The shareholder report you are reading right now is just the beginning of the story. Online at **[dremanclaymore.com](http://dremanclaymore.com)**, you will find:

*Daily, weekly and monthly data on share prices, distributions, dividends and more*

*Monthly portfolio overviews and performance analyses*

*Announcements, press releases and special notices*

*Fund and advisor contact information*

Dreman Value Management and Claymore Securities are constantly updating and expanding shareholder information services on the Fund's website, in an ongoing effort to provide you with the most current information about how your Fund's assets are managed, and the results of our efforts. It is just one more small way we are working to keep you better informed about your investment in the Fund.

DCS | Dreman/Claymore Dividend & Income Fund

*David N. Dreman*

Dear **Shareholder** |

We are pleased to report that Dreman/Claymore Dividend & Income Fund ( DCS ) posted strong performance during the period. The Fund outperformed the Standard & Poor's 500 Index ( S&P 500 ), which is typically considered a proxy for the U.S. stock market. As you may know, the Fund's investment objective is to construct and manage a portfolio of high-quality investments which provide a high level of current income, with a secondary objective of capital appreciation, while taking advantage of the favorable tax rates on dividend income. In keeping with Dreman Value Management's contrarian value approach to investing, the Fund's portfolio represents what we believe to be superior companies that are trading at extremely attractive valuations relative to the market (S&P 500). Our contrarian philosophy served shareholders well this period providing a net asset value ( NAV ) return far above the return of the S&P 500.

On a NAV basis, the Fund returned 9.91% vs. 3.28% by the S&P 500 for the semiannual fiscal period ended April 30, 2005. This represents a change in net asset value from \$18.89 at the start of the period to \$20.12 at the close of the six-month period plus reinvestment of dividends. The Fund's market price trailed these returns, posting a gain of 6.61%, which reflects a market price of \$18.42 at the close of the period vs. \$17.88 on October 31, 2004.

This discount from NAV highlights the fact that most closed-end funds have fallen out of favor with investors recently. However, we feel that this discount represents an opportunity as common shares of the Fund are now available in the market at prices below the value of the securities in the underlying portfolio. Shareholders have the opportunity to reinvest their dividends from the Fund through the Dividend Reinvestment Plan ( DRIP ) that is described in detail on page 18 of this report.

When shares trade at a discount to NAV, the DRIP takes advantage of the discount by reinvesting the quarterly dividend distribution in common shares of the Fund purchased in the market at a price less than NAV. Conversely, when the market price of the Fund's common shares is at a premium above NAV, the DRIP reinvests participants' dividends in newly-issued common shares at NAV, subject to an IRS limitation that the purchase price can not be more than 5% below the market price per share. The DRIP provides a low-cost means to accumulate additional shares and to enjoy the benefits of compounding returns over time.

On May 31, 2005, the Fund made a quarterly distribution to shareholders of record on May 13, 2005 in the amount of \$0.325 per share. That distribution consisted of \$0.208 per share of ordinary income and \$0.117 per share of return or principal.

DCS | Dreman/Claymore Dividend & Income Fund | **Dear Shareholder** continued

The Fund adopted a managed distribution policy such that the quarterly distributions to shareholders would consist of net investment income and net realized gains, if any. In order to include realized long-term capital gains as a component of these quarterly distributions, exemptive relief is required from the Securities and Exchange Commission because the SEC only allows for effectively one long-term capital gain distribution per year. The Fund's request for such relief is still pending SEC approval and as such the Fund cannot include any realized long-term capital gains as a component of its distributions until approval is received. The Fund currently does not anticipate that any of the distributions paid in 2005 will be classified as return of capital for tax purposes. The final determination of the source of the 2005 distributions will be made after the end of the Fund's fiscal year (October 31, 2005) and will be reported to you in January 2006 on Form 1099-DIV.

We provide a detailed discussion of the Fund's performance over this fiscal period in the Questions & Answers section on page 5 of the report. You'll find information on the overall market environment, a discussion of which sectors contributed and detracted from the Fund's performance, as well as a summary of our contrarian value investment philosophy.

