2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (Codification) is the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

Guarantees - In the normal course of business the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Investment Valuation - The net asset value (NAV) of each Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time. NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Events occurring after the close of trading on non-U.S. exchanges may result in adjustments to the valuation of foreign securities to more accurately reflect their fair value as of the close of regular trading on the New York Stock Exchange. The Fund may rely on an independent fair valuation service in adjusting the valuations of foreign securities. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask prices. Securities for which market quotations are not readily available are valued at fair value as determined by management and in accordance with procedures approved by the Board of Trustees. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value. Forward foreign currency contracts are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m. London time for Europe and the Americas, and Tullett Prebon closing spot and forward rates as of 2:00 p.m. Singapore time for Asia.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's investments will be valued in accordance with the Fund's pricing policy and procedures. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV calculation time that may materially affect the value of a Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities. Each Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded.

Notes to Schedule of Investments (unaudited)(continued)

Fair Value Measurement - In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classifications of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk - for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including each Fund's assumptions in determining the fair value of investments)

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund's NAV is computed and that may materially affect the value of the Fund's investments).

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

The valuation techniques and significant inputs used in determining the fair market values of the financial instruments are as follows:

Financial instruments are valued by pricing service providers that use broker dealer quotations, reported trades or valuation estimates from their internal pricing models. Depending on the type of financial instrument, the service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy. Over-the-counter financial derivative instruments, such as forward foreign currency contracts derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative contracts can be estimated by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, dividends and exchange rates. Financial derivatives that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

WisdomTree Asset Management, Inc. (WTAM), the investment adviser to each Fund and the Trust, has established a Fair Valuation Committee (the Valuation Committee) which is comprised of senior representatives of WTAM and which reports to the Board of Trustees on a quarterly basis. In the event that a financial instrument cannot be valued based upon a price from a national securities exchange, pricing service provider or broker quotation, or such prices are deemed to not reflect current market value, the Valuation Committee may value the financial instrument in good faith under the policies and procedures approved by the Board of Trustees based on current facts and circumstances. Determination of this value may include significant unobservable inputs and therefore would be reflected as Level 3 of the fair value hierarchy. The Valuation Committee may employ a market-based valuation approach which may use related or comparable securities, recent transactions, market multiples, book values, and other relevant information to determine fair value. The Valuation Committee may also use an income-based

Edgar Filing: WisdomTree Trust - Form N-Q

valuation approach in which anticipated future cash flows of the financial instrument are discounted to calculate fair value. The Valuation Committee meets at least on a monthly basis to review and discuss the appropriateness of such fair values using more current information such as, recent security news, recent market transactions, updated corporate action information and/or other macro or security specific events.

Edgar Filing: WisdomTree Trust - Form N-Q

Notes to Schedule of Investments (unaudited)(continued)

Also, when observable inputs become available, the Valuation Committee conducts back testing of the methodologies used to value Level 3 financial instruments to substantiate the unobservable inputs used to value those investments. Such back testing includes comparing Level 3 investment values to observable inputs such as exchange-traded prices, transaction prices, and/or vendor prices.

* Please refer to Schedule of Investments for a breakdown of the valuation by industry and/or by country.

The following is a summary of transfers between Level 1 and Level 2 fair value measurements that occurred during the period ended June 30, 2012. All transfers between Level 1 and Level 2 fair value measurements are done using the beginning of period method.

Fund	Transfers from Level 1 to Level 2¹	Transfers from Level 2 to Level 1²
DEFA Equity Income Fund	\$ 11,337	\$
Europe SmallCap Dividend Fund	\$ 13,862	\$
International SmallCap Dividend Fund	\$ 82,950	\$

¹ Transfers from Level 1 to Level 2 are as a result of the unavailability of a quoted price in an active market.

² Transfers from Level 2 to Level 1 are as a result of the availability of a quoted price in an active market.

Significant changes in any of the unobservable inputs may significantly impact the fair value measurement. A significant increase in the estimated liquidation value may result in a similar significant increase in fair value. A significant increase (decrease) in the price of parent company may result in a corresponding increase (decrease) in fair value.

Derivatives and Hedging Disclosure - Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds have invested in derivatives, specifically forward foreign currency contracts during the period ended June 30, 2012 which are detailed in the table herein. The Funds' derivative agreements contain credit-risk related contingent features which include, but are not limited to, a percentage decline in the Funds' NAV or net assets over a specified time period. If an event occurred that triggered a contingent feature, the counterparty to the agreement may require the Funds to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivatives agreements with credit-risk related contingent features would be the total value of derivatives in net liability positions for each Fund. As of June 30, 2012 the Funds did not have collateral posted with any counterparty.

Investment Transactions - Investment transactions are recorded as of the date that the securities are purchased or sold (trade date).

