First quarter report 2018

Stockholm, April 20, 2018

First quarter highlights (In 2017, certain items affecting comparability had a significant negative impact on the results.)

Reported sales decreased by -9% YoY. Sales, adjusted for currency, decreased by -2% YoY with lower revenues in market areas North East Asia as well as in South East Asia, Oceania and India. The other market areas showed growth.

Gross margin was 34.2% (15.7%) ¹⁾. Gross margin excluding restructuring charges improved YoY, to 35.9% (18.7%) ¹⁾, supported by cost reductions and the continued ramp-up of Ericsson Radio System (ERS).

Operating income (loss) was SEK -0.3 (-11.3) b. Operating income (loss) excluding restructuring charges was SEK 0.9 (-9.5) b.

Networks operating margin excluding restructuring charges was 13.5% (12.8%) ¹⁾ with strong gross margin and increased investments in R&D.

Digital Services gross margin excluding restructuring charges improved YoY, to 41.4% (-25.5%) ¹⁾, driven by improved services margins as a result of cost reductions. Operating income (loss) excluding restructuring charges was SEK -2.0 (-8.8) b.

Managed Services operating margin excluding restructuring charges was 1.9% (-28.7%) ¹⁾ as a result of cost reductions and customer contract reviews.

Cash flow from operating activities was SEK 1.6 (-1.5) b. and free cash flow was SEK 0.3 (-3.2) b. Net cash increased YoY to SEK 35.6 (28.3) b.

- 1) Write-down of assets as well as provisions and adjustments related to certain customer projects had a significant negative impact on the 2017 results. In addition, a restate of 2016 and 2017 numbers has been made following IFRS 15 introduction.

Ceo comments

We have continued to execute on our focused business strategy creating solutions that help our customers improve their business. Our efforts to improve efficiency in service delivery and common costs are starting to pay off. The gross margin¹) improved to 36% (19%) in the quarter, tracking well towards our Group target of 37-39% by 2020.

A cornerstone in our strategy is to invest in R&D for both technology leadership and cost leadership, which will allow us to generate higher gross margins. We continue to increase our R&D investments in Networks to lead in 5G. In Digital Services we continue to increase investments into our new cloud-native portfolio as well as changing our ways of working for better R&D efficiency. In Managed Services we continue to focus on machine intelligence, automation and analytics to further enhance user experience, improve efficiency and better manage the increasingly complex networks of tomorrow.

In Networks we have seen the portfolio becoming more competitive in the last three quarters of 2017, resulting in market share gains, as reported by external sources. In Networks the gross margin¹) improved to 40% (35%). In Digital Services, the gross margin¹) improved to 41% (-25%), supported by cost reductions mainly in service delivery. However, operating income in Digital Services remains challenging. In Managed Services the gross margin¹) improved to 9% (-7%) supported by efficiency gains in service delivery and customer contract reviews, resulting in a positive operating income¹).

In segment Emerging Business and Other, we are gradually increasing investments in growth areas such as IoT and Unified Delivery Network (UDN). While the combined operating income of Media

Solutions and Red Bee Media improved YoY, these businesses showed a loss²) of SEK -0.5 b. in the quarter. We expect to close the announced Media Solutions divestment by the end of the third quarter.

In the quarter we reduced the total workforce by more than 3,000. Since the reduction activities were launched in July last year, we have reduced the total workforce by almost 18,000. To date, the annual run-rate effect of cost savings is approximately SEK 8.5 b., compared with the target of SEK 10 b. for mid-2018. The run-rate reduction does not yet fully impact the quarterly results.

Free cash flow improved to SEK 0.3 (-3.2) b. another step forward in improving our financial resilience. Net cash was SEK 35.6 (28.3)b.

The improvements in the quarter are encouraging. However, more work remains to be done. We have confidence in the strategic direction laid out and remain fully committed to our long-term targets. Looking ahead, we expect the rapidly increasing focus on 5G to continue, with initial business discussions focusing on enhanced mobile broadband. We continue to work closely with customers to define the optimal business models to enable them to tap into new revenue streams and capture the full value of 5G.

Planning assumptions going forward

Market related

The Radio Access Network (RAN) equipment market is estimated to decline by -2% for full-year 2018 with 2% CAGR (2018-2022). In 2018, the Chinese market is expected to decline due to reduced LTE investments, while there is positive momentum in North America.

