Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. NATURE OF BUSINESS AND CONTINUANCE OF OPERATIONS

Geovic Mining Corp. (the Company) is incorporated under the laws of the state of Delaware. The Company owns 100% of the shares of Geovic, Ltd. (Geovic), a company that has been in the mining exploratory stage since its inception on November 16, 1994.

Geovic is engaged in the business of exploring for cobalt, nickel, manganese and related minerals through its majority-owned (60%) subsidiary, Geovic Cameroon, PLC (GeoCam), a financially dependent public limited company duly organized and incorporated under the laws of the Republic of Cameroon. The Company is an exploration stage company in the process of planning to develop its mineral properties through its subsidiaries.

2. BASIS OF PRESENTATION

The accompanying interim unaudited consolidated financial statements of the Company and its subsidiaries, all of which are wholly owned subsidiaries except for GeoCam, have been prepared in accordance with generally accepted accounting principles in the United States (GAAP) for interim financial statements and accordingly do not include all disclosures required for annual financial statements. References to \$ are to U.S. currency; references to Cdn\$ are to Canadian currency; and references to CFA Franc are to Cameroonian currency.

With the exception of new accounting pronouncements discussed in note 3, these interim consolidated financial statements follow the same significant accounting policies and methods of application as the Company's audited annual consolidated financial statements as included in the Company's annual report in Form 10K for the year ended December 31, 2007 (the Annual Financial Statements). The interim consolidated financial statements should be read in conjunction with the Annual Financial Statements. The year-end balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP.

In the opinion of management, all adjustments (including normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for these interim periods are not necessarily indicative of the result that may be expected for the full year ending December 31, 2008.

3. RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

In February 2007, the FASB adopted FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (FAS 159). FAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value, with the objective of improving financial reporting by mitigating volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The provisions of FAS 159 are effective for the Company's fiscal year beginning January 1, 2008. The adoption of FAS 159 did not have a material impact on the Company's consolidated financial results.

In September 2006, the FASB adopted FASB Statement No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions of FAS 157 are effective for the Company's fiscal year beginning January 1, 2008. The adoption of FAS 157 did not have a material impact on the Company's consolidated financial results.

Table of Contents**Geovic Mining Corp.**

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**4. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

In March 2008, the FASB issued Statement of Financial Accounting Standards (FAS) No. 161, *Disclosure about Derivative Instruments and Hedging Activities* (FAS 161), an amendment of FAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. FAS 161 requires increased qualitative, quantitative and credit risk disclosures, but does not change the scope or accounting requirements of FASB No. 133. FAS No. 161 is effective for financial statements issued after November 15, 2008. The Company is evaluating the potential impact, if any, of the adoption of FAS No. 161 on the Company's consolidated financial statements.

In December 2007, the FASB issued FASB Statement No. 141(R), *Business Combinations* (FAS 141(R)), which amends FAS No. 141, and provides revised guidance for recognizing and measuring identifiable assets and goodwill acquired, liabilities assumed, and any noncontrolling interest in the acquiree. It also provides disclosure requirements to enable users of the financial statements to evaluate the nature and financial effects of the business combination. FAS No. 141(R) is effective for the Company's fiscal year beginning January 1, 2009 and is to be applied prospectively. The Company is currently evaluating the potential impact of adopting this statement on the Company's consolidated financial position, results of operations or cash flows.

In December 2007, the FASB issued FASB Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51* (FAS 160) which establishes accounting and reporting standards pertaining to (i) ownership interests in subsidiaries held by parties other than the parent, (ii) the amount of net income attributable to the parent and to the noncontrolling interest, (iii) changes in a parent's ownership interest, and (iv) the valuation of any retained noncontrolling equity investment when a subsidiary is deconsolidated. FAS 160 also requires that the reporting company clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. FAS 160 is effective for the Company's fiscal year beginning January 1, 2009. The Company is currently evaluating the potential impact of adopting this statement on the Company's consolidated financial position, results of operations or cash flows.

5. EXPLORATION COSTS

The following is a summary of the exploration costs incurred by the Company through September 30, 2008 for the periods presented (in thousands).

	Three Months Ended		Nine Months Ended		Unaudited Period

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**6. PROPERTY, PLANT AND EQUIPMENT**

As of the end of the period, property, plant and equipment consisted of the following (in thousands):

	September 30, 2008	December 31, 2007
Machinery and equipment	\$ 320	\$ 420
Vehicles	734	452
Furniture and equipment	635	360
	1,689	1,232
Less accumulated depreciation	(382)	(568)
	\$ 1,307	\$ 664

7. MINERAL PROPERTY COSTS

During the three and nine months ended September 30, 2008, the Company, through its wholly-owned subsidiary Geovic Energy Corp. entered into mineral lease agreements with a number of parties in Colorado/Wyoming for cash consideration of \$49 thousand and \$0.4 million, respectively. These lease agreements give the Company the right to explore for, develop and produce uranium and other minerals on these properties for periods specified in the agreements which under certain circumstances can be extended.

The lease agreements have an initial term of up to 10 years and are generally fully paid in advance. The Company would be required to make royalty payments if it produces minerals from the properties. The mining claims are renewable annually in accordance with United States mining laws. See note 5 for additional expenses associated with these projects.

