Item 1. Reports to Stockholders.

November 15, 2003

Dear Shareholder,

We present you with the annual report for Fort Dearborn Income Securities, Inc. (the "Fund") for the fiscal year ended September 30, 2003.

An Interview with the Portfolio Manager

- Q. Can you describe the economic environment during the reporting period?
- A. As the reporting period began in October 2002, there was a great deal of uncertainty surrounding the economy. Fourth quarter 2002 and first quarter 2003 gross domestic product (GDP) growth was a tepid 1.4%. While consumer

spending was resilient leading up to the start of the war in Iraq, corporations postponed major purchases as they waited for clearer signs of a sustainable economic upturn.

Although the conclusion of major combat in Iraq stimulated the equity markets, its impact on the economy was initially unclear. Despite some indications that the economy was turning a corner; heightened concerns about terrorism, widening turmoil in the Middle East and continued lackluster corporate spending all served to undermine the economy.

The following quarter produced more positive news. The combined effects of significantly higher military spending, an increase in exports, and a stronger manufacturing sector fueled an uptick in economic growth that resulted in a second quarter 2003 GDP figure of 3.3%. This was followed by a preliminary third quarter 2003 GDP estimate of 7.2%—far higher than anticipated, and the sharpest recorded advance since 1984. Consumer and business spending provided significant impetus behind this figure; consumer spending rose 6.6%, its highest rate since 1988, while business spending surged to 11.1%, its best posting since the first quarter of 2000.

- Q. How did the Federal Reserve Board (the "Fed") react in this economic environment?
- A. The Fed was on hold early in the reporting period, as it waited for more definitive signs regarding the economy's direction. However, by November 2002, it became apparent that the interest rate cuts up to that point had not spurred meaningful growth. Thus, the Fed lowered interest rates by another 50 basis points to 1.25%—a four-decade low. (A basis point is 1/100th of a percent.)

Given consumers' and businesses' preoccupation with the situation in Iraq, the economic picture remained murky during the early months of 2003. Fed Chairman Alan Greenspan, in a statement at that time, expressed concerns about deflation. It came as no surprise, then, when, in June 2003, the Fed moved to cut rates an additional 25 basis points to 1.00%—the lowest level since 1958. Since that time, the Fed has remained on hold, although it has made clear its willingness to cut rates further if necessary. At its September 16, 2003 meeting, the Fed rationalized this position, noting, "an accommodative stance on monetary policy, coupled with robust underlying growth in productivity, is providing important ongoing support to economic activity."

- Q. How did the overall fixed income markets perform during the fiscal year?
- A. The fixed income markets were extremely volatile during the reporting period. Initially, interest rates fell and bond prices rose as geopolitical concerns and the weak stock market caused investors to flock to the relative safety offered by fixed income securities.

1

In the days leading up to the war and during its initial phases, bond prices generally fell. Based on reports surrounding the progress of the war, investors believed that it would be short-lived and would result in an increase in economic activity. However, following the end of major conflict in Iraq and the absence of a post-war economic bounce, bond prices rallied. The riskier segments of the bond market generated the best returns, as investors searched for incremental yields in the low interest rate environment.

Toward the end of the fiscal year, the bond market experienced unprecedented fluctuations. Fed-driven concerns about deflation dominated the market and drove the yield on the 10-year Treasury to a 45-year low of 3.1%. This gave way, however, to a market that began pricing in stronger economic growth prospects for the second half of the year. A selloff ensued, and the yield on the 10-year Treasury surged to 4.60% in a span of 10 weeks, reaching a 14-month high. By period end, this figure fell back to 3.93%, as continued high unemployment eased fears that the Fed would raise rates at its September meeting. Indeed, the Fed did leave rates on hold at that time, citing labor statistics as a significant reason behind its decision to do so. Further, it reiterated its commitment to maintaining low rates.

- Q. How did you position the Fund's portfolio during the period?
- A. For much of the reporting period, the Fund's duration was shorter than that of its benchmark, the Investment Grade Bond Index (the "benchmark").* This stance led to mixed results—hurting performance when interest rates declined, helping performance when interest rates rose. Toward the end of the period, we opportunistically increased the Fund's duration to a neutral position, since we believed rates had risen too far, too fast. This benefited results when rates subsequently declined at the end of the reporting period.

