Management's Discussion and Analysis of Financial Condition and Results of Operations

## Performance Summary

BOK Financial Corporation ("the Company") reported net income of $\$ 75.6$ million or $\$ 1.09$ per diluted share for the third quarter of 2014, compared to $\$ 75.7$ million or $\$ 1.10$ per diluted share for the third quarter of 2013 and $\$ 75.9$ million or $\$ 1.10$ per diluted share for the second quarter of 2014.

Highlights of the third quarter of 2014 included:
Net interest revenue totaled $\$ 166.8$ million for the third quarter of 2014, compared to $\$ 167.9$ million for the third quarter of 2013 and $\$ 166.1$ million for the second quarter of 2014. Net interest margin decreased to $2.67 \%$ for the third quarter of 2014 primarily due to increased deposits at the Federal Reserve Bank funded by Federal Home Loan Bank borrowings and continued pressure on loan pricing. Net interest margin was $2.75 \%$ for the third quarter of 2013 and $2.75 \%$ for the second quarter of 2014.
Fees and commissions revenue totaled $\$ 158.5$ million for the third quarter of 2014 , a $\$ 13.3$ million or $9 \%$ increase over the third quarter of 2013. Growth in fiduciary and asset management, mortgage banking and brokerage and \&rading revenue was partially offset by a decrease in deposit service charges and fees. Fees and commissions revenue decreased $\$ 5.5$ million compared to the second quarter of 2014, primarily due to a decrease in brokerage and trading and mortgage banking revenue.

Change in the fair value of mortgage servicing rights, net of economic hedges, increased pre-tax net income in

- the third quarter of 2014 by $\$ 4.8$ million, decreased pre-tax net income in the third quarter of 2013 by $\$ 404$ thousand and decreased pre-tax net income by $\$ 1.5$ million in the second quarter of 2014.
Operating expenses totaled $\$ 221.8$ million for the third quarter of 2014 , an increase of $\$ 11.5$ million over the third quarter of 2013. Personnel costs decreased $\$ 2.8$ million primarily due to lower incentive compensation expense, partially offset by increased regular compensation expense. Non-personnel expense increased $\$ 14.3$ million. Professional fees and services, data processing and communications and net losses and operating expenses on repossessed assets increased over the prior year. Operating expenses increased $\$ 7.1$ million over the previous quarter primarily due to increased professional fees and services expense and net losses and operating expenses of repossessed assets.
No provision for credit losses was recorded in the third quarter of 2014 or the second quarter of 2014. An $\$ 8.5$ million negative provision for credit losses was recorded in the third quarter of 2013. Gross charge-offs were $\$ 2.6$ million in the third quarter of 2014, $\$ 4.7$ million in the third quarter of 2013 and $\$ 3.5$ million in the second quarter of 2014. Recoveries were $\$ 3.1$ million in the third quarter of 2014, compared to $\$ 4.4$ million in the third quarter of 2013 and $\$ 5.5$ million in the second quarter of 2014.
The combined allowance for credit losses totaled $\$ 192$ million or $1.41 \%$ of outstanding loans at September 30, 2014, compared to $\$ 192$ million or $1.43 \%$ of outstanding loans at June 30, 2014. Nonperforming assets that are not guaranteed by U.S. government agencies totaled $\$ 144$ million or $1.06 \%$ of outstanding loans and repossessed assets (excluding those guaranteed by U.S. government agencies) at September 30, 2014 and $\$ 145$ million or $1.09 \%$ of outstanding loans and repossessed assets (excluding those guaranteed by U.S. government agencies) at June 30, 2014. Outstanding loan balances were $\$ 13.7$ billion at September 30, 2014, an increase of $\$ 257$ million over June 30, 2014. Commercial loan balances grew by $\$ 204$ million and commercial real estate loan balances were up $\$ 69$ million. Residential mortgage loans decreased by $\$ 29$ million and consumer loan balances increased $\$ 12$ million.

Period end deposits totaled $\$ 20.3$ billion at September 30, 2014, a $\$ 283$ million decrease compared to

- June 30, 2014. Interest-bearing transaction accounts decreased $\$ 454$ million, partially offset by a $\$ 130$ million increase in demand deposits and a $\$ 49$ million increase in time deposits.
The Company's Tier 1 common equity ratio, as defined by banking regulations, was $13.54 \%$ at September 30, 2014 and $13.46 \%$ at June 30, 2014. The Company and its subsidiary bank continue to exceed the regulatory definition of well capitalized. The Company's Tier 1 capital ratio was $13.71 \%$ at September 30, 2014 and $13.63 \%$ at June 30, 2014. Total capital ratio was $15.09 \%$ at September 30, 2014 and $15.38 \%$ at June 30, 2014. The Company's leverage ratio
was $10.22 \%$ at September 30, 2014 and $10.26 \%$ at June 30, 2014.
- 1 -

The Company paid a regular quarterly cash dividend of $\$ 28$ million or $\$ 0.40$ per common share during the third quarter of 2014. On October 28, 2014, the board of directors approved an increase in the quarterly cash dividend to $\$ 0.42$ per common share payable on or about December 1, 2014 to shareholders of record as of November 14, 2014.
Results of Operations
Net Interest Revenue and Net Interest Margin
Net interest revenue is the interest earned on debt securities, loans and other interest-earning assets less interest paid for interest-bearing deposits and other borrowings. The net interest margin is calculated by dividing net interest revenue by average interest-earning assets. Net interest spread is the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities. Net interest margin is typically greater than net interest spread due to interest income earned on assets funded by non-interest bearing liabilities such as demand deposits and equity.

Net interest revenue totaled $\$ 166.8$ million for the third quarter of 2014 compared to $\$ 167.9$ million for the third quarter of 2013 and $\$ 166.1$ million for the second quarter of 2014 . Net interest margin was $2.67 \%$ for the third quarter of 2014, $2.75 \%$ for the third quarter of 2013 and $2.75 \%$ for the second quarter of 2014.

Net interest revenue decreased $\$ 1.1$ million compared to the third quarter of 2013. Net interest revenue decreased $\$ 7.2$ million primarily due to continued narrowing of interest rate spreads, partially offset by a $\$ 6.3$ million increase due to the growth in average earnings assets over the third quarter of 2013. Growth in average earning assets was driven by growth in average outstanding loans, partially offset by a decrease in average securities balances.

The tax-equivalent yield on earning assets was $2.93 \%$ for the third quarter of 2014, down 10 basis points from the third quarter of 2013. Loan yields decreased 28 basis points. Spreads have narrowed due to market pricing pressure in our loan portfolio. The available for sale securities portfolio yield increased 2 basis points to $1.95 \%$. Cash flows received from payments on residential mortgage-backed securities are currently being reinvested in short-duration securities that yield nearly $2 \%$. Funding costs were down 1 basis point compared to the third quarter of 2013. The cost of interest-bearing deposits decreased 2 basis points and the cost of other borrowed funds increased 5 basis points largely due to the mix of funding sources. Additionally, the benefit to net interest margin from earning assets funded by non-interest bearing liabilities was 15 basis points in the third quarter of 2014 compared to 14 basis points in the third quarter of 2013.

Average earning assets for the third quarter of 2014 increased $\$ 744$ million or $3 \%$ over the third quarter of 2013. Average loans, net of allowance for loan losses, increased $\$ 1.1$ billion due primarily to growth in average commercial and commercial real estate loans. The average balance of available for sale securities decreased $\$ 1.0$ billion. We intend to allow the size of our bond portfolio to decrease through normal monthly runoff to better position the balance sheet for a longer-term rising rate environment. We anticipate an additional $\$ 300$ million reduction in our bond portfolio over the remainder of 2014. This reduction in earning assets is expected to be partially offset by quarterly loan growth in low double-digits for the balance of the year. The resulting shift in earning asset mix should be supportive of net interest margin. The average balance of interest-bearing cash and cash equivalents was up $\$ 563$ million compared to the third quarter of 2013. At the end of August, we increased our borrowings from the Federal Home Loan Bank by approximately $\$ 1.5$ billion, earning a small spread by depositing the proceeds in the Federal Reserve. On a full-quarter basis, this will be additive to pre-tax net income by approximately $\$ 800$ thousand, net interest margin will decrease by 15 basis points and the Tier 1 leverage ratio will also decline by approximately 50 basis points. The average balances of residential mortgage loans held for sale, investment securities and fair value option securities primarily held as an economic hedge of our mortgage servicing rights and residential mortgage loans held for sale were up over the prior year, partially offset by a decrease in the average balance of trading securities.

Average deposits increased $\$ 780$ million over the third quarter of 2013, including a $\$ 690$ million increase in average demand deposit balances and a $\$ 197$ million increase in average interest-bearing transaction accounts, partially offset by a $\$ 132$ million decrease in average time deposits. Average borrowed funds decreased $\$ 69$ million compared to the third quarter of 2013 primarily due to decreased funds purchased, partially offset by increased borrowings from the Federal Home Loan Banks and repurchase agreements.

- 2 -

Net interest margin decreased 8 basis points compared to the second quarter of 2014. The yield on average earning assets decreased 9 basis points. The loan portfolio yield decreased 7 basis points to $3.78 \%$ primarily due to continued market pricing pressure. The yield on the available for sale securities portfolio decreased 1 basis point to $1.95 \%$. Funding costs were down 1 basis point to $0.41 \%$. Rates paid on time deposits increased 1 basis point. The cost of other borrowed funds increased 1 basis point over the second quarter. The benefit to net interest margin from earning assets funded by non-interest bearing liabilities was unchanged.
Average earning assets increased $\$ 688$ million during the third quarter of 2014, primarily related to a $\$ 583$ million increase in interest-bearing cash and cash equivalents as increased borrowings from the Federal Home Loan Banks were deposited in the Federal Reserve to earn a spread. A $\$ 274$ million decrease in the available for sale securities portfolio was partially offset by growth in average outstanding loans of $\$ 254$ million over the previous quarter. Average commercial loan balances were up $\$ 202$ million and average commercial real estate loan balances increased $\$ 68$ million. The average balance of residential mortgage loans held for sale increased $\$ 92$ million. The average balance of restricted equity securities increased $\$ 45$ million, as our required holdings of Federal Home Loan Bank stock increased in proportion to our increased borrowings.
Average deposits decreased $\$ 270$ million compared to the previous quarter. Demand deposit balances increased $\$ 146$ million. Interest-bearing transaction account balances decreased $\$ 377$ million and time deposit account balances decreased $\$ 26$ million. The average balance of borrowed funds increased $\$ 897$ million compared to the second quarter of 2014, primarily due to a $\$ 1.0$ billion increase in average borrowings from the Federal Home Loan Banks.

Our overall objective is to manage the Company's balance sheet to be relatively neutral to changes in interest rates as is further described in the Market Risk section of this report. Approximately $3 / 4$ of our commercial and commercial real estate loan portfolios are either variable rate or fixed rate that will re-price within one year. These loans are funded primarily by deposit accounts that are either non-interest bearing, or that re-price more slowly than the loans. The result is a balance sheet that would be asset sensitive, which means that assets generally re-price more quickly than liabilities. Among the strategies that we use to manage toward a relatively rate-neutral position, we purchase fixed rate residential mortgage-backed securities issued primarily by U.S. government agencies and fund them with market rate sensitive liabilities. The liability-sensitive nature of this strategy provides an offset to the asset-sensitive characteristics of our loan portfolio. We also may use derivative instruments to manage our interest rate risk.

The effectiveness of these strategies is reflected in the overall change in net interest revenue due to changes in interest rates as shown in Table 1 and in the interest rate sensitivity projections as shown in the Market Risk section of this report.

## Other Operating Revenue

Other operating revenue was $\$ 163.0$ million for the third quarter of 2014 , a $\$ 19.6$ million increase over the third quarter of 2013 and a $\$ 479$ thousand increase over the second quarter of 2014. Fees and commissions revenue increased $\$ 13.3$ million over the third quarter of 2013 and decreased $\$ 5.5$ million compared to the prior quarter. The change in the fair value of mortgage servicing rights, net of economic hedges, increased other operating revenue by $\$ 4.8$ million in the third quarter of 2014, decreased other operating revenue $\$ 1.5$ million in the second quarter of 2014 and decreased operating revenue $\$ 404$ thousand in the third quarter of 2013. The third quarter of 2013 included $\$ 1.5$ million of other-than temporary impairment charges.

Certain percentage increases (decreases) in non-fees and commissions revenue are not meaningful for comparison purposes based on the nature of the item.

Fees and commissions revenue

Diversified sources of fees and commissions revenue are a significant part of our business strategy and represented $49 \%$ of total revenue for the third quarter of 2014, excluding provision for credit losses and gains and losses on other assets, securities and derivatives and the change in the fair value of mortgage servicing rights. We believe that a variety of fee revenue sources provides an offset to changes in interest rates, values in the equity markets, commodity prices and consumer spending, all of which can be volatile. As an example of this strength, many of the economic factors that cause net interest revenue compression such as falling interest rates may also drive growth in our mortgage banking revenue. We expect growth in other operating revenue to come through offering new products and services and by further development of our presence in other markets. However, current and future economic conditions, regulatory constraints, increased competition and saturation in our existing markets could affect the rate of future increases.

## - 5 -

Brokerage and trading revenue, which includes revenues from securities trading, customer hedging, retail brokerage and investment banking, increased $\$ 2.9$ million over the third quarter of 2013.

Securities trading revenue was $\$ 9.5$ million for the third quarter of 2014, an increase of $\$ 1.2$ million over the third quarter of 2013. Securities trading revenue includes net realized and unrealized gains primarily related to sales of U.S. government securities, residential mortgage-backed securities guaranteed by U.S. government agencies and municipal securities to institutional customers.

Customer hedging revenue is based primarily on realized and unrealized changes in the fair value of derivative contracts held for customer risk management programs. As more fully discussed under Customer Derivative Programs in Note 3 of the Consolidated Financial Statements, we offer commodity, interest rate, foreign exchange and equity derivatives to our customers. Customer hedging revenue totaled $\$ 10.9$ million for the third quarter of 2014, a $\$ 1.2$ million increase over the prior year primarily due to higher volumes of derivative contracts executed by our mortgage banking and foreign exchange customers.

Revenue earned from retail brokerage transactions decreased $\$ 1.3$ million or $14 \%$ compared to the third quarter of 2013 to $\$ 8.4$ million. Retail brokerage revenue is primarily based on fees and commissions earned on sales of fixed income securities, annuities and mutual funds to retail customers. Revenue is primarily based on the volume of customer transactions during the quarter. The number of transactions typically increases with market volatility and decreases with market stability.

Investment banking, which includes fees earned upon completion of underwriting and financial advisory services and loan syndication fees, totaled $\$ 6.5$ million for the third quarter of 2014, a $\$ 1.8$ million or $38 \%$ increase over the third quarter of 2013 primarily related to increased syndication fees.

Brokerage and trading revenue decreased $\$ 3.8$ million compared to the second quarter of 2014. The second quarter included $\$ 1.6$ million of recoveries received from the Lehman Brothers and MF Global bankruptcies. Excluding these recoveries, customer hedging revenue increased by $\$ 2.6$ million. Securities trading revenue decreased $\$ 2.9$ million. Retail brokerage fees were $\$ 1.9$ million lower than the prior quarter. Investment banking continued to perform well, largely unchanged compared to the second quarter.

Transaction card revenue depends largely on the volume and amount of transactions processed, the number of TransFund automated teller machine ("ATM") locations and the number of merchants served. Transaction card revenue for the third quarter of 2014 increased $\$ 1.5$ million or $5 \%$ over the third quarter of 2013 . Revenues from the processing of transactions on behalf of the members of our TransFund electronic funds transfer ("EFT") network totaled $\$ 16.2$ million, a $\$ 952$ thousand or $6 \%$ increase over the prior year, due to increased transaction volumes and increased dollar amounts per transaction. Merchant services fees totaled $\$ 10.6$ million, an increase of $\$ 638$ thousand or $6 \%$ on increased transaction activity. Revenue from interchange fees paid by merchants for transactions processed from debit cards issued by the Company totaled $\$ 4.7$ million, largely unchanged compared to the third quarter of 2013.

Transaction card revenue was largely unchanged compared to the second quarter of 2014. Increased revenue from processing transactions on behalf of members of our TransFund EFT network was partially offset by a decrease in interchange fees paid on debit cards issued by the Company and decreased revenue from merchant services fees.

Fiduciary and asset management revenue grew by $\$ 5.8$ million or $25 \%$ over the third quarter of 2013. The acquisition of Topeka, Kansas-based GTRUST Financial Corporation in the first quarter of 2014 and Houston, Texas-based MBM Advisors in the second quarter of 2014 added $\$ 1.8$ million of revenue in the third quarter of 2014 and $\$ 2.0$ billion of fiduciary assets as of September 30, 2014. The remaining increase was primarily due to the growth in the
fair value of fiduciary assets administered by the Company. Fiduciary assets are assets for which the Company possesses investment discretion on behalf of another or any other similar capacity. The fair value of fiduciary assets administered by the Company totaled $\$ 34.0$ billion at September 30, 2014, $\$ 29.6$ billion at September 30, 2013 and $\$ 32.7$ billion at June 30, 2014.

Fiduciary and asset management revenue increased $\$ 195$ thousand over the second quarter of 2014. A full quarter of revenue from the acquisition of MBM Advisors in the second quarter of 2014 added approximately $\$ 835$ thousand in fiduciary and asset management revenue over the second quarter of 2014. This was offset by the seasonal timing of tax service fees which were recognized in the previous quarter.

