	OPEN JOINT STOCK COMPANY <u>VIMPEL-COMMUNICATIONS</u> (Registrant)
Date: June 4, 2008	
	By: /s/ Alexander V. Izosimov Name: Alexander V. Izosimov Title: Chief Executive Officer and General Director

Moscow and New York (June 4, 2008) - Open Joint Stock Company Vimpel-Communications (VimpelCom or the Company) (NYSE: VIP), a leading provider of telecommunications services in Russia and the Commonwealth of Independent States (CIS) today announced its financial and operating results for the quarter ended March 31, 2008.

Financial and Operating Highlights

^{*} On April 16, 2008, VimpelCom s Board of Directors recommended a dividend of 270.01 rubles per ordinary share. Last year s dividends were approved at 166.88 rubles per ordinary share. Dividends per ADS was calculated only for information purposes given the Russian Central Bank exchange rate and the ratio of ADS to ordinary shares on the date of the respective Board recommendations. The actual amount in US\$ to be paid to the ADS-holders in case of the AGM approval will depend on the exchange rate around the payment date and any required withholding tax.

Commenting on today s announcement, Alexander Izosimov, Chief Executive Officer of VimpelCom, said, The first quarter of 2008 should be viewed as the beginning of a new era for VimpelCom. Completion of the Golden Telecom acquisition has opened an entirely new set of growth opportunities which, when realized, should further strengthen our position in the Russian telecom sector.

Meanwhile our mobile business continues to show strong financial results. We are growing revenues and OIBDA in virtually all of our markets, in spite of the negative impact of economic problems in Central Asia, particularly in Kazakhstan.

With an OIBDA margin above 50% and a revenue growth rate above 40%, VimpelCom remains a rare example of a large, fast growing and highly profitable business. The underlying strength of our core business coupled with new opportunities of being an integrated player should provide a robust platform for our future growth ambitions.

Changes in Definitions and Reported Data

Beginning with this quarterly report, we have made significant changes in the reporting structure in order to reflect the integration with Golden Telecom, which we began to consolidate into VimpelCom s accounts starting from March 1, 2008.

Adjusting to the new complexity of the business we now consolidate our revenues along four segments: two geographic segments (Russia and the CIS) and two business segments (Mobile and Fixed). Fixed-line operations in Armenia (representing \$36.2 million of revenue in the first quarter of 2008) are now reflected within the CIS fixed-line segment, while the results of Golden Telecom s mobile operations in Ukraine (representing \$0.5 million of revenue in March 2008) are now part of the mobile business segment in the CIS.

Due to the increasing integration between different parts of our business, we include inter-company transactions in the reported revenues of geographic and business segments, and indicate the amount of inter-company eliminations within and between the segments.

We discontinued providing registered subscriber base numbers, completely shifting to active base. We have also aligned our churn rate reporting to the three month active subscriber base, which we believe is the most meaningful way of reporting. Consequently, this shift caused a step-change in our reported subscriber market share.

Within sales, general and administrative costs (SG&A) we now provide an explicit breakdown between general and administrative costs (G&A) and sales and marketing costs (S&M). As sales and marketing costs include all of the relevant costs of subscriber acquisitions, retention and usage stimulation, we believe these measures provide more accurate information than subscriber acquisition costs. Previously part of our S&M costs was shown in G&A.

A country-by-country CAPEX breakdown can be found in Attachment D.

A detailed country-by-country breakdown of the main financial and operating data can be found in the file entitled FinancialOperatingQ12008.xls on our website at http://www.vimpelcom.com/news/qrep.wbp.

Key Consolidated Financial and Operating Results

CONSOLIDATED OPERATIONS (US\$, mln)	1Q 2008	1Q 2007	у-о-у	4Q 2007	q-o-q

Net income	616	280	120.0%	364	69.2%

Our Russian operations continue to show year-on-year revenue growth over 40% with a record-high OIBDA margin. In the first quarter our OIBDA in the Russian mobile segment reached \$959 million. This includes a \$43 million reversal of our stock-price based compensation plans accruals, resulting mainly from the decline in VimpelCom s ADS price in the first quarter of 2008. However, even excluding this effect, the OIBDA margin of the Russian mobile segment stayed close to 55%.

