Number: 22/02

BHP BILLITON PRODUCTION REPORT FOR THE QUARTER Ended 31 MARCH 2002

BHP Billiton today released its production report for the quarter ended 31 March, 2002. The results demonstrate a solid operational performance in the face of extremely difficult market conditions.

Production of most major commodities was in line with both the corresponding period last year and the December 2001 quarter. Energy coal sales volumes were impacted by the weakening of European markets after an unseasonably warm winter and an influx of non-traditional European supply sources. Lower US domestic sales due to reduced customer demand also negatively impacted energy coal volumes.

- **Aluminium**

production was in line with the March 2001 quarter and six per cent higher than the December 2001 quarter. Increased production for the March 2002 quarter was largely due to the lifting of power usage restrictions in Brazil and higher production at the Hillside aluminium smelter in South Africa following a power outage in September 2001.

- **Alumina**

production was 15 per cent higher than the March 2001 quarter and in line with the December 2001 period. The higher year on year production mainly reflects the increased ownership (30 per cent to 86 per cent) of the Worsley Alumina refinery (Australia), effective January 2001.

- **Copper**

production was eight per cent lower than the March 2001 quarter and 15 per cent lower than the December 2001 quarter. Decreased production over both periods reflects the decision to temporarily reduce production at Escondida (Chile) and Tintaya (Peru), following the deterioration of global copper markets. This was offset in part by the commencement of commercial production at Antamina (Peru) in October 2001.

- **Iron Ore**

production was eight per cent higher than the March 2001 quarter and five per cent lower than the December 2001 period. Lower iron ore shipments were recorded between the December 2001 and March 2002 periods due mainly to lower demand from Asian markets as a result of seasonal factors. West Australian iron ore production was 11 per cent higher than the March 2001 period due to increased tonnages from Mt Newman.

- **Metallurgical Coal**

production was five per cent lower than the corresponding period last year and 10 per cent higher than the December 2001 quarter. Decreased year on year production reflects the equalisation of Queensland (Australia) coal interests with Mitsubishi to form the BHP Billiton Mitsubishi Alliance in June 2001. Excluding this impact, Queensland coal production and shipments increased during both periods due to the benefits of the Blackwater integration and the negative impact of industrial disputes in the March quarter last year.

- **Boodarie Iron**

production was suspended on 12 March, 2002 following a tube failure in a gas re-heating furnace. All four trains were shut down pending an investigation into the failure.

As a result of the failure and subsequent suspension of production, BHP Billiton declared 'force majeure' at Boodarie Iron on 26 March 2002. Safety of personnel is the paramount consideration at all BHP Billiton operations and production will not resume until the detailed investigation and necessary

rectification work is completed.

BHP Billiton is working with customers, suppliers and contractors to minimise disruptions and will provide further information when it becomes available.

- **Nickel**

production was six per cent higher than the March 2001 quarter and in line with the December 2001 period. Higher production and sales were recorded at Cerro Matoso (Colombia) over both periods following the continued ramp-up of operations. Production and sales at Yabulu were in line with both the March 2001 quarter and the December 2001 quarter.

- **Energy Coal**

production was 16 per cent lower than the March 2001 quarter and seven per cent lower than the December 2001 quarter. As advised at the beginning of this report the lower export production figures reflect reduced customer demand. In addition, the lower production is due to the divestment of the Matla and Glisa mines (South Africa) in the June 2001 quarter, the accelerated closure of operations at Rietspruit (South Africa) in November 2001 and the divestment of BHP Billiton's 80 per cent interest in the PT Arutmin energy coal assets (Indonesia) to PT Bumi Resources in October 2001.

In response to the recent softening of global energy coal markets, BHP Billiton's wholly owned subsidiary, Ingwe Coal, will further revise production plans resulting in a short-term reduction in energy coal available for the export market. At this stage, Ingwe will not replace the four million tons per annum of export coal shut-in following the accelerated closure of the Rietspruit mine (BHP Billiton 50 per cent). In addition, Ingwe will accelerate closure of the Blinkpan Shaft at the Koorfontein Mine (South Africa) and will further reduce export production by approximately 800,000 tonnes over the next three months through various adjustments to operating plans at the Optimum, Middelburg and Douglas mines in South Africa.