Currency exposure

Rule of thumb: A weakening by 10% of USD to SEK would have a negative impact of approximately -5% on net sales and approximately -1 percentage point on operating margin (based on 2017 full-year currency exposure). For historical rates, see www.ericsson.com/en/investors

Ericsson related

5-year average sales seasonality between Q1 and Q2 is +9%

Focusing the business and addressing low-performing operations are expected to reduce full-year sales by up to SEK 10 b. in 2019 compared with 2016.

The current revenue baseline of the IPR licensing contract portfolio is approximately SEK 7 b. on an annual basis.

The plan is to implement cost savings with an annual run-rate effect of at least SEK 10 b. by mid-2018, compared with the Q2 2017 annual run rate.

Operating expenses typically vary between quarters due to seasonality.

Restructuring charges for full-year 2018 are estimated to be SEK 5-7 b and slightly higher in Q2 vs Q1.

Actual and estimated net impact from amortization and capitalization of development expenses and from recognition and deferral of hardware costs:

The divestment of Media Solutions is expected to be closed by the end of Q3 2018. Results will be reported as share of earnings according to the equity method. Ericsson's holding will be 49% of the shares. Media Solutions sales were SEK 3.2 b. in 2017.

Consequences of Q1 and Q2 changes in product responsibilities between segments are described in detail in Financial highlights, page 4.

Net sales

Sales as reported decreased by -9 % YoY. Sales adjusted for comparable units and currency decreased by -2% YoY with growth in North America, Europe and Latin America as well as the Middle East and Africa. Sales as reported in Networks declined by -10% YoY, mainly due to lower mobile broadband investments in Mainland China and earlier completion of larger mobile broadband projects in market area South East Asia, Oceania and India. Digital Services sales declined by -9% YoY, mainly due to continued decline in legacy product sales and related services. Managed Services sales declined by -8% YoY as a result of customer contract reviews and reduced variable sales in certain large contracts. Sales in Emerging Business and Other (former segment Other) declined by -7% YoY due to lower sales in the media business.

Sequential sales decreased by -25%. Sales adjusted for comparable units and currency decreased by -24% QoQ, in line with normal seasonality.

IPR licensing revenues

IPR licensing revenues declined YoY to SEK 1.9 (2.1) b. and from SEK 2.1 b. in Q4 2017, mainly due to currency effects.

Gross margin

Gross margin increased to 34.2% (15.7%) with significant improvements in Networks, Digital Services and Managed Services. Effects of cost reductions, a continued ramp-up of the Ericsson Radio System (ERS) product platform and good progress in addressing low-performing customer contracts in Managed Services were key drivers of the improvement. Write-down of assets, as well as provisions and adjustments related to certain customer projects had a significant negative impact on gross margin in 2017. Restructuring charges included in the gross margin amounted to SEK -1.2 (-1.7) b. and gross margin, excluding restructuring charges, was 35.9% (18.7%). Completion of amortization of software release development expenses had a positive effect on gross margin YoY and QoQ.

Sequentially, gross margin increased with significant improvements in all segments.

Operating expenses

Operating expenses decreased to SEK 15.3 (18.9) b. Write-down of assets as well as provisions and adjustments related to certain customer projects had a significant negative impact on the 2017 operating expenses.

Selling and administrative expenses decreased YoY. Cost reductions contributed with SEK 0.6 b. to the decline.

R&D expenses were SEK -9.1 (-9.1) b. The net effect of higher amortized than capitalized R&D expenses was SEK -1.1 b. Investments in Networks R&D increased YoY in accordance with the strategy.

Operating expenses decreased sequentially, following normal seasonality.

Operating expenses were negatively impacted by restructuring charges of SEK -0.4 (-0.3) b. and were flat QoQ.

Other operating income and expenses

Other operating income and expenses were SEK 0.1 (0.1) b. compared with SEK -12.9 b. in Q4 2017, which included write-down of goodwill of SEK -13.0 b.

Consequences of technology and portfolio shifts

Due to technology and portfolio shifts, the company is reducing the capitalization of development expenses for product platforms and software releases as well as the deferral of hardware costs. As a consequence, higher amortization than capitalization of development expenses and higher recognition than deferral of hardware costs had a negative impact on operating income YoY. The amounts related to capitalized software releases were fully amortized in 2017, positively impacting gross income QoQ.

Restructuring charges

Restructuring charges were SEK -1.2 (-1.7) b. Restructuring charges in Q4 2017 were SEK -2.4 b.