With the acquisition of Golden Telecom, a cornerstone of our integrated operator strategy, we assumed substantial debt and absorbed a lower-margin business. The acquisition dictated a more conservative approach to the Russian mobile market aimed at preserving our margins and maximizing cash-flow by restricting marketing expenses and maintaining stable pricing.

Reduced marketing activities in a seasonally weak quarter resulted in a slight decline in ARPU, and, as a result, in mobile revenue compared to the previous quarter. Evidently, this decline was more than offset by the addition of fixed-line revenue for March.

Golden Telecom s revenue in Russia for the entire first quarter was approximately 61% higher than a year ago, driven by very good development in all business lines.

Now that the Golden Telecom transaction and the initial part of the integration are behind us, we plan to step up marketing activities in order to protect our revenue market share on the Russian mobile market.

The growth in our net income was disproportionately higher than the growth in our OIBDA, primarily due to a foreign exchange gain of \$185 million. This foreign exchange gain resulted mainly from the revaluation of our US dollar-denominated loans.

^{*} Subscriber market share data presented here and in the following country tables are published by AC&M-Consulting. Starting from January 1, 2008 VimpelCom s subscriber market share is being reported solely on the basis of active subscribers, while previously it was based on registered subscribers. The drop in the reported market share in the first quarter is mainly caused by the change of reporting methodology.

Net income	-14	-3		4	

Our operations in the CIS countries continue to demonstrate strong financial performance, with revenue growth of more than 50% and OIBDA margin over 40%. The main growth contributors are Kazakhstan and Ukraine, which now includes the Ukrainian business of Golden Telecom. We are also pleased with the growth in Uzbekistan, signs of improvements in Armenia, and continued strong growth in our smaller markets.

However, our business dynamics were affected by economic problems in the Central Asian republics. In Kazakhstan, our largest market, the economy suffered from a liquidity crisis, while Tajikistan and Uzbekistan were seriously impacted by extremely cold weather and power outages.

In Armenia we started to see positive trends and an increase in the number of active subscribers. We introduced our Beeline brand on the local market and accelerated our marketing activities. Our focus will remain on building market share and expanding fixed-mobile convergence opportunities.

Net income losses in the first quarter were caused mainly by one-off factors, such as a \$16 million write-off of equipment in Armenia in the course of modernizing the network.

Recent Developments

On May 27, 2008, VimpelCom received the preliminary conclusion of the Russian Tax Inspectorate s review of VimpelCom s tax filings for the 2005 and 2006 financial years. According to this document, VimpelCom owes approximately \$54 million in additional taxes (excluding fines and penalties) for the respective years. Most of the claims are similar to the claims we received for previous financial years, and in the past we have been able to successfully reverse most of these claims in the Russian courts. On June 3, 2008, we submitted our preliminary objections to the Tax Inspectorate. We expect to receive a final tax claim in the near future and to appeal the final tax claim in the Russian courts to the extent that it is not reduced by our objections. We have not made any reserves for these tax claims, because we believe that the claims will ultimately be resolved in our favor.

The Company s management will discuss its first quarter results during a conference call and slide presentation on June 4, 2008 at 6:30 pm Moscow time (10:30 am ET in New York). The call and slide presentation may be accessed via webcast at the following URL address http://www.vimpelcom.com. The conference call replay will be available through June 13, 2008. The slide presentation webcast will also be available for download on VimpelCom s website http://www.vimpelcom.com.

The VimpelCom Group is a telecommunications operator, providing voice and data services, covered through a range of wireless, fixed and broadband technologies. The Group includes companies operating in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia, in territories with a total population of about 250 million. VimpelCom was the first Russian company to list its shares on the New York Stock Exchange (NYSE). VimpelCom s ADSs are listed on the NYSE under the symbol VIP .

