Disclaimer Regarding Forward-Looking Statements

This quarterly report includes forward-looking statements (within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934) concerning Canon Inc. (the Company) and its subsidiaries (collectively Canon). To the extent that statements in this quarterly report do not relate to historical or current facts, they constitute forward-looking statements. These forward-looking statements are based on the current assumptions and beliefs of Canon in light of the information currently available to them, and involve known and unknown risks, uncertainties and other factors. Such risks, uncertainties and other factors may cause Canon's actual results, performance, achievements or financial position to be materially different from any future results, performance, achievements or financial position expressed or implied by these forward-looking statements. Canon undertakes no obligation to publicly update any forward-looking statements after the date of this quarterly report. Investors are advised to consult any further disclosures by Canon in its subsequent filings with the U.S. Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934 and its other filings.

The risks, uncertainties and other factors referred to above include, but are not limited to, foreign currency exchange rate fluctuations; the uncertainty of Canon's ability to implement its plans to localize production and other measures to reduce the impact of foreign currency exchange rate fluctuations; uncertainty as to economic conditions in Canon's major markets; uncertainty of continued demand for Canon's high-value-added products; uncertainty as to the recovery of computer and related markets; uncertainty of recovery in demand for Canon's semiconductor lithography equipment; Canon's ability to continue to develop products and to market products that incorporate new technology on a timely basis, are competitively priced, and achieve market acceptance; the possibility of losses resulting from foreign currency transactions designed to reduce financial risks from changes in foreign currency exchange rates; and inventory risk due to shifts in market demand.

(4) Operating Results

Looking back at the global economy in the second quarter of 2011, the United States saw a temporary slowdown due to supply chain disruptions triggered by the earthquake that struck north eastern Japan coupled with surges in fuel and food prices, while in Europe, trends continued to vary by country. In Japan, although the economy decelerated in the wake of the Great East Japan Earthquake mainly due to a drop in production activities, the economies of China and India continued to achieve solid growth fueled by stable domestic demand, leading to a continued moderate recovery of the global economy.

As for the markets in which Canon operates amid these conditions, within the office equipment market, while demand for network digital multifunction devices (MFDs) in the Japanese market declined due to the adverse effects of the earthquake, overseas markets continued to realize a moderate recovery. The laser printer market continued to display solid growth boosted by emerging economies. With regard to the consumer products market, demand for compact digital cameras grew steadily, mainly in emerging markets, while the market for digital single-lens reflex (SLR) cameras continued to realize robust growth in all regions with the exception of Japan. Overall demand for inkjet printers remained at around the same level as the previous year. In the industry and others sector, while active investment by chip manufacturers fueled growth in sales of semiconductor lithography equipment, demand for liquid crystal display (LCD) lithography equipment marked a significant decline largely due to decreases in investment following the large-scale outlays made in the previous year and a drop in LCD panel prices. Some of these markets incurred temporary product-supply shortages due to the impact of lower production in the aftermath of the Great East Japan Earthquake.

Despite the direct impact the earthquake had on Canon, including damage to buildings and production facilities, along with the significant effects of decreased production triggered by supply shortages of components, Canon swiftly launched recovery and restoration measures, realizing a recovery in parts procurement and rebuilding production systems ahead of initial forecasts, effectively minimizing the impact on Canon's operating results and financial position.

The average values of the yen during the second quarter and first half of the year were ¥81.58 and ¥81.92 to the U.S. dollar, respectively, year-on-year appreciations of approximately ¥10 and ¥9, and ¥117.28 and ¥114.95 to the euro, respectively, a year-on-year depreciation of approximately ¥1 and appreciation of approximately ¥5.

(4) Operating Results (continued)

Net sales for the second quarter totaled ¥836.6 billion, a decrease of 13.8% from the year-ago period, largely due to such factors as the appreciation of the yen against the U.S. dollar and a shift in market demand toward more competitively priced products, along with reduction in sales resulting from the significant impact on production of compact digital cameras and digital network MFDs caused by supply shortages of components following the earthquake, and decreased sales of LCD lithography equipment as an outcome of the sluggish market. Net sales for the six months ended June 30, 2011 totaled ¥1,675.8 billion, a year-on-year decrease of 2.9%, reflecting the effects of new consolidation arising from the acquisition of Océ N.V. in the previous year. Despite the appreciation of the yen against the U.S. dollar and decreased production turnover resulting from the earthquake, the gross profit ratio for the second quarter improved by 1.0 points overall from the year-ago period, reaching 50.0% thanks to ongoing cost-cutting efforts. The gross profit ratio for the first half of the year rose 0.3 points to 49.2%.