Operating income (loss)

Operating income (loss) increased YoY to SEK -0.3 (-11.3) b., supported by improved gross margin and reduced operating expenses, partly offset by lower sales.

The change in net impact from amortizations and capitalization of development expenses YoY was SEK -0.9 b.

Operating income (loss) improved sequentially, supported by improved gross margin, reduced operating expenses and reduced restructuring charges, partly offset by lower sales.

Write-down of assets as well as provisions and adjustments related to certain customer projects had a significant impact on the 2017 operating expenses.

Financial net

Financial net was SEK -0.5 (-0.4) b. Revaluation and realization effects of foreign exchange forecast hedging were negative at SEK -0.1 b. in the quarter. Financial net was stable sequentially.

Taxes

Taxes were positive in the quarter following the negative income.

Net income (loss) and EPS

Net income (loss) and EPS diluted increased significantly both YoY and QoQ, following the improved operating income.

Employees

The number of employees on March 31, 2018, was 97,581 a net reduction of 3,154 employees in the quarter and of 13,317 employees compared with March 31, 2017. The decrease is mainly a result of cost and efficiency activities.

Focused strategy execution

The following four measures are indicators of the progress of strategy execution.

Area	Activity	Status Q1 2018
Networks	Transition to new Ericsson Radio System	84% (2017: 61%) YTD accumulated (ERS radio unit deliveries out of total radio unit deliveries)
Digital Services	- Growth in sales of new product portfolio - Addressing critical customer contracts	- Net sales flat 12 months rolling (full-year 2017: -4%) - Out of 45 contracts identified, in total 8 have been addressed (2 in Q417)
Managed Services	Addressing low-performing customer contracts	Out of a total of 42 contracts identified, 31 (full-year 2017: 23) have been addressed to result in an annualized profit improvement of SEK 0.7 b. (end 2017: SEK 0.5 b.)

Changes in segment reporting

As of Q1 2018, sales related to 3PP routing business are reported in Networks (earlier Digital Services). Comparative periods have been restated to reflect this change. In Q1 2018, these sales were SEK 151 (160) million.

As of Q2 2018, sales related to Application Development and Maintenance (ADM) and certain sales related to Business Support Solution (BSS) will be moved between the segments Managed Services and Digital Services, with increased sales in Managed Services and a corresponding sales decrease in Digital Services (net effect of SEK 1.9 b in 2017).

¹⁾ Market Area Other includes primarily licensing revenues and the major part of segment Emerging Business and Other

South East Asia, Oceania and India

Sales declined YoY due to completion of major projects in Networks. Digital Services sales increased slightly.

North East Asia

Sales declined YoY due to lower Networks sales in Mainland China as a consequence of reduced LTE investments. Operators in Mainland China and Japan were awaiting results of spectrum allocations, which impacted sales negatively in the quarter.

North America

Reported sales declined YoY, while currency-adjusted sales increased by 6% . This growth was driven by Networks due to investments in network expansions and in 5G readiness. Digital Services sales declined YoY, due to timing of project milestones. Managed Services sales declined.

Europe and Latin America

Sales increased YoY, driven by higher Networks sales primarily in Latin America, positively impacted by project timing. Parts of Europe also contributed to Networks sales growth YoY. Growth was partly offset by lower sales in Digital Services. In line with the strategy, sales were negatively impacted by contract reviews in Digital Services and Managed Services.

Middle East and Africa

Sales grew YoY, positively impacted by deployment of network modernization and LTE contracts in parts of the Middle East.

Other

Sales declined YoY, mainly in Media Solutions and Red Bee Media. IPR licensing revenues amounted to SEK 1.9 (2.1) b.

Net sales

Sales as reported declined by -10% YoY. Sales adjusted for comparable units and currency declined by -2%. The YoY decline is mainly due to lower LTE investments in Mainland China and completion of larger projects in market area South East Asia, Oceania and India. This decline was partly offset by strong growth in Europe and Latin America as well as in the Middle East and Africa. Investments in network expansions and 5G readiness in North America continued and sales grew in constant currencies.

Sales decreased by -23% QoQ, in line with normal seasonality. Sales adjusted for comparable units and currency decreased by -22% QoQ.

Gross margin

Gross margin increased to 38.9% (31.7%) YoY. Gross margin was positively impacted by improved margins of hardware and services, driven by cost reductions and a successful shift of the radio platform. The gross margin increase was partly offset by higher recognition than deferral of hardware costs.

