PRELIMINARY PROSPECTUS

Shares

Common Stock

Orchid Island Capital, Inc., a Maryland corporation, invests in residential mortgage-backed securities the principal and interest payments of which are guaranteed by a U.S. Government agency or a U.S. Government-sponsored entity. We are externally managed and advised by Bimini Advisors, LLC, or our Manager, a wholly-owned subsidiary of Bimini Capital Management, Inc., or Bimini. Our Manager is an investment advisor registered with the Securities and Exchange Commission, or SEC. Bimini is an existing real estate investment trust for U.S. federal income tax purposes, or REIT, whose common stock is traded on the OTC Bulletin Board under the symbol BMNM.

This is an offering of _____ shares of our common stock, \$0.01 par value per share. Our common stock is traded on the NYSE MKT under the symbol ORC. On March _____, 2014, the last reported sales price on the NYSE MKT for our common stock was \$ _____ per share.

We are organized and intend to continue to conduct our operations to qualify as a REIT. To assist us in qualifying as a REIT, among other purposes, ownership of our stock by any person is generally limited to 9.8% in value or number of shares, whichever is more restrictive, of any class or series of our stock, except that Bimini may own up to 35.0% of our common stock so long as Bimini continues to qualify as a REIT. Our charter also contains various other restrictions on the ownership and transfer of our common stock, see Description of Capital Stock Restrictions on Ownership and Transfer.

We are an emerging growth company as that term is used in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act.

Investing in our common stock involves a high degree of risk. See Risk Factors beginning on page 24 of this prospectus.

Table of Contents**PROSPECTUS SUMMARY**

This section summarizes information contained elsewhere in this prospectus. It is not complete and may not contain all of the information that you may want to consider before making an investment in our common stock. You should read this entire prospectus carefully, including the section titled Risk Factors and our financial statements and related notes, before making an investment in our common stock. As used in this prospectus, Orchid, Company, we, our, and us refer to Orchid Island Capital, Inc. References to our Manager refer to Bimini Advisors, LLC, a wholly-owned subsidiary of Bimini Capital Management, Inc. References to Bimini and Bimini Capital refer to Bimini Capital Management, Inc. Unless otherwise indicated, the information in this prospectus assumes (i) the underwriters will not exercise their option to purchase up to an additional _____ shares of our common stock to cover overallocments, if any, and (ii) that the shares of our common stock to be sold in this offering will be sold at \$ _____ per share, which was the last reported sales price of our common stock on March _____, 2014, as reported on the NYSE MKT.

Our Company

Orchid Island Capital, Inc. is a specialty finance company that invests in residential mortgage-backed securities, or RMBS. The principal and interest payments of these RMBS are guaranteed by the Federal National Mortgage Association, or Fannie Mae, the Federal Home Loan Mortgage Corporation, or Freddie Mac, or the Government National Mortgage Association, or Ginnie Mae, and are backed primarily by single-family residential mortgage loans. We refer to these types of RMBS as Agency RMBS. Our investment strategy focuses on, and our portfolio consists of, two categories of Agency RMBS: (i) traditional pass-through Agency RMBS and (ii) structured Agency RMBS, such as collateralized mortgage obligations, or CMOs, interest only securities, or IOs, inverse interest only securities, or IIOs, and principal only securities, or POs, among other types of structured Agency RMBS.

Our business objective is to provide attractive risk-adjusted total returns to our investors over the long term through a combination of capital appreciation and the payment of regular monthly distributions. We intend to achieve this objective by investing in and strategically allocating capital between the two categories of Agency RMBS described above. We seek to generate income from (i) the net interest margin, which is the spread or difference between the interest income we earn on our assets and the interest cost of our related borrowing and hedging activities, on our leveraged pass-through Agency RMBS portfolio and the leveraged portion of our structured Agency RMBS portfolio, and (ii) the interest income we generate from the unleveraged portion of our structured Agency RMBS portfolio. We intend to fund our pass-through Agency RMBS and certain of our structured Agency RMBS, such as fixed and floating rate tranches of CMOs and POs, through short-term borrowings structured as repurchase agreements. However, we do not intend to employ leverage on the securities in our structured Agency RMBS portfolio that have no principal balance, such as IOs and IIOs. We may pledge a portion of these assets to increase our cash balance, but we do not intend to invest the cash derived from pledging the assets. Otherwise, we do not intend to use leverage in these instances because these securities contain structural leverage.

Pass-through Agency RMBS and structured Agency RMBS typically exhibit materially different sensitivities to movements in interest rates. Declines in the value of one portfolio may be offset by appreciation in the other. The percentage of capital that we allocate to our two Agency RMBS asset categories will vary and will be actively managed in an effort to maintain the level of income generated by the combined portfolios, the stability of that income stream and the stability of the value of the combined portfolios. We believe that this strategy will enhance our liquidity, earnings, book value stability and asset selection opportunities in various interest rate environments.

We are externally managed and advised by Bimini Advisors, LLC, pursuant to the terms of a management agreement. Our Manager is a Maryland limited liability company that is a wholly-owned subsidiary of Bimini. Our Manager is

responsible for administering our business activities and day-to-day operations, subject to the

Table of Contents

supervision and oversight of our Board of Directors. Members of Bimini's and our Manager's senior management team also serve as our executive officers. We do not have any employees.

We have been organized and have operated so as to qualify as a REIT under the Internal Revenue Code of 1986, as amended, or the Code. We will elect to be taxed as a REIT beginning with our 2013 taxable year, upon the filing of our federal income tax return for such year. As a REIT, we generally are not subject to U.S. federal income tax to the extent that we annually distribute all of our REIT taxable income to our stockholders and continue to qualify as a REIT.

We completed our initial public offering on February 20, 2013. We are an emerging growth company as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act, and will remain such for up to five years from the date of our initial public offering. However, if our non-convertible debt issued within a three year period or our total revenues exceed \$1 billion or the market value of our shares of common stock that are held by non-affiliates exceeds \$700 million on the last day of the second fiscal quarter of any given fiscal year, we would cease to be an emerging growth company as of the following fiscal year. Although we are an emerging growth company under the JOBS Act, we have elected to opt out of the extended transition period for complying with new or revised accounting standards, and such election is irrevocable.

Our Investment and Capital Allocation Strategy

Our Investment Strategy

Our business objective is to provide attractive risk-adjusted total returns to our investors over the long term through a combination of capital appreciation and the payment of regular monthly distributions. We intend to achieve this objective by investing in and strategically allocating capital between pass-through Agency RMBS and structured Agency RMBS. We seek to generate income from (i) the net interest margin on our leveraged pass-through Agency RMBS portfolio and the leveraged portion of our structured Agency RMBS portfolio, and (ii) the interest income we generate from the unleveraged portion of our structured Agency RMBS portfolio. We also seek to minimize the volatility of both the net asset value of, and income from, our portfolio through a process which emphasizes capital allocation, asset selection, liquidity and active interest rate risk management.

We fund our pass-through Agency RMBS and certain of our structured Agency RMBS, such as fixed and floating rate tranches of CMOs and POs, through repurchase agreements. However, we do not employ leverage on our structured Agency RMBS that have no principal balance, such as IOs and IIOs. We may pledge a portion of these assets to increase our cash balance, but we do not intend to invest the cash derived from pledging the assets. Otherwise, we do not use leverage in these instances because the securities contain structural leverage.

Table of Contents

Our target asset categories and the principal assets in which we invest are as follows:

Asset Categories

Pass-through Agency RMBS

Principal Assets

Residential Mortgage Pass-Through Certificates. Residential mortgage pass-through certificates are securities representing interests in pools of mortgage loans secured by residential real property where payments of both interest and principal, plus pre-paid principal, on the securities are made monthly to holders of the securities, in effect passing through monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer/guarantor and servicers of the securities. Pass-through certificates can be divided into various categories based on the characteristics of the underlying mortgages, such as the term or whether the interest rate is fixed or variable.

The principal and interest payments of these Agency RMBS are guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae and are backed primarily by single-family residential mortgage loans. We invest in pass-through certificates with the three following types of underlying loans:

Fixed-Rate Mortgages. Fixed-rate mortgages are mortgages for which the borrower pays an interest rate that is constant throughout the term of the loan.

Adjustable-Rate Mortgages (ARMs). ARMs are mortgages for which the borrower pays an interest rate that varies over the term of the loan.

Hybrid ARMs. Hybrid ARMs are mortgages that have a fixed-rate for the first few years of the loan, often three, five, seven or ten years, and thereafter reset periodically like a traditional ARM.

Structured Agency RMBS

Collateralized Mortgage Obligations. CMOs are securities that are structured from residential mortgage pass-through certificates, which receive monthly payments of principal and interest. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of residential mortgage pass-through securities issued directly by or under the auspices of Fannie Mae, Freddie Mac or Ginnie Mae. CMOs divide the cash flows which come from the underlying residential mortgage pass-through certificates into different classes of securities that may have different

maturities and different weighted average lives than the underlying residential mortgage pass-through certificates.

Interest Only Securities. IOs are securities that are structured from residential mortgage pass-through certificates, which receive monthly payments of interest only. IOs represent the stream of interest payments on a pool of mortgages, either fixed-rate mortgages or hybrid ARMs. The value of IOs depends primarily on two factors, which are prepayments and interest rates.

Inverse Interest Only Securities. IIOs are IOs that have interest rates that move in the opposite direction of an interest rate index, such as LIBOR. The value of IIOs depends primarily on three factors, which are prepayments, LIBOR and term interest rates.

Table of Contents

Asset Categories

Principal Assets

Principal Only Securities. POs are securities that are structured from residential mortgage pass-through certificates, which receive monthly payments of principal only and are, therefore, similar to zero coupon bonds. The value of POs depends primarily on two factors, which are prepayments and interest rates.

Our investment strategy consists of the following components:

investing in pass-through Agency RMBS and certain structured Agency RMBS, such as fixed and floating rate tranches of CMOs and POs, on a leveraged basis to increase returns on the capital allocated to this portfolio;

investing in certain structured Agency RMBS, such as IOs and IIOs, generally on an unleveraged basis in order to (i) increase returns due to the structural leverage contained in such securities, (ii) enhance liquidity due to the fact that these securities will be unencumbered or, when encumbered, retain the cash from such borrowings and (iii) diversify portfolio interest rate risk due to the different interest rate sensitivity these securities have compared to pass-through Agency RMBS;

investing in Agency RMBS in order to minimize credit risk;

investing in assets that will cause us to maintain our exclusion from regulation as an investment company under the Investment Company Act of 1940, as amended, or the Investment Company Act; and

investing in assets that will allow us to qualify and maintain our qualification as a REIT.

Our Manager makes investment decisions based on various factors, including, but not limited to, relative value, expected cash yield, supply and demand, costs of hedging, costs of financing, liquidity requirements, expected future interest rate volatility and the overall shape of the U.S. Treasury and interest rate swap yield curves. We do not attribute any particular quantitative significance to any of these factors, and the weight we give to these factors depends on market conditions and economic trends. We believe that this strategy, combined with our Manager's experienced RMBS investment team, enables us to provide attractive long-term returns to our stockholders.

Capital Allocation Strategy

The percentage of capital invested in our two asset categories varies and is managed in an effort to maintain the level of income generated by the combined portfolios, the stability of that income stream and the stability of the value of the combined portfolios. Typically, pass-through Agency RMBS and structured Agency RMBS exhibit materially different sensitivities to movements in interest rates. Declines in the value of one portfolio may be offset by appreciation in the other, although we cannot assure you that this will be the case. Additionally, our Manager seeks to maintain adequate liquidity as it allocates capital.

During periods of rising interest rates, refinancing opportunities available to borrowers typically decrease because borrowers are not able to refinance their current mortgage loans with new mortgage loans at lower interest rates. In

such instances, securities that are highly sensitive to refinancing activity, such as IOs and IIOs, typically increase in value. Our capital allocation strategy allows us to redeploy our capital into such securities when and if we believe interest rates will be higher in the future, thereby allowing us to hold securities the value of which we believe is likely to increase as interest rates rise. Also, by being able to re-allocate capital into structured Agency RMBS, such as IOs, during periods of rising interest rates, we may be able to offset the likely decline in the value of our pass-through Agency RMBS, which are negatively impacted by rising interest rates.

Table of Contents

Competitive Strengths

We believe that our competitive strengths include:

Ability to Successfully Allocate Capital between Pass-Through and Structured Agency RMBS. We seek to maximize our risk-adjusted returns by investing exclusively in Agency RMBS, which has limited credit risk due to the guarantee of principal and interest payments on such securities by Fannie Mae, Freddie Mac or Ginnie Mae. Our Manager will allocate capital between pass-through Agency RMBS and structured Agency RMBS. The percentage of our capital we allocate to our two asset categories will vary and will be actively managed in an effort to maintain the level of income generated by the combined portfolios, the stability of that income stream and the stability of the value of the combined portfolios. We believe this strategy will enhance our liquidity, earnings, book value stability and asset selection opportunities in various interest rate environments and provide us with a competitive advantage over other REITs that invest in only pass-through Agency RMBS. This is because, among other reasons, our investment and capital allocation strategies allow us to move capital out of pass-through Agency RMBS and into structured Agency RMBS in a rising interest rate environment, which will protect our portfolio from excess margin calls on our pass-through Agency RMBS portfolio and reduced net interest margins, and allow us to invest in securities, such as IOs, that have historically performed well in a rising interest rate environment.

Experienced RMBS Investment Team. Robert Cauley, our Chief Executive Officer and co-founder of Bimini, and Hunter Haas, our Chief Investment Officer, have 20 and 13 years of experience, respectively, in analyzing, trading and investing in Agency RMBS. Additionally, Messrs. Cauley and Haas have over ten and nine years, respectively, of experience managing Bimini, which is a publicly-traded REIT that has invested in Agency RMBS since its inception in 2003. Messrs. Cauley and Haas managed Bimini through the recent housing market collapse and the related adverse effects on the banking and financial system, repositioning Bimini's portfolio in response to adverse market conditions. We believe this experience has enabled them to recognize portfolio risk in advance, hedge such risk accordingly and manage liquidity and borrowing risks during adverse market conditions. We believe that Messrs. Cauley's and Haas' experience provides us with a competitive advantage over other management teams that may not have experience managing a publicly-traded mortgage REIT or managing a business similar to ours during various interest rate and credit cycles, including the recent housing market collapse.

Clean Balance Sheet With an Implemented Investment Strategy. We completed our initial public offering in February 2013 and completed a follow on offering in January 2014, and we intend to build on our existing investment portfolio. As of January 31, 2014, our Agency RMBS portfolio had a preliminary estimated fair value of approximately \$515.4 million and was comprised of approximately 94.4% pass-through Agency RMBS and 5.6% structured Agency RMBS. Our preliminary estimated net asset value as of January 31, 2014 was approximately \$69.1 million. Bimini managed our portfolio from our inception until the closing of our initial public offering utilizing the same investment strategy that our Manager and its experienced RMBS investment team have employed since our initial public offering.