From a sector standpoint, corporate credit was the best performing segment of the investment grade market. Throughout the period, our long-standing process of utilizing bottom-up credit analysis in this market helped us to identify compelling opportunities that generated positive absolute returns. However, our underweight in credit compared to the benchmark hurt relative results.

The Fund also maintained an overweight position in asset-backed and commercial mortgage-backed securities over the period. These sectors underperformed the credit markets, detracting from results.

- Q. What is your outlook for the economy and how do you anticipate positioning the Fund going forward?
- A. We are fairly positive regarding the growth prospects for the economy. Consumer spending is solid, the manufacturing sector appears to be gaining momentum, the housing market remains strong, tax cuts are starting to work their way through the system, and the Fed should remain accommodative. One major issue we're following very closely is the job market. Even though the economy appears to be picking up steam, it has not yet triggered an increase in job growth. With approximately 70% of the economy driven by the consumer, continued high unemployment could hurt consumer confidence and temper economic expansion.

In terms of the Fund's portfolio, its duration is now in line with the benchmark. To the extent possible, we have added long duration and short duration bonds, as we believe this will be beneficial if the yield curve flattens from its current steep slope. We continue to be underweight investment grade credit, as we feel spreads are too tight relative to their risk.

^{*}Index composition, 12/31/81 to present: 5% Lehman U.S. Agency Index, 75% Lehman U.S. Credit Index, 10% Lehman U.S. Mortgage Fixed Rate MBS Index, 10% Lehman U.S. Treasury Index.

Net investment income for the 12 months was \$0.83 per share and net realized and unrealized gains on investments totaled \$0.81 per share. On September 30, 2003, the net asset value per share was \$16.46 and the stock closed that day at \$14.70 per share.

During the period, the Board of Directors declared regular quarterly dividends of \$0.23 per share, \$0.22 per share, \$0.20 per share and \$0.20 per share payable on December 13, 2002, March 26, 2003, June 13, 2003 and September 12, 2003, respectively. In addition to regular dividends, the Board declared a capital gains distribution of \$0.04 per share payable on December 13, 2002.

At the end of the period, the 160 issues in the portfolio had an average market yield of 5.02%, an average Moody's quality rating of A1, an average duration of 8.3 years, and an average maturity of 14.9 years. The distribution of the portfolio's expected maturities and quality was as follows:

Maturities		Quality		
0-1 year	1.0%	Treasury, Agency and Aaa	36.6%	
1-3 years	3.7	Aa	1.8	
3-5 years	1.9	A	28.7	
5-10 years	53.6	Baa	30.8	
10-20 years	11.3	Below Baa	2.1	
20 plus years	28.5			
			100.0%	
	100.0%			

Our ultimate objective in managing your investments is to help you successfully meet your financial goals. We thank you for your continued support and welcome any comments or questions you may have.

Sincerely, Sincerely,

/s/ Joseph A. Varnas /s/ Craig G. Ellinger

Joseph A. Varnas Craig G. Ellinger President Portfolio Manager

This letter is intended to assist shareholders in understanding how the Fund performed during the fiscal year ended September 30, 2003, and reflects our views at the time of its writing. Of course, these views may change in response to changing circumstances, and they do not guarantee the future performance of the markets or the Fund. We encourage you to consult your financial advisor regarding your personal investment program.

Past performance does not predict future performance. The return and principal value of an investment will fluctuate, so that an investor's shares, when sold, may be worth more or less than their original cost. NAV return assumes, for illustration only, that dividends were reinvested at the net asset value on the ex-dividend dates. Market price return assumes dividends were reinvested under the Dividend Reinvestment Plan. NAV and market price returns for periods of less than one year are cumulative. Returns do not include brokerage commissions or taxes paid on realized capital gains.

Index composition, 12/31/81 - present: 5% Lehman US Agency Index; 75% Lehman US Credit Index; 10% Lehman US Mortgage Fixed Rate MBS Index; 10% Lehman US Treasury Index.

Market Price, Dividend and Yields as of 9/30/03

Market Price	\$14.70
Net Asset Value (per share applicable to common shareholders)	\$16.46
12-Month Net Investment Income Dividend (ended 9/30/03)	\$0.850
September 2003 Dividend	\$0.200
Market Yield*	5.44%
NAV Yield*	4.86%
IPO Yield*	4.27%

^{*} Market yield is calculated by multiplying the September dividend by 4 and dividing by the month-end market price. NAV yield is calculated by multiplying the September dividend by 4 and dividing by the month-end net asset value. IPO yield is calculated by multiplying the September dividend by 4 and dividing by the initial public offering price. Prices and yields will vary.

