expense ratio in the three month period ended September 30, 2010 was primarily due to American Southern's variable commission structure, which compensates the company's agents in relation to the loss ratios of the business they write. In periods where the loss ratio decreases,

commissions and underwriting expenses will increase and conversely in periods where the loss ratio increases, commissions and underwriting expenses will decrease. The decrease in the expense ratio in the nine month period ended September 30, 2010 was primarily attributable to a decrease in variable commissions resulting from inversely higher loss ratios as well as an overall decrease in underwriting expense. Partially offsetting the decrease in the expense ratio in the nine month period ended September 30, 2010 was a non-recurring charge of $0.3 million which resulted from the termination and final settlement of the company's qualified pension plan. In the nine month period ended September 30, 2009, American Southern incurred a similar non-recurring charge of $0.4 million due to the termination of its supplemental executive retirement plan ("SERP").

Table of Contents

Bankers Fidelity

The following summarizes Bankers Fidelity's earned premiums for the three month and nine month periods ended September 30, 2010 and the comparable periods in 2009 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Medicare supplement	$ 11,834	$ 10,720	$ 34,632	$ 31,478
Other health	1,185	979	3,488	2,820
Life	2,783	2,681	8,581	8,000
Total	$ 15,802	$ 14,380	$ 46,701	$ 42,298

Premium revenue at Bankers Fidelity increased $1.4 million, or 9.9%, during the three month period ended September 30, 2010, and $4.4 million, or 10.4%, during the nine month period ended September 30, 2010, over the comparable periods in 2009, primarily due to successful marketing initiatives, recruiting of new agents, and effective utilization of the company's proprietary lead program. Premiums from the Medicare supplement line of business increased $1.1 million, or 10.4%, during the three month period ended September 30, 2010, and $3.2 million, or 10.0%, during the nine month period ended September 30, 2010, while premiums from the life insurance line of business increased $0.1 million and $0.6 million, respectively, during the same comparable periods. Other health products premiums increased during the three month and nine month periods ended September 30, 2010 over the comparable periods in 2009 due primarily to an increase in sales of short-term care products and increased business activities with group associations.

The following summarizes Bankers Fidelity's operating expenses for the three month and nine month periods ended September 30, 2010 and the comparable periods in 2009 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Benefits and losses	$ 11,483	$ 10,794	$ 34,231	$ 31,619
Commissions and other expenses	5,134	4,592	14,790	13,435
Total expenses	$ 16,617	$ 15,386	$ 49,021	$ 45,054

Benefits and losses increased $0.7 million, or 6.4%, during the three month period ended September 30, 2010, and $2.6 million, or 8.3%, during the nine month period ended September 30, 2010, over the comparable periods in 2009. As a percentage of premiums, benefits and losses decreased to 72.7% in the three month period ended September 30, 2010 from 75.1% in the three month period ended September 30, 2009. For the nine month period ended September 30, 2010, this ratio decreased to 73.3% from 74.8% in the comparable period in 2009. The decrease in the loss ratio for the three month and nine month periods ended September 30, 2010 was primarily due to the increase in new life business which mitigated higher claims associated with the continued aging of the existing life business.

Commissions and other expenses increased $0.5 million, or 11.8%, during the three month period ended September 30, 2010, and $1.4 million, or 10.1%, during the nine month period ended September 30, 2010, over the comparable

periods in 2009. The increase in commissions and other expenses for the three month and nine month periods ended September 30, 2010 was primarily due to commission costs associated with increased premiums coupled with increases in underwriting expense related to the higher volume of business, legal fees and data processing expenses. Also contributing to the increase in commissions and other expenses for the 2010 year to date period were increases in advertising and agency related expenses which resulted from the company's increased marketing initiatives. As a percentage of premiums, these expenses increased to 32.5% in the three month period ended September 30, 2010 from 31.9% in the three month period ended September 30, 2009 primarily due to the reasons discussed previously. For the nine month period ended September 30, 2010, this ratio decreased to 31.7% from 31.8% in the comparable period in 2009. The slight decrease in the 2010 year to date expense ratio was primarily attributable to the increase in earned premiums.