8. STOCK-BASED COMPENSATION**Stock Options**

The following table summarizes the Company's stock option activity and related information for the nine months ended September 30, 2008:

	Number of Options	Number Outstanding	Options Outstanding Weighted-Average Exercise Price per Share
Available and outstanding at December 31, 2007	4,031,114	13,567,908	\$ 0.61

(Cdn\$ 1.30) 1.280	20,000	10	1.280
Outstanding	13,705,678	7	\$ 0.790
Exercisable	11,701,628	7	\$ 0.600

On January 3, 2008, and April 1, 2008, the Company granted options in accordance with the Company's Stock Option Plan to purchase an aggregate of 1,500,000 shares to two employee directors, four outside directors and six employees of the Company or its subsidiaries and 40,000 shares to one employee, respectively, at exercise prices of Cdn\$1.68 and Cdn\$1.24, respectively, per share. In June 2008, the Company granted options to purchase 170,000 shares to the new General Manager of GeoCam, one outside director, and a new employee of the Company at exercise prices of Cdn\$1.39, Cdn\$1.33, and Cdn\$1.30, respectively. In August 2008, options to purchase up to 50,000 shares were issued to a consultant at Cdn\$1.27. In September 2008, options to purchase up to 300,000 shares were issued to a new corporate officer and a new outside director, exercisable at Cdn\$1.04 and Cdn\$0.80, respectively. The options granted in 2008 are exercisable for a term of ten years and subject to a two year vesting schedule with 40% of the options vesting on the date of grant, a 30% vesting on the first anniversary of the grant and 30% vesting on the second anniversary of the grant. All of the options' exercise prices are equal to the reported closing price for the Company's common stock on the day before the grant, as reported by the Toronto Stock Exchange or at a higher price as may be approved by the Board.

Table of Contents**Geovic Mining Corp.**

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**8. STOCK-BASED COMPENSATION (CONT D.)****Restricted Stock Awards**

The Company granted restricted stock of 5,595 shares to an employee during the fourth quarter of 2006 subject to certain vesting requirements. The restricted stock vested during the nine months ended September 30, 2008 and the Company recorded \$14 thousand of stock-based compensation expense.

9. STOCKHOLDERS EQUITY

The following table summarizes information concerning the changes in stockholders equity for the nine months ended September 30, 2008:

	Common Stock		Stock Purchase	Additional	Deficit	Total
	Shares	Amount	Warrants	paid-in capital		
Balance, December 31, 2007	101,290,412	\$ 10	\$ 15,748	\$ 104,000	\$ (40,494)	\$ 79,264
Stock options and warrants exercised	1,622,274			180		180
Stock-based compensation				2,110		2,110
Net loss for period					(15,330)	(15,330)
Balance, September 30, 2008	102,912,686	\$ 10	\$ 15,748	\$ 106,290	\$ (55,824)	\$ 66,224

Public Offering

On March 6, 2007, the Company raised gross proceeds of Cdn\$54 million in a public offering through underwriters of 21.6 million units (including the over-allotment option exercised by the underwriters) at Cdn\$2.50 per unit. Each unit consisted of one common share of the Company and one-half of one common stock warrant of the Company. Each whole warrant entitles the holder to purchase one common share of the Company at a price of Cdn\$3.00 for a period of five years following closing of the offering. The net proceeds received by the Company after payment of the cash commission to the underwriters (equal to 6% of the gross proceeds of the offering) were Cdn\$50.76 million, equivalent to approximately \$43.09 million. From this amount the Company paid other expenses of the offering of approximately \$0.5 million.

On April 27, 2007, the Company issued and sold 8,750,000 units (the Units) of the Company at a price of Cdn\$4.00 per Unit (the Issue Price) for aggregate gross proceeds to the Company of Cdn\$35 million. Each Unit consisted of one common share and one-half of one common stock warrant (each whole warrant, a Warrant). Each Warrant entitles the holder thereof to purchase one common share at a price of Cdn\$5.00 for 5 years following the closing date. From the gross proceeds the Company paid a cash commission to the underwriters equal to 5% of the gross proceeds of the offering and paid other expenses of the offering of approximately Cdn\$0.2 million. The Company also granted to the underwriters an over-allotment option to purchase up to an additional 1,312,500 Units of the Company at the Issue Price which the underwriters were entitled to exercise for a period of up to 30 days following the closing date. The Company has issued and sold 834,200 Units to the underwriters for additional gross proceeds of Cdn\$3.3 million, representing additional net proceeds of Cdn\$3.2 million after payment of the cash commission to the underwriters (equal to 5% of the additional gross proceeds).

Table of Contents**Geovic Mining Corp.**

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**9. STOCKHOLDERS EQUITY (CONT D.)****Stock Warrants**

On June 18 and June 20, 2008, the Company issued 50,000 and 250,000 warrants, respectively, to two different consulting companies in lieu of cash compensation for services rendered. The terms of the June 18, 2008 warrants include an exercise price of Cdn\$1.26 and a vesting schedule of 50% upon grant and the balance after one year. These warrants expire June 19, 2011. The terms of the June 20, 2008 warrants include an exercise price of Cdn\$1.26 per share and a vesting schedule of 25% upon grant, and 25% each quarterly anniversary date thereafter through March 20, 2009. These warrants expire June 21, 2011. The Company recorded stock-based compensation expense of approximately \$23 thousand and \$93 thousand for the three and nine-month periods ended September 30, 2008, respectively. The exercise prices of the warrants are equal to the reported closing prices of the Company's common stock on the day before the grants, as reported by the Toronto Stock Exchange.