Gross margin improved QoQ from 32.0%.

Write-down of assets as well as provisions and adjustments related to certain customer projects had a negative impact on gross margin in 2017.

Operating margin

Operating margin improved YoY to 11.8% (8.6%), due to improved gross margin and lower restructuring charges. The improvement was partly offset by lower sales and increased R&D expenses.

Operating margin improved significantly QoQ from 5.2%.

Write-down of assets as well as provisions and adjustments related to certain customer projects had a negative impact on operating margin in 2017.

Total impact	-0.2	-0.2	-0.6

Strategy execution

As presented at the 2017 Capital Markets Day, the ambition for Networks is to improve the operating margin to 15%-17% in 2020. Three important activities for profitability improvements are to

- invest in R&D to safeguard a leading portfolio
- fully transition the radio unit deliveries to Ericsson Radio System (ERS) in order to increase competitiveness
- continue to make savings in service delivery and common costs.

The ERS, which was introduced to the market in 2015, has proven to be competitive, creating improved earnings and a stronger market position. In the first quarter 2018, ERS accounted for 84% of total radio unit deliveries. The plan is to have fully transitioned the radio unit deliveries to ERS by the end of 2018.

Net sales

Sales as reported declined by -9% YoY. Sales adjusted for comparable units and currency decreased by -3% YoY. The ongoing digitalization drives opportunities for operators to reduce costs and be more agile by: automating operations, serving and engaging with customers digitally and building programmable core networks. Consequently, operators increasingly invest in the areas where Digital Services provide solutions. The momentum is strong for the new portfolio of 5G-ready and cloud-native products, with several important customer wins in the quarter. Currency-adjusted sales of new products grew in the quarter, however not enough to compensate for the legacy product sales decline.

Sales declined by -39% QoQ following a seasonally strong Q4 and lower sales in large transformation projects. Sales adjusted for comparable units and currency declined by -38% QoQ.

Gross margin

Improved services margin had a positive impact on gross margin YoY and QoQ. The improvement was driven by cost reductions in service delivery. In addition, lower sales in large low-margin transformation projects had a positive impact. Completion of amortization of software release development expenses had a positive effect on gross margin YoY and QoQ.

Write-down of assets as well as provisions and adjustments related to certain customer projects had a significant negative impact on gross margin in 2017.

Operating income (loss)

Operating income (loss) improved YoY, driven by increased gross margin and reduced operating expenses. Operating expenses continued to decline, when excluding related restructuring charges and SEK -0.4 (0.6) b. in impact from capitalized development expenses. Activities to improve efficiencies have accelerated in the quarter and further cost reductions are planned for the remainder of 2018. Total restructuring charges of SEK -0.6 (-0.3) b. had a negative impact on operating income YoY.

Operating income (loss) improved QoQ driven by gross margin improvements and reduced operating expenses.

Write-down of assets, as well as provisions and adjustments related to certain customer projects had a significant negative impact on operating income in 2017.

Total impact	-0.4	0.3	-0.7

Strategy execution

As presented at the Capital Markets Day 2017, the target is to turn Digital Services into profits by 2020. Cost reduction activities were intensified in the quarter across the areas of service delivery, selling and administrative expenses and R&D. Cost reduction activities will continue by addressing complexity and inefficiency. While new ways of working are improving R&D efficiency, investments continue in a portfolio of 5G-ready and cloud-native products in order to defend the position and prepare Digital Services for future growth.

A key activity for profitability turnaround is to manage and complete 34 identified critical multi-year customer contracts and to either exit or complete 11 identified non-strategic contracts. 6 of the 45 contracts were successfully addressed in the quarter. At the end of the quarter, 8 contracts of the 45 have been addressed and the plan is to complete or exit approximately 50% of the 45 contracts during 2018.

Net sales

Sales as reported decreased by -8% YoY, as a result of contract reviews and reduced variable sales in certain large Managed Services Networks contracts. Sales in Managed Services IT showed good growth. Sales adjusted for comparable units and currency decreased by -4% YoY. Sales development is in line with the focused business strategy.

Sales as reported decreased by -11% QoQ.

Gross margin

Gross margin increased both YoY and QoQ, supported by results of efficiency measures as well as reviewed and addressed contracts. The QoQ gross margin increase was also supported by lower restructuring charges. Gross margin increased to 7.9% (-8.9%) YoY, and sequentially from -11.8%.

