MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1. Summary of Significant Accounting Policies

Organization

MasterCard Incorporated and its consolidated subsidiaries, including MasterCard International Incorporated (MasterCard International) (together, MasterCard or the Company), provide payment solutions, including transaction processing and related services to customers principally in support of their credit, deposit access (debit), prepaid, electronic cash and Automated Teller Machine (ATM) payment card programs, and travelers cheque programs. Our financial institution customers are generally either principal members (principal members) of MasterCard International, which participate directly in MasterCard International s business, or affiliate members (affiliate members) of MasterCard International, which participate indirectly in MasterCard International s business through a principal member.

Consolidation and basis of presentation

The consolidated financial statements include the accounts of MasterCard and its majority-owned and controlled entities, including any variable interest entities for which the Company is the primary beneficiary. Intercompany transactions and balances have been eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the 2011 presentation. The Company follows accounting principles generally accepted in the United States of America (GAAP).

The balance sheet as of December 31, 2010 was derived from the audited consolidated financial statements as of December 31, 2010. The consolidated financial statements for the three and six months ended June 30, 2011 and 2010 and as of June 30, 2011 are unaudited, and in the opinion of management, include all normal recurring adjustments that are necessary to present fairly the results for interim periods. Due to seasonal fluctuations and other factors, the results of operations for the three and six months ended June 30, 2011 are not necessarily indicative of the results to be expected for the full year.

The accompanying unaudited consolidated financial statements are presented in accordance with the U.S. Securities and Exchange Commission requirements of Quarterly Reports on Form 10-Q and, consequently, do not include all of the disclosures required by GAAP. Reference should be made to the MasterCard Incorporated Annual Report on Form 10-K for the year ended December 31, 2010 for additional disclosures, including a summary of the Company s significant accounting policies.

Recent accounting pronouncements

Revenue arrangements with multiple deliverables - In September 2009, the accounting standard for the allocation of revenue in arrangements involving multiple deliverables was amended. Existing accounting standards required companies to allocate revenue based on the fair value of each deliverable, even though such deliverables may not be sold separately either by the company itself or other vendors. The new accounting standard eliminates (i) the residual method of revenue allocation and (ii) the requirement that all undelivered elements must have objective and reliable evidence of fair value before a company can recognize the portion of the overall arrangement fee that is attributable to items that already have been delivered. The Company adopted the revised accounting standard effective January 1, 2011 via prospective adoption. The adoption did not have an impact on the Company s financial position or results of operations.

Fair value measurement - The Company measures certain assets and liabilities at fair value on a recurring basis by estimating the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When valuing liabilities, the Company also considers the Company s creditworthiness. The Company classifies these recurring fair value measurements into a three-level hierarchy (Valuation Hierarchy) and discloses the significant assumptions utilized in measuring assets and liabilities at fair value. In January 2010, fair value disclosure requirements were amended to require detailed disclosures about transfers to and from Level 1 and 2 of the Valuation Hierarchy effective January 1, 2010 and disclosures regarding purchases, sales, issuances, and settlements on a gross basis within the Level 3 (of the

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Valuation Hierarchy) reconciliation effective January 1, 2011. The Company adopted the new guidance for disclosures about transfers to and from Level 1 and 2 of the Valuation Hierarchy effective January 1, 2010. The adoption did not have an impact on the Company s financial position or results of operations. The Company adopted the guidance that requires disclosure of a reconciliation of purchases, sales, issuances, and settlements on a gross basis within Level 3 (of the Valuation Hierarchy) effective January 1, 2011, as required, and the adoption did not have an impact on the Company s financial position or results of operations.

In May 2011, the fair value accounting standard was amended to change fair value measurement principles and disclosure requirements. The key changes in measurement principles include limiting the concepts of highest and best use and valuation premise to nonfinancial assets, providing a framework for considering whether a premium or discount can be applied in a fair value measurement, and aligning the fair value measurement of instruments classified within an entity s shareholders equity with the guidance for liabilities. Disclosures will be required for all transfers between Levels 1 and 2 within the Valuation Hierarchy, the use of a nonfinancial asset measured at fair value if its use differs from its highest and best use, the level in the Valuation Hierarchy of assets and liabilities not recorded at fair value but for which fair value is required to be disclosed, and for Level 3 measurements, quantitative information about unobservable inputs used, a description of the valuation processes used, and qualitative discussion about the sensitivity of the measurements. The Company will adopt the revised accounting standard effective January 1, 2012 via prospective adoption, as required, and does not anticipate that this adoption will have an impact on the Company s financial position or results of operations.

Impairment testing for goodwill - In December 2010, a new accounting standard was issued. This standard requires Step 2 of the goodwill impairment test to be performed for reporting units with zero or negative carrying amounts if qualitative factors indicate that it is more likely than not that a goodwill impairment exists. The provisions for this pronouncement are effective for fiscal years beginning after December 15, 2010, with no early adoption permitted. The Company adopted this accounting standard on January 1, 2011, and the adoption had no impact on the Company s financial position or results of operations.

Business combinations - In December 2010, a new accounting standard was issued. This standard requires a company to disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period, only when comparative financial statements are presented. The disclosure provisions are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010, with early adoption permitted. The Company adopted this accounting standard on January 1, 2011 for prospective application. The adoption had no impact on the Company s financial position or results of operations.

Comprehensive income - In June 2011, a new accounting standard was issued. This standard amends existing guidance by allowing only two options for presenting the components of net income and other comprehensive income: (1) in a single continuous financial statement, statement of comprehensive income or (2) in two separate but consecutive financial statements, consisting of an income statement followed by a separate statement of other comprehensive income. Also, items that are reclassified from other comprehensive income to net income must be presented on the face of the financial statements. This standard requires retrospective application, and it is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The Company will adopt the revised accounting standard effective January 1, 2012, and does not anticipate that this adoption will have an impact on the Company s financial position or results of operations.

Note 2. Acquisition of Card Program Management Operations

On December 9, 2010, MasterCard entered into an agreement to acquire the prepaid card program management operations of Travelex Holdings Ltd., now referred to as Access Prepaid Worldwide (Access). Pursuant to the terms of the acquisition agreement, the Company acquired Access on April 15, 2011, at a purchase price of 295 million U.K. pound sterling, or $481 million, including adjustments for working capital, with contingent consideration (an earn-out) of up to an additional 35 million U.K. pound sterling, or approximately $57 million, if certain performance targets are met.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Access manages and delivers consumer and corporate prepaid travel cards through business partners around the world, including financial institutions, retailers, travel agents and foreign exchange bureaus. The Company expects value from this expansion of its business into program management services, as it offers end-to-end prepaid card solutions encompassing branded switching, issuing, and processing, initially focused on the travel sector and in markets outside the United States.

The following table summarizes the purchase price allocation for the Access acquisition:

	Fair Value at April 15, 2011 (in millions)
Current assets	$ 50
Property, plant and equipment	2
Intangible assets	164
Goodwill	354
Total assets acquired	570
Current liabilities	(56)
Non-current liabilities	(33)
Total liabilities assumed	(89)
Net assets acquired	$ 481

Purchase consideration has been allocated to the tangible and identifiable intangible assets and to liabilities assumed based on their respective fair values on April 15, 2011, the acquisition date. The excess of purchase consideration over net assets acquired was recorded as goodwill. None of the $354 million of goodwill is expected to be deductible for tax purposes.

The contingent consideration is based on Access revenues in 2011. The potential undiscounted amount of all future payments that MasterCard could be required to pay the former owners of Access under the contingent consideration arrangement is between nothing and 35 million U.K. pound sterling, or approximately $57 million. As of June 30, 2011, the Company has recognized 6 million U.K. pound sterling, or approximately $9 million, and included the contingent consideration amount in current liabilities. The fair value of the contingent consideration arrangement was estimated by applying a probability-weighted income approach. The amount of the contingent consideration, the range of outcomes, and the assumptions used to develop the estimates are subject to change through December 31, 2011, the expiration date.

Intangible assets consist of customer relationships, developed technologies and tradenames, which have useful lives ranging from 1.5 to 10 years. See Note 11 (Other Intangible Assets). The following table summarizes the fair value of the acquired intangible assets:

	Fair Value at April 15, 2011 (in millions)	Weighted-Average Useful Life (in years)
Customer relationships	$ 132	8
Developed technologies	17	4
Tradenames	15	6

Total intangible assets	$ 164

In connection with the acquisition, the Company recognized $5 million of acquisition-related expenses, which consisted primarily of professional fees related to completing the transaction. The Company recognized $1 million during the six months ended June 30, 2011 and $4 million during the year ended 2010. These amounts were included in general and administrative expenses. The consolidated financial statements include the operating results of Access from the date of the acquisition.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 3. Earnings Per Share

Earnings per share (EPS) is calculated including the effects of certain instruments granted in share-based payment transactions under the two-class method. Unvested share-based payment awards which receive non-forfeitable dividend rights, or dividend equivalents, are considered participating securities and are required to be included in computing EPS under the two-class method. The Company declared non-forfeitable dividends on unvested restricted stock units and contingently issuable performance stock units (Unvested Units) which were granted prior to 2009.

The components of basic and diluted EPS for common shares were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(in millions, except per share data)			
Numerator:				
Net income attributable to MasterCard	$ 608	$ 458	$ 1,170	$ 913
Less: Net income allocated to Unvested Units				2
Net income attributable to MasterCard allocated to common shares	$ 608	$ 458	$ 1,170	$ 911
Denominator:				
Basic EPS weighted average shares outstanding	127	131	129	131
Dilutive stock options and stock units				
Diluted EPS weighted average shares outstanding	128	131	129	131
Earnings per Share				
Total Basic	$ 4.77	$ 3.50	$ 9.08	$ 6.97
Total Diluted	$ 4.76	$ 3.49	$ 9.05	$ 6.95

* Note that table may not sum due to rounding.

The calculation of diluted EPS for the three and six month periods ended June 30, 2011 and 2010 excluded the following share-based payment awards because the effect would be antidilutive:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(in thousands)			
Stock options	221	204	268	204
Restricted stock units		2	3	2

Note 4. Non-Cash Investing and Financing Activities

The following table includes non-cash investing and financing information for the six month periods ended June 30:

	2011	2010
	(in millions)	
Dividends declared but not yet paid	$ 19	$ 19
Software licenses financed		11
Assets recorded pursuant to capital lease	13	3
Capital lease obligation	13	
Fair value of assets acquired, net of original investment, cash paid and cash acquired	549[1]	
Fair value of liabilities assumed related to investments in affiliates	89[1]	

[1] See Note 2 (Acquisition of Card Program Management Operations) for further details.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 5. Fair Value

Financial Instruments Recurring Measurements

In accordance with accounting requirements for financial instruments, the Company is disclosing the estimated fair values as of June 30, 2011 and December 31, 2010 of the financial instruments that are within the scope of the accounting guidance, as well as the methods and significant assumptions used to estimate the fair value of those financial instruments. Furthermore, the Company classifies its fair value measurements in the Valuation Hierarchy. No transfers were made among the three levels in the Valuation Hierarchy during the three and six months ended June 30, 2011.

The distribution of the Company s financial instruments which are measured at fair value on a recurring basis within the Valuation Hierarchy was as follows:

	June 30, 2011			
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Fair Value
	(in millions)			
Municipal bonds [1]	$	$ 319	$	$ 319
Taxable short-term bond funds	521			521
Auction rate securities			81	81
Foreign currency derivative contracts		(3)		(3)
Total	$ 521	$ 316	$ 81	$ 918

	December 31, 2010			
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Fair Value
	(in millions)			
Municipal bonds [1]	$	$ 315	$	$ 315
Taxable short-term bond funds	516			516
Auction rate securities			106	106
Foreign currency derivative contracts		(1)		(1)
Total	$ 516	$ 314	$ 106	$ 936

[1] Available-for-sale municipal bonds are carried at fair value and are included in the above tables. However, held-to-maturity municipal bonds are carried at amortized cost and excluded from the above tables.

The fair value of the Company s available-for-sale municipal bonds are based on quoted prices for similar assets in active markets and are therefore included in Level 2 of the Valuation Hierarchy.

The fair value of the Company s short-term bond funds are based on quoted prices for identical investments in active markets and are therefore included in Level 1 of the Valuation Hierarchy.

The Company s auction rate securities (ARS) investments have been classified within Level 3 of the Valuation Hierarchy as their valuation requires substantial judgment and estimation of factors that are not currently observable in the market due to the lack of trading in the securities. This valuation may be revised in future periods

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

as market conditions evolve. The Company has considered the lack of liquidity in the ARS market and the lack of comparable, orderly transactions when estimating the fair value of its ARS portfolio. Therefore, the Company used the income approach, which included a discounted cash flow analysis of the estimated future cash flows adjusted by a risk premium for the ARS portfolio, to estimate the fair value of its ARS portfolio. The Company estimated the fair value of its ARS portfolio to be a 10% discount to the par value as of June 30, 2011 and December 31, 2010. When a determination is made to classify a financial instrument within Level 3, the determination is based upon the significance of the unobservable parameters to the overall fair value measurement. However, the fair value determination for Level 3 financial instruments may include observable components.

The Company s foreign currency derivative contracts have been classified within Level 2 of the Valuation Hierarchy, as the fair value is based on broker quotes for the same or similar derivative instruments. See Note 21 (Foreign Exchange Risk Management) for further details.

Financial Instruments Non-Recurring Measurements

Certain financial instruments are carried on the consolidated balance sheet at cost, which approximates fair value due to their short-term, highly liquid nature. These instruments include cash and cash equivalents, accounts receivable, settlement due from customers, restricted security deposits held for customers, prepaid expenses, accounts payable, settlement due to customers and accrued expenses.

Investment Securities Held-to-Maturity

The Company utilizes quoted prices for similar securities from active markets to estimate the fair value of its held-to-maturity securities. See Note 6 (Investment Securities) for fair value disclosure.

Debt

The Company estimates the fair value of its debt by applying a current period discount rate to the remaining cash flows under the terms of the debt. As of December 31, 2010, the carrying values on the consolidated balance sheet totaled $20 million and approximated fair value. The carrying value of the current portion of the Company s debt was included in other current liabilities on the consolidated balance sheet and was repaid during the three months ended June 30, 2011.

Obligations Under Litigation Settlements

The Company estimates the fair value of its obligations under litigation settlements by applying a current period discount rate to the remaining cash flows under the terms of the litigation settlements. At June 30, 2011 and December 31, 2010, the carrying values on the consolidated balance sheet totaled $8 million and $302 million and the fair values totaled $8 million and $307 million, respectively, for these obligations. For additional information regarding the Company s obligations under litigation settlements, see Note 17 (Obligations Under Litigation Settlements).

Settlement and Other Guarantee Liabilities

The Company estimates the fair value of its settlement and other guarantees by applying market assumptions for relevant though not directly comparable undertakings, as the latter are not observable in the market given the proprietary nature of such guarantees. Additionally, loss probability and severity profiles against the Company s gross and net settlement exposures are considered. At June 30, 2011 and December 31, 2010, the carrying value of settlement and other guarantee liabilities were de minimis. The estimated fair values of settlement and other guarantee liabilities as of June 30, 2011 and December 31, 2010 were approximately $55 million and $45 million, respectively. For additional information regarding the Company s settlement and other guarantee liabilities, see Note 20 (Settlement and Other Risk Management).

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Refunding Revenue Bonds

The Company holds refunding revenue bonds with the same payment terms, and which contain the right of set-off with a capital lease obligation related to the Company s global technology and operations center located in O Fallon, Missouri, called Winghaven. The Company has netted the refunding revenue bonds and the corresponding capital lease obligation in the consolidated balance sheet and estimates that the carrying value approximates the fair value for these bonds. See Note 9 (Property, Plant and Equipment) for further details.

Non-Financial Instruments

Certain assets and liabilities are measured at fair value on a nonrecurring basis. The Company s non-financial assets and liabilities measured at fair value on a nonrecurring basis include property, plant and equipment, goodwill and other intangible assets. These assets are not measured at fair value on an ongoing basis; however, they are subject to fair value adjustments in certain circumstances, such as when there is evidence of impairment.

The valuation methods for goodwill and other intangible assets involve assumptions concerning comparable company multiples, discount rates, growth projections and other assumptions of future business conditions. The Company uses a weighted income and market approach for estimating the fair values of its reporting units. As the assumptions employed to measure these assets on a nonrecurring basis are based on management s judgment using internal and external data, these fair value determinations are classified in Level 3 of the Valuation Hierarchy.

Note 6. Investment Securities

Amortized Costs and Fair Values Available-for-Sale Investment Securities:

The major classes of the Company s available-for-sale investment securities, for which unrealized gains and losses are recorded as a separate component of other comprehensive income in the consolidated statement of comprehensive income, and their respective cost bases and fair values as of June 30, 2011 and December 31, 2010 were as follows:

	June 30, 2011			
	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss [1]	Fair Value
	(in millions)			
Municipal bonds	$ 307	$ 12	$	$ 319
Taxable short-term bond funds	515	6		521
Auction rate securities	90		(9)	81
Total	$ 912	$ 18	$ (9)	$ 921

	December 31, 2010			
	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss [1]	Fair Value
	(in millions)			
Municipal bonds	$ 305	$ 10		$ 315
Taxable short-term bond funds	511	5		516
Auction rate securities	118		(12)	106

Total	$ 934	$ 15	$ (12)	$ 937

[1] The unrealized losses primarily relate to ARS, which have been in an unrealized loss position longer than 12 months, but have not been deemed other-than-temporarily impaired.