- 6 -

We also earn fees as administrator to and investment adviser for the Cavanal Hill Funds, a diversified, open-ended investment company established as a business trust under the Investment Company Act of 1940. The Bank is custodian and BOSC, Inc. is distributor for the Cavanal Hill Funds. Products of the Cavanal Hill Funds are offered to customers, employee benefit plans, trusts and the general public in the ordinary course of business. We have voluntarily waived administration fees on the Cavanal Hill money market funds in order to maintain positive yields on these funds in the current low short-term interest rate environment. Waived fees totaled $\$ 2.6$ million for the third quarter of 2014 compared to $\$ 2.3$ million for the third quarter of 2013 and $\$ 2.4$ million for the second quarter of 2014.

Deposit service charges and fees were $\$ 22.5$ million for the third quarter of 2014 compared to $\$ 24.7$ million for the third quarter of 2013. Overdraft fees totaled $\$ 10.9$ million for the third quarter of 2014, a decrease of $\$ 2.3$ million or $17 \%$ compared to the third quarter of 2013 . Commercial account service charge revenue totaled $\$ 9.7$ million, an increase of $\$ 231$ thousand or $2 \%$ over the prior year. Service charges on deposit accounts with a standard monthly fee were $\$ 1.9$ million, a decrease of $\$ 188$ thousand or $9 \%$ compared to the third quarter of 2013. Deposit service charges and fees decreased $\$ 625$ thousand compared to the prior quarter primarily due to decreased overdraft fee volumes, partially offset by increased commercial account service charges.

Mortgage banking revenue increased $\$ 3.3$ million over the third quarter of 2013. Mortgage production revenue increased $\$ 2.1$ million. Net realized gains from loans funded and sold in the secondary market decreased $\$ 2.3$ million. Loans sold increased over the prior year, but gains on sale margin decreased primarily due to increased activity in our correspondent origination channel. Approximately $49 \%$ of loans originated in the third quarter of 2014 were through correspondent channels, up from $39 \%$ for the third quarter of 2013. Mortgage loans funded for sale totaled $\$ 1.4$ billion in the third quarter of 2014, an increase of $\$ 314$ million over the third quarter of 2013. The valuation of loan commitments and loans that have closed but not yet sold, net of forward sales contracts at the end of the third quarter of 2014 was $\$ 4.5$ million more than at the end of the third quarter of 2013. Mortgage servicing revenue grew by $\$ 1.2$ million or $11 \%$ over the third quarter of 2013. The outstanding principal balance of mortgage loans serviced for others totaled $\$ 15.5$ billion, an increase of $\$ 2.2$ billion or $17 \%$.
Mortgage banking revenue decreased $\$ 2.5$ million compared to the second quarter of 2014. Revenue from mortgage loan production decreased $\$ 3.0$ million. Net realized gains from loans funded and sold into the secondary market increased $\$ 4.4$ million over the second quarter, primarily driven by a $\$ 354$ million increase in loans sold. Average gains on sale margin decreased 3 basis points compared to the second quarter, primarily due to increased activity in our correspondent origination channel. The valuation of loan commitments and loans that have closed but have not yet been sold, net of forward sales contracts at the end of the third quarter was $\$ 7.4$ million less than at the end of the second quarter of 2014. Revenue from mortgage loan servicing grew by $\$ 518$ thousand due to an increase in the volume of loans serviced. The outstanding balance of mortgage loans serviced for others increased $\$ 873$ million over June 30, 2014.

for others
Net gains on securities, derivatives and other assets

In the third quarter of 2014, we recognized a $\$ 146$ thousand net gain from sales of $\$ 553$ million of available for sale securities. Securities were sold either because they had reached their expected maximum potential return or to move into securities that will perform better in a rising rate environment. In the third quarter of 2013, we recognized a $\$ 478$ thousand net gain from sales of $\$ 356$ million of available for sale securities and in the second quarter of 2014, we recognized a $\$ 4$ thousand net gain on sales of $\$ 800$ million of available for sale securities.

We also maintain a portfolio of residential mortgage-backed securities issued by U.S. government agencies and interest rate derivative contracts designated as an economic hedge of the changes in the fair value of our mortgage servicing rights. The fair value of our mortgage servicing rights fluctuate due to changes in prepayment speeds and other assumptions as more fully described in Note 6 to the Consolidated Financial Statements. As benchmark mortgage rates increase, prepayment speeds slow and the value of our mortgage servicing rights increases. As benchmark mortgage rates fall, prepayment speeds increase and the value of our mortgage servicing rights decreases.

Changes in the fair value of mortgage servicing rights are highly dependent on changes in primary mortgage rates, rates offered to borrowers, and assumptions about servicing revenues, servicing costs and discount rates. Changes in the fair value of residential mortgage-backed securities and interest rate derivative contracts are highly dependent on changes in secondary mortgage rates, or rates required by investors. While primary and secondary mortgage rates generally move in the same direction, the spread between them may widen and narrow due to market conditions and government intervention. Changes in other assumptions, such as estimated earnings on escrow accounts, cost of servicing, discount rate, prepayment speeds and delinquency rates can also cause significant quarterly earnings volatility.

Table 4 following shows the relationship between changes in the fair value of mortgage servicing rights and the fair value of fair value option residential mortgage-backed securities and interest rate derivative contracts designated as an economic hedge.

Table 4 -- Gain (Loss) on Mortgage Servicing Rights
(In thousands)

|  | Three Months Ended |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Septem $2014$ |  | June 30, | $\begin{aligned} & \text { September 30, } \\ & 2013 \end{aligned}$ |  |  |
| Gain (loss) on mortgage hedge derivative contracts, net | \$(93 | ) | \$831 |  | \$31 |  |
| Gain (loss) on fair value option securities, net | (341 | ) | 4,074 |  | (89 | ) |
| Gain (loss) on economic hedge of mortgage servicing rights | (434 | ) | 4,905 |  | (58 | ) |
| Gain (loss) on change in fair value of mortgage servicing rights | 5,281 |  | (6,444 | ) | (346 | ) |
| Gain (loss) on changes in fair value of mortgage servicing rights, net of economic hedges | \$4,847 |  | \$(1,539 | ) | \$(404 | ) |
| Net interest revenue on fair value option securities | \$830 |  | \$721 |  | \$741 |  |
| Primary residential mortgage interest rate at period end | 4.20 | \% | 4.14 | \% | 4.32 | \% |
| Secondary residential mortgage interest rate at period end | 3.20 | \% | 3.17 | \% | 3.34 | \% |

Primary rates disclosed in Table 4 above represent rates generally available to borrowers on 30 year conforming mortgage loans and affect the value of our mortgage servicing rights. Secondary rates represent rates generally paid on 30 year residential mortgage-backed securities guaranteed by U.S. government agencies and affect the value of securities and derivative contracts used as an economic hedge of our mortgage servicing rights.

## Other Operating Expense

Other operating expense for the third quarter of 2014 totaled $\$ 221.8$ million, a $\$ 11.5$ million or $6 \%$ increase over the third quarter of 2013. Personnel expenses decreased $\$ 2.8$ million or $2 \%$. Non-personnel expenses increased $\$ 14.3$ million or $17 \%$ over the prior year.

Operating expenses increased $\$ 7.1$ million over the previous quarter. Personnel expense decreased $\$ 671$ thousand. Non-personnel expense increased $\$ 7.8$ million.

Certain percentage increases (decreases) are not meaningful for comparison purposes.

## Personnel expense

Regular compensation, which consists of salaries and wages, overtime pay and temporary personnel costs, increased $\$ 5.3$ million or $8 \%$ over the third quarter of 2013. Although the average number of employees was largely unchanged compared to the prior year, recent additions have been higher-costing wealth management, compliance and risk management positions. Growth in these positions was partially offset by a decrease in the average number of employees in consumer banking. In addition, standard annual merit increases in regular compensation were effective for the majority of our staff March 1.

Incentive compensation decreased $\$ 6.4$ million compared to the third quarter of 2013. Cash-based incentive compensation plans are either intended to provide current rewards to employees who generate long-term business opportunities for the Company based on growth in loans, deposits, customer relationships and other measurable metrics or intended to compensate employees with commissions on completed transactions. Total cash-based incentive compensation increased $\$ 1.3$ million or 5\% compared to the third quarter of 2013.

The Company also provides share-based incentive compensation plans. Share-based compensation plans include both equity and liability awards. Compensation expense for equity awards increased $\$ 369$ thousand and compensation expense for liability awards decreased $\$ 8.0$ million compared to the third quarter of 2013.

Share-based compensation expense included accruals for amounts payable to certain executive officers of the Company under the 2011 True-Up Plan. Approved by shareholders on April 26, 2011, the True-Up Plan was designed to adjust annual and long-term performance-based incentive compensation for certain senior executives either upward or downward based on the earnings per share performance and compensation of comparable senior executives at peer banks for 2006 through 2013. The peer group of banks was determined based on asset size and included an equal number of publicly-traded SEC registered bank holding companies with the Company being the median bank. Amounts accrued related to the 2011 True-Up Plan were paid in May 2014. Share-based compensation expense for the third quarter of 2013 included a $\$ 7.4$ million expense related to accruals for the 2011 True-Up Plan.

Share-based compensation expense also includes deferred compensation that will ultimately be settled in cash indexed to the investment performance or changes in earnings per share. Certain executive officers are permitted to defer recognition of taxable income from their share-based compensation. Deferred compensation may also be diversified into investments other than BOK Financial common stock. Compensation expense reflects changes in the market value of BOK Financial common stock and other investments. Expenses based on changes in the fair value of BOK Financial common stock and other investments decreased $\$ 657$ thousand compared to the third quarter of 2013.

Employee benefit expense decreased $\$ 1.7$ million or $10 \%$ compared to the third quarter of 2013 primarily due to decreased employee medical costs. The Company self-insures a portion of its employee health care coverage and these costs may be volatile.
Personnel costs decreased $\$ 671$ thousand compared to the second quarter of 2014. Regular compensation expense increased $\$ 1.6$ million over prior quarter. Incentive compensation expense was largely unchanged compared to the the previous quarter. Cash-based incentive compensation, which rewards employees as they generate business opportunities for the Company by growing loans, deposits, customer relationships or other measurable metrics, decreased $\$ 373$ thousand. Share-based compensation expense increased $\$ 297$ thousand. Employee benefits expense decreased $\$ 2.2$ million primarily due to a seasonal decrease in payroll taxes, partially offset by an increase in employee medical costs.

## Non-personnel operating expenses

Non-personnel operating expenses increased $\$ 14.3$ million or $17 \%$ over the third quarter of 2013. Professional fees and services expense increased $\$ 7.6$ million due to increased risk management and regulatory compliance costs. Data processing and communication expense was up $\$ 4.3$ million primarily due to increased transaction activity. Net losses and operating expenses of repossessed assets increased $\$ 3.0$ million primarily due to impairment losses related to regularly scheduled appraisal updates. During the third quarter of 2013, the Company made a $\$ 2.1$ million discretionary contribution to the BOKF Foundation.
Non-personnel expense increased $\$ 7.8$ million over the second quarter of 2014. Net losses and operating expenses of repossessed assets increased $\$ 3.8$ million over the prior quarter, primarily due to two write-downs identified through regularly scheduled appraisal updates. Professional fees and services expense increased $\$ 3.7$ million largely due to increased risk management and regulatory compliance costs including $\$ 2.2$ million for testing of our system and processes.

[^0]
## Income Taxes

Income tax expense was $\$ 31.9$ million or $30 \%$ of book taxable income for the third quarter of 2014 compared to $\$ 33.5$ million or $31 \%$ of book taxable income for the third quarter of 2013 and $\$ 37.2$ million or $33 \%$ of book taxable income for the second quarter of 2014. The statute of limitations expired on uncertain income tax positions and the Company adjusted its current income tax liability to amounts on filed tax returns for 2013 during the third quarter of 2014. These adjustments reduced income tax expense by $\$ 2.3$ million in the third quarter of 2014 and $\$ 1.4$ million in the third quarter of 2013. Excluding these adjustments, income tax expense would have been $32 \%$ of book taxable income for the third quarter of 2014 and $32 \%$ of book taxable income for the third quarter of 2013. The Company also made a charitable contribution to the BOKF Foundation and purchased state transferable credits in the third quarter of 2013, which reduced income tax expense by $\$ 1.1$ million and $\$ 860$ thousand, respectively.

BOK Financial operates in numerous jurisdictions, which requires judgment regarding the allocation of income, expense and earnings under various laws and regulations of each of these taxing jurisdictions. Each jurisdiction may audit our tax returns and may take different positions with respect to these allocations. The reserve for uncertain tax positions was $\$ 12$ million at both September 30, 2014 and June 30, 2014, and $\$ 13$ million at September 30, 2013. Lines of Business

We operate three principal lines of business: Commercial Banking, Consumer Banking and Wealth Management. Commercial Banking includes lending, treasury and cash management services and customer risk management products for small businesses, middle market and larger commercial customers. Commercial Banking also includes the TransFund EFT network. Consumer Banking includes retail lending and deposit services, lending and deposit services to small business customers served through our consumer branch network and all mortgage banking activities. Wealth Management provides fiduciary services, private banking services and investment advisory services in all markets. Wealth Management also underwrites state and municipal securities and engages in brokerage and trading activities.

In conjunction with the previously announced change in our chief executive officer and other changes to the executive leadership team, we re-evaluated the reporting units within our principal lines of business. We defined reporting units to align with the various products and services offered by our lines of business rather than geographic region. This definition change better represents how the current executive team evaluates the Company's performance and growth beyond our traditional markets.

In addition to our lines of business, we have a Funds Management unit. The primary purpose of this unit is to manage our overall liquidity needs and interest rate risk. Each line of business borrows funds from and provides funds to the Funds Management unit as needed to support their operations. Operating results for Funds Management and other include the effect of interest rate risk positions and risk management activities, securities gains and losses including impairment charges, the provision for credit losses in excess of net loans charged off, tax planning strategies and certain executive compensation costs that are not attributed to the lines of business.

We allocate resources and evaluate the performance of our lines of business using the net direct contribution which includes the allocation of funds, actual net credit losses and capital costs. In addition, we measure the performance of our business lines after allocation of certain indirect expenses and taxes based on statutory rates. Corporate expense allocations were updated in the first quarter of 2014. The allocations for 2013 have been revised on a comparable basis.

The cost of funds borrowed from the Funds Management unit by the operating lines of business is transfer priced at rates that approximate market rates for funds with similar duration. Market rates are generally based on the applicable LIBOR or interest rate swap rates, adjusted for prepayment risk. This method of transfer-pricing funds that support
assets of the operating lines of business tends to insulate them from interest rate risk.
The value of funds provided by the operating lines of business to the Funds Management unit is also based on rates which approximate wholesale market rates for funds with similar duration and re-pricing characteristics. Market rates are generally based on LIBOR or interest rate swap rates. The funds credit formula applied to deposit products with indeterminate maturities is established based on their re-pricing characteristics reflected in a combination of the short-term LIBOR rate and a moving average of an intermediate term swap rate, with an appropriate spread applied to both. Shorter duration products are weighted towards the short term LIBOR rate and longer duration products are weighted towards the intermediate swap rates. The expected duration ranges from 30 days for certain rate-sensitive deposits to five years.

- 12 -

Economic capital is assigned to the business units by a capital allocation model that reflects management's assessment of risk. This model assigns capital based upon credit, operating, interest rate and other market risk inherent in our business lines and recognizes the diversification benefits among the units. The level of assigned economic capital is a combination of the risk taken by each business line, based on its actual exposures and calibrated to its own loss history where possible. Average invested capital includes economic capital and amounts we have invested in the lines of business.

As shown in Table 6, net income attributable to our lines of business increased $\$ 3.1$ million or $6 \%$ compared to the third quarter of 2013. The increase was primarily due to increased net interest revenue from growth in Commercial Banking, increased operating revenue, partially offset by increased operating expense.

- 13 -

## Commercial Banking

Commercial Banking contributed $\$ 41.1$ million to consolidated net income in the third quarter of 2014, up $\$ 4.8$ million or $13 \%$ over the third quarter of 2013. Increased net interest revenue, and growth in fees and commissions revenue was partially offset by increased operating expenses. In addition, Commercial Banking experienced a net recovery of $\$ 1.0$ million in the third quarter of 2014 compared to net loans charged off of $\$ 45$ thousand in the third quarter of 2013.

Net interest revenue increased $\$ 7.3$ million or $9 \%$ over the prior year. Growth in net interest revenue was primarily due to a $\$ 1.1$ billion or $12 \%$ increase in average loan balances and a $\$ 608$ million or $7 \%$ increase in average deposits over the third quarter of 2013, partially offset by reduced yields on loans.

- 14 -

Fees and commissions revenue increased $\$ 4.9$ million or $12 \%$ over the third quarter of 2013. Brokerage and trading revenue was up $\$ 2.1$ million primarily due to increased customer hedging revenue and growth in loan syndication fees. Transaction card revenues from our TransFund electronic funds transfer network was up $\$ 1.7$ million over the prior year primarily due to increased transaction activity. Commercial deposit service charge revenue and other revenues were also up slightly over the prior year.

Operating expenses increased $\$ 7.6$ million or $16 \%$ over the third quarter of 2013. Personnel costs increased $\$ 1.4$ million or 5\% primarily due to standard annual merit increases and increased incentive compensation. Net losses and operating expenses on repossessed assets increased $\$ 3.0$ million primarily due to an asset impairment identified though regularly scheduled annual appraisal updates. Other non-personnel expenses increased $\$ 3.2$ million or $17 \%$, primarily related to increased data processing expenses related to growth in the transaction activity. Corporate expense allocations decreased $\$ 2.2$ million compared to the prior year.