Write-down of assets as well as provisions and customer project adjustments had a significant negative impact on gross margin in 2017.

Operating income (loss)

Operating income (loss) increased to SEK 0.1 (-1.8) b. YoY, due to higher gross margin and lower operating expenses. Restructuring charges were SEK -0.1 (-0.1) b.

Sequentially, operating income (loss) increased, due to higher gross margin and lower operating expenses.

Write-down of assets as well as provisions and customer project adjustments had a significant negative impact on operating income in 2017.

Strategy execution

As part of the focused business strategy, Managed Services has its full attention on turning the business around through addressing low-performing operations and non-strategic contracts as well as improving efficiency in the service delivery process. Investments continue in machine intelligence, automation and analytics to further enhance user experience, improve efficiency and better manage the increasingly complex networks of tomorrow.

As presented at the 2017 Capital Markets Day, the ambition for Managed Services is to improve the operating margin to 4%-6% in 2020. In order to focus the business and improve profitability, 42 managed services contracts (out of >300) have been identified for exit, renegotiation or transformation. After Q1 2018, review actions for 31 of the 42 contracts have been completed resulting in an annualized profit improvement of approximately SEK 0.7 b. going forward.

Net sales

Sales as reported declined by -7% YoY. Sales adjusted for comparable units and currency decreased by -2%. Red Bee Media sales declined due to earlier renegotiations and scope changes of contracts. Media Solutions sales declined mainly due to lower sales in the discontinued portfolio including related services sales. Sales in Emerging Business and iconectiv grew YoY. In Emerging Business there was a continued YoY growth in IoT, while Unified Delivery Network (UDN) sales grew both YoY and QoQ.

Sales declined by -21% QoQ, mainly due to lower sales in Media Solutions and Red Bee Media, following a seasonally strong Q4. Sales adjusted for comparable units and currency decreased by -20% QoQ.

Gross margin

Gross margin increased YoY, mainly driven by improved gross margins in iconectiv and Media Solutions.

Gross margin increased QoQ. Write-down of assets had a significant negative impact on gross margin in Q4 2017. Gross margin in Q1 2018 was negatively impacted by customer penalties of SEK -0.1 b.

Operating income (loss)

Operating income improved YoY. Write-down of assets had a significant negative impact on operating income (loss) in Q1 2017. Income for Media Solutions and iconectiv improved YoY. Red Bee Media income was negatively impacted by lower sales and actions are ongoing to improve operations and reduce costs.

In Q1 2018, sales for the media business (Media Solutions and Red Bee Media) were SEK 1.0 (1.3) b. and operating income (loss) excluding restructuring charges and corporate allocations was SEK -0.5 (-2.6) b. Write-down of assets had a significant negative impact on operating income (loss) in Q1 2017.

Emerging Business operating income declined YoY, driven by increased investments in accordance with the strategy.

Operating income (loss) improved QoQ as write-down of assets had a significant negative impact on operating income in Q4 2017. Reduced sequential sales and customer penalties of SEK -0.1 b. had a negative impact on Q1 2018 operating income (loss). Media Solutions result declined QoQ partly due to lower sales and costs related to the planned transaction in Q3 2018.

Strategy execution

As outlined at the Capital Markets Day in 2017, the target for segment Emerging Business and Other is a break-even operating income by 2020.

Selective investments will continue in Emerging Business to build a position and grow sales in new areas.

For Red Bee Media the target is to achieve a sustainable profitable business, by continuing to develop the business as an independent entity within Ericsson and further improve operations.

In Media Solutions, Ericsson is partnering with One Equity Partners (OEP) and retaining a 49% ownership stake. This allows Ericsson to capture the upside of the business while at the same time taking an active part in the expected consolidation of the industry. Activities are ongoing to complete the transaction as planned during Q3 2018.

the Executive Team.

Ongoing litigation with LG Electronics

In March 2018, Ericsson Inc and Telefonaktiebolaget LM Ericsson sued LG Electronics, Inc. and LG Electronics MobileComm U.S.A., in the U.S. District Court for the Eastern District of Texas, Civil Action No. 4:18-cv-186Inc. Ericsson is seeking a declaratory judgment that the global, reciprocal cross-license that Ericsson offered during its negotiations with LG complied with Ericsson's FRAND commitment. Ericsson also claims that LG is an unwilling licensee, failed to negotiate in good faith, and breached its contractual obligation to ETSI.