Gross profit for the second quarter totaled ¥418.5 billion, a year-on-year decrease of 12.0%, and totaled ¥824.7 billion for the first six months, a year-on-year decline of 2.3%. Operating expenses decreased by ¥21.8 billion for the quarter owing to Group-wide efforts to thoroughly reduce spending. For the six months ended June 30, 2011, however, the amount increased by ¥20.2 billion, mainly stemming from the new consolidation. Consequently, second-quarter operating profit decreased by 30.9% to ¥78.4 billion while operating profit for the first half of the year decreased by 19.7% to ¥160.9 billion. Other income (deductions) achieved a turnaround of ¥4.0 billion, while income before income taxes for the second quarter totaled ¥81.6 billion, a drop of 27.5% from the year-ago period, and ¥163.7 billion for the first half, a decline of 18.8% year on year. Net income attributable to Canon Inc. decreased by 20.4% to ¥53.9 billion for the quarter and declined 12.2% to ¥109.3 billion for the first six months of the year.

Basic net income attributable to Canon Inc. stockholders per share for the second quarter was ¥43.99, a decrease of ¥10.68 compared with the corresponding quarter of the previous year, and ¥89.16 for the first half of 2011, a year-on-year decrease of ¥11.52.

(4) Operating Results (continued)

Canon's second-quarter results by business unit are summarized as follows:

Looking at Canon's quarterly performance by business unit, within the Office Business Unit, despite the admirable sales performance of imageRUNNER ADVANCE-series products, sales volume of digital network MFDs decreased from the year-ago period due to the impact on production arising from parts-supply shortages following the earthquake. As for laser printers, buoyed by hearty demand, sales volume remained in line with that from the corresponding period of the previous year thanks to efforts targeting an early recovery in production and expanded sales. Consequently, second-quarter sales for the segment totaled ¥465.8 billion, a drop of 10.8% year on year, reflecting the appreciation of the yen against the U.S. dollar. Likewise, operating profit for the quarter decreased by 28.6% to ¥59.8 billion due to the decline in gross profit accompanying reduced sales. Sales for the combined first six months of the year totaled ¥946.7 billion, growing 1.7% year on year owing to the impact of the new consolidation in the previous year, while operating profit decreased by 21.2% to ¥122.9 billion.

Within the Consumer Business Unit, demand for digital SLR cameras continued to display solid growth. Amid the effects of parts-supply shortages, efforts to swiftly recover production levels and boost sales of such products as the competitively priced EOS Digital Rebel-series models and the advanced-amateur-model EOS 60D, resulted in sales volume comparable to that from the corresponding year-ago period. As for compact digital cameras, despite the launch of ten new ELPH (IXUS)-series and PowerShot-series models in the first quarter, unit sales decreased from the previous year, reflecting the significant impact of parts-supply shortages. With regard to inkjet printers, although sales in emerging markets displayed solid growth, unit sales overall recorded only a slight increase as a result of price competition among market players, mainly in Europe. Accordingly, second-quarter sales for the Consumer Business Unit declined by 17.0% year on year to ¥302.2 billion, affected by the appreciation of the yen against the U.S. dollar along with the shift in demand toward lower priced products. Quarterly operating profit decreased by 32.3% to ¥45.3 billion, reflecting the decrease in gross profit accompanying the reduction in sales. Sales for the first six months totaled ¥591.8 billion, a decline of 9.5% year on year, while operating profit totaled ¥85.2 billion, a decrease of 25.4% year on year.