During the nine months ended September 30, 2007, the Company issued 10,800,000 stock warrants in connection with the financing dated March 6, 2007 and 4,792,100 stock warrants in connection with the financing dated April 27, 2007. The contract life of the warrants is five years. The bifurcated fair value of the stock warrants (\$13,093,286) is estimated at the date of grant using a Black-Scholes option pricing model with the following assumptions: expected dividend: 0%; risk-free rate: 4.5% to 4.7%; expected volatility: 73.2% to 75.7%; and expected life: 3 years.

The following table summarizes the Company's stock warrant activity and related information for the nine months ended September 30, 2008:

	Number Outstanding	Weighted-Average Exercise Price per Share
Warrants outstanding at December 31, 2007	21,034,419	\$ 3.21
Granted	300,000	1.21
Exercised	(7,834)	1.75
Expired	(258,948)	1.75
Warrants outstanding at September 30, 2008	21,067,637	\$ 3.27

10. MINORITY INTEREST

From the inception of the Cameroon project through December 31, 2006, Geovic advanced all operating expenditures on behalf of GeoCam and all such expenditures were consolidated in the accounts of the Company. On April 12, 2007, GeoCam stockholders approved a GeoCam capital increase for 2007 through the issuance of 650,000 new shares at 10 thousand CFA francs per share, or a total of 6.5 billion CFA francs (equivalent to approximately \$13.5 million). All of the new shares approved for issuance were purchased by or for the accounts of the stockholders of GeoCam, including Geovic, in their respective ownership interests prior to the capital increase. The share purchases were completed by May 12, 2007.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

10. MINORITY INTEREST (CONT D.)

On September 2, 2008, GeoCam stockholders approved a GeoCam capital increase for 2008 through the issuance of 3,034,000 new shares at 10 thousand CFA francs per share, or a total of 30.34 billion CFA francs (equivalent to approximately \$67.1 million), to be issued in multiple cash calls made by the GeoCam Board of Directors. The capital increase will satisfy GeoCam's 2008 budget and Geovic's pre-2007 capital advances made for GeoCam. The new shares approved for issuance are expected to be, purchased by or for the accounts of the stockholders of GeoCam, including Geovic, in their respective ownership interests prior to the capital increase.

The first cash call equivalent to approximately \$38.6 million covered the approximately \$23.1 million of pre-2007 capital advances made by Geovic, and in the subsequent cash calls equivalent to \$28.6 million Geovic will be responsible for 60.5% of the amounts called. The first cash call of 17.43 billion CFA francs (equivalent to approximately \$38.6 million) was completed September 29, 2008, and the subsequent cash calls totaling approximately 12.91 billion CFA francs (equivalent to approximately \$28.6 million) are expected to be completed later in 2008 (see note 14). In the first cash call Geovic received credit for approximately \$23.1 million of pre-2007 capital advances under the terms of the agreement among the GeoCam stockholders completed at the end of 2007, thereby receiving credit for approximately 10.45 billion CFA francs; in addition, Geovic paid cash of approximately 92 million CFA francs (equivalent to approximately \$0.2 million), a majority of which was required under the terms of Geovic's option to acquire William A. Buckovic's interest in GeoCam (see note 11[c]). Also, in the first cash call the other minority stockholders converted the 3 billion CFA francs (equivalent to approximately \$6.6 million) principal amount of the July 2008 loan to GeoCam and also paid cash of approximately 3.88 billion CFA francs (equivalent to approximately \$8.6 million), representing an aggregate investment by the other minority stockholders of approximately 6.9 billion CFA francs (equivalent to approximately \$15.2 million).

Geovic will be obligated to fund 60.5% of the subsequent 2008 cash calls which represents approximately 7.81 billion CFA francs in cash (equivalent to approximately \$17.3 million) (see note 14). As a result of the first cash call of the 2008 capital increase, GeoCam received funds that are being held by GeoCam in US\$ and CFA francs accounts in the Cameroon branch of a large international bank.

The minority interest balance of approximately \$10.0 million at September 30, 2008 represents the remaining funds on hand from the capital increases contributed by the minority stockholders as described above. The difference between the original amounts contributed and the balance at September 30, 2008 represents the minority stockholders' share of the actual expenditures from January 1, 2007 through September 30, 2008. Prior to 2007, no amounts were recognized for minority interest because there was no obligation for the minority stockholders to share these costs.

As of June 30, 2008, all of the minority stockholders' contributions from the 2007 capital increase, approximately \$5.1 million, had been expended. Therefore, any amount previously recorded on the balance sheet was reduced to zero at that date. In addition, the minority stockholders' share of expenses incurred during the six month period exceeded the remaining balance of the minority interest as of December 31, 2007. This amount, approximately \$1.9 million, was offset against the loss in the Company's consolidated statement of operations for the three and six month periods ended June 30, 2008. For the nine month period ended September 30, 2008 a portion of capital invested by the minority stockholders in the third quarter was utilized to offset the second quarter losses not previously absorbed, as well as the pro rata share of the third quarter losses totaling \$7.4 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