The average outstanding balance of loans attributed to Commercial Banking grew by $\$ 1.1$ billion over the third quarter of 2013 to $\$ 10.8$ billion. See the Loans section of Management's Discussion and Analysis of Financial Condition following for additional discussion of changes in commercial and commercial real estate loans which are primarily attributed to the Commercial Banking segment.

Average deposits attributed to Commercial Banking were $\$ 8.9$ billion for the third quarter of 2014, up $\$ 608$ million or $7 \%$ over the third quarter of 2013, primarily due to a $\$ 594$ million or $16 \%$ increase in average balances attributed to our commercial \& industrial loan customers. Balances attributed to our energy customers grew by $\$ 47$ million or $4 \%$, balances attributed to healthcare customers grew by $\$ 42$ million or $8 \%$ and balances attributed to small business customers were up $\$ 22$ million or $2 \%$. This growth was partially offset by a decrease in balances attributed to treasury services customers. Commercial customers continue to maintain high account balances due to continued economic uncertainty and persistently low yields available on high quality investments.

## Consumer Banking

Consumer Banking provides retail banking services through five primary distribution channels: traditional branches, supermarket branches, the 24 -hour ExpressBank call center, Internet banking and mobile banking. Consumer Banking also conducts mortgage banking activities through offices located outside of our consumer banking markets, through correspondent loan originators and through Home Direct Mortgage, an online origination channel.

Consumer Banking contributed $\$ 12.4$ million to consolidated net income for the third quarter of 2014, a decrease of $\$ 811$ thousand compared to the third quarter of 2013. Changes in the fair value of our mortgage servicing rights, net of economic hedge, resulted in a $\$ 3.0$ million increase in Consumer Banking net income in the third quarter of 2014, compared to a $\$ 247$ thousand decrease in Consumer Banking net income in the third quarter of 2013. Decreased net interest revenue and higher non-personnel expense and corporate expense allocations, were partially offset by increased mortgage banking revenue.

Net interest revenue from Consumer Banking activities decreased $\$ 2.8$ million or $8 \%$ compared to the third quarter of 2013 , primarily due to a $\$ 2.9$ million decrease in revenue on a deposit advance product that was phased out during the second quarter of 2014. Average loan balances were $\$ 18$ million or $1 \%$ lower than the prior year. Net loans charged off increased $\$ 318$ thousand over the prior year.

Fees and commissions revenue increased $\$ 701$ thousand or $1 \%$ over the third quarter of 2013. Growth in mortgage banking revenue was partially offset by a decrease in deposit service charges. Mortgage banking revenue was up $\$ 3.3$ million over the prior year. Residential mortgage fundings were higher compared to the third quarter of 2013, but gains on sale margin have narrowed. The mix of mortgage loan production shifted toward correspondent loans that typically have lower margins. Deposit service charges and fees decreased $\$ 2.4$ million compared to the prior year primarily due to lower overdraft fees.

Operating expenses increased $\$ 2.4$ million or $5 \%$ over the third quarter of 2013. Personnel expenses were up $\$ 743$ thousand or $3 \%$ primarily due to increased incentive compensation expense and standard annual merit increases, partially offset by staffing reductions. Non-personnel expense increased $\$ 1.2$ million or 5\%. Professional fees were up $\$ 1.6$ million primarily related to higher mortgage compliance costs. Data processing and communications expense increased $\$ 588$ thousand primarily related to increased transaction activity. Mortgage banking costs were down $\$ 1.0$ million compared to the prior year. Corporate expense allocations were up $\$ 2.3$ million over the third quarter of 2013.

Average consumer deposits were up $\$ 101$ million or $2 \%$ over the third quarter of 2013. Average demand deposit balances increased $\$ 153$ million or $12 \%$ and average interest-bearing transaction accounts increased $\$ 97$ million or $3 \%$. Average time deposit balances were down $\$ 179$ million or $10 \%$ compared to the prior year.

Mortgage banking activities include the origination, marketing and servicing of conventional and government-sponsored residential mortgage loans. We funded $\$ 1.4$ billion of residential mortgage loans in the third quarter of 2014 and $\$ 1.1$ billion in the third quarter of 2013. Mortgage loan fundings included $\$ 1.4$ billion of mortgage loans funded for sale in the secondary market and $\$ 34$ million funded for retention within the consolidated group. Approximately $14 \%$ of our mortgage loans funded were in the Oklahoma market and $11 \%$ in the Texas market. In addition, $48 \%$ of our mortgage loan fundings came from correspondent lenders compared to $37 \%$ in the third quarter of 2013 and $9 \%$ was originated from our recently added Home Direct Mortgage on-line sales channel launched in the fourth quarter of 2013.

At September 30, 2014, we serviced $\$ 15.5$ billion of mortgage loans for others and $\$ 1.1$ billion of loans retained within the consolidated group. Approximately $88 \%$ of the mortgage loans serviced were to borrowers in our primary geographical market areas. Loans past due 90 days or more totaled $\$ 70$ million or $0.45 \%$ of loans serviced for others at September 30, 2014 compared to $\$ 71$ million or $0.49 \%$ of loans serviced for others at June 30, 2014. Mortgage servicing revenue, including revenue on loans serviced for the consolidated group, totaled $\$ 14.7$ million, up $\$ 2.1$ million or $17 \%$ over the third quarter of 2013.

## - 17 -

Wealth Management
Wealth Management contributed $\$ 4.8$ million to consolidated net income in the third quarter of 2014 compared to $\$ 5.7$ million in the third quarter of 2013 . Growth in fiduciary and asset management revenue was partially offset by increased operating expenses. The third quarter of 2013 also included a $\$ 555$ thousand net recovery.

Net interest revenue for the third quarter of 2014 was unchanged compared to the third quarter of 2013. Average deposit balances were up $\$ 31$ million or $1 \%$ over the third quarter of 2013 . Non-interest bearing demand deposits increased $\$ 59$ million and interest-bearing transaction account balances decreased $\$ 33$ million. Higher-costing time deposit balances increased $\$ 5.8$ million. Average loan balances were up $\$ 71$ million or $8 \%$ over the prior year. The benefit of this growth was partially offset by lower yields.

Fees and commissions revenue was up $\$ 5.6$ million or $10 \%$ over the third quarter of 2013 primarily due to growth in fiduciary and asset management revenue. The acquisition of MBM Advisors in the second quarter of 2014 and GTRUST Financial Corporation in the first quarter of 2014 added approximately $\$ 2.7$ million in revenue and $\$ 2.0$ billion in fiduciary assets over the prior year. The remaining increase was primarily due to the increase in the fair value of assets managed. Brokerage and trading revenue decreased $\$ 717$ thousand or $2 \%$. A decrease in retail brokerage and customer hedging revenue, was partially offset by growth in securities trading and investment banking revenue.

Other operating revenue includes fees earned from state and municipal bond and corporate debt underwriting and financial advisory services, primarily in the Oklahoma and Texas markets. In the third quarter of 2014, the Wealth Management division participated in 127 state and municipal bond underwritings that totaled $\$ 2.2$ billion. As a participant, the Wealth Management division was responsible for facilitating the sale of approximately $\$ 668$ million of these underwritings. The Wealth Management division also participated in five corporate debt underwritings that totaled $\$ 2.1$ billion. In the third quarter of 2013, the Wealth Management division participated in 129 state and municipal bond underwritings that totaled approximately $\$ 2.0$ billion. Our interest in these underwritings totaled approximately $\$ 718$ million. The Wealth Management division also participated in seven corporate debt underwritings that totaled $\$ 5.6$ billion.

Operating expenses increased $\$ 6.2$ million or $12 \%$ over the third quarter of 2013. Personnel expenses increased $\$ 3.4$ million, including a $\$ 1.8$ million increase in regular compensation and a $\$ 430$ thousand increase in employee benefits primarily related to investments in Wealth Management talent, including the GTRUST and MBM acquisitions. Incentive compensation expense was up $\$ 1.2$ million over the third quarter of 2013. Non-personnel expense increased $\$ 2.8$ million, primarily related to increased professional fees and services, data processing and communications fees, net occupancy and equipment and amortization of identifiable intangible assets from the acquisitions of MBM Advisors and GTRUST Financial Corporation. Corporate expense allocations increased $\$ 415$ thousand over the prior year.

- 19 -

Financial Condition
Securities
We maintain a securities portfolio to enhance profitability, manage interest rate risk, provide liquidity and comply with regulatory requirements. Securities are classified as trading, held for investment, or available for sale. See Note 2 to the consolidated financial statements for the composition of the securities portfolio as of September 30, 2014, December 31, 2013 and September 30, 2013.

At September 30, 2014, the carrying value of investment (held-to-maturity) securities was $\$ 655$ million and the fair value was $\$ 676$ million. Investment securities consist primarily of long-term, fixed rate Oklahoma and Texas municipal bonds, taxable Texas school construction bonds and residential mortgage-backed securities issued by U.S. government agencies. The investment security portfolio is diversified among issuers. The largest obligation of any single issuer is $\$ 30$ million. Substantially all of these bonds are general obligations of the issuers. Approximately $\$ 104$ million of the Texas school construction bonds are also guaranteed by the Texas Permanent School Fund Guarantee Program supervised by the State Board of Education for the State of Texas.

Available for sale securities, which may be sold prior to maturity, are carried at fair value. Unrealized gains or losses, net of deferred taxes, are recorded as accumulated other comprehensive income in shareholders' equity. The amortized cost of available for sale securities totaled $\$ 9.3$ billion at September 30, 2014, a decrease of $\$ 350$ million from June 30, 2014. Available for sale securities consist primarily of U.S. government agency residential mortgage-backed securities and U.S. government agency commercial mortgage-backed securities. Commercial mortgage-backed securities have prepayment penalties similar to commercial loans. At September 30, 2014, residential mortgage-backed securities represented $75 \%$ of total available for sale securities. The decrease in amortized cost during the third quarter was primarily due to U.S. government agency residential mortgage-backed securities.

A primary risk of holding residential mortgage-backed securities comes from extension during periods of rising interest rates or prepayment during periods of falling interest rates. We evaluate this risk through extensive modeling of risk both before making an investment and throughout the life of the security. Our best estimate of the duration of the combined residential mortgage-backed securities portfolio held in investment and available for sale securities at September 30, 2014 is 3.1 years. Management estimates the duration extends to 3.4 years assuming an immediate 200 basis point upward shock. The estimated duration contracts to 2.9 years assuming a 50 basis point decline in the current rate environment.

Residential mortgage-backed securities also have credit risk from delinquency or default of the underlying loans. We mitigate this risk by primarily investing in securities issued by U.S. government agencies. Principal and interest payments on the underlying loans are fully guaranteed. At September 30, 2014, approximately $\$ 6.8$ billion of the amortized cost of the Company's residential mortgage-backed securities were issued by U.S. government agencies. The fair value of these residential mortgage-backed securities totaled $\$ 6.9$ billion at September 30, 2014.

We also hold amortized cost of $\$ 161$ million in residential mortgage-backed securities privately issued by publicly-owned financial institutions, a decrease of $\$ 7.5$ million from June 30, 2014. The decrease was due cash payments received during the quarter. The fair value of our portfolio of privately issued residential mortgage-backed securities totaled $\$ 171$ million at September 30, 2014.

The amortized cost of our portfolio of privately issued residential mortgage-backed securities included $\$ 93$ million of Jumbo-A residential mortgage loans and $\$ 68$ million of Alt-A residential mortgage loans. Jumbo-A residential mortgage loans generally meet government underwriting standards, but have loan balances that exceed agency maximums. Alt-A mortgage loans generally do not have sufficient documentation to meet government agency underwriting standards. Credit risk on residential mortgage-backed securities originated by private issuers is mitigated
by investment in senior tranches with additional collateral support. All of our Alt-A residential mortgage-backed securities were issued with credit support from additional layers of loss-absorbing subordinated tranches, including all Alt-A residential mortgage-backed securities held that were originated in 2007 and 2006. The weighted average original credit enhancement of the Alt-A residential mortgage-backed securities was $9.5 \%$ and has been fully absorbed as of September 30, 2014. The Jumbo-A residential mortgage-backed securities had original credit enhancement of $9.7 \%$ and the current level is $2.5 \%$. Approximately $91 \%$ of our Alt-A mortgage-backed securities represent pools of fixed rate residential mortgage loans. None of the adjustable rate mortgages are payment option adjustable rate mortgages ("ARMs"). Approximately $31 \%$ of our Jumbo-A residential mortgage-backed securities represent pools of fixed rate residential mortgage loans and none of the adjustable rate mortgages are payment option ARMs.

- 20 -

The aggregate gross amount of unrealized losses on available for sale securities totaled $\$ 67$ million at September 30, 2014, compared to $\$ 55$ million at June 30, 2014. On a quarterly basis, we perform separate evaluations on debt and equity securities to determine if the unrealized losses are temporary as more fully described in Note 2 of the Consolidated Financial Statements. No other-than-temporary impairment charges were recognized in earnings in the third quarter of 2014.

Certain residential mortgage-backed securities issued by U.S. government agencies and included in fair value option securities on the Consolidated Balance Sheets have been segregated and designated as economic hedges of changes in the fair value of our mortgage servicing rights. We have elected to carry these securities at fair value with changes in fair value recognized in current period income. These securities are held with the intent that gains or losses will offset changes in the fair value of mortgage servicing rights and related derivative contracts.

BOK Financial is required to hold stock as members of the Federal Reserve system and the Federal Home Loan Banks ("FHLB"). These restricted equity securities are carried at cost as these securities do not have a readily determined fair value because the ownership of these shares are restricted and they lack a market. Federal Reserve Bank stock totaled $\$ 34$ million and holdings of FHLB stock totaled $\$ 156$ million at September 30, 2014. Holdings of FHLB stock increased $\$ 98$ million over June 30, 2014. We are required to hold stock in the FHLB in proportion to our borrowings with the FHLB.
Bank-Owned Life Insurance
We have approximately $\$ 292$ million of bank-owned life insurance at September 30, 2014. This investment is expected to provide a long-term source of earnings to support existing employee benefit programs. Approximately $\$ 260$ million is held in separate accounts. Our separate account holdings are invested in diversified portfolios of investment-grade fixed income securities and cash equivalents, including U.S. Treasury and Agency securities, residential mortgage-backed securities, corporate debt, asset-backed and commercial mortgage-backed securities. The portfolios are managed by unaffiliated professional managers within parameters established in the portfolio's investment guidelines. The cash surrender value of certain life insurance policies is further supported by a stable value wrap, which protects against changes in the fair value of the investments. At September 30, 2014, the cash surrender value represented by the underlying fair value of investments held in separate accounts was approximately $\$ 274$ million. As the underlying fair value of the investments held in a separate account at September 30, 2014 exceeded the net book value of the investments, no cash surrender value was supported by the stable value wrap. The stable value wrap is provided by a domestic financial institution. The remaining cash surrender value of $\$ 32$ million primarily represents the cash surrender value of policies held in general accounts and other amounts due from various insurance companies.

- 21 -

Loans
The aggregate loan portfolio before allowance for loan losses totaled $\$ 13.7$ billion at September 30, 2014, an increase of $\$ 257$ million over June 30, 2014. Outstanding commercial loans grew by $\$ 204$ million over June 30, 2014, largely due to growth in energy and services sector loans. Commercial real estate loan balances were up $\$ 69$ million primarily related to growth in loans secured by multifamily residential properties, office buildings and industrial facilities, partially offset by a decrease in loans secured by retail facilities and other commercial real estate loans. Residential mortgage loans decreased $\$ 29$ million and consumer loans increased $\$ 12$ million over June 30, 2014.

Commercial
Commercial loans represent loans for working capital, facilities acquisition or expansion, purchases of equipment and other needs of commercial customers primarily located within our geographical footprint. Commercial loans are underwritten individually and represent on-going relationships based on a thorough knowledge of the customer, the
customer's industry and market. While commercial loans are generally secured by the customer's assets including real property, inventory, accounts receivable, operating equipment, interests in mineral rights and other property and may also include personal guarantees of the owners and related parties, the primary source of repayment of the loans is the on-going cash flow from operations of the customer's business. Inherent lending risks are centrally monitored on a continuous basis from underwriting throughout the life of the loan for compliance with commercial lending policies.

- 22 -

Commercial loans totaled $\$ 8.6$ billion or $63 \%$ of the loan portfolio at September 30, 2014, an increase of $\$ 204$ million over June 30, 2014. Energy loans grew by $\$ 132$ million and service sector grew by $\$ 111$ million over the prior quarter. Manufacturing sector loans increased $\$ 27$ million while wholesale/retail sector loans decreased $\$ 45$ million and healthcare sector loans decreased $\$ 12$ million during the third quarter.

Table 11 presents the commercial sector of our loan portfolio distributed primarily by collateral location. Loans for which collateral location is less relevant, such as unsecured loans and reserve-based energy loans, are distributed by the borrower's primary operating location. The majority of the collateral securing our commercial loan portfolio is located within our geographical footprint with $34 \%$ concentrated in the Texas market and $24 \%$ concentrated in the Oklahoma market. The Other category is primarily composed of two states, California and Louisiana, which represent $\$ 198$ million or $2 \%$ of the commercial loan portfolio and $\$ 185$ million or $2 \%$ of the commercial loan portfolio, respectively, at September 30, 2014. All other states individually represent one percent or less of total commercial loans.

Supporting the energy industry with loans to producers and other energy-related entities has been a hallmark of the Company since its founding and represents a large portion of our commercial loan portfolio. In addition, energy production and related industries have a significant impact on the economy in our primary markets. Loans collateralized by oil and gas properties are subject to a semi-annual engineering review by our internal staff of petroleum engineers. This review is utilized as the basis for developing the expected cash flows supporting the loan amount. The projected cash flows are discounted according to risk characteristics of the underlying oil and gas properties. Loans are evaluated to demonstrate with reasonable certainty that crude oil, natural gas and natural gas liquids can be recovered from known oil and gas reservoirs under existing economic and operating conditions at current pricing levels and with existing conventional equipment and operating methods and costs. As part of our evaluation of credit quality, we analyze rigorous stress tests over a range of commodity prices and take proactive steps to mitigate risk when appropriate.