NOTES TO FINANCIAL STATEMENTS September 30, 2003

1. SIGNIFICANT ACCOUNTING POLICIES

Fort Dearborn Income Securities, Inc. ("the Company") is registered under the Investment Company Act of 1940, as amended, as a diversified closed-end management investment company. The Company invests principally in investment grade long-term fixed income debt securities with the primary objective of providing its shareholders with:

- o a stable stream of current income consistent with external interest rate conditions, and
- o a total return over time that is above what they could receive by investing individually in the investment grade and long-term maturity sectors of the bond market.

The following is a summary of the significant accounting policies followed by the Company in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. Valuation of Investments — The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized "matrix" systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. If a market value is not available from an independent pricing source for a particular security, that security is valued

⁽a) Moody's as a matter of policy, does not rate this issue.

^{*} Standard & Poor's Corporation rating. Security is not rated by Moody's Investor Service, Inc.

¹⁴⁴A Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2003, the value of these securities amounted to \$5,063,527 or 3.5% of the total portfolio of investments.

at fair value as determined in good faith by or under the direction of the Fund's board of directors (the "Board"). The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value.

- B. Investment Income and Security Transactions -- Interest income is recorded on the accrual basis. Dividend income is recorded on ex-dividend date. Security transactions are accounted for on the trade date. The Company has elected to amortize market discount and premium on all issues purchased. Realized gains and losses from security transactions and unrealized appreciation and depreciation of investments are reported on a first-in first-out basis.
- C. Federal Income Taxes -- For federal income tax purposes, the cost of securities owned at September 30, 2003, was substantially the same as the cost of securities for financial statement purposes.

17

NOTES TO FINANCIAL STATEMENTS--(Continued) September 30, 2003

1. SIGNIFICANT ACCOUNTING POLICIES (Continued)

At September 30, 2003, the components of net unrealized appreciation of investments were as follows:

Gross appreciation (investments having an excess of value over cost)	\$11 , 928 , 084
Gross depreciation (investments having an excess of cost over value) \dots	(2,334,371)
Net unrealized appreciation of investments	\$ 9,593,713
	========

The Fund intends to distribute substantially all of its taxable income and to comply with the other requirements of the Internal Revenue Code applicable to regulated investment companies. Accordingly, no provision for federal income taxes is required. In addition, by distributing during each calendar year substantially all of its net investment income, capital gains and certain other amounts, if any, the Fund intends not to be subject to a federal excise tax.

At September 30, 2003, the components of accumulated earnings on a tax basis were as follows:

Total accumulated earnings	\$9,349,135
Unrealized appreciation	9,564,317
Accumulated capital and other losses	(235 , 576)
Undistributed long term capital gains	
Accumulated earnings	\$ 20,394

The differences between book-basis and tax-basis unrealized appreciation is attributable to the tax deferral of losses on wash sales.

Net realized gains or losses may differ for financial and tax reporting purposes as a result of post October 31 losses, which are not recognized for tax purposes until the first day of the following fiscal year along with losses from wash sales.

2. NET ASSET VALUATIONS

The net asset value of the Company's shares is determined as of the close of business each day the New York Stock Exchange is open.

3. DISTRIBUTIONS

The tax character of distributions paid during the fiscal years ended September 30, 2003 and September 30, 2002 were as follows:

Distributions paid from:	2003	2002
Ordinary income	\$7,643,604 166,738	\$9,828,744
	\$7,810,342	\$9,828,744
	========	========

18

NOTES TO FINANCIAL STATEMENTS--(Continued) September 30, 2003

3. DISTRIBUTIONS (Continued)

At September 30, 2003, the Fund had a net capital loss carryforward of \$235,576, which is available as a reduction, to the extent provided in the regulations, of future net realized capital gains, and will expire on September 30, 2011. To the extent that such losses are used to offset future net realized capital gains as provided in the regulations, such gains will not be distributed.

