- (1) Floating rate security □ The interest rate shown is the current rate as of December 31, 2007.
- (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid, unless otherwise noted, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At December 31, 2007, the value of these securities amounted to \$3,257,973 or 2.36% of net assets.
- (3) Perpetual bond security. The maturity date reflects the next call date.
- (4) Zero coupon bond. The rate shown is the annualized yield at December 31, 2007.
- (5) The table below details the Fund's investment in a security issued by a fund that is advised by the same advisor as the Fund. The advisor does not earn a management fee from UBS Supplementary Trust.

Security description	Value 09/30/07	Purchases during the three months ended 12/31/07	Sales during the three months ended 12/31/07	Value 12/31/07	Income
					earned from affiliate for the three months ended 12/31/07
UBS Supplementary Trust □ U.S. Cash Management Prime Fund	\$1,247,850	\$10,985,679	\$2,422,809	\$2,810,702	\$22,712

- (6) The rate shown reflects the yield at December 31, 2007.
- (7) The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities.  
The Fund normally obtains market values for its securities from independent pricing sources. Independent pricing sources may use reported last sale prices, current market quotations or valuations from computerized □matrix□ systems that derive values based on comparable securities. Securities traded in the over-the-counter (□OTC□) market and listed on The NASDAQ Stock Market, Inc. (□NASDAQ□) normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price available prior to valuation. Securities which are listed on US and foreign stock exchanges normally are valued at the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. Securities listed on foreign stock exchanges may be fair valued based on significant events that have occurred subsequent to the close of the foreign markets. The Fund may use a systematic fair valuation model provided by an independent third party to value securities principally traded in foreign markets in order to adjust for possible stale pricing that may occur between the close of the foreign exchanges and the time for valuation. If a security is valued at a □fair value,□ that value is likely to be different from the last quoted market price for the security. In cases where securities are traded on more than one exchange, the securities are valued on the exchange designated as the primary market by UBS Global Asset Management (Americas) Inc. (□UBS Global AM□), the investment manager of the Fund. UBS Global AM is an indirect wholly owned asset management subsidiary of UBS AG, an internationally diversified organization with headquarters in Zurich and Basel, Switzerland and operations in many areas of the financial services industry. If a market value is not readily available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the □Board□). Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on

disposition of the securities; and the evaluation of forces which influence the market in which the securities are purchased and sold. Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company.

CS Credit Suisse

GMAC General Motors Acceptance Corp.

GSR Goldman Sachs Residential

PO Principal only security—This security entitles the holder to receive principal payments from an underlying pool of assets. High prepayments return principal faster than expected and cause the yield to increase. Low prepayments return principal slower than expected and cause the yield to decrease.

REMIC Real Estate Mortgage Investment Conduit

STRIPS Bonds that can be subdivided into a series of zero-coupon bonds.