Outstanding energy loans totaled $\$ 2.6$ billion or $19 \%$ of total loans at September 30, 2014. Unfunded energy loan commitments increased by $\$ 28$ million to $\$ 2.8$ billion at September 30, 2014. Approximately $\$ 2.2$ billion of energy loans were to oil and gas producers, up $\$ 112$ million over June 30, 2014. Approximately $59 \%$ of the committed production loans are secured by properties primarily producing oil and $41 \%$ of the committed production loans are secured by properties primarily producing natural gas. Loans to borrowers engaged in wholesale or retail energy sales were up $\$ 40$ million over June 30, 2014 to $\$ 113$ million. Loans to borrowers that provide services to the energy industry increased $\$ 22$ million to $\$ 150$ million at September 30, 2014. Loans to midstream oil and gas companies

## Edgar Filing: BOK FINANCIAL CORP ET AL - Form 10-Q

totaled $\$ 62$ million at September 30, 2014, a decrease of $\$ 5.1$ million from June 30, 2014. Loans to borrowers that manufacture equipment primarily for the energy industry totaled $\$ 14$ million, down $\$ 4.9$ million compared to the prior quarter.

The services sector of the loan portfolio totaled $\$ 2.5$ billion or $18 \%$ of total loans and consists of a large number of loans to a variety of businesses, including government \& educational, utilities, gaming, not-for-profit entities and insurance. Service sector loans grew by $\$ 111$ million over June 30, 2014. Approximately $\$ 1.2$ billion of the services category is made up of loans with individual balances of less than $\$ 10$ million. Service sector loans are generally secured by the assets of the borrower with repayment coming from the cash flows of ongoing operations of the customer's business.

We participate in shared national credits when appropriate to obtain or maintain business relationships with local customers. Shared national credits are defined by banking regulators as credits of more than $\$ 20$ million and with three or more

- 23 -
non-affiliated banks as participants. At September 30, 2014, the outstanding principal balance of these loans totaled $\$ 2.9$ billion. Substantially all of these loans are to borrowers with local market relationships. We serve as the agent lender in approximately $16 \%$ of our shared national credits, based on dollars committed. We hold shared credits to the same standard of analysis and perform the same level of review as internally originated credits. Our lending policies generally avoid loans in which we do not have the opportunity to maintain or achieve other business relationships with the customer. In addition to management's quarterly assessment of credit risk, banking regulators annually review a sample of shared national credits for proper risk grading.

## Commercial Real Estate

Commercial real estate represents loans for the construction of buildings or other improvements to real estate and property held by borrowers for investment purposes generally within our geographical footprint, with larger concentrations in Texas and Oklahoma which represent $35 \%$ and $16 \%$ of the total commercial real estate portfolio at September 30, 2014, respectively. We require collateral values in excess of the loan amounts, demonstrated cash flows in excess of expected debt service requirements, equity investment in the project and a portion of the project already sold, leased or permanent financing already secured. The expected cash flows from all significant new or renewed income producing property commitments are stress tested to reflect the risks in varying interest rates, vacancy rates and rental rates. As with commercial loans, inherent lending risks are centrally monitored on a continuous basis from underwriting throughout the life of the loan for compliance with applicable lending policies.

Commercial real estate loans totaled $\$ 2.7$ billion or 20\% of the loan portfolio at September 30, 2014. The outstanding balance of commercial real estate loans increased $\$ 69$ million during the third quarter of 2014. Loans secured by multifamily residential properties grew by $\$ 62$ million. Loans secured by office buildings increased $\$ 45$ million and loans secured by industrial facilities increased $\$ 29$ million. These increases were partially offset by a $\$ 31$ million decrease in loans secured by retail properties and a $\$ 27$ million decrease in other commercial real estate loans. Residential construction and land development sector loans decreased $\$ 10$ million compared to June 30, 2014. The commercial real estate loan balance as a percentage of our total loan portfolio has ranged from $18 \%$ to $22 \%$ over the past five years. The commercial real estate sector of our loan portfolio distributed by collateral location follows in Table 12.

Table 12 -- Commercial Real Estate Loans by Collateral Location

## Residential Mortgage and Consumer

Residential mortgage loans provide funds for our customers to purchase or refinance their primary residence or to borrow against the equity in their home. Residential mortgage loans are secured by a first or second-mortgage on the customer's primary residence. Consumer loans include direct loans secured by and for the purchase of automobiles, recreational and marine equipment as well as other unsecured loans. Residential mortgage and consumer loans are made in accordance with underwriting policies we believe to be conservative and are fully documented. Credit scoring is assessed based on significant credit characteristics including credit history, residential and employment stability.

Residential mortgage loans totaled $\$ 2.0$ billion, a $\$ 29$ million decrease compared to June 30, 2014. In general, we sell the majority of our conforming fixed rate loan originations in the secondary market and retain the majority of our non-conforming and adjustable-rate mortgage loans. We have no concentration in sub-prime residential mortgage loans. Our mortgage loan portfolio does not include payment option adjustable rate mortgage loans or adjustable rate mortgage loans with initial rates that are below market. Collateral for $98 \%$ of our residential mortgage loan portfolio is located within our geographical footprint.

The majority of our permanent mortgage loan portfolio is composed of various non-conforming mortgage programs to support customer relationships including jumbo mortgage loans, non-builder construction loans and special loan programs for high net worth individuals or certain professionals. The aggregate outstanding balance of loans in these programs is $\$ 752$ million. Jumbo loans may be fixed or variable rate and are fully amortizing. The size of jumbo loans exceed maximums set under government sponsored entity standards, but otherwise generally conform to those standards. These loans generally require a minimum FICO score of 720 and a maximum debt-to-income ratio ("DTI") of $38 \%$. Loan-to-value ratios ("LTV") are tiered from $60 \%$ to $100 \%$, depending on the market. Special mortgage programs include fixed and variable rate fully amortizing loans tailored to the needs of certain healthcare professionals. Variable rate loans are fully indexed at origination and may have fixed rates for three to ten years, then adjust annually thereafter.

At September 30, 2014, $\$ 198$ million of permanent residential mortgage loans are guaranteed by U.S. government agencies. We have minimal credit exposure on loans guaranteed by the agencies. This amount includes residential mortgage loans previously sold into GNMA mortgage pools that the Company may repurchase when certain defined delinquency criteria are met. Because of this repurchase right, the Company is deemed to have regained effective control over these loans and must include them on the Consolidated Balance Sheet. Permanent residential mortgage loans guaranteed by U.S. government agencies increased $\$ 10.4$ million over June 30, 2014.

Home equity loans totaled $\$ 790$ million at September 30, 2014, a decrease of $\$ 9.1$ million compared to June 30, 2014. Our home equity loan portfolio is primarily composed of first-lien, fully amortizing home equity loans. Home equity loans generally require a minimum FICO score of 700 and a maximum DTI of $40 \%$. The maximum loan amount available for our home equity loan products is generally $\$ 400$ thousand. Revolving loans have a 5 year revolving period followed by a 15 year term of amortizing repayment. Interest-only home equity loans may not be extended for any additional revolving time. All other home equity loans may be extended at management's discretion for an additional 5 year revolving term subject to an update of certain credit information. A summary of our home equity loan portfolio at September 30, 2014 by lien position and amortizing status follows in Table 13.

Table 13 -- Home Equity Loans
(In thousands)

|  | Revolving | Amortizing | Total |
| :--- | :--- | :--- | :--- |
| First lien | $\$ 37,254$ | $\$ 510,603$ | $\$ 547,857$ |
| Junior lien | 66,648 | 175,563 | 242,211 |
| Total home equity | $\$ 103,902$ | $\$ 686,166$ | $\$ 790,068$ |

The distribution of residential mortgage and consumer loans at September 30, 2014 is as follows in Table 14. Residential mortgage loans are distributed by collateral location. Consumer loans are generally distributed by borrower location.

- 25 -

Table 14 -- Residential Mortgage and Consumer Loans by Collateral Location (In thousands)

- 26 -

The Company secondarily evaluates loan portfolio performance based on the primary geographical market managing the loan. Loans attributed to a geographical market may not represent the location of the borrower or the collateral. All permanent mortgage loans serviced by our mortgage banking unit and held for investment by the Bank are centrally managed by the Bank of Oklahoma.

Table 15 -- Loans Managed by Primary Geographical Market (In thousands)

## Loan Commitments

We enter into certain off-balance sheet arrangements in the normal course of business. These arrangements included unfunded loan commitments which totaled $\$ 7.7$ billion and standby letters of credit which totaled $\$ 451$ million at September 30, 2014. Loan commitments may be unconditional obligations to provide financing or conditional obligations that depend on the borrower's financial condition, collateral value or other factors. Standby letters of credit are unconditional commitments to guarantee the performance of our customer to a third party. Since some of these commitments are expected to expire before being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Approximately $\$ 624$ thousand of the outstanding standby letters of credit were issued on behalf of customers whose loans are nonperforming at September 30, 2014.

As more fully described in Note 6 to the Consolidated Financial Statements, we have off-balance sheet commitments related to certain residential mortgage loans originated under community development loan programs that were sold to a U.S. government agency with full recourse. These mortgage loans were underwritten to standards approved by the agencies, including full documentation and originated under programs available only for owner-occupied properties. The Company no longer sells residential mortgage loans with recourse other than obligations under standard representations and warranties. We are obligated to repurchase these loans for the life of these loans in the event of foreclosure for the unpaid principal and interest at the time of foreclosure. At September 30, 2014, the principal balance of residential mortgage loans sold subject to recourse obligations totaled $\$ 175$ million, down from $\$ 181$ million at June 30, 2014. Substantially all of these loans are to borrowers in our primary markets including \$121 million to borrowers in Oklahoma, $\$ 19$ million to borrowers in Arkansas, $\$ 13$ million to borrowers in New Mexico and $\$ 10$ million to borrowers in the Kansas/Missouri market.

We also have an off-balance sheet obligation to repurchase residential mortgage loans sold to government sponsored entities through our mortgage banking activities due to standard representations and warranties made under contractual agreements as described further in Note 6 to the Consolidated Financial Statements. For the period from 2010 through the third quarter of 2014 combined, approximately $14 \%$ of repurchase requests have currently resulted in actual repurchases or indemnification by the Company. The accrual for credit losses related to potential loan repurchases under representations and warranties totaled $\$ 2.4$ million at September 30, 2014 and $\$ 5.6$ million at June 30, 2014.

- 28 -

## Customer Derivative Programs

We offer programs that permit our customers to hedge various risks, including fluctuations in energy, cattle and other agricultural product prices, interest rates and foreign exchange rates. Each of these programs work essentially the same way. Derivative contracts are executed between the customers and the Company. Offsetting contracts are executed between the Company and selected counterparties to minimize market risk due to changes in commodity prices, interest rates or foreign exchange rates. The counterparty contracts are identical to the customer contracts, except for a fixed pricing spread or a fee paid to us as compensation for administrative costs, credit risk and profit.

The customer derivative programs create credit risk for potential amounts due to the Company from our customers and from the counterparties. Customer credit risk is monitored through existing credit policies and procedures. The effects of changes in commodity prices, interest rates or foreign exchange rates are evaluated across a range of possible options to determine the maximum exposure we are willing to have individually to any customer. Customers may also be required to provide cash margin or other collateral in conjunction with our credit agreements to further limit our credit risk.

Counterparty credit risk is evaluated through existing policies and procedures. This evaluation considers the total relationship between BOK Financial and each of the counterparties. Individual limits are established by management, approved by Credit Administration and reviewed by the Asset / Liability Committee. Margin collateral is required if the exposure between the Company and any counterparty exceeds established limits. Based on declines in the counterparties' credit ratings, these limits may be reduced and additional margin collateral may be required.

A deterioration of the credit standing of one or more of the customers or counterparties to these contracts may result in BOK Financial recognizing a loss as the fair value of the affected contracts may no longer move in tandem with the offsetting contracts. This occurs if the credit standing of the customer or counterparty deteriorated such that either the fair value of underlying collateral no longer supported the contract or the customer or counterparty's ability to provide margin collateral was impaired. Credit losses on customer derivatives reduce brokerage and trading revenue in the Consolidated Statement of Earnings.

Derivative contracts are carried at fair value. At September 30, 2014, the net fair values of derivative contracts, before consideration of cash margin, reported as assets under these programs totaled $\$ 365$ million compared to $\$ 359$ million at June 30, 2014. Derivative contracts carried as assets included to-be-announced residential mortgage-backed securities sold to our mortgage banking customers considered interest rate derivative contracts. At September 30, 2014, the fair value of our derivative contracts included $\$ 24$ million related to these to-be-announced residential mortgage-backed securities, $\$ 34$ million for interest rate swaps, $\$ 16$ million for energy contracts and $\$ 275$ million for foreign exchange contracts. The aggregate net fair value of derivative contracts, before consideration of cash margin, held under these programs reported as liabilities totaled $\$ 366$ million at September 30, 2014 and $\$ 355$ million at June 30, 2014.

At September 30, 2014, total derivative assets were reduced by $\$ 4.3$ million of cash collateral received from counterparties and total derivative liabilities were reduced by $\$ 19$ million of cash collateral paid to counterparties related to instruments executed with the same counterparty under a master netting agreement.

A table showing the notional and fair value of derivative assets and liabilities on both a gross and net basis is presented in Note 3 to the Consolidated Financial Statements.

The fair value of derivative contracts reported as assets under these programs, net of cash margin held by the Company, by category of debtor at September 30, 2014 follows in Table 16.

Table 16 -- Fair Value of Derivative Contracts
(In thousands)
Customers \$240,730
Banks and other financial institutions 109,281
$\begin{array}{ll}\text { Exchanges and clearing organizations } & 10,798\end{array}$
Fair value of customer risk management program asset derivative contracts, net $\$ 360,809$
At September 30, 2014, our largest derivative exposure was to an internationally active financial institution for equity option contracts which totaled $\$ 10$ million. At September 30, 2014, our aggregate gross exposure to internationally active domestic financial institutions was approximately $\$ 219$ million comprised of $\$ 206$ million of cash and securities positions and $\$ 13$ million of gross derivative positions. We have no direct exposure to European sovereign debt and our aggregate gross exposure to European financial institutions totaled $\$ 5.5$ million at September 30, 2014.

Our customer derivative program also introduces liquidity and capital risk. We are required to provide cash margin to certain counterparties when the net negative fair value of the contracts exceeds established limits. Also, changes in commodity prices affect the amount of regulatory capital we are required to hold as support for the fair value of our derivative assets. These risks are modeled as part of the management of these programs. Based on current prices, a decrease in market prices equivalent to $\$ 47.00$ per barrel of oil would decrease the fair value of derivative assets by $\$ 8.1$ million. An increase in prices equivalent to $\$ 131.03$ per barrel of oil would increase the fair value of derivative assets by $\$ 139$ million as current prices move away from the fixed prices embedded in our existing contracts. Liquidity requirements of this program are also affected by our credit rating. A decrease in our credit rating to below investment grade would increase our obligation to post cash margin on existing contracts by approximately $\$ 19$ million. The fair value of our to-be-announced residential mortgage-backed securities and interest rate swap derivative contracts is affected by changes in interest rates. Based on our assessment as of September 30, 2014, changes in interest rates would not materially impact regulatory capital or liquidity needed to support this portion of our customer derivative program.
Summary of Loan Loss Experience
We maintain an allowance for loan losses and an accrual for off-balance sheet credit risk. The combined allowance for loan losses and off-balance sheet credit losses totaled $\$ 192$ million or $1.41 \%$ of outstanding loans and $199 \%$ of nonaccruing loans at September 30, 2014. The allowance for loan losses was $\$ 191$ million and the accrual for off-balance sheet credit losses was $\$ 1.2$ million. At June 30, 2014, the combined allowance for credit losses was $\$ 192$ million or $1.43 \%$ of outstanding loans and $199 \%$ of nonaccruing loans. The allowance for loan losses was $\$ 191$ million and the accrual for off-balance sheet credit losses was $\$ 1.3$ million.

The provision for credit losses is the amount necessary to maintain the allowance for loan losses and an accrual for off-balance sheet credit risk at an amount determined by management to be appropriate based on its evaluation. The provision includes the combined charge to expense for both the allowance for loan losses and the accrual for off-balance sheet credit risk. All losses incurred from lending activities will ultimately be reflected in charge-offs against the allowance for loan losses following funds advanced against outstanding commitments. After evaluating all credit factors, the Company determined that no provision for credit losses was necessary during the third quarter of 2014. No provision for credit losses was recorded in the second quarter of 2014 and an $\$ 8.5$ million negative provision for credit losses was recorded in the third quarter of 2013.

Allowance for Loan Losses
The appropriateness of the allowance for loan losses is assessed by management based on an ongoing quarterly evaluation of the probable estimated losses inherent in the portfolio. The allowance consists of specific allowances attributed to certain impaired loans, general allowances based on estimated loss rates by loan class and non-specific
allowances based on general economic conditions, concentration in loans with large balances and other relevant factors.

Loans are considered to be impaired when it is probable that we will not collect all amounts due according to the contractual terms of the loan agreement. This includes all nonaccruing loans, all loans modified in troubled debt restructurings and all government guaranteed loans repurchased from GNMA pools. At September 30, 2014, impaired loans totaled $\$ 291$ million, including $\$ 4.3$ million with specific allowances of $\$ 3.3$ million and $\$ 287$ million with no specific allowances because the loan balances represent the amounts we expect to recover. At June 30, 2014, impaired loans totaled $\$ 283$ million, including $\$ 4.7$ million of impaired loans with specific allowances of $\$ 3.4$ million and $\$ 278$ million with no specific allowances.