Dividends and distributions payable to shareholders are recorded by the Company on the ex-date. Net realized gains from the sale of investments, if any, are distributed annually. Net investment income and realized gains and losses for federal income tax purposes may differ from that reported on the financial statements because of permanent and temporary book and tax basis differences. Permanent book and tax differences of \$74,535 were reclassified from accumulated net realized gain (loss) on investments to undistributed net investment income due to gains from paydown adjustments related to mortgage-backed securities.

Distributions from net realized gains for book purposes may include short-term capital gains, which are included as ordinary income for tax purposes.

4. CAPITAL STOCK

At September 30, 2003, there were 12,000,000 shares of \$.01 par value

capital stock authorized, and shareholder capital of \$135,120,133. During the year ended September 30, 2003 no new shares were issued as part of the dividend reinvestment plan and no shares were repurchased in the open market.

PURCHASES AND SALES OF SECURITIES

Purchases and sales (including maturities) of portfolio securities during the year ended September 30, 2003, were as follows: debt securities and preferred stock, \$29,466,887 and \$24,256,812, respectively; short-term securities, \$34,153,023 and \$37,714,853, respectively: and United States government debt obligations, \$60,038,752 and \$61,351,783, respectively.

6. MANAGEMENT AND OTHER FEES

Under an agreement between the Company and UBS Global Asset Management (Americas) Inc. ("the Advisor"), the Advisor manages the Company's investment portfolio, maintains its accounts and records, and furnishes the services of individuals to perform executive and administrative functions for the Company. In return for these services, the Company pays the Advisor 50 basis points (annualized) of the Company's average weekly net assets up to \$100,000,000 and 40 basis points (annualized) of average weekly net assets in excess of \$100,000,000.

The Company pays each of its directors (except the Chairman) at the rate of \$9,000 annually to serve as directors and \$750 for each Board of Directors meeting attended. The Company pays the Chairman at the rate of \$13,000 annually to serve in such capacity and \$750 for each Board of Directors meeting attended.

19

NOTES TO FINANCIAL STATEMENTS--(Continued) September 30, 2003

6. MANAGEMENT AND OTHER FEES (Continued)

The following table sets forth as to each Director the compensation paid to such Director in the fiscal year ended September 30, 2003 for service on the Board of the Company and, in the case of Messrs. Reilly and Roob, on the boards of three other investment companies for which the Advisor performed investment advisory services.

Name of Director	Aggregate Compensation from Company	Pension or Retirement Benefits Accrued as Part of Company Expenses	Estimated Annual Benefits Upon Retirement	Total Compens from Company Fund Compl (unaudited
Adela Cepeda	\$13,500			\$13,500
C. Roderick O'Neal	16,500			16,500
Frank K. Reilly	13,500			75 , 600
Edward M. Roob	13,500			75 , 600
J. Mikesell Thomas	13,500			13,500

All Company officers serve without direct compensation from Fort Dearborn.

Fort Dearborn Income Securities, Inc. invests in shares of the UBS Supplementary Trust U.S. Cash Management Prime Fund ("Supplementary Trust"). The Supplementary Trust is a business trust managed by the Advisor. The Supplementary Trust is offered as a cash management option only to mutual funds and other accounts managed by the Advisor.

The Supplementary Trust pays no management fees. Distributions from the Supplementary Trust are reflected as interest income on the statement of operations. Amounts relating to those investments at September 30, 2003 and for the period ended are summarized as follows:

Fund	Cost of Purchase	Sales Proceeds	Interest Income	Value
UBS Supplementary Trust U.S. Cash Management Prime Fund	\$33,941,563	\$37,503,843	\$42 , 474	\$1,200,25

7. MORTGAGE BACKED SECURITIES AND OTHER INVESTMENTS

The Company invests in Mortgage Backed Securities (MBS), representing interests in pools of mortgage loans. These securities provide shareholders with payments consisting of both principal and interest as the mortgages in the underlying mortgage pools are paid. Securities issued by Government National Mortgage Association (GNMA) are backed by the full faith and credit of the U.S. Government. Securities issued by Federal National Mortgage Association (FNMA) or Federal Home Loan Mortgage Corporation (FHLMC) are not backed by the full faith and credit of the U.S. Government, but the issuing agency has the right to borrow from the U.S. Treasury to meet it's obligations. However, some securities may be issued by private, non-

20

NOTES TO FINANCIAL STATEMENTS--(Continued) September 30, 2003

7. MORTGAGE BACKED SECURITIES AND OTHER INVESTMENTS (Continued)

governmental corporations. MBS issued by private entities are not government securities and are not directly guaranteed by any government agency. They are secured by the underlying collateral of the private issuer. Yields on privately issued MBS tend to be higher than those of government backed issues. However, risk of loss due to default and sensitivity to interest rate fluctuations is also higher.