We thank you for your continued investment in the Fund and we are honored that you have chosen Dreman/Claymore Dividend & Income Fund as part of your investment portfolio. For the most up-to-date information on your investment, please visit the Fund's website at [www.dremanclaymore.com](http://www.dremanclaymore.com).

Sincerely,

/s/ David N. Dreman

DCS | Dreman/Claymore Dividend & Income Fund

## Questions & Answers |

*Dreman/Claymore Dividend & Income Fund (DCS) is managed by David N. Dreman, Founder, Chairman and Chief Investment Officer of Dreman Value Management LLC. In the following interview, Dreman shares his thoughts on the market and discusses how market events impacted the Fund's performance in the six months ended April 30, 2005.*

### **Will you provide an overview of the market environment?**

In the six months ended April 30, 2005, the equity market was fairly volatile. In contrast, the bond market was surprisingly stable given that the Federal Reserve Board increased short-term interest rates during the period. Typically when short-term rates rise, long-term rates follow. That was not the case this period. The yield on the 30-Year U.S. Treasury actually declined from 4.837% on November 1, 2004 to 4.514% on April 30, 2005.

Although volatile, stocks offered reasonable returns for the full period. The Standard & Poor's 500 Index returned 3.28% for the six months ended April 30, 2005. Much of that gain however was achieved in November and December. The first four months of 2005 were actually quite tepid for stocks with the market selling off due to concerns that the Fed's interest rate tightening might slow economic growth. At the same time, inflation worries heated up as well fueled by the high price of oil. By the end of the period, the stock market was fairly range-bound trading up and down as nervous investors tried to determine its ultimate direction.

### **How did the Fund perform given this backdrop?**

The Fund posted strong returns in the period. On a net asset value (NAV) basis, the Fund posted a gain of 9.91%. The Fund was also up on a market value basis, with a gain of 6.61%. We're pleased with this performance especially the NAV performance, which is how we measure our success as managers. And, while we believe the market value of the Fund should reflect the Fund's NAV, we know it rarely does. However, the positive market performance this period was especially heartening given the difficult environment for closed-end funds overall. We've watched many funds with positive net asset value returns suffer losses on a market value basis. The market value, of course, is not anything that we as managers are able to control.

### **Was it difficult to meet income distribution requirements as long-term rates fell?**

The Fund seeks to pay out 6.5% in distributions annually based on the Fund's initial \$20 offering price. We seek qualified income sources those taxed at a lower rate than ordinary income to provide a large portion of this payout. When rates decline, finding that income becomes more challenging. However, the Fund is not reliant solely upon traditional fixed-income investments to generate its income. We use utility stocks, preferred stocks, real estate investment trusts, high-yield bonds and Treasuries among other types of securities to generate income. We can also place hedges on the Fund's income securities to lock in interest income no matter which way rates move. The risk of using a hedge is that rates might decline, which would cause the prices of the bonds to rise. We may have missed some upside appreciation potential through our use of hedging, but we rely on our equity portfolio for the lion's share of the Fund's growth potential.

**Please tell us more about the securities you choose to generate income for the Fund.**

We have a sizeable position in preferred stocks, which have been great income producers for the Fund. We hold two types of preferred stocks: traditional preferred securities issued by U.S. corporations and Yankee Tier One preferred stocks which are dollar-denominated securities issued by European banks within the U.S. Both types of securities offer attractive yields and are given the favorable 15% U.S. federal tax rate. In some cases we are able to buy these securities when they are trading at discounts to their stated face value. When they are ultimately called away from us by the issuer, the Fund receives the face value of the security and has received the favorable income through the life of its ownership. That was the case this period with the preferred stock of El Paso Corporation, an oil and gas pipeline company.

Utility stocks have also provided solid income for the Fund. As of April 30, utilities represented approximately 11.7% of the Fund's long-term investments. These stocks typically pay attractive yields. While we buy these stocks for their income potential, they appreciated greatly in the period as interest rates declined. Some of the Fund's best performers included Consolidated Edison (2.1% of long-term investments), Ameren (2.8% of long-term investments) and Progress Energy (1.4% of long-term investments).

