Notes to Consolidated Financial Statements

(1) General and Summary of Significant Accounting Policies

(a) Financial Statements

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles. In the opinion of management, all adjustments which are necessary for a fair presentation have been included. The results for interim periods are not necessarily indicative of results which may be expected for any other interim period or for the year. For further information, refer to the March 31, 2009 consolidated financial statements and notes thereto included in Honda Motor Co., Ltd. and Subsidiaries Annual Report for the year ended March 31, 2009. Consolidated financial statements for the year ended March 31, 2009 are derived from the audited consolidated financial statements, while consolidated financial statements for the three months ended June 30, 2009 are unaudited.

(b) Basis of Presenting Consolidated Financial Statements

The Company and its domestic subsidiaries maintain their books of account in conformity with financial accounting standards of Japan, and its foreign subsidiaries generally maintain their books of account in conformity with those of the countries of their domicile.

The consolidated financial statements presented herein have been prepared in a manner and reflect the adjustments which are necessary to conform them with U.S. generally accepted accounting principles.

(c) Changes in Accounting Procedures for Consolidated Quarterly Financial Results

1. Noncontrolling Interests in Consolidated Financial Statements

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 160,

Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. This statement requires that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements, and requires that changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary shall be accounted for as equity transactions. Honda adopted SFAS No. 160 effective April 1, 2009. Upon the adoption of SFAS No. 160, noncontrolling interests, which were previously referred to as minority interests and classified between total liabilities and stockholders' equity on the consolidated balance sheets, are now included as a separate component of total equity. In addition, presentation of consolidated statements of income and cash flows has been changed. As the presentation and disclosure requirements of SFAS No. 160 have been applied retrospectively, Honda has made reclassifications to the prior consolidated financial statements to conform to the presentation used for the three months period ended June 2009. The adoption of SFAS No. 160 did not have a material impact on the Company's consolidated financial position or results of operations.

Notes to Consolidated Financial Statements

2. Adjustment resulting from change in fiscal year-end of a subsidiary

During the fiscal year ended March 31, 2009, a subsidiary of the Company changed its fiscal year-end from December 31 to March 31. As a result, the Company eliminated the previously existing three month difference between the reporting periods of the Company and the subsidiary in the consolidated financial statements. The elimination of the lag period which was adjusted in the three months ended March 31, 2009 represented a change in accounting principle and was reported by retrospective application. The impact on the retained earnings balance as of April 1, 2008 was ¥6,214 million. Honda adjusted its consolidated financial statements as of and for the three months ended June 30, 2008 to conform to the presentation used for the fiscal year ended March 31, 2009.

(d) Accounting Policies Specifically Applied for Quarterly Consolidated Financial Statements
Income taxes

Honda computes interim income tax expense (benefit) by multiplying reasonably estimated annual effective tax rate, which includes the effects of deferred taxes, by year-to-date income before income taxes and equity in income of affiliates for the three months ended June 30, 2009. If a reliable estimate cannot be made, Honda utilizes the actual year-to-date effective tax rate.

(e) Reclassifications

Certain reclassifications have been made to the consolidated financial statements for the three month ended June 30, 2008 and for the year ended March 31, 2009 to conform to the presentation used for the three months ended June 30, 2009.

(5) Pledged Assets

Pledged assets at June 30, 2009 and March 31, 2009 are as follows:

	Yen (millions)	
	June 30, 2009	March 31, 2009
Trade accounts and notes receivable	¥ 4,448	¥
Inventories	7,799	
Property, plant and equipment	21,729	24,750
Finance subsidiaries-receivables	141,933	

Starting in the period ended June 30, 2009, as the special purpose entity (SPE) established and utilized in the securitization did not meet the criteria for qualified special purpose entity anymore, our finance subsidiary in the United States has consolidated the SPE as variable interest entity (VIE). In addition, our finance subsidiary treated the securitization transactions with such SPE that no longer meet the transfer requirement as secured financing transactions. As a result, the finance subsidiaries-receivables pledged as collateral and related secured debt obligations have increased in the Company's consolidated financial statements.

Because the changes of account treatment in securitization and consolidation of VIE, except for the increase in finance subsidiaries-receivables which are subject to collateral and related secured debt obligations, do not have a material impact on the Company's consolidated financial positions or results of operations, we have omitted the certain disclosures required by U.S. generally accepted accounting principles.

(6) Income Taxes

Because of operating losses for the quarter ended June 30, 2009, certain subsidiaries of the Company have recorded valuation allowances over their deferred tax assets as of June 30, 2009. Due primarily to this accounting treatment, the effective tax rates of Honda for the quarter ended June 30, 2009 differs from Honda's statutory income tax rate, which is 40% for the fiscal year ending March 31, 2010.

(8) Fair Value Measurement

Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction, and emphasizes that a fair value measurement should be determined based on the assumptions that market participants would use in pricing an asset or liability.