In the Industry and Others Business Unit, while semiconductor lithography equipment recorded robust unit sales in response to the rapid restoration of production facilities amid growing demand, unit sales of LCD lithography equipment dropped substantially in the face of shrinking demand for equipment to produce large-size panels which Canon boasts strong performance. Consequently, second-quarter sales for the segment decreased by 16.2% to ¥91.3 billion while operating profit totaled ¥4.8 billion, a turnaround of ¥10.3 billion through the improved gross profit ratio along with efforts to curb expenses. Sales for the first half of the year totaled ¥183.0 billion, a drop of 4.3% year on year, while operating profit was ¥11.4 billion, a turnaround of ¥19.8 billion from the year-ago period.

Second-quarter results by major geographic area are summarized as follows:

Japan

Due to the severe impact of the Great East Japan Earthquake, net sales in Japan for the second quarter decreased by 15.9% from the year-ago period to ¥616.6 billion and 8.9% decrease to ¥1,237.0 billion for the six months ended June 30, 2011. Operating profit dropped 16.7% year on year to ¥95.8 billion for the quarter, and decline of 13.3% year on year to ¥182.3 billion for the six-month period.

(4) Operating Results (continued)

Net sales outside Japan declined significantly due to such factors as the appreciation of the yen and supply shortages of components and products.

Americas

Second-quarter sales decreased by 12.7% from the year-ago period to ¥232.7 billion, and ¥451.5 billion for the combined six months of the year, a decrease of 3.5%, largely due to the appreciation of the yen against the U.S. dollar and product-supply shortages of digital cameras caused by the earthquake. Operating profit for the second quarter totaled ¥3.4 billion, a decrease of 55.5% year on year, and ¥4.4 billion for the six months ended June 30, 2011, a decline of 61.7% from the corresponding period of the previous year.

Europe

Due to the shortages of supply of office equipment and digital cameras caused by the earthquake, sales for the quarter decreased by 13.4% from the same period of the previous year to ¥268.9 billion, however, because of the consolidation effects in the previous year, sales increased by 1.3% to ¥547.5 billion for the combined six months of the year. Operating profit in Europe decreased by 44.2% year on year to ¥7.3 billion for the second quarter, and ¥18.6 billion for the six months ended June 30, 2011, a decline of 6.6%.

Asia and Oceania

Sales decreased by 15.4% to ¥308.2 billion for the second quarter mainly because of supply shortages of digital cameras and decreases in investment following the large-scale outlays made in the previous year in LCD lithography equipment. Sales for the six months ended June 30, 2011 increased 1.6% to ¥662.4 billion. Operating profit in Asia and Oceania declined 29.9% to ¥9.9 billion for the quarter and a decrease of 3.1% to ¥24.2 billion for the six-month period.

Cash Flows

In the second quarter of 2011, cash flow from operating activities totaled ¥118.9 billion, a decrease of ¥68.0 billion compared with the year-ago period, as a result of decreased sales and profit triggered by the Great East Japan Earthquake. Due to ongoing capital investment focused on higher priority items and decrease in time deposit, cash flow from investing activities decreased ¥39.1 billion year on year, totaling ¥26.8 billion outlay. Accordingly, free cash flow totaled ¥92.1 billion, a decrease of ¥28.9 billion from the previous year.

Cash flow from financing activities recorded an outlay of ¥52.6 billion, mainly arising from repurchases of treasury stock. Owing to these factors, as well as the negative impact from foreign currency translation adjustments, cash and cash equivalents increased by ¥32.0 billion to ¥848.6 billion from the end of the previous quarter.

Management Issues to be Addressed

No material changes or issues with respect to business operations and finance have occurred during the three months ended June 30, 2011.

Research and Development Expenditures

Canon's research and development expenditures for the three months ended June 30, 2011 totaled ¥76.1 billion.

III. Property, Plant and Equipment

(1) Major Property, Plant and Equipment

There were no significant changes to the status of existing major property, plant and equipment during the second quarter of 2011.

(2) Prospect of Capital Investment in the Second Quarter of Fiscal 2011

The new construction of property, plant and equipment, which had been in progress as of March 31, 2011 and was completed during the second quarter of 2011, is as follows:

| Name and location | Principal activities and products manufactured | Date of completion |
|--|---|--------------------|
| Kawasaki Office, Canon Inc. Kanagawa, Japan | R&D of electrophotographic technologies (Office Business Unit) | April 2011 |

There were no significant changes in the plans relevant to the retirement of property, plant and equipment during the second quarter of 2011. Moreover, there were no significant additional plans for new construction or retirement of property, plant and equipment during the second quarter of 2011.