Alignment of Interests. Bimini owns 981,665 shares of our common stock, which represents approximately 18.1% of the aggregate outstanding shares of our common stock. We believe that Bimini's ownership of our

common stock aligns our Manager's interests with our interests.

Summary Risk Factors

An investment in our common stock involves a high degree of material risks. Each prospective purchaser of our common stock should consider carefully the matters discussed under "Risk Factors" beginning on page 24 before investing in our common stock. Some of these risks include:

Because our management will have broad discretion over the use of the net proceeds from this offering, you may not agree with how we use the proceeds, and we may not invest the proceeds successfully.

Table of Contents

The U.S. Federal Reserve's recent announcement that it would reduce its monthly purchases pursuant to QE3 could impact the market for and value of the Agency RMBS in which we invest as well as our net asset value and net interest margin.

Adoption of the Basel III standards and other proposed supplementary regulatory standards may negatively impact our access to financing or affect the terms of our future financing arrangements.

Separate legislation has been introduced in both houses of the U.S. congress, which would, among other things, revoke the charters of Fannie Mae and Freddie Mac, and we could be materially adversely affected if these proposed laws were enacted.

The federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between Fannie Mae and Freddie Mac and the U.S. Government, may adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Continued adverse developments in the broader residential mortgage market have adversely affected Bimini and may materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Interest rate mismatches between our Agency RMBS and our borrowings may reduce our net interest margin during periods of changing interest rates, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Increased levels of prepayments on the mortgages underlying our Agency RMBS might decrease net interest income or result in a net loss, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We invest in structured Agency RMBS, including CMOs, IOs, IIOs and POs. Although structured Agency RMBS are generally subject to the same risks as our pass-through Agency RMBS, certain types of risks may be enhanced depending on the type of structured Agency RMBS in which we invest.

Our use of leverage could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Adverse market developments could cause our lenders to require us to pledge additional assets as collateral. If our assets were insufficient to meet these collateral requirements, we might be compelled to liquidate particular assets at inopportune times and at unfavorable prices, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Hedging against interest rate exposure may not completely insulate us from interest rate risk and could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We are completely dependent upon our Manager and certain key personnel of Bimini who provide services to us through the management agreement, and we may not find suitable replacements for our Manager or these personnel if the management agreement is terminated or such key personnel are no longer available to us.

There are various conflicts of interest in our relationship with our Manager and Bimini, which could result in decisions that are not in the best interest of our stockholders, including possible conflicts created by our Manager's compensation whereby it is entitled to receive a management fee that is not tied to the performance of our portfolio and possible conflicts of duties that may result from the fact that all of our Manager's officers are also employees of Bimini.

Table of Contents

Loss of our exemption from regulation under the Investment Company Act would negatively affect the value of shares of our common stock and our ability to pay distributions to our stockholders.

Our failure to qualify, or maintain our qualification, as a REIT would subject us to U.S. federal income tax, which could adversely affect the value of the shares of our common stock and would substantially reduce the cash available for distribution to our stockholders.

Legal proceedings involving Bimini and certain of its subsidiaries have adversely affected Bimini, may materially adversely affect Bimini's and our Manager's ability to effectively manage our business and could materially adversely affect our reputation, business, operations, financial condition and results of operations and our ability to pay distributions to our stockholders.

There may not be an active market for our common stock, which may cause our common stock to trade at a discount and make it difficult to sell the common stock you purchase.

Our Portfolio

As of January 31, 2014, our portfolio consisted of Agency RMBS with a preliminary estimated aggregate fair value of approximately \$515.4 million and a preliminary estimated weighted average coupon of 3.98%. The following table summarizes our portfolio as of January 31, 2014:

Asset Category	Fair Value ⁽¹⁾	Percentage of Entire Portfolio	Weighted Average Coupon	Weighted Average Maturity in Months	Longest Maturity	Weighted Average Coupon Reset in Months	Weighted Average Lifetime Cap	Weighted Average Periodic Cap	Realized CPR ⁽²⁾

(1) In thousands.

(2) CPR refers to Constant Prepayment Rate, which is a method of expressing the prepayment rate for a mortgage pool that assumes that a constant fraction of the remaining principal is prepaid each month or year. Specifically, the CPR in the chart above represents the prepayment rate of the securities in the respective asset category for the month of January 2014.

Table of Contents*GAAP and Non-GAAP Reconciliation*

To date, we have used derivatives, specifically Eurodollar futures contracts, to hedge the interest rate risk on repurchase agreements in a rising rate environment. Each Eurodollar contract covers a specific three month period, but we typically have many contracts in place at any point in time usually covering several years in the aggregate. We have not elected to designate our derivative holdings for hedge accounting treatment under the Financial Accounting Standards Board, or FASB, Accounting Standards Codification, or ASC, Topic 815, *Derivatives and Hedging*. Changes in fair value of these instruments are presented in a separate line item in our Statements of Operations. As such, for financial reporting purposes, interest expense and cost of funds are not impacted by the fluctuation in value of the Eurodollar futures contracts. In the future, we may use other derivative instruments to hedge our interest expense and/or elect to designate our derivative holdings for hedge accounting treatment.

For the purpose of computing economic net interest income and ratios relating to cost of funds measures, accounting principles generally accepted in the United States, or GAAP, interest expense has been adjusted to reflect the realized gains or losses on specific Eurodollar contracts that pertain to each period presented. As of December 31, 2013, we have Eurodollar futures contracts in place through 2018. Since we have taken short positions on these contracts, when interest rates move higher the value of our short position may increase in value. The opposite would be true if interest rates were to decrease. Adjusting our interest expense for the periods presented by the gains on all Eurodollar futures would not accurately reflect our economic interest expense for these periods. For each period presented we have combined the effects of the Eurodollar positions in place for the respective period with the actual interest expense incurred on repurchase agreements to reflect total expense for the applicable period. Interest expense, including the effect of Eurodollar futures contracts for the period, is referred to as economic interest expense. Net interest income, when calculated to include the effect of Eurodollar futures contracts for the period, is referred to as economic net interest income.

However, under ASC 815, because we have not elected hedging treatment, the gains or losses on all of our Eurodollar futures contracts held during the period are reflected in our consolidated statements of operations. This presentation includes gains or losses on all contracts in effect during the reporting period covering the current period as well as periods in the future.

We believe that economic interest expense and economic net interest income provides meaningful information to consider, in addition to the respective amounts prepared in accordance with GAAP. The non-GAAP measures help us to evaluate our financial position and performance without the effects of certain transactions and GAAP adjustments that are not necessarily indicative of our current investment portfolio or operations. The realized and unrealized gains or losses presented in our statement of operations are not necessarily representative of the total interest rate expense that we will ultimately realize. This is because as interest rates move up or down in the future, the gains or losses we ultimately realize, and which will affect our total interest rate expense in future periods, may differ from the unrealized gains or losses recognized as of the reporting date.

Our presentation of the economic value of our hedging strategy has important limitations. First, other market participants may calculate economic interest expense and economic net interest income differently than we calculate them. Second, while we believe that the calculation of the economic value of our hedging strategy described above helps to present our financial position and performance, it may be of limited usefulness as an analytical tool. Therefore, the economic value of our investment strategy should not be viewed in isolation and is not a substitute for interest expense and net interest income computed in accordance with GAAP.

Table of Contents

The following tables present the effect of our hedging strategy on interest expense and net interest income for each quarter during 2013 and 2012.

Three Months Ended	Gains (Losses) on Eurodollar Futures Contracts (in thousands)		
	Recognized in Income Statement Periods (Non-GAAP)	Attributed to Current Period (Non-GAAP)	Attributed to Current Period (Non-GAAP)
December 31, 2013	\$ 732	\$ 774	\$ (42)
September 30, 2013	(2,272)	(2,244)	(28)
June 30, 2013	6,852	6,856	(4)
March 31, 2013	(484)	(419)	(65)
December 31, 2012	(1)	61	(62)
September 30, 2012	(14)	14	(28)
June 30, 2012	(1)	9	(10)
March 31, 2012	(24)	(20)	(4)

The following table presents the effect of our hedging strategy on interest and net interest income for each quarter during 2013 and 2012.

Three Months Ended	Interest Expense on Repurchase Agreements Gains (Losses) on Eurodollar Futures Contracts Attributed to Current Period			Net Interest Income		
	Interest Income	GAAP Interest Expense	Interest Period (1)	Economic Interest Expense (2)	GAAP Net Interest Income	Economic Net Interest Income (3)
December 31, 2013	\$ 2,806	\$ 309	\$ (42)	\$ 351	\$ 2,497	\$ 2,455
September 30, 2013	2,551	294	(28)	322	2,257	2,229

September 30, 2012	64,378	697	4.33%	53,698	86	0.64%	611	3.69%
June 30, 2012	73,559	769	4.18%	62,407	84	0.54%	685	3.64%
March 31, 2012	70,585	759	4.30%	59,157	55	0.37%	704	3.93%
Years Ended								
December 31, 2013	\$ 316,124	\$ 9,198	2.91%	\$ 284,522	\$ 1,265	0.44%	\$ 7,933	2.47%
December 31, 2012	74,904	2,698	3.60%	63,880	381	0.60%	2,317	3.00%

- (1) Portfolio yields and costs of borrowings presented in the table above and the tables above are calculated based on the average balances of the underlying investment portfolio/repurchase agreement balances and are annualized for the quarterly periods presented. Average balances for quarterly periods are calculated using two data points, the beginning and ending balances. Average balances for the year to date periods are calculated as the average of the average quarterly periods.
- (2) Interest income presented in the table above includes only interest earned on the Company's MBS investments and excludes interest earned on cash balances, and excludes the impact of discounts or premiums on MBS investments, as discounts or premiums are not amortized under the fair value option. Interest income and net portfolio interest income may not agree with the information presented in the statements of operations.
- (3) Economic interest expense and economic net interest income presented in the table above and the table above includes the effect of Eurodollar futures contract hedges for only the period presented. For the three month periods ended December 31, 2013 and 2012, total gains (losses) on Eurodollar contracts recognized in our statements of operations for GAAP purposes were \$(732,500) and \$(225), respectively. For the years ended December 31, 2013 and 2012, total gains (losses) on Eurodollar contracts recognized in our statements of operations for GAAP purposes were \$4,828,288 and \$(39,725), respectively.
- (4) Represents interest cost of our borrowings and effect on Eurodollar futures contracts hedges attributed to the period related to hedging activities Divided by Average MBS Securities Held.
- (5) Economic Net Interest Spread is calculated by subtracting Average Economic Cost of Funds from Yield on Average MBS Securities.

Table of Contents

The following table sets forth, for the periods indicated, information regarding leverage ratio and weighted average CPR.

Three Months Ended	Leverage Ratio ⁽¹⁾	Weighted Average CPR ⁽²⁾
December 31, 2013	7.1x	9.94%
September 30, 2013	6.7x	12.57%
June 30, 2013	6.5x	16.25%
March 31, 2013	6.3x	19.97%
December 31, 2012	7.1x	28.56%
September 30, 2012	3.8x	25.02%
June 30, 2012	3.7x	38.65%
March 31, 2012	5.2x	23.80%
December 31, 2011	3.2x	29.66%
September 30, 2011	2.9x	21.12%
June 30, 2011	3.0x	18.74%
March 31, 2011	3.0x	5.67%

(1) Leverage ratio is calculated by dividing our total liabilities by total equity at the end of each period. At September 30, 2013, \$38.7 million of payable for unsettled securities purchased has been excluded from total liabilities for the purpose of calculating this ratio.

(2) The CPR in the chart above represents the three month prepayment rate of the securities in their respective asset category.

Our Financing Strategy

We borrow against our Agency RMBS using short term repurchase agreements. We may use other sources of leverage, such as secured or unsecured debt or issuances of preferred stock. We do not have a policy limiting the amount of leverage we may incur. However, we generally expect that the ratio of our total liabilities compared to our equity, which we refer to as our leverage ratio, will be less than 12 to 1. Our amount of leverage may vary depending on market conditions and other factors that we deem relevant. As of January 31, 2014, our preliminary estimated portfolio leverage ratio was approximately 6.7 to 1. As of January 31, 2014, borrowing rates under our repurchase agreements were materially consistent with borrowing rates as of December 31, 2013. As of January 31, 2014, we had entered into master repurchase agreements with nine counterparties and had funding in place with nine counterparties, as described below.

Counterparty	Balance ⁽¹⁾	Percent of Total Borrowings	Weighted Average Maturity of Repurchase Agreements in Days
Citigroup Global Markets, Inc.	\$ 144,149	31.3%	20
Cantor Fitzgerald & Co.	61,284	13.3	14
South Street Securities, LLC	48,721	10.6	13
Morgan Stanley & Co	48,367	10.5	12

Edgar Filing: Orchid Island Capital, Inc. - Form S-11/A

SunTrust Robinson Humphrey, Inc.	44,894	9.7	12
CRT Capital Group, LLC	37,229	8.1	21
KGS-Alpha Capital Markets, L.P.	30,431	6.6	21
Goldman, Sachs & Co	24,017	5.2	24
Mizuho Securities USA, Inc.	21,629	4.7	46
Total/Weighted Average	\$ 460,721	100.0%	18

(1) In thousands.

During the year ended December 31, 2013, the average balance of our repurchase agreement financing was \$284.5 million.

Table of Contents

Recent Developments

In January 2014, we completed a public offering of 2,070,000 shares of our common stock (including 270,000 shares sold pursuant to the full exercise of the overallotment option granted to the underwriters which closed on January 29, 2014) for net proceeds of \$24.2 million after deducting underwriters' discounts and commissions and offering expenses.

On February 11, 2014, we announced that our preliminary estimate of our book value per share as of January 31, 2014 was \$12.76. We compute book value per share by dividing total stockholders' equity by the total number of shares of our common stock outstanding. At January 31, 2014, our preliminary estimated total stockholders' equity was approximately \$69.1 million with 5,411,665 shares of common stock outstanding. This preliminary estimate of our book value per share and stockholders' equity as of January 31, 2014 could differ from our actual results due to several factors that include, but are not limited to: (i) additional adjustments in the calculation of our book value as of January 31, 2014, (ii) discovery of new information that alters expectations about month-end results or impacts valuation methodologies underlying these results, (iii) errors in the assessment of portfolio value, and (iv) accounting changes required by GAAP. The amounts as of January 31, 2014 and for the month then ended have not been subjected to an audit or review as defined by professional standards by our independent registered public accounting firm and consequently are not considered final and remain subject to change.

Risk Management

We invest in Agency RMBS to mitigate credit risk. Additionally, our Agency RMBS are backed by a diversified base of mortgage loans to mitigate geographic, loan originator and other types of concentration risks.