The municipal bond portfolio is comprised of tax exempt bonds and is diversified across states and sectors. The portfolio has an average credit quality of double-A.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The short-term bond funds invest in fixed income securities, including corporate bonds, mortgage-backed securities and asset-backed securities.

The Company holds investments in ARS. Interest on these securities is exempt from U.S. federal income tax and the interest rate on the securities typically resets every 35 days. The securities are fully collateralized by student loans with guarantees (ranging from approximately 95% to 98% of principal and interest) by the U.S. government via the Department of Education.

Beginning on February 11, 2008, the auction mechanism that normally provided liquidity to the ARS investments began to fail. Since mid-February 2008, all investment positions in the Company s ARS investment portfolio have experienced failed auctions. The securities for which auctions have failed have continued to pay interest in accordance with the contractual terms of such instruments and will continue to accrue interest and be auctioned at each respective reset date until the auction succeeds, the issuer redeems the securities or they mature. As of June 30, 2011, the ARS market remained illiquid, but issuer call and redemption activity in the ARS student loan sector has occurred periodically since the auctions began to fail. During the three and six months ended June 30, 2011, the Company did not sell any ARS in the auction market, but there were calls at par.

The table below includes a roll-forward of the Company s ARS investments from January 1, 2011 to June 30, 2011.

	Significant Unobservable Inputs (Level 3) (in millions)
Fair value, January 1, 2011	$ 106
Calls, at par	(28)
Recovery of unrealized losses due to issuer calls	3
Fair value, June 30, 2011	$ 81

The Company evaluated the estimated impairment of its ARS portfolio to determine if it was other-than-temporary. The Company considered several factors including, but not limited to, the following: (1) the reasons for the decline in value (changes in interest rates, credit event, or market fluctuations); (2) assessments as to whether it is more likely than not that it will hold and not be required to sell the investments for a sufficient period of time to allow for recovery of the cost basis; (3) whether the decline is substantial; and (4) the historical and anticipated duration of the events causing the decline in value. The evaluation for other-than-temporary impairments is a quantitative and qualitative process, which is subject to various risks and uncertainties. The risks and uncertainties include changes in credit quality, market liquidity, timing and amounts of issuer calls, and interest rates. As of June 30, 2011, the Company believed that the unrealized losses on the ARS were not related to credit quality but rather due to the lack of liquidity in the market. The Company believes that it is more likely than not that the Company will hold and not be required to sell its ARS investments until recovery of their cost bases which may be at maturity or earlier if called. Therefore, MasterCard does not consider the unrealized losses to be other-than-temporary. The Company estimated a 10% discount to the par value of the ARS portfolio at June 30, 2011 and December 31, 2010. The pre-tax impairment included in accumulated other comprehensive income related to the Company s ARS was $9 million and $12 million as of June 30, 2011 and December 31, 2010, respectively. A hypothetical increase of 100 basis points in the discount rate used in the discounted cash flow analysis would have increased the impairment by $1 million and $2 million as of June 30, 2011 and December 31, 2010, respectively.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Carrying and Fair Values Held-to-Maturity Investment Securities:

As of June 30, 2011, the Company owned a held-to-maturity municipal bond investment security, yielding interest of 5.0% per annum. The bond relates to the Company s back-up processing center in Kansas City, Missouri. As of December 31, 2010, the Company also owned held-to-maturity investment securities, consisting of U.S. Treasury notes and the municipal bond yielding interest of 5.0% per annum. The carrying value, gross unrecorded gains and fair value of these held-to-maturity investment securities were as follows:

	June 30, 2011	December 31, 2010
	(in millions)	
Carrying value	$ 36	$ 336
Gross unrecorded gains	2	2
Fair value	$ 38	$ 338

Investment Maturities:

The maturity distribution based on the contractual terms of the Company s investment securities at June 30, 2011 was as follows:

	Available-For-Sale		Held-To-Maturity	
	Amortized Cost	Fair Value	Carrying Value	Fair Value
	(in millions)			
Due within 1 year	$ 17	$ 18	$	$
Due after 1 year through 5 years	233	243	36	38
Due after 5 years through 10 years	61	62		
Due after 10 years	86	77		
No contractual maturity	515	521		
Total	$ 912	$ 921	$ 36	$ 38

All the securities due after ten years are ARS. Taxable short-term bond funds have been included in the table above in the no contractual maturity category, as these investments do not have a stated maturity date; however, the short-term bond funds have daily liquidity.

The table below summarizes the maturity ranges of the ARS portfolio, based on relative par value, as of June 30, 2011:

	Par Amount	% of Total
	(in millions)	
Due within 10 years	$ 4	4%
Due year 11 through year 20	1	2%
Due year 21 through year 30	76	84%
Due after year 30	9	10%

Total	$ 90	100%

Investment Income:

Investment income was $11 million and $13 million for the three months ended June 30, 2011 and 2010, respectively. Investment income was $23 million for each of the six month periods ended June 30, 2011 and 2010. It primarily consisted of interest income generated from cash, cash equivalents, investment securities available-for-sale and investment securities held-to-maturity. Dividend income and gross realized gains and losses were not significant.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 7. Prepaid Expenses

Prepaid expenses consisted of the following:

	June 30, 2011	December 31, 2010
	(in millions)	
Customer and merchant incentives	$ 522	$ 497
Advertising	64	69
Income taxes	99	50
Data processing	37	31
Other	52	33
Total prepaid expenses	774	680
Prepaid expenses, current	(401)	(315)
Prepaid expenses, long-term	$ 373	$ 365

Prepaid customer and merchant incentives represent payments made to customers and merchants under business agreements.

Note 8. Other Assets

Other assets consisted of the following:

	June 30, 2011	December 31, 2010
	(in millions)	
Customer and merchant incentives	$ 123	$ 104
Nonmarketable equity investments	106	107
Income tax receivable	51	50
Cash surrender value of keyman life insurance	24	24
Other	43	25
Total other assets	347	310
Other assets, current	(68)	(85)
Other assets, long-term	$ 279	$ 225

Certain customer and merchant business agreements provide incentives upon entering into the agreement. As of June 30, 2011 and December 31, 2010, other assets included amounts to be paid for these incentives and the related liability was included in accrued expenses and other liabilities. Once the payment is made, the liability is relieved and the other asset is reclassified to a prepaid expense.

The Company accounts for investments in common stock or in-substance common stock under the equity method of accounting when it has the ability to exercise significant influence over the investee, generally when it holds 20% or more of the common stock in the entity. MasterCard s share of net earnings or losses of entities accounted for under the equity method of accounting is included in other income (expense) on the

consolidated statement of operations. The Company accounts for investments under the historical cost method of accounting when it does not exercise significant influence, generally when it holds less than 20% ownership in the common stock of the entity. Investments for which the equity method or historical cost method of accounting are used are recorded in other assets on the consolidated balance sheet.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 9. Property, Plant and Equipment

Property, plant and equipment consisted of the following:

	June 30, 2011	December 31, 2010
	(in millions)	
Property, plant and equipment	$ 811	$ 771
Less accumulated depreciation and amortization	(357)	(332)
Property, plant and equipment, net	$ 454	$ 439

The Company leases its global technology and operations center located in O Fallon, Missouri, called Winghaven. The lease includes a bargain purchase option and is thus classified as a capital lease. The building and land assets and capital lease obligation were recorded at $154 million, which represented the lesser of the present value of the minimum lease payments and the fair value of the building and land assets at the inception of the lease. The Company received refunding revenue bonds issued by the Missouri Development Finance Board (MDFB) in the same amount, $154 million, and with the same payment terms as the capital lease and which contain the legal right of setoff with the capital lease. The Company has netted its investment in the MDFB refunding revenue bonds and the corresponding capital lease obligation in the consolidated balance sheet. The related leasehold improvements for Winghaven will continue to be amortized over the economic life of the improvements.

As of June 30, 2011 and December 31, 2010, capital leases, excluding the Winghaven facility, of $13 million were included in equipment. Accumulated amortization of these capital leases was $6 million and $7 million as of June 30, 2011 and December 31, 2010, respectively.

Depreciation expense for the above property, plant and equipment, including amortization for capital leases, was $19 million and $16 million for the three months ended June 30, 2011 and 2010, respectively. Depreciation expense for the above property, plant and equipment, including amortization for capital leases, was $37 million and $33 million for the six months ended June 30, 2011 and 2010, respectively.

Note 10. Goodwill

The change in the carrying amount of goodwill for the six months ended June 30, 2011 was as follows:

Balance as of December 31, 2010	$ 677
Acquisition of Access	354
Foreign currency translation	37
Balance as of June 30, 2011	$ 1,068

On April 15, 2011, MasterCard acquired Access. The Company allocated $354 million to goodwill as part of the acquisition of Access. See Note 2 (Acquisition of Card Program Management Operations) for additional information.

Note 11. Other Intangible Assets

On April 15, 2011, MasterCard acquired Access. The Company acquired $164 million of intangible assets, other than goodwill, as part of the acquisition of Access. See Note 2 (Acquisition of Card Program Management Operations) for additional information.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 12. Accrued Expenses

Accrued expenses consisted of the following:

	June 30, 2011	December 31, 2010
	(in millions)	
Customer and merchant incentives	$ 745	$ 666
Personnel costs	209	307
Advertising	104	162
Income taxes	109	76
Other	113	104
Total accrued expenses	$ 1,280	$ 1,315

Note 13. Pension and Postretirement Plans

The Company maintains a non-contributory, qualified, defined benefit pension plan (the Qualified Plan) with a cash balance feature covering substantially all of its U.S. employees hired before July 1, 2007. In September 2010, the Company amended the Qualified Plan to phase out participant pay credit percentages in the years 2011 and 2012 and eliminate the pay credit beginning January 1, 2013. Plan participants will continue to earn interest credits.

Additionally, the Company has an unfunded non-qualified supplemental executive retirement plan (the Non-qualified Plan) that provides certain key employees with supplemental retirement benefits in excess of limits imposed on qualified plans by U.S. tax laws. The term Pension Plans includes both the Qualified Plan and the Non-qualified Plan. The net periodic pension cost for the Pension Plans was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(in millions)			
Service cost	$ 3	$ 4	$ 7	$ 8
Interest cost	3	4	6	7
Expected return on plan assets	(5)	(5)	(10)	(9)
Amortization:				
Actuarial loss		1	1	2
Prior service credit			(1)	(1)
Net periodic pension cost	$ 1	$ 4	$ 3	$ 7

The Company made voluntary contributions totaling $7 million and $15 million to the Qualified Plan during the three month periods ended June 30, 2011 and 2010, respectively. The Company made voluntary contributions totaling $10 million and $20 million to the Qualified Plan during the six month periods ended June 30, 2011 and 2010, respectively.

The Company maintains a postretirement plan (the Postretirement Plan) providing health coverage and life insurance benefits for substantially all of its U.S. employees and retirees hired before July 1, 2007. Net periodic postretirement benefit cost was $1 million for each of the three month periods ended June 30, 2011 and 2010. Net periodic postretirement benefit cost was $2 million for each of the six month periods ended

June 30, 2011 and 2010. The cost included amounts for interest cost, service cost and amortization of the transition obligation partially offset by the amortization of the actuarial gain. The majority of the cost represented interest cost. The Company does not make any contributions to its Postretirement Plan other than funding benefits payments.

Note 14. Share Based Payment and Other Benefits

On March 1, 2011, the Company granted approximately 199 thousand restricted stock units, 164 thousand stock options and 26 thousand performance stock units under the MasterCard Incorporated 2006 Long-Term Incentive Plan, as amended and restated (LTIP). The fair value of the restricted stock units and performance stock units,

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

based on the closing price of the Class A common stock, par value $.0001 per share, on the New York Stock Exchange on March 1, 2011, was $240.36. The fair value of the stock options estimated on the date of grant using a Black-Scholes option pricing model was $89.01. Vesting of the shares underlying the restricted stock units and performance stock units will occur on February 28, 2014. The stock options vest in four equal annual installments beginning on March 1, 2012, and have a term of ten years. The Company also makes certain off-cycle grants throughout the year. Compensation expense is recorded net of estimated forfeitures over the shorter of the vesting period or the date the individual becomes eligible to retire under the LTIP. The Company uses the straight-line method of attribution over the requisite service period for expensing equity awards.

With regard to the performance stock units granted on March 1, 2011, whether or not the performance stock units vest will be based on MasterCard s performance against a predetermined return on equity goal, with an average of return on equity over the three-year period commencing January 1, 2011 yielding threshold, target or maximum performance, with a potential adjustment determined at the discretion of the MasterCard Human Resources and Compensation Committee of the Board of Directors using subjective quantitative and qualitative goals expected to be established at the beginning of each year in the performance period from 2011 through 2013. These goals are expected to include MasterCard performance against internal management metrics and external relative metrics.

These performance units have been classified as equity awards, will be settled by delivering stock to the employees and contain service and performance conditions. The initial fair value of each performance stock unit is the closing price on the New York Stock Exchange of the Company s Class A common stock on the date of grant. Given that the performance terms are subjective and not fixed on the date of grant, the performance stock units will be remeasured at the end of each reporting period, at fair value, until the time the performance conditions are fixed and the ultimate number of shares to be issued is determined. Estimates are adjusted as appropriate. Compensation expense is calculated using the number of performance stock units expected to vest; multiplied by the period ending price of a share of MasterCard s Class A common stock on the New York Stock Exchange; less previously recorded compensation expense.

Note 15. Stockholders Equity

Commencing on May 31, 2010, the fourth anniversary of the Company s initial public offering, each share of Class B common stock became eligible for conversion, at the holder s option, into a share of Class A common stock on a one for one basis. In July 2010, the Company commenced a conversion program (approved by the Board of Directors in February 2010) for shares of Class B common stock to be converted on a one-for-one basis into shares of Class A common stock for subsequent sale or transfer to public investors. The program features an open window for conversions of any size. As of June 30, 2011, 6,523,961 shares of Class B common stock had not been converted into shares of Class A common stock and remained outstanding (representing 5.1% of aggregate shares outstanding).

In September 2010, the Company s Board of Directors authorized a plan for the Company to repurchase up to $1 billion of its Class A common stock in open market transactions. The Company did not repurchase any shares under this plan during 2010. In April 2011, the Company s Board of Directors amended the existing share repurchase program, authorizing the Company to repurchase an incremental $1 billion of its Class A common stock in open market transactions. The incremental $1 billion share repurchase authorization increases the Class A share repurchase program to an aggregate of $2 billion.

During the three months ended June 30, 2011, MasterCard repurchased a total of approximately 1.5 million shares, for an aggregate cost of $387 million at an average price of $263.89 per share of Class A common stock. During the six months ended June 30, 2011, MasterCard repurchased a total of approximately 4.1 million shares, for an aggregate cost of $1 billion at an average price of $254.01 per share of Class A common stock. These repurchased shares were recorded as treasury stock, which is a reduction to stockholders equity.

As of July 28, 2011, the cumulative repurchases by the Company during 2011 totaled approximately 4.2 million shares of its Class A common stock for an aggregate cost of approximately $1.1 billion at an average price of $254.99 per share of Class A common stock.

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 16. Commitments

At June 30, 2011, the Company had the following future minimum payments due under non-cancelable agreements:

	Total	Capital Leases [1]	Operating Leases	Sponsorship, Licensing & Other
		(in millions)		
Remainder of 2011	$ 221	$ 2	$ 16	$ 203
2012	210	5	28	177
2013	120	40	17	63
2014	51		12	39
2015	37		10	27
Thereafter	22		17	5
Total	$ 661	$ 47	$ 100	$ 514

[1] Excludes non-cash transactions relating to the Company s Winghaven facility. See Note 9 (Property, Plant and Equipment) for more information.

Included in the table above are capital leases with imputed interest expense of $4 million and a net present value of minimum lease payments of $43 million. In addition, at June 30, 2011, $51 million of the future minimum payments in the table above for operating leases, sponsorship, licensing and other agreements was accrued. Consolidated rental expense for the Company s leased office space, which is recognized on a straight line basis over the life of the lease, was $7 million for each of the three month periods ended June 30, 2011 and 2010. Consolidated rental expense for the Company s leased office space, which is recognized on a straight line basis over the life of the lease, was $14 million and $13 million for the six months ended June 30, 2011 and 2010, respectively. Consolidated lease expense for automobiles, computer equipment and office equipment was $2 million for each of the three month periods ended June 30, 2011 and 2010. Consolidated lease expense for automobiles, computer equipment and office equipment was $4 million for each of the six month periods ended June 30, 2011 and 2010.