This press release contains forward-looking statements, as the phrase is defined in Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements relate to the Company s strategic and development plans, including network development plans, developments in the telecommunications markets in which the Company operates, and the resolution of the tax claim for the financial years 2005 and 2006. These and other forward-looking statements are based on management s best assessment of the Company s strategic and financial position and of future market conditions and trends. These discussions involve risks and uncertainties. The actual outcome may differ materially from these statements as a result of unforeseen developments from competition, governmental regulation of the telecommunications industries in Russia and the CIS, general political uncertainties in Russia and the CIS and general economic developments in Russia and the CIS, continued volatility in the world economy, challenges to 3G and Far East tenders and/or litigation with third parties. The actual outcome may also differ materially if the Company is unable to obtain all necessary corporate approvals relating to its business (including approval of funding and specific transactions), if the Company is unable to successfully integrate newly-acquired businesses, including Golden Telecom, and other factors. As a result of such risks and uncertainties, there can be no assurance that the effects of competition or current or future changes in the political, economic and social environment or current or future regulation of the Russian and CIS telecommunications industries will not have a material adverse effect on the VimpelCom Group. Certain factors that could cause actual results to differ materially from those discussed in any forward-looking statements include the risks described in

the Company s Annual Report on Form 20-F for the year ended December 31, 2007 and other public filings made by the Company with the United States Securities and Exchange Commission, which risk factors are incorporated herein by reference. VimpelCom disclaims any obligation to update developments of these risk factors or to announce publicly any revision to any of the forward-looking statements contained in this release, or to make corrections to reflect future events or developments.

- Definitions and tables are attached

Attachment A: Definitions

Active mobile subscribers are those subscribers in the registered subscriber base who were a party to a revenue generating activity in the past three months and remain in the base at the end of the reported period. Such activities include all incoming and outgoing calls, subscriber fee accruals, debits related to service, outgoing SMS, MMS, data transmission and receipt sessions, but do not include incoming SMS and MMS sent by our Company or abandoned calls.

Each ADS represents 0.05 of one share of common stock. This ratio was established effective August 21, 2007.

ARPU (Monthly Average Revenue per User), a non-U.S. GAAP financial measure, is calculated by dividing the Company s service revenue during the relevant period, including roaming revenue and interconnect revenue, but excluding revenue from connection fees, sales of handsets and accessories and other non-service revenue, by the average number of the Company s active subscribers during the period and dividing by the number of months in that period. Reconciliation of ARPU to service revenues and connection fees, the most directly comparable U.S. GAAP financial measure, is presented below in the tables section. The Company believes that ARPU provides useful information to investors because it is an indicator of the performance of the Company s business operations and assists management in budgeting. The Company also believes that ARPU provides management with useful information concerning usage and acceptance of the Company s services. ARPU should not be viewed in isolation or an alternative to other figures reported under U.S. GAAP.

Broadband internet service subscribers are those subscribers in the registered subscriber base who were a party to a revenue generating activity in the past three months and remained in the base at the end of the reported period. Such activities include monthly internet access using FTTB, xDSL and WiFi technologies.

CIS Geographic Segment for the purpose of VimpelCom reporting includes our operations in the following countries: Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Armenia and Georgia.

Fixed-line subscriber is an authorized user of fixed-line communications services.

General and administrative costs (G&A) include salaries and outsourcing costs, including related social contributions required by Russian law; stock price-based compensation expenses; repair and maintenance expenses; rent, including lease payments for base station sites; utilities; other miscellaneous expenses, such as insurance, operating taxes, license fees, and accounting, audit and legal fees.

Market share of subscribers for each relevant area is calculated by dividing the estimated number of our subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan and Armenia, respectively, by the total estimated number of subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan and Armenia, respectively and is provided by AC&M-Consulting.

Mobile services are wireless voice and data transmission services excluding WiFi.

MOU (Monthly Average Minutes of Use per User) is calculated by dividing the total number of minutes of usage for incoming and outgoing calls during the relevant period (excluding guest roamers) by the average number of active subscribers during the period and dividing by the number of months in that period.

OIBDA is a non-U.S. GAAP financial measure. OIBDA, previously referred to as EBITDA by the Company, is defined as operating income before depreciation and amortization. The Company believes that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our business operations, including our ability to finance capital expenditures, acquisitions and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under U.S. GAAP, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculations are commonly used as bases for some investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. OIBDA should not be considered in isolation as an alternative to net income, operating income or any other measure of performance under U.S. GAAP. OIBDA does not include our need to replace our capital equipment over time. Reconciliation of OIBDA to operating income, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

OIBDA margin is OIBDA expressed as a percentage of total net operating revenues. Reconciliation of OIBDA margin to operating income as a percentage of total net operating revenues, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

Prepaid subscribers are those subscribers who pay for their services in advance.