The Company invests in Collateralized Mortgage Obligations (CMOs). A CMO is a bond that is collateralized by a pool of MBS. The Company also invests in REMICs (Real Estate Mortgage Investment Conduit) which are simply another form of CMO. These MBS pools are divided into classes or tranches with each class having its own characteristics. The different classes are retired in sequence as the underlying mortgages are repaid. For instance, a Planned Amortization Class (PAC) is a specific class of mortgages, which over its life generally has the most stable cash flows and the lowest prepayment risk. A GPM (Graduated Payment

Mortgage) is a negative amortization mortgage where the payment amount gradually increases over the life of the mortgage. The early payment amounts are not sufficient to cover the interest due, and therefore, the unpaid interest is added to the principal, thus increasing the borrower's mortgage balance. Prepayment may shorten the stated maturity of the CMO and can result in a loss of premium, if any has been paid.

The Company invests in Asset Backed Securities, representing interests in pools of certain types of underlying installment loans or leases or by revolving lines of credit. They often include credit enhancement that help limit investors exposure to the underlying credit. These securities are valued on the basis of timing and certainty of cash flows compared to investments with similar durations.

21

Report of Independent Auditors

To the Shareholders and Board of Directors of Fort Dearborn Income Securities, Inc.

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of Fort Dearborn Income Securities, Inc., (the "Company") as of September 30, 2003, and the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the three years in the period then ended. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. The financial highlights for each of the two years in the period ended September 30, 2000, were audited by other auditors whose report dated October 26, 2000, expressed an unqualified opinion on the financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights. Our procedures included confirmation of securities owned as of September 20, 2003, by correspondence with the custodian and others. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Fort Dearborn Income Securities, Inc. as of September 30, 2003, and the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended, in conformity with accounting principles generally accepted in the United States.

/s/ Ernst & Young LLP

New York, New York November 3, 2003 22

Report on the Automatic Dividend Investment Plan

The Company's Automatic Dividend Investment Plan, operated for the convenience of the shareholders, has been in operation since the dividend payment of May 5, 1973.

For the year ended September 30, 2003, 59,608 shares were purchased for the Plan participants. The breakdown of these shares is listed below:

			Where
	No. of		Shares
Dividend	Shares	Average	Were
Payment Date	Purchased	Price	Purchased
December 13, 2002	18,318	\$14.83	Open Market
March 26, 2003	14,125	\$15.50	Open Market
June 13, 2003	13,649	\$15.70	Open Market
September 12, 2003	13,516	\$14.55	Open Market

As explained in the Plan, shares are purchased at the lower of the market value (including commission) or net asset value, depending upon availability. The expense of maintaining the Plan, \$1.35 for each participating account per dividend payment, is borne by the Company. Shareholders who have not elected to participate in the Plan receive all dividends in cash.

The Plan had 759 participants on September 12, 2003. Under the terms of the Plan, any shareholder may terminate participation by giving written notice to the Company. Upon termination, a certificate for all full shares, plus a check for the value of any fractional interest in shares, will be sent to the withdrawing shareholders, unless the sale of all or part of such shares is requested. Any registered shareholder who wishes to participate in the Plan may do so by writing to EquiServe Trust Company, N.A., P.O. Box 43081, Providence, RI 02940-3081 or calling them at (800) 446-2617. A copy of the Plan and enrollment card will be mailed to you. Shareholders who own shares in nominee name should contact their brokerage firm. All new shareholders will receive a copy of the Plan and a card, which may be signed to authorize reinvestment of dividends pursuant to the Plan.

The investment of dividends does not relieve participants of any income tax which may be payable thereon. The Company strongly recommends that all Automatic Dividend Investment Plan participants retain each year's final statement on their plan participation as a part of their permanent tax record. This will ensure that cost information is available if and when it is needed.

Shareholder Information

For the year ended September 30, 2003, there were: (i) no material changes in the Company's investment objectives or policies, (ii) no changes in the Company's charter or by-laws that would delay or prevent a change of control of the Company, (iii) no material changes in the principal risk factors associated with investment in the Company, and (iv) no change in the person primarily responsible for the day-to-day management of the Company's portfolio.