11. RELATED PARTY TRANSACTIONS

- [a] In June 2004, Geovic, Ltd., entered into an agreement with Mineral Services, LLC related to project development, technical, financing, and marketing services. Mineral Services, LLC is owned by a person who became a director of the Company on September 27, 2006. Total fees paid to Mineral Services, LLC under the agreement for the three month periods ending September 30, 2008 and 2007 were \$10 thousand and \$10 thousand, respectively, and for the nine month periods ending September 30, 2008 and 2007 were \$30 thousand and \$30 thousand, respectively.
- [b] On July 24, 2008, the Company entered into a Relocation Services Agreement with two unaffiliated entities which undertook the coordination and management of relocation of the CEO and Corporate Secretary to the Company's new headquarter offices in Denver, Colorado. Services to be provided include coordination and payment of moving expenses and listing and sales of residential real estate owned by transferring employees, including servicing of mortgage debt pending sale and payment of net equity in the residence (based on independent appraisals) to the transferring employee prior to sale and other incidental expenses, subject to reimbursement by the Company of all net expenses incurred and payment of fees to the service providers. Subsequent to the end of the third quarter, the Company reimbursed the service providers for amounts paid on behalf of the Company's CEO and Corporate Secretary (see note 14).
- [c] Geovic holds an option to acquire the 0.5% ownership interest in GeoCam held by William A. Buckovic, an officer and director of the Company and Geovic. Under the option agreement, Geovic is obligated to pay all GeoCam capital increases on behalf of Mr. Buckovic to maintain his ownership interest in GeoCam. During the quarter ended September 30, 2008, Geovic paid approximately \$0.2 million in the first cash call as required under the option agreement (see note 10).

12. COMMITMENTS AND CONTINGENCIES

- [a] During the year ended December 31, 2003, Geovic received a grant from the United States Trade and Development Agency (USTDA). The grant reimburses Geovic for 50% of the cost of a feasibility study for GeoCam's Cameroon mining project. The grant specifies that, if the project is successful, all grant reimbursement proceeds received by Geovic must be paid back to the USTDA. The proceeds would be paid back once project financing is acquired. If the project is unsuccessful, the reimbursement proceeds would be considered a grant and Geovic would not be required to pay back the USTDA. As of September 30, 2008, Geovic has received \$0.3 million in grant reimbursement proceeds from the USTDA. The Company has recorded a contingent liability for this amount as of September 30, 2008.
- [b] The Company is committed to future minimum rent and lease payments of \$0.3 million under operating lease agreements for office space in Grand Junction, Colorado, USA, and Yaoundé, Cameroon. In September 2008, the Company entered into a five-year lease for office space in Denver, Colorado for which the Company is obligated for future minimum lease payments of \$0.6 million.
- [c] On November 8, 2006, Geovic entered into a patent license agreement with Inco Limited ("Inco") with respect to certain technological processes and equipment related to processing nickel and cobalt. As partial consideration for the agreement, Geovic paid Inco an initial payment of \$20 thousand. Geovic agreed to pay Inco a royalty based on the net selling price of production, as defined, up to maximum of \$0.4 million during each 12 month period subject to a total maximum consideration (exclusive of the initial payment) equal to \$2 million.

Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

12. COMMITMENTS AND CONTINGENCIES (CONT D.)

[d] GeoCam received a letter from the Minister of Industry, Mines and Technological Development of the Republic of Cameroon on March 20, 2006 requesting payment of surface area taxes of approximately \$0.5 million (CFA240 million) and a penalty of the same amount for the period from 2003 to 2005. GeoCam has disputed this amount based on its interpretation of the Mining Convention signed on July 31, 2002 that GeoCam is only committed to pay this surface area tax once commercial exploitation begins. GeoCam has further disputed the amount of surface area subject to tax which reduces the estimated liability to \$0.4 million (CFA187.5 million).

GeoCam deposited with the Cameroon tax authority \$0.1 million (62.5 million CFA francs) on September 30, 2006 corresponding to the surface area tax for 2003. On November 30, 2006, GeoCam deposited with the Cameroon tax authority a further \$0.3 million (125 million CFA francs) corresponding to the surface area tax for 2004 and 2005. GeoCam deposited an additional \$0.1 million (62.5 million CFA francs) for the 2006 surface fee charges.

GeoCam believes, based on discussions with the litigation department of the Directorate of Taxation, that the litigation procedure whereby GeoCam contests the penalties related to the surface area will be a productive approach to resolve this matter. On January 17, 2007, GeoCam paid \$57 thousand (29.5 million CFA francs), representing approximately 10% of the total contested amount to be paid according to the provisions of the fiscal procedures in force in order to proceed with the litigation procedure.

13. CANADIAN GAAP RECONCILIATION

The Company prepares its financial statements in accordance with U.S. GAAP, which could differ in certain respects from the principles that the Company should follow if the consolidated financial statements were prepared in accordance with accounting principles generally accepted in Canada (Canadian GAAP). However at present, due to the nature and stage of development of the Company, there are no material differences between U.S. GAAP and Canadian GAAP.

Recent Accounting Pronouncements

The Canadian Institute of Chartered Accountants has issued new standards, which could potentially affect the financial disclosures and results of operations of the Company for interim and annual periods beginning January 1, 2008. After review by the Company, these have no material impact on the Company's financial statements.

Section 1535 Capital Disclosures

This Section establishes standards for disclosing information about a company's capital and how it is managed. Under this standard the Company will be required to disclose the following, based on the information provided internally to the Company's key management personnel:

- (i) qualitative information about its objectives, policies, and processes for managing capital;
- (ii) summary quantitative data about what it manages as capital;
- (iii) whether during the period it complied with externally imposed capital requirements to which it is subject; and

(iv) when the Company has not complied with such externally imposed capital requirements, the consequences of such non-compliance.

Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

13. CANADIAN GAAP RECONCILIATION (CONT'D.)

Section 3862 and 3863 Financial Instruments Disclosures and Presentation

These new standards replace Section 3861, Financial Instruments Disclosure and Presentation, revising and enhancing disclosure requirements, and carrying forward unchanged the presentation requirements. Section 3862 requires entities to provide disclosure of quantitative and qualitative information in their financial statements that enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and management's objectives, policies and procedures for managing such risks. Entities will be required to disclose the measurement basis or bases used, and the criteria used to determine classification for different types of instruments.