The descriptions of the stock option plans as of June 30, 2011 are below.

The Stock Option Plan Approved on March 28, 2008

1. Number of share options

The number of share options that the Board of Directors are authorized to issue is 5,580.

2. Number of shares acquired upon exercise of a share option

The number of shares acquired upon exercise of one share option (the Allotted Number of Shares) is 100 common shares, and the total number of shares to be delivered due to the exercise of share options is 558,000 common shares.

3. Cash payment for share options (yen)

The cash payment required for each share option is ¥5,502.

(i) If the Company effects a share split or a share consolidation after the date of the allotment of the share options, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen:
Exercise Price after Adjustment

$$= \text{Exercise Price before adjustment} \times \frac{1}{\text{Ratio of Share Split or Share Consolidation}}$$

(ii) If, after the date of allotment of share options, the Company issues common shares at a price lower than the then market price thereof or disposes common shares owned by it, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen; however, the Exercise Price will not be adjusted in the case of the exercise of share options:
Exercise Price after Adjustment = Exercise Price before Adjustment ×

$$\text{Number of Issued and Outstanding Shares} + \frac{\text{Number of Newly Issued Shares} \times \text{Payment amount per Share}}{\text{Market Price}}$$

Edgar Filing: CANON INC - Form 6-K

Number of Issued and Outstanding Shares + Number of Newly Issued Shares

The Number of Issued and Outstanding Shares is the number of shares already issued by the Company after subtraction of the number of shares owned by the Company. In the case of the Company's disposal of shares owned by it, the Number of Newly Issued Shares will be replaced with the Number of Own Shares to Be Disposed.

(1) Shares (continued)

- (iii) In the case of a merger, a company split or capital reduction after the date of allotment of share options, or in any other analogous case requiring the adjustment of the Exercise Price, the Exercise Price shall be appropriately adjusted within a reasonable range.

4. Period during which share options are exercisable

From May 1, 2010 to April 30, 2014.

An acquisition of share options by way of transfer requires the approval of the Board of Directors.

(1) **Shares (continued)**

The Stock Option Plan Approved on March 30, 2010

1. Number of share options

The number of share options that the Board of Directors are authorized to issue is 8,680.

2. Number of shares acquired upon exercise of a share option

The number of shares acquired upon exercise of one share option (the Allotted Number of Shares) is 100 common shares, and the total number of shares to be delivered due to the exercise of share options is 868,000 common shares.

3. Cash payment for share options (yen)

The cash payment required for each share option is ¥4,573.

(i) If the Company effects a share split or a share consolidation after the date of the allotment of the share options, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen:

Exercise Price after Adjustment

1

=Exercise Price before adjustment ×

Ratio of Share Split or Share Consolidation

(ii) If, after the date of allotment of share options, the Company issues common shares at a price lower than the then market price thereof or disposes common shares owned by it, the Exercise Price will be adjusted by the following calculation formula, with any fractional amount of less than one yen to be rounded up to one yen; however, the Exercise Price will not be adjusted in the case of the exercise of share options:

Exercise Price after Adjustment = Exercise Price before Adjustment ×

Number of Newly Issued Shares × Payment amount per Share

Number of Issued and Outstanding Shares +

Market Price

Number of Issued and Outstanding Shares + Number of Newly Issued Shares

The Number of Issued and Outstanding Shares is the number of shares already issued by the Company after subtraction of the number of shares owned by the Company. In the case of the Company's disposal of shares owned by it, the Number of Newly Issued Shares will be replaced with the Number of Own Shares to Be Disposed.

(iii) In the case of a merger, a company split or capital reduction after the date of allotment of share options, or in any other analogous case requiring the adjustment of the Exercise Price, the Exercise Price shall be appropriately adjusted within a reasonable range.

4. Period during which share options are exercisable

From May 1, 2012 to April 30, 2016.

Edgar Filing: CANON INC - Form 6-K

5. Exercise price and amount of increased stated capital (yen)

6. Other Conditions for Exercise of Share Options

- (i) One share option may not be exercised partially.