**Common stocks represent the core of the Fund's holdings. Will you discuss your stock selection process?**

We choose stocks based on our contrarian value philosophy that is based on our contention that consensus opinion, especially when it comes to investing, is often wrong. We seek companies that we believe are financially sound and that have, for one reason or another, fallen out of favor with the investing public. We look for stocks that we believe are trading below their intrinsic values, with prices that are low relative to their earnings (P/E – the most common measure of how expensive a stock is). We also consider the stock's book value (P/B) and cash flow (P/CF). Typically, these types of companies provide potential for above-market returns over time. However, there is no guarantee that the perceived intrinsic value will be realized.<sup>1</sup>

We base our stock selection solely on fundamental, bottom-up analysis, a process of evaluation that takes into account the individual merits of each stock. Therefore, we do not choose stocks based on industry sector or the macroeconomic environment. Industry sector weightings are a result of individual stock selection.

DCS | Dreman/Claymore Dividend & Income Fund | **Questions & Answers** continued

### **Which sectors or securities helped performance?**

Many of the Fund's equity sectors posted strong returns. Three areas are worth noting.

**Energy.** The energy sector was the stand-out performer as oil and gas prices remained near historic highs. The Fund held exposure to energy in both common and preferred stocks. Its large integrated oil stocks – Conoco Philips (2.7% of long-term investments) and ChevronTexaco (2.1% of long-term investments) made significant price moves. Exploration and production companies such as Devon Energy (1.1% of long-term investments) and Kerr McGee (1.2% of long-term investments) also performed well. In addition, we had exposure to energy names through our holdings of preferred stocks and royalty trusts that we added primarily in pursuit of income, but that also appreciated with the overall energy sector. Royalty trusts are investments offered by commodities producers, in this case oil and gas producers. When you invest in royalty trust units, the investment principal is used to meet the operating expenses of the issuing companies. Once the trust meets the operating expenses, practically all the remaining cash is passed on to investors and given the attractive 15% federal tax treatment.

**Tobacco.** The Fund's tobacco stocks were also strong performers due to a toned-down litigation environment. Additionally, investors seem to be optimistic that cash flows from the big tobacco companies could support the current attractive yields offered on these stocks. Altria Group (12.0% of long-term investments) was the Fund's largest position and also one of the strongest performers in the period. Carolina Group (3.4% of long-term investments) and Reynolds America (3.3% of long-term investments) also posted solid gains and delivered attractive yields.

**Health care.** The Fund's health care stocks supported returns as well. There was a rebound in pharmaceutical stocks, which had languished over the last 18 months due to concerns of dwindling pipelines of new products and litigation fears associated with the removal of some drugs from pharmacy shelves. Merck's (2.3% of long-term investments) share price fell dramatically in late 2004 after pulling its blockbuster arthritis drug, Vioxx, from the shelves. Believing the stock was oversold, we added to our position on the weakness. During the last three months of the period the stock began to rebound. Bristol-Myers Squibb Co. (2.9% of long-term investments) rebounded as well with the overall drug industry. Pharmacy benefit manager, Medco Health Solutions (0.3% of long-term investments) also had a strong run in the period on the heels of a well-received acquisition and new contracts with large health management organizations.

### **Which sectors or securities held back performance?**

Our investment in financial stocks was by far the worst performing area of the Fund.

Mortgage provider Fannie Mae (7.6% of long-term investments) declined after the company was charged with violating accounting rules and misrepresenting its earnings. As a result, Fannie Mae restated earnings, its Chief Executive Officer retired and its Chief Financial Officer resigned. The stock further weakened as discussions about regulatory oversight for Fannie Mae and Freddie Mac (5.0% of long-term investments), a similarly-structured mortgage provider, gained more media coverage.

No strangers to controversy, we intend to maintain the Fund's positions in both Fannie Mae and Freddie Mac despite their cost to the Fund's short-term performance. We believe both holdings offer shareholders good value, with low relative P/E ratios and strong earnings growth potential. Further, it is our opinion that Fannie Mae and Freddie Mac are poised to benefit from the companies' aggressive management of

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

interest rate risk, which could enable the firms to increase their mortgage portfolio holdings and grow earnings.

### **Does the Fund employ leverage?**

DCS, like many closed-end funds, utilizes leverage as part of its investment strategy. The purpose of leverage is to fund the purchase of additional securities that provide increased income and potentially greater appreciation potential to shareholders than could be achieved from an unleveraged portfolio. In executing this strategy, the Fund issued Auction Market Preferred Shares ( AMPS ). As long as the cost of the AMPS is lower than the yields on our investments, the AMPS should enhance the Fund's net interest income.

