Item 2.06 Material Impairments.

On October 17, 2016, in connection with its decision to implement a roadmap for accelerating its profitable growth, increasing its return on invested capital and achieving its targeted net leverage ratio, as further described in the press release discussed in Item 8.01 below and attached to this report, KB Home (“Company”) committed to a plan to sell certain land parcels that were previously held for future development, rather than sell and build homes on the parcels as previously intended. The Company has elected to work to monetize these more than 20 land parcels (over 2,000 lots) as they no longer fit into its business plans. More specifically, these parcels include land in excess of near-term requirements; land where the Company now believes the necessary incremental investment in development is not justified; land located in areas outside of the Company’s served markets; and land entitled for certain product types that are not aligned with the Company’s primary offerings. The majority of these land parcels are located in the Company’s Southeast region. Actions required to complete the planned sales have been or will soon be initiated, with the objective of closing the transactions within one year. The cash proceeds from the land sales are expected to be re-deployed to reduce the Company’s debt or for investment in land parcels that are expected to be more productive. In conjunction with its change in strategy with respect to these land parcels, the Company expects to classify the land parcels as land held for sale in its consolidated balance sheet as of November 30, 2016, and to recognize inventory impairment charges to reduce their carrying value to estimated fair value, less associated costs to sell. As a result, the Company anticipates its results for the 2016 fourth quarter will include non-cash, pretax inventory-related charges in the range of \$30 million to \$40 million. The estimated fair values of these land parcels were generally based on broker quotes, estimated future net cash flows discounted for inherent risk associated with each underlying asset, or similar information.

The Company does not anticipate these non-cash charges for inventory impairments will require any current or future cash outflows.