General allowances for unimpaired loans are based on an estimated loss rate by loan class. Estimated loss rates for risk-graded loans are either increased or decreased based on changes in risk grading for each loan class. Estimated loss rates for both risk-graded and non-risk graded loans may be further adjusted for inherent risk identified for the given loan class which have not yet been captured in the loss rate.

The aggregate amount of general allowances for all unimpaired loans totaled $\$ 160$ million at September 30, 2014, unchanged compared to June 30, 2014.

Nonspecific allowances are maintained for risks beyond factors specific to a particular portfolio segment or loan class. These factors include trends in the economy in our primary lending areas, concentrations in loans with large balances and other relevant factors. Nonspecific allowances totaled $\$ 28$ million at September 30, 2014, an increase of $\$ 995$ thousand compared to June 30, 2014. The nonspecific allowance also considers the possible impact of the European debt crisis and similar economic factors on our loan portfolio. Risks related to the European debt crisis and domestic economic risks remain stable compared to the previous quarter.

An allocation of the allowance for loan losses by loan category is included in Note 4 to the Consolidated Financial Statements.

Our loan monitoring process also identified loans that possess more than the normal amount of risk due to deterioration in the financial condition of the borrower or the value of the collateral. Because the borrowers are still performing in accordance with the original terms of the loan agreements, and no loss of principal or interest is anticipated, these loans were not included in nonperforming assets. Known information does, however, cause management concern as to the borrowers' ability to comply with current repayment terms. The potential problem loans totaled $\$ 108$ million at September 30, 2014, primarily composed of $\$ 30$ million of energy loans, $\$ 17$ million of service sector loans, $\$ 15$ million of residential construction and land development loans, $\$ 14$ million of loans secured by multifamily residential properties and $\$ 11$ million of other commerical \& industrial loans. Potential problem loans totaled $\$ 105$ million at June 30, 2014.
Net Loans Charged Off
Loans are charged off against the allowance for loan losses when the loan balance or a portion of the loan balance is no longer covered by the paying capacity of the borrower based on an evaluation of available cash resources and collateral value. Internally risk graded loans are evaluated quarterly and charge-offs are taken in the quarter in which the loss is identified. Non-risk graded loans are generally charged off when payments are between 60 days and 180 days past due, depending on loan class. In addition, non-risk graded loans are generally charged-down to collateral value within 60 days of being notified of a borrower's bankruptcy filing, regardless of payment status.

BOK Financial had a net recovery of $\$ 476$ thousand in the third quarter of 2014 compared to a net recovery of $\$ 2.0$ million in the second quarter of 2014 and net charge-offs of $\$ 299$ thousand in the third quarter of 2013. The ratio of net loans charged off (recovered) to average loans on an annualized basis was ( 0.01 )\% for the third quarter of 2014 compared with $(0.06) \%$ for the second quarter of 2014 and $0.01 \%$ for the third quarter of 2013. The net recovery in the third quarter of 2014 was $\$ 1.5$ million less than the previous quarter.

Net commercial loans recoveries totaled $\$ 143$ thousand in the third quarter of 2014 compared to $\$ 1.2$ million in the second quarter of 2014. Net commercial real estate loan recoveries were $\$ 1.3$ million in the third quarter and $\$ 2.6$ million in the second quarter. Residential mortgage net charge-offs were $\$ 623$ thousand and consumer net charge-offs were $\$ 309$ thousand for the third quarter. Consumer loan net charge-offs include deposit account overdraft losses.

${ }^{1}$ Excludes residential mortgages guaranteed by agencies of the U.S. Government
Nonperforming assets totaled \$265 million or $1.92 \%$ of outstanding loans and repossessed assets at September 30, 2014. Nonaccruing loans totaled $\$ 97$ million, accruing renegotiated residential mortgage loans totaled $\$ 70$ million and real estate and other repossessed assets totaled $\$ 98$ million. All accruing renegotiated residential mortgage loans, $\$ 3.8$ million of nonaccruing loans and $\$ 47$ million of real estate and other repossessed assets are guaranteed by U.S. government agencies. Excluding assets guaranteed by U.S. government agencies, nonperforming assets decreased $\$ 1.3$ million during the third quarter. The Company generally retains nonperforming assets to maximize potential recovery which may cause future nonperforming assets to decrease more slowly.

Loans are generally classified as nonaccruing when it becomes probable that we will not collect the full contractual principal and interest. As more fully discussed in Note 4 to the Consolidated Financial Statements, we may modify loans in troubled debt restructurings. Modifications may include extension of payment terms and rate concessions. We generally do not forgive principal or accrued but unpaid interest. All loans modified in troubled debt restructurings, except for residential mortgage loans guaranteed by U.S. government agencies, are classified as nonaccruing. We may also renew matured nonaccruing loans. All nonaccruing loans, including those renewed or modified in troubled debt restructurings, are charged off when the loan balance is no longer covered by the paying capacity of the borrower based on a quarterly evaluation of available cash resources and collateral value. All nonaccruing loans generally remain on nonaccrual status until full collection of principal and interest in accordance with the original terms, including principal previously charged off, is probable. We generally do not voluntarily

- 34 -
modify consumer loans to troubled borrowers. Consumer loans modified at the direction of bankruptcy court orders are identified as troubled debt restructurings and classified as nonaccruing.

At September 30, 2014, renegotiated loans consist solely of accruing residential mortgage loans guaranteed by U.S. government agencies that have been modified in troubled debt restructurings. See Note 4 to the Consolidated Financial Statements for additional discussion of troubled debt restructurings. Generally, we modify residential mortgage loans primarily by reducing interest rates and extending the number of payments in accordance with U.S. government agency guidelines. Generally, no unpaid principal or interest is forgiven. Interest continues to accrue based on the modified terms of the loan. Modified loans guaranteed by U.S. government agencies under residential mortgage loan programs may be sold once they become eligible according to U.S. government agency guidelines.

A rollforward of nonperforming assets for the three and nine ended September 30, 2014 follows in Table 19.

Balance, Sept. 30, 2014

Nine Months Ended
September 30, 2014
$\left.\begin{array}{lllll} & \begin{array}{l}\text { Real Estate } \\ \text { and Other } \\ \text { Nenaccruing } \\ \text { Loans }\end{array} & \begin{array}{l}\text { Renegotiated } \\ \text { Loans }\end{array} & \begin{array}{l}\text { Total } \\ \text { Assess }\end{array} & \begin{array}{l}\text { Nonperforming } \\ \text { Assets }\end{array} \\ \$ 101,149 & \$ 54,322 & \$ 92,272 & \$ 247,743 & \\ 49,033 & 49,511 & - & 98,544 & \\ (28,997 & ) & (1,602 & - & (30,599\end{array}\right)$

We foreclose on loans guaranteed by U.S. government agencies in accordance with agency guidelines. Generally these loans are not eligible for modification programs or have failed to comply with modified loan terms. Principal is guaranteed by agencies of the U.S. government, subject to limitations and credit risk is minimal. These properties will be conveyed to the agencies once applicable criteria have been met. During the third quarter of 2014, $\$ 13$ million of properties guaranteed by U.S. government agencies were foreclosed on and $\$ 16$ million of properties were conveyed to the applicable U.S. government agencies.

Nonaccruing loans totaled $\$ 97$ million or $0.71 \%$ of outstanding loans at September 30, 2014 and $\$ 97$ million or $0.72 \%$ of outstanding loans at June 30, 2014. Nonaccruing loans were largely unchanged compared to June 30, 2014. Newly identified nonaccruing loans totaled $\$ 19$ million for the third quarter of 2014. These loans were offset by $\$ 9$ million of payments, $\$ 7.4$ million of foreclosures and $\$ 2.6$ million of charge-offs.

## Commercial

Nonaccruing commercial loans totaled $\$ 16$ million or $0.19 \%$ of total commercial loans at September 30, 2014, compared to $\$ 17$ million or $0.20 \%$ of total commercial loans at June 30, 2014. Nonaccruing commercial loans decreased $\$ 699$ thousand in the third quarter of 2014. There were $\$ 494$ thousand in newly identified nonaccruing commercial loans, $\$ 1.1$ million in payments and $\$ 117$ thousand of charge-offs during the third quarter. There were no foreclosures of nonaccruing commercial loans during the third quarter.

Nonaccruing commercial loans at September 30, 2014 were primarily composed of $\$ 5.5$ million or $0.43 \%$ of total wholesale/retail sector loans, $\$ 3.6$ million or $0.14 \%$ of total services sector loans and $\$ 3.5$ million or $0.73 \%$ of total manufacturing sector loans. Over half of the balance of nonaccruing wholesale/retail sector loans was comprised of a single customer in the New Mexico market.
Commercial Real Estate
Nonaccruing commercial real estate loans totaled $\$ 31$ million or $1.13 \%$ of outstanding commercial real estate loans at September 30, 2014 compared to $\$ 34$ million or $1.30 \%$ of outstanding commercial real estate loans at June 30, 2014. Newly identified nonaccruing commercial real estate loans of $\$ 1.4$ million were offset by $\$ 4.4$ million of cash
payments received and $\$ 653$ thousand of foreclosures and $\$ 145$ thousand of charge-offs.
Nonaccruing commercial real estate loans continue to be largely concentrated in residential construction and land development loans, totaling $\$ 15$ million or $8.35 \%$ of residential construction and land development loans. Other commercial real estate loans totaled $\$ 8.5$ million or $2.20 \%$ of other commercial real estate loans.

- 36 -

## Residential Mortgage and Consumer

Nonaccruing residential mortgage loans totaled $\$ 49$ million or $2.47 \%$ of outstanding residential mortgage loans at September 30, 2014, compared to $\$ 44$ million or $2.21 \%$ of outstanding residential mortgage loans at June 30, 2014. Newly identified nonaccruing residential mortgage loans totaled $\$ 14.9$ million, offset by $\$ 3.0$ million of payments, $\$ 6.5$ million of foreclosures and $\$ 773$ thousand of loans charged off during the quarter.

Nonaccruing residential mortgage loans primarily consist of non-guaranteed permanent residential mortgage loans which totaled $\$ 35$ million or $3.55 \%$ of outstanding non-guaranteed permanent residential mortgage loans at September 30, 2014. Nonaccruing home equity loans totaled $\$ 9.9$ million or $1.26 \%$ of total home equity loans.

Payments of accruing residential mortgage loans and consumer loans may be delinquent. The composition of residential mortgage loans and consumer loans past due but still accruing is included in the following Table 20. Substantially all non-guaranteed residential loans past due 90 days or more are nonaccruing. Residential mortgage loans 30 to 89 days past due decreased $\$ 1.8$ million in the third quarter to $\$ 10$ million at September 30, 2014. Consumer loans past due 30 to 89 days decreased $\$ 196$ thousand over June 30, 2014.

${ }^{1}$ Excludes past due residential mortgage loans guaranteed by agencies of the U.S. government.

## Real Estate and Other Repossessed Assets

Real estate and other repossessed assets are assets acquired in partial or total forgiveness of loans. The assets are carried at the lower of cost as determined by fair value at date of foreclosure or current fair value, less estimated selling costs.

Real estate and other repossessed assets totaled $\$ 98$ million at September 30, 2014, a decrease of $\$ 2.2$ million compared to June 30, 2014. The distribution of real estate and other repossessed assets attributed by geographical market is included in Table 21 following.

## Liquidity and Capital

Subsidiary Bank
Deposits and borrowed funds are the primary sources of liquidity for the subsidiary bank. Based on the average balances for the third quarter of 2014, approximately $72 \%$ of our funding was provided by deposit accounts, $13 \%$ from borrowed funds, $1 \%$ from long-term subordinated debt and $12 \%$ from equity. Our funding sources, which primarily include deposits and borrowings from the Federal Home Loan Banks and other banks, provide adequate liquidity to meet our operating needs.

Deposit accounts represent our largest funding source. We compete for retail and commercial deposits by offering a broad range of products and services and focusing on customer convenience. Retail deposit growth is supported through our Perfect Banking sales and customer service program, free checking, online bill paying services, mobile banking services, an extensive network of branch locations and ATMs and a 24-hour Express Bank call center. Commercial deposit growth is supported by offering treasury management and lockbox services. We also acquire brokered deposits when the cost of funds is advantageous to other funding sources.

Average deposits for the third quarter of 2014 totaled $\$ 20.2$ billion and represented approximately $72 \%$ of total liabilities and capital compared with $\$ 20.5$ billion and $75 \%$ of total liabilities and capital for the second quarter of 2014. Average deposits decreased $\$ 270$ million over the second quarter of 2014. Average demand deposit balances increased $\$ 146$ million over the second quarter. Average interest-bearing transaction deposit accounts decreased $\$ 377$ million and and average time deposits decreased $\$ 26$ million.

Average Commercial Banking deposit balances decreased $\$ 74$ million compared to the second quarter of 2014. Treasury services customer balances decreased $\$ 275$ million and commercial real estate customer balances decreased $\$ 17$ million. Balances related to energy customers increased $\$ 123$ million and balances related to commercial \& industrial customers increased $\$ 44$ million. Healthcare customer balances increased $\$ 29$ million and small business customer balances increased $\$ 25$ million. Commercial customers continue to retain large cash reserves primarily due to low yields available on other high quality investment alternatives and to minimize deposit service charges through the earnings credit. The earnings credit is a non-cash method that enables commercial customers to offset deposit service charges based on account balances. These deposit account balances may decline due to future changes in economic conditions.

Average Consumer Banking deposit balances increased $\$ 31$ million. Demand deposit balances grew by $\$ 45$ million, interest-bearing transaction deposits were up $\$ 43$ million. This growth was partially offset by a $\$ 52$ million decrease in time deposits. Average Wealth Management deposits decreased $\$ 220$ million compared to the second quarter of 2014 primarily due to a $\$ 244$ million decrease in interest-bearing transaction deposit account balances, partially offset by a $\$ 34$ million increase in time deposit balances.

Brokered deposits included in time deposits averaged $\$ 233$ million for the third quarter of 2014, an increase of $\$ 32$ million over the second quarter of 2014. Average interest-bearing transaction accounts for the third quarter include $\$ 252$ million of brokered deposits, a decrease of $\$ 7.4$ million compared to the second quarter of 2014.

The distribution of our period end deposit account balances among principal markets follows in Table 22.
Table 22 -- Period End Deposits by Principal Market Area (In thousands)

In addition to deposits, subsidiary bank liquidity is provided primarily by federal funds purchased, securities repurchase agreements and Federal Home Loan Bank borrowings. Federal funds purchased consist primarily of unsecured, overnight funds acquired from other financial institutions. Funds are primarily purchased from bankers' banks and Federal Home Loan banks from across the country. The largest single source of federal funds purchased totaled $\$ 20$ million at September 30, 2014. Securities repurchase agreements generally mature within 90 days and are secured by certain available for sale securities. Federal Home Loan Bank borrowings are generally short term and are secured by a blanket pledge of eligible collateral (generally unencumbered U.S. Treasury and mortgage-backed securities, 1-4 family residential mortgage loans, multifamily and other qualifying commercial real estate loans). Amounts borrowed from the Federal Home Loan Bank of Topeka averaged $\$ 2.3$ billion during the quarter, up from $\$ 1.3$ billion during the second quarter of 2014.

At September 30, 2014, the estimated unused credit available to the subsidiary bank from collateralized sources was approximately $\$ 6.4$ billion.

A summary of other borrowings by the subsidiary bank follows in Table 23.

In 2007, the Company issued $\$ 250$ million of subordinated debt due May 15,2017 to fund the Worth National Bank and First United Bank acquisitions and fund continued asset growth. Interest on this debt was based on a fixed rate of $5.75 \%$ through May 14, 2012 which then converted to a floating rate of three-month LIBOR plus $0.69 \%$. At September 30, 2014, $\$ 227$ million of this subordinated debt remains outstanding. In 2005, the Bank issued $\$ 150$ million of 10 -year, fixed rate subordinated debt. The cost of this subordinated debt, including issuance discounts and hedge loss is $5.56 \%$. The proceeds of this debt were used to repay $\$ 95$ million of BOK Financial's unsecured revolving line of credit and to provide additional capital to support asset growth. At September 30, 2014, \$122 million of this subordinated debt remains outstanding.
The Bank also has a liability related to the repurchase of certain delinquent residential mortgage loans previously sold in GNMA mortgage pools. Interest is payable monthly at rates contractually due to investors.

## Parent Company

The primary sources of liquidity for BOK Financial are cash on hand and dividends from the subsidiary bank. Dividends from the subsidiary bank are limited by various banking regulations to net profits, as defined, for the year plus retained profits for the two preceding years. Dividends are further restricted by minimum capital requirements. At September 30, 2014, based on the most restrictive limitations as well as management's internal capital policy, the subsidiary bank could declare up to $\$ 214$ million of dividends without regulatory approval. Future losses or increases
in required regulatory capital at the subsidiary bank could affect its ability to pay dividends to the parent company.