POST-CLOSING EVENTS

Putative class action suit

In April 2018, the present CEO and CFO of Ericsson as well as three former executives were named defendants in a putative class action filed in the United States District Court for the Southern District of New York. The complaint alleges violations of United States securities laws, principally in connection with service revenues and recognition of expenses on long-term service projects. Ericsson is evaluating the complaint.

Table of Contents

Risk factors

Ericsson's operational and financial risk factors and uncertainties are described in our Annual Report 2017.

Risk factors and uncertainties in focus short term for the Parent Company and the Ericsson Group include, but are not limited to:

Potential negative effects on operators' willingness to invest in network development due to uncertainty in the financial markets and a weak economic business environment, or reduced consumer telecom spending, or increased pressure on Ericsson to provide financing, or delayed auctions of spectrums

Intense competition from existing competitors as well as new entrants, including IT companies entering the telecommunications market, which could have a material adverse effect on the results

Uncertainty regarding the financial stability of suppliers, for example due to lack of financing

Effects on gross margins and/or working capital of the business mix in the Networks segment between capacity sales and new coverage build-outs

Effects on gross margins of the business mix including new network build-outs and new managed services or digital transformation deals with initial transition costs

Effects of the ongoing industry consolidation among our customers as well as between our largest competitors, e.g. with postponed investments and intensified price competition as a consequence

New and ongoing partnerships which may not be successful and expose us to future costs

Changes in foreign exchange rates, in particular USD

Political unrest and uncertainty in certain markets, as well as escalating trade disputes

Effects on production and sales from restrictions with respect to timely and adequate supply of materials, components and production capacity and other vital services on competitive terms

No guarantees that strategy execution, specific restructuring or cost-savings initiatives, profitability restoring efforts and/or organizational changes will be sufficient, successful or executed in time to deliver any improvements in earnings

Cybersecurity incidents, which may have a material negative impact.

Rapidly changing technologies and the ways these are brought to the market, which could be disruptive to the business.

Ericsson stringently monitors the compliance with all relevant trade regulations and trade embargoes applicable to dealings with customers operating in countries where there are trade restrictions or trade restrictions are discussed. Ericsson operates globally in accordance with Group policies and directives for business ethics and conduct and has a dedicated anti-corruption program. However, in some of the countries where the company operates, corruption risks can be high and compliance failure could have a material adverse impact on our business, financial condition and brand.

Accounting policies

The group

This interim report is prepared in accordance with IAS 34. The term IFRS used in this document refers to the application of IAS and IFRS as well as interpretations of these standards as issued by IASB's Standards Interpretation Committee (SIC) and IFRS Interpretations Committee (IFRIC). The accounting policies adopted are consistent with those of the annual report for the year ended December 31, 2017 and should be read in conjunction with that annual report, with exception for the accounting policies described below.

New standards as from January 1, 2018

Two new IFRS standards are effective as from January 1, 2018, IFRS 9 Financial instruments and IFRS 15 Revenue from Customer Contracts .

Presentation in the financial statements

For IFRS 15 the Company has adopted the full retrospective method for transition, which mean that prior year comparatives have been restated and equity has been adjusted at the initial application date (January 1, 2016). The Company has applied IFRS 9 retrospectively on the required effective date, January 1, 2018. The 2018 opening balances have been adjusted, but the previous periods have not been restated.

Based on the new requirements under IFRS 15, contract assets and contract liabilities have been added as new lines in the consolidated balance sheet and statement of cash flow. Previously, contract assets were reported as trade receivables and contract liabilities were reported as deferred revenue and as advances from customers within other current liabilities. Due to IFRS 9, impairment losses on trade receivables are reported on a separate line in the consolidated income statement. Previously, these losses have been reported as Selling and administrative expenses. In the statement of comprehensive income, a new line has been added for revaluation of borrowings due to changes in credit risk. A new line has been added to the consolidated statement of equity showing the adjustment to the opening balance.

The prior periods financial statements and key ratios presented in this quarterly report have been restated to reflect adoption of these new standards.

Accounting policy IFRS 9 Financial instruments

Financial assets

The Company classifies its financial assets in the following categories: at amortized cost, at fair value through other comprehensive income (FVOCI), and at fair value through profit or loss (FVTPL). The classification depends on the characteristics of the asset and the business model in which it is held.