The Section requires specific disclosures to be made, including the criteria for:

- (i) designating financial assets and liabilities as held for trading;
- (ii) designating financial assets as available-for-sale; and
- (iii) determining when impairment is recorded against the related financial asset or when an allowance account is used.

14. SUBSEQUENT EVENTS

- a) The second cash call of the 2008 capital increase representing approximately 5.16 billion CFA francs (equivalent to approximately \$10.2 million) was completed by November 4, 2008 (see note 10). In the second cash call Geovic paid cash of approximately 3.12 billion CFA francs (equivalent to approximately \$6.2 million, representing 60.5% of the cash call), and the other minority stockholders paid cash of approximately 2.04 billion CFA francs (equivalent to approximately \$4 million). The remaining cash calls for the 2008 capital increase are anticipated to total approximately 7.75 billion CFA francs (equivalent to approximately \$17.1 million) and are expected to be completed later in 2008. Geovic's 60.5% share of such remaining cash calls is expected to total approximately 4.69 billion CFA francs (equivalent to approximately \$10.4 million).
- b) The Company paid approximately \$96 thousand to a relocation company as an advance against future expenses to be incurred and also reimbursed approximately \$282 thousand to the relocation company related to residential properties purchased by the relocation company (see note 11b).
- c) On October 1, 2008, the Company granted options under the Second Amended and restated Stock Option Plan to purchase 350,000 shares to a consultant and 120,000 shares to an employee. The options are exercisable at Cdn\$0.80 per share. The consultant's options vest 25% at date of grant and 25% at the end of each four months thereafter, and expire at the earlier of two years from grant or termination of the consultant under the consulting agreement. The employee's options vest 40% at grant and 30% on each of the first and second anniversaries of the grant.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2007 as well as with the financial and related notes and the other information appearing elsewhere in this report. As used in this report, unless the context otherwise indicates, references to we, our, ours and us refer to Geovic Mining Corp. and its subsidiaries collectively.

Overview

This Management's Discussion & Analysis (MD&A) is intended to provide an analysis of the Company's financial results for the three and nine month periods ended September 30, 2008 compared to the comparable periods of the prior year. Reference should also be made to the Company's other disclosure materials filed from time to time on www.sec.gov or the Company's website at www.geovic.net.

Since its inception our wholly owned subsidiary, Geovic, has been engaged in the business of exploring for cobalt, nickel, and related minerals in the Republic of Cameroon through its majority-owned (60%) subsidiary, Geovic Cameroon, PLC (GeoCam). The Company is also evaluating other exploration prospects, land acquisitions and investments in the mining industry, primarily in the United States, that management believes would provide high-quality diversification opportunities.

Our success will be largely dependent on our ability to finalize a development plan and secure required financing to develop the mineral reserves on GeoCam's Nkamouna deposit, the first of several deposits we have located on the GeoCam properties. A feasibility study on development of a cobalt-nickel-manganese mine and mineral processing facility, delivered in December 2007, estimated that total capital and pre-opening and operating expenses for the Nkamouna project in Cameroon would be approximately \$397 million. An optimization study by other outside consultants was then contracted in December 2007 to review and improve the efficiencies and re-examine Nkamouna project capital and operating costs described in the feasibility study. The optimization study was completed in September 2008. The optimization study also advanced mining plans, milling and processing facilities plans and estimated anticipated construction and related costs. During the optimization study, it was determined that manganese and scandium can be produced in commercial quantities and additional processing of mineral resources was planned. The completed optimization study estimated total capital construction costs (exclusive of escalation) and pre-production operating expenses at approximately \$379 million including additional processing equipment required to recover manganese carbonate and scandium. In addition, working capital required during startup and commissioning is estimated at \$38 million.

As a result of the Company's concern about recent world-wide turmoil in financial and other markets and the probable unavailability of acceptable terms for financing in the mining sector generally, the Company has concluded that debt and equity financing and commencement of construction at the Nkamouna project will likely be delayed. Also, the operating results forecast in the optimization study may not support financing, particularly under current turbulent economic conditions. Such conditions have historically been accompanied by lower demand for certain commodities and resulting falling commodities prices. Any significant decline in prices for cobalt, nickel and manganese would also impair the likelihood that project debt and equity financing can be completed. The Company has commenced a reassessment of alternatives to enhance Nkamouna project viability that could improve the economics, reduce risk and facilitate debt and equity financing. The Company expects to soon present alternatives to the development plans reviewed in the optimization study for consideration by the GeoCam minority shareholders.

Table of Contents

The Company will soon review reduction of the level of pre-construction activity and commitments by GeoCam with the minority stockholders of GeoCam. We believe that it may be prudent for GeoCam to undertake only those budgeted activities which are expected to enhance the value and ultimate development of the Nkamouna project, until we are reasonably satisfied that Nkamouna project financing and equity requirements in required amounts can be completed. For example, GeoCam may continue limited pre-construction activities, while deferring other budgeted activities including exploratory drilling and commitments pending improvement in world-wide financial and commodities markets. The Company had consolidated cash and cash equivalents of \$73.3 million at September 30, 2008 and, based on the aforementioned delay of commencement of construction at Nkamouna and currently planned and committed expenditures, we see no need to access the equity markets in the foreseeable future.