Note 17. Obligations Under Litigation Settlements

On June 24, 2008, MasterCard entered into a settlement agreement (the American Express Settlement) with American Express Company (American Express) relating to the U.S. federal antitrust litigation between MasterCard and American Express. The American Express Settlement ended all existing litigation between MasterCard and American Express. Under the terms of the American Express Settlement, MasterCard was obligated to make 12 quarterly payments of up to $150 million per quarter beginning in the third quarter of 2008. MasterCard s maximum nominal payments totaled $1.8 billion. The amount of each quarterly payment was contingent on the performance of American Express s U.S. Global Network Services business. The quarterly payments were in an amount equal to 15% of American Express s U.S. Global Network Services billings during the quarter, up to a maximum of $150 million per quarter. MasterCard recorded the present value of $1.8 billion, at a 5.75% discount rate, or $1.6 billion in the quarter ended June 30, 2008. During the three months ended June 30, 2011, the Company made the final quarterly payment of $150 million.

Total liabilities for the American Express Settlement and other litigation settlements changed from December 31, 2010, as follows:

	(in millions)
Balance as of December 31, 2010	$ 302
Interest accretion on American Express Settlement	5
Payments on American Express Settlement	(300)
Other payments, accruals and accretion, net	1
Balance as of June 30, 2011	$ 8

See Note 19 (Legal and Regulatory Proceedings) for additional discussion regarding the Company s legal proceedings.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Note 18. Income Taxes

The effective income tax rates were 31.8% and 35.7% for the three months ended June 30, 2011 and 2010, respectively, and 32.3% and 35.1% for the six months ended June 30, 2011 and 2010, respectively. The rate for the three months ended June 30, 2011 was lower than the rate for the three months ended June 30, 2010 due primarily to a more favorable geographic mix of earnings, benefits recognized with regard to the anticipated repatriation from a foreign subsidiary and an adjustment related to the Company s U.S. foreign tax credits in the three months ended June 30, 2010. The rate for the six months ended June 30, 2011 was lower than the rate for the six months ended June 30, 2010 due primarily to a more favorable geographic mix of earnings and benefits recognized with regard to the anticipated repatriation from a foreign subsidiary.

Note 19. Legal and Regulatory Proceedings

MasterCard is a party to legal and regulatory proceedings with respect to a variety of matters in the ordinary course of business. Some of these proceedings involve complex claims that are subject to substantial uncertainties and unascertainable damages. Therefore, the probability of loss and an estimation of damages are not possible to ascertain at present. While these types of contingencies are generally resolved over long periods of time, the probability of loss or an estimation of damages can change due to discrete or a combination of developments, which could result in a material adverse effect on our results of operations, cash flows or financial condition. Except as discussed below, MasterCard has not established reserves for any of these proceedings. MasterCard has recorded liabilities for certain legal proceedings which have been settled through contractual agreements. Except as described below, MasterCard does not believe that any legal or regulatory proceedings to which it is a party would have a material impact on its results of operations, financial position, or cash flows. Although MasterCard believes that it has strong defenses for the pending litigations and regulatory proceedings described below, it could in the future incur judgments and/or fines, enter into settlements of claims or be required to change its business practices in ways that could have a material adverse effect on its results of operations, financial position or cash flows. Notwithstanding MasterCard s belief, in the event it were found liable in a large class-action lawsuit or on the basis of a claim in the United States entitling the plaintiff to treble damages or under which it were jointly and severally liable, charges it may be required to record could be significant and could materially and adversely affect its results of operations, cash flow and financial condition, or, in certain circumstances, even cause MasterCard to become insolvent. Moreover, an adverse outcome in a regulatory proceeding could result in fines and/or lead to the filing of civil damage claims and possibly result in damage awards in amounts that could be significant and could materially and adversely affect the Company s results of operations, cash flows and financial condition.

Department of Justice Antitrust Litigation and Related Private Litigations

In October 1998, the U.S. Department of Justice (DOJ) filed suit against MasterCard International, Visa U.S.A., Inc. and Visa International Corp. in the U.S. District Court for the Southern District of New York alleging that both MasterCard s and Visa s governance structure and policies violated U.S. federal antitrust laws. First, the DOJ claimed that dual governance the situation where a financial institution has a representative on the Board of Directors of MasterCard or Visa while a portion of its card portfolio is issued under the brand of the other association was anti-competitive and acted to limit innovation within the payment card industry. Second, the DOJ challenged MasterCard s Competitive Programs Policy (CPP) and a Visa bylaw provision that prohibited financial institutions participating in the respective associations from issuing competing proprietary payment cards (such as American Express or Discover). The DOJ alleged that MasterCard s CPP and Visa s bylaw provision acted to restrain competition.

In October 2001, District Court Judge Barbara Jones issued an opinion upholding the legality and pro-competitive nature of dual governance. However, the judge also held that MasterCard s CPP and the Visa bylaw constituted unlawful restraints of trade under the federal antitrust laws. In November 2001, the judge issued a final judgment that ordered MasterCard to repeal the CPP insofar as it applies to issuers and enjoined MasterCard from enacting or enforcing any bylaw, rule, policy or practice that prohibits its issuers from issuing general purpose credit or debit cards in the United States on any other general purpose card network. The Second Circuit upheld the final judgment and the Supreme Court denied certiorari.

Shortly after the Supreme Court s denial of certiorari, both American Express and Discover Financial Services, Inc. filed complaints against MasterCard and Visa in which they alleged that the implementation and enforcement of MasterCard s CPP and Visa s bylaw provision violated U.S. federal antitrust laws. In June 2008, MasterCard entered into a settlement agreement with American Express to resolve all current litigation between American

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Express and MasterCard. Under the terms of the settlement agreement, MasterCard was obligated to make twelve quarterly payments of up to $150 million per quarter with the first payment having been made in September 2008 and the final payment having been made during the second quarter of 2011. See Note 17 (Obligations under Litigation Settlements) for additional discussion. In October 2008, MasterCard and Visa entered into a settlement agreement with Discover (the Discover Settlement), ending all litigation between the parties for a total of approximately $2.8 billion. The MasterCard share of the settlement, paid to Discover in November 2008, was approximately $863 million. In addition, in connection with the Discover Settlement and pursuant to a separate agreement, Morgan Stanley, Discover s former parent company, paid MasterCard $35 million in November 2008.

In April 2005, a complaint was filed in California state court on behalf of a putative class of consumers under California unfair competition law (Section 17200) and the Cartwright Act (the Attridge action). The claims in this action seek to piggyback on the portion of the DOJ antitrust litigation discussed above with regard to the District Court s findings concerning MasterCard s CPP and Visa s related bylaw. MasterCard and Visa moved to dismiss the complaint and the Court granted the defendants motion to dismiss the plaintiffs Cartwright Act claims but denied the defendants motion to dismiss the plaintiffs Section 17200 unfair competition claims. MasterCard filed an answer to the complaint in June 2006 and the parties have proceeded with discovery. In September 2009, MasterCard executed a settlement agreement that is subject to court approval in the California consumer litigations (see U.S. Merchant and Consumer Litigations). The agreement includes a release that the parties believe encompasses the claims asserted in the Attridge action. In August 2010, the Court in the California consumer actions executed an order granting final approval to the settlement. The plaintiff from the Attridge action and three other objectors filed appeals of the settlement approval order and briefing of the appeals is completed. At this time, it is not possible to determine the outcome of, or estimate the liability related to, the Attridge action and no incremental provision for losses has been provided in connection with it.

Currency Conversion Litigations

MasterCard International, together with Visa U.S.A., Inc. and Visa International Corp., are defendants in a state court lawsuit in California. The lawsuit alleges that MasterCard and Visa wrongfully imposed an asserted one percent currency conversion fee on every credit card transaction by U.S. MasterCard and Visa cardholders involving the purchase of goods or services in a foreign country, and that such alleged fee is unlawful. This action, titled Schwartz v. Visa Int l Corp., et al. (the Schwartz action), was brought in the Superior Court of California in February 2000, purportedly on behalf of the general public. MasterCard International, Visa U.S.A., Inc., Visa International Corp., several member banks including Citibank (South Dakota), N.A., Chase Manhattan Bank USA, N.A., Bank of America, N.A. (USA), MBNA, and Citicorp Diners Club Inc. are also defendants in a number of federal putative class actions that allege, among other things, violations of federal antitrust laws based on the asserted one percent currency conversion fee. Pursuant to an order of the Judicial Panel on Multidistrict Litigation, the federal complaints have been consolidated in MDL No. 1409 (the MDL action) before Judge William H. Pauley III in the U.S. District Court for the Southern District of New York.

In July 2006, MasterCard and the other defendants in the MDL action entered into agreements settling the MDL action and related matters, as well as the Schwartz matter. Pursuant to the settlement agreements, MasterCard paid approximately $72 million to be used for the defendants settlement fund to settle the MDL action and approximately $13 million to settle the Schwartz matter. In November 2006, Judge Pauley granted preliminary approval of the settlement agreements, which were subject to both final approval by Judge Pauley and resolution of all appeals. In November 2009, Judge Pauley signed a Final Judgment and Order of Dismissal granting final approval to the settlement agreements. A number of appeals of the final settlement approval were filed. All the appeals of the approval have now been withdrawn and the settlement is now final. With regard to other state court currency conversion actions, MasterCard has reached agreements in principle with the plaintiffs for a total of approximately $4 million, which has been accrued. Settlement agreements have been executed with plaintiffs in the Ohio, Pennsylvania, Florida, Texas, Arkansas, Tennessee, Arizona, New York, Minnesota, Illinois and Missouri actions. Now that all appeals of the final approval of the MDL settlement action are extinguished, MasterCard and the plaintiffs in the state actions have or are in the process of filing dismissals of the actions with prejudice.

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

U.S. Merchant and Consumer Litigations

Commencing in October 1996, several class action suits were brought by a number of U.S. merchants against MasterCard International and Visa U.S.A., Inc. challenging certain aspects of the payment card industry under U.S. federal antitrust law. Those suits were later consolidated in the U.S. District Court for the Eastern District of New York. The plaintiffs claimed that MasterCard s Honor All Cards rule (and a similar Visa rule), which required merchants who accept MasterCard cards to accept for payment every validly presented MasterCard card, constituted an illegal tying arrangement in violation of Section 1 of the Sherman Act. Plaintiffs claimed that MasterCard and Visa unlawfully tied acceptance of debit cards to acceptance of credit cards. In June 2003, MasterCard International signed a settlement agreement to settle the claims brought by the plaintiffs in this matter, which the Court approved in December 2003. In January 2005, the Second Circuit Court of Appeals issued an order affirming the District Court s approval of the settlement agreement thus making it final. In July 2009, MasterCard International entered into an agreement with the plaintiffs to prepay MasterCard International s remaining payment obligations under the settlement agreement at a discount. In August 2009, the court entered a final order approving the prepayment agreement. The agreement became final pursuant to its terms in September 2009 as there were no appeals of the court s approval, and the prepayment was subsequently made in September 2009.

In addition, individual or multiple complaints have been brought in nineteen different states and the District of Columbia alleging state unfair competition, consumer protection and common law claims against MasterCard International (and Visa) on behalf of putative classes of consumers. The claims in these actions largely mirror the allegations made in the U.S. merchant lawsuit and assert that merchants, faced with excessive merchant discount fees, have passed these overcharges to consumers in the form of higher prices on goods and services sold. MasterCard has been successful in dismissing cases in seventeen of the jurisdictions as courts have granted MasterCard s motions to dismiss for failure to state a claim or plaintiffs have voluntarily dismissed their complaints. However, there are outstanding cases in New Mexico and California. In June 2010, the court issued an order granting MasterCard s motion to dismiss the complaint in the New Mexico action. The plaintiffs have filed a notice of appeal of that decision and briefing on the appeal has been completed. With respect to the California state actions, and as discussed above under Department of Justice Antitrust Litigation and Related Private Litigations, in September 2009, the parties to the California state court actions executed a settlement agreement which required a payment by MasterCard of $6 million, subject to approval by the California state court. In August 2010, the court executed an order granting final approval of the settlement, subsequent to which MasterCard made the payment required by the settlement agreement. The plaintiff from the Attridge action described above under Department of Justice Antitrust Litigation and Related Private Litigations and three other objectors filed appeals of the settlement approval order and briefing on the appeals is completed.

At this time, it is not possible to determine the outcome of, or, except as indicated above in the California consumer action, estimate the liability related to, the remaining consumer cases and no provision for losses has been provided in connection with them. The consumer class actions are not covered by the terms of the settlement agreement in the U.S. merchant lawsuit.

Interchange Litigation and Regulatory Proceedings

Interchange fees represent a sharing of payment system costs among the financial institutions participating in a four-party payment card system such as MasterCard s. Typically, interchange fees are paid by the acquirer to the issuer in connection with purchase transactions initiated with the payment system s cards. These fees reimburse the issuer for a portion of the costs incurred by it in providing services which are of benefit to all participants in the system, including acquirers and merchants. MasterCard or its customer financial institutions establish default interchange fees in certain circumstances that apply when there is no other interchange fee arrangement between the issuer and the acquirer. MasterCard establishes a variety of interchange rates depending on such considerations as the location and the type of transaction, and collects the interchange fee on behalf of the institutions entitled to receive it and remits the interchange fee to eligible institutions. MasterCard s interchange fees and related practices are subject to regulatory and/or legal review and/or challenges in a number of jurisdictions. At this time, it is not possible to determine the ultimate resolution of, or estimate the liability related to, any of the interchange proceedings described below (except as otherwise indicated), as the proceedings involve complex claims and/or substantial uncertainties and, in some cases, could include unascertainable damages or fines. Except as described below, no provision for losses has been provided in connection with them.

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

With the exception of the litigation in the United States, some of the proceedings could have a significant impact on our customers in the applicable country and on MasterCard s level of business in those countries, as opposed to MasterCard overall. However, the proceedings, taken as a whole, reflect the significant and increasingly intense legal, regulatory and legislative scrutiny worldwide that interchange fees and related practices have been receiving. Accordingly, when taken as a whole, the resulting decisions, regulations and legislation with respect to interchange fees and related practices may have a material adverse impact on the Company s revenues, its prospects for future growth and its overall business, financial condition and revenue.

United States. In June 2005, a purported class action lawsuit was filed by a group of merchants in the U.S. District Court of Connecticut against MasterCard International Incorporated, Visa U.S.A., Inc., Visa International Service Association and a number of member banks alleging, among other things, that MasterCard s and Visa s purported setting of interchange fees violates Section 1 of the Sherman Act, which prohibits contracts, combinations and conspiracies that unreasonably restrain trade. In addition, the complaint alleges MasterCard s and Visa s purported tying and bundling of transaction fees also constitutes a violation of Section 1 of the Sherman Act. The suit seeks treble damages in an unspecified amount, attorneys fees and injunctive relief. Since the filing of this complaint, there have been approximately fifty similar complaints (the majority of which are styled as class actions, although a few complaints are on behalf of individual merchant plaintiffs) filed on behalf of merchants against MasterCard and Visa (and in some cases, certain member banks) in federal courts in California, New York, Wisconsin, Pennsylvania, New Jersey, Ohio, Kentucky and Connecticut. In October 2005, the Judicial Panel on Multidistrict Litigation issued an order transferring these cases to Judge Gleeson of the U.S. District Court for the Eastern District of New York for coordination of pre-trial proceedings in MDL No. 1720. In April 2006, the group of purported class plaintiffs filed a First Amended Class Action Complaint. Taken together, the claims in the First Amended Class Action Complaint and in the complaints brought on the behalf of the individual merchants are generally brought under both Section 1 of the Sherman Act and Section 2 of the Sherman Act, which prohibits monopolization and attempts or conspiracies to monopolize a particular industry. Specifically, the complaints contain some or all of the following claims: (1) that MasterCard s and Visa s setting of interchange fees (for both credit and off-line debit transactions) violates Section 1 of the Sherman Act; (2) that MasterCard and Visa have enacted and enforced various rules, including the no surcharge rule and purported anti-steering rules, in violation of Section 1 or 2 of the Sherman Act; (3) that MasterCard s and Visa s purported bundling of the acceptance of premium credit cards to standard credit cards constitutes an unlawful tying arrangement; and (4) that MasterCard and Visa have unlawfully tied and bundled transaction fees. In addition to the claims brought under federal antitrust law, some of these complaints contain certain unfair competition law claims under state law based upon the same conduct described above. These interchange-related litigations seek treble damages, as well as attorneys fees and injunctive relief. In June 2006, MasterCard answered the complaint and moved to dismiss or, alternatively, moved to strike the pre-2004 damage claims that were contained in the First Amended Class Action Complaint and moved to dismiss the Section 2 claims that were brought in the individual merchant complaints. In January 2008, the district court dismissed the plaintiffs pre-2004 damage claims. In May 2008, the court denied MasterCard s motion to dismiss the Section 2 monopolization claims. Fact discovery has been proceeding and was generally completed by November 2008. Briefs have been submitted on plaintiffs motion for class certification. The court heard oral argument on the plaintiffs class certification motion in November 2009. The parties are awaiting a decision on the motion.