Financial assets at amortized cost

Financial assets are classified as amortized cost if the contractual terms give rise to payments that are solely payments of principal and interest on the principal amount outstanding and the financial asset is held in a business model whose objective is to hold financial assets in order to collect contractual cash flows. These assets are subsequently measured at amortized cost using the effective interest method, minus impairment allowances.

Financial assets at fair value through other comprehensive income (FVOCI)

Assets are classified as FVOCI if the contractual terms give rise to payments that are solely payments of principal and interest on the principal amount outstanding and the financial asset is held in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets. These assets are subsequently measured at fair value with changes in fair value recognized in other comprehensive income (OCI), except for effective interest, impairment gains and losses and foreign exchange gains and losses recognized in the income statement. Upon derecognition, the cumulative gain or loss in OCI is reclassified to the income statement.

Financial assets at fair value through profit or loss (FVTPL)

All financial assets that are not classified as either amortized cost or FVOCI are classified as FVTPL. A financial asset is classified as held for trading if it is acquired principally for the purpose of selling in the near term. Derivatives are classified as held for trading, unless they are designated as hedging instruments for the purpose of hedge accounting. Assets held for trading are classified as current assets. Debt instruments classified as FVTPL, but not held for trading, are classified on the balance sheet based on their maturity date (i.e. those with a maturity longer than one year are classified as non-current). Investments in shares and participations are classified as FVTPL and classified as non-current financial assets.

Gains or losses arising from changes in the fair values of the Financial assets at fair value through profit or loss category (excluding derivatives and customer financing) are presented in the income statement within Financial income in the period in which they arise. Gains and losses on derivatives are presented in the income statement either as Cost of sales, Other operating income, Financial income or Financial expense, depending on the intent with the transaction. Gains and losses on customer financing are presented in the income statement as Selling expenses.

Impairment in relation to financial assets

At each balance sheet date, financial assets classified as either amortized cost or FVOCI and contract assets are assessed for impairment based on Expected Credit Losses (ECL). Allowances for trade receivables and contract assets are always equal to lifetime ECL. The loss is recognized in the income statement. When there is no reasonable expectation of collection, the asset is written off.

Borrowings

Borrowings by the Parent Company are designated FVTPL because they are managed and evaluated on a fair value basis. Changes in fair value are recognized in the income statement, except for changes in fair value due to change in credit risk which are recognized in Other comprehensive income.

Table of Contents

Summary of changes to classification of financial assets and financial liabilities

Type of asset	IAS 39 classification	IFRS 9 classification	Reason for IFRS 9 classification
Cash equivalents, interest-bearing securities, and derivatives (held for trading)	FVTPL	FVTPL	Held for trading portfolios are classified as FVTPL (no change).
Cash equivalents (not held for trading)	Loans and receivables	Amortized cost	These assets are held to collect contractual cash flows.
Interest-bearing securities (not held for trading)	Available-for-sale	FVTPL	These assets are not held for trading but are managed and evaluated on a fair value basis.
Trade receivables	Loans and receivables	FVOCI	Trade receivables are managed in a business model whose objective is achieved through both collection of contractual cash flows and selling of assets.
Customer financing	Loans and receivables	FVTPL	Customer finance assets are managed in a business model with the objective to realize cash flows through the sale of assets.
Investments in shares and participations (equity instruments)	Available-for-sale	FVTPL	This is an accounting policy choice under IFRS 9.
Borrowings by parent company	Amortized cost	Designated FVTPL	These borrowings are managed and evaluated on a fair value basis.

Fair value hedging and fair value hedge accounting

Fair value hedge accounting is no longer applied as of January 1, 2018.

Financial guarantees

Financial guarantee contracts are initially recognized at fair value (i.e., usually the fee received). Subsequently, these contracts are measured at the higher of:

- The expected credit losses.
- The recognized contractual fee less cumulative amortization when amortized over the guarantee period, using the straight-line-method.

Accounting policy IFRS 15 Revenue from Contracts with Customers

IFRS 15, Revenue from Contracts with Customers establishes a new principle-based model of recognizing revenue from customer contracts. It introduces a five-step model that requires revenue to be recognized when control over goods and services are transferred to the customer.

The following paragraphs describes the types of contracts, when performance obligations are satisfied, and the timing of revenue recognition. They also describe the normal payment terms associated with such contracts and the resulting impact on the balance sheet over the duration of the contracts. The vast majority of Ericsson's business is for the sale of standard products and services.