Securing required financing will also be dependent on numerous additional factors affecting the expected economics of the Nkamouna project, including: availability and cost of capital, market conditions and demand for the metals to be produced, satisfying lenders that mineral processing and the financial returns forecast in any development plan will be achievable from a technical standpoint, arrangement of metal sales agreements and the pricing and terms of such agreements, cost trends and availability of mining and processing equipment as well as operating materials and services necessary to develop and operate the properties, existing environmental and reclamation commitments, compliance with any additional government requirements or approvals associated with project development and operation, political unrest, geopolitical developments, and the relative competitive position of existing and prospective cobalt and nickel projects worldwide. Other significant factors affecting development of the Nkamouna project include our ability to recruit, train and retain a stable local workforce, and to meet the logistical challenges of developing the project in a relatively undeveloped, remote area in Cameroon.

Results of Operations

Nine Months Ended September 30, 2008 Compared to Nine Months Ended September 30, 2007:

The Company had no revenue from operations and incurred losses during the first nine months of 2008 and 2007, and has had no revenue since inception. The net loss increased approximately \$9.4 million in the first nine months of 2008 compared to the same period of 2007. Interest income decreased by \$0.9 million in 2008 compared to 2007 as a result of lower cash balances invested at a lower interest rate during the respective nine month period. Exploration expenses increased by \$12.1 million in the period compared to the year earlier period. This increase in exploration expense represents expenditures by GeoCam with various consultants and its financial advisor in connection with completing an optimization study and environmental review for the Nkamouna project, as well as other exploration expenses, such as drilling and assaying in Cameroon. We also had a slight decrease of \$0.2 million in exploration expense in other Company projects in the United States. In 2008 exploration activity increased in Cameroon as we continued our efforts to increase reserves at the Nkamouna project and establish reserves and expand resources for the nearby Mada deposit. We expect to continue an increased level of exploration and related expenditures during the rest of 2008, both in Cameroon and the United States.

Also, during the first nine months of 2008 we made annual grants of options under the Stock Option Plan to officers and directors, the result of which was a \$1.6 million increase in stock based compensation compared to the year earlier period when there were no options granted. We do not anticipate that additional options will be granted to these officers and directors during 2008, but options may be granted to newly hired employees or new directors. In addition, the Company granted warrants to two financial consulting companies in June 2008 for investor relations services, which resulted in stock-based compensation of approximately \$93 thousand during the period.

General and administrative expenses also increased during the first nine months of 2008 compared to 2007 by approximately \$1.1 million. This increase was attributable to an increase in salaries and related expenses, as well as expanded marketing, investor relations, and other professional services.

In 2007, minority shareholders made equity contributions of \$5.1 million of which a balance of \$1.9 million remained as of December 31, 2007. During the first six months of 2008, this balance was utilized with the excess loss being absorbed completely by the Company in the second quarter. In September 2008, minority stockholders made equity contributions of \$15.5 million. This amount, in addition to the balance at the beginning of the year, was utilized to absorb the minority stockholders pro rata share of all losses for the nine month period for a total of \$7.4 million compared to a minority interest share of \$1.6 million for the nine month period ended September 30, 2007.

As an exploration stage company, we have charged our exploration and pre-construction expenses incurred for GeoCam to operations in the periods incurred and no such expenditures have been capitalized. We expect to continue this practice until a final development and mining plan is adopted, possibly in 2009. Once we begin to capitalize expenditures at the Nkamouna project, our results of operations for financial reporting purposes during periods before mining and processing activities begin may change.

Table of Contents

Three Months Ended September 30, 2008 Compared to Three Months Ended September 30, 2007:

The net loss increased approximately \$3.2 million in the third quarter of 2008 compared to the third quarter 2007. Interest income decreased by \$0.6 million in 2008 compared to 2007 as a result of lower cash balances invested at a lower interest rate during the respective quarters. Exploration expenses increased by \$6.6 million in the quarter compared to the year earlier period, nearly all related to increased exploration activity in Cameroon which expanded as we continued our efforts to increase reserves at the Nkamouna project and establish reserves for the adjoining Mada deposit. Also during the third quarter we incurred significant consulting and related expenses in connection with completion of the optimization study for the Nkamouna project. We expect to continue an increased level of exploration and related expenditures during the fourth quarter of 2008, both in Cameroon, and to a lesser extent, in the United States.

Also, during the third quarter of 2008 we made grants of options under the Stock Option Plan to three persons, the result of which was a \$0.4 million increase in stock based compensation compared to the year earlier quarter when there were no options granted. Options are expected to be granted to new employees and to consultants in the fourth quarter.

General and administrative expenses also increased during the quarter by approximately \$0.7 million. This increase was attributable to an increase in salaries and related expenses as well as marketing, investor relations, and other professional services.

In September 2008, minority shareholders made equity contributions of \$15.5 million. This amount was used to offset losses in the second quarter of 2008 not previously absorbed plus the minority stockholders pro rata share of the losses in the current quarter of 2008. The total minority stockholders contribution to losses recorded in the third quarter of 2008 was \$5.5 million compared to \$0.7 in the third quarter of 2007.

Capital Resources and Liquidity

At September 30, 2008 we had approximately \$73.3 million of cash and cash equivalents on a consolidated basis, a decrease of approximately \$5.2 million from December 31, 2007. Our cash is invested in U.S. dollar deposits and money market funds, and GeoCam's funds are held in US\$ and CFA francs accounts in the Cameroon branch of a large international bank. The money market funds in which we invested have not experienced losses during the financial crises.