In January 2009, the class plaintiffs filed a Second Consolidated Class Action Complaint. The allegations and claims in this complaint generally mirror those in the first amended class action complaint described above although plaintiffs have added additional claims brought under Sections 1 and 2 of the Sherman Act against MasterCard, Visa and a number of banks alleging, among other things, that the networks and banks have continued to fix interchange fees following each network s initial public offering. In March 2009, MasterCard and the other defendants in the action filed a motion to dismiss the Second Consolidated Class Action Complaint in its entirety, or alternatively, to narrow the claims in the complaint. The parties have fully briefed the motion and the court heard oral argument on the motion in November 2009. The parties are awaiting decisions on the motions.

In July 2006, the group of purported class plaintiffs filed a supplemental complaint alleging that MasterCard s initial public offering of its Class A Common Stock in May 2006 (the IPO) and certain purported agreements entered into between MasterCard and its member financial institutions in connection with the IPO: (1) violate Section 7 of the Clayton Act because their effect allegedly may be to substantially lessen competition, (2) violate Section 1 of the Sherman Act because they allegedly constitute an unlawful combination in restraint of trade and (3)

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

constitute a fraudulent conveyance because the member banks are allegedly attempting to release without adequate consideration from the member banks MasterCard s right to assess the member banks for MasterCard s litigation liabilities in these interchange-related litigations and in other antitrust litigations pending against it. The plaintiffs seek unspecified damages and an order reversing and unwinding the IPO. In September 2006, MasterCard moved to dismiss all of the claims contained in the supplemental complaint. In November 2008, the district court granted MasterCard s motion to dismiss the plaintiffs supplemental complaint in its entirety with leave to file an amended complaint. In January 2009, the class plaintiffs repled their complaint directed at MasterCard s IPO by filing a First Amended Supplemental Class Action Complaint. The causes of action in the complaint generally mirror those in the plaintiffs original IPO-related complaint although the plaintiffs have attempted to expand their factual allegations based upon discovery that has been garnered in the case. The class plaintiffs seek treble damages and injunctive relief including, but not limited to, an order reversing and unwinding the IPO. In March 2009, MasterCard filed a motion to dismiss the First Amended Supplemental Class Action Complaint in its entirety. The parties have fully briefed the motion to dismiss and the court heard oral argument on the motion in November 2009. The parties are awaiting a decision on the motion. In July 2009, the class plaintiffs and individual plaintiffs served confidential expert reports detailing the plaintiffs theories of liability and alleging damages in the tens of billions of dollars. The defendants served their expert reports in December 2009 rebutting the plaintiffs assertions both with respect to liability and damages. In February 2011, both the defendants and the plaintiffs served a number of dispositive motions seeking summary judgment on all or portions of the claims in the complaints. Briefing on these motions was completed in July 2011. The court has scheduled a trial date of September 12, 2012. The trial date is subject to further delay based upon the timing of any rulings on the outstanding motions by the parties and any objections or appeals of those decisions along with other factors. MasterCard and the other defendants have been participating in separate court-recommended mediation sessions with the individual merchant plaintiffs (who account for less than 5% of the purchase volume of the class plaintiffs) and the class plaintiffs. Although substantial progress has been made in the mediation with the individual merchant plaintiffs, there has not been similar progress with the class plaintiffs. In particular, the class plaintiffs confidential demands to MasterCard include unacceptable financial components as well as unacceptable changes to MasterCard s business practices and, accordingly, MasterCard cannot ascertain whether the mediation or any settlement efforts will be successful. As a result of, among other things, varied progress in mediation and settlement negotiations, numerous yet-unresolved motions in the proceedings, and the uncertainty of the potential outcomes of these and related issues, an estimate of a reasonably possible loss is not possible to ascertain at this time.

On February 7, 2011, MasterCard and MasterCard International Incorporated entered into each of: (1) an omnibus judgment sharing and settlement sharing agreement with Visa Inc., Visa U.S.A. Inc. and Visa International Service Association and a number of member banks; and (2) a MasterCard settlement and judgment sharing agreement with a number of member banks. The agreements provide for the apportionment of certain costs and liabilities which MasterCard, the Visa parties and the member banks may incur, jointly and/or severally, in the event of an adverse judgment or settlement of one or all of the cases in the interchange merchant litigations. Among a number of scenarios addressed by the agreements, in the event of a global settlement involving the Visa parties, the member banks and MasterCard, MasterCard would pay 12% of the monetary portion of the settlement. In the event of a settlement involving only MasterCard and the member banks with respect to their issuance of MasterCard cards, MasterCard would pay 36% of the monetary portion of such settlement.

In October 2008, the Antitrust Division of the DOJ issued a civil investigative demand to MasterCard and other payment industry participants seeking information regarding certain rules relating to merchant point of acceptance rules. Subsequently, MasterCard received requests for similar information from ten State Attorneys General. In October 2010, MasterCard, the DOJ and seven of the State Attorneys General executed a stipulation and proposed final judgment, subject to court review and approval, pursuant to which MasterCard agreed to make certain modifications to its rules to conform to MasterCard s existing business practices, and therefore to specify, among other things, the ways in which merchants may steer customers to preferred payment forms. On July 20, 2011, the court approved the settlement. The settlement resolves the DOJ s investigation, and all ten State Attorneys General have closed their investigations of MasterCard.

European Union. In September 2003, the European Commission issued a Statement of Objections challenging MasterCard Europe s cross-border default interchange fees. In June 2006, the European Commission issued a supplemental Statement of Objections covering credit, debit and commercial card fees. In November 2006, the European Commission held hearings on MasterCard Europe s cross-border default interchange fees. In March

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

2007, the European Commission issued a Letter of Facts, also covering credit, debit and commercial card fees and discussing its views on the impact of the IPO on the case. MasterCard Europe responded to the Statements of Objections and Letter of Facts and made presentations on a variety of issues at the hearings.

The European Commission announced its decision in December 2007. The decision applies to MasterCard s default cross-border interchange fees for MasterCard and Maestro branded consumer payment card transactions in the European Economic Area (EEA) (the European Commission refers to these as MasterCard s MIF), but not to commercial card transactions (the European Commission stated publicly that it has not yet finished its investigation of commercial card interchange fees). The decision also applies to MasterCard s MIF for any domestic consumer card transactions that default to MasterCard s cross-border MIF, of which currently there are none. The decision required MasterCard to stop applying the MasterCard MIF, to refrain from repeating the conduct, and not apply its then recently adopted (but never implemented) Maestro SEPA and Intra-Eurozone default interchange fees to debit card payment transactions within the Eurozone. MasterCard understood that the decision gave MasterCard until June 21, 2008 to comply, with the possibility that the European Commission could have extended this time at its discretion. The decision also required MasterCard to issue certain specific notices to financial institutions and other entities that participate in its MasterCard and Maestro payment systems in the EEA and make certain specific public announcements regarding the steps it has taken to comply. The decision did not impose a fine on MasterCard, but provides for a daily penalty of up to 3.5% of MasterCard s daily consolidated global turnover in the preceding business year (which MasterCard estimates to be approximately $0.5 million U.S. per day) in the event that MasterCard fails to comply. In March 2008, MasterCard filed an application for annulment of the European Commission s decision with the General Court of the European Union.

The December 2007 decision against MasterCard permits MasterCard to establish other default cross-border consumer card interchange fees for MasterCard and Maestro branded consumer payment card transactions in the EEA if MasterCard can demonstrate by empirical proof to the European Commission s satisfaction that the new interchange fees create efficiencies that outweigh the restriction of competition alleged by the European Commission, that consumers get a fair share of the benefits of the new interchange fees, that there are no less restrictive means of achieving the efficiencies of MasterCard s payment systems, and that competition is not eliminated altogether. In March 2008, MasterCard entered into discussions with the European Commission about, among other things, the nature of the empirical proof it would require for MasterCard to establish other default cross-border consumer card interchange fees consistent with the decision and so as to understand more fully the European Commission s position as to how it may comply with the decision. MasterCard requested an extension of time to comply with the decision and, in April 2008, the European Commission informed MasterCard that it had rejected such request. In June 2008, MasterCard announced that, effective June 21, 2008, MasterCard would temporarily repeal its then current default intra-EEA cross-border consumer card interchange fees in conformity with the decision. In October 2008, MasterCard received an information request from the European Commission in connection with the decision concerning certain pricing changes that MasterCard implemented as of October 1, 2008. MasterCard submitted its response in November 2008.

In March 2009, MasterCard gave certain undertakings to the European Commission and, in response, in April 2009, the Commissioner for competition policy and DG Competition informed MasterCard that, subject to MasterCard s fulfilling its undertakings, they do not intend to pursue proceedings for non-compliance with or circumvention of the decision of December 2007 or for infringing the antitrust laws in relation to the October 2008 pricing changes, the introduction of new cross-border consumer default interchange fees or any of the other MasterCard undertakings. MasterCard s undertakings include: (1) repealing the October 2008 pricing changes; (2) adopting a specific methodology for the setting of cross-border consumer default interchange fees; (3) establishing new default cross-border consumer card interchange fees as of July 1, 2009 such that the weighted average interchange fee for credit card transactions does not exceed 30 basis points and for debit card transactions does not exceed 20 basis points; (4) introducing a new rule prohibiting its acquirers from requiring merchants to process all of their MasterCard and Maestro transactions with the acquirer; and (5) introducing a new rule requiring its acquirers to provide merchants with certain pricing information in connection with MasterCard and Maestro transactions. The undertakings will be effective until a final decision by the General Court of the European Union regarding MasterCard s application for annulment of the European Commission s December 2007 decision.

The General Court of the European Union held a full day hearing on MasterCard s appeal of the European Commission s decision on July 8, 2011. The hearing completed the General Court s review of the decision, to be

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

followed by a judgment to be rendered by the Court and subject to any further appeals.

Although MasterCard believes that any other business practices it would implement in response to the decision would be in compliance with the December 2007 decision, the European Commission may deem any such practice not in compliance with the decision, or in violation of European competition law, in which case MasterCard may be assessed fines for the period that it is not in compliance. Furthermore, because a balancing mechanism like default cross-border interchange fees constitutes an essential element of MasterCard Europe s operations, the December 2007 decision could also significantly impact MasterCard International s European customers and MasterCard Europe s business. The European Commission decision could also lead to additional competition authorities in European Union member states commencing investigations or proceedings regarding domestic interchange fees or, in certain jurisdictions, regulation. In addition, the European Commission s decision could lead to the filing of private actions against MasterCard Europe by merchants and/or consumers which, if MasterCard is unsuccessful in its application for annulment of the decision, could result in MasterCard owing substantial damages.

United Kingdom. In September 2001, the Office of Fair Trading of the United Kingdom (OFT) issued a Rule 14 Notice under the U.K. Competition Act 1998 challenging the MasterCard default interchange fees and multilateral service fee (MSF), the fee paid by issuers to acquirers when a customer uses a MasterCard-branded card in the United Kingdom either at an ATM or over the counter to obtain a cash advance. Until November 2004, the interchange fees and MSF were established by MasterCard U.K. Members Forum Limited (MMF) (formerly MasterCard Europay U.K. Ltd.) for domestic credit card transactions in the United Kingdom. The notice contained preliminary conclusions to the effect that the MasterCard U.K. default interchange fees and MSF infringed U.K. competition law and did not qualify for an exemption in their present forms. In February 2003, the OFT issued a supplemental Rule 14 Notice, which also contained preliminary conclusions challenging MasterCard s U.K. interchange fees (but not the MSF) under the Competition Act. In November 2004, the OFT issued a third notice (now called a Statement of Objections) claiming that the interchange fees infringed U.K. and European Union competition law.

In November 2004, MasterCard s board of directors adopted a resolution withdrawing the authority of the U.K. members to set domestic MasterCard interchange fees and MSFs and conferring such authority exclusively on MasterCard s President and Chief Executive Officer.

In September 2005, the OFT issued its decision, concluding that MasterCard s U.K. interchange fees that were established by MMF prior to November 18, 2004 contravene U.K. and European Union competition law. The OFT decided not to impose penalties on MasterCard or MMF. MMF and MasterCard appealed the OFT s decision to the U.K. Competition Appeals Tribunal. In June 2006, the U.K. Competition Appeals Tribunal set aside the OFT s decision, following the OFT s request to the Tribunal to withdraw the decision and end its case against MasterCard s U.K. default interchange fees in place prior to November 18, 2004.

Shortly thereafter, the OFT commenced a new investigation of MasterCard s current U.K. default credit card interchange fees and announced in February 2007 that the investigation would also cover so-called immediate debit cards. To date, the OFT has issued a number of requests for information to MasterCard Europe and financial institutions that participate in MasterCard s payment system in the United Kingdom. MasterCard understood that the OFT was considering whether to commence a formal proceeding through the issuance of a Statement of Objections. In January 2010, the OFT informed MasterCard that it does not intend to issue such a Statement of Objections prior to the judgment of the General Court of the European Union with respect to MasterCard s appeal of the December 2007 cross-border interchange fee decision of the European Commission. If the OFT ultimately determines that any of MasterCard s U.K. interchange fees contravene U.K. and European Union competition law, it may issue a new decision and possibly levy fines accruing from the date of its first decision. MasterCard would likely appeal a negative decision by the OFT in any future proceeding to the Competition Appeals Tribunal. Such an OFT decision could lead to the filing of private actions against MasterCard by merchants and/or consumers which, if its appeal of such an OFT decision were to fail, could result in an award or awards of substantial damages and could have a significant adverse impact on the revenues of MasterCard International s U.K. customers and MasterCard s overall business in the U.K.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Poland. In April 2001, in response to merchant complaints, the Polish Office for Protection of Competition and Consumers (the PCA) initiated an investigation of MasterCard s domestic credit and debit card default interchange fees. MasterCard Europe filed several submissions and met with the PCA in connection with the investigation. In January 2007, the PCA issued a decision that MasterCard s (and Visa s) interchange fees are unlawful under Polish competition law, and imposed fines on MasterCard s (and Visa s) licensed financial institutions. As part of this decision, the PCA also decided that MasterCard (and Visa) had not violated the law. MasterCard and the financial institutions appealed the decision to the court of first instance. In November 2008, the court of first instance reversed the decision of the PCA and also rejected MasterCard s appeal on the basis that MasterCard did not have a legal interest in the PCA s decision because its conduct was not found to be in breach of the relevant competition laws. MasterCard appealed this part of the court of first instance s decision because it has significant interest in the outcome of the case. The PCA appealed the other parts of the decision. In April 2010, the court of appeals issued an oral decision (followed by a written decision in May 2010) in which it reinstated MasterCard s appeal, reversed a specific finding of the court of first instance and sent the case back to the court of first instance for further proceedings. If on appeal the PCA s decision is ultimately allowed to stand, it could have a significant adverse impact on the revenues of MasterCard s Polish customers and on MasterCard s overall business in Poland.

Hungary. In January 2008, the Hungarian Competition Authority (HCA) notified MasterCard that it had commenced a formal investigation of MasterCard Europe s (and Visa Europe s) domestic interchange fees. This followed an informal investigation that the HCA had been conducting since the middle of 2007. In July 2009, the HCA issued to MasterCard a Preliminary Position that MasterCard Europe s historic domestic interchange fees violate Hungarian competition law. MasterCard responded to the Preliminary Position both in writing and at a hearing which was held in September 2009. Subsequently in September 2009, the HCA ruled that MasterCard s (and Visa s) historic interchange fees violated the law and fined each of MasterCard Europe and Visa Europe approximately $3 million, which was paid during the fourth quarter of 2009. In December 2009, the HCA issued its formal decision and MasterCard appealed the decision to the Hungarian courts. In September 2010, the HCA filed its reply to MasterCard s appeal, while MasterCard filed its response in October 2010. In October 2010, the Hungarian appeals court stayed the proceeding until MasterCard s appeal to the General Court of the European Union of the European Commission s December 2007 cross-border interchange fee decision is finally decided. If the HCA s decision is not reversed on appeal, it could have a significant adverse impact on the revenues of MasterCard s Hungarian customers and on MasterCard s overall business in Hungary.

Italy. In July 2009, the Italian Competition Authority (ICA) commenced a proceeding against MasterCard and a number of its customers concerning MasterCard Europe s domestic interchange fees in Italy. MasterCard, as well as each of the banks involved in the proceeding, offered to give certain undertakings to the ICA, which were rejected (which rejection MasterCard appealed to the Administrative Court). In May 2010, the ICA issued a Statement of Objections to MasterCard and the banks. In November 2010, the ICA adopted a decision in which it determined that MasterCard Europe s domestic interchange fees violate European Union competition law, fined MasterCard 2.7 million euro (approximately $4 million) and ordered MasterCard to refrain in the future from maintaining interchange fees that are not based on economic justifications linked to efficiency criteria and to eliminate any anticompetitive clauses from its licensing agreements. MasterCard appealed the ICA s infringement decision to the Administrative Court. Subsequently, in November 2010, the Administrative Court announced its judgment that the ICA had improperly rejected MasterCard s proposed undertakings and annulled the ICA s undertakings decision (which judgment the ICA appealed to the Council of State). In May 2011, the General Court overturned the Administrative Court s undertakings judgment on procedural grounds and MasterCard refiled its undertakings appeal as part of its appeal of the ICA infringement decision. In July 2011, the Administrative Court again issued a judgment that the ICA had improperly rejected MasterCard s proposed undertakings and annulled for a second time the ICA s undertakings decision and, on that basis, also annulled the ICA s infringement decision. The ICA has the right to appeal the Administrative Court s most recent judgment to the Council of State. If the Administrative Court s second judgment is overturned, it is likely that the Administrative Court would reconsider MasterCard s appeal of the ICA s infringement decision. If the ICA s infringement decision is not reversed on appeal, the ICA s decision could have a significant adverse impact on the revenues of MasterCard s Italian customers and on MasterCard s overall business in Italy.