Of course, leverage results in greater NAV volatility and entails more downside risk than an unleveraged portfolio. The use of leverage also makes the Fund more vulnerable to rising interest rates. During the period, rising short-term interest rates increased the Fund's cost of leverage. While our cost of leverage increased, it still added overall value. We will continue to employ a leveraged strategy as long as there is a benefit to doing so.

---

<sup>1</sup> P/E is equal to a stock's market capitalization divided by its after-tax earnings over the most recent 12-month period. P/B is equal to a stock's market capitalization divided by its book value. (This ratio compares the market's valuation of a company to the value of that company as indicated on its financial statements.) P/CF is equal to a stock's capitalization divided by its cash flow for the latest fiscal year.

### **DCS Risks and Other Considerations**

There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund will fluctuate with the value of the underlying securities. Historically, closed-end funds often trade at a discount to their net asset value.

The Fund's prospectus offers a more thorough discussion of the risks and considerations associated with an investment in the Fund. Such risks and considerations include, but are not limited to: No Operating History; Hedging Risk; Not a Complete Investment Program; Market Discount Risk; Equity Risk; Special Risks Related to Preferred Securities; Income Risk; Value Investing Risk; Fund Distribution Risk; Interest Rate Risk; Inflation Risk; Foreign Securities; Non-diversified Status; Industry Concentration Risk; Lower-Rated Securities; Financial Leverage; Management Risk; Dependence on Key Personnel; Anti-Takeover Provisions; Illiquid Securities; Common Stock Risk; Special Risks of Derivative Transactions and Geopolitical Risks. There can be no assurance that a percentage of dividends paid on common shares, if any, will consist of qualifying dividend income. Please read the prospectus carefully before you invest or send money.

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

Total investment return is calculated assuming a purchase of a common share at the beginning of the period and a sale on the last day of the period reported either at net asset value ( NAV ) or market price per share. Dividends and distributions are assumed to be reinvested at NAV for NAV returns or the prices obtained under the Fund's Dividend Reinvestment Plan for market value returns. Total investment return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized.

- (d) Annualized.
- (e) Managed assets is equal to net assets applicable to Common Shareholders plus outstanding leverage, such as the liquidation value of preferred shares.

*See notes to financial statements.*

SemiAnnual Report | April 30, 2005 | **13**

DCS | Dreman/Claymore Dividend & Income Fund

Notes to **Financial Statements** | **April 30, 2005** (unaudited)

**Note 1 Organization:**

Dreman/Claymore Dividend & Income Fund (the Fund) was organized as a Delaware statutory trust on October 20, 2003. The Fund is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended, and the Securities Act of 1933, as amended.

The Fund's primary investment objective is to provide a high level of current income, with a secondary object of capital appreciation. The Fund will pursue its investment objectives by investing its assets primarily in dividend-paying common and preferred stocks. There can be no assurance that the Fund will achieve its investment objectives. The Fund's investment objectives are considered fundamental and may not be changed without shareholder approval.

**Note 2 Accounting Policies:**

The preparation of the financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies consistently followed by the Fund.

**(a) Valuation of Investments**

Equity securities listed on an exchange are valued at the last reported sale price on the primary exchange on which they are traded. Equity securities traded on an exchange for which there are no transactions on a given day are valued at the mean of the closing bid and asked prices. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Equity securities not listed on a securities exchange or NASDAQ are valued at the mean of the closing bid and asked prices. Debt securities are valued by independent pricing services or dealers using the mean of the closing bid and asked prices for such securities or, if such prices are not available, at prices for securities of comparable maturity, quality and type. For those securities where quotations or prices are not available, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Futures contracts are valued using the settlement price established each day on the exchange on which they are traded. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

**(b) Investment Transactions and Investment Income**

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Dividend income is recorded net of applicable withholding taxes on the ex-dividend date and interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method.