- (ii) Each holder of share options must continue to be a director, executive officer or employee of the Company until the end of the Company's general meeting of shareholders regarding the final business term within 2 years from the end of the Ordinary General Meeting of Shareholders for the 109th Business Term of the Company.

(1) Shares (continued)

(iii) Holders of share options will be entitled to exercise their share options for 2 years, and during the exercisable period, even after they lose their positions as directors, executive officers or employees. However, if a holder of share options loses such position due to resignation at his/her initiative, or due to dismissal or discharge by the Company, his/her share options will immediately be forfeited.

(iv) No succession by inheritance is authorized for the share options.

(v) Any other conditions for the exercise of share options may be established by the Board of Directors.

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(1) Basis of Presentation and Significant Accounting Policies

(a) Basis of Presentation

The Company issued convertible debentures in the United States in May 1969 and established a program in which its American Depositary Receipts (ADRs) were traded in the U.S. over-the-counter market. Since then, under the U.S. Securities Act of 1933 and the U.S. Securities Exchange Act of 1934, the Company has prepared its annual consolidated financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and filed them with the U.S. Securities and Exchange Commission on Form 20-F. The Company's ADRs were listed on the NYSE in September 2000 after being quoted on NASDAQ from February 1972 to September 2000.

Canon's consolidated financial statements are prepared in accordance with the recognition and measurement criteria of accounting principles generally accepted in the United States. Certain disclosures have been omitted.

The number of consolidated subsidiaries and affiliated companies that were accounted for on the equity method basis as of June 30, 2011 and December 31, 2010 are summarized as follows:

| | June 30, 2011 | December 31, 2010 |
|---------------------------|---------------|-------------------|
| Consolidated subsidiaries | 297 | 294 |
| Affiliated companies | 13 | 14 |
| Total | 310 | 308 |

(b) Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its majority owned subsidiaries and those variable interest entities where the Company or its consolidated subsidiaries are the primary beneficiaries. All significant intercompany balances and transactions have been eliminated.

(c) Recently Issued Accounting Guidance

In October 2009, the FASB issued new accounting guidance for revenue recognition under multiple-deliverable arrangements. This guidance modifies the criteria for separating consideration under multiple-deliverable arrangements and requires allocation of the overall consideration to each deliverable using the estimated selling price in the absence of vendor-specific objective evidence or third-party evidence of selling price for deliverables. As a result, the residual method of allocating arrangement consideration will no longer be permitted. The guidance also requires additional disclosures about how a vendor allocates revenue in its arrangements and about the significant judgments made and their impact on revenue recognition. This guidance is effective for fiscal years beginning on or after June 15, 2010 and was adopted by Canon from the quarter beginning January 1, 2011. This adoption did not have a material impact on Canon's consolidated results of operations and financial condition.

In October 2009, the FASB issued new accounting guidance for software revenue recognition. This guidance modifies the scope of the software revenue recognition guidance to exclude from its requirements non-software components of tangible products and software components of tangible products that are sold, licensed, or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product's essential functionality. This guidance is effective for fiscal years beginning on or after June 15, 2010 and was adopted by Canon from the quarter beginning January 1, 2011. This adoption did not have a material impact on Canon's consolidated results of operations and financial condition.

(2) Investments (continued)

Maturities of available-for-sale debt securities and fund trusts included in short-term investments and investments in the accompanying consolidated balance sheets were as follows at June 30, 2011:

| | Millions of yen | |
|--|-----------------|------------|
| | Cost | Fair value |
| Due within one year | 1 | 1 |
| Due after one year through five years | 953 | 966 |
| Due after five years through ten years | 1,729 | 1,668 |
| | 2,683 | 2,635 |

Realized gains and losses are determined using the average cost method and are reflected in earnings. The gross realized losses, including write-downs for impairments that were other than temporary, were not significant for the six and three months ended June 30, 2011 and 2010. The gross realized gains were not significant for the six and three months ended June 30, 2011 and 2010.

At June 30, 2011, substantially all of the available-for-sale securities with unrealized losses had been in a continuous unrealized loss position for less than 12 months.

Time deposits with original maturities of more than three months are ¥78,247 million and ¥95,814 million at June 30, 2011 and December 31, 2010, respectively, and are included in short-term investments in the accompanying consolidated balance sheets.