Table of Contents

INVESTMENT INCOME AND REALIZED GAINS

Investment income decreased $0.4 million, or 14.7%, during the three month period ended September 30, 2010, and $0.7 million, or 8.7%, during the nine month period ended September 30, 2010, from the comparable periods in 2009. The decrease in investment income for the three month and nine month periods ended September 30, 2010 was primarily attributable to a decrease in yield on invested assets. The average yield on the Company's invested assets decreased to 4.6% in the nine month period ended September 30, 2010 from 5.1% in the comparable period in 2009. During the three month and nine month periods ended September 30, 2010, a large number of higher yielding securities held by the Company were redeemed by the issuers in accordance with the contractual terms thereof, the proceeds from which the Company was not able to reinvest at equivalent rates.

The Company had net realized investment gains of $0.2 million during the nine month period ended September 30, 2010, compared to $1,000 in the nine month period ended September 30, 2009. During the nine month period ended September 30, 2009, the Company recorded a realized loss of $0.1 million due to other than temporary impairments in its investment in redeemable preferred securities of General Motors Corporation and certain other invested assets which was offset by realized investment gains of a similar amount. There were no impairments recorded during the nine month period ended September 30, 2010. Management continually evaluates the Company's investment portfolio and, as may be determined to be appropriate, makes adjustments for impairments and/or will divest investments.

INTEREST EXPENSE

Interest expense decreased slightly during the three month period ended September 30, 2010, and $0.1 million, or 6.6%, during the nine month period ended September 30, 2010, from the comparable periods in 2009. The decrease in interest expense for the three month and nine month periods ended September 30, 2010 was due to a decrease in the London Interbank Offered Rate ("LIBOR"), as the interest rates on the Company's bank debt and outstanding trust preferred obligations are based on LIBOR.

OTHER EXPENSES

Other expenses (commissions, underwriting expenses, and other expenses) increased $0.6 million, or 6.8%, during the three month period ended September 30, 2010 over the three month period ended September 30, 2009, and decreased $0.8 million, or 2.9%, during the nine month period ended September 30, 2010, from the comparable period in 2009. The increase in other expenses for the three month period ended September 30, 2010 was primarily due to increased commission costs associated with increased premiums and increased profit sharing commissions at American Southern. For the three month period ended September 30, 2010, profit sharing commissions increased $0.3 million from the comparable period of 2009 due to more favorable loss experience during the 2010 third quarter. The majority of American Southern's business is structured in a way that agents are compensated based upon the loss ratios of the business they submit to the company. In periods where the loss ratio decreases, commissions and underwriting expenses will increase, and conversely, in periods where the loss ratio increases, commissions and underwriting expenses will decrease. The decrease in other expenses for the nine month period ended September 30, 2010 was primarily attributable to a $0.6 million decrease in discretionary compensation accruals and a reduction in profit sharing commissions at American Southern. During the nine month period ended September 30, 2010, profit sharing commissions at American Southern decreased $0.6 million from the nine month period ended September 30, 2009 due primarily to the inversely higher loss ratios. In addition, during the nine month period ended September 30, 2010, the Company terminated its qualified pension plan and distributed the accumulated benefits to participating employees. In connection with the termination and final settlement of the qualified pension plan, the Company incurred a non-recurring charge of $0.3 million. In the nine month period ended September 30, 2009, the Company incurred a similar non-recurring charge of $0.4 million due to the termination of its SERP. Partially offsetting the decrease in other expenses in the nine month period ended September 30, 2010 were increases in the life and health

operation for underwriting expense related to the higher volume of business, data processing expenses, legal fees as well as advertising and agency related expenses due to marketing initiatives. On a consolidated basis, as a percentage of earned premiums, other expenses decreased to 38.5% in the three month period ended September 30, 2010 from 38.9% in the three month period ended September 30, 2009. For the nine month period ended September 30, 2010, this ratio decreased to 38.4% from 41.7% in the comparable period in 2009. The decrease in the expense ratio for the three month and nine month periods ended September 30, 2010 was primarily due to the increase in earned premiums coupled with a relatively consistent level of fixed expenses. Also contributing to the decrease in the 2010 year to date expense ratio was the decrease in compensation accruals and the reduction in profit sharing commissions described above.