- 42 -

The Company has a $\$ 100$ million senior unsecured 364 day revolving credit facility with Wells Fargo Bank, National Association, administrative agent and other commercial banks ("the Credit Facility"). Interest on amounts outstanding under the Credit Facility is to be paid at a defined base rate minus $1.25 \%$ or LIBOR plus $1.00 \%$ based upon the Company's option. Interest on amounts borrowed for certain acquisitions converted to a term loan at the Company's option is to be paid at a defined base rate minus $1.25 \%$ or LIBOR plus $1.25 \%$. A commitment fee equal to $0.20 \%$ shall be paid quarterly on the unused portion of the credit commitment under the Credit Facility and there are no prepayment penalties. Any amounts outstanding at the end of the Credit Facility term shall be converted into a term loan which, except for amounts borrowed for certain acquisitions, shall be payable June 5, 2015. The Credit Agreement contains customary representations and warranties, as well as affirmative and negative covenants including limits on the Company's ability to borrow additional funds, make investments and sell assets. These covenants also require BOKF to maintain minimum capital levels. No amounts were outstanding under the Credit Facility at September 30, 2014 and the Company met all of the covenants.

Our equity capital at September 30, 2014 was $\$ 3.3$ billion, an increase of $\$ 30$ million over June 30, 2014. Net income less cash dividends paid increased equity $\$ 48$ million during the third quarter of 2014 and accumulated other comprehensive income decreased $\$ 26$ million primarily related to the change in unrealized gains on available for sale securities due to changes in interest rates. Capital is managed to maximize long-term value to the shareholders. Factors considered in managing capital include projections of future earnings, asset growth and acquisition strategies, and regulatory and debt covenant requirements. Capital management may include subordinated debt issuance, share repurchase and stock and cash dividends.

On April 24, 2012, the Board of Directors authorized the Company to purchase up to two million shares of our common stock. The specific timing and amount of shares repurchased will vary based on market conditions, regulatory limitations and other factors. Repurchases may be made over time in open market or privately negotiated transactions. The repurchase program may be suspended or discontinued at any time without prior notice. As of September 30, 2014, the Company has repurchased 39,496 shares for $\$ 2.1$ million under this program. No shares were repurchased in the third quarter of 2014.

BOK Financial and the subsidiary bank are subject to various capital requirements administered by federal agencies. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that could have a material impact on operations. These capital requirements include quantitative measures of assets, liabilities and off-balance sheet items. The capital standards are also subject to qualitative judgments by the regulators.

For a banking institution to qualify as well capitalized, its Tier 1, Total and Leverage capital ratios must be at least $6 \%, 10 \%$ and $5 \%$, respectively. The Company's banking subsidiary exceeded the regulatory definitions of well capitalized. The capital ratios for BOK Financial on a consolidated basis are presented in Table 24.

Table 24 -- Capital Ratios

In July 2013, banking regulators issued the final rule revising regulatory capital rules for substantially all U.S. banking organizations. The new capital rule will be effective for BOK Financial on January 1, 2015. Components of the rule will phase in through January 1, 2019. The new capital rule establishes a $7 \%$ threshold for the Tier 1 common equity ratio consisting of a minimum level plus capital conservation buffer. The Company expects to exclude unrealized gains and losses from available for sale securities from its calculation of Tier 1 capital, consistent with the treatment under current capital rules. BOK Financial's Tier 1 common equity ratio based on the existing capital rules was $13.54 \%$ as of September 30, 2014. Based on our interpretation of the new capital rule, our estimated Tier 1 common equity ratio on a fully phased-in basis would be $12.60 \%$, nearly 560 basis points above the $7 \%$ regulatory threshold.

- 43 -

The rule also changes both the Tier 1 risk based capital requirements and the total risk based requirements to a minimum of $6 \%$ and $8 \%$, respectively, plus a capital conservation buffer of $2.5 \%$ totaling $8.5 \%$ and $10.5 \%$, respectively. The leverage ratio requirement under the rule is $4 \%$. A bank which falls below these levels, including the capital conservation buffer, would be subject to regulatory restrictions on capital distributions (including but not limited to dividends and share repurchases) and executive bonus payments.

Capital resources of financial institutions are also regularly measured by the tangible common shareholders' equity ratio. Tangible common shareholders' equity is shareholders' equity as defined by generally accepted accounting principles in the United States of America ("GAAP") less intangible assets and equity which does not benefit common shareholders. Equity that does not benefit common shareholders includes preferred equity. This non-GAAP measure is a valuable indicator of a financial institution's capital strength since it eliminates intangible assets from shareholders' equity and retains the effect of unrealized losses on securities and other components of accumulated other comprehensive income in shareholders' equity.

In accordance with the Dodd-Frank Act, the Federal Reserve must publish regulations that require bank holding companies with $\$ 10$ billion to $\$ 50$ billion in assets to perform annual capital stress tests. The requirements for annual capital stress tests became effective for the Company in the fourth quarter of 2013. Existing regulations indicate that results will be made public in June of 2015. The resulting capital stress test process may place constraints on capital distributions or increases in required regulatory capital under certain circumstances.

Table 25 provides a reconciliation of the non-GAAP measures with financial measures defined by GAAP.

## Market Risk

Market risk is a broad term for the risk of economic loss due to adverse changes in the fair value of a financial instrument. These changes may be the result of various factors, including interest rates, foreign exchange rates, commodity prices or equity prices. Financial instruments that are subject to market risk can be classified either as held for trading or held for purposes other than trading. Market risk excludes changes in fair value due to credit of the individual issuers of financial instruments.

BOK Financial is subject to market risk primarily through the effect of changes in interest rates on both its assets held for purposes other than trading and trading assets. The effects of other changes, such as foreign exchange rates, commodity prices or equity prices do not pose significant market risk to BOK Financial. BOK Financial has no material investments in assets that are affected by changes in foreign exchange rates or equity prices. Energy and agricultural product derivative contracts, which are affected by changes in commodity prices, are matched against offsetting contracts as previously discussed.

The Asset/Liability Committee is responsible for managing market risk in accordance with policy guidelines established by the Board of Directors. The Committee monitors projected variation in net interest revenue, net income and economic value of equity due to specified changes in interest rates. The internal policy limit for net interest revenue variation is a maximum decline of $5 \%$ to an up or down 200 basis point change over twelve months. These guidelines also set maximum levels for short-term borrowings, short-term assets, public funds and brokered deposits and establish minimum levels for unpledged assets, among other things. Compliance with these internal guidelines is reviewed monthly.
Interest Rate Risk - Other than Trading
As previously noted in the Net Interest Revenue section of this report, management has implemented strategies to manage the Company's balance sheet to have relatively limited exposure to changes in interest rates over a twelve-month period. The effectiveness of these strategies in managing the overall interest rate risk is evaluated through the use of an asset/liability model. BOK Financial performs a sensitivity analysis to identify more dynamic interest rate risk exposures, including embedded option positions on net interest revenue, net income and economic value of equity. A simulation model is used to estimate the effect of changes in interest rates on the Company's performance across multiple interest rate scenarios. While the current internal policy limit for net interest revenue variation is a maximum decline of $5 \%$ or 200 basis points change over twelve months, the results of a 200 basis point decrease in interest rates in the current low-rate environment are not meaningful. We report the effect of a 50 basis point decrease in the interim.

The Company's primary interest rate exposures include the Federal Funds rate, which affects short-term borrowings, and the prime lending rate and LIBOR, which are the basis for much of the variable rate loan pricing. Additionally, residential mortgage rates directly affect the prepayment speeds for residential mortgage-backed securities and mortgage servicing rights. Derivative financial instruments and other financial instruments used for purposes other than trading are included in this simulation. In addition, the impact on the level and composition of DDA and other core deposit balances resulting from a significant increase in short-term market interest rates and the overall interest rate environment is likely to be material. The simulation incorporates assumptions regarding the effects of such changes based on a combination of historical analysis and expected behavior. The impact of planned growth and new business activities is factored into the simulation model. The effects of changes in interest rates on the value of mortgage servicing rights are excluded from Table 26 due to the extreme volatility over such a large rate range and our active risk management approach for that asset. The effects of interest rate changes on the value of mortgage servicing rights and financial instruments identified as economic hedges are presented in Note 6 to the Consolidated Financial Statements.

## Edgar Filing: BOK FINANCIAL CORP ET AL - Form 10-Q

The simulations used to manage market risk are based on numerous assumptions regarding the effects of changes in interest rates on the timing and extent of re-pricing characteristics, future cash flows and customer behavior. These assumptions are inherently uncertain and, as a result, the model cannot precisely estimate net interest revenue, net income or economic value of equity or precisely predict the impact of higher or lower interest rates on net interest revenue, net income or economic value of equity. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes, market conditions and management strategies, among other factors.

## Trading Activities

BOK Financial enters into trading activities both as an intermediary for customers and for its own account. As an intermediary, BOK Financial will take positions in securities, generally residential mortgage-backed securities, government agency securities and municipal bonds. These securities are purchased for resale to customers, which include individuals, corporations, foundations and financial institutions. On a limited basis, BOK Financial may also take trading positions in U.S. Treasury securities, residential mortgage-backed securities and municipal bonds to enhance returns on its securities portfolios. Both of these activities involve interest rate risk. BOK Financial has an insignificant exposure to foreign exchange risk and does not take positions in commodity derivatives.

A variety of methods are used to manage the interest rate risk of trading activities. These methods include daily marking of all positions to market value, independent verification of inventory pricing, and position limits for each trading activity. Hedges in either the futures or cash markets may be used to reduce the risk associated with some trading programs.

Management uses a Value at Risk ("VaR") methodology to measure market risk due to changes in interest rates inherent in its trading activities. VaR is calculated based upon historical simulations over the past five years using a variance/covariance matrix of interest rate changes, a 10 business day holding period and a $99 \%$ confidence interval. It represents an amount of market loss that is likely to be exceeded in only one out of every 100 two-week periods. Trading positions are managed within guidelines approved by the Board of Directors. These guidelines limit the VaR to $\$ 7.3$ million. There were no instances of VaR being exceeded during the three months ended September 30, 2014 and 2013. At September 30, 2014, there were no trading positions for the purposes of enhancing returns on the Company's securities portfolio.

The average, high and low VaR amounts for three months ended September 30, 2014 and September 30, 2013 are as follows in Table 27.

Table 27 -- Value at Risk (VaR)

## Controls and Procedures

As required by Rule 13a-15(b), BOK Financial's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by their report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report. As required by Rule 13a-15(d), BOK Financial's management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of the Company's internal controls over financial reporting to determine whether any changes occurred during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting. Based on that evaluation, there has been no such change during the quarter covered by this report.
Forward-Looking Statements
This report contains forward-looking statements that are based on management's beliefs, assumptions, current expectations, estimates, and projections about BOK Financial, the financial services industry and the economy in general. Words such as "anticipates," "believes," "estimates," "expects," "forecasts," "plans," "projects," variations of such wo and similar expressions are intended to identify such forward-looking statements. Management judgments relating to and discussion of the provision and allowance for loan losses involve judgments as to expected events and are inherently forward-looking statements. Assessments that BOK Financial's acquisitions and other growth endeavors will be profitable are necessary statements of belief as to the outcome of future events, based in part on information provided by others that BOK Financial has not independently verified. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what is expressed, implied, or forecasted in such forward-looking statements. Internal and external factors that might cause such a difference include, but are not limited to: (1) the ability to fully realize expected cost savings from mergers within the expected time frames, (2) the ability of other companies on which BOK Financial relies to provide goods and services in a timely and accurate manner, (3) changes in interest rates and interest rate relationships, (4) demand for products and services, (5) the degree of competition by traditional and nontraditional competitors, (6) changes in banking regulations, tax laws, prices, levies, and assessments, (7) the impact of technological advances and (8) trends in customer behavior as well as their ability to repay loans. BOK Financial and its affiliates undertake no obligation to update, amend, or clarify forward-looking statements, whether as a result of new information, future events or otherwise.

Notes to Consolidated Financial Statements (Unaudited)
(1) Significant Accounting Policies

Basis of Presentation
The accompanying unaudited condensed consolidated financial statements of BOK Financial Corporation ("BOK Financial" or "the Company") have been prepared in accordance with accounting principles for interim financial information generally accepted in the United States and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

The unaudited consolidated financial statements include accounts of BOK Financial and its subsidiaries, principally BOKF, NA ("the Bank"), BOSC, Inc., The Milestone Group, Inc. and Cavanal Hill Investment Management Inc. Operating divisions of the Bank include Bank of Albuquerque, Bank of Arizona, Bank of Arkansas, Bank of Oklahoma, Bank of Texas, Colorado State Bank and Trust, Bank of Kansas City, BOK Financial Mortgage and the TransFund electronic funds network.

Certain reclassifications have been made to conform to the current period presentation.
The financial information should be read in conjunction with BOK Financial's 2013 Form 10-K filed with the Securities and Exchange Commission, which contains audited financial statements. Amounts presented as of December 31, 2013 have been derived from the audited financial statements included in BOK Financial's 2013 Form $10-\mathrm{K}$ but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Operating results for the nine-month period ended September 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

Newly Adopted and Pending Accounting Policies
Financial Accounting Standards Board ("FASB")
FASB Accounting Standards Update No. 2013-08, Financial Services - Investment Companies (Topic 946): Amendments to the Scope, Measurement, and Disclosure Requirements ("ASU 2013-08")

On June 7, 2013, the FASB issued ASU 2013-08 which amends the criteria an entity would need to meet to qualify as an investment company under ASC 946, Financial Services - Investment Companies. ASU 2013-08 also provides additional implementation guidance for the assessment and requires additional disclosures. ASU 2013-08 was effective prospectively during interim and annual periods beginning after December 15, 2013, with early adoption prohibited. The adoption of ASU 2013-08 did not have a material impact on the Company's consolidated financial statements.

FASB Accounting Standards Update No. 2014-01, Accounting for Investments in Qualified Affordable Housing Projects ("ASU 2014-01")

On January 15, 2014, the FASB issued ASU 2014-01 to simplify the amortization method an entity uses and modify the criteria to elect a measurement and presentation alternative, including the simplified amortization method, for certain investments in qualified affordable housing projects. This alternative permits the entity to present the investment's performance net of the related tax benefits as part of income tax expense. ASU 2014-01 is effective for
the Company for interim and annual periods beginning after December 15, 2014. Early adoption is permitted. Adoption of ASU 2014-01 may affect income statement presentation, but otherwise is not expected to have a material impact on the Company's consolidated financial statements.

FASB Accounting Standards Update No. 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure ("ASU 2014-04")

On January 17, 2014, the FASB issued ASU 2014-04 to clarify when an entity is considered to have obtained physical possession (from an in-substance possession or foreclosure) of a residential real estate property collateralizing a mortgage loan. Upon physical possession of such real property, an entity is required to reclassify the nonperforming mortgage loan to other real estate owned. ASU 2014-04 is effective for the Company for interim and annual periods beginning after December 15, 2014. Early adoption is permitted. Adoption of ASU 2014-04 is not expected to have a material impact on the Company's consolidated financial statements.

FASB Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers ("ASU 2014-09")
On May 28, 2014, the FASB issued ASU 2014-09 to clarify the principles for recognizing revenue by providing a more robust framework that will give greater consistency and comparability in revenue recognition practices. In the new framework, an entity recognizes revenue in an amount that reflects the consideration to which the entity expects to be entitled in exchange for goods or services. The new model requires the identification of performance obligations included in contracts with customers, a determination of the transaction price and an allocation of the price to those performance obligations. The entity recognizes revenue when performance obligations are satisfied. ASU 2014-09 is effective for the Company for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company is evaluating the impact the adoption of ASU 2014-09 will have on the Company's financial statements.

FASB Accounting Standards Update No. 2014-14, Classification of Certain Government-Guaranteed Mortgage Loans Upon Foreclosure ("ASU 2014-14")

On August 8, 2014, the FASB issued ASU 2014-14 to give greater consistency in the classification of government-guaranteed loans upon foreclosure. ASU 2014-14 applies to all loans that contain a government guarantee that is not separable from the loan or for which the creditor has both the intent and ability to recover a fixed amount under the guarantee by conveying the property to the guarantor. Upon foreclosure, the creditor should reclassify the mortgage loan to an other receivable that is separate from loans and should measure the receivable at the amount of the loan balance expected to be recovered from the guarantor. ASU 2014-14 is effective for the Company for interim and annual periods beginning after December 15, 2014. Early adoption is permitted if the entity has already adopted ASU 2014-14. As of September 30, 2014, approximately $\$ 47$ million of real estate and other repossessed assets is expected to be reclassified from Real estate and other repossessed assets to Receivables on the balance sheet with adoption of ASC 2014-14.

Carrying value includes $\$ 2.3$ million of net unrealized gain which remains in Accumulated other comprehensive
${ }^{1}$ income ("AOCI") in the Consolidated Balance Sheets related to certain securities transferred from the Available for Sale securities portfolio to the Investment securities portfolio as discussed in greater detail following.
${ }^{2}$ Gross unrealized gains and losses are not recognized in AOCI in the Consolidated Balance Sheets.
During the three months ended September 30, 2011, the Company transferred certain U.S. government agency residential mortgage-backed securities from the available for sale portfolio to the investment securities (held-to-maturity) portfolio as the Company has the positive intent and ability to hold these securities to maturity. No gains or losses were recognized in the Consolidated Statement of Earnings at the time of the transfer. Transfers of debt securities into the investment securities portfolio (held-to-maturity) are made at fair value at the date of transfer. The unrealized holding gain or loss at the date of transfer is retained in accumulated other comprehensive income and in the carrying value of the investment securities portfolio. Such amounts are amortized over the estimated remaining life of the security as an adjustment to yield, offsetting the related amortization of the premium or accretion of the
discount on the transferred securities. At the time of transfer, the fair value totaled $\$ 131$ million, amortized cost totaled $\$ 118$ million and the pretax unrealized gain totaled $\$ 13$ million.