We do not anticipate revenue until we commence operations at the Nkamouna project. We believe that our cash resources will satisfy our immediate cash requirements at least through mid-2009, depending on GeoCam's cash requirements. We expect our annualized general and administrative expenses to total approximately \$3-4 million, and that we will expend additional amounts for acquisition and exploration of mineral properties in the United States and elsewhere in the balance of 2008 and in 2009. We anticipate that most of the balance of our available cash will be used to meet our share of anticipated exploration and operating expenses in Cameroon during the balance of 2008 and thereafter and to satisfy a portion of our future project equity obligations as the majority shareholder of GeoCam.

In June 2008 GeoCam adopted an operating and exploration budget for 2008, totaling approximately \$45 million, an increase from the approximately \$13.5 million budget for 2007. On September 2, 2008, GeoCam stockholders approved a GeoCam capital increase for 2008 equivalent to approximately \$67.1 million. The capital increase would complete the capitalization of the Company's pre-2007 expenditures that benefited GeoCam and fully fund the 2008 budget, as summarized below. However, a significant portion of the budgeted expenditures may be completed after the end of 2008 or deferred indefinitely.

The capital increase is being carried out in accordance with the applicable laws of Cameroon by or for the accounts of the stockholders of GeoCam, including Geovic, in their respective ownership interests prior to the capital increase. There will be multiple cash calls to fund the 2008 capital increase. The first cash call equivalent to approximately \$38.6 million was completed September 29, 2008, and subsequent cash calls equivalent to approximately \$28.6 million are expected to be completed later in 2008. In the first cash call Geovic received credit for approximately \$23.1 million of advances made before 2007 pursuant to the terms of the agreement among the GeoCam stockholders completed at the end of 2007; in addition, Geovic paid cash equivalent to approximately \$0.2 million on behalf of Mr. Buckovic. In the first cash call the other minority stockholders converted the principal amount of a loan of approximately \$6.6 million made to GeoCam in July 2008 into GeoCam equity, and also paid cash equivalent to approximately \$8.6 million, representing an aggregate investment equivalent to approximately \$15.2 million. We will be obligated to fund 60.5% of the remaining GeoCam capital increase in 2008 equivalent to approximately \$17.3 million and the other minority shareholders will be obligated to fund the balance, or the equivalent of approximately \$11.3 million in accordance with the agreement among the GeoCam stockholders completed at the end of 2007.

It now appears that financing for the Nkamouna project will be delayed due to ongoing turmoil in the financial markets. In completing any project debt financing for the Nkamouna project by GeoCam, GeoCam will be required to furnish at least 40% of the total estimated capital and initial operating costs, as well as cost overrun financing, of which the Company would be obligated to contribute its proportionate share. It is

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

likely that the Company will need to fund its share prior to completion of project debt financing. Our ability to raise such additional capital depends on a number of factors that are partly or wholly outside of our control. It may not be possible or feasible to raise sufficient capital on a timely basis, at an acceptable cost or on reasonable terms. Recent

Table of Contents

disruptions of world-wide financial and other markets are likely to make it much more difficult for the Company and GeoCam to raise the required capital. Mine and mill construction costs, and acquisition costs for mining and related equipment have risen considerably in recent years and such increases in the future could result in additional capital requirements during the construction period. In addition to deferral of certain Nkamouna project development and pre-construction expenditures, the Company will also consider other cost reducing measures to preserve its available cash. Alternative development plans, currently under evaluation, will also be considered, if technical and economic viability can be established.

The proceeds of any future debt financing for the Nkamouna project together with the requisite equity financing would be used to complete all pre-mining construction and development work, to construct ore processing facilities, roads, housing and other required infrastructure, and to provide working capital for the Nkamouna project. We would expect initial production from the Nkamouna project as early as 20 to 24 months following the completion of the required debt and equity financing with full scale operations beginning four to six months thereafter. Until then we will have no cash flow from the project.

Under the 2007 agreement among GeoCam shareholders, all shareholders agreed to pay their respective shares of future capital and related costs expected to be incurred in completing the development and bringing the Nkamouna deposit into production. However, if any stockholders are unwilling or unable to fund their obligations in future years, financing could be delayed and any other stockholder could choose to advance some or all of such obligations, which could increase our or other shareholders' cash requirements, as well as potentially, our or other shareholders' equity ownership interest in GeoCam. We thus expect that a significant portion of our cash resources will be expended or committed for these purposes in 2009 or later and that our cash balances will continue to decrease from quarter to quarter.

Presently the Company has no material debt or other similar obligations or commitments, and we believe that our present capital resources will be sufficient to satisfy the requirements described above through at least the middle of 2009, or longer depending on progress toward completion of project financing for the Nkamouna project or for any alternative development of the deposit. We have no standby financing arrangements currently in place.

Off-Balance Sheet Arrangements

We have no off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures. As discussed above, the stockholders of GeoCam have agreed to additional cash calls to be completed during 2008 under the GeoCam capital increase described above.

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference) are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements include, without limitation: (a) statements regarding future operations, and the sensitivity of financial results to the price of cobalt and other metals; (b) statements regarding possible future mineral production from one or more properties that we currently lease or intend to lease; (c) estimates of future production costs and other expenses, for specific operations and on a consolidated basis; (d) statements concerning the sensitivity of cash flows to cobalt and other metals prices; (e) estimates of future capital expenditures and other cash needs for specific operations and on a consolidated basis and expectations as to the funding thereof; (f) statements as to the possible development of certain ore deposits, including estimates of development and other capital costs, financing plans for these deposits, and possible production commencement dates; (g) statements regarding estimates of future environmental remediation expenses; (h) statements regarding future exploration results; and (i) statements regarding management of our short term investments and related matters.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from such forward-looking statements (cautionary statements) are disclosed under Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2007, and in our other filings with the Securities and Exchange Commission, including this Form 10-Q. Many of these factors are beyond our ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

All subsequent written and oral forward-looking statements attributable to us or to persons acting on our behalf are expressly qualified in their entirety by the cautionary statements. We disclaim any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are participating in the development and providing management services for the Nkamouna project in Cameroon held by Geovic Cameroon, PLC., (GeoCam) our 60% owned subsidiary. In addition, the Company is engaged in the acquisition of mineral projects in other countries, including the United States.