Table of Contents

INCOME TAXES

The primary differences between the effective tax rate and the federal statutory income tax rate for the three month and nine month periods ended September 30, 2010 resulted from the dividends-received deduction ("DRD") and the provision-to-filed return adjustments. The current estimated DRD is adjusted as underlying factors change. The actual current year DRD can vary from the estimates based on, but not limited to, actual distributions from these investments as well as appropriate levels of taxable income. The provision-to-filed return adjustments are generally updated at the completion of the third quarter of each fiscal year and were $0.1 million in the three month and nine month periods ended September 30, 2010. The provision-to-filed-return adjustments for the three month and nine month periods ended September 30, 2010 were primarily due to adjustments related to the carryback and utilization of capital losses on investments in the Company's life and health operation.

The primary differences between the effective tax rate and the federal statutory income tax rate for the three month and nine month periods ended September 30, 2009 resulted from the DRD, the change in deferred tax asset valuation allowance, and the provision-to-filed return adjustments. The change in deferred tax asset valuation allowance was due to reassessment of the realization of certain capital loss carryforward benefits. The Company has established a corresponding valuation allowance of $1.8 million as it does not anticipate having sufficient future capital gains to offset these capital losses during the applicable carryforward period. The provision-to-filed return adjustments were $0.5 million in the three month and nine month periods ended September 30, 2009. The provision-to-filed-return adjustments for the three month and nine month periods ended September 30, 2009 were primarily due to adjustments related to the 2008 sale of the Company's regional property and casualty operations.

LIQUIDITY AND CAPITAL RESOURCES

The primary cash needs of the Company are for the payment of claims and operating expenses, maintaining adequate statutory capital and surplus levels, and meeting debt service requirements. Current and expected patterns of claim frequency and severity may change from period to period but generally are expected to continue within historical ranges. The Company's primary sources of cash are written premiums, investment income and the sale and maturity of its invested assets. The Company believes that, within each operating company, total invested assets will be sufficient to satisfy all policy liabilities and that cash inflows from investment earnings, future premium receipts and reinsurance collections will be adequate to fund the payment of claims and expenses as needed.

Cash flows at the Parent are derived from dividends, management fees, and tax sharing payments, as described below, from the subsidiaries. The cash needs of the Parent are for the payment of operating expenses, the acquisition of capital assets and debt service requirements. At September 30, 2010, the Parent had approximately $25.2 million of unrestricted cash and investments. The Company believes that traditional funding sources of the Parent, combined with current cash and investments, should provide sufficient liquidity for the Company and/or the Parent for the foreseeable future.

The Parent's insurance subsidiaries reported statutory net income of $4.5 million for the nine month period ended September 30, 2010 compared to statutory net income of $5.0 million for the nine month period ended September 30, 2009. Statutory results are impacted by the recognition of all costs of acquiring business. In a scenario in which the Company is growing, statutory results are generally lower than results determined under generally accepted accounting principles ("GAAP"). Statutory results for the Company's property and casualty operations may differ from the Company's results of operations under GAAP due to the deferral of acquisition costs for financial reporting purposes. The Company's life and health operations' statutory results may differ from GAAP results primarily due to the deferral of acquisition costs for financial reporting purposes, as well as the use of different reserving methods.

Over 90% of the invested assets of the Parent's insurance subsidiaries are invested in marketable securities that can be converted into cash, if required; however, the use of such assets by the Company is limited by state insurance regulations. Dividend payments to a parent corporation by its wholly owned insurance subsidiaries are subject to annual limitations and are restricted to the greater of 10% of statutory surplus or statutory earnings before recognizing realized investment gains of the individual insurance subsidiaries. At September 30, 2010, American Southern had $38.5 million of statutory surplus and Bankers Fidelity had $32.9 million of statutory surplus. In 2010, dividend payments by the Parent's insurance subsidiaries in excess of $8.1 million would require prior approval.