- 55 -

The amortized cost and fair values of investment securities at September 30, 2014, by contractual maturity, are as shown in the following table (dollars in thousands):

${ }^{1}$ Calculated on a taxable equivalent basis using a $39 \%$ effective tax rate.
2 The average expected lives of mortgage-backed securities were 3.5 years based upon current prepayment assumptions.
${ }^{3}$ Primarily common stock and preferred stock of corporate issuers with no stated maturity. The nominal yield on mortgage-backed securities is based upon prepayment assumptions at the purchase 4 date. Actual yields earned may differ significantly based upon actual prepayments. See Quarterly Financial Summary - Unaudited following for current yields on available for sale securities portfolio.

Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without penalty.
${ }_{6}$ Nominal yield on municipal and other tax-exempt securities and other debt securities with contractual maturity dates over ten years are based on variable rates which generally are reset within 35 days.

On a quarterly basis, the Company performs separate evaluations of impaired debt and equity investments and available for sale securities to determine if the unrealized losses are temporary.

- 63 -

For debt securities, management determines whether it intends to sell or if it is more-likely-than-not that it will be required to sell impaired securities. This determination considers current and forecasted liquidity requirements, regulatory and capital requirements and securities portfolio management. Based on this evaluation as of September 30, 2014, the Company does not intend to sell any impaired available for sale securities before fair value recovers to the current amortized cost and it is more-likely-than-not that the Company will not be required to sell impaired securities before fair value recovers, which may be maturity.

Impairment of debt securities rated investment grade by all nationally-recognized rating agencies is considered temporary unless specific contrary information is identified. None of the debt securities rated investment grade were considered to be other-than-temporarily impaired at September 30, 2014.

- 64 -

At September 30, 2014, the composition of the Company's investment and available for sale securities portfolios by the lowest current credit rating assigned by any of the three nationally-recognized rating agencies is as follows (in thousands):

securities
guaranteed by
U.S. government agencies

| Other debt securities | - | - | 4,400 | 4,150 | 30,070 | 30,141 | - | - | - | - | 34,4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

U.S. government and government sponsored enterprises are not rated by the nationally-recognized rating agencies as these securities are guaranteed by agencies of the U.S. government or government-sponsored enterprises.

- 65 -

At September 30, 2014, the entire portfolio of privately issued residential mortgage-backed securities was rated below investment grade. The gross unrealized loss on these securities totaled $\$ 427$ thousand. Ratings by the nationally-recognized rating agencies are subjective in nature and accordingly ratings can vary significantly amongst the agencies. Limitations generally expressed by the rating agencies include statements that ratings do not predict the specific percentage default likelihood over any given period of time and that ratings do not opine on expected loss severity of an obligation should the issuer default. As such, the impairment of securities rated below investment grade was evaluated to determine if we expect not to recover the entire amortized cost basis of the security. This evaluation was based on projections of estimated cash flows based on individual loans underlying each security using current and anticipated increases in unemployment and default rates, decreases in housing prices and estimated liquidation costs at foreclosure.

The primary assumptions used in this evaluation were:

|  | $\begin{aligned} & \text { September 30, } \\ & 2014 \end{aligned}$ | $\begin{aligned} & \text { December 31, } \\ & 2013 \end{aligned}$ | $\begin{aligned} & \text { September 30, } \\ & 2013 \end{aligned}$ |
| :---: | :---: | :---: | :---: |

${ }^{1}$ Federal Housing Finance Agency
We also consider the current loan-to-value ratio and remaining credit enhancement as part of the assessment of the cash flows available to recover the amortized cost of the debt securities. Each factor is considered in the evaluation.

The Company calculates the current loan-to-value ratio for each mortgage-backed security using loan-level data. The current loan-to-value ratio is the current outstanding loan amount divided by an estimate of the current home value. The current home value is derived from FHFA data. FHFA provides historical information on home price depreciation at both the Metropolitan Statistical Area and state level. This information is matched to each loan to estimate the home price depreciation. Data is accumulated from the loan level to determine the current loan-to-value ratio for the security as a whole.

Remaining credit enhancement is the amount of credit enhancement available to absorb current projected losses within the pool of loans that support the security. The Company acquires the benefit of credit enhancement by investing in senior or super-senior tranches for many of our residential mortgage-backed securities. Subordinated tranches held by other investors are specifically designed to absorb losses before the senior or super-senior tranches, which effectively increases the typical credit support for these types of bonds. Current projected losses consider depreciation of home prices based on FHFA data, estimated costs and additional losses to liquidate collateral and delinquency status of the individual loans underlying the security.

Credit loss impairment is recorded as a charge to earnings. Additional impairment based on the difference between the total unrealized loss and the estimated credit loss on these securities is charged against other comprehensive income, net of deferred taxes. No credit loss impairments were recognized in earnings on privately issued residential mortgage-backed securities during the three months ended September 30, 2014.

- 66 -

A distribution of the amortized cost (after recognition of the other-than-temporary impairment), fair value and credit loss impairments recognized on our privately issued residential mortgage-backed securities is as follows (in thousands, except for number of securities):

|  |  |  |  | September 30, 2014Number of Amount |  | Life-to-date |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number of Securities | Amortized Cost | Fair Value |  |  | Number of Securities | Amount |
| Alt-A | 14 | \$68,493 | \$73,405 | - | \$- | 14 | \$36,127 |
| Jumbo-A | 30 | 92,831 | 98,088 | - | - | 29 | 18,220 |
| Total | 44 | \$161,324 | \$ 171,493 | - | \$- | 43 | \$54,347 |

Impaired equity securities, including perpetual preferred stocks, are evaluated based on management's ability and intent to hold the securities until fair value recovers over periods not to exceed three years. The assessment of the ability and intent to hold these securities focuses on the liquidity needs, asset/liability management objectives and securities portfolio objectives. Factors considered when assessing recovery include forecasts of general economic conditions and specific performance of the issuer, analyst ratings and credit spreads for preferred stocks which have debt-like characteristics. The Company has evaluated the near-term prospects of the investments in relation to the severity and duration of the impairment and based on that evaluation has the ability and intent to hold these investments until a recovery in fair value. Accordingly, all impairment of equity securities was considered temporary at September 30, 2014.

The following is a tabular roll forward of the amount of credit-related OTTI recognized on available for sale debt securities in earnings (in thousands):

|  | Three Months Ended September 30, |  | Nine Months Ended September 30, |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 2014 | 2013 | 2014 | 2013 |
| Balance of credit-related OTTI recognized on available for sale debt, beginning of period | \$54,347 | \$76,027 | \$67,346 | \$75,228 |
| Additions for credit-related OTTI not previously recognized | - | 67 | - | 619 |
| Additions for increases in credit-related OTTI previously recognized when there is no intent to sell and no requirement to sell before recovery of amortized cost | - | 73 | - | 320 |
| Reductions for change in intent to hold before recovery | - | (3,589 | ) - | (3,589 |
| Sales | - | (5,232 | ) (12,999 | (5,232 |
| Balance of credit-related OTTI recognized on available for sale debt securities, end of period | \$54,347 | \$67,346 | \$54,347 | \$67,346 |

Additions above exclude other-than-temporary impairment recorded due to change in intent to hold before recovery.

## Fair Value Option Securities

Fair value option securities represent securities which the Company has elected to carry at fair value and are separately identified on the Consolidated Balance Sheets. Changes in the fair value are recognized in earnings as they occur. Certain residential mortgage-backed securities issued by U.S. government agencies and derivative contracts are held as an economic hedge of the mortgage servicing rights. In addition, certain corporate debt securities are economically hedged by derivative contracts to manage interest rate risk. Derivative contracts that have not been designated as hedging instruments effectively modify these fixed rate securities into variable rate securities.

The fair value and net unrealized gain (loss) included in fair value option securities is as follows (in thousands):

|  | September 30, 2014 |  | December 31, 2013 |  | September 30, 2013 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Net |  | Net |  | Net |
|  | Fair Value | Unrealized Gain (Loss) | Fair Value | Unrealized Gain (Loss) | Value | Unrealized Gain (Loss) |
| U.S. agency residential mortgage-backed securities | \$175,761 | \$(2,061 ) | \$157,431 | \$(8,378 ) | \$163,567 | \$(5,365 |
| Other securities | - | - | 9,694 | 209 | 4,293 | 1 |
| Total | \$ 175,761 | \$(2,061 ) | \$ 167,125 | \$ 8,169 | \$ 167,860 | \$(5,364 |

## Restricted Equity Securities

Restricted equity securities include stock we are required to hold as members of the Federal Reserve system and the Federal Home Loan Banks ("FHLB"). Restricted equity securities are carried at cost as these securities do not have a readily determined fair value because ownership of these shares are restricted and lacks a market. A summary of restricted equity securities follows (in thousands):

Federal Reserve stock
Federal Home Loan Bank stock
Total

| September 30, | December 31, | September 30, |
| :--- | :--- | :--- |
| 2014 | 2013 | 2013 |
| $\$ 33,971$ | $\$ 33,742$ | $\$ 33,695$ |
| 155,616 | 51,498 | 91,845 |
| $\$ 189,587$ | $\$ 85,240$ | $\$ 125,540$ |

- 68 -
(3) Derivatives

Derivative instruments may be used by the Company as part of its interest rate risk management programs or may be offered to customers. All derivative instruments are carried at fair value and changes in fair value are reported in earnings as they occur. Credit risk is also considered in determining fair value.

When bilateral netting agreements or similar arrangements exist between the Company and its counterparties that create a single legal claim or obligation to pay or receive the net amount in settlement of the individual derivative contracts, the Company reports derivative assets and liabilities on a net by derivative contract type by counterparty basis.

Derivative contracts may require the Company to provide or receive cash margin as collateral for derivative assets and liabilities. Derivative assets and liabilities are reported net of cash margin when certain conditions are met. In addition, derivative contracts executed with customers under Customer Risk Management Programs may be secured by non-cash collateral in conjunction with a credit agreement with that customer. Access to collateral, in the event of default is reasonably assured. As of September 30, 2014, a decrease in BOK Financial's credit rating to below investment grade would increase our obligation to post cash margin on existing contracts by approximately $\$ 19$ million.

None of these derivative contracts have been designated as hedging instruments.

## Customer Risk Management Programs

BOK Financial offers programs to permit its customers to manage various risks, including fluctuations in energy, cattle and other agricultural products, and foreign exchange rates, or to take positions in derivative contracts. Customers may also manage interest rate risk through interest rate swaps used by borrowers to modify interest rate terms of their loans or to-be-announced securities used by mortgage banking customers to hedge their loan production. Derivative contracts are executed between the customers and BOK Financial. Offsetting contracts are executed between BOK Financial and other selected counterparties to minimize the risk of changes in commodity prices, interest rates or foreign exchange rates. The counterparty contracts are identical to customer contracts, except for a fixed pricing spread or fee paid to BOK Financial as profit and compensation for administrative costs and credit risk which is recognized over the life of the contracts and included in other operating revenue - brokerage and trading revenue in the Consolidated Statements of Earnings.

## Interest Rate Risk Management Programs

BOK Financial may use derivative contracts in managing its interest rate sensitivity and as part of its economic hedge of the change in the fair value of mortgage servicing rights. Interest rate swaps are generally used to reduce overall asset sensitivity by converting specific fixed-rate liabilities to floating-rate based on LIBOR. As of September 30, 2014, BOK Financial had interest rate swaps with a notional value of $\$ 47$ million used as part of the economic hedge of the change in the fair value of the mortgage servicing rights.

As discussed in Note 6, certain derivative contracts not designated as hedging instruments related to mortgage loan commitments and forward sales contracts are included in Residential mortgage loans held for sale on the Consolidated Balance Sheets. See Note 6 for additional discussion of notional, fair value and impact on earnings of these contracts. Forward sales contracts are not considered swaps under the Commodity and Futures Trading Commission final rules.

The following table summarizes the fair values of derivative contracts recorded as "derivative contracts" assets and liabilities in the balance sheet at September 30, 2014 (in thousands):

- 73 -
(4) Loans and Allowances for Credit Losses

Loans
Loans are either secured or unsecured based on the type of loan and the financial condition of the borrower. Repayment is generally expected from cash flow or proceeds from the sale of selected assets of the borrower. BOK Financial is exposed to risk of loss on loans due to the borrower's difficulties, which may arise from any number of factors, including problems within the respective industry or local economic conditions. Access to collateral, in the event of borrower default, is reasonably assured through adherence to applicable lending laws and through sound lending standards and credit review procedures. Accounting policies for all loans, excluding residential mortgage loans guaranteed by U.S. government agencies, are as follows.

Interest is accrued at the applicable interest rate on the principal amount outstanding. Loans are placed on nonaccruing status when, in the opinion of management, full collection of principal or interest is uncertain. Internally risk graded loans are individually evaluated for nonaccruing status quarterly. Non-risk graded loans are generally placed on nonaccruing status when more than 90 days past due or within 60 days of being notified of the borrower's bankruptcy filing. Interest previously accrued but not collected is charged against interest income when the loan is placed on nonaccruing status. Payments on nonaccruing loans are applied to principal or recognized as interest income, according to management's judgment as to the collectability of principal. Loans may be returned to accruing status when, in the opinion of management, full collection of principal and interest, including principal previously charged off, is probable based on improvements in the borrower's financial condition or a sustained period of performance.

Loans to borrowers experiencing financial difficulties may be modified in troubled debt restructurings ("TDRs"). All TDRs are classified as nonaccruing. Modifications generally consist of extension of payment terms or interest rate concessions and may result either voluntarily through negotiations with the borrower or involuntarily through court order. Generally, principal and accrued but unpaid interest is not voluntarily forgiven.

Performing loans may be renewed under the current collateral value, debt service ratio and other underwriting standards. Nonaccruing loans may be renewed and will remain classified as nonaccruing.

All loans are charged off when the loan balance or a portion of the loan balance is no longer supported by the paying capacity of the borrower or when the required cash flow is reduced in a TDR. The charge-off amount is determined through a quarterly evaluation of available cash resources and collateral value and charge-offs are taken in the quarter in which the loss is identified. Non-risk graded loans that are past due between 60 and 180 days, based on the loan product type, are charged off. Loans to borrowers whose personal obligation has been discharged through Chapter 7 bankruptcy proceedings are charged off within 60 days of notice of the bankruptcy filing, regardless of payment status.

Loan origination and commitment fees and direct loan acquisition and origination costs are deferred and amortized as an adjustment to yield over the life of the loan or over the commitment period, as applicable.

Qualifying residential mortgage loans guaranteed by U.S. government agencies have been sold into GNMA pools. Under certain performance conditions specified in government programs, the Company may have the right, but not the obligation to repurchase loans from GNMA pools. These loans no longer qualify for sale accounting and are recognized in the Consolidated Balance Sheets. Guaranteed loans are considered impaired because we do not expect to receive all principal and interest based on the loan's contractual terms. The principal balance continues to be guaranteed; however, interest accrues at a curtailed rate as specified in the programs. The carrying value of these loans is reduced based on an estimate of the expected cash flows discounted at the original note rate plus a liquidity spread. Guaranteed loans may be modified in TDRs in accordance with U.S. government agency guidelines. Interest
continues to accrue based on the modified rate. Guaranteed loans may either be resold into GNMA pools after a performance period specified by the programs or foreclosed and conveyed to the guarantors.

Loans are disaggregated into portfolio segments and further disaggregated into classes. The portfolio segment is the level at which the Company develops and documents a systematic method for determining its allowance for credit losses. Classes are a further disaggregation of portfolio segments based on the risk characteristics of the loans and the Company's method for monitoring and assessing credit risk.

Total
Accruing loans past due ( 90 days) ${ }^{1}$
${ }^{1}$ Excludes residential mortgage loans guaranteed by agencies of the U.S. government

At September 30, 2014, $\$ 4.6$ billion or $34 \%$ of our total loan portfolio is to businesses and individuals attributed to the Texas market and $\$ 3.4$ billion or $25 \%$ of the total loan portfolio is to businesses and individuals attributed to the Oklahoma market. These geographic concentrations subject the loan portfolio to the general economic conditions within these areas.

## Commercial

Commercial loans represent loans for working capital, facilities acquisition or expansion, purchases of equipment and other needs of commercial customers primarily located within our geographical footprint. Commercial loans are underwritten individually and represent on-going relationships based on a thorough knowledge of the customer, the customer's industry and market. While commercial loans are generally secured by the customer's assets including real property, inventory, accounts receivable, operating equipment, interest in mineral rights and other property and may also include personal guarantees of the owners and related parties, the primary source of repayment of the loans is the on-going cash flow from operations of the customer's business. Inherent lending risk is centrally monitored on a continuous basis from underwriting throughout the life of the loan for compliance with commercial lending policies.

At September 30, 2014, commercial loans attributed to the Texas market totaled $\$ 2.9$ billion or $34 \%$ of the commercial loan portfolio segment and commercial loans attributed to the Oklahoma market totaled $\$ 2.0$ billion or $24 \%$ of the commercial loan portfolio segment.

The commercial loan portfolio segment is further divided into loan classes. The energy loan class totaled $\$ 2.6$ billion or $19 \%$ of total loans at September 30, 2014, including $\$ 2.2$ billion of outstanding loans to energy producers. Approximately $59 \%$ of committed production loans are secured by properties primarily producing oil and $41 \%$ are
secured by properties producing natural gas. The services loan class totaled $\$ 2.5$ billion at September 30, 2014. Approximately $\$ 1.2$ billion of loans in the services category consist of loans with individual balances of less than $\$ 10$ million. Businesses included in the services class include gaming, educational, public finance, insurance and community foundations.

