- ☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 7.01 Regulation FD Disclosure.

During our earnings conference call on October 23, 2012, we highlighted the following outlook for the fourth quarter 2012.

(Dollar amounts are approximations)

For the fourth quarter of the year, we estimate our revenue to be between \$401 million to \$403 million. We estimate organic growth to be between negative 1.5% and negative 2%, with the components as follows: net pricing growth to be about 3%, recycling, intermodal and other growth to be around negative 1.5%, and volume growth to be between negative 3% and negative 3.5%. Operating income before depreciation, amortization and accretion expense is estimated to be between \$122.5 million and \$123 million, reflecting a margin of about 30.5%. Depreciation and amortization expense is estimated to be approximately 11.6% of revenue. Operating income is estimated to be about 19% of revenue. We expect net interest expense to be approximately \$11.8 million. We expect our effective tax rate to be about 39%. Noncontrolling interests expense is estimated to be \$250,000. We expect our fully diluted share count to be approximately 123.5 million shares.

These estimates assume no change in the current economic environment or commodity values and exclude the impact of the R360 acquisition that is expected to close during the period and expensing of acquisition-related transaction costs, as well as costs incurred in connection with the relocation of our corporate headquarters from California to Texas, including a charge we may incur for the write-down of our prior corporate office lease.

If we are able to close the R360 transaction before the end of October 2012 and have two months of contribution during the fourth quarter of 2012, we believe our outlook for the fourth quarter 2012 would be closer to \$450 million of revenue and \$150 million of operating income before depreciation, amortization and accretion expense.

We also provided preliminary expectations for full year 2013. Under current conditions, we estimate revenues to be between \$1.95 billion to \$2 billion of revenue and we estimate operating income before depreciation, amortization and accretion expense to be at least 35.5% of revenues. Any increase in oilfield waste activity, improvement in the economy or recycling prices, or additional acquisitions would provide upside to these estimates. We also estimate volume growth to be between negative 1% and negative 1.5%, under the current economic environment.

Operating income before depreciation, amortization and accretion is considered a non-GAAP financial measure, and is provided supplementally because it is widely used by investors as a performance and valuation measure in the solid waste industry. We define operating income before depreciation, amortization and accretion as operating income, plus depreciation and amortization expense, plus closure and post-closure accretion expense, plus or minus any gain or loss on disposal of assets. This measure is not a substitute for, and should be used in conjunction with, GAAP financial measures. Management uses operating income before depreciation, amortization and accretion as one of the principal measures to evaluate and monitor the ongoing financial performance of our operations. Other companies may calculate this measure differently.

Safe Harbor for Forward-Looking Statements

Certain statements contained in this report are forward-looking in nature, including statements related to: expected operating performance; expected roll-off activity and recycled commodity prices; expected volume and pricing trends; expected contribution from recently completed and announced acquisitions; the anticipated closing date for announced acquisitions and the Company's ability to finance such activity; the impact of the relocation of the Company's corporate headquarters from Folsom, California to The Woodlands, Texas, our fourth quarter 2012 outlook and our preliminary expectations for full year 2013. These statements can be identified by the use of forward-looking terminology such as *believes, expects, may, will, should, or anticipates*, or the negative thereof or comparable terminology, or by discussions of strategy. Factors that could cause actual results to differ from those projected include, but are not limited to, the following: (1) our acquisitions may not be successful, resulting in changes in strategy, operating losses or a loss on sale of the business acquired; (2) a portion of our growth and future financial performance depends on our ability to integrate acquired businesses into our organization and operations; (3) competition for acquisition candidates, consolidation within the waste industry and economic and market conditions may limit our ability to grow through acquisitions; (4) we may be unable to compete effectively with larger and better capitalized companies, companies with lower return expectations, and governmental service providers; (5) we may lose contracts through competitive bidding, early termination or governmental action; (6) price increases may not be adequate to offset the impact of increased costs or may cause us to lose volume; (7) economic downturns adversely affect operating results; (8) our results are vulnerable to economic conditions and seasonal factors affecting the regions in which we operate; (9) we may be subject in the normal course of business to judicial, administrative or other third party proceedings that could interrupt or limit our operations, require expensive remediation, result in adverse judgments, settlements or fines and create negative publicity; (10) increases in the price of fuel may adversely affect our business and reduce our operating margins; (11) increases in labor and disposal and related transportation costs could impact our financial results; (12) efforts by labor unions could divert management attention and adversely affect operating results; (13) we could face significant withdrawal liability if we withdraw from participation in one or more underfunded multiemployer pension plans in which we participate; (14) increases in insurance costs and the amount that we self-insure for various risks could reduce our operating margins and reported earnings; (15) our indebtedness could adversely affect our financial condition; we may incur substantially more debt in the future; (16) each business that we acquire or have acquired may have liabilities or risks that we fail or are unable to discover, including environmental liabilities; (17) liabilities for environmental damage may adversely affect our financial condition, business and earnings; (18) our accruals for our landfill site closure and post-closure costs may be inadequate; (19) the financial soundness of our customers could affect our business and operating results; (20) we depend significantly on the services of the members of our senior, regional and district management team, and the departure of any of those persons could cause our operating results to suffer; (21) our decentralized decision-making structure could allow local managers to make decisions that adversely affect our operating results; (22) we may incur charges related to capitalized expenditures of landfill development projects, which would decrease our earnings; (23) because we depend on railroads for our intermodal operations, our operating results and financial condition are likely to be adversely affected by any reduction or deterioration in rail service; (24) our financial results are based upon estimates and assumptions that may differ from actual results; (25) the adoption of new accounting standards or interpretations could adversely affect our financial results; (26) pending or future litigation or governmental proceedings could result in material adverse consequences, including judgments or settlements; and (27) if we are not able to develop and protect intellectual property, or if a competitor develops or obtains exclusive rights to a breakthrough technology, our financial results may suffer. These risks and uncertainties, as well as others, are discussed in greater detail in our filings with the Securities and Exchange Commission, including our most recent Annual Report on Form 10-K and subsequent Quarterly Reports on Form 10-Q. There may be additional risks of which we are not presently aware or that we currently believe are immaterial which could have an adverse impact on our business. We make no commitment to revise or update any forward-looking statements in order to reflect events or circumstances that may change.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