### (c) Futures

A futures contract is an agreement to buy or sell a financial instrument at a particular price on a stipulated future date. Upon entering into a futures contract, the Fund is required to make an initial margin deposit established by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the counterparty an amount of cash equal to the daily fluctuation in the value of the contract. Such receipt or payment is known as the variation margin and is recorded by the Fund as unrealized appreciation or depreciation. The Fund bears the market risk that arises from the change in the value of these financial instruments.

During the period, the Fund sold futures contracts on US Treasury securities in an effort to hedge a portion of the fixed-income component of its portfolio against rising interest rates.

At April 30, 2005, the following futures contracts were outstanding:

<u>Short Contracts</u>	<u>Number of Contracts</u>	<u>Expiration Month</u>	<u>Original Value</u>	<u>Value at April 30, 2005</u>	<u>Unrealized Depreciation</u>
US Treasury Bonds (CBT)	2,889	June 2005	\$ 324,989,937	\$ 331,783,594	\$ (6,793,657)

### Note 3 Investment Advisory Agreement, Sub-Advisory Agreement and Other Agreements:

Pursuant to an Investment Advisory Agreement (the Agreement) between the Fund and Claymore Advisors, LLC (the Advisor), the Advisor will furnish offices, necessary facilities and equipment, provide administrative services, oversee the activities of the Fund's Investment Manager, provide personnel, including certain officers required for the Fund's administrative management and compensate all officers and trustees of the Fund who are its affiliates. As compensation for these services, the Fund will pay the Investment Advisor a fee, payable monthly, in an amount equal to 0.85% of the Fund's average managed assets (net assets plus any assets attributable to financial leverage).

The Advisor has entered into a Sub-Advisory Agreement with Dremman Value Management, LLC (the Investment Manager). Pursuant to the terms of this agreement, the Investment Manager, under the supervision of the Fund's Board of Trustees and the Advisor, will provide a continuous investment program for the Fund's portfolio; provide investment research and make and execute recommendations for the purchase and sale of securities; and provide certain facilities and personnel, including officers required for the Fund's administrative management and compensation of all officers and trustees of the Fund who are its affiliate. For these services, the Advisor has agreed to pay the Investment Manager an aggregate amount equal to 60% of the investment advisory fees paid to the Advisor by the Fund, net of any additional compensation payments to underwriters of the common share offering.

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

The Bank of New York ( BNY ) acts as the Fund's custodian, administrator and transfer agent. As custodian, BNY is responsible for the custody of the Fund's assets. As administrator, BNY is responsible for maintaining the books and records of the Fund's securities and cash. As transfer agent, BNY is responsible for performing transfer agency services for the Fund.

### Note 4 Federal Income Taxes:

The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. In addition, by distributing substantially all of its ordinary income and long-term capital gains, if any, during each calendar year, the Fund intends not to be subject to U.S. federal excise tax.

Information on the components of investments as of April 30, 2005 is as follows:

<u>Cost of Investments</u>	<u>Gross Unrealized Appreciation</u>	<u>Gross Unrealized Depreciation</u>	<u>Net unrealized Appreciation on Investments</u>
\$1,275,516,681	\$ 126,050,876	\$ (67,180,748)	\$ 58,870,128

DCS | Dreman/Claymore Dividend & Income Fund | Notes to Financial Statements (unaudited) continued

For the period ended October 31, 2004, the tax character of distributions paid to common and preferred shareholders as reflected in the statement of changes in net assets was as follows:

<u>Distributions paid from:</u>	<u>2004</u>
Ordinary income common shares	\$ 29,430,258
Ordinary income preferred shares	\$ 3,950,767
	<u>\$ 33,381,025</u>

For federal income tax purposes, at October 31, 2004, the Fund had a capital loss carryforward of \$9,346,252, which expires October 31, 2012. Capital loss carry forwards are available to offset future capital gains, if any.

**Note 5 Investments in Securities**

For the period ended April 30, 2005, the cost of purchases and proceeds from sales of investments, other than short-term securities, were \$88,763,217 and \$103,194,863, respectively.