This statement establishes a three-level hierarchy to be used when measuring fair value. The following is a description of the three hierarchy levels:

- Level 1** Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date
- Level 2** Inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly or indirectly
- Level 3** Unobservable inputs for the assets or liabilities
- The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest input that is significant to the fair value measurement in its entirety.

The following table presents the assets and liabilities measured at fair value on a recurring basis as of June 30, 2009.

Notes to Consolidated Financial Statements

Total realized/unrealized gains or losses related to retained interests in securitizations, including those held at the reporting date, are included in net sales and other operating revenue in the consolidated statements of income.

Total realized/unrealized gains or losses related to interest rate instruments, including those held at the reporting date, are included in other income or other expenses in the consolidated statements of income.

The valuation methodologies the assets and liabilities measured at fair value on a recurring basis are as follows:

Retained interests in securitizations

The fair values of the retained interests in securitizations are estimated by calculating the present value of the future cash flows using a discount rate commensurate with the risks involved. In order to estimate cash flows, Honda utilizes various significant assumptions including market observable inputs such as forward interest rates, as well as internally developed inputs, such as prepayment speeds, delinquency levels and credit losses. Fair value measurement for retained interests in securitization is classified as Level 3.

Foreign exchange and interest rate instruments (see note 9)

The fair values of foreign currency forward exchange contracts and foreign currency option contracts are estimated using market observable inputs such as spot exchange rates, discount rates and implied volatility. Fair value measurement for foreign currency forward exchange contracts and foreign currency option contracts are classified as Level 2. The fair values of currency swap agreements and interest rate swap agreements are estimated by discounting future cash flows using market observable inputs such as LIBOR rates, swap rates, and foreign exchange rates. Fair value measurement for these currency swap agreements and interest rate swap agreements are classified as Level 2.

The fair values of a limited number of interest rate swap agreements related to certain off-balance sheet securitizations are estimated using significant assumptions including market observable inputs, as well as internally developed prepayment assumptions as an input into the model, in order to forecast future notional amounts on these structured derivative contracts. Accordingly, fair value measurement for these derivative contracts is classified as Level 3.

The credit risk of Honda and its counterparties are considered on the valuation of foreign exchange and interest rate instruments.

Available-for-sale securities

The fair value of marketable securities is estimated using quoted market prices. Fair value measurement for marketable securities is classified as Level 1.

The fair value of money market funds classified as short-term investments are estimated based on market observable inputs such as the average of the net asset value price. Fair value measurement for its money market funds is classified as Level 2.

The subsidiary's auction rate securities (ARS) holdings were AAA rated and are insured by qualified guarantee agencies, and reinsured by the Secretary of Education and United States Government, and are guaranteed about 95% by the United States Government. Since the ARS market had been illiquid as of June 30, 2009 and no readily observable prices exist, Honda measures the fair value of the ARS based on the discounted cash flows of the expected interest payments to maturity dates of the ARS and the insurance by qualified guarantee agencies, reinsurance and guarantees by the United States Government. Fair value measurement for auction rate securities is classified as Level 3.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES**Notes to Consolidated Financial Statements**

Honda does not have financial assets and financial liabilities measured at fair value on a nonrecurring basis as of and for the three months ended June 30, 2009 and the year ended March 31, 2009.

Honda also adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) effective April 1, 2009. Honda does not have significant nonfinancial assets and nonfinancial liabilities on a nonrecurring basis as of and for the three months ended June 30, 2009.

Honda has not elected the fair value option for the three months ended June 30, 2009 and the year ended March 31, 2009.

The estimated fair values of significant financial instruments at June 30, 2009 and March 31, 2009 are as follows (see note 9):

The estimated fair values have been determined using relevant market information and appropriate valuation methodologies. However, these estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. The effect of using different assumptions and/or estimation methodologies may be significant to the estimated fair values.

The methodologies and assumptions used to estimate the fair values of financial instruments are as follows:

Cash and cash equivalents, trade receivables and trade payables

The carrying amounts approximate fair values because of the short maturity of these instruments.

Finance subsidiaries-receivables

The fair values of retail receivables and term loans to dealers were estimated by discounting future cash flows using the current rates for these instruments of similar remaining maturities. Given the short maturities of wholesale receivables, the carrying amount of those receivables approximates fair value.

Held-to-maturity securities

The fair value of held-to-maturity securities was estimated using quoted market prices.

Debt

The fair values of bonds and notes were estimated based on the quoted market prices for the same or similar issues. The fair value of long-term loans was estimated by discounting future cash flows using rates currently available for loans of similar terms and remaining maturities. The carrying amounts of short-term bank loans and commercial paper approximate fair values because of the short maturity of these instruments.