Interest Rate Risk Management

We believe that the risk of adverse interest rate movements represents the most significant risk to our portfolio. This risk arises because (i) the interest rate indices used to calculate the interest rates on the mortgages underlying our assets may be different from the interest rate indices used to calculate the interest rates on the related borrowings, and (ii) interest rate movements affecting our borrowings may not be reasonably correlated with interest rate movements affecting our assets. We attempt to mitigate our interest rate risk by using the following techniques:

Agency RMBS Backed by ARMs. We seek to minimize the differences between interest rate indices and interest rate adjustment periods of our Agency RMBS backed by ARMs and related borrowings. At the time of funding, we typically align (i) the underlying interest rate index used to calculate interest rates for our Agency RMBS backed by ARMs and the related borrowings and (ii) the interest rate adjustment periods for our Agency RMBS backed by ARMs and the interest rate adjustment periods for our related borrowings. As our borrowings mature or are renewed, we may adjust the index used to calculate interest expense, the duration of the reset periods and the maturities of our borrowings.

Agency RMBS Backed by Fixed-Rate Mortgages. As interest rates rise, our borrowing costs increase; however, the income on our Agency RMBS backed by fixed-rate mortgages remains unchanged. Subject to qualifying and maintaining our qualification as a REIT, we may seek to limit increases to our borrowing costs through the use of interest rate swap or cap agreements, options, put or call agreements, futures contracts, forward rate agreements or similar financial instruments to effectively convert our floating-rate

borrowings into fixed-rate borrowings.

Agency RMBS Backed by Hybrid ARMs. During the fixed-rate period of our Agency RMBS backed by hybrid ARMs, the security is similar to Agency RMBS backed by fixed-rate mortgages. During this period, subject to qualifying and maintaining our qualification as a REIT, we may employ the same

Table of Contents

hedging strategy that we employ for our Agency RMBS backed by fixed-rate mortgages. Once our Agency RMBS backed by hybrid ARMs convert to floating rate securities, we may employ the same hedging strategy as we employ for our Agency RMBS backed by ARMs.

Additionally, our structured Agency RMBS generally exhibit sensitivities to movements in interest rates different than our pass-through Agency RMBS. To the extent they do so, our structured Agency RMBS may protect us against declines in the market value of our combined portfolio that result from adverse interest rate movements, although we cannot assure you that this will be the case.

Prepayment Risk Management

The risk of mortgage prepayments is another significant risk to our portfolio. When prevailing interest rates fall below the coupon rate of a mortgage, mortgage prepayments are likely to increase. Conversely, when prevailing interest rates increase above the coupon rate of a mortgage, mortgage prepayments are likely to decrease.

When prepayment rates increase, we may not be able to reinvest the money received from prepayments at yields comparable to those of the securities prepaid. Also, some ARMs and hybrid ARMs which back our Agency RMBS may bear initial teaser interest rates that are lower than their fully-indexed interest rates. If these mortgages are prepaid during this teaser period, we may lose the opportunity to receive interest payments at the higher, fully-indexed rate over the expected life of the security. Additionally, some of our structured Agency RMBS, such as IOs and IIOs, may be negatively affected by an increase in prepayment rates because their value is wholly contingent on the underlying mortgage loans having an outstanding principal balance.

A decrease in prepayment rates may also have an adverse effect on our portfolio. For example, if we invest in POs, the purchase price of such securities will be based, in part, on an assumed level of prepayments on the underlying mortgage loan. Because the returns on POs decrease the longer it takes the principal payments on the underlying loans to be paid, a decrease in prepayment rates could decrease our returns on these securities.

Prepayment risk also affects our hedging activities. When an Agency RMBS backed by a fixed-rate mortgage or hybrid ARM is acquired with borrowings, we may cap or fix our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related Agency RMBS. If prepayment rates are different than our projections, the term of the related hedging instrument may not match the fixed-rate portion of the security, which could cause us to incur losses.

Because our business may be adversely affected if prepayment rates are different than our projections, we seek to invest in Agency RMBS backed by mortgages with well-documented and predictable prepayment histories. To protect against increases in prepayment rates, we invest in Agency RMBS backed by mortgages that we believe are less likely to be prepaid. For example, we invest in Agency RMBS backed by mortgages (i) with loan balances low enough such that a borrower would likely have little incentive to refinance, (ii) extended to borrowers with credit histories weak enough to not be eligible to refinance their mortgage loans, (iii) that are newly originated fixed-rate or hybrid ARMs or (iv) that have interest rates low enough such that a borrower would likely have little incentive to refinance. To protect against decreases in prepayment rates, we may also invest in Agency RMBS backed by mortgages with characteristics opposite to those described above, which would typically be more likely to be refinanced. We may also invest in certain types of structured Agency RMBS as a means of mitigating our portfolio-wide prepayment risks. For example, certain tranches of CMOs are less sensitive to increases in prepayment rates, and we may invest in those tranches as a means of hedging against increases in prepayment rates.

Liquidity Management Strategy

Because of our use of leverage, we manage liquidity to meet our lenders' margin calls using the following measures:

Maintaining cash balances or unencumbered assets well in excess of anticipated margin calls; and

Table of Contents

Making margin calls on our lenders when we have an excess of collateral pledges against our borrowings. We also attempt to minimize the number of margin calls we receive by:

Deploying capital from our leveraged Agency RMBS portfolio to our unleveraged Agency RMBS portfolio;

Investing in Agency RMBS backed by mortgages that we believe are less likely to be prepaid to decrease the risk of excessive margin calls when monthly prepayments are announced. Prepayments are declared, and the market value of the related security declines, before the receipt of the related cash flows. Prepayment declarations give rise to a temporary collateral deficiency and generally results in margin calls by lenders;

Obtaining funding arrangements which defer or waive prepayment-related margin requirements in exchange for payments to the lender tied to the dollar amount of the collateral deficiency and a predetermined interest rate; and

Reducing our overall amount of leverage.

Our Management Strategy

On February 20, 2013, we entered into a management agreement with our Manager that governs the relationship between us and our Manager and describes the services provided by our Manager and the compensation for those services. Under the management agreement, our Manager, subject to the supervision of our Board of Directors, is required to oversee our business affairs in conformity with our operating policies and our investment guidelines that are proposed by the investment committee of our Manager and approved by our Board of Directors. Our Manager's obligations and responsibilities under the management agreement include asset selection, asset and liability management and investment portfolio risk management.

The management agreement has an initial term expiring on February 20, 2016, and will automatically be renewed for one-year terms thereafter unless terminated by us for cause or by us or our Manager upon at least 180-days notice prior to the end of the initial term or any automatic renewal term.

The following table summarizes the fees that are payable to our Manager pursuant to the management agreement:

Fee	Summary Description
Management Fee	The management fee is payable monthly in arrears in an amount equal to 1/12th of (a) 1.50% of the first \$250,000,000 of our equity (as defined below), (b) 1.25% of our equity that is greater than \$250,000,000 and less than or equal to \$500,000,000, and (c) 1.00% of our equity that is greater than \$500,000,000.

Equity equals our month-end stockholders' equity, adjusted to exclude the effect of any unrealized gains or losses included in either retained earnings or other

comprehensive income (loss), as computed in accordance with GAAP.

Under the management agreement, we paid our manager aggregate management fees of \$628,800 for the period beginning on February 20, 2013 and ended December 31, 2013.

Stock-Based Compensation

Our Manager's officers and employees are eligible to receive stock awards pursuant to our 2012 Equity Incentive Plan.

Table of Contents

Fee	Summary Description
Expense Reimbursement	<p>We reimburse any expenses directly related to our operations incurred by our Manager, excluding personnel-related expenses of our Manager or of Bimini (other than the compensation of our Chief Financial Officer), which include services provided to us pursuant to the management agreement. We reimburse our Manager for our allocable share of the compensation of our Chief Financial Officer based on our percentage of the aggregate amount of our Manager's assets under management and Bimini's assets. We also reimburse our pro rata portion of our Manager's and Bimini's overhead expenses based on our percentage of the aggregate amount of our Manager's assets under management and Bimini's assets.</p> <p>We have not reimbursed our Manager for any expenses for the period beginning February 20, 2013 and ended December 31, 2013. Pursuant to the terms of the management agreement, we are not obligated to reimburse our pro rata portion of our Manager's and Bimini's overhead expenses until our aggregate stockholders' equity equals \$100 million or more.</p>
Termination Fee	<p>The termination fee, payable for non-renewal of the management agreement without cause, will be equal to three times the sum of the average annual management fee earned by our Manager during the prior 24-month period immediately preceding the most recently completed calendar quarter prior to the effective date of termination.</p>

Overhead Sharing Agreement

On February 20, 2013, our Manager entered into an overhead sharing agreement with Bimini. Pursuant to this agreement, our Manager is provided with access to, among other things, Bimini's portfolio management, asset valuation, risk management and asset management services as well as administration services addressing accounting, financial reporting, legal, compliance, investor relations and information technologies necessary for the performance of our Manager's duties in exchange for a reimbursement of the Manager's allocable cost for these services. The reimbursement paid by our Manager pursuant to this agreement will not constitute an expense under the management agreement.

Conflicts of Interest; Equitable Allocation of Opportunities

Bimini invests solely in Agency RMBS and, because it is internally-managed, does not pay a management fee. Additionally, Bimini, as the sole member of our Manager, will indirectly receive the management fees earned by our Manager through reimbursement payments under the overhead sharing agreement and our Manager's payment of distributions to Bimini. Our Manager may in the future manage other funds, accounts and investment vehicles that have strategies that are similar to our strategy, although our Manager currently does not manage any other funds, accounts or investment vehicles. Our Manager and Bimini make available to us opportunities to acquire assets that they determine, in their reasonable and good faith judgment, based on our objectives, policies and strategies, and other relevant factors, are appropriate for us in accordance with their written investment allocation procedures and policies, subject to the exception that we might not be offered each such opportunity, but will on an overall basis equitably participate with Bimini and our Manager's other accounts in all such opportunities when considered together. Bimini and our Manager have agreed not to sponsor another REIT that has substantially the same investment strategy as Bimini or us prior to the earlier of (i) the termination or expiration of the management agreement or (ii) our Manager

no longer being a subsidiary or affiliate of Bimini.

Table of Contents

Because many of our targeted assets are typically available only in specified quantities and because many of our targeted assets are also targeted assets for Bimini and may be targeted assets for other accounts our Manager may manage in the future, neither Bimini nor our Manager may be able to buy as much of any given asset as required to satisfy the needs of Bimini, us and any other account our Manager may manage in the future. In these cases, our Manager's and Bimini's investment allocation procedures and policies will typically allocate such assets to multiple accounts in proportion to their needs and available capital. The policies will permit departure from such proportional allocation when (i) allocating purchases of whole-pool Agency RMBS, because those securities cannot be divided into multiple parts to be allocated among various accounts, and (ii) such allocation would result in an inefficiently small amount of the security being purchased for an account. In these cases, the policy allows for a protocol of allocating assets so that, on an overall basis, each account is treated equitably. Specifically, the investment allocation procedures and policies stipulate that our Manager and Bimini will base the allocation of investment opportunities in good faith and principally on the following factors:

the primary investment strategy and the stage of portfolio development of each account;

the effect of the potential investment on the diversification of each account's portfolio by coupon, purchase price, size, prepayment characteristics and leverage;

the cash requirements of each account;

the anticipated cash flow of each account's portfolio; and

the amount of funds available to each account and the length of time such funds have been available for investment.

Our independent directors conduct quarterly reviews with our Manager of its allocation decisions, if any, and discuss with our Manager the portfolio needs of each account for the next quarter and whether such needs will give rise to an asset allocation conflict and, if so, the potential resolution of such conflict.

Other policies that our Manager applies to the management of the Company include controls for cross transactions (transactions between managed accounts (including us)), principal transactions (transactions between Bimini or our Manager and a managed account (including us)) and split price executions. To date we have not entered into any cross transactions but we have entered into one principal transaction prior to our initial public offering and have conducted split price executions. See "Our Manager and the Management Agreement - Conflicts of Interest; Equitable Allocation of Opportunities and Certain Relationships and Related Transactions" for a more detailed description of these types of transactions, the principal transaction we have entered into with Bimini and the policies of Bimini and our Manager that govern these types of transactions. We currently do not anticipate that we will enter into any additional cross transactions or principal transactions.

We are entirely dependent on our Manager for our day-to-day management and do not have any independent officers. Our executive officers are also executive officers of Bimini and our Manager, and none of them will devote his time to us exclusively. We compete with Bimini and will compete with any other account managed by our Manager or other RMBS investment vehicles that may be sponsored by Bimini in the future for access to these individuals.

John B. Van Heuvelen, one of our independent director nominees, owns shares of common stock of Bimini. Mr. Cauley, our Chief Executive Officer and Chairman of our Board of Directors, also serves as Chief Executive Officer and Chairman of the Board of Directors of Bimini and owns shares of common stock of Bimini. Mr. Haas, our Chief Financial Officer, Chief Investment Officer, Secretary and a member of our Board of Directors, also serves as the Chief Financial Officer, Chief Investment Officer and Treasurer of Bimini and owns shares of common stock of Bimini. Accordingly, Messrs. Van Heuvelen, Cauley and Haas may have a conflict of interest with respect to actions by our Board of Directors that relate to Bimini or our Manager.

Table of Contents

Because our executive officers are also officers of our Manager, the terms of our management agreement, including fees payable, were not negotiated on an arm's-length basis, and its terms may not be as favorable to us as if it was negotiated with an unaffiliated party.

The management fee we pay to our Manager will be paid regardless of our performance and it may not provide sufficient incentive to our Manager to seek to achieve attractive risk-adjusted returns for our investment portfolio.

Our Formation and Structure

We were formed by Bimini as a Maryland corporation in August 2010. Bimini currently owns approximately 18.1% of our outstanding common stock. The following chart illustrates our ownership structure immediately after completion of this offering assuming no exercise of the underwriters' overallotment option.

Tax Structure

We have been organized and have operated so as to qualify to be taxed as a REIT. We will elect to be taxed as a REIT beginning with our 2013 taxable year, upon the filing of our federal income tax return for such year. Our qualification as a REIT and the maintenance of such qualification depends upon our ability to meet, on a continuing basis, various complex requirements under the Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the concentration of ownership of our capital stock. We believe that we have been organized and have operated in conformity with the requirements for qualification and taxation as a REIT under the Code, and we intend to continue to operate in a manner that will enable us to meet the requirements for qualification and taxation as a REIT. In connection with this offering, we will receive an opinion from Hunton & Williams LLP to the effect that we qualified to be taxed as a REIT under the Code for our taxable year ended December 31, 2013, and that our organization and current and proposed method of operation will enable us to continue to qualify for taxation as a REIT for our taxable year ending December 31, 2014 and thereafter.

As a REIT, we generally are not subject to U.S. federal income tax on the REIT taxable income that we currently distribute to our stockholders, but taxable income generated by any taxable REIT subsidiary, or TRS, that we may form or acquire will be subject to federal, state and local income tax. Under the Code, REITs are subject to numerous organizational and operational requirements, including a requirement that they distribute annually at least 90% of their REIT taxable income, determined without regard to the deduction for dividends

Table of Contents

paid and excluding any net capital gains. If we fail to qualify as a REIT in any calendar year and do not qualify for certain statutory relief provisions, our income would be subject to U.S. federal income tax (and any applicable state and local taxes), and we would likely be precluded from qualifying for treatment as a REIT until the fifth calendar year following the year in which we failed to qualify. As a REIT, we may still be subject to certain federal, state and local taxes on our income and assets and to U.S. federal income and excise taxes on our undistributed income.