**Note 6 Capital:**

**Common Shares**

The Fund has an unlimited amount of common shares, \$0.01 par value, authorized and issued 40,500,000 shares of common stock in its initial public offering. These shares were all issued at \$19.10 per share after deducting the sales load but before a reimbursement of expenses to the underwriters of \$0.00667 per share. In connection with the initial public offering of the Fund's common shares, the underwriters were granted an option to purchase additional common shares. On February 12, 2004, and March 16, 2004, the underwriters purchased, at a price of \$19.10 per common share (after deducting the sales load but before underwriters' expense reimbursement), 2,750,000 and 1,900,000 common shares, respectively, of the Fund pursuant to the over-allotment option.

Offering costs of \$1,806,000 or \$0.04 per share, in connection with the issuance of the common shares were borne by the Fund and charged to paid-in-capital. The Advisor reimbursed the Fund's organizational expenses totaling \$25,000.

Transactions in common shares were as follows:

Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

	<u>Six Months Ended</u> <u>April 30, 2005</u>	<u>Year Ended</u> <u>October 31, 2004</u>
Beginning Shares	45,399,424	5,240
Issuance of common shares		45,150,000
Shares issued through dividend reinvestment		244,184
Ending Shares	<u>45,399,424</u>	<u>45,399,424</u>

**Preferred Shares**

On February 12, 2004, the Fund's Board of Trustees authorized the issuance of preferred shares, in addition to the existing common shares, as part of the Fund's leverage strategy. Preferred shares issued by the Fund have seniority over the common shares. Offering costs associated with the issuance of preferred shares, totaling \$4,726,232, were borne by the common shareholders as a direct reduction to paid-in-capital.

On March 23, 2004, the Fund issued 3,400 shares of Preferred Shares Series M7, 3,400 shares of Preferred Shares Series T28, 3,400 shares of Preferred Shares Series W7, 3,400 shares of Preferred Shares Series TH28 and 3,400 shares of Preferred Shares Series F7 each with a net asset and liquidation value of \$25,000 per share plus accrued dividends. Dividends are accumulated daily at an annual rate set through auction procedures.

For the period ended April 30, 2005, the annualized dividend rates range from:

	<u>High</u>	<u>Low</u>	<u>At April 30, 2005</u>
Series M7	3.21%	1.85%	3.10%
Series T28	3.26%	1.93%	3.20%
Series W7	3.46%	1.86%	3.08%
Series TH28	3.19%	2.04%	3.19%
Series F7	3.25%	1.85%	3.08%

The Fund is subject to certain limitations and restrictions while Preferred Shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Fund from declaring any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of Preferred Shares at their liquidation value.

Preferred Shares, which are entitled to one vote per share, generally vote with the common stock but vote separately as a class to elect two Trustees and on any matters affecting the rights of the Preferred Shares.

Note 7 **Indemnifications:**

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would require future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote

### Note 8 **Subsequent Event:**

On May 2, 2005, the Board of trustees declared a quarterly dividend of \$0.325 per common share. This dividend was payable May 31, 2005 to shareholders of record on May 13, 2005.

At this time, it is estimated that \$0.117 per share of the May quarterly dividend is considered a return of principal. However for the 2005 calendar year, the fund does not anticipate that any of its distributions will be classified as return of capital for tax purposes. The final determination of the source of the 2005 distributions for tax purposes will be made after the end of the Fund's fiscal year and will be reported to shareholders in January 2006 on Form 1099-DIV.

DCS | Dreman/Claymore Dividend & Income Fund

Dividend Reinvestment **Plan** | (unaudited)

Unless the registered owner of common shares elects to receive cash by contacting the Plan Administrator, all dividends declared on common shares of the Fund will be automatically reinvested by the Bank of New York (the Plan Administrator), Administrator for shareholders in the Fund's Dividend Reinvestment Plan (the Plan), in additional common shares of the Fund. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional common shares of the Fund for you. If you wish for all dividends declared on your common shares of the Fund to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each common shareholder under the Plan in the same name in which such common shareholder's common shares are registered. Whenever the Fund declares a dividend or other distribution (together, a Dividend) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in common shares. The common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (Newly Issued Common Shares) or (ii) by purchase of outstanding common shares on the open market (Open-Market Purchases) on the New York Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commission per common share is equal to or greater than the net asset value per common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per common share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per common share on the payment date. If, on the payment date for any Dividend, the net asset value per common share is greater than the closing market value plus estimated brokerage commission, the Plan Administrator will invest the Dividend amount in common shares acquired on behalf of the participants in Open-Market Purchases.