Standard products and services

Products and services are classified as standard solutions if they do not require significant installation and integration services to be delivered. Installation and integration services are generally completed within a short period of time, from the delivery of the related products. These products and services are viewed as separate distinct performance obligations. This type of customer contract is usually signed as a frame agreement and the customer issues individual purchase orders to commit to purchases of products and services over the duration of the agreement.

Revenue for standard products shall be recognized when control over the equipment is transferred to the customer at a point in time. This assessment shall be viewed from a customer's perspective considering indicators such as transfer of titles and risks, customer acceptance, physical possession, and billing rights. For hardware sales, transfer of control is usually deemed to occur when the equipment arrives at the customer site and for software sales, when the licenses are made available to the customer. Contractual terms may vary, therefore judgment will be applied when assessing the indicators of transfer of control. Revenue for installation and integration services is recognized upon completion of the service.

Transaction prices under these contracts are mostly billed upon delivery of the hardware or software, and completion of installation services, although a proportion may be billed upon formal acceptance of the related installation services. This will result in a contract asset for the proportion of the transaction price that is not yet billed.

Revenue for recurring services such as customer support and managed services is recognized as the services are delivered, generally pro-rata over time. Transaction prices under these contracts are billed over time, often on a quarterly basis. Contract liabilities or receivables may arise depending on whether the quarterly billing is in advance or in arrears.

Contract for standard products and services applies to business in all segments.

Customized solution

Some products and services are sold together as part of a customized solution to the customer. This type of contract requires significant installation and integration services to be delivered within the solution, normally over a period of more than 1 year. These products and services are viewed together as a combined performance obligation. This type of contract is usually sold as a firm contract in which the scope of the solution and obligations of both parties are clearly defined for the duration of the contract.

Table of Contents

Revenue for the combined performance obligation shall be recognized over time if progress of completion can be reliably measured and enforceable right to payment exists over the duration of the contract. The progress of completion is estimated by reference to the output delivered such as achievement of contract milestones and customer acceptance. This method is considered appropriate as it reflects the nature of the customized solution and how integration service is delivered in these projects. Formal acceptance term is considered a key indicator of transfer of control for a customized solution and shall therefore be obtained prior to recognizing revenue. If the criteria above are not met, then all revenue shall be recognized upon the completion of the customized solution, when final acceptance is provided by the customer.

Transaction price under these contracts are represented by progress payments or billing milestones as defined in the contracts. In most cases, revenue recognized is limited to the progress payments or unconditional billing milestones over the duration of the contract, therefore no contract asset or contract liability arises on these contracts. In some contracts, revenue may be recognized in advance of billing milestones if enforceable payment rights exist at all times over the contract duration. This will result in a contract asset balance until billing milestones are reached.

Contract for customized solution applies to the Business Support Systems (BSS) business within the segment Digital Services and the Media Solutions business within the segment Emerging Business and Other.

Intellectual Property Rights (IPR)

This type of contract relates to the patent and licensing business. The Company has assessed that the nature of its IPR contracts is such that they provide customers a license with the right to access Ericsson intellectual properties over time, therefore revenue shall be recognized over the duration of the contract. Royalty revenue based on sales or usage is recognized when the sales and usage occurs.

The transaction price on these contracts is usually structured as a royalty fee based on sales or usage over the period, measured on a quarterly basis. This results in a receivable balance if the billing is performed the following quarter after measurement. Some contracts include lump sum amounts, payable either up front at commencement or on an annual basis. This results in a contract liability balance if payment is in advance of revenue, as revenue is recognized over time.

As described in Note C3 Segment Information of the Annual Report 2017, revenue from IPR licensing contracts are allocated to the segments Networks and Digital Services.

Alternative performance measures

This section includes a reconciliation of certain Alternative Performance Measures (APMs) to the most directly reconcilable line items in the financial statements. The presentation of APMs has limitations as analytical tools and should not be considered in isolation or as a substitute for related financial measures prepared in accordance with IFRS.

APMs are presented to enhance an investor's evaluation of ongoing operating results, to aid in forecasting future periods and to facilitate meaningful comparison of results between periods.

Management uses these APMs to, among other things, evaluate ongoing operations in relation to historical results, for internal planning and forecasting purposes and in the calculation of certain performance-based compensation.

The APMs presented in this report may differ from similarly titled measures used by other companies.

For additional information, see Alternative Performance Measures in the Ericsson Annual Report 2017.