Table of Contents

The value of our properties is largely related to commodity prices for cobalt and nickel and for any other minerals for which we may acquire a property interest. Cobalt and nickel prices are subject to market fluctuation and have declined during the third quarter, and have generally continued to decline during the early fourth quarter. Adverse changes in the worldwide prices of cobalt and, to a lesser extent, nickel could negatively affect our ability to obtain project financing for the Nkamouna project and ultimately to generate revenue in excess of operating costs from the GeoCam properties.

Cobalt and other metal prices may continue to fluctuate widely from time to time and are affected by numerous factors outside our control, including the following: world-wide economic conditions and stability, expectations with respect to the rate of inflation, exchange rates, interest rates, global and regional political and economic circumstances and governmental policies, and technological developments requiring uses of cobalt or substitute materials. Cobalt is used for rechargeable batteries, super alloys mainly for jet engines, chemicals, wear resistant alloys, catalysts and magnets. The largest demand for nickel is for use in stainless steel alloys.

Because we have exploration operations in Cameroon, and may have operations in other countries, we are subject to foreign currency fluctuations. We do not engage in currency hedging to offset any risk of currency fluctuations as GeoCam's reporting currency is the U.S. dollar.

We have no material debt outstanding, nor do we have any investment in debt instruments other than highly liquid short-term investments. Accordingly, we consider our interest rate risk exposure to be insignificant at this time.

ITEM 4T. CONTROLS AND PROCEDURES.

The Company adopted and maintained a set of disclosure controls and procedures during the year ended December 31, 2007 and during the nine months ended September 30, 2008, designed to ensure that information required to be disclosed is recorded, processed, summarized and reported within the time periods specified in applicable reporting requirements.

The principal executive officer and principal financial officer of the Company have evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act)) as of September 30, 2008. Based on the evaluation, the principal executive officer and principal financial officer concluded that the disclosure controls and procedures in place are effective to ensure that information required to be disclosed by the Company, including consolidated subsidiaries, in reports that the Company files or submits under the Exchange Act, is recorded, processed, summarized and reported on a timely basis in accordance with applicable time periods specified by the Securities and Exchange Commission rules and forms. There has been no change in the Company's internal control over financial reporting during the nine months ended September 30, 2008, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company will continue to develop, maintain, and review the effectiveness of our internal control over financial reporting and will implement changes as necessary or appropriate. In the third quarter we engaged a qualified consulting firm for advice regarding additional internal controls and procedures to be established in 2008 consistent with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

None

ITEM 1A. RISK FACTORS.

There are no material changes to the Risk Factors previously disclosed in our Annual Report of form 10-K for the fiscal year ended December 31, 2007, except for the following additional risk factors.

Volatility in world-wide financial and commodities markets or economic recession are likely to delay project financing for the Nkamouna project and could make project financing unavailable for the foreseeable future.

International lending institutions and government development agencies may be unwilling to extend project debt financing to GeoCam or may be willing to do so only on terms that are not acceptable to the Company or the GeoCam minority shareholders. Securing required additional equity by GeoCam and its stockholders as a condition to debt financing may not be available or may be available only on terms that are not acceptable, if at all. Further Nkamouna project development modifications may be necessary or desirable to secure lending commitments which

would also delay the completion of any financing. All delays in completing financing for the project will delay mine construction and eventual production activities.

Table of Contents

GeoCam may fail to secure Nkamouna project financing if lenders or their advisors conclude that the complex ore processing techniques considered in the 2007 feasibility study and the 2008 optimization study are not adequately tested and therefore not sufficiently documented.

Consultants retained by the GeoCam financial advisor in connection with planned Nkamouna project debt financing have raised questions about the efficacy of a few aspects of planned ore processing to refine cobalt and nickel from the ore. If potential lenders are not ultimately assured that planned metallurgical processes will allow the processing facilities to operate successfully as designed, Nkamouna project debt financing may be delayed until further testing is performed or funding could be unavailable altogether.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

During the nine months ended September 30, 2008 we issued 7,834 restricted shares to 2 persons upon exercise of outstanding warrants at \$1.75 per share. No underwriter was involved in the exercise. The issuance of the shares was exempt from the registration provisions of the Securities Act under Section 4(2), as each of the persons to whom the restricted shares holds the shares for investment purposes, and may not transfer the shares except in compliance with the Securities Act. Certificates representing the shares are required to bear a restrictive legend to that effect.

On June 18, 2008 and June 20, 2008, the Company issued common stock warrants to purchase up to 250,000 and 50,000 shares at CDN \$1.26 respectively, to two consulting firms for services rendered valued at approximately \$70,000. Each warrant expires three years from the date of grant. Each warrant and any shares issuable upon exercise are restricted from transfer, except upon registration or exemption from registration under the Securities Act of 1933, as amended (Act). The issuance was exempt under Section 4(2) of the Act.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

ITEM 5. OTHER INFORMATION.

None.