Our Distribution Policy

To qualify as a REIT, we must distribute annually to our stockholders an amount at least equal to 90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding any net capital gain. We are subject to income tax on our taxable income that is not distributed and to an excise tax to the extent that certain percentages of our taxable income are not distributed by specified dates. See Material U.S. Federal Income Tax Considerations. Income as computed for purposes of the foregoing tax rules will not necessarily correspond to our income as determined for financial reporting purposes pursuant to GAAP. Our cash available for distribution may be less than the amount required to meet the distribution requirements for REITs under the Code, and we may be required to borrow money, sell assets or make taxable distributions of our capital stock or debt securities to satisfy the distribution requirements. Additionally, we may pay future distributions from the proceeds from this offering or other securities offerings, and thus all or a portion of such distributions may constitute a return of capital for U.S. federal income tax purposes. We do not currently intend to pay future distributions from the proceeds of this offering.

Any distributions that we make on our common stock will be authorized by and at the discretion of our Board of Directors and declared by us based upon a variety of factors deemed relevant by our directors, which may include among other things, our actual results of operations, restrictions under applicable law, our capital requirements and the REIT requirements of the Code. We have not established a minimum payment distribution level, and we cannot assure you of our ability to make distributions to our stockholders in the future.

Distributions to stockholders generally will be taxable to our stockholders as ordinary income, although a portion of such distributions may be designated by us as long-term capital gain or qualified dividend income or may constitute a return of capital. We will furnish annually to each of our stockholders a statement setting forth distributions paid during the preceding year and their U.S. federal income tax treatment. For a discussion of the U.S. federal income tax treatment of our distributions, see Material U.S. Federal Income Tax Considerations.

Restrictions on Ownership and Transfer of Our Capital Stock

Due to limitations on the concentration of ownership of REIT stock imposed by the Code, subject to certain exceptions, our charter provides that no person may beneficially or constructively own more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of any class or series of our capital stock, except that Bimini may own up to 35.0% of our common stock so long as Bimini continues to qualify as a REIT. See Description of Our Capital Stock Restrictions on Ownership and Transfer.

Our charter also prohibits any person from, among other matters:

beneficially or constructively owning or transferring shares of our capital stock if such ownership or transfer would result in our being closely held within the meaning of Section 856(h) of the Code (without regard to whether the ownership interest is held during the last half of a taxable year) or otherwise cause us to fail to qualify as a REIT; and

transferring shares of our capital stock if such transfer would result in our capital stock being owned by less than 100 persons (determined under the principles of Section 856(a)(5) of the Code).

Table of Contents

Our Board of Directors may, in its sole discretion, exempt (prospectively or retroactively) a person from the 9.8% ownership limit and other restrictions in our charter and may establish or increase an excepted holder percentage limit for such person if our Board of Directors obtains such representations, covenants and undertakings as it deems appropriate in order to conclude that granting the exemption and/or establishing or increasing the excepted holder percentage limit will not cause us to lose our qualification as a REIT.

Our charter also provides that any ownership or purported transfer of our capital stock in violation of the foregoing restrictions will result in the shares owned or transferred in such violation being automatically transferred to a charitable trust for the benefit of a charitable beneficiary and the purported owner or transferee acquiring no rights in such shares, except that any transfer that results in the violation of the restriction relating to shares of our capital stock being beneficially owned by fewer than 100 persons will be void ab initio. Additionally, if the transfer to the trust is ineffective for any reason to prevent a violation of the restriction, the transfer that would have resulted in such violation will be void ab initio.

Investment Company Act Exemption

We operate our business so that we are exempt from registration under the Investment Company Act. We rely on the exemption provided by Section 3(c)(5)(C) of the Investment Company Act, which applies to companies in the business of purchasing or otherwise acquiring mortgages and other liens on, and interests in, real estate. We monitor our portfolio periodically and prior to each investment to confirm that we continue to qualify for the exemption. To qualify for the exemption, we make investments so that at least 55% of the assets we own on an unconsolidated basis consist of qualifying mortgages and other liens on and interests in real estate, which we refer to as qualifying real estate assets, and so that at least 80% of the assets we own on an unconsolidated basis consist of real estate-related assets, including our qualifying real estate assets.

We treat whole-pool pass-through Agency RMBS as qualifying real estate assets based on no-action letters issued by the Staff of the Securities and Exchange Commission, or the SEC. In August 2011, the SEC, through a concept release, requested comments on interpretations of Section 3(c)(5)(C). To the extent that the SEC or its staff publishes new or different guidance with respect to these matters, we may fail to qualify for this exemption. Our Manager intends to manage our pass-through Agency RMBS portfolio such that we will have sufficient whole-pool pass-through Agency RMBS to ensure we retain our exemption from registration under the Investment Company Act. At present, we generally do not expect that our investments in structured Agency RMBS will constitute qualifying real estate assets but will constitute real estate-related assets for purposes of the Investment Company Act.

Our Corporate Information

Our offices are located at 3305 Flamingo Drive, Vero Beach, Florida 32963, and the telephone number of our offices is (772) 231-1400. Our internet address is www.orchidislandcapital.com. Our internet site and the information contained therein or connected thereto do not constitute a part of this prospectus or any amendment or supplement thereto.

Table of Contents

The Offering

Common stock offered by us in this offering shares ⁽¹⁾

Common stock to be outstanding after this offering shares ⁽¹⁾⁽²⁾

Use of proceeds We estimate that the net proceeds we will receive from this offering will be approximately \$ million (or approximately \$ million if the underwriters fully exercise their overallocation option), after deducting the underwriting discount and commissions of approximately \$ million (or approximately \$ million if the underwriters fully exercise their overallocation option) and estimated offering expenses of approximately \$ million payable by us.

We intend to invest the net proceeds of this offering in (i) pass-through Agency RMBS backed by hybrid ARMs, ARMs and fixed-rate mortgage loans and (ii) structured Agency RMBS. Specifically, we intend to invest the net proceeds of this offering as follows:

Approximately 40% to 80% in pass-through Agency RMBS. Of the 40% to 80% of the net proceeds allocated to pass-through Agency RMBS, the net proceeds will be further allocated as follows:

approximately 50% to 100% in pass-through Agency RMBS backed by fixed-rate mortgage loans;

approximately 0% to 75% in pass-through Agency RMBS backed by ARMs; and

approximately 0% to 75% in pass-through Agency RMBS backed by hybrid ARMs.

The remaining 20% to 60% of the proceeds will be allocated to structured Agency RMBS.

We expect to borrow against the pass-through Agency RMBS and certain of our structured Agency RMBS that we purchase with the net proceeds of this offering through repurchase agreements and use the proceeds of the borrowings to acquire additional pass-through Agency RMBS and structured Agency RMBS in accordance with a similar targeted allocation. We reserve the right to change our targeted allocation depending on prevailing market conditions, including, among others, the pricing and supply of pass-through Agency RMBS and structured Agency RMBS, the performance of our portfolio and the availability and terms of financing.

Distribution policy

To qualify as a REIT, U.S. federal income tax law generally requires that we distribute annually at least 90% of our REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gains, and that we pay tax at regular corporate rates on any undistributed REIT taxable income. We have not

Table of Contents

established a minimum distribution payment level, and we cannot assure you of our ability to make distributions to our stockholders in the future. In connection with these requirements, we intend to make regular monthly distributions of all or substantially all of our net taxable income to our stockholders. Any distributions we make will be authorized by and at the discretion of our Board of Directors and will depend upon a variety of factors deemed relevant by our directors, including, among other things, our actual results of operations, restrictions under applicable law, our capital requirements and the REIT requirements of the Code. For more information, please see [Distribution Policy](#) and [Material U.S. Federal Income Tax Considerations](#).

NYSE MKT symbol

ORC

Ownership and transfer restrictions

To assist us in qualifying as a REIT, among other purposes, our charter generally limits beneficial and constructive ownership by any person to no more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of any class or series of our capital stock, except that Bimini may own up to 35.0% of our common stock so long as Bimini continues to qualify as a REIT. In addition, our charter contains various other restrictions on the ownership and transfer of our common stock. See [Description of Capital Stock](#) [Restrictions on Ownership and Transfer](#).

Risk factors

Investing in our common stock involves a high degree of risk. See [Risk Factors](#) beginning on page 24.

- (1) Assumes the underwriters' overallotment option to purchase up to an additional _____ shares of our common stock is not exercised.
- (2) The number of shares of common stock to be outstanding immediately after the closing of this offering excludes an aggregate of 4,000,000 shares of common stock available for issuance pursuant to our 2012 Equity Incentive Plan.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

We make forward-looking statements in this prospectus that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. When we use the words believe, expect, anticipate, estimate, intend, should, may, plans, projects, will, or similar expressions, or the negative of these words, identify forward-looking statements. Statements regarding the following subjects are forward-looking by their nature:

our business and investment strategy;

our ability to deploy effectively and timely the net proceeds of this offering;

our expected operating results;

our ability to acquire investments on attractive terms;

the effect of the U.S. Federal Reserve's and the U.S. Treasury's recent actions on the liquidity of our target assets and the capital markets;

the federal conservatorship of Fannie Mae and Freddie Mac and related efforts, along with any changes in laws and regulations affecting the relationship between Fannie Mae and Freddie Mac and the U.S. Government;

mortgage loan modification programs and future legislative action;

our ability to access the capital markets;

our ability to obtain future financing arrangements;

our ability to successfully hedge the interest rate risk and prepayment risk associated with our portfolio;

our ability to make distributions to our stockholders in the future;

our understanding of our competition and our ability to compete effectively;

our ability to qualify and maintain our qualification as a REIT for U.S. federal income tax purposes;

our ability to maintain our exemption from registration under the Investment Company Act;

our ability to maintain the listing of our common stock on the NYSE MKT;

market trends;

the impact of an inability to reach an agreement on the national debt ceiling;

the effect of actual or proposed actions of the U.S. Federal Reserve with respect to monetary policy, inflation or the taper of existing financial asset purchases;

expected capital expenditures; and

the impact of technology on our operations and business.

The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Except as required by law, we are not obligated to update or revise any forward-looking statements whether as a result of new information, future events or otherwise.

Table of Contents

When considering forward-looking statements, you should keep in mind the risks and other cautionary statements set forth in this prospectus, including those contained in Risk Factors. Readers are cautioned not to place undue reliance on any of these forward-looking statements, which reflect our views as of the date of this prospectus. You should carefully consider these risks when you make a decision concerning an investment in our common stock, along with the following factors, among others, that may cause actual results to vary from our forward-looking statements:

general volatility of the securities markets in which we invest and the market price of our common stock;

our limited operating history;

changes in our business or investment strategy;

changes in interest rate spreads or the yield curve;

availability, terms and deployment of debt and equity capital;

availability of qualified personnel;

the degree and nature of our competition;

increased prepayments of the mortgage loans underlying our Agency RMBS;

risks associated with our hedging activities;

changes in governmental regulations, tax rates and similar matters; and

defaults on our investments.

Table of Contents

RISK FACTORS

You should carefully consider the risks described below relating to this offering and certain aspects of our business before making an investment decision. Our business, financial condition or results of operations could be harmed by any of these risks. Similarly, these risks could cause the market price of our common stock to decline and you might lose all or part of your investment. Our forward-looking statements in this prospectus are subject to the following risks and uncertainties. Our actual results could differ materially from those anticipated by our forward-looking statements as a result of the risk factors below.

Risks Related to this Offering

The market of our common stock may be volatile following this offering.

The market value of shares of our common stock may be based primarily upon current and future cash dividends, and the market price of shares of our common stock will be influenced by the dividends on those shares relative to market interest rates. Rising interest rates may lead potential buyers of our common stock to expect a higher dividend rate, which would adversely affect the market price of our common stock. As a result, the market price of our common stock may be highly volatile and subject to wide price fluctuations. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. Some of the factors that could negatively affect the share price or trading volume of our common stock include:

actual or anticipated variations in our quarterly operating results or distributions;

actual or anticipated variations in our quarterly operating results or distributions;

changes in our earnings estimates or publication of research reports about us or the real estate or specialty finance industry;

increases in market interest rates that lead purchasers of our common stock to demand a higher dividend yield;

changes in market valuations of similar companies;

adverse market reaction to any increased indebtedness we incur in the future;

a change in our Manager or additions or departures of key management personnel;

actions by institutional stockholders;

speculation in the press or investment community; and

general market and economic conditions.

If the market price of our common stock declines significantly, you may be unable to resell your shares at or above the offering price. We cannot assure you that the market price of our common stock will not fluctuate or decline significantly in the future.

You should not rely on lock-up agreements in connection with this offering to limit the amount of our common stock sold into the market.

We and each of our Manager, our directors and executive officers and Bimini will agree that, for a period of 30 days after the date of this prospectus, without the prior written consent of Ladenburg Thalmann & Co. Inc., we and they will not sell, dispose of or hedge any shares of our common stock, subject to certain exceptions and extensions in certain circumstances.

There are no present agreements between Ladenburg Thalmann & Co. Inc. and any of Bimini, our Manager, our directors, our executive officers or us to release any of them or us from these lock-up agreements. However, we cannot predict the circumstances or timing under which Ladenburg Thalmann & Co. Inc. may waive these restrictions. These sales or a perception that these sales may occur could reduce the market price of our common stock.

Table of Contents

Because our management will have broad discretion over the use of the net proceeds from this offering, you may not agree with how we use the proceeds, and we may not invest the proceeds successfully.

We intend to invest the net proceeds of this offering in (i) pass-through Agency RMBS backed by hybrid ARMs, ARMs and fixed-rate mortgage loans and (ii) structured Agency RMBS. Our management may invest the proceeds as it deems appropriate. In addition, market factors may require our management to allocate portions of the proceeds for other purposes. Accordingly, you will be relying on the judgment of our management with regard to the use of the proceeds from this offering, and you will not have the opportunity, as part of your investment decision, to assess whether we are using the proceeds appropriately. It is possible that we may invest the proceeds in a way that does not yield a favorable, or any, return for us.

There are material limitations in estimating our results for prior periods before the completion of our and our auditors' normal review procedures for such period.

The preliminary estimated financial information set forth in this prospectus under the heading "Prospectus Summary - Recent Developments" is not a comprehensive statement of our financial condition as of January 31, 2014, and such estimated information has not been reviewed or audited by our independent registered public accounting firm. Actual financial information as of January 31, 2014, when finally determined, may vary from our estimates and may be materially different from the preliminary estimates we have provided. Accordingly, investors should not place undue reliance on such financial information.

Risks Related to Our Business

The U.S. Federal Reserve's recent announcement that it would reduce its monthly purchases pursuant to QE3 could impact the market for and value of the Agency RMBS in which we invest as well as our net asset value and net interest margin.