23

General Information

Stock Repurchase Plan

On July 28, 1988, the Board of Directors of the Company approved a resolution to repurchase up to 700,000 of its common shares. The Company may repurchase shares, at a price not in excess of market and at a discount from net asset value, if and when such repurchases are deemed appropriate and in the shareholder's best interest. Any repurchases will be made in compliance with applicable requirements of the federal securities law.

Under such law, the Company is required to give written notice to all shareholders of its intention to purchase stock within six months of the actual repurchase of shares. This report is to serve as notice to all shareholders with respect to any shares repurchased within the next six months pursuant to the Company's stock repurchase plan.

Audited financial statements for the year ended September 30, 2003 and a list of securities owned on that date are included in this report.

Item 2. Code of Ethics.

NYSE

The registrant has adopted a code of ethics that applies to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions pursuant to Section 406 of the Sarbanes-Oxley Act of 2002. (The registrant has designated the code of ethics adopted pursuant to Sarbanes-Oxley as a "Code of Conduct" to lessen the risk of confusion with its separate code of ethics adopted pursuant to Rule 17j-1 under the Investment Company Act of 1940, as amended.)

Item 3. Audit Committee Financial Expert.

The registrant's Board of Directors has determined that the following person serving on the registrant's Audit Committee is an "audit committee financial expert" as defined in item 3 of Form N-CSR: J. Mikesell Thomas. Mr. Thomas is independent as defined in item 3 of Form N-CSR.

Item 4. Principal Accountant Fees and Services.

Form N-CSR disclosure requirement not yet effective with respect to the registrant.

Item 5. Audit Committee of Listed Registrants.

Not applicable to the registrant.

Item 6. [Reserved by SEC for future use.]

The registrant's Board of Directors believes that the voting of proxies on securities held by the registrant is an important element of the overall investment process. As such, the Board has delegated the responsibility to vote such proxies to the registrant's advisor. Following is a summary of the proxy voting policy of the advisor.

Corporate Governance Philosophy, Voting Guidelines and Policy Summary

The proxy voting policy of UBS Global Asset Management (Americas) Inc. ("UBS Global AM (Americas)") is based on its belief that voting rights have economic value and must be treated accordingly. Generally, UBS Global AM (Americas) expects the boards of directors of companies issuing securities held by its clients to act as stewards of the financial assets of the company, to exercise good judgment and practice diligent oversight with the management of the company. While there is no absolute set of rules that determine appropriate corporate governance under all circumstances and no set of rules will guarantee ethical behavior, there are certain benchmarks, which, if substantial progress is made toward, give evidence of good corporate governance. UBS Global AM (Americas) may delegate to an independent proxy voting and research service the authority to exercise the voting rights associated with

certain client holdings. Any such delegation shall be made with the direction that the votes be exercised in accordance with UBS Global AM (Americas)'s proxy voting policy.

When UBS Global AM (Americas)'s view of a company's management is favorable, UBS Global AM (Americas) generally supports current management initiatives. When UBS Global AM (Americas)'s view is that changes to the management structure would probably increase shareholder value, UBS Global AM (Americas) may not support existing management proposals. In general, UBS Global AM (Americas) (1) opposes proposals which act to entrench management; (2) believes that boards should be independent of company management and composed of persons with requisite skills, knowledge and experience; (3) opposes structures which impose financial constraints on changes in control; (4) believes remuneration should be commensurate with responsibilities and performance; and (5) believes that appropriate steps should be taken to ensure the independence of auditors.

UBS Global AM (Americas) has implemented procedures designed to identify whether it has a conflict of interests in voting a particular proxy proposal, which may arise as a result of its or its affiliates' client relationships, marketing efforts or banking, investment banking and broker/dealer activities. To address such conflicts, UBS Global AM (Americas) has imposed information barriers between it and its affiliates who conduct banking, investment banking, and broker/dealer activities and has implemented procedures to prevent business, sales and marketing issues from influencing our proxy votes. Whenever UBS Global AM (Americas) is aware of a conflict with respect to a particular proxy, its appropriate local corporate governance committee is required to review and agree to the manner in which such proxy is voted.

Item 8. [Reserved by SEC for future use.]

Item 9. Controls and Procedures.

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.