Aggregate cost of non-marketable equity securities accounted for under the cost method totaled ¥14,575 million and ¥26,475 million at June 30, 2011 and December 31, 2010, respectively. Investments with an aggregate cost of ¥14,527 million were not evaluated for impairment as of June 30, 2011, because (a) Canon did not estimate the fair value of those investments as it was not practicable to estimate the fair value of the investments and (b) Canon did not identify any events or changes in circumstances that might have had significant adverse effects on the fair value of those investments.

Reclassifications from accumulated other comprehensive income (loss) for gains and losses realized in net income was not significant for the six and three months ended June 30, 2011 and 2010.

(9) Derivatives and Hedging Activities

Risk management policy

Canon operates internationally, exposing it to the risk of changes in foreign currency exchange rates. Derivative financial instruments are comprised principally of foreign exchange contracts utilized by the Company and certain of its subsidiaries to reduce the risk. Canon assesses foreign currency exchange rate risk by continually monitoring changes in the exposures and by evaluating hedging opportunities. Canon does not hold or issue derivative financial instruments for trading purposes. Canon is also exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but it is not expected that any counterparties will fail to meet their obligations. Most of the counterparties are internationally recognized financial institutions and selected by Canon taking into account their financial condition, and contracts are diversified across a number of major financial institutions.

Foreign currency exchange rate risk management

Canon's international operations expose Canon to the risk of changes in foreign currency exchange rates. Canon uses foreign exchange contracts to manage certain foreign currency exchange exposures principally from the exchange of U.S. dollars and euros into Japanese yen. These contracts are primarily used to hedge the foreign currency exposure of forecasted intercompany sales and intercompany trade receivables that are denominated in foreign currencies. In accordance with Canon's policy, a specific portion of foreign currency exposure resulting from forecasted intercompany sales are hedged using foreign exchange contracts which principally mature within three months.

Cash flow hedge

Changes in the fair value of derivative financial instruments designated as cash flow hedges, including foreign exchange contracts associated with forecasted intercompany sales, are reported in accumulated other comprehensive income (loss). These amounts are subsequently reclassified into earnings through other income (deductions) in the same period as the hedged items affect earnings. Substantially all amounts recorded in accumulated other comprehensive income (loss) as of June 30, 2011 are expected to be recognized in earnings over the next 12 months. Canon excludes the time value component from the assessment of hedge effectiveness. Changes in the fair value of a foreign exchange contract for the period between the date that the forecasted intercompany sales occur and its maturity date are recognized in earnings and not considered hedge ineffectiveness.

Derivatives not designated as hedges

Canon has entered into certain foreign exchange contracts to primarily offset the earnings impact related to fluctuations in foreign currency exchange rates associated with certain assets denominated in foreign currencies. Although these foreign exchange contracts have not been designated as hedges as required in order to apply hedge accounting, the contracts are effective from an economic perspective. The changes in the fair value of these contracts are recorded in earnings immediately.

(10) Commitments and Contingent Liabilities**Commitments**

As of June 30, 2011, commitments outstanding for the purchase of property, plant and equipment approximated ¥47,109 million, and commitments outstanding for the purchase of parts and raw materials approximated ¥95,450 million.

Canon occupies sales offices and other facilities under lease arrangements accounted for as operating leases. Deposits made under such arrangements aggregated ¥13,798 million and ¥13,686 million at June 30, 2011 and December 31, 2010, respectively, and are included in noncurrent receivables in the accompanying consolidated balance sheets.

Future minimum lease payments required under noncancelable operating leases are ¥23,791 million (within one year) and ¥58,318 million (after one year), at June 30, 2011.

Guarantees

Canon provides guarantees for bank loans of its employees, affiliates and other companies. The guarantees for the employees are principally made for their housing loans. The guarantees of loans of its affiliates and other companies are made to ensure that those companies operate with less financial risk.

For each guarantee provided, Canon would have to perform under a guarantee if the borrower defaults on a payment within the contract periods of 1 year to 30 years, in the case of employees with housing loans, and of 1 year to 10 years, in the case of affiliates and other companies. The maximum amount of undiscounted payments Canon would have had to make in the event of default is ¥15,919 million at June 30, 2011. The carrying amounts of the liabilities recognized for Canon's obligations as a guarantor under those guarantees at June 30, 2011 were not significant.