Canada. In December 2010, the Canadian Competition Bureau (the CCB) filed an application with the Canadian Competition Tribunal to strike down certain MasterCard rules related to interchange fees, including the

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

honor all cards and no surcharge rules. Also in December 2010, MasterCard learned that a purported class action lawsuit had been commenced against it in Quebec on behalf of Canadian merchants and consumers. That suit essentially repeats the allegations and arguments of the CCB application to the Canadian Competition Tribunal and seeks compensatory and punitive damages in unspecified amounts, as well as injunctive relief. In March 2011, a second purported class action lawsuit was commenced in British Columbia against MasterCard, Visa and a number of large Canadian banks, and in May 2011 a third purported class action lawsuit was commenced in Ontario against the same defendants. These suits allege that MasterCard, Visa and the banks have engaged in a price fixing conspiracy to increase or maintain the fees paid by merchants on credit card transactions and that MasterCard s and Visa s rules force merchants to accept all MasterCard and Visa credit cards and prevent merchants from charging more for payments with MasterCard and Visa premium cards. The second suit seeks compensatory damages in unspecified amounts, and the third suit seeks compensatory damages of $5 billion. The second and third suits also seek punitive damages in unspecified amounts, as well as injunctive relief, interest and legal costs. If the CCB s challenges and/or the class action law suits were ultimately successful, such negative decisions could have a significant adverse impact on the revenues of MasterCard s Canadian customers and on MasterCard s overall business in Canada and, in the case of the private lawsuits, could result in substantial damage awards.

Australia. In 2002, the Reserve Bank of Australia (RBA) announced regulations under the Payments Systems (Regulation) Act of 1998 applicable to four-party credit card payment systems in Australia, including MasterCard s. Those regulations, among other things, mandate the use of a formula for determining domestic interchange fees that effectively caps their weighted average at 50 basis points. Operators of three-party systems, such as American Express and Diners Club, were unaffected by the interchange fee regulation. In 2007, the RBA commenced a review of such regulations and, in September 2008, the RBA released its final conclusions. These indicated that the RBA was willing to withdraw its regulations if MasterCard and Visa made certain undertakings regarding the future levels of their respective credit card interchange fees and other practices, including their honor all cards rules. If the undertakings were not made, the RBA said it would consider imposing in 2009 additional regulations that could further reduce the domestic interchange fees of MasterCard and Visa in Australia. In August 2009, the RBA announced that it had decided not to withdraw its regulations and that it would maintain them in their current form pending further consideration of the regulations. MasterCard plans to continue discussions with the RBA as to the nature of the undertakings that MasterCard may be willing to provide. The effect of the undertakings or any such additional regulations could put MasterCard at an even greater competitive disadvantage relative to competitors in Australia that purportedly do not operate four-party systems or, in the case of the undertakings, possibly increase MasterCard s legal exposure under Australian competition laws, which could have a significant adverse impact on MasterCard s business in Australia.

South Africa. In August 2006, the South Africa Competition Commission created a special body, the Jali Enquiry (the Enquiry), to examine competition in the payments industry in South Africa, including interchange fees. After nearly two years of investigation, including several rounds of public hearings in which MasterCard participated, in June 2008, the Enquiry published an Executive Summary of its findings. The Enquiry s full report was made public in December 2008. The Enquiry recommends, among other things, that an independent authority be established to set payment card interchange fees in South Africa and that payment systems (including MasterCard s) respective honor all cards rules be modified to give merchants greater freedom to choose which types of cards to accept. Following the issuance of the Enquiry s report, the South African Reserve Bank (SARB), the South African Treasury and the South African Competition Commission informed MasterCard that they were actively considering what, if any, action they would take in response to the Enquiry s recommendations. In September 2010, the SARB informed MasterCard that it intends to appoint an independent consultant to make a recommendation on a simplified interchange structure for all payment systems in South Africa, including MasterCard s. Such an interchange structure, if adopted, could have a significant adverse impact on the revenues of MasterCard s South African customers and on MasterCard s overall business in South Africa.

Other Jurisdictions. In January 2006, a German retailers association filed a complaint with the Federal Cartel Office (FCO) in Germany concerning MasterCard s (and Visa s) domestic default interchange fees. The complaint alleges that MasterCard s (and Visa s) German domestic interchange fees are not transparent to merchants and include so-called extraneous costs . In December 2009, the FCO sent MasterCard a questionnaire concerning its domestic interchange fees.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

In 2009, the French Competition Authority (the FCA) sent MasterCard an information request concerning its domestic interchange rates. During the first half of 2011, MasterCard engaged in discussions with the FCA regarding how to best address its concerns. In June 2011, the FCA suspended these discussions in order to finalize a settlement on interchange rates with Cartes Bancaires, the predominant French payment card network. In July 2011, that settlement was finalized, and MasterCard understands that the FCA now intends to re-engage MasterCard as to its domestic interchange rates.

MasterCard is aware that regulatory authorities and/or central banks in certain other jurisdictions including Belgium, Brazil, Colombia, Czech Republic, Estonia, Israel, Latvia, the Netherlands, Norway, Russia, Slovakia, Turkey and Venezuela are reviewing MasterCard s and/or its members interchange fees and/or related practices (such as the honor all cards rule) and may seek to regulate the establishment of such fees and/or such practices.

Other Regulatory Proceedings

In addition to challenges to interchange fees, MasterCard s standards and operations are also subject to regulatory and/or legal review and/or challenges in a number of jurisdictions. At this time, it is not possible to determine the ultimate resolution of, or estimate the liability related to, any of the proceedings described below, as the proceedings involve substantial uncertainties. Except as described below, no provision for losses has been provided in connection with them. The proceedings as a whole reflect the increasing global regulatory focus to which the payments industry is subject and, when taken as a whole, such regulatory decisions could result in the imposition of costly new compliance burdens on MasterCard and its customers and may lead to increased costs and decreased transaction volumes and revenues.

Switzerland. In July 2010, MasterCard received a notice from the Swiss Competition Authority (the WEKO) that, based upon complaints, the WEKO had opened a pre-investigation of certain of MasterCard s domestic debit acquirer fees to determine whether to open a formal investigation with respect to these fees. Despite the WEKO s denial in September 2010 of immediate action and interim relief based on the complaints, MasterCard understands that the WEKO has not closed its pre-investigation and is still considering whether to open a formal investigation of the fees.

Ukraine. In June 2010, the Ukrainian Competition Authority (the UCA) issued MasterCard a comprehensive information request concerning its rules and domestic fees in response to a complaint filed by a Ukrainian banking association. In June 2011, MasterCard offered to reduce certain of its fees and the UCA closed its investigation without making a formal decision.

Netherlands. On February 11, 2011, the Netherlands Competition Authority (the NCA) issued MasterCard a Statement of Objections challenging MasterCard co-branding and co-residency rules and policies. The co-branding rules being challenged prohibit, in some cases, financial institutions licensed by MasterCard from placing other payment systems brands on MasterCard cards. The co-residency rules being challenged prohibit, in some cases, licensed financial institutions from encoding other payment systems applications on the electronic chip in MasterCard cards. MasterCard filed its response to the Statement of Objection on March 11, 2011. A hearing on the matter was held on April 14, 2011. In June 2011, the NCA informed MasterCard that it has decided to take no action.

Note 20. Settlement and Other Risk Management

MasterCard International s rules generally guarantee the payment of certain MasterCard, Cirrus and Maestro branded transactions between its principal members. The term and amount of the guarantee are unlimited. Settlement risk is the exposure to members under MasterCard International s rules (Settlement Exposure), due to the difference in timing between the payment transaction date and subsequent settlement. The duration of this exposure is short term and typically limited to a few days. Settlement Exposure is estimated using the average daily card volumes during the quarter multiplied by the estimated number of days to settle. The Company has global risk management policies and procedures, which include risk standards, to provide a framework for managing the Company s settlement risk. Member-reported transaction data and the transaction clearing data underlying the settlement risk calculation may be revised in subsequent reporting periods.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

In the event that MasterCard International effects a payment on behalf of a failed member, MasterCard International may seek an assignment of the underlying receivables. Subject to approval by the Board of Directors, members may be charged for the amount of any settlement loss incurred during the ordinary activities of the Company.

MasterCard requires certain members that are not in compliance with the Company s risk standards in effect at the time of review to post collateral, typically in the form of cash, letters of credit, or guarantees. This requirement is based on management review of the individual risk circumstances for each member that is out of compliance. In addition to these amounts, MasterCard holds collateral to cover variability and future growth in member programs. The Company may also hold collateral to pay merchants in the event of merchant bank/acquirer failure. Although it is not contractually obligated under MasterCard International s rules to effect such payments to merchants, the Company may elect to do so to protect brand integrity. MasterCard monitors its credit risk portfolio on a regular basis and the adequacy of collateral on hand. Additionally, from time to time, the Company reviews its risk management methodology and standards. As such, the amounts of estimated settlement risk are revised as necessary.

Estimated Settlement Exposure, and the portion of the Company s uncollateralized Settlement Exposure for MasterCard-branded transactions that relates to members that are deemed not to be in compliance with, or that are under review in connection with, the Company s risk management standards, were as follows:

	June 30, 2011	December 31, 2010
	(in millions)	
MasterCard-branded transactions:		
Gross Settlement Exposure	$ 33,359	$ 29,695
Collateral held for Settlement Exposure	(3,540)	(3,062)
Net uncollateralized Settlement Exposure	$ 29,819	$ 26,633
Uncollateralized Settlement Exposure attributable to non-compliant members	$ 399	$ 279
Cirrus and Maestro transactions:		
Gross Settlement Exposure	$ 3,511	$ 2,962

Although MasterCard holds collateral at the member level, the Cirrus and Maestro estimated Settlement Exposures are calculated at the regional level. Therefore, these Settlement Exposures are reported on a gross basis, rather than net of collateral.

Of the total uncollateralized Settlement Exposure under the MasterCard brand, the United States accounted for approximately 30% and 33% at June 30, 2011 and December 31, 2010, respectively. With the exception of Brazil, which was 15% and 16% at June 30, 2011 and December 31, 2010, respectively, and France, which was 10% and 7% at June 30, 2011 and December 31, 2010, respectively, no individual country other than the United States accounted for more than 10% of total uncollateralized Settlement Exposure at either June 30, 2011 or December 31, 2010. Of the total uncollateralized Settlement Exposure attributable to non-compliant members, five members represented approximately 69% and 64% at June 30, 2011 and December 31, 2010, respectively.

MasterCard guarantees the payment of MasterCard-branded travelers cheques in the event of issuer default. The guarantee estimate is based on all outstanding MasterCard-branded travelers cheques, reduced by an actuarial determination of cheques that are not anticipated to be presented for payment. The term of the guarantee is unlimited, while the amount is limited to cheques issued but not yet cashed. MasterCard calculated its MasterCard-branded travelers cheques exposure under this guarantee as $344 million and $361 million at June 30, 2011 and December 31, 2010, respectively. The reduction in travelers cheques exposure is attributable to MasterCard-branded travelers cheques no longer being issued.

A significant portion of the Company s travelers cheques risk is concentrated in one MasterCard travelers cheques issuer. MasterCard obtained an unlimited guarantee estimated at $267 million and $280 million at June 30, 2011 and December 31, 2010, respectively, from a financial institution that is a member, to cover all of the exposure of outstanding travelers cheques with respect to such issuer. In addition, MasterCard obtained a limited guarantee

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

estimated at $13 million as of June 30, 2011 and December 31, 2010, from a financial institution that is a member in order to cover the exposure of outstanding travelers cheques with respect to another issuer. These guarantee amounts have also been reduced by an actuarial determination of travelers cheques that are not anticipated to be presented for payment.

Beginning in 2008, many of the Company s financial institution customers were directly and adversely impacted by the unprecedented events that occurred in the financial markets around the world. The ongoing economic turmoil presents increased risk that the Company may have to perform under its settlement and travelers cheque guarantees. General economic conditions and political conditions in countries in which MasterCard operates may also affect the Company s settlement risk. The Company s global risk management policies and procedures, which are revised and enhanced from time to time, continue to be effective as evidenced by the historically low level of losses that the Company has experienced from customer financial institution failures.

MasterCard also provides guarantees to customers and certain other companies indemnifying them from losses stemming from failures of third parties to perform duties. The amount of the guarantees was estimated at approximately $66 million and $20 million, as of June 30, 2011 and December 31, 2010, respectively.

The Company enters into business agreements in the ordinary course of business under which the Company agrees to indemnify third parties against damages, losses and expenses incurred in connection with legal and other proceedings arising from relationships or transactions with the Company. As the extent of the Company s obligations under these agreements depends entirely upon the occurrence of future events, the Company s potential future liability under these agreements is not determinable. See Note 5 (Fair Value).

Note 21. Foreign Exchange Risk Management

The Company enters into foreign currency forward contracts to manage risk associated with anticipated receipts and disbursements which are either transacted in a non-functional currency or valued based on a currency other than its functional currencies. The Company also enters into foreign currency forward contracts to offset possible changes in value due to foreign exchange fluctuations of assets and liabilities denominated in foreign currencies. The objective of this activity is to reduce the Company s exposure to transaction gains and losses resulting from fluctuations of foreign currencies against its functional currencies.

The Company does not designate foreign currency derivatives as hedging instruments pursuant to the accounting standards for derivative instruments and hedging activities. The Company records the change in the estimated fair value of the outstanding derivatives at the end of the reporting period to its consolidated balance sheet and consolidated statement of operations.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

As of June 30, 2011, contracts to purchase and sell foreign currency had been executed largely with customers of MasterCard. MasterCard s derivative contracts are classified by functional currency as summarized below:

U.S. Dollar Functional Currency

	June 30, 2011		December 31, 2010	
	Notional	Estimated Fair Value [1]	Notional	Estimated Fair Value [1]
	(in millions)			
Commitments to purchase foreign currency	$ 20	$	$ 36	$ 1
Commitments to sell foreign currency	271	(4)	129	(2)
Balance Sheet Location:				
Accounts Receivable		1		1
Other Current Liabilities		(5)		(2)

Euro Functional Currency

	June 30, 2011		December 31, 2010	
	Notional	Estimated Fair Value [1]	Notional	Estimated Fair Value [1]
	(in millions)			
Commitments to purchase foreign currency	$ 11	$	$ 2	$
Commitments to sell foreign currency	58	1	14	
Balance Sheet Location:				
Accounts Receivable		2		
Other Current Liabilities		(1)		

U.K. Pound Sterling Functional Currency

	June 30, 2011		December 31, 2010	
	Notional	Estimated Fair Value [1]	Notional	Estimated Fair Value [1]
	(in millions)			
Commitments to purchase foreign currency	$	$	$	$
Commitments to sell foreign currency	20		5	
Balance Sheet Location:				
Accounts Receivable				
Other Current Liabilities				

	Amount and Location of Gain (Loss) Recognized in Income			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(in millions)		(in millions)	
Derivatives Not Designated As Hedging Instruments				
Foreign Currency Derivative Contracts				

General and administrative	$ (1)	$ (4)	$ (12)	$ (9)
Revenues	(2)		(4)	(1)
Total	$ (3)	$ (4)	$ (16)	$ (10)

[1] Amounts represent gross fair value amounts while these amounts may be netted for actual balance sheet presentation.

The currencies underlying the foreign currency forward contracts consist primarily of the Australian dollar, Canadian dollar, Chinese renminbi, Hong Kong dollar, Indian rupee, Korean won, Mexican peso, Swiss francs, Thai baht, Turkish lira and U.K. pound sterling. The fair value of the foreign currency forward contracts generally reflects the estimated amounts that the Company would receive (or pay), on a pre-tax basis, to terminate the contracts at the reporting date based on broker quotes for the same or similar instruments. The terms of the foreign currency forward contracts are generally less than 18 months. The Company had no deferred gains or losses related to foreign exchange in accumulated other comprehensive income as of June 30, 2011 and December 31, 2010 as there were no derivative contracts accounted for under hedge accounting.

Table of Contents

MASTERCARD INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The Company s derivative financial instruments are subject to both credit and market risk. Credit risk is the risk of loss due to failure of the counterparty to perform its obligations in accordance with contractual terms. Market risk is the risk of loss due to the potential change in an instrument s value caused by fluctuations in interest rates and other variables related to currency exchange rates. Credit and market risk related to derivative instruments were not material at June 30, 2011 and December 31, 2010.

Generally, the Company does not obtain collateral related to derivatives because of the high credit ratings of the counterparties. The amount of loss the Company would incur if the counterparties failed to perform according to the terms of the contracts is not considered material.

Table of Contents

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements and notes of MasterCard Incorporated and its consolidated subsidiaries, including MasterCard International Incorporated (MasterCard International) (together, MasterCard or the Company) included elsewhere in this Report. Percentage changes provided throughout Management s Discussion and Analysis of Financial Condition and Results of Operations were calculated on amounts rounded to the nearest thousand.