Foreign Currency Translation - The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using exchange rates prevailing on the respective dates of such transactions that are deemed appropriate by the investment adviser.

Currency Transactions - The Funds may enter into foreign currency forward and foreign currency futures contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The Funds, other than Japan Hedged Equity Fund and International Hedged Equity Fund, do not expect to engage in currency transactions for the purpose of hedging against declines in the value of a Fund's assets that are denominated in one or more foreign currencies. The Funds may not enter into such contracts for speculative purposes.

Forward Foreign Currency Contracts - A forward foreign currency contract (Forward Contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A Forward Contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades.

Risks may arise upon entering into Forward Contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

Fluctuations in the value of open Forward Contracts are recorded for book purposes as unrealized gains or losses on forward contracts by the Funds. Realized gains and losses on Forward Contracts include net gains or losses recognized by the Funds on contracts which have matured.

Security Lending - Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds' securities lending agent. It is the Funds' policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and /or high grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receive a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund's securities if the borrower defaults.

Short-Term Investments - Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments include short-term obligations issued by the U.S. Government, its agencies, non-U.S. Government agencies, negotiable certificates of deposit (CDs), fixed time deposits and bankers' acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

3. FEDERAL INCOME TAXES

At June 30, 2012, the cost of investments (including securities on loan) for Federal income tax purposes was substantially the same, as for book purposes, as indicated below:

5. LEGAL MATTER

On December 1, 2011, Research Affiliates, LLC filed a complaint in the United States District Court for the Central District of California, naming the Trust, WTAM, and its affiliates, along with other parties, as defendants. The complaint alleges that the fundamentally weighted investment methodology developed by WisdomTree Investments and employed by the Trust infringes three of plaintiff's patents. The complaint seeks both unspecified monetary damages to be determined and an injunction to prevent further infringement. The Trust filed its answer to the complaint on January 17, 2012. The Trust believes it has strong defenses to this lawsuit based on its belief that (i) the Trust's Funds do not practice the indexing methods as claimed in the asserted patents because, for example, the factors used to select Fund assets include market capitalization and the price of the assets, and thus fall outside the scope of the asserted patents, which generally provide that selection of the assets to be used for creation of the index must be based upon factors that are sufficiently independent of market capitalization; and (ii) the patents should be declared invalid because, among other reasons, there is ample evidence that the concept of fundamentals based indexing was widely known and in commercial use by asset managers and index providers well before the patent applications at issue were filed by plaintiff. For example, in support of the defenses that the asserted patents are invalid, the Trust intends to present evidence that as far back as the early 1990s, Robert Jones at Goldman Sachs managed an earnings weighted index fund. As another example, the Trust intends to present evidence that Dow Jones launched a dividend weighted stock index in 2003. These examples support the Trust's view that the asserted patents are invalid at least because earlier publications and activities of investment professionals anticipated or made obvious plaintiff's alleged inventions.

While at this early stage of the proceedings it is not possible to determine the probability of any outcome or the probability or amount of any loss, the Trust is confident in the merits of its position. Nevertheless, an adverse resolution could have a negative impact on the Trust and the Funds. For example, in the event of an unfavorable outcome the Trust may be required to pay ongoing license fees if WisdomTree Investments cannot change its indexes in a manner that does not infringe on the patents. This could increase the Funds' expense ratios and have a negative impact on Fund performance. WTAM and WisdomTree Investments have contractually agreed to indemnify the Trust and pay any losses, claims and damages (including legal fees) incurred by the Trust or a Fund in connection with the complaint. The Trust intends to vigorously defend against plaintiff's claims.

6. SUBSEQUENT EVENT

Effective on or about August 29, 2012, the WisdomTree International Hedged Equity Fund will restructure its investment objective and strategy to focus on European equity securities, particularly shares of European exporters, and will seek to hedge against fluctuations in the value of the U.S. dollar against a single currency, the euro. The Fund will be renamed WisdomTree Europe Hedged Equity Fund.

Item 2. Controls and Procedures.

- (a) Based on their evaluation of the Registrant's disclosure controls and procedures (as defined in Rule 30a-3 (c) under the Investment Company Act of 1940) as of a date within 90 days prior to the filing date of this report, the President and Treasurer of the Registrant have concluded that such disclosure controls and procedures are reasonably designed and effective to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to them by others within those entities.

- (b) There were no changes in the Registrant's internal control over financial reporting (as defined in Rule 30a-3 (d) under the Investment Company Act of 1940) that occurred during the Registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

- (i) Certification of each principal executive officer and principal financial officer of the Registrant as required by Rule 30a-2 (a) under the Investment Company Act of 1940 (17 CFR 270.30a-2) is attached hereto as a part of EX-99. CERT.