Canon also issues contractual product warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. Estimated product warranty costs are recorded at the time revenue is recognized and are included in selling, general and administrative expenses. Estimates for accrued product warranty costs are based on historical experience. Changes in accrued product warranty cost for the six months ended June 30, 2011 and 2010 is summarized as follows:

(10) Commitments and Contingent Liabilities (continued)*Legal proceedings*

In Germany, Verwertungsgesellschaft Wort (VG Wort), a collecting society representing certain copyright holders, has filed a series of lawsuits seeking to impose copyright levies upon digital products such as PCs and printers, that allegedly enable the reproduction of copyrighted materials, against the companies importing and distributing these digital products. VG Wort filed a lawsuit in January 2006 against Canon seeking payment of copyright levies on single-function printers, and the court of first instance in Düsseldorf ruled in favor of the claim by VG Wort in November 2006. Canon lodged an appeal against such decision in December 2006 before the court of appeals in Düsseldorf. Following a decision by the same court of appeals in Düsseldorf on January 23, 2007 in relation to a similar court case seeking copyright levies on single-function printers of Epson Deutschland GmbH, Xerox GmbH and Kyocera Mita Deutschland GmbH, whereby the court rejected such alleged levies, in its judgment of November 13, 2007, the court of appeals rejected VG Wort's claim against Canon. VG Wort appealed further against said decision of the court of appeals before the Federal Supreme Court. In December 2007, for a similar Hewlett-Packard GmbH case relating to single-function printers, the Federal Supreme Court delivered its judgment in favor of Hewlett-Packard GmbH and dismissed VG Wort's claim. VG Wort has already filed a constitutional complaint with the Federal Constitutional Court against said judgment of the Federal Supreme Court. Also, after rejection by the Federal Supreme Court of an appeal by VG Wort in relation to Canon's single-function printers case in September 2008, VG Wort lodged a claim before the Federal Constitutional Court. The Federal Constitutional Court, in the same way as the decision given in the HP case in September 2010, gave its decision in January 2011 that the case should be reverted back to the Federal Supreme Court, admitting VG Wort's claim for lack of due process (i.e., insufficient deliberation before judgment on the merits). The hearing of Canon's case was reverted back to the Federal Supreme Court and it was held in June 2011. During the hearing, the Federal Supreme Court indicated it is possible that Canon's case would be referred to the European Court of Justice for a preliminary ruling. On July 21, 2011, the Federal Supreme Court delivered its decision to refer this case to the European Court of Justice for its preliminary ruling, upon which the Federal Supreme Court will render its final judgment on this case. The timeline of that proceeding from now on is yet to be known. In 2007, an amendment of German copyright law was carried out, and a new law has been effective from January 1, 2008 for both multi-function printers and single-function printers. The new law sets forth that the scope and tariff of copyright levies will be agreed between industry and the collecting society. Industry and the collecting society, based on the requirement under the new law, reached an agreement in December 2008. This agreement is applicable retroactively from January 1, 2008 and will remain effective through end of 2011. However, in Canon's assessment, the final outcome of the court case regarding the single-function printers sold in Germany before January 1, 2008 remains uncertain.

Canon is involved in various claims and legal actions, including those noted above, arising in the ordinary course of business. Canon has recorded provisions for liabilities when it is probable that liabilities have been incurred and the amount of loss can be reasonably estimated. Canon reviews these provisions at least quarterly and adjusts these provisions to reflect the impact of the negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Based on its experience, Canon believes that any damage amounts claimed in the specific matters discussed above and other outstanding matters are not a meaningful indicator of Canon's potential liability. In the opinion of management, the ultimate disposition of outstanding matters would not have a material adverse effect on Canon's consolidated financial position, results of operations, or cash flows. However, litigation is inherently unpredictable. While Canon believes that it has valid defenses with respect to legal matters pending against it, it is possible that Canon's consolidated financial position, results of operations, or cash flows could be materially affected in any particular period by the unfavorable resolution of one or more of these matters.

| Liabilities | (835) | (835) | (913) | (913) |

The following methods and assumptions are used to estimate the fair value in the above table.