Forward-Looking Statements

This Report on Form 10-Q contains forward-looking statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts may be forward-looking statements. When used in this Report, the words believe , expect , could , may , would , will , trend and similar words are intended to identify forward-looking statements. These forward-looking statements relate to the Company s future prospects, developments and business strategies and include, without limitation, statements relating to:

- the Company s belief in the continuing trend towards electronic forms of payment;
- the Company s focus on growing its credit, debit, prepaid and payment transaction processing offerings;
- the Company s focus on diversifying its business (including seeking new areas of growth, expanding acceptance points and maintaining unsurpassed acceptance and successfully working with new business partners);
- the Company s focus on building new businesses through e-Commerce, mobile and other initiatives;
- the recent acquisition of the prepaid card program management operations of Travelex Holdings Ltd., now referred to as Access Prepaid Worldwide (as described below);
- the effects of economic recoveries in areas such as the Asia/Pacific and Latin America regions;
- the Company s advertising and marketing strategy and investment;
- the potential reduction in the Company s tax rate over time;
- the Company s belief that cash generated from operations, our borrowing capacity and our access to capital resources are sufficient to meet our future operating capital needs and litigation settlement obligations; and
- the manner and amount of purchases by the Company pursuant to its share repurchase program, dependent upon price and market conditions.

Many factors and uncertainties relating to our operations and business environment, all of which are difficult to predict and many of which are outside of our control, influence whether any forward-looking statements can or will be achieved. Any one of those factors could cause our actual results to differ materially from those expressed or implied in writing in any forward-looking statements made by MasterCard or on its behalf. We believe there are certain risk factors that are important to our business, and these could cause actual results to differ from our expectations. Such risk factors include: litigation decisions, regulation and legislation related to interchange fees and related practices; regulation

established by the Dodd-Frank Wall Street Reform and Consumer Protection Act in the United States; regulation in one jurisdiction or of one product resulting in regulation in other jurisdictions or of other products; competitive issues caused by government actions; regulation of the payments industry, consumer privacy, data use and/or security; appeals of currency conversion case settlements; future reserves, incurred liability, limitations on business and other penalties resulting from litigation; competition in the payments industry; competitive pressure on pricing; banking industry consolidation; loss of significant business from significant customers; merchant activity; our relationship and the relationship of our competitors to our customers; brand perceptions and reputation; inability to grow our debit business, particularly in the United States; global economic events and the overall business environment; decline in cross-border travel; the effect of general economic and global political conditions on consumer spending trends; exposure to loss or illiquidity due to settlement obligation defaults by our customers; disruptions to our transaction processing systems; account data breaches; reputation

Table of Contents

damage from increases in fraudulent activity; the inability to keep pace with technological developments in the industry; the effect of adverse currency fluctuation; the inability to adequately manage change; acquisition integration issues; and issues relating to our Class A common stock and corporate governance structure. Please see a complete discussion of these risk factors in Part I, Item 1A (Risk Factors) of the Company s Annual Report on Form 10-K for the year ended December 31, 2010. We caution you that the important factors referenced above may not contain all of the factors that are important to you. Our forward-looking statements speak only as of the date of this report or as of the date they are made, and we undertake no obligation to update our forward-looking statements.

In this Report, references to the Company, MasterCard, we, us or our refer to the MasterCard brand generally, and to the business conducted MasterCard Incorporated and its consolidated subsidiaries, including our operating subsidiary, MasterCard International Incorporated (d/b/a MasterCard Worldwide).

Overview

MasterCard is a leading global payment solutions company that provides a critical economic link among financial institutions, businesses, merchants, cardholders and governments worldwide, enabling them to use electronic forms of payment instead of cash and checks. We provide a variety of services in support of the credit, debit, prepaid and related payment programs of approximately 21,000 financial institutions and other entities that are our customers. We primarily:

- offer a wide range of payment solutions, which enable our customers to develop and implement credit, debit, prepaid and related payment programs for their customers (which include cardholders, businesses and government entities),
- manage a family of well-known, widely accepted payment card brands, including MasterCard, Maestro and Cirrus, which we license to our customers for use in their payment programs,
- process payment transactions over the MasterCard Worldwide Network,
- provide support services to our customers and, depending upon the service, merchants and other clients, and
- as part of managing our brands and our franchise, establish and enforce a common set of standards for adherence by our customers for the efficient and secure use of our payment card network.

We generate revenues from the fees that we charge our customers for providing transaction processing and other payment-related services and by assessing our customers based primarily on the dollar volume of activity on the cards that carry our brands. Cardholder and merchant relationships are managed principally by our customers. We do not issue cards, extend credit to cardholders, determine the interest rates (if applicable) or other fees charged to cardholders by issuers, or establish the merchant discount charged by acquirers in connection with the acceptance of cards that carry our brands.

We believe the trend within the global payments industry from paper-based forms of payment, such as cash and checks, toward electronic forms of payment, such as payment card transactions, creates significant opportunities for the growth of our business over the longer term. Our focus is on continuing to:

- grow our offerings by extending our strength in our core businesses globally, including credit, debit, prepaid and processing payment transactions over the MasterCard Worldwide Network,
- diversify our business by seeking new areas of growth in markets around the world, expanding points of acceptance for our brands in new geographies, seeking to maintain unsurpassed acceptance, and working with new business partners such as merchants,

government agencies and telecommunications companies, and

build new businesses through continued strategic efforts with respect to innovative payment methods, such as electronic commerce (e-Commerce) and mobile capabilities.

Table of Contents

See -Business Environment for a discussion of environmental considerations related to our long-term strategic objectives.

We recorded net income of $608 million, or $4.76 per diluted share, and $1,170 million or $9.05 per diluted share for the three months and six months ended June 30, 2011, respectively, versus net income of $458 million, or $3.49 per diluted share, and net income of $913 million, or $6.95 per diluted share, for the three months and six months ended June 30, 2010, respectively. As of June 30, 2011, our liquidity and capital positions remained strong, with $3.6 billion in cash and cash equivalents and current available-for-sale securities and $5.5 billion in equity. In addition, we generated cash flows from operations of $893 million for the six months ended June 30, 2011.

Our net revenues increased 22.1% and 18.5% for the three months and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to the increased dollar volume of activity on cards carrying our brands, increased transactions and pricing changes. The net foreign currency impact of changes in the U.S. dollar average exchange rates against the euro and Brazilian real had a favorable impact on net revenues by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

Our revenues depend heavily upon the overall level of consumer, business and government spending. Changes in cardholder spending behavior, influenced by economic environments, impact our ability to grow our revenues. Our revenues are primarily based on transactions and volumes, which are impacted by the number of transactions and the dollar amount of each transaction. For the three and six months ended June 30, 2011, volume-based revenues (domestic assessments and cross-border volume fees) and transaction-based revenues (transaction processing fees) increased compared to the three and six months ended June 30, 2010. For the three and six months ended June 30, 2011, our processed transactions increased 17.4% and 14.3%, respectively, and on a local currency basis our volumes increased 16.4% and 14.7%, respectively. This compares to increased processed transactions of 0.1% and 2.3% for the three and six months ended June 30, 2010, respectively, and increased volumes of 8.6% on a local currency basis during each of the three and six month periods ended June 30, 2010. The net effects of pricing actions contributed approximately 2 and 3 percentage points to our net revenue growth for the three and six months ended June 30, 2011, respectively. Overall, net revenue growth for the three and six months months ended June 30, 2011 was moderated by an increase in rebates and incentives relating to customer and merchant agreement activity.

Our operating expenses increased 20.8% and 15.3% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010. The increase was primarily due to greater general and administrative expenses, due to personnel expenses and professional fees, including expenses related to recent acquisitions. The net foreign currency impact of changes in the U.S. dollar average exchange rates against the euro and the Brazilian real unfavorably impacted expenses by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

Our ratios of operating income as a percentage of net revenues, or operating margins, were 53.1% and 54.3% for the three and six months ended June 30, 2011, respectively, versus 52.6% and 53.0% for the comparable periods in 2010.

The effective income tax rates were 31.8% and 32.3% for the three and six months ended June 30, 2011, respectively, versus 35.7% and 35.1% for the comparable periods in 2010.

On December 9, 2010, MasterCard entered into an agreement to acquire the prepaid card program management operations of Travelex Holdings Ltd., now referred to as Access Prepaid Worldwide (Access). Pursuant to the terms of the acquisition agreement, the Company acquired Access on April 15, 2011, at a purchase price of 295 million U.K. pound sterling, or $481 million, including adjustments for working capital, with contingent consideration (an earn-out) of up to an additional 35 million U.K. pound sterling, or approximately $57 million, if certain performance targets are met.

Access manages and delivers consumer and corporate prepaid travel cards through business partners around the world, including financial institutions, retailers, travel agents and foreign exchange bureaus. The acquisition of Access is an expansion of our business into program management services. The acquisition is intended to enable us to offer end-to-end prepaid card solutions encompassing branded switching, issuing, processing and program management services, initially focused on the travel sector and in markets outside the United States.

Table of Contents

Business Environment

We process transactions from more than 210 countries and territories and in more than 150 currencies. Net revenue generated in the United States was approximately 39.7% and 39.9% of total net revenue for the three and six months ended June 30, 2011, respectively, versus 43.4% and 42.2%, in the comparable periods in 2010. No individual country, other than the United States, generated more than 10% of total revenues in any period, but differences in market maturity, economic health, price changes and foreign exchange fluctuations in certain countries have increased the proportion of revenues generated outside the United States over time. While the global nature of our business helps protect our operating results from adverse economic conditions in a single or a few countries, the significant concentration of our revenues generated in the United States makes our business particularly susceptible to adverse economic conditions in the United States.

The competitive and evolving nature of the global payments industry provides both challenges to and opportunities for the continued growth of our business. Unprecedented events which began during 2008 impacted the financial markets around the world, including continued distress in the credit environment, continued equity market volatility and additional government intervention. In particular, the economies of the United States and the United Kingdom were significantly impacted by this economic turmoil, and it has also impacted other economies around the world. Countries that have experienced credit ratings actions by ratings agencies include several in Europe and the United States. Some existing customers have been placed in receivership or administration or have a significant amount of their stock owned by their governments. Many financial institutions are facing increased regulatory and governmental influence, including potential further changes in laws and regulations. Many of our financial institution customers, merchants that accept our brands and cardholders who use our brands have been directly and adversely impacted.

MasterCard s financial results may be negatively impacted by actions taken by individual financial institutions or by governmental or regulatory bodies in response to an economic crisis and the state of economic environments. The severity of the economic environments may accelerate the timing of or increase the impact of risks to our financial performance that have historically been present. As a result, our revenue growth may be negatively impacted, or the Company may be impacted in several ways, including but not limited to the following:

- Declining economies, foreign currency fluctuations and the pace of economic recovery can change consumer spending behaviors; for example, a significant portion of our revenues is dependent on cross-border travel patterns, which may continue to change.

- Constriction of consumer and business confidence, such as in recessionary environments and those markets experiencing relatively high unemployment, may cause decreased spending by cardholders.

- Our customers may restrict credit lines to cardholders or limit the issuance of new cards to mitigate increasing cardholder defaults.

- Uncertainty and volatility in the performance of our customers businesses may make estimates of our revenues, rebates, incentives and realization of prepaid assets less predictable.

- Our customers may implement cost reduction initiatives that reduce or eliminate payment card marketing or increase requests for greater incentives or greater cost stability.

- Our customers may decrease spending for optional or enhanced services.

- Government intervention, including the effect of laws, regulations and/or government investments in our customers, may have potential negative effects on our business and our relationships with customers or otherwise alter their strategic direction away from our products.

Tightening of credit availability could impact the ability of participating financial institutions to lend to us under the terms of our credit facility.

Table of Contents

Our customers may default on their settlement obligations. See Note 20 (Settlement and Other Risk Management) to the consolidated financial statements included in Part I, Item 1 for further discussion of our settlement exposure.

Our business and prospects, as well as our revenue and profitability, could be materially and adversely affected by consolidation of our customers. See Additional consolidation or other changes in or affecting the banking industry could result in a loss of business for MasterCard and create pressure on the fees we charge our customers, resulting in lower prices and/or more favorable terms for our customers, which may materially and adversely affect our revenues and profitability in Part I, Item 1A (Risk Factors) of the Company s Annual Report on Form 10-K for the year ended December 31, 2010 for further discussion.

In addition, our business and our customers businesses are subject to regulation in many countries. Regulatory bodies may seek to impose rules and price controls on certain aspects of our business and the payments industry. See Note 19 (Legal and Regulatory Proceedings) to the consolidated financial statements included in Part I, Item 1 of this Report and Part I, Item 1A (Risk Factors) of the Company s Annual Report on Form 10-K for the year ended December 31, 2010 for further discussion. In particular, in July 2010, the United States enacted into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), in accordance with which the United States Federal Reserve Board promulgated rules related to debit cards and interchange fees in June 2011. The rules revised earlier proposed rules provided by the Federal Reserve Board in December 2010. See Risk Factors Legal and Regulatory Risks The Wall Street Reform and Consumer Protection Act may have a material adverse impact on our revenue, our prospects for future growth and our overall business, financial condition and results of operations in Part I, Item 1A (Risk Factors) of the Company s Annual Report on Form 10-K for the year ended December 31, 2010 for further discussion on the context of the Dodd-Frank Act and pending regulations, including with respect to: (1) regulation providing for limitations on debit and prepaid interchange transaction fees and (2) regulation prohibiting exclusive debit network arrangements and routing restrictions for debit, as well as the creation of independent regulatory bodies (such as the Financial Stability Oversight Council) with the authority to regulate consumer financial products and, potentially, broader aspects of payment card network operations (e.g., the ability to deem MasterCard systematically important). See also Risk Factors Legal and Regulatory Risks New regulations in one jurisdiction or of one product may lead to new regulations in other jurisdictions or of other products in Part I, Item 1A, of the Company s Annual Report on Form 10-K for the year ended December 31, 2010.

MasterCard continues to monitor the extent and pace of economic recovery around the world to identify opportunities for the continued growth of our business and to evaluate the evolution of the global payments industry. For example, in our Asia/Pacific and Latin American regions, we have now experienced several quarters of significant increases in dollar volume of activity on cards carrying our brands in those regions while in the U.S. we have observed mixed economic indicators, including retail spending and unemployment rates. Notwithstanding recent encouraging trends, the extent and pace of economic recovery in various regions remains uncertain and the overall business environment may present challenges for MasterCard to grow its business.

Impact of Foreign Currency Rates

Our overall operating results are impacted by changes in foreign currency exchange rates, especially the strengthening or weakening of the U.S. dollar versus the euro and Brazilian real. The functional currency of MasterCard Europe, our principal European operating subsidiary, is the euro, and the functional currency of our Brazilian subsidiary is the Brazilian real. Accordingly, the strengthening or weakening of the U.S. dollar versus the euro and Brazilian real impacts the translation of our European and Brazilian subsidiaries operating results into the U.S. dollar. During the three and six months ended June 30, 2011, the U.S. dollar weakened against both the euro and the Brazilian real, versus the comparable periods in 2010. Accordingly, the net foreign currency impact of changes in the U.S. dollar average exchange rates against the euro and Brazilian real had a favorable impact on net revenues by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively, while operating expenses were unfavorably impacted by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

In addition, changes in foreign currency exchange rates directly impact the calculation of gross dollar volume (GDV) and gross euro volume (GEV), which are used in the calculation of our domestic assessments, cross-border volume fees and volume related rebates and incentives. In most non-European regions, GDV is calculated based on local currency spending volume converted to U.S. dollars using average exchange rates for the period. In Europe, GEV is calculated based on local currency spending volume converted to euros using average exchange rates for the period. As a result, our domestic assessments, cross-border volume fees and volume related rebates and incentives are impacted by the strengthening or weakening of the U.S. dollar versus most non-European local currencies and the strengthening or weakening of the euro versus European local currencies. The strengthening or weakening of the U.S. dollar is evident when GDV growth on a U.S. dollar converted basis is compared to GDV growth on a local currency basis. For the three and six months ended June 30, 2011, GDV increased 23.6% and 19.5%, respectively, when measured on a U.S. dollar converted basis and increased 16.4% and 14.7%, respectively, when measured on a local currency basis, versus the comparable period in 2010.

Table of Contents

Revenues

Revenue Descriptions

MasterCard s business model involves four participants in addition to us: cardholders, merchants, issuers (the cardholders banks) and acquirers (the merchants banks). Our gross revenues are typically based on the volume of activity on cards that carry our brands, the number of transactions we process for our customers or the nature of other payment-related services we provide to our customers. Our revenues are based upon transactional information accumulated by our systems or reported by our customers. Our primary revenue billing currencies are the U.S. dollar, euro and Brazilian real.

We process transactions denominated in more than 150 currencies through our global system, providing cardholders with the ability to utilize, and merchants to accept, MasterCard cards across multiple country borders. We process most of the cross-border transactions using MasterCard, Maestro and Cirrus-branded cards and, among our largest markets, process the majority of MasterCard-branded domestic transactions in the United States, United Kingdom, Canada and Brazil.