On September 13, 2012, the U.S. Federal Reserve announced a third round of quantitative easing (QE3), which is an open-ended program designed to expand the Federal Reserve's holdings of long-term securities by purchasing an additional \$40 billion of Agency RMBS per month until key economic indicators, such as the unemployment rate, show signs of improvement. In December 2012, the U.S. Federal Reserve announced that it would begin buying \$45 billion of long-term Treasury bonds each month. On December 18, 2013, the U.S. Federal Reserve announced that it would reduce its purchases of Agency RMBS by \$5 billion per month and reduce its purchases of Treasury bonds by \$5 billion per month beginning in January 2014. On January 29, 2014, the U.S. Federal Reserve announced additional \$5 billion reductions to its monthly purchases of both Agency RMBS and Treasury bonds to take effect in February 2014.

The immediate effect of the announcement of QE3 was an increase in Agency RMBS prices. Since the initial price spike, prices for all securities have receded below the price levels that existed before the announcement of QE3. It is unclear what effect, if any, the incremental reduction in the rate of the U.S. Federal Reserve's monthly purchases will have on the value of the Agency RMBS in which we invest. However, it is possible that the market for such securities, the price of such securities and, as a result, our net asset value and net interest margin could be negatively affected.

Adverse developments in the broader residential mortgage market may materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

The residential mortgage market in the United States has experienced a variety of difficulties and changed economic conditions, including defaults, credit losses and liquidity concerns over the past few years. In addition, certain

commercial banks, investment banks and insurance companies have announced extensive losses from exposure to the residential mortgage market. These losses have reduced financial industry capital, leading to reduced liquidity for some institutions. These factors have impacted investor perception of the risk associated

Table of Contents

with real estate-related assets, including Agency RMBS. As a result, values for RMBS, including some Agency RMBS and other AAA-rated RMBS assets, have been negatively impacted at times. Further increased volatility and deterioration in the broader residential mortgage and RMBS markets may adversely affect the performance and market value of the Agency RMBS in which we invest.

We rely on our Agency RMBS as collateral for our financings. Any decline in their value, or perceived market uncertainty about their value, would likely make it difficult for us to obtain financing on favorable terms or at all or maintain our compliance with terms of any financing arrangements already in place. Additionally, we have elected to account for our investment in RMBS under the fair value option and, therefore, such investment will be reported on our financial statements at fair value with unrealized gains or losses included in earnings. If market conditions result in a decline in the value of our Agency RMBS, our business, financial position and results of operations and our ability to pay distributions to our stockholders could be materially adversely affected.

Interest rate mismatches between our Agency RMBS and our borrowings may reduce our net interest margin during periods of changing interest rates, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Our portfolio includes Agency RMBS backed by ARMs, hybrid ARMs and fixed-rate mortgages, and the mix of these securities in the portfolio may be increased or decreased over time. Additionally, the interest rates on ARMs and hybrid ARMs may vary over time based on changes in a short-term interest rate index, of which there are many.

We finance our acquisitions of pass-through Agency RMBS with short-term financing. During periods of rising short-term interest rates, the income we earn on these securities will not change (with respect to Agency RMBS backed by fixed-rate mortgage loans) or will not increase at the same rate (with respect to Agency RMBS backed by ARMs and hybrid ARMs) as our related financing costs, which may reduce our net interest margin or result in losses.

Separate legislation has been introduced in both houses of the U.S. Congress, which would, among other things, revoke the charters of Fannie Mae and Freddie Mac, which could materially adversely affect us if these proposed laws were enacted.

On June 25, 2013, a bipartisan group of senators introduced the Housing Finance Reform and Taxpayer Protection Act of 2013, which may serve as a catalyst for congressional discussion on the reform of Fannie Mae and Freddie Mac, to the U.S. Senate. On July 11, 2013, members of the House Committee on Financial Services introduced the Protecting American Taxpayers and Homeowners Act to the U.S. House of Representatives.

While the two bills are distinguishable in many respects, they have some notable commonalities. Both bills call for the revocation of the charters of Fannie Mae and Freddie Mac and seek to increase the opportunities for private capital to participate in, and consequently bear the risk of loss in connection with, government-guaranteed mortgage back securities. Both bills also have considerable support in their respective houses of Congress, which suggests that efforts to reform and possibly eliminate Fannie Mae and Freddie Mac may be gaining momentum.

The passage of any new legislation affecting Fannie Mae and Freddie Mac may create market uncertainty and reduce the actual or perceived credit quality of securities issued or guaranteed by the U.S. government through a new or existing successor entity to Fannie Mae and Freddie Mac. If the charters of Fannie Mae and Freddie Mac are revoked, it is unclear what effect, if any, this would have on the value of the existing Fannie Mae and Freddie Mac Agency RMBS. It is also possible that the above-referenced proposed legislation, if made law, could adversely impact the market for securities issued or guaranteed by the U.S. government and the spreads at which they trade. The foregoing could materially adversely affect the pricing, supply, liquidity and value of our target assets and otherwise materially

adversely affect our business, operations and financial condition.

Table of Contents

We cannot predict the impact, if any, on our earnings or cash available for distribution to our stockholders of the FHFA's proposed revisions to Fannie Mae's, Freddie Mac's and Ginnie Mae's existing infrastructures to align the standards and practices of the three entities.

On February 21, 2012, the FHFA released its *Strategic Plan for Enterprise Conservatorships*, which set forth three goals for the next phase of the Fannie Mae and Freddie Mac conservatorships. These three goals are to (i) build a new infrastructure for the secondary mortgage market, (ii) gradually contract Fannie Mae and Freddie Mac's presence in the marketplace while simplifying and shrinking their operations, and (iii) maintain foreclosure prevention activities and credit availability for new and refinanced mortgages. On October 4, 2012, the FHFA released its white paper entitled *Building a New Infrastructure for the Secondary Mortgage Market*, which proposes a new infrastructure for Fannie Mae and Freddie Mac that has two basic goals.

The first such goal is to replace the current, outdated infrastructures of Fannie Mae and Freddie Mac with a common, more efficient infrastructure that aligns the standards and practices of the two entities, beginning with core functions performed by both entities such as issuance, master servicing, bond administration, collateral management and data integration. The second goal is to establish an operating framework for Fannie Mae and Freddie Mac that is consistent with the progress of housing finance reform and encourages and accommodates the increased participation of private capital in assuming credit risk associated with the secondary mortgage market.

The FHFA recognizes that there are a number of impediments to their goals which may or may not be surmountable, such as the absence of any significant secondary mortgage market mechanisms beyond Fannie Mae, Freddie Mac and Ginnie Mae, and that their proposals are in the formative stages. As a result, it is unclear if the proposals will be enacted. If such proposals are enacted, it is unclear how closely what is enacted will resemble the proposals from the FHFA white paper or what the effects of the enactment will be in terms of our net asset value, earnings or cash available for distribution to our stockholders.

Mortgage loan modification programs and future legislative action may adversely affect the value of, and the returns on, our Agency RMBS, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

During the second half of 2008, the U.S. Government commenced programs designed to provide homeowners with assistance in avoiding residential mortgage loan foreclosures. The programs involve, among other things, the modification of mortgage loans to reduce the principal amount of the loans or the rate of interest payable on the loans, or to extend the payment terms of the loans.

In addition, in February 2008, the U.S. Treasury announced the Homeowner Affordability and Stability Plan, or HASP, which is a multi-faceted plan intended to prevent residential mortgage foreclosures by, among other things:

allowing certain homeowners whose homes are encumbered by Fannie Mae or Freddie Mac conforming mortgages to refinance those mortgages into lower interest rate mortgages with either Fannie Mae or Freddie Mac;

creating the Homeowner Stability Initiative, which is intended to utilize various incentives for banks and mortgage servicers to modify residential mortgage loans with the goal of reducing monthly mortgage principal and interest payments for certain qualified homeowners; and

allowing judicial modifications of Fannie Mae and Freddie Mac conforming residential mortgages loans during bankruptcy proceedings.

In October 2011, the FHFA announced proposed changes to the Home Affordable Refinance Program, or HARP, that would expand access to refinancing for qualified individuals and families whose homes have lost value by, among other things, increasing the HARP loan-to-value ratio above 125%. However, this would only

Table of Contents

apply to mortgages guaranteed by the GSEs. There are many challenging issues to this proposal, notably the question as to whether a loan with a loan-to-value ratio of 125% qualifies as a mortgage or an unsecured consumer loan.

On January 4, 2012, the Federal Reserve issued a white paper outlining additional ideas with regard to refinancings and loan modifications. It is likely that loan modifications would result in increased prepayments on some Agency RMBS. As described elsewhere, prepayments could negatively affect the value of our Agency RMBS, which could result in reduced earnings or losses and negatively affect the cash available for distribution to our stockholders. These initiatives, any future loan modification programs and future legislative or regulatory actions, including amendments to the bankruptcy laws, that result in the modification of outstanding mortgage loans may adversely affect the value of, and the returns on, the Agency RMBS in which we invest.

We invest in structured Agency RMBS, including CMOs, IOs, IIOs and POs. Although structured Agency RMBS are generally subject to the same risks as our pass-through Agency RMBS, certain types of risks may be enhanced depending on the type of structured Agency RMBS in which we invest.

The structured Agency RMBS in which we invest are securitizations (i) issued by Fannie Mae, Freddie Mac or Ginnie Mae, (ii) collateralized by Agency RMBS and (iii) divided into various tranches that have different characteristics (such as different maturities or different coupon payments). These securities may carry greater risk than an investment in pass-through Agency RMBS. For example, certain types of structured Agency RMBS, such as IOs, IIOs and POs, are more sensitive to prepayment risks than pass-through Agency RMBS. If we were to invest in structured Agency RMBS that were more sensitive to prepayment risks relative to other types of structured Agency RMBS or pass-through Agency RMBS, we may increase our portfolio-wide prepayment risk.

Increased levels of prepayments on the mortgages underlying our Agency RMBS might decrease net interest income or result in a net loss, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

In the case of residential mortgages, there are seldom any restrictions on borrowers' ability to prepay their loans. Prepayment rates generally increase when interest rates fall and decrease when interest rates rise. Prepayment rates also may be affected by other factors, including, without limitation, conditions in the housing and financial markets, governmental action, general economic conditions and the relative interest rates on ARMs, hybrid ARMs and fixed-rate mortgage loans. With respect to pass-through Agency RMBS, faster-than-expected prepayments could also materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders in various ways, including the following:

a portion of our pass-through Agency RMBS backed by ARMs and hybrid ARMs may initially bear interest at rates that are lower than their fully indexed rates, which are equivalent to the applicable index rate plus a margin. If a pass-through Agency RMBS backed by ARMs or hybrid ARMs is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, we will have held that Agency RMBS while it was less profitable and lost the opportunity to receive interest at the fully-indexed rate over the remainder of its expected life.

if we are unable to acquire new Agency RMBS to replace the prepaid Agency RMBS, our returns on capital may be lower than if we were able to quickly acquire new Agency RMBS.

When we acquire structured Agency RMBS, we anticipate that the underlying mortgages will prepay at a projected rate, generating an expected yield. When the prepayment rates on the mortgages underlying our structured Agency RMBS are higher than expected, our returns on those securities may be materially adversely affected. For example, the value of our IOs and IIOs are extremely sensitive to prepayments because holders of these securities do not have the right to receive any principal payments on the underlying mortgages. Therefore, if the mortgage loans underlying our IOs and IIOs are prepaid, such securities would cease to have any value, which, in turn, could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Table of Contents

While we seek to minimize prepayment risk, we must balance prepayment risk against other risks and the potential returns of each investment. No strategy can completely insulate us from prepayment or other such risks.

A decrease in prepayment rates on the mortgages underlying our Agency RMBS might decrease net interest income or result in a net loss, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Certain of our structured Agency RMBS may be adversely affected by a decrease in prepayment rates. For example, because POs are similar to zero-coupon bonds, our expected returns on such securities will be contingent on our receiving the principal payments of the underlying mortgage loans at expected intervals that assume a certain prepayment rate. If prepayment rates are lower than expected, we will not receive principal payments as quickly as we anticipated and, therefore, our expected returns on these securities will be adversely affected, which, in turn, could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

While we seek to minimize prepayment risk, we must balance prepayment risk against other risks and the potential returns of each investment. No strategy can completely insulate us from prepayment or other such risks.

Interest rate caps on the ARMs and hybrid ARMs backing our Agency RMBS may reduce our net interest margin during periods of rising interest rates, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

ARMs and hybrid ARMs are typically subject to periodic and lifetime interest rate caps. Periodic interest rate caps limit the amount an interest rate can increase during any given period. Lifetime interest rate caps limit the amount an interest rate can increase through the maturity of the loan. Our borrowings typically are not subject to similar restrictions. Accordingly, in a period of rapidly increasing interest rates, our financing costs could increase without limitation while caps could limit the interest we earn on the ARMs and hybrid ARMs backing our Agency RMBS. This problem is magnified for ARMs and hybrid ARMs that are not fully indexed because such periodic interest rate caps prevent the coupon on the security from fully reaching the specified rate in one reset. Further, some ARMs and hybrid ARMs may be subject to periodic payment caps that result in a portion of the interest being deferred and added to the principal outstanding. As a result, we may receive less cash income on Agency RMBS backed by ARMs and hybrid ARMs than necessary to pay interest on our related borrowings. Interest rate caps on Agency RMBS backed by ARMs and hybrid ARMs could reduce our net interest margin if interest rates were to increase beyond the level of the caps, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We rely on analytical models and other data to analyze potential asset acquisition and disposition opportunities and to manage our portfolio. Such models and other data may be incorrect, misleading or incomplete, which could cause us to purchase assets that do not meet our expectations or to make asset management decisions that are not in line with our strategy.

We rely on analytical models, and information and other data supplied by third parties. These models and data may be used to value assets or potential asset acquisitions and dispositions and in connection with our asset management activities. If our models and data prove to be incorrect, misleading or incomplete, any decisions made in reliance thereon could expose us to potential risks.

Our reliance on models and data may induce us to purchase certain assets at prices that are too high, to sell certain other assets at prices that are too low or to miss favorable opportunities altogether. Similarly, any hedging activities

that are based on faulty models and data may prove to be unsuccessful.

Some models, such as prepayment models, may be predictive in nature. The use of predictive models has inherent risks. For example, such models may incorrectly forecast future behavior, leading to potential losses. In addition, the predictive models used by us may differ substantially from those models used by other market

Table of Contents

participants, resulting in valuations based on these predictive models that may be substantially higher or lower for certain assets than actual market prices. Furthermore, because predictive models are usually constructed based on historical data supplied by third parties, the success of relying on such models may depend heavily on the accuracy and reliability of the supplied historical data, and, in the case of predicting performance in scenarios with little or no historical precedent (such as extreme broad-based declines in home prices, or deep economic recessions or depressions), such models must employ greater degrees of extrapolation and are therefore more speculative and less reliable.

All valuation models rely on correct market data input. If incorrect market data is entered into even a well-founded valuation model, the resulting valuations will be incorrect. However, even if market data is inputted correctly, model prices will often differ substantially from market prices, especially for securities with complex characteristics or whose values are particularly sensitive to various factors. If our market data inputs are incorrect or our model prices differ substantially from market prices, our business, financial condition and results of operations and our ability to make distributions to our stockholders could be materially adversely affected.