If, before the Plan Administrator has completed its Open-Market Purchases, the market price per common share exceeds the net asset value per common share, the average per common share purchase price paid by the Plan Administrator may exceed the net asset value of the common shares, resulting in the acquisition of fewer common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at net asset value per common share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per common share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instruction of the participants.

There will be no brokerage charges with respect to common shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commission incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such Dividends.

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, The Bank of New York, 2 Hanson Place, Brooklyn, New York, 11217, Attention: Irina Krylov, Phone Number: (718) 315-4818

### **Privacy Principles of Dreman/Claymore Dividend & Income Fund for Shareholders**

The Fund is committed to maintaining the privacy of its shareholders and to safeguarding its non-public personal information. The following information is provided to help you understand what personal information the Fund collects, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, the Fund does not receive any non-public information relating to its shareholders, although certain non-public personal information of its shareholders may become available to the Fund. The Fund does not disclose any non-public personal information about its shareholders or former shareholders to anyone, except as permitted by law or as is necessary in order to service shareholder accounts (for example, to a transfer agent or third party administrator).

The Fund restricts access to non-public personal information about the shareholders to Claymore Advisors, LLC employees with a legitimate business need for the information. The Fund maintains physical, electronic and procedural safeguards designed to protect the non-public personal information of its shareholders.

### **Questions concerning your shares of Dreman/Claymore Dividend & Income Fund?**

If your shares are held in a Brokerage Account, contact your Broker.

If you have physical possession of your shares in certificate form, contact the Fund's Administrator, Custodian and Transfer Agent:

*The Bank of New York, 111 Sanders Creek Parkway, East Syracuse, NY 13057 (800) 701-8178*

This report is sent to shareholders of Dreman/Claymore Dividend & Income Fund for their information. It is not a Prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

A description of the Fund's proxy voting policies and procedures related to portfolio securities is available without charge, upon request, by calling the Fund at (800) 345-7999 or on the Securities & Exchange Commission's website at <http://www.sec.gov>.

Information regarding how the Fund voted proxies for portfolio securities, if applicable, during the most recent 12-month period ended June 30, is also available, without charge and upon request by calling the fund at (800) 345-7999 or by accessing the Fund's Form N-PX on the Commission's website at <http://www.sec.gov>.

## Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

The Fund files its complete schedule of portfolio holdings with the Securities & Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the SEC website at <http://www.sec.gov>. The Fund's Form N-Q may also be viewed and copied at the Commission's Public Reference Room in Washington D.C.; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330 or by visiting [www.claymore.com](http://www.claymore.com).

About the **Investment Manager**

### **Dreman Value Management, LLC**

Dreman Value Management, LLC is an independently-owned investment management firm that was founded by David N. Dreman in 1997, and its predecessor firms date back to 1977. As of September 30, 2004, the firm had over \$11.1 billion in assets under management, primarily across institutional accounts and various investment companies. Independently owned, the firm is a value-oriented contrarian equity manager and places its primary emphasis on common stocks with growing dividends, avoiding concept stocks without justifiable valuations.

### **Investment Philosophy**

Dreman Value Management is one of the pioneers of contrarian value investing. Our investment philosophy is based on a disciplined, low P/E approach to stock selection.

We invest in undervalued companies that exhibit strong fundamentals, above-market dividend yields and historic earnings growth, which our analysis indicates will persist.

Our strategy is to own strong, fundamentally sound companies and to avoid speculative stocks or potential bankruptcies.

We believe that the markets are not perfectly efficient and that, in particular, behavioral finance plays a considerable role in investor actions and overreactions and subsequently in stock price movements.

### **Investment Process**

Our research studies, numerous academic papers and our long-term performance record show that out-of-favor stocks (those with low P/E ratios) consistently and predictably outperform the market

Screen for stocks with below market P/E ratios.

Further refine candidates by applying additional value screens.

Fundamental analysis is applied to remaining candidates.

Edgar Filing: DREMAN CLAYMORE DIVIDEND & INCOME FUND - Form N-CSRS

Stocks that pass all the screens and analysis are recommended to the Investment Committee for approval