Our pricing is complex and is dependent on the nature of the volumes, types of transactions and other products and services we offer to our customers. A combination of the following factors determines the pricing:

Domestic or cross-border

Signature-based (credit and off-line debit) or PIN-based (on-line debit, including automated teller machine (ATM) cash withdrawals and retail purchases)

Tiered pricing, with rates decreasing as customers meet incremental volume/transaction hurdles

Geographic region or country

Retail purchase or cash withdrawal

Cross-border transactions generate greater revenue than do domestic transactions since cross-border fees are higher than domestic fees. We review our pricing and implement pricing changes on an ongoing basis and pricing may impact revenue growth in the future. In addition, standard pricing varies among our regional businesses, and such pricing can be customized further for our customers through incentive and rebate agreements.

The Company classifies its net revenues into the following five categories:

1. **Domestic assessments:** Domestic assessments are fees charged to issuers and acquirers based primarily on the volume of activity on cards that carry our brands where the merchant country and the cardholder country are the same. A portion of these assessments is estimated based on aggregate transaction information collected from our systems and projected customer performance and is calculated by converting the aggregate volume of usage (purchases, cash disbursements, balance transfers and convenience checks) from local currency to the billing currency and then multiplying by the specific price. In addition, domestic assessments include items such as card assessments, which are fees charged on the number of cards issued or assessments for specific purposes, such as acceptance development or market development programs. Acceptance development fees are charged primarily to U.S. issuers based on components of volume, and support our focus on developing merchant relationships and promoting acceptance at the point of sale.

2. **Cross-border volume fees:** Cross-border volume fees are charged to issuers and acquirers based on the volume of activity on cards that carry our brands where the merchant country and the cardholder country are different. Cross-border volume fees are calculated by converting the aggregate volume of usage (purchases and cash disbursements) from local currency to the billing currency and then multiplying by the specific price. Cross-border volume fees also include fees, charged to issuers, for performing currency conversion services.

3. **Transaction processing fees:** Transaction processing fees are charged for both domestic and cross-border transactions and are primarily based on the number of transactions. These fees are calculated by

Table of Contents

multiplying the number and type of transactions by the specific price for each service. Transaction processing fees include charges for the following:

Transaction Switching Authorization, Clearing and Settlement.

a. *Authorization* refers to a process in which a transaction is approved by the issuer or, in certain circumstances such as when the issuer s systems are unavailable or cannot be contacted, by MasterCard or others on behalf of the issuer in accordance with either the issuer s instructions or applicable rules. MasterCard s rules, which vary across regions, establish the circumstances under which merchants and acquirers must seek authorization of transactions. Fees for authorization are primarily paid by issuers.

b. *Clearing* refers to the exchange of financial transaction information between issuers and acquirers after a transaction has been completed. Fees for clearing are primarily paid by issuers.

c. *Settlement* refers to facilitating the exchange of funds between parties. Fees for settlement are primarily paid by issuers.

Connectivity fees are charged to issuers and acquirers for network access, equipment and the transmission of authorization and settlement messages. These fees are based on the size of the data being transmitted through and the number of connections to the Company s network.

4. **Other revenues**: Other revenues for other payment-related services are primarily dependent on the nature of the products or services provided to our customers but are also impacted by other factors, such as contractual agreements. Examples of other revenues are fees associated with the following:

Fraud products and services used to prevent or detect fraudulent transactions. This includes warning bulletin fees which are charged to issuers and acquirers for listing invalid or fraudulent accounts either electronically or in paper form and for distributing this listing to merchants.

Cardholder services fees are for benefits provided with MasterCard-branded cards, such as insurance, telecommunications assistance for lost cards and locating automated teller machines.

Consulting and research fees are primarily generated by MasterCard Advisors, the Company s professional advisory services group. The Company s business agreements with certain customers and merchants may include consulting services as an incentive. The contra-revenue associated with these incentives is included in rebates and incentives.

Program management services provided to prepaid card issuers. This primarily includes foreign exchange margin, commissions, load fees, and ATM withdrawal fees paid by cardholders on the sale and encashment of prepaid cards. See Note 2 (Acquisition of Card Program Management Operations) to the consolidated financial statements included in Part I, Item 1 for further discussion**.**

The Company also charges for a variety of other payment-related services, including rules compliance, account and transaction enhancement services, holograms and publications.

5. **Rebates and incentives (contra-revenue):** Rebates and incentives are provided to certain MasterCard customers and are recorded as contra-revenue in the same period that performance occurs. Performance periods vary depending on the type of rebate or incentive, including commitments to the agreement term, hurdles for volumes, transactions or issuance of new cards, launch of new programs, or the execution of marketing programs. Rebates and incentives are calculated based on estimated performance, the timing of new and renewed agreements and the terms of the related business agreements.

Revenue Analysis

Gross revenues increased $373 million and $603 million, or 20.5% and 16.9%, for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to increased dollar volume

Table of Contents

of activity on cards carrying our brands and increased transactions. Rebates and incentives increased $71 million and $108 million, or 15.5% and 12.0%, for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010. Our net revenues increased 22.1% and 18.5% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010.

Our revenues are primarily based on transactions and volumes, which are impacted by the number of transactions and the dollar amount of each transaction. For the three months ended June 30, 2011, our processed transactions increased 17.4% and our volumes increased 16.4% on a local currency basis. For the six months ended June 30, 2011, our processed transactions increased 14.3% and our volumes increased 14.7% on a local currency basis. The effects of pricing actions implemented in 2010 and 2011 contributed approximately 2 and 3 percentage points to our net revenue growth for the three and six months ended June 30, 2011, respectively. The pricing structure for our acquirer revenues from cross-border transactions was simplified in the fourth quarter of 2010. Pursuant to the previous structure, MasterCard charged a cross-border volume fee but provided a rebate if MasterCard was allowed to perform the currency conversion. Beginning in October 2010, if MasterCard performs the currency conversion, the cross border volume fee charged is lower and no rebate is provided. This change had no impact to net revenues. Recent acquisitions contributed approximately 3 and 2 percentage points to our net revenue growth for the three and six months ended June 30, 2011, respectively.

The significant components of our net revenues were as follows for the three and six months ended June 30:

	For the Three Months Ended June 30,		Dollar Increase (Decrease)	Percent Increase (Decrease)	For the Six Months Ended June 30,		Dollar Increase (Decrease)	Percent Increase (Decrease)
	2011	2010	2011 vs. 2010	2011 vs. 2010	2011	2010	2011 vs. 2010	2011 vs. 2010
	(in millions, except percentages)							
Domestic assessments	$ 809	$ 650	$ 159	24.5%	$ 1,532	$ 1,237	$ 295	23.9%
Cross-border volume fees	511	468	43	9.2%	973	914	59	6.5%
Transaction processing fees	630	533	97	18.2%	1,220	1,042	178	17.0%
Other revenues	251	177	74	41.9%	454	383	71	18.4%
Gross revenues	2,201	1,828	373	20.5%	4,179	3,576	603	16.9%
Rebates and incentives (contra-revenues)	(534)	(463)	(71)	15.5%	(1,011)	(903)	(108)	12.0%
Net revenues	$ 1,667	$ 1,365	$ 302	22.1%	$ 3,168	$ 2,673	$ 495	18.5%

Domestic assessments There was an increase in domestic assessments of 24.5% and 23.9% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to:

GDV increased 16.4% and 14.7% during the three and six months ended June 30, 2011, respectively, when measured in local currency terms, and increased 23.6% and 19.5% when measured on a U.S. dollar-converted basis, versus the comparable periods in 2010.

Pricing changes increased domestic assessments by approximately 5 and 6 percentage points for the three and six months ended June 30, 2011, respectively.

The net impact of foreign currency relating to the translation of domestic assessments from our functional currencies to U.S. dollars favorably impacted domestic assessments revenue growth by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

Cross-border volume fees There was an increase in cross-border volume fees of 9.2% and 6.5% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to:

Cross-border volumes increased 19.3% and 18.9% for the three and six months ended June 30, 2011, respectively, when measured in local currency terms, and increased 31.0% and 26.3% when measured on a U.S. dollar-converted basis, versus the comparable periods in 2010.

Pricing changes reduced cross-border revenue by approximately 15 percentage points for each of the three and six months ended June 30, 2011. This decrease due to pricing changes included approximately 16 percentage

Table of Contents

points related to the pricing structure change implemented in October 2010 and was partially offset by pricing increases implemented during 2010.

The net impact of foreign currency relating to the translation of cross-border volume fees from our functional currencies to U.S. dollars favorably impacted cross-border volume fees revenue growth by approximately 3 and 1 percentage points for the three and six months ended June 30, 2011, respectively.

Transaction processing fees There was an increase in transaction processing fees of 18.2% and 17.0% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to:

Processed transactions increased 17.4% and 14.3% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010.

The effects of transaction processing activities for which revenues are not driven by the number of switching transactions also contributed to the growth in transaction processing fees.

The net impact of foreign currency relating to the translation of transaction processing fees from our functional currencies to U.S. dollars favorably impacted transaction processing fees revenue growth by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

Other revenues Other revenues increased 41.9% and 18.4% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to:

Revenues from recent acquisitions for the three and six months ended June 30, 2011 that did not have comparable revenues in 2010 and increased consulting fees for the three and six months ended June 30, 2011 versus the comparable periods in 2010.

The net impact of foreign currency relating to the translation of other revenues from our functional currencies to U.S. dollars favorably impacted other revenue growth by approximately 5 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

Rebates and incentives The increase in rebates and incentives of 15.5% and 12.0% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010 was primarily due to:

Higher rebates and incentives were driven by certain new and renewed agreements as well as increased performance. The Company intends to continue to enter into and maintain business agreements that provide rebates and incentives to certain customers and merchants.

Pricing changes reduced rebates and incentives growth by approximately 15 and 16 percentage points for the three and six months ended June 30, 2011, respectively, primarily due to the pricing structure change implemented in October 2010.

The net impact of foreign currency relating to the translation of rebates and incentives from our functional currencies to U.S. dollars unfavorably impacted rebates and incentives growth by approximately 3 and 1 percentage points for the three and six months ended June 30, 2011, respectively.

Operating Expenses

Our operating expenses are comprised of general and administrative, advertising and marketing, litigation settlements and depreciation and amortization expenses. For the three and six months ended June 30, 2011, operating expenses increased $134 million and $191 million, or 20.8% and 15.3%, respectively, versus the comparable periods in 2010, primarily due to greater general and administrative expenses, including expenses related to recent acquisitions. Recent acquisitions contributed approximately 7 and 5 percentage points to the increase in operating expenses for the three and six months ended June 30, 2011, respectively.

Table of Contents

General and Administrative

General and administrative expenses increased $107 million and $143 million, or 24.8% and 16.1%, respectively, for the three and six months ended June 30, 2011 versus the comparable periods in 2010, which includes the increases related to recent acquisitions, primarily in personnel and other expenses. The major components of general and administrative expenses were as follows:

	For the Three Months Ended June 30,		Dollar Increase (Decrease)	Percent Increase (Decrease)	For the Six Months Ended June 30,		Dollar Increase (Decrease)	Percent Increase (Decrease)
	2011	2010	2011 vs. 2010	2011 vs. 2010	2011	2010	2011 vs. 2010	2011 vs. 2010
	(in millions, except percentages)							
Personnel	$ 347	$ 286	$ 61	21.2%	$ 680	$ 601	$ 79	13.1%
Professional fees	62	43	19	45.4%	114	78	36	46.0%
Telecommunications	16	14	2	18.3%	31	29	2	9.7%
Data processing	26	21	5	22.5%	51	43	8	17.4%
Travel and entertainment	22	14	8	53.8%	41	27	14	51.2%
Other	67	55	12	22.2%	117	113	4	4.1%
General and administrative expenses	$ 540	$ 433	$ 107	24.8%	$ 1,034	$ 891	$ 143	16.1%

Personnel expense increased 21.2% and 13.1% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010. The increase was primarily due to higher salaries, incentives and benefits costs, including increased compensation related to an increase in the number of employees from recent acquisitions and in support of the Company s strategic initiatives.

Professional fees consist primarily of third-party consulting services related to strategic initiatives and legal costs to defend our outstanding litigation. Professional fees increased 45.4% and 46.0% for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to the execution and integration of acquisitions and other strategic opportunities.

Other expenses include rental expense for our facilities, foreign exchange gains and losses, litigation settlements and other miscellaneous administrative expenses. The increase for the three and six months ended June 30, 2011 includes increased operational expenses from recent acquisitions, partially offset by lower net expenses from foreign currency remeasurement and foreign exchange risk management.

The net impact of foreign currency relating to the translation of general and administrative expenses from our functional currencies to U.S. dollars unfavorably impacted general and administrative expenses by approximately 4 and 2 percentage points for the three and six months ended June 30, 2011, respectively.

Advertising and Marketing

Our brands, principally MasterCard, are valuable strategic assets that drive card acceptance and usage and facilitate our ability to successfully introduce new service offerings and access new markets globally. Our advertising and marketing strategy is to increase global MasterCard brand awareness, preference and usage through integrated advertising, sponsorship, promotional, interactive media and public relations programs on a global scale. We will also continue to invest in marketing programs at the regional and local levels and sponsor diverse events aimed at multiple target audiences. Advertising and marketing expenses increased $13 million and $27 million, or 7.1% or 9.0%, for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, mainly due to sponsorships and customer-specific and strategic initiatives. The net foreign currency impact of changes in the U.S. dollar average exchange rates against the euro and the Brazilian real unfavorably impacted advertising and marketing expenses by approximately 5 and 3 percentage points for the three and six months ended June 30, 2011, respectively.

Depreciation and Amortization

Depreciation and amortization expenses increased $14 million and $21 million, or 43.2% and 31.1%, for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010. The increases in depreciation and amortization expense reflected the amortization of intangible assets from recent acquisitions and increased investments in data center equipment.

Table of Contents

Other Income (Expense)

Other income (expense) is comprised primarily of investment income, interest expense and other gains and losses. The components of other income (expense) for the three and six months ended June 30, 2011 and 2010 were as follows:

	For the Three Months Ended June 30,		Dollar Increase (Decrease)	Percent Increase (Decrease)	For the Six Months Ended June 30,		Dollar Increase (Decrease)	Percent Increase (Decrease)
	2011	2010	2011 vs. 2010	2011 vs. 2010	2010	2009	2010 vs. 2009	2010 vs. 2009
	(in millions, except percentages)							
Investment income	$ 11	$ 13	$ (2)	(18.8)%	$ 23	$ 23	$	0.7%

Other income (expense), net	(2)		(2)	*	(4)		(4)	*
Total other income (expense)	$ 7	$ (4)	$ 11	*	$ 7	$ (9)	$ 16	*

* Not meaningful.

Interest expense decreased $15 million and $20 million for the three and six months ended June 30, 2011, respectively, versus the comparable periods in 2010, primarily due to a decrease in interest accretion on litigation settlements as well as lower interest on uncertain tax positions and the settlement of income tax audits.

Income Taxes

The effective income tax rates were 31.8% and 35.7% for the three months ended June 30, 2011 and 2010, respectively, and 32.3% and 35.1% for the six months ended June 30, 2011 and June 30, 2010, respectively. The rate for the three months ended June 30, 2011was lower than the rate for the three months ended June 30, 2010 due primarily to a more favorable geographic mix of earnings, benefits recognized with regard to the anticipated repatriation from a foreign subsidiary and an adjustment related to the Company s U.S. foreign tax credits in the three months ended June 30, 2010. The rate for the six months ended June 30, 2011 was lower than the rate for the six months ended June 30, 2010 due primarily to a more favorable geographic mix of earnings and benefits recognized with regard to the anticipated repatriation from a foreign subsidiary.

In 2010, in connection with the expansion of the Company s operations in the Asia Pacific, Middle East and Africa region, the Company s subsidiary in Singapore, MasterCard Asia Pacific Pte. Ltd. (MAPPL), received from the Singapore Ministry of Finance, at the recommendation of the Singapore Economic Development Board, an incentive grant. The incentive provides MAPPL with, among other benefits, a 5% income tax rate for the ten-year period commencing January 1, 2010 on taxable income in excess of a base amount. The Company continues to explore additional opportunities in this region which may result in additional incentives to be granted by the Ministry of Finance, including an income tax rate lower than 5%.

Liquidity and Capital Resources

We need liquidity and access to capital to fund our global operations, to provide for credit and settlement risk, to finance capital expenditures, to make continued investments in our business and to service our obligations related to litigation settlements. At June 30, 2011 and December 31, 2010, we had $3.6 billion and $3.9 billion, respectively, of cash and cash equivalents and current available-for-sale securities to use for our operations. Total equity was $5.5 billion and $5.2 billion as of June 30, 2011 and December 31, 2010, respectively.

On December 9, 2010, MasterCard entered into an agreement to acquire Access. Pursuant to the terms of the acquisition agreement, the Company acquired Access on April 15, 2011 at a purchase price of 295 million U.K. pound sterling, or $481 million, including adjustments for working capital, with contingent consideration of up to an additional 35 million U.K. pound sterling, or approximately $57 million, if certain performance targets are met.