Sales and marketing costs (S&M) include marketing, advertising and dealer commissions expenses.

Drive operations and investment efficiency
Drive operations and investment efficiency

Re-balance focus from speed to efficiency and enhance cost transparency as markets mature

Avoid headcount growth in mature operations and streamline corporate functions

Drive procurement excellence

Optimize capex decisions at a granular level and continuously improve marketing spend efficiency Build and sustain strong management capabilities Build and sustain strong management capabilities

Offer an open and transparent, meritocracy based environment

Use a global approach to hiring

Develop best-in-class individual development and coaching mechanisms

Ensure competitive, performance based compensation packages

Grow ARPUs through voice and data stimulation with stable pricing

Maintain active base share through specific central and local sales and loyalty programs

Explore consolidation opportunities

Strengthen business segment

Expand geographic presence in fixed-line
Extract maximum value
Extract maximum value
from the Russian business
from the Russian business

Focus on active subscribers growth

Replicate unified business platform developed in Russia

Leverage service portfolio implemented in Russia

Pursue acquisitions of mobile assets outside existing markets Grow business outside of

Grow business outside of Russia Russia

Build new digital service businesses, including TV, payment services, etc.

Explore new technologies and business models, including advertising-funded models Capture attractive Capture attractive opportunities in adjacent opportunities in adjacent business areas business areas

Aggressively roll-out both FTTB and 3G infrastructures

Cross-sell Internet access products to mobile subscribers

Optimize and up-sell portfolio of fixed and mobile Internet access products Develop the consumer Develop the consumer Internet access business Internet access business Strategy Going Forward

Definitions
Active
mobile

subscribers
are
those
subscribers
in
the
registered
subscriber
base
who
were
a
party
to
a maximum
revenue
generating activity in the past three months and remain in the base at the end of the reported period. Such activities include
all
incoming
and .
outgoing
calls,
subscriber
fee
accruals,
debits
related
to
service,
outgoing
SMS,
MMS,
data
transmission
and
receipt sessions, but do not include incoming SMS and MMS sent by our Company or abandoned calls.
ARPU
(Monthly Average Revenue per User), a non-U.S. GAAP financial measure, is calculated by dividing the Company s
service revenue during the relevant period, including roaming revenue and interconnect revenue, but excluding revenue from
connection fees, sales of handsets and accessories and other non-service revenue, by the average number of the Company s
active subscribers during the period and dividing by the number of months in that period. Reconciliation of ARPU to service
revenues and connection fees, the most directly comparable U.S. GAAP financial measure, is presented above in the tables
section. The Company believes that ARPU provides useful information to investors because it is an indicator of the
performance of the Company s business operations and assists management in budgeting. The Company also believes that
ARPU provides management with useful information concerning usage and acceptance of the Company's services. ARPU
should not be viewed in isolation or an alternative to other figures reported under U.S. GAAP.

Average quarterly FX rate

104

to US\$ for the **CIS** countries calculated as the sum of average exchange rates for each month within a quarter divided by three months Broadband internet service subscribers are those subscribers in the registered subscriber base who were party to revenue generating activity in the past three months and remained in the base at the end of the reported period. Such activities include monthly internet access using FTTB, **xDSL** and WiFi technologies Free cash flow

is calculated as operating cash flow minus accrued capital expenditures before acquisitions FTTB

Fiber-to-the-building broadband

internet

technology

Market share

of subscribers for each country is calculated by dividing the estimated number of the subscribers of a particular company by the total estimated number of subscribers in that country. Market share data is published by consulting agencies specializing in the telecommunications industry in Russia.

Mobile

subscriber

is

an

authorized

user

of

cellular

services,

using

one

SIM

card

(GSM/3G)

with

one

or

several

selective

numbers or one handset (DAMPS/CDMA) with one selective number. The number of subscribers includes employees using cellular services and excludes guest roamers and users of test SIM cards or handsets.

MOU

(Monthly Average Minutes of Use per User) is calculated by dividing the total number of minutes of usage for incoming and outgoing calls during the relevant period (excluding guest roamers) by the average number of active subscribers during the period and dividing by the number of months in that period.

Net deb

is calculated as a total interest-bearing debt minus cash and cash equivalents