Long-term debt

The fair values of Canon's long-term debt instruments are based on the present value of future cash flows associated with each instrument discounted using current market borrowing rates for similar debt instruments of comparable maturity.

Foreign exchange contracts

The fair values of foreign exchange contracts are measured based on the market price obtained from financial institutions.

Limitations of fair value estimates

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Concentrations of credit risk

At June 30, 2011 and December 31, 2010, one customer accounted for approximately 21% of consolidated trade receivables. Although Canon does not expect that the customer will fail to meet its obligations, Canon is potentially exposed to concentrations of credit risk if the customer failed to perform according to the terms of the contracts.

(12) Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. A three-level fair value hierarchy that prioritizes the inputs used to measure fair value is as follows:

- Level 1 - Inputs are quoted prices in active markets for identical assets or liabilities.
 Level 2 - Inputs are quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
 Level 3 - Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable, which reflect the reporting entity's own assumptions about the assumptions that market participants would use in establishing a price.

Assets and liabilities measured at fair value on a recurring basis

The following tables present Canon's assets and liabilities that are measured at fair value on a recurring basis consistent with the fair value hierarchy at June 30, 2011 and December 31, 2010.

Level 1 investments are comprised principally of Japanese equity securities, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions. Level 2 cash and cash equivalents are valued based on market approach, using quoted prices for identical assets in markets that are not active. Level 3 investments are mainly comprised of corporate bonds, which are valued based on cost approach, using unobservable inputs as the market for the assets was not active at the measurement date.

Derivative financial instruments are comprised of foreign exchange contracts. Level 2 derivatives are valued using quotes obtained from counterparties or third parties, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and interest rates, based on market approach.

The following table presents the changes in Level 3 assets measured on a recurring basis, consisting primarily of corporate bonds, for the six months ended June 30, 2011 and 2010.

(12) Fair Value Measurements (continued)

Assets and liabilities measured at fair value on a nonrecurring basis

During the six and three months ended June 30, 2010, non-marketable equity securities with a carrying amount of ¥5,000 million were written down to their fair value of ¥2,422 million and equity securities accounted for by the equity method with a carrying amount of ¥33,984 million were written down to their fair value of ¥15,164 million, resulting in an other-than-temporary impairment charge totaling ¥21,398 million, which was included in earnings. The non-marketable equity securities were classified as Level 2 instruments and valued based on a market approach using observable inputs such as unadjusted quoted prices for similar instruments in active markets at the measurement date. Equity securities accounted for by the equity method were classified as Level 3 instruments and valued based on a combination of income approach and market approach using both unobservable and observable inputs including the use of inputs such as financial metrics, ratios and projected income of the investees and appropriate comparable public companies.

During the six and three months ended June 30, 2011, there were no circumstances that required any significant assets or liabilities to be measured at fair value on a nonrecurring basis.

(13) Supplemental Information (continued)

Finance receivables represent financing leases which consist of sales-type leases and direct-financing leases resulting from the marketing of Canon's and complementary third-party products primarily in foreign countries. These receivables typically have terms ranging from 1 year to 8 years. Finance receivables at June 30, 2011 are ¥197,933 million, and are included in prepaid expenses and other current assets, and other assets in the accompanying consolidated balance sheet.

The activity in the allowance for credit losses is as follows:

Six months ended June 30, 2011

| | Millions of yen |

Canon has policies in place to ensure that its products are sold to customers with an appropriate credit history, and continuously monitors its customers' credit quality based on information including length of period in arrears, macroeconomic conditions, initiation of legal proceedings against customers and bankruptcy filings. The allowance for credit losses of finance receivables are evaluated collectively based on historical experience of credit losses. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings. Finance receivables which are past due or individually evaluated for impairment at June 30, 2011 are not significant.

On March 11, 2011, Japan experienced the Great East Japan Earthquake and its aftermath. Although the earthquake caused damage to inventories, production equipment and buildings at certain manufacturing facilities and distribution warehouses, losses related to the damage to inventories, production equipment and buildings occurred during the six months ended June 30, 2011 were not material.