Table of Contents

The Parent provides certain administrative and other services to each of its insurance subsidiaries. The amounts charged to and paid by the subsidiaries include reimbursements for various shared services and other expenses incurred directly on behalf of the subsidiaries by the Parent. In addition, there is in place a formal tax-sharing agreement between the Parent and its insurance subsidiaries. It is anticipated that this agreement will provide the Parent with additional funds from profitable subsidiaries due to the subsidiaries' use of the Parent’s tax loss carryforwards, which totaled approximately $5.8 million at September 30, 2010.

In addition to these internal funding sources, the Company maintains its revolving credit facility (the “Credit Agreement”) with Wells Fargo Bank, National Association (“Wells Fargo”), pursuant to which the Company is able to, subject to the terms and conditions thereof, borrow or reborrow up to $5.0 million. The interest rate on amounts outstanding under the Credit Agreement is, at the option of the Company, equivalent to either (a) the base rate (which equals the higher of the Prime Rate or 0.5% above the Federal Funds Rate, each as defined) or (b) the LIBOR determined on an interest period of 1-month, 2-months, 3-months or 6-months, plus 2.00%. Interest on amounts outstanding is payable quarterly. The Credit Agreement requires the Company to comply with certain covenants, including, among others, ratios that relate funded debt to both total capitalization and earnings before interest, taxes, depreciation and amortization, as well as the maintenance of minimum levels of tangible net worth. The Company must also comply with limitations on capital expenditures, certain payments, additional debt obligations, equity repurchases and certain redemptions, as well as minimum risk-based capital levels. Upon the occurrence of an event of default, Wells Fargo may terminate the Credit Agreement and declare all amounts outstanding due and payable in full. During the nine month period ended September 30, 2010, there was no balance outstanding under this Credit Agreement and the Company was in compliance with all terms of the Credit Agreement. The termination date of this Credit Agreement is June 30, 2011. The Company expects that it would seek to extend or renew the Credit Agreement on or prior to expiration, although no assurances can be provided that any extension or replacement would be available to the Company on acceptable terms, or at all.

The Company has two statutory trusts which exist for the exclusive purpose of issuing trust preferred securities representing undivided beneficial interests in the assets of the trusts and investing the gross proceeds of the trust preferred securities in junior subordinated deferrable interest debentures (“Junior Subordinated Debentures”). The outstanding $41.2 million of Junior Subordinated Debentures have a maturity of thirty years from their original date of issuance, are callable, in whole or in part, only at the option of the Company, five years after their respective dates of issue and quarterly thereafter, and have an interest rate of three-month LIBOR plus an applicable margin. The margin ranges from 4.00% to 4.10%. At September 30, 2010, the effective interest rate was 4.40%. The obligations of the Company with respect to the issuances of the trust preferred securities represent a full and unconditional guarantee by the Parent of each trust’s obligations with respect to the trust preferred securities. Subject to certain exceptions and limitations, the Company may elect from time to time to defer Junior Subordinated Debenture interest payments, which would result in a deferral of distribution payments on the related trust preferred securities. The Company has not made such an election.

During 2006, the Company entered into a zero cost interest rate collar with Wells Fargo to hedge future interest payments on a portion of the Junior Subordinated Debentures. The notional amount of the collar was $18.0 million with an effective date of March 6, 2006. The collar has a LIBOR floor rate of 4.77% and a LIBOR cap rate of 5.85% and adjusts quarterly on the 4th of each March, June, September and December through termination on March 4, 2013. The Company began making payments to Wells Fargo under the zero cost interest rate collar on June 4, 2008. As a result of interest rates remaining below the LIBOR floor rate of 4.77%, these payments to Wells Fargo under the zero cost interest rate collar have continued through September 30, 2010. While the Company may be exposed to counterparty risk should Wells Fargo fail to perform, based on the current level of interest rates, and coupled with the current macroeconomic outlook, the Company believes that its current exposure to nonperformance risks is minimal.

The Company intends to pay its obligations under the Credit Agreement, if any, and the Junior Subordinated Debentures using existing cash balances, dividend and tax sharing payments from the operating subsidiaries, or from potential future financing arrangements.