In September 2010, the Company s Board of Directors authorized a plan for the Company to repurchase up to $1 billion of its Class A common stock in open market transactions. In April 2011, the Company s Board of Directors amended the existing share repurchase program authorizing the Company to repurchase an incremental $1 billion of its Class A common stock in open market transactions. The incremental $1 billion share repurchase authorization increases the Class A share repurchase program to an aggregate of $2 billion. The Company did not

46

Table of Contents

repurchase any shares under this plan during 2010. During the three months ended June 30, 2011, MasterCard repurchased a total of approximately 1.5 million shares, for an aggregate cost of $387 million at an average price of $263.89 per share of Class A common stock. During the six months ended June 30, 2011, MasterCard repurchased a total of approximately 4.1 million shares, for an aggregate cost of $1 billion at an average price of $254.01 per share of Class A common stock. These repurchased shares are considered treasury stock.

As of July 28, 2011, the cumulative repurchases by the Company during 2011 totaled approximately 4.2 million shares of its Class A common stock for an aggregate cost of approximately $1.1 billion at an average price of $254.99 per share of Class A common stock. The timing and actual number of additional shares repurchased will depend on a variety of factors, including legal requirements, price and economic and market conditions.

The Company believes that its existing cash balances, its cash flow generating capabilities, its borrowing capacity and its access to capital resources are sufficient to satisfy its future operating cash needs, capital asset purchases, outstanding commitments and other liquidity requirements associated with its existing operations and litigation settlement obligations. Cash and cash equivalents, and current available-for-sale investment securities held by our foreign subsidiaries (i.e., any entities where earnings would be subject to U.S. tax upon repatriation) was $1.5 billion and $1.1 billion at June 30, 2011 and December 31, 2010, respectively, or 41% and 28% of our total cash and cash equivalents and current available-for-sale investment securities as of such dates. It is our present intention to permanently reinvest the undistributed earnings associated with our foreign subsidiaries as of December 31, 2010 outside of the United States (as disclosed in Note 21 (Income Tax) to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2010), and our current plans do not require repatriation of these earnings. If these earnings are needed for U.S operations or can no longer be permanently reinvested outside of the United States, the Company would be subject to U.S. tax upon repatriation.

Our liquidity and access to capital could be negatively impacted by the adverse outcome of any of the legal or regulatory proceedings to which we are still a party. See Item 1A (Risk Factors) in Part 1 of the Company s Annual Report on Form 10-K for the year ended December 31, 2010. See also Notes 17 (Obligations Under Litigation Settlements) and 19 (Legal and Regulatory Proceedings) to the consolidated financial statements included in Part I, Item 1 of this Report and -Business Environment for more information.

The table below shows a summary of the cash flows from operating, investing and financing activities:

	Six Months Ended June 30,	
	2011	2010
	(in millions)	
Cash Flow Data:		
Net cash provided by operating activities	$ 893	$ 438
Net cash used in investing activities	(214)	(20)
Net cash (used in) provided by financing activities	(1,083)	59

	June 30, 2011	December 31, 2010
	(in millions)	
Balance Sheet Data:		
Current assets	$ 6,011	$ 6,454
Current liabilities	2,964	3,143
Long-term liabilities	580	478
Equity	5,481	5,216

Net cash provided by operating activities for the six months ended June 30, 2011 was $893 million versus $438 million for the comparable period in 2010. Net cash provided by operating activities for the six months ended June 30, 2011 was primarily due to net income partially offset by litigation settlement payments. Net cash provided by operating activities for the six months ended June 30, 2010 was primarily due to net income partially offset by litigation settlement payments and the effect of stock units withheld for taxes.

Table of Contents

Net cash used in investing activities for the six months ended June 30, 2011 primarily related to the acquisition of Access, partially offset by proceeds from maturities of investment securities. Net cash used for investing activities for the six months ended June 30, 2010 primarily related to expenditures for our global network, offset by net cash inflows from proceeds from sales and maturities of available-for-sale investment securities.

Net cash used in financing activities for the six months ended June 30, 2011 primarily related to the repurchase of the Company s Class A common stock and dividend payments of $39 million to our stockholders. Net cash provided by financing activities for the six months ended June 30, 2010 primarily related to the tax benefit for share-based compensation, partially offset by the payment of $39 million in cash dividends to our stockholders.

Dividends

On June 6, 2011, our Board of Directors declared a quarterly cash dividend of $0.15 per share payable on August 9, 2011 to holders of record on July 8, 2011 of our Class A common stock and Class B common stock. The aggregate amount of this dividend is $19 million. The declaration and payment of future dividends will be at the sole discretion of our Board of Directors after taking into account various factors, including our financial condition, settlement guarantees, operating results, available cash and anticipated cash needs.

Credit Availability

On November 22, 2010, the Company entered into a committed three-year unsecured $2.75 billion revolving credit facility (the Credit Facility) with certain financial institutions. The Credit Facility, which expires on November 22, 2013, replaced the Company s prior credit facility which was to expire on April 26, 2011. Borrowings under the Credit Facility are available to provide liquidity for general corporate purposes, including providing liquidity in the event of one or more settlement failures by our customers. In addition, for business continuity planning and related purposes, we may borrow and repay amounts under the Credit Facility from time to time. The facility fee and borrowing cost under the Credit Facility are contingent upon our credit rating. At June 30, 2011, the applicable facility fee was 20 basis points on the average daily commitment (whether or not utilized). In addition to the facility fee, interest on borrowings under the Credit Facility would be charged at the London Interbank Offered Rate (LIBOR) plus an applicable margin of 130 basis points or an alternate base rate plus 30 basis points.

The Credit Facility contains customary representations, warranties and affirmative and negative covenants, including a maximum level of consolidated debt to earnings before interest, taxes, depreciation and amortization (EBITDA) financial covenant and events of default. MasterCard was in compliance with the covenants of the Credit Facility and had no borrowings under the Credit Facility at June 30, 2011 and December 31, 2010. The majority of Credit Facility lenders are members or affiliates of members of MasterCard International.

Table of Contents

Future Obligations

The following table summarizes our obligations as of June 30, 2011 that are expected to impact liquidity and cash flow in future periods. We believe we will be able to fund these obligations through cash generated from operations and our cash balances.

	Payments Due by Period				
	Total	Remaining 2011	2012-2013	2014-2015	2016 and thereafter
			(in millions)		
Capital leases [1]	$ 47	$ 2	$ 45	$	$
Operating leases [2]	100	16	45	22	17
Sponsorship, licensing and other [3,4,5]	525	205	249	66	5
Litigation settlements [6]	8	7	1		
Total	$ 680	$ 230	$ 340	$ 88	$ 22

1 Mostly related to certain property, plant and equipment. Capital lease for global technology and operations center located in O Fallon, Missouri has been excluded from this table; see Note 9 (Property, Plant and Equipment) to the consolidated financial statements included in Part I, Item 1 of this Form 10-Q for further discussion. There is a capital lease for the Kansas City, Missouri co-processing data center.

2 We enter into operating leases in the normal course of business. Substantially all lease agreements have fixed payment terms based on the passage of time. Some lease agreements provide us with the option to renew the lease or purchase the leased property. Our future operating lease obligations would change if we exercised these renewal options and if we entered into additional lease agreements.

3 Amounts primarily relate to sponsorships with certain organizations to promote the MasterCard brand. The amounts included are fixed and non-cancelable. In addition, these amounts include amounts due in accordance with merchant agreements for future marketing, computer hardware maintenance, software licenses and other service agreements. Future cash payments that will become due to our customers under agreements which provide pricing rebates on our standard fees and other incentives in exchange for transaction volumes are not included in the table because the amounts due are indeterminable and contingent until such time as performance has occurred. MasterCard has accrued $745 million as of June 30, 2011 related to customer and merchant agreements.

4 Includes current liability of $2 million relating to the accounting for uncertainty in income taxes. Due to the high degree of uncertainty regarding the timing of the non-current liabilities for uncertainties in income taxes, we are unable to make reasonable estimates of the period of cash settlements with the respective taxing authority.

5 Includes the current liability of $9 million relating to the contingent consideration for the acquisition of Access. Refer to Note 2 (Acquisition of Card Program Management Operations) to the consolidated financial statements included in Part I, Item 1 herein.

6 Represents amounts due in accordance with litigation and regulatory settlements.

Recent Accounting Pronouncements

Revenue arrangements with multiple deliverables - In September 2009, the accounting standard for the allocation of revenue in arrangements involving multiple deliverables was amended. Existing accounting standards require companies to allocate revenue based on the fair value of each deliverable, even though such deliverables may not be sold separately either by the company itself or other vendors. The new accounting standard eliminates (i) the residual method of revenue allocation and (ii) the requirement that all undelivered elements must have objective and reliable evidence of fair value before a company can recognize the portion of the overall arrangement fee that is attributable to items that already have been delivered. The Company adopted the revised accounting standard effective January 1, 2011 via prospective adoption. The adoption did not have an impact on the Company s financial position or results of operations.

Fair value measurement The Company measures certain assets and liabilities at fair value on a recurring basis by estimating the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When valuing liabilities, the Company also considers the Company s creditworthiness. The Company classifies these recurring fair value measurements into a three-level hierarchy (Valuation Hierarchy) and discloses the significant assumptions utilized in measuring assets and liabilities at fair value. In January 2010, fair value disclosure requirements were amended to require detailed disclosures about transfers to and from Level 1 and 2 of the Valuation Hierarchy effective January 1, 2010 and disclosures regarding purchases, sales, issuances, and settlements on a gross basis within the Level 3 (of the Valuation Hierarchy) reconciliation effective January 1, 2011. The Company adopted the new

guidance for disclosures about transfers to and from Level 1 and 2 of the Valuation Hierarchy effective January 1, 2010. The adoption did not have an impact on the Company s financial position or results of operations. The Company adopted the guidance that requires disclosure of a reconciliation of purchases, sales, issuances, and settlements on a gross basis within Level 3 (of the Valuation Hierarchy) effective January 1, 2011, as required, and the adoption did not have an impact on the Company s financial position or results of operations.

Table of Contents

In May 2011, the fair value accounting standard was amended to change fair value measurement principles and disclosure requirements. The key changes in measurement principles include limiting the concepts of highest and best use and valuation premise to nonfinancial assets, providing a framework for considering whether a premium or discount can be applied in a fair value measurement,, and aligning the fair value measurement of instruments classified within an entity s shareholders equity with the guidance for liabilities. Disclosures will be required for all transfers between Levels 1 and 2 within the Valuation Hierarchy, the use of a nonfinancial asset measured at fair value if its use differs from its highest and best use, the level in the Valuation Hierarchy of assets and liabilities not recorded at fair value but for which fair value is required to be disclosed, and for Level 3 measurements, quantitative information about unobservable inputs used, a description of the valuation processes used, and qualitative discussion about the sensitivity of the measurements. The Company will adopt the revised accounting standard effective January 1, 2012 via prospective adoption, as required, and does not anticipate that this adoption will have a material impact on the Company s financial position or results of operations.

Impairment testing for goodwill In December 2010, a new accounting standard was issued. This standard requires Step 2 of the goodwill impairment test to be performed for reporting units with zero or negative carrying amounts if qualitative factors indicate that it is more likely than not that a goodwill impairment exists. The provisions for this pronouncement are effective for fiscal years beginning after December 15, 2010, with no early adoption permitted. The Company adopted this accounting standard on January 1, 2011, and the adoption had no impact on the Company s financial position or results of operations.

Business combinations In December 2010, a new accounting standard was issued. This standard requires a company to disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period, only when comparative financial statements are presented. The disclosure provisions are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010, with early adoption permitted. The Company adopted this accounting standard on January 1, 2011 for prospective application. The adoption had no impact on the Company s financial position or results of operations.

Comprehensive income In June 2011, a new accounting standard was issued. This standard amends existing guidance by allowing only two options for presenting the components of net income and other comprehensive income: (1) in a single continuous statement of comprehensive income or (2) in two separate but consecutive financial statements, consisting of an income statement followed by a separate statement of other comprehensive income. Also, items that are reclassified from other comprehensive income to net income must be presented on the face of the financial statements. This standard requires retrospective application, and it is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. The Company will adopt the revised accounting standard effective January 1, 2012, and does not anticipate that this adoption will have a material impact on the Company s financial position or results of operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential for economic losses to be incurred on market risk sensitive instruments arising from adverse changes in market factors such as interest rates, foreign currency exchange rates and equity price risk. We have limited exposure to market risk from changes in interest rates, foreign exchange rates and equity price risk. Management establishes and oversees the implementation of policies governing our funding, investments and use of derivative financial instruments. We monitor risk exposures on an ongoing basis. There were no material changes in our market risk exposures at June 30, 2011 as compared to December 31, 2010. The Dodd-Frank Wall Street Reform and Consumer Protection Act includes provisions related to derivative instruments and the Company is determining what impact, if any, such provisions will have on the Company s financial position or results of operations.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

MasterCard Incorporated s management, including its President and Chief Executive Officer and its Chief Financial Officer, carried out an evaluation of the Company s disclosure controls and procedures (as defined in Rule

Table of Contents

13a-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Report. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Based on that evaluation, the Company s President and Chief Executive Officer and Chief Financial Officer concluded that MasterCard Incorporated s disclosure controls and procedures were effective as of the end of the period covered by this Report at the reasonable assurance level to accomplish their objectives of (i) recording, processing, summarizing and reporting information that is required to be disclosed in its reports under the Securities Exchange Act of 1934, as amended, within the time periods specified in the Securities and Exchange Commission s rules and forms and (ii) ensuring that information required to be disclosed in such reports is accumulated and communicated to MasterCard Incorporated s management, including its President and Chief Executive Officer and its Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

Changes in Internal Control over Financial Reporting

In connection with the evaluation by the Company s President and Chief Executive Officer and its Chief Financial Officer of changes in internal control over financial reporting that occurred during the Company s last fiscal quarter, no change in the Company s internal control over financial reporting was identified that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.

Other Financial Information

With respect to the unaudited consolidated financial information of MasterCard Incorporated and its subsidiaries as of June 30, 2011 and for the three and six months ended June 30, 2011 and 2010, PricewaterhouseCoopers LLP reported that they have applied limited procedures in accordance with professional standards for a review of such information. However, their report dated August 3, 2011 appearing below, states that they did not audit and they do not express an opinion on that unaudited financial information. Accordingly, the degree of reliance on their report on such information should be restricted in light of the limited nature of the review procedures applied. PricewaterhouseCoopers LLP is not subject to the liability provisions of Section 11 of the Securities Act of 1933 (the Act) for their report on the unaudited consolidated financial information because that report is not a report or a part of a registration statement prepared or certified by PricewaterhouseCoopers LLP within the meaning of Sections 7 and 11 of the Act.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

of MasterCard Incorporated:

We have reviewed the accompanying consolidated balance sheet of MasterCard Incorporated and its subsidiaries (the Company) as of June 30, 2011, and the related consolidated statement of operations and consolidated condensed statement of comprehensive income for each of the three and six month periods ended June 30, 2011 and 2010, and the consolidated statement of cash flows for each of the six month periods ended June 30, 2011 and 2010, and the consolidated statement of changes in equity for the six month period ended June 30, 2011. These interim financial statements are the responsibility of the Company s management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial information for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2010, and the related consolidated statement of operations, of comprehensive income (loss), of changes in equity, and of cash flows for the year then ended (not presented herein), and in our report dated February 18, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2010, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Refer to Note 19 (Legal and Regulatory Proceedings) to the consolidated financial statements included in Part I, Item 1 herein.

Item 1A. Risk Factors

For a discussion of the Company s risk factors, see the Company s Annual Report on Form 10-K for the year ended December 31, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

ISSUER PURCHASES OF EQUITY SECURITIES

In September 2010, the Company s Board of Directors authorized a plan for the Company to repurchase up to $1 billion of its Class A common stock in open market transactions. In April 2011, the Company s Board of Directors amended the existing share repurchase program authorizing the Company to repurchase an incremental $1 billion of its Class A common stock in open market transactions. The incremental $1 billion share repurchase authorization increases the Class A share repurchase program to an aggregate cost of $2 billion. During the second quarter of 2011, MasterCard repurchased a total of approximately 1.5 million shares, for an aggregate cost of $387 million and at an average price of $263.89 per share of Class A common stock. The Company s activity during the second quarter of 2011 consisted of open market share repurchases and is summarized in the following table:

Period	Total Number of Shares Purchased	Average Price Paid per Share (including commission cost)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Dollar Value of Shares that may yet be Purchased under the Plans or Programs (1)
April 1 30	1,314,621	$ 263.32	1,314,621	$ 1,000,003,302
May 1 31	8,300	$ 271.20	8,300	$ 997,752,339
June 1 - 30	143,600	$ 268.62	143,600	$ 959,179,041
Total	1,466,521	$ 263.89	1,466,521	

(1) Dollar value for shares that may yet be purchased under the Repurchase Program is as of the end of the period.

As of July 28, 2011, the cumulative repurchases by the Company during 2011 totaled approximately 4.2 million shares of its Class A common stock for an aggregate cost of approximately $1.1 billion at an average price of $254.99 per share of Class A common stock.