Valuations of some of our assets are inherently uncertain, may be based on estimates, may fluctuate over short periods of time and may differ from the values that would have been used if a ready market for these assets existed. As a result, the values of some of our assets are uncertain.

While in many cases our determination of the fair value of our assets is based on valuations provided by third-party dealers and pricing services, we can and do value assets based upon our judgment, and such valuations may differ from those provided by third-party dealers and pricing services. Valuations of certain assets are often difficult to obtain or are unreliable. In general, dealers and pricing services heavily disclaim their valuations. Additionally, dealers may claim to furnish valuations only as an accommodation and without special compensation, and so they may disclaim any and all liability for any direct, incidental or consequential damages arising out of any inaccuracy or incompleteness in valuations, including any act of negligence or breach of any warranty. Depending on the complexity and illiquidity of an asset, valuations of the same asset can vary substantially from one dealer or pricing service to another. The valuation process has been particularly difficult recently because market events have made valuations of certain assets more difficult and unpredictable and the disparity of valuations provided by third-party dealers has widened.

Our business, financial condition and results of operations and our ability to make distributions to our stockholders could be materially adversely affected if our fair value determinations of these assets were materially higher than the values that would exist if a ready market existed for these assets.

An increase in interest rates may cause a decrease in the volume of newly issued, or investor demand for, Agency RMBS, which could materially adversely affect our ability to acquire assets that satisfy our investment objectives and our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Rising interest rates generally reduce the demand for consumer credit, including mortgage loans, due to the higher cost of borrowing. A reduction in the volume of mortgage loans may affect the volume of Agency RMBS available to us, which could affect our ability to acquire assets that satisfy our investment objectives. Rising interest rates may also cause Agency RMBS that were issued prior to an interest rate increase to provide yields that exceed prevailing market interest rates. If rising interest rates cause us to be unable to acquire a sufficient volume of Agency RMBS or Agency RMBS with a yield that exceeds our borrowing costs, our ability to satisfy our investment objectives and to generate income and pay dividends, our business, financial condition and results of operations and our ability to pay distributions to our stockholders may be materially adversely affected.

Table of Contents

Because the assets that we acquire might experience periods of illiquidity, we might be prevented from selling our Agency RMBS at favorable times and prices, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Agency RMBS might experience periods of illiquidity. Such conditions are more likely to occur for structured Agency RMBS because such securities are generally traded in markets much less liquid than the pass-through Agency RMBS market. As a result, we may be unable to dispose of our Agency RMBS at advantageous times and prices or in a timely manner. The lack of liquidity might result from the absence of a willing buyer or an established market for these assets as well as legal or contractual restrictions on resale. The illiquidity of Agency RMBS could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Our use of leverage could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We calculate our leverage ratio by dividing our total liabilities by total equity at the end of each period. Under normal market conditions, we generally expect our leverage ratio to be less than 12 to 1, although at times our borrowings may be above or below this level. We incur this indebtedness by borrowing against a substantial portion of the market value of our pass-through Agency RMBS and a portion of our structured Agency RMBS. Our total indebtedness, however, is not expressly limited by our policies and will depend on our prospective lenders' estimates of the stability of our portfolio's cash flow. As a result, there is no limit on the amount of leverage that we may incur. We face the risk that we might not be able to meet our debt service obligations or a lender's margin requirements from our income and, to the extent we cannot, we might be forced to liquidate some of our Agency RMBS at unfavorable prices. Our use of leverage could materially adversely affect our business, financial condition and results of operation and our ability to pay distributions to our stockholders. For example:

our borrowings are secured by our pass-through Agency RMBS and a portion of our structured Agency RMBS under repurchase agreements. A decline in the market value of the pass-through Agency RMBS or structured Agency RMBS used to secure these debt obligations could limit our ability to borrow or result in lenders requiring us to pledge additional collateral to secure our borrowings. In that situation, we could be required to sell Agency RMBS under adverse market conditions in order to obtain the additional collateral required by the lender. If these sales are made at prices lower than the carrying value of the Agency RMBS, we would experience losses.

to the extent we are compelled to liquidate qualifying real estate assets to repay debts, our compliance with the REIT rules regarding our assets and our sources of gross income could be negatively affected, which could jeopardize our qualification as a REIT. Losing our REIT qualification would cause us to be subject to U.S. federal income tax (and any applicable state and local taxes) on all of our income and would decrease profitability and cash available for distributions to stockholders.

If we experience losses as a result of our use of leverage, such losses could materially adversely affect our business, results of operations and financial condition and our ability to make distributions to our stockholders.

We may incur increased borrowing costs, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Our borrowing costs under repurchase agreements are generally adjustable and correspond to short-term interest rates, such as the London Interbank Offered Rate, or LIBOR, or a short-term U.S. Treasury index, plus or minus a margin. The margins on these borrowings over or under short-term interest rates may vary depending upon a number of factors, including, without limitation:

the movement of interest rates;

the availability of financing in the market; and

the value and liquidity of our Agency RMBS.

Table of Contents

All of our current short-term borrowings are collateralized borrowings in the form of repurchase agreements. If the interest rates on these repurchase agreements increase, our business, financial condition and results of operations and our ability to pay distributions to our stockholders could be materially adversely affected.

Failure to procure adequate repurchase agreement financing, or to renew or replace existing repurchase agreement financing as it matures, could materially adversely affect our business, financial condition and results of operations and our ability to make distributions to our stockholders.

We intend to maintain master repurchase agreements with several counterparties. We cannot assure you that any, or sufficient, repurchase agreement financing will be available to us in the future on terms that are acceptable to us. Any decline in the value of Agency RMBS, or perceived market uncertainty about their value, would make it more difficult for us to obtain financing on favorable terms or at all, or maintain our compliance with the terms of any financing arrangements already in place. Additionally, our lenders may have owned or financed RMBS that have declined in value and caused the lender to suffer losses as a result of the recent downturn in the residential mortgage market. If these conditions persist, these institutions may be forced to exit the repurchase market, become insolvent or further tighten lending standards or increase the amount of equity capital, or haircuts, required to obtain financing, and in such event, could make it more difficult for us to obtain financing on favorable terms or at all. Additionally, we may be unable to diversify the credit risk associated with our lenders. In the event that we cannot obtain sufficient funding on acceptable terms, our business, financial condition and results of operations and our ability to pay distributions to our stockholders may be materially adversely effected.

Furthermore, because we intend to rely primarily on short-term borrowings to fund our acquisition of Agency RMBS, our ability to achieve our investment objective will depend not only on our ability to borrow money in sufficient amounts and on favorable terms, but also on our ability to renew or replace on a continuous basis our maturing short-term borrowings. If we are not able to renew or replace maturing borrowings, we will have to sell some or all of our assets, possibly under adverse market conditions. In addition, if the regulatory capital requirements imposed on our lenders change, they may be required to significantly increase the cost of the financing that they provide to us. Our lenders also may revise their eligibility requirements for the types of assets they are willing to finance or the terms of such financings, based on, among other factors, the regulatory environment and their management of perceived risk.

Adverse market developments could cause our lenders to require us to pledge additional assets as collateral. If our assets were insufficient to meet these collateral requirements, we might be compelled to liquidate particular assets at inopportune times and at unfavorable prices, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Adverse market developments, including a sharp or prolonged rise in interest rates, a change in prepayment rates or increasing market concern about the value or liquidity of one or more types of Agency RMBS, might reduce the market value of our portfolio, which might cause our lenders to initiate margin calls. A margin call means that the lender requires us to pledge additional collateral to re-establish the ratio of the value of the collateral to the amount of the borrowing. The specific collateral value to borrowing ratio that would trigger a margin call is not set in the master repurchase agreements and not determined until we engage in a repurchase transaction under these agreements. Our fixed-rate Agency RMBS generally are more susceptible to margin calls as increases in interest rates tend to more negatively affect the market value of fixed-rate securities. If we are unable to satisfy margin calls, our lenders may foreclose on our collateral. The threat or occurrence of a margin call could force us to sell either directly or through a foreclosure our Agency RMBS under adverse market conditions. Because of the significant leverage we expect to have, we may incur substantial losses upon the threat or occurrence of a margin call, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders. Additionally, the liquidation of

Table of Contents

collateral may jeopardize our ability to qualify or maintain our qualification as a REIT, as we must comply with requirements regarding our assets and our sources of gross income. If we are compelled to liquidate our Agency RMBS, we may be unable to comply with these requirements, ultimately jeopardizing our ability to qualify or maintain our qualification as a REIT. Our failure to qualify as a REIT or maintain our qualification would cause us to be subject to U.S. federal income tax (and any applicable state and local taxes) on all of our net taxable income.

Our use of repurchase agreements may give our lenders greater rights in the event that either we or any of our lenders file for bankruptcy, which may make it difficult for us to recover our collateral in the event of a bankruptcy filing.

Our borrowings under repurchase agreements may qualify for special treatment under the bankruptcy code, giving our lenders the ability to avoid the automatic stay provisions of the bankruptcy code and to take possession of and liquidate our collateral under the repurchase agreements without delay if we file for bankruptcy. Furthermore, the special treatment of repurchase agreements under the bankruptcy code may make it difficult for us to recover our pledged assets in the event that any of our lenders files for bankruptcy. Thus, the use of repurchase agreements exposes our pledged assets to risk in the event of a bankruptcy filing by either our lenders or us. In addition, if the lender is a broker or dealer subject to the Securities Investor Protection Act of 1970, or an insured depository institution subject to the Federal Deposit Insurance Act, our ability to exercise our rights to recover our investment under a repurchase agreement or to be compensated for any damages resulting from the lender's insolvency may be further limited by those statutes.

If we fail to maintain our relationship with AVM, L.P. or if we do not establish relationships with other repurchase agreement trading, clearing and administrative service providers, our business, financial condition and results of operations and our ability to pay distributions to our stockholders could be materially adversely affected.

We have engaged AVM, L.P. to provide us with certain repurchase agreement trading, clearing and administrative services. If we are unable to maintain our relationship with AVM, L.P. or we are unable to establish successful relationships with other repurchase agreement trading, clearing and administrative service providers, our business, financial condition and results of operations and our ability to pay distributions to our stockholders could be materially adversely affected.

If our lenders default on their obligations to resell the Agency RMBS back to us at the end of the repurchase transaction term, or if the value of the Agency RMBS has declined by the end of the repurchase transaction term or if we default on our obligations under the repurchase transaction, we will lose money on these transactions, which, in turn, may materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

When we engage in a repurchase transaction, we initially sell securities to the financial institution under one of our master repurchase agreements in exchange for cash, and our counterparty is obligated to resell the securities to us at the end of the term of the transaction, which is typically from 24 to 90 days but may be up to 364 days or more. The cash we receive when we initially sell the securities is less than the value of those securities, which is referred to as the haircut. Many financial institutions from which we may obtain repurchase agreement financing have increased their haircuts in the past and may do so again in the future. If these haircuts are increased, we will be required to post additional cash or securities as collateral for our Agency RMBS. If our counterparty defaults on its obligation to resell the securities to us, we would incur a loss on the transaction equal to the amount of the haircut (assuming there was no change in the value of the securities). We would also lose money on a repurchase transaction if the value of the underlying securities had declined as of the end of the transaction term, as we would have to repurchase the securities for their initial value but would receive securities worth less than that amount. Any losses we incur on our repurchase

transactions could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Table of Contents

If we default on one of our obligations under a repurchase transaction, the counterparty can terminate the transaction and cease entering into any other repurchase transactions with us. In that case, we would likely need to establish a replacement repurchase facility with another financial institution in order to continue to leverage our portfolio and carry out our investment strategy. There is no assurance we would be able to establish a suitable replacement facility on acceptable terms or at all.

Hedging against interest rate exposure may not completely insulate us from interest rate risk and could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

To the extent consistent with qualifying and maintaining our qualification as a REIT, we may enter into interest rate cap or swap agreements or pursue other hedging strategies, including the purchase of puts, calls or other options and futures contracts in order to hedge the interest rate risk of our portfolio. In general, our hedging strategy depends on our view of our entire portfolio consisting of assets, liabilities and derivative instruments, in light of prevailing market conditions. We could misjudge the condition of our investment portfolio or the market. Our hedging activity will vary in scope based on the level and volatility of interest rates and principal prepayments, the type of Agency RMBS we hold and other changing market conditions. Hedging may fail to protect or could adversely affect us because, among other things:

hedging can be expensive, particularly during periods of rising and volatile interest rates;

available interest rate hedging may not correspond directly with the interest rate risk for which protection is sought;

the duration of the hedge may not match the duration of the related liability;

certain types of hedges may expose us to risk of loss beyond the fee paid to initiate the hedge;

the amount of gross income that a REIT may earn from certain hedging transactions is limited by federal income tax provisions governing REITs;

the credit quality of the counterparty on the hedge may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and

the counterparty in the hedging transaction may default on its obligation to pay.

There are no perfect hedging strategies, and interest rate hedging may fail to protect us from loss. Alternatively, we may fail to properly assess a risk to our investment portfolio or may fail to recognize a risk entirely, leaving us exposed to losses without the benefit of any offsetting hedging activities. The derivative financial instruments we select may not have the effect of reducing our interest rate risk. The nature and timing of hedging transactions may influence the effectiveness of these strategies. Poorly designed strategies or improperly executed transactions could

actually increase our risk and losses. In addition, hedging activities could result in losses if the event against which we hedge does not occur.

Because of the foregoing risks, our hedging activity could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Our use of certain hedging techniques may expose us to counterparty risks.

If an interest rate swap counterparty cannot perform under the terms of the interest rate swap, we may not receive payments due under that swap, and thus, we may lose any unrealized gain associated with the interest rate swap. The hedged liability could cease to be hedged by the interest rate swap. Additionally, we may also risk the loss of any collateral we have pledged to secure our obligations under the interest rate swap if the counterparty becomes insolvent or files for bankruptcy. Similarly, if an interest rate cap counterparty fails to perform under the terms of the interest rate cap agreement, we may not receive payments due under that agreement that would off-set our interest expense and then could incur a loss for the then remaining fair market value of the interest rate cap.

Table of Contents

Clearing facilities or exchanges upon which some of our hedging instruments are traded may increase margin requirements on our hedging instruments in the event of adverse economic developments.

In response to events having or expected to have adverse economic consequences or which create market uncertainty, clearing facilities or exchanges upon which some of our hedging instruments, such as Eurodollar futures contracts, are traded may require us to post additional collateral against our hedging instruments. In response to the U.S. approaching its debt ceiling without resolution and the government shutdown, the Chicago Mercantile Exchange announced on October 15, 2013 that it would increase margin requirements by 12% for all over-the-counter interest rate swap portfolios that its clearinghouse guaranteed. This increase was subsequently rolled back on October 17, 2013 upon the news that Congress passed legislation to temporarily suspend the debt ceiling and reopen the government, which allowed time for broader negotiations concerning budgetary issues. In the event that future adverse economic developments or market uncertainty result in increased margin requirements for our hedging instruments, it could materially adversely affect our liquidity position, business, financial condition and results of operations.