At September 30, 2010, the Company had 70,000 shares of Series D Preferred Stock ("Series D Preferred Stock") outstanding. All of the shares of Series D Preferred Stock are held by an affiliate of the Company's Chairman Emeritus. The outstanding shares of Series D Preferred Stock have a stated value of $100 per share; accrue annual dividends at a rate of $7.25 per share (payable in cash or shares of the Company's common stock at the option of the board of directors of the Company) and are cumulative. In certain circumstances, the shares of the Series D Preferred Stock may be convertible into an aggregate of approximately 1,754,000 shares of the Company's common stock, subject to certain adjustments and provided that such adjustments do not result in the Company issuing more than approximately 2,703,000 shares of common stock without obtaining prior shareholder approval; and are redeemable solely at the Company's option. The Series D Preferred Stock is not currently convertible. At September 30, 2010, the Company had accrued, but unpaid, dividends on the Series D Preferred Stock totaling $0.4 million.

Table of Contents

Net cash provided by operating activities was $0.3 million in the nine month period ended September 30, 2010, compared to net cash used in operating activities of $3.3 million in the nine month period ended September 30, 2009. Cash and short-term investments increased from $20.1 million at December 31, 2009 to $64.9 million at September 30, 2010. The increase in cash and short-term investments during the nine month period ended September 30, 2010 was primarily due to a large number of called securities exceeding investment purchases. During the nine month period ended September 30, 2009, the Company distributed accumulated benefits of $2.8 million resulting from the termination of its SERP and paid a $1.8 million final settlement to Columbia Mutual Insurance Company in connection with the 2008 sale of its regional property and casualty operations.

The Company believes that the dividends, fees, and tax-sharing payments it receives from its subsidiaries and, if needed, additional borrowings from financial institutions, will enable the Company to meet its liquidity requirements for the foreseeable future. Management is not aware of any current recommendations by regulatory authorities, which, if implemented, would have a material adverse effect on the Company's liquidity, capital resources or operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

As a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and in Item 10(f)(1) of Regulation S-K, we have elected to comply with certain scaled disclosure reporting obligations, and therefore are not required to provide the information required by this Item.

Item 4T. Controls and Procedures

An evaluation was performed under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act). Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report. We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities and Exchange Act of 1934 (the “Exchange Act”) reports is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management necessarily applies its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding management’s control objectives. The Company’s management, including the Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures can prevent all possible errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. There are inherent limitations in all control systems, including the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the individual acts of one or more persons. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and, while our disclosure controls and procedures are designed to be effective under circumstances where they should reasonably be expected to operate effectively, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in any control system, misstatements due to possible errors or fraud may occur and may not be detected.

There have been no changes in our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

This report contains and references certain information that constitutes forward-looking statements as that term is defined in the federal securities laws. Those statements, to the extent they are not historical facts, should be considered forward-looking statements, and are subject to various risks and uncertainties. Such forward-looking statements are made based upon management's current assessments of various risks and uncertainties, as well as assumptions made in accordance with the "safe harbor" provisions of the federal securities laws. The Company's actual results could differ materially from the results anticipated in these forward-looking statements as a result of such risks and uncertainties, including those identified in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009, subsequent quarterly reports on Form 10-Q and the other filings made by the Company from time to time with the Securities and Exchange Commission.

PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On May 2, 1995, the Board of Directors of the Company approved an initial plan that allowed for the repurchase of shares of the Company's common stock (the "Repurchase Plan"). As amended since its original adoption, the Repurchase Plan currently allows for repurchases of up to an aggregate of 2.0 million shares of the Company's common stock on the open market or in privately negotiated transactions, as determined by an authorized officer of the Company. Such purchases can be made from time to time in accordance with applicable securities laws and other requirements.

Other than pursuant to the Repurchase Plan, no purchases of common stock of the Company were made by or on behalf of the Company during the periods described below.

The table below sets forth information regarding repurchases by the Company of shares of its common stock on a monthly basis during the three month period ended September 30, 2010.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
July 1 – July 31, 2010	-	$-	-	462,995
August 1 – August 31, 2010	1,950	1.38	1,950	461,045
September 1 – September 30, 2010	5,789	1.68	5,789	455,256
Total	7,739	$1.61	7,739	

Item 6. Exhibits

31.1 – Certification of the Principal Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 – Certification of the Principal Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 – Certifications pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