- **Oil and Condensate**

production was in line with both the March 2001 quarter and the December 2001 quarter. Natural field decline at Griffin (Australia) was offset by higher production in the March 2002 quarter following the completion of repairs to the Scindian 3 flowline (full production resumed in January 2002) and the Griffin-9 infill program.

Natural field decline at Bass Strait (Australia) was offset in part by the ongoing success of the West Tuna infill program. Lower production was recorded at Laminaria (Australia) during the March 2002 quarter, while the start of operations at Typhoon (USA) in July 2001 had a positive impact on the year on year production figures.

- **Natural Gas**

production was in line with the March 2001 quarter and 13 per cent lower than the December 2001 quarter. Lower year on year Bass Strait (Australia) production was mainly due to the cooler south east Australian summer, resulting in less gas being used to supplement electricity generation. In addition, lower volumes from the Liverpool Bay, Bruce and Keith fields (UK) during the March 2002 quarter were largely due to the end of the northern winter. This was partially offset by the commencement of gas production at the Zamzama field (Pakistan) in March 2001 and Typhoon (USA) in July 2001.

- **Raw Steel**

production was in line with both the March 2001 quarter and the December 2001 period. Steel despatches from flat and coated operations were eight per cent above the March 2001 quarter and Australian domestic despatches were almost six per cent above the same quarter. In addition, Australian export despatches were up almost 20 per cent on the March 2001 period. This was in part offset by lower production at New Zealand

steel due to planned maintenance and lower despatches from overseas plants.

• **Ekati™ Diamond**

production was 149 per cent higher than the March quarter last year and in line with the December 2001 quarter following the acquisition of Dia Met Minerals Ltd, effective 1 July 2001. Slightly higher production was recorded for the March 2002 quarter following the commencement of production from the Misery pipe in December 2001. As advised previously, the Misery pipe will provide a small but consistent proportion of the Ekati™ mine's total output.

• **Titanium Minerals**

Lower sales volumes were recorded at Richards Bay Minerals due to softer global markets. (Note: Due to confidentiality agreements with joint venture partners, production figures for Richards Bay Minerals are not contained in this report.)

	Ekati™ (o)	80%	375	427	767	928	932	2,627	1,002
	(a) Interest in Worsley increased from 30% to 86% effective January 2001.								
	(b) Mozal produced its first metal in June 2000 and achieved full commissioning of its 253,000 tpa capacity in December 2000.								
	(c) Metal production is reported on the basis of payable metal.								
	(d) Production at Escondida and Tintaya was temporarily reduced in November 2001 and January 2002 respectively due to								
	weak market conditions.								
	(e) Included from 1 October 2000, the effective date of the acquisition of Rio Algom.								
	(f) Antamina commenced commercial production in October 2001.								
	(g) Coal production is reported on the basis of saleable product. Production figures include some thermal coal.								

	(h) BHP Billiton interest is 50% from 28 June 2001 (previously CQCA joint venture 52.1% and Gregory joint venture 64.14%).								
	(i) BHP Billiton acquired its share of South Blackwater in July 2001. South Blackwater is equally owned by BHP Billiton and								
	Mitsubishi Development Pty Ltd. Effective January 2002, South Blackwater production is reported in CQCA Joint Venture.								
	(j) Shown on 100% basis before 20% outside equity interest.								
	(k) Production reported represents BHP Billiton's 50% equity interest in MetCoal Holdings. MetCoal Holdings is equally owned by								
	BHP Billiton and Mitsubishi Development Pty Ltd and acquired QCT Resources Limited (QCT) in November 2000. In June 2001,								
	Mitsubishi acquired the balance of the shares in QCT from BHP Billiton.								
	(l) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.								
	(m) Production shown on 86.5% basis after allowing for Indonesian state owned corporation's 13.5% share of production.								
	BHP Billiton sold its interest in the Senakin and Satui mines effective 30 November 2001.								
	(n) Carbonnes del Cerrejon (BHP Billiton 33.3%) and Cerrejon Zona Norte (BHP Billiton 16.7%) were acquired in September 2000								
	and November 2000 respectively. BHP Billiton increased its interest in CZN to 33.3% effective February 2002.								
	(o) Interest in Ekati™ increased from 51% to 80% effective July 2001.