Our ability to achieve our investment objectives will depend on our ability to manage future growth effectively.

Our ability to achieve our investment objectives will depend on our ability to grow, which will depend, in turn, on our Manager's ability to identify and invest in securities that meet our investment criteria. Accomplishing this result on a cost-effective basis largely will be a function of our Manager's structuring and implementation of the investment process, its ability to provide competent, attentive and efficient services to us and our access to financing on acceptable terms. Our Manager has substantial responsibilities, and, in order to grow, needs to hire, train, supervise and manage new employees successfully. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We may change our investment strategy, investment guidelines and asset allocation without notice or stockholder consent, which may result in riskier investments. In addition, our charter provides that our Board of Directors may revoke or otherwise terminate our REIT election, without the approval of our stockholders.

Our Board of Directors has the authority to change our investment strategy or asset allocation at any time without notice to or consent from our stockholders. To the extent that our investment strategy changes in the future, we may make investments that are different from, and possibly riskier than, the investments described in this annual report. A change in our investment strategy may increase our exposure to interest rate and real estate market fluctuations. Furthermore, a change in our asset allocation could result in our allocating assets in a different manner than as described in this annual report.

In addition, our charter provides that our Board of Directors may revoke or otherwise terminate our REIT election, without the approval of our stockholders, if it determines that it is no longer in our best interests to qualify as a REIT. These changes could materially adversely affect our business, financial condition, results of operations, the market value of our common stock and our ability to make distributions to our stockholders.

Competition might prevent us from acquiring Agency RMBS at favorable yields, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We operate in a highly competitive market for investment opportunities. Our net income largely depends on our ability to acquire Agency RMBS at favorable spreads over our borrowing costs. In acquiring Agency RMBS, we compete with a variety of institutional investors, including other REITs, investment banking firms, savings and loan

associations, banks, insurance companies, mutual funds, other lenders, other entities that purchase Agency RMBS, the Federal Reserve, other governmental entities and government-sponsored entities, many of which have

Table of Contents

greater financial, technical, marketing and other resources than we do. Several other REITs have recently raised, or are expected to raise, significant amounts of capital, and may have investment objectives that overlap with ours, which may create additional competition for investment opportunities. Some competitors may have a lower cost of funds and access to funding sources that may not be available to us, such as funding from the U.S. Government. Additionally, many of our competitors are not subject to REIT tax compliance or required to maintain an exemption from the Investment Company Act. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments. Furthermore, competition for investments in Agency RMBS may lead the price of such investments to increase, which may further limit our ability to generate desired returns. As a result, we may not be able to acquire sufficient Agency RMBS at favorable spreads over our borrowing costs, which would materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Actions of the U.S. Government for the purpose of stabilizing the financial markets may adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

The U.S. Government, through the Federal Reserve, the U.S. Treasury, the SEC, the Federal Housing Administration, or the FHA, the Federal Deposit Insurance Corporation, or the FDIC, and other governmental and regulatory bodies has taken or is considering taking various actions to address the recent financial crisis. For example, on July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act. Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on us and, more generally, the financial services and mortgage industries. Additionally, we cannot predict whether there will be additional proposed laws or reforms that would affect us, whether or when such changes may be adopted, how such changes may be interpreted and enforced or how such changes may affect us. However, the costs of complying with any additional laws or regulations could have a material adverse effect on our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

In addition to the foregoing, the U.S. Congress and/or various state and local legislatures may enact additional legislation or regulatory action designed to address the current economic crisis or for other purposes that could have a material adverse effect on our ability to execute our business strategies. To the extent the market does not respond favorably to these initiatives or they do not function as intended, our business, financial condition and results of operations and our ability to pay distributions to our stockholders could be materially adversely affected.

We are an emerging growth company, and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our common stock less attractive to investors.

We are an emerging growth company, as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act, and as such, we are not required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, we have reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and we are exempt from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. Although we are an emerging growth company under the JOBS Act, we have elected to opt out of the extended transition period for complying with new or revised accounting standards, and such election is irrevocable. We cannot predict if investors will find our shares of common stock less attractive because we may rely on these provisions. If some investors find our shares of common stock less attractive as a result, there may be a less active trading market for our shares and our share price may be more volatile.

Our obligation to comply with the requirements of the Sarbanes-Oxley Act will increase.

As long as we remain an emerging growth company, as that term is defined in the JOBS Act, we will be permitted to gradually comply with certain of the on-going reporting and disclosure obligations of public

Table of Contents

companies pursuant to the Sarbanes-Oxley Act. We cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our ordinary shares less attractive to investors.

Management is required to deliver a report that assesses the effectiveness of our internal controls over financial reporting pursuant to Section 302 of the Sarbanes-Oxley Act. Section 404 of the Sarbanes-Oxley Act may require our auditors to deliver an attestation report on the effectiveness of our internal controls over financial reporting in conjunction with their opinion on our audited financial statements in future years. Substantial work on our part is required to implement appropriate processes, document the system of internal control over key processes, assess their design, remediate any deficiencies identified and test their operation. This process is expected to be both costly and challenging. We cannot give any assurances that material weaknesses will not be identified in the future in connection with our compliance with the provisions of Section 302 and 404 of the Sarbanes-Oxley Act. The existence of any material weakness described above would preclude a conclusion by management and our independent auditors that we maintained effective internal control over financial reporting. Our management may be required to devote significant time and expense to remediate any material weaknesses that may be discovered and may not be able to remediate any material weakness in a timely manner. The existence of any material weakness in our internal control over financial reporting could also result in errors in our financial statements that could require us to restate our financial statements, cause us to fail to meet our reporting obligations and cause investors to lose confidence in our reported financial information, all of which could lead to a decline in the trading price of our common stock.

Terrorist attacks and other acts of violence or war may materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We cannot assure you that there will not be further terrorist attacks against the United States or U.S. businesses. These attacks or armed conflicts may directly impact the property underlying our Agency RMBS or the securities markets in general. Losses resulting from these types of events are uninsurable. More generally, any of these events could cause consumer confidence and spending to decrease or result in increased volatility in the United States and worldwide financial markets and economies. They also could result in economic uncertainty in the United States or abroad. Adverse economic conditions could harm the value of the property underlying our Agency RMBS or the securities markets in general, which could materially adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

We are highly dependent on communications and information systems operated by third parties, and systems failures could significantly disrupt our business, which may, in turn, adversely affect our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Our business is highly dependent on communications and information systems that allow us to monitor, value, buy, sell, finance and hedge our investments. These systems are operated by third parties and, as a result, we have limited ability to ensure their continued operation. In the event of a systems failure or interruption, we will have limited ability to affect the timing and success of systems restoration. Any failure or interruption of our systems could cause delays or other problems in our securities trading activities, including Agency RMBS trading activities, which could have a material adverse effect on our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

If we issue debt securities, our operations may be restricted and we will be exposed to additional risk.

If we decide to issue debt securities in the future, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than

those of our common stock. We, and indirectly our stockholders, will bear the cost of issuing and servicing such securities. Holders of debt securities may be granted specific rights, including but not limited to, the right to hold a perfected security interest in certain of our assets, the right to accelerate payments

Table of Contents

due under the indenture, rights to restrict dividend payments, and rights to approve the sale of assets. Such additional restrictive covenants and operating restrictions could have a material adverse effect on our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Adoption of the Basel III standards and other proposed supplementary regulatory standards may negatively impact our access to financing or affect the terms of our future financing arrangements.

In response to various financial crises and the volatility of financial markets, the Basel Committee on Banking Supervision adopted the Basel III standards several years ago. The final package of Basel III reforms was approved by the G20 leaders in November 2010. In January 2013, the Basel Committee agreed to delay implementation of the Basel III standards and expanded the scope of assets permitted to be included in a bank's liquidity measurement.

U.S. regulators have elected to implement substantially all of the Basel III standards. Financial institutions will have until 2019 to fully comply with the Basel III standards, which could cause an increase in capital requirements for, and could place constraints on, the financial institutions from which we borrow.

Shortly after approving the Basel III standards, U.S. regulators also issued a notice of proposed rule-making calling for enhanced supplementary leverage ratio standards, which would impose capital requirements more stringent than those of the Basel III standards for the most systematically significant banking organizations in the U.S. The enhanced standards are currently subject to public comment, and there can be no assurance that they will be adopted or, if adopted, that they will resemble the current proposal. Adoption and implementation of the Basel III standards and the supplemental regulatory standards proposed by U.S. regulators may negatively impact our access to financing or affect the terms of our future financing arrangements.

Risks Related to Conflicts of Interest in Our Relationship with Our Manager and Bimini

The management agreement with our Manager was not negotiated on an arm's-length basis and the terms, including fees payable and our inability to terminate, or our election not to renew, the management agreement based on our Manager's poor performance without paying our Manager a significant termination fee, except for a termination of the Manager with cause, may not be as favorable to us as if it were negotiated with an unaffiliated third party.

The management agreement with our Manager was negotiated between related parties, and we did not have the benefit of arm's-length negotiations of the type normally conducted with an unaffiliated third party. The terms of the management agreement with our Manager, including fees payable and our inability to terminate, or our election not to renew, the management agreement based on our Manager's poor performance without paying our Manager a significant termination fee, except for a termination of the Manager with cause, may not reflect the terms we may have received if it was negotiated with an unrelated third party. In addition, as a result of the relationship with our Manager, we may choose not to enforce, or to enforce less vigorously, our rights under the management agreement because of our desire to maintain our ongoing relationship with our Manager.

We have no employees, and our Manager is responsible for making all of our investment decisions. None of our or our Manager's officers are required to devote any specific amount of time to our business, and each of them may provide their services to Bimini, which could result in conflicts of interest.

Our Manager is responsible for making all of our investments. We do not have any employees, and we are completely reliant on our Manager to provide us with investment advisory services. Each of our and our Manager's officers is an employee of Bimini and none of them will devote their time to us exclusively. Each of Messrs. Cauley and Haas, who will be the initial members of our Manager's investment committee, is an officer of Bimini and has significant

responsibilities to Bimini. Due to the fact that each of our officers is responsible for providing services to Bimini, they may not devote sufficient time to the management of our business operations. At times when there are turbulent conditions in the mortgage markets or distress in the credit markets or other

Table of Contents

times when we will need focused support and assistance from our executive officers and our Manager, Bimini and its affiliates will likewise require greater focus and attention from them. In such situations, we may not receive the level of support and assistance that we otherwise would likely have received if we were internally managed or if such executives were not otherwise committed to provide support to Bimini.

Our Board of Directors has adopted investment guidelines that require that any investment transaction between us and Bimini or any affiliate of Bimini receive the prior approval of a majority of our independent directors. However, this policy will not eliminate the conflicts of interest that our officers will face in making investment decisions on behalf of Bimini and us. Further, we do not have any agreement or understanding with Bimini that would give us any priority over Bimini or any of its affiliates. Accordingly, we may compete for access to the benefits that we expect our relationship with our Manager and Bimini to provide.

We are completely dependent upon our Manager and certain key personnel of Bimini who provide services to us through the management agreement, and we may not find suitable replacements for our Manager and these personnel if the management agreement is terminated or such key personnel are no longer available to us.

We are completely dependent on our Manager to conduct our operations pursuant to the management agreement. Because we do not have any employees or separate facilities, we are reliant on our Manager to provide us with the personnel, services and resources necessary to carry out our day-to-day operations. Our management agreement does not require our Manager to dedicate specific personnel to our operations or a specific amount of time to our business. Additionally, because we are affiliated with Bimini, we may be negatively impacted by an event or factors, including ongoing and potential legal proceedings against Bimini and its subsidiaries, that negatively impacts or could negatively impact Bimini's business or financial condition.

After the initial term of the management agreement, which expires on February 20, 2016, or upon the expiration of any automatic renewal term, our Manager may elect not to renew the management agreement without cause, and without penalty, on 180-days prior written notice to us. If we elect not to renew the management agreement without cause, we would have to pay a termination fee equal to three times the average annual management fee earned by our Manager during the prior 24-month period immediately preceding the most recently completed calendar quarter prior to the effective date of termination. During the term of the management agreement and for two years after its expiration or termination, we may not, without the consent of our Manager, employ any employee of the Manager or any of its affiliates or any person who has been employed by our Manager or any of its affiliates at any time within the two-year period immediately preceding the date on which the person commences employment with us. We do not have retention agreements with any of our officers. We believe that the successful implementation of our investment and financing strategies depends to a significant extent upon the experience of Bimini's executive officers. None of these individuals' continued service is guaranteed. If the management agreement is terminated or these individuals leave Bimini, we may be unable to execute our business plan.

Legal proceedings involving Bimini and certain of its subsidiaries have adversely affected Bimini, may materially adversely affect Bimini's and our Manager's ability to effectively manage our business and could materially adversely affect our reputation, business, operations, financial condition and results of operations and our ability to pay distributions to our stockholders.

Bimini and its subsidiaries are currently subject to certain ongoing legal proceedings and could be subject to further legal proceedings in the future. Most of these legal proceedings arise out of the mortgage-related operations of Bimini's mortgage origination subsidiary that discontinued operations in 2007. In the past, Bimini and certain of its subsidiaries have been subject to similar actions, including proceedings alleging violations of the federal securities laws and for breach of duty arising from the sale of certain mortgage-related securities, which have now been

satisfactorily resolved. Bimini and its subsidiaries could be subject to similar actions in the future.

Table of Contents

We are externally managed and advised by our Manager pursuant to the terms of a Management Agreement. Because our officers are also officers of Bimini and our Manager, any legal proceedings or regulatory inquiries involving Bimini or our Manager, whether meritorious or not, may divert the time and attention of our Manager and certain of its key personnel from us and our investment strategy and may negatively affect Bimini's business, operations and financial condition. In addition, due to our relationship with Bimini and our Manager, such events could result in a material adverse effect on our reputation, business, financial condition and results of operations and our ability to pay distributions to our stockholders. Furthermore, if these legal proceedings were to result in a bankruptcy of Bimini or our Manager, we would not be able to terminate the Management Agreement until 30 days after we provide written notice of termination to our Manager and could experience difficulty in finding another manager or hiring personnel to conduct our business. Alternatively, a bankruptcy court could prevent us from exercising such termination rights, regardless of the provisions of the management agreement.

We, Bimini and other accounts managed by our Manager may compete for opportunities to acquire assets, which are allocated in accordance with the Investment Allocation Agreement by and among Bimini, our Manager and us.

From time to time Bimini may seek to purchase for itself the same or similar assets that our Manager seeks to purchase for us, or our Manager may seek to purchase the same or similar assets for us as it does for other accounts that may be managed by our Manager in the future. In such an instance, our Manager has no duty to allocate such opportunities in a manner that preferentially favors us. Bimini and our Manager make available to us opportunities to acquire assets that they determine, in their reasonable and good faith judgment, based on our objectives, policies and strategies, and other relevant factors, are appropriate for us in accordance with the Investment Allocation Agreement.