(9) Risk Management Activities and Derivative Financial Instruments

Honda uses derivative financial instruments in the normal course of business to reduce their exposure to fluctuations in foreign exchange rates and interest rates. (see note 8) Currency swap agreements are used to manage currency risk exposure on foreign currency denominated debt. Foreign currency forward exchange contracts and purchased option contracts are used to hedge currency risk of sale commitments denominated in foreign currencies (principally U.S. dollars). Foreign currency written option contracts are entered into in combination with purchased option contracts to offset premium amounts to be paid for purchased option contracts. Interest rate swap agreements are mainly used to manage interest rate risk exposure and to convert floating rate financing, such as commercial paper, to (normally three-five years) fixed rate financing in order to match financing costs with income from finance receivables. These instruments involve, to varying degrees, elements of credit, exchange rate and interest rate risks in excess of the amount recognized in the consolidated balance sheets.

The aforementioned instruments contain an element of risk in the event the counterparties are unable to meet the terms of the agreements. However, Honda minimizes the risk exposure by limiting the counterparties to major international banks and financial institutions meeting established credit guidelines. Management of Honda does not expect any counterparty to default on its obligations and, therefore, does not expect to incur any losses due to counterparty default. Honda currently does not require or place collateral for these financial instruments with any counterparties. Honda does not hold derivatives designated as hedging instruments for the three months ended June 30, 2009 and at June 30, 2009 and March 31, 2009.

Contract amounts outstanding for foreign currency forward exchange contracts, foreign currency option contracts and currency swap agreements and the notional principal amounts of interest rate swap agreements at June 30, 2009 and March 31, 2009 are as follows:

	Yen (millions)

(10) Contingent Liabilities

Honda has entered into various guarantee and indemnification agreements. At June 30 and March 31, 2009, Honda has guaranteed ¥32,842 million and ¥33,691 million of bank loans of employees for their housing costs, respectively. If an employee defaults on his/her loan payments, Honda is required to perform under the guarantee. The undiscounted maximum amount of Honda's obligation to make future payments in the event of defaults is ¥32,842 million and ¥33,691 million, respectively, at June 30 and March 31, 2009. At June 30, 2009, no amount has been accrued for any estimated losses under the obligations, as it is probable that the employees will be able to make all scheduled payments.

Honda warrants its products for specific periods of time. Product warranties vary depending upon the nature of the product, the geographic location of its sale and other factors.

The changes in provisions for those product warranties for the three months ended June 30, 2009 and the year ended March 31, 2009 are as follows:

With respect to product liability, personal injury claims or lawsuits, Honda believes that any judgment that may be recovered by any plaintiff for general and special damages and court costs will be adequately covered by Honda's insurance and accrued liabilities. Punitive damages are claimed in certain of these lawsuits. Honda is also subject to potential liability under other various lawsuits and claims including 71 purported class actions in the United States. Honda records a contingent liability when it is probable that an obligation has been incurred and the amount of loss can be reasonably estimated. Honda reviews these pending lawsuits and claims periodically and adjusts the amounts recorded for these contingent liabilities, if necessary, by considering the nature of lawsuits and claims, the progress of the case and the opinions of legal counsel. Honda does not record liabilities for lawsuits or potential claims that it believes an unfavorable outcome is not probable or when a reasonable estimate of the amount or range of loss cannot be determined. After consultation with legal counsel, and taking into account all known factors pertaining to existing lawsuits and claims, Honda believes that the ultimate outcome of such lawsuits and pending claims including 71 purported class actions in the United States should not result in liability to Honda that would be likely to have an adverse material effect on its consolidated financial position, results of operations or cash flows.

1. Segment income (loss) is measured in a consistent manner with consolidated operating income, which is net income before other income, other expenses, income tax (benefit) expense, net income attributable to noncontrolling interests, and equity in income of affiliates. Expenses not directly associated with specific segments are allocated based on the most reasonable measures applicable.
2. Assets of each segment are defined as total assets, including derivative financial instruments, investments in affiliates, and deferred tax assets. Segment assets are based on those directly associated with each segment and those not directly associated with specific segments are allocated based on the most reasonable measures applicable except for the corporate assets described below.
3. Intersegment sales and revenues are generally made at values that approximate arm's-length prices.
4. Unallocated corporate assets, included in reconciling items, amounted to ¥327,583 million as of June 30, 2008 and ¥304,142 million as of June 30, 2009 respectively, which consist primarily of cash and cash equivalents and marketable securities held by the Company. Reconciling items also include elimination of intersegment transactions.
5. Depreciation and amortization of Financial Services Business include ¥39,728 million for the three months ended June 30, 2008 and ¥59,738 million for the three months ended June 30, 2009, respectively, of depreciation of property on operating leases.
6. Capital expenditure of Financial Services Business includes ¥217,671 million for the three months ended June 30, 2008 and ¥158,517 million for the three months ended June 30, 2009 respectively, of purchase of operating lease assets.