Because many of our targeted assets are typically available only in specified quantities and because many of our targeted assets are also targeted assets for Bimini and may be targeted assets for other accounts our Manager may manage in the future, neither Bimini nor our Manager may be able to buy as much of any given asset as required to satisfy the needs of Bimini, us and any other account our Manager may manage in the future. In these cases, the Investment Allocation Agreement will require the allocation of such assets to multiple accounts in proportion to their needs and available capital. The Investment Allocation Agreement will permit departure from such proportional allocation when (i) allocating purchases of whole-pool Agency RMBS, because those securities cannot be divided into multiple parts to be allocated among various accounts, and (ii) such allocation would result in an inefficiently small amount of the security being purchased for an account. In that case, the Investment Allocation Agreement allows for a protocol of allocating assets so that, on an overall basis, each account is treated equitably.

There are conflicts of interest in our relationships with our Manager and Bimini, which could result in decisions that are not in the best interests of our stockholders.

We are subject to conflicts of interest arising out of our relationships with Bimini and our Manager. All of our executive officers are employees of Bimini. As a result, our officers may have conflicts between their duties to us and their duties to Bimini or our Manager.

We may acquire or sell assets in which Bimini or its affiliates have or may have an interest. Similarly, Bimini or its affiliates may acquire or sell assets in which we have or may have an interest. Although such acquisitions or dispositions may present conflicts of interest, we nonetheless may pursue and consummate such transactions. Additionally, we may engage in transactions directly with Bimini or its affiliates, including the purchase and sale of all or a portion of a portfolio asset.

Acquisitions made for entities with similar objectives may be different from those made on our behalf. Bimini may have economic interests in or other relationships with others whose obligations or securities we may acquire. In

particular, such persons may make and/or hold an investment in securities that we acquire that may be

Table of Contents

pari passu, senior or junior in ranking to our interest in the securities or in which partners, security holders, officers, directors, agents or employees of such persons serve on the board of directors or otherwise have ongoing relationships. Each of such ownership and other relationships may result in securities laws restrictions on transactions in such securities and otherwise create conflicts of interest. In such instances, our Manager may, in its sole discretion, make recommendations and decisions regarding such securities for other entities that may be the same as or different from those made for us with respect to such securities and may take actions (or omit to take actions) in the context of these other economic interests or relationships that may have consequences adverse to our interests.

The officers of Bimini and our Manager devote as much time to us as our Manager deems appropriate. However, these officers may have conflicts in allocating their time and services among us, Bimini and our Manager. During turbulent conditions in the mortgage industry, distress in the credit markets or other times when we will need focused support and assistance from our Manager's officers and Bimini's employees, Bimini and other entities for which our Manager may serve as a manager in the future will likewise require greater focus and attention, placing our Manager's and Bimini's resources in high demand. In such situations, we may not receive the necessary support and assistance we require or would otherwise receive if we were internally managed.

We, directly or through Bimini or our Manager, may obtain confidential information about the companies or securities in which we have invested or may invest. If we possess confidential information about such companies or securities, there may be restrictions on our ability to dispose of, increase the amount of, or otherwise take action with respect to the securities of such companies. Our Manager's management of other accounts could create a conflict of interest to the extent our Manager or Bimini is aware of material non-public information concerning potential investment decisions. We have implemented compliance procedures and practices designed to ensure that investment decisions are not made while in possession of material non-public information. We cannot assure you, however, that these procedures and practices will be effective. In addition, this conflict and these procedures and practices may limit the freedom of our Manager to make potentially profitable investments, which could have an adverse effect on our operations. These limitations imposed by access to confidential information could therefore materially adversely affect our business, financial condition and results of operations and our ability to make distributions to our stockholders.

John B. Van Heuvelen, one of our independent directors, owns shares of common stock of Bimini. Mr. Cauley, our Chief Executive Officer and Chairman of our Board of Directors, also serves as Chief Executive Officer and Chairman of the Board of Directors of Bimini and owns shares of common stock of Bimini. Mr. Haas, our Chief Financial Officer, Chief Investment Officer, Secretary and a member of our Board of Directors, also serves as the Chief Financial Officer, Chief Investment Officer and Treasurer of Bimini and owns shares of common stock of Bimini. Accordingly, Messrs. Van Heuvelen, Cauley and Haas may have a conflict of interest with respect to actions by our Board of Directors that relate to Bimini or our Manager.

As of February 21, 2014, Bimini owns approximately 18.1% of our outstanding shares of common stock. In evaluating opportunities for us and other management strategies, this may lead our Manager to emphasize certain asset acquisition, disposition or management objectives over others, such as balancing risk or capital preservation objectives against return objectives. This could increase the risks or decrease the returns of your investment.

If we elect to not renew the management agreement without cause, we would be required to pay our Manager a substantial termination fee. These and other provisions in our management agreement make non-renewal of our management agreement difficult and costly.

Electing not to renew the management agreement without cause would be difficult and costly for us. With the consent of the majority of our independent directors, we may elect not to renew our management agreement after the initial

term of the management agreement, which expires on February 20, 2016, or upon the expiration of any automatic renewal term, both upon 180-days prior written notice. If we elect to not renew the agreement because of a decision by our Board of Directors that the management fee is unfair, our Manager has the right to

Table of Contents

renegotiate a mutually agreeable management fee. If we elect to not renew the management agreement without cause, we are required to pay our Manager a termination fee equal to three times the average annual management fee earned by our Manager during the prior 24-month period immediately preceding the most recently completed calendar quarter prior to the effective date of termination. These provisions may increase the effective cost to us of electing to not renew the management agreement, thereby adversely affecting our inclination to end our relationship with our Manager even if we believe our Manager's performance is unsatisfactory.

Our Manager's management fee is payable regardless of our performance.

Our Manager is entitled to receive a management fee from us that is based on the amount of our equity (as defined in the management agreement), regardless of the performance of our investment portfolio. For example, we would pay our Manager a management fee for a specific period even if we experienced a net loss during the same period. Our Manager's entitlement to substantial nonperformance-based compensation may reduce its incentive to devote sufficient time and effort to seeking investments that provide attractive risk-adjusted returns for our investment portfolio. This in turn could materially adversely affect our business, financial condition and results of operations and our ability to make distributions to our stockholders.

Our Manager will not be liable to us for any acts or omissions performed in accordance with the management agreement, including with respect to the performance of our investments.

Our Manager has not assumed any responsibility other than to render the services called for under the management agreement in good faith and is not responsible for any action of our Board of Directors in following or declining to follow its advice or recommendations, including as set forth in the investment guidelines. Our Manager and its affiliates, and the directors, officers, employees, members and stockholders of our Manager and its affiliates, will not be liable to us, our Board of Directors or our stockholders for any acts or omissions performed in accordance with and pursuant to the management agreement, except by reason of acts constituting bad faith, willful misconduct, gross negligence or reckless disregard of their respective duties under the management agreement. We have agreed to indemnify our Manager and its affiliates, and the directors, officers, employees, members and stockholders of our Manager and its affiliates, with respect to all expenses, losses, damages, liabilities, demands, charges and claims in respect of or arising from any acts or omissions of our Manager, its affiliates, and the directors, officers, employees, members and stockholders of our Manager and its affiliates, performed in good faith under the management agreement and not constituting bad faith, willful misconduct, gross negligence, or reckless disregard of their respective duties. Therefore, our stockholders have no recourse against our Manager with respect to the performance of investments made in accordance with the management agreement.

Risks Related to Our Common Stock

Investing in our common stock may involve a high degree of risk.

The investments we make in accordance with our investment objectives may result in a high amount of risk when compared to alternative investment options and volatility or loss of principal. Our investments may be highly speculative and aggressive, and therefore an investment in our common stock may not be suitable for someone with lower risk tolerance.

There may not be an active market for our common stock, which may cause our common stock to trade at a discount and make it difficult to sell the common stock you purchase.

Our common stock is listed on the NYSE MKT under the symbol ORC. Trading on the NYSE MKT does not ensure that there is or will be an actual market for our common stock. Accordingly, no assurance can be given as to:

the likelihood that an actual market for our common stock will develop, or be continued once developed;

the liquidity of any such market;

Table of Contents

the ability of any holder to sell shares of our common stock; or

the prices that may be obtained for our common stock.

We have not established a minimum distribution payment level, and we cannot assure you of our ability to make distributions to our stockholders in the future.

We intend to continue to make monthly distributions to our stockholders in amounts such that we distribute all or substantially all of our REIT taxable income in each year, subject to certain adjustments. We have not established a minimum distribution payment level, and our ability to make distributions might be harmed by the risk factors described in this prospectus. All distributions will be made at the discretion of our Board of Directors out of funds legally available therefor and will depend on our earnings, our financial condition, qualifying and maintaining our qualification as a REIT and such other factors as our Board of Directors may deem relevant from time to time. We cannot assure you that we will have the ability to make distributions to our stockholders in the future. To the extent that we decide to pay distributions from the proceeds of a securities offerings, such distributions would generally be considered a return of capital for U.S. federal income tax purposes. A return of capital reduces the basis of a stockholder's investment in our common stock to the extent of such basis and is treated as capital gain thereafter.

Future offerings of debt securities, which would be senior to our common stock upon liquidation, or equity securities, which would dilute our existing stockholders and may be senior to our common stock for the purposes of distributions, may harm the value of our common stock.

In the future, we may attempt to increase our capital resources by making additional offerings of debt or equity securities, including commercial paper, medium-term notes, senior or subordinated notes and classes of preferred stock or common stock, as well as warrants to purchase shares of common stock or convertible preferred stock. Upon the liquidation of the Company, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will receive a distribution of our available assets prior to the holders of our common stock. Additional equity offerings by us may dilute the holdings of our existing stockholders or reduce the market value of our common stock, or both. Our preferred stock, if issued, would have a preference on distributions that could limit our ability to make distributions to the holders of our common stock. Furthermore, a majority of our entire Board of Directors may, without stockholder approval, amend our charter to increase the aggregate number of our shares or the number of shares of any class or series that we have the authority to issue, and our Board of Directors, without stockholder approval, may also classify or reclassify any unissued shares of common stock or preferred stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Our stockholders are therefore subject to the risk of our future securities offerings reducing the market price of our common stock and diluting their common stock.

The market value of our common stock may be volatile.

The market value of shares of our common stock may be based primarily upon current and expected future cash dividends, and the market price of shares of our common stock will be influenced by the dividends on those shares relative to market interest rates. Rising interest rates may lead potential buyers of our common stock to expect a higher dividend rate, which could adversely affect the market price of shares of our common stock. As a result, the market price of our common stock may be highly volatile and subject to wide price fluctuations. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. Some of the factors that could negatively affect the share price or trading volume of our common stock include:

actual or anticipated variations in our operating results or distributions;

changes in our earnings estimates or publication of research reports about us or the real estate or specialty finance industry;

increases in market interest rates that lead purchasers of our common stock to expect a higher dividend yield;

Table of Contents

changes in market valuations of similar companies;

adverse market reaction to any increased indebtedness we incur in the future;

a change in our Manager or additions or departures of key management personnel;

actions by institutional stockholders;

speculation in the press or investment community; and

general market and economic conditions.

We cannot make any assurances that the market price of our common stock will not fluctuate or decline significantly in the future.

Broad market fluctuations could harm the market price of our common stock.

The stock market has experienced extreme price and volume fluctuations in the past that have affected the market price of many companies' stock in industries similar or related to ours and that have been unrelated to these companies' operating performances. These broad market fluctuations could occur again and could reduce the market price of our common stock. Furthermore, our operating results and prospects may be below the expectations of public market analysts and investors or may be lower than those of companies with comparable market capitalizations, which could harm the market price of our common stock.

Shares of our common stock eligible for future sale may harm our share price.

We cannot predict the effect, if any, of future sales of shares of our common stock, or the availability of shares for future sales, on the market price of our common stock. Sales of substantial amounts of these shares of our common stock, or the perception that these sales could occur, may harm prevailing market prices for our common stock. The 2012 Equity Incentive Plan provides for grants of up to an aggregate of 10% of the issued and outstanding shares of our common stock (on a fully diluted basis) at the time of the award, subject to a maximum aggregate number of shares of common stock that may be issued under the 2012 Equity Incentive Plan of 4,000,000 shares of common stock. Bimini currently owns 981,665 shares of our common stock. If Bimini sells a large number of our securities in the public market, the sale could reduce the market price of our common stock and could impede our ability to raise future capital.

An increase in market interest rates may cause a material decrease in the market price of our common stock.

One of the factors that investors may consider in deciding whether to buy or sell shares of our common stock is our distribution rate as a percentage of our share price relative to market interest rates. If the market price of our common stock is based primarily on the earnings and returns that we derive from our investments and income with respect to our investments and our related distributions to stockholders, and not from the market value of the investments themselves, then interest rate fluctuations and capital market conditions are likely to adversely affect the market price of our common stock. For instance, if market rates rise without an increase in our distribution rate, the market price of

our common stock could decrease as potential investors may require a higher distribution yield on our common stock or seek other securities paying higher distributions or interest. In addition, rising interest rates would result in increased interest expense on our variable rate debt, thereby reducing cash flow and our ability to service our indebtedness and pay distributions.

Risks Related to Our Organization and Structure

Loss of our exemption from regulation under the Investment Company Act would negatively affect the value of shares of our common stock and our ability to pay distributions to our stockholders.

We have operated and intend to continue to operate our business so as to be exempt from registration under the Investment Company Act, because we are primarily engaged in the business of purchasing or otherwise

Table of Contents

acquiring mortgages and other liens on and interests in real estate. Specifically, we invest and intend to continue to invest so that at least 55% of the assets that we own on an unconsolidated basis consist of qualifying mortgages and other liens and interests in real estate, which are collectively referred to as qualifying real estate assets, and so that at least 80% of the assets we own on an unconsolidated basis consist of real estate-related assets (including our qualifying real estate assets). We treat Fannie Mae, Freddie Mac and Ginnie Mae whole-pool residential mortgage pass-through securities issued with respect to an underlying pool of mortgage loans in which we hold all of the certificates issued by the pool as qualifying real estate assets based on no-action letters issued by the SEC. To the extent that the SEC publishes new or different guidance with respect to these matters, we may fail to qualify for this exemption.

On August 31, 2011, the SEC issued a concept release (No. IC-29778; File No. SW7-34-11, Companies Engaged in the Business of Acquiring Mortgages and Mortgage-Related Instruments) pursuant to which it is reviewing whether certain companies that invest in RMBS and rely on the exemption from registration under Section 3(c)(5)(C) of the Investment Company Act (such as us) should continue to be allowed to rely on such exemption from registration.

If we fail to qualify for this exemption, we could be required to restructure our activities in a manner that, or at a time when, we would not otherwise choose to do so, which could negatively affect the value of shares of our common stock and our ability to distribute dividends. For example, if the market value of our investments in CMOs or structured Agency RMBS, neither of which are qualifying real estate assets for Investment Company Act purposes, were to increase by an amount that resulted in less than 55% of our assets being invested in pass-through Agency RMBS, we might have to sell CMOs or structured Agen