- 75 -

## Commercial Real Estate

Commercial real estate loans are for the construction of buildings or other improvements to real estate and property held by borrowers for investment purposes primarily within our geographical footprint. We require collateral values in excess of the loan amounts, demonstrated cash flows in excess of expected debt service requirements, equity investment in the project and a portion of the project already sold, leased or permanent financing already secured. The expected cash flows from all significant new or renewed income producing property commitments are stress tested to reflect the risks in varying interest rates, vacancy rates and rental rates. As with commercial loans, inherent lending risks are centrally monitored on a continuous basis from underwriting throughout the life of the loan for compliance with applicable lending policies.

At September 30, 2014, 35\% of commercial real estate loans are secured by properties primarily located in the Dallas and Houston areas of Texas. An additional $16 \%$ of commercial real estate loans are secured by properties located primarily in the Tulsa and Oklahoma City metropolitan areas of Oklahoma.

## Residential Mortgage and Consumer

Residential mortgage loans provide funds for our customers to purchase or refinance their primary residence or to borrow against the equity in their home. Residential mortgage loans are secured by a first or second mortgage on the customer's primary residence. Consumer loans include direct loans secured by and for the purchase of automobiles, recreational and marine equipment as well as other unsecured loans. Consumer loans also include indirect automobile loans made through primary dealers. Residential mortgage and consumer loans are made in accordance with underwriting policies we believe to be conservative and are fully documented. Credit scoring is assessed based on significant credit characteristics including credit history, residential and employment stability. Residential mortgage loans retained in the Company's portfolio are primarily composed of various mortgage programs to support customer relationships including jumbo mortgage loans, non-builder construction loans and special loan programs for high net worth individuals and certain professionals. Jumbo loans may be fixed or variable rate and are fully amortizing. Jumbo loans generally conform to government sponsored entity standards, except that the loan size exceeds maximums required under these standards. These loans generally require a minimum FICO score of 720 and a maximum debt-to-income ratio ("DTI") of $38 \%$. Loan-to-value ("LTV") ratios are tiered from $60 \%$ to $100 \%$, depending on the market. Special mortgage programs include fixed and variable fully amortizing loans tailored to the needs of certain healthcare professionals. Variable rate loans are fully indexed at origination and may have fixed rates for three to ten years, then adjust annually thereafter.

At September 30, 2014, residential mortgage loans included $\$ 198$ million of loans guaranteed by U.S. government agencies previously sold into GNMA mortgage pools. These loans either have been repurchased or are eligible to be repurchased by the Company when certain defined delinquency criteria are met. Although payments on these loans generally are past due more than 90 days, interest continues to accrue based on the government guarantee.

Home equity loans totaled $\$ 790$ million at September 30, 2014. Approximately, $69 \%$ of the home equity loan portfolio is comprised of first lien loans and $31 \%$ of the home equity portfolio is comprised of junior lien loans. Junior lien loans are distributed $72 \%$ to amortizing term loans and $28 \%$ to revolving lines of credit. Home equity loans generally require a minimum FICO score of 700 and a maximum DTI of $40 \%$. The maximum loan amount available for our home equity loan products is generally $\$ 400$ thousand. Revolving loans have a 5 year revolving period followed by a 15 year term of amortizing repayments. Interest-only home equity loans may not be extended for any additional revolving time. All other home equity loans may be extended at management's discretion for an additional 5 year revolving term, subject to an update of certain credit information.

Credit Commitments

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. At September 30, 2014, outstanding commitments totaled $\$ 7.7$ billion. Because some commitments are expected to expire before being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. BOK Financial uses the same credit policies in making commitments as it does loans.

The amount of collateral obtained, if deemed necessary, is based upon management's credit evaluation of the borrower.

- 76 -

Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Because the credit risk involved in issuing standby letters of credit is essentially the same as that involved in extending loan commitments, BOK Financial uses the same credit policies in evaluating the creditworthiness of the customer. Additionally, BOK Financial uses the same evaluation process in obtaining collateral on standby letters of credit as it does for loan commitments. The term of these standby letters of credit is defined in each commitment and typically corresponds with the underlying loan commitment. At September 30, 2014, outstanding standby letters of credit totaled $\$ 451$ million. Commercial letters of credit are used to facilitate customer trade transactions with the drafts being drawn when the underlying transaction is consummated. At September 30, 2014, outstanding commercial letters of credit totaled $\$ 5.1$ million.

## Allowances for Credit Losses

BOK Financial maintains an allowance for loan losses and an accrual for off-balance sheet credit risk. The accrual for off-balance sheet credit risk is maintained at a level that is appropriate to cover estimated losses associated with credit instruments that are not currently recognized as assets such as loan commitments, standby letters of credit or guarantees. As discussed in greater detail in Note 6, the Company also has separate accruals for off-balance sheet credit risk related to residential mortgage loans previously sold with full or partial recourse and for residential mortgage loans sold to government sponsored agencies under standard representations and warranties.

The appropriateness of the allowance for loan losses and accrual for off-balance sheet credit losses (collectively "allowance for credit losses") is assessed by management based on an on-going quarterly evaluation of the probable estimated losses inherent in the portfolio, including probable losses on both outstanding loans and unused commitments.

The allowance for loan losses consists of specific allowances attributed to impaired loans that have not yet been charged down to amounts we expect to recover, general allowances for unimpaired loans based on estimated loss rates by loan class and nonspecific allowances based on general economic conditions, risk concentration and related factors. There have been no material changes in the approach or techniques utilized in developing the allowance for loan losses and the accrual for off-balance sheet credit losses for the three and nine months ended September 30, 2014.

Loans are considered to be impaired when it becomes probable that BOK Financial will be unable to collect all amounts due according to the contractual terms of the loan agreements. Internally risk graded loans are evaluated individually for impairment. Substantially all commercial and commercial real estate loans and certain residential mortgage and consumer loans are risk graded based on evaluation of the borrowers' ability to repay. Certain commercial loans and most residential mortgage and consumer loans are small balance, homogeneous pools of loans that are not risk graded. Non-risk graded loans are identified as impaired based on performance status. Generally, non-risk graded loans 90 days or more past due or modified in a TDR or in bankruptcy are considered to be impaired.

Specific allowances for impaired loans are measured by an evaluation of estimated future cash flows discounted at the loans' initial effective interest rate or the fair value of collateral for certain collateral dependent loans. Collateral value of real property is generally based on third party appraisals that conform to Uniform Standards of Professional Appraisal Practice, less estimated selling costs. Appraised values are on an "as-is" basis and are generally not adjusted by the Company. Updated appraisals are obtained at least annually or more frequently if market conditions indicate collateral values have declined. Collateral value of mineral rights is generally determined by our internal staff of engineers based on projected cash flows under current market conditions. Collateral values and available cash resources that support impaired loans are evaluated quarterly. Historical statistics may be used as a practical way to estimate impairment in limited situations, such as when a collateral dependent loan is identified as impaired at the end of a reporting period, until an updated appraisal of collateral value is received or a full assessment of future cash flows is completed. Estimates of future cash flows and collateral values require significant judgments and may be volatile.

General allowances for unimpaired loans are based on estimated loss rates by loan class. The gross loss rate for each loan class is determined by the greater of the current gross loss rate based on the most recent twelve months or a ten-year gross loss rate. Recoveries are not directly considered in the estimation of loss rates. Recoveries generally do not follow predictable patterns and are not received until well after the charge-off date as a result of protracted legal actions. For risk graded loans, gross loss rates are adjusted for changes in risk grading. For each loan class, the current weighted average risk grade is compared to the long-term average risk grade. This comparison determines whether credit risk in each loan class is increasing or decreasing. Loss rates are adjusted upward or downward in proportion to changes in average risk grading. General allowances for unimpaired loans also consider inherent risks identified for each loan class. Inherent risks consider loss rates that most appropriately represent the current credit cycle and other factors attributable to specific loan classes which have not yet been represented in the gross loss rates or risk grading. These factors include changes in commodity prices or engineering imprecision, which may affect the value of reserves that secure our energy loan portfolio, construction risk that may affect commercial real estate loans, changes in regulations and public policy that may disproportionately impact health care loans and changes in loan products.

Nonspecific allowances are maintained for risks beyond factors specific to a particular loan or loan class. These factors include trends in the economy of our primary lending areas, concentrations in large balance loans and other relevant factors.

An accrual for off-balance sheet credit losses is included in Other liabilities in the Consolidated Balance Sheets. The appropriateness of this accrual is determined in the same manner as the allowance for loan losses.

A provision for credit losses is charged against or credited to earnings in amounts necessary to maintain an appropriate allowance for credit losses. Recoveries of loans previously charged off are added to the allowance when received.

The activity in the allowance for loan losses and the allowance for off-balance sheet credit losses related to loan commitments and standby letters of credit for the three months ended September 30, 2014 is summarized as follows (in thousands):

Loans are considered to be performing if they are in compliance with the original terms of the agreement, which is consistent with the regulatory guideline of "pass." Performing also includes loans considered to be "other loans especially mentioned" by regulatory guidelines. Other loans especially mentioned are in compliance with the original terms of the agreement but may have a weakness that deserves management's close attention. Performing loans also include past due residential mortgages that are guaranteed by agencies of the U.S. government.

The risk grading process identified certain criticized loans as potential problem loans. These loans have a well-defined weakness (e.g. inadequate debt service coverage or liquidity or marginal capitalization; repayment may depend on collateral or other risk mitigation) that may jeopardize liquidation of the debt and represent a greater risk due to deterioration in the financial condition of the borrower. This is consistent with the regulatory guideline for "substandard." Because the borrowers are still performing in accordance with the original terms of the loan agreements, these loans were not placed in nonaccruing status. Known information does, however, cause concern as to the borrowers' continued compliance with current repayment terms. Nonaccruing loans represent loans for which full collection of principal and interest is uncertain. This is substantially the same criteria used to determine whether a loan is impaired and includes certain loans considered "substandard" and all loans considered "doubtful" by regulatory guidelines.

The following table summarizes the Company's loan portfolio at September 30, 2014 by the risk grade categories (in thousands):

## Impaired Loans

Loans are considered to be impaired when it is probable that the Company will not be able to collect all amounts due according to the contractual terms of the loan agreement. This includes all nonaccruing loans, all loans modified in a TDR and all loans repurchased from GNMA pools.

A summary of impaired loans follows (in thousands):

Commercial real
estate:
Residential

| construction and land developmen | 18,953 | 14,634 | 14,490 | 144 | 57 | 14,890 | - | 16,006 | - |

Permanent
mortgage
$\begin{array}{llllllllll}\text { guaranteed by } & 204,807 & 198,488 & 198,488 & - & - & 194,882 & 2,089 & 189,820 & 6,279\end{array}$
U.S. government
agencies ${ }^{1}$
$\begin{array}{llllllllll}\text { Home equity } & 10,031 & 9,935 & 9,935 & - & - & 9,688 & - & 8,599 & - \\ & 259,234 & 243,560 & 243,385 & 175 & 107 & 238,615 & 2,518 & 233,127 & 7,346\end{array}$

Total residential mortgage

| Consumer | 597 | 580 | 580 | - | - | 673 | - | 900 | - |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Total | $\$ 338,987$ | $\$ 291,204$ | $\$ 286,943$ | $\$ 4,261$ | $\$ 3,348$ | $\$ 288,606$ | $\$ 2,518$ | $\$ 286,364$ | $\$ 7,346$ |

All permanent mortgage loans guaranteed by U.S. government agencies are considered impaired as we do not
${ }^{1}$ expect full collection of contractual principal and interest. At September 30, 2014, $\$ 3.8$ million of these loans were nonaccruing and $\$ 195$ million were accruing based on the guarantee by U.S. government agencies.

Generally, no interest income is recognized on impaired loans until all principal balances, including amounts charged-off, are recovered.

On February 28, 2014, the Company acquired GTRUST Financial Corporation ("GTRUST"), a Topeka-based independent trust and asset management company with approximately $\$ 631$ million of assets under management or custody at the date of acquisition.

On April 30, 2014, the Company acquired MBM Advisors, a Houston-based independent, full service retirement and pension plan investment firm and an SEC registered investment adviser with approximately $\$ 1.3$ billion of assets under management at the date of acquisition.

The purchase price for these acquisitions totaled approximately $\$ 27$ million including $\$ 23$ million paid in cash and $\$ 4$ million of contingent consideration. The purchase price allocation included $\$ 14$ million of identifiable intangible assets and $\$ 18$ million of goodwill. The pro-forma impact of these transactions was not material to the Company's consolidated financial statements.
(6) Mortgage Banking Activities

Residential Mortgage Loan Production
The Company originates, markets and services conventional and government-sponsored residential mortgage loans. Generally, conforming fixed rate residential mortgage loans are held for sale in the secondary market and non-conforming and adjustable-rate residential mortgage loans are held for investment. All residential mortgage loans originated for sale by the Company are carried at fair value based on sales commitments and market quotes. Changes in the fair value of mortgage loans held for sale are included in Other operating revenue - Mortgage banking revenue. Residential mortgage loans held for sale also includes the fair value of residential mortgage loan commitments and forward sale commitments which are considered derivative contracts that have not been designated as hedging instruments. The volume of mortgage loans originated for sale and secondary market prices are the primary drivers of originating and marketing revenue.

Residential mortgage loan commitments are generally outstanding for 60 to 90 days, which represents the typical period from commitment to originate a residential mortgage loan to when the closed loan is sold to an investor. Residential mortgage loan commitments are subject to both credit and interest rate risk. Credit risk is managed through underwriting policies and procedures, including collateral requirements, which are generally accepted by the secondary loan markets. Exposure to interest rate fluctuations is partially managed through forward sales of residential mortgage-backed securities and forward sales contracts. These latter contracts set the price for loans that will be delivered in the next 60 to 90 days.

The unpaid principal balance of residential mortgage loans held for sale, notional amounts of derivative contracts related to residential mortgage loan commitments and forward contract sales and their related fair values included in Mortgage loans held for sale on the Consolidated Balance Sheets were (in thousands):

|  | September 30, 2014 <br> Unpaid |  | December 31, 2013 <br> Unpaid |  | September 30, 2013 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Unpaid |  |
|  | Principal Balance/ Notional | Fair Value |  |  | Principal Balance/ Notional | Fair Value | Principal Balance/ Notional | Fair Value |
| Residential mortgage loans held for sale | \$360,126 | \$366,183 | \$ 192,266 | \$193,584 | \$220,800 | \$228,926 |
| Residential mortgage loan commitments | 537,975 | 8,480 | 258,873 | 2,656 | 351,196 | 10,948 |
| Forward sales contracts | 790,131 | (1,410 | ) 435,867 | 4,306 | 560,069 | (9,363 |
|  |  | \$373,253 |  | \$200,546 |  | \$230,511 |

No residential mortgage loans held for sale were 90 days or more past due or considered impaired as of September 30, 2014, December 31, 2013 or September 30, 2013. No credit losses were recognized on residential mortgage loans held for sale for the nine month periods ended September 30, 2014 and 2013.

Mortgage banking revenue was as follows (in thousands):

| Change in the fair value of mortgage loan commitments | $(5,136$ | $)$ | 12,657 | 5,824 |
| :--- | :--- | :--- | :--- | :--- |
| $(1,785$ |  |  |  |  |
| Change in the fair value of forward sales contracts | 5,839 | $(31,167$ | $)(5,716$ | $)(8,457$ |
| Total production revenue | 14,693 | 12,548 | 43,872 | 68,814 |
| Servicing revenue | 12,121 | 10,938 | 35,116 | 31,244 |
| Total mortgage banking revenue | $\$ 26,814$ | $\$ 23,486$ | $\$ 78,988$ | $\$ 100,058$ |

Production revenue includes gain (loss) on residential mortgage loans held for sale and changes in the fair value of derivative contracts not designated as hedging instruments related to residential mortgage loan commitments and forward sales contracts. Servicing revenue includes servicing fee income and late charges on loans serviced for others.

- 102 -

## Residential Mortgage Servicing

Mortgage servicing rights may be recognized when mortgage loans are originated pursuant to an existing plan for sale or, if no such plan exists, when the mortgage loans are sold. Mortgage servicing rights may also be purchased. Both originated and purchased mortgage servicing rights are initially recognized at fair value. The Company has elected to carry all mortgage servicing rights at fair value. Changes in the fair value are recognized in earnings as they occur. The unpaid principal balance of loans serviced for others is the primary driver of servicing revenue.

The following represents a summary of mortgage servicing rights (Dollars in thousands):

| September 30, | December 31, | September 30, |  |
| :--- | :--- | :--- | :--- |
| 2014 | 2013 | 2013 |  |
| 114,493 | 106,137 | 104,115 |  |
| $\$ 15,499,653$ | $\$ 13,718,942$ | $\$ 13,298,479$ |  |
| 4.33 | $\%$ | 4.40 | $\%$ |
| 295 | 292 | 2.42 | $\%$ |
|  |  |  | 292 |

Activity in capitalized mortgage servicing rights during the three months ended September 30, 2014 was as follows (in thousands):

- 103 -

Activity in capitalized mortgage servicing rights during the nine months ended September 30, 2013 was as follows (in thousands):

|  | Purchased | Originated | Total |
| :--- | :--- | :--- | :--- |
| Balance, December 31, 2012 | $\$ 12,976$ | $\$ 87,836$ | $\$ 100,812$ |
| Additions, net | - | 39,157 | 39,157 |
| Change in fair value due to loan runoff | $(2,504$ | $)$ | $(13,229$ |
| Change in fair value due to market changes | 4,341 | 12,286 | $(15,733$ |
| Balance, Sept. 30,2013 | $\$ 14,813$ | $\$ 126,050$ | $\$ 140,863$ |

Changes in the fair value of mortgage servicing rights are included in Other operating revenue in the Consolidated Statements of Earnings. Changes in fair value due to loan runoff are included in Mortgage banking costs. Changes in fair value due to market changes are reported separately. Changes in fair value due to market changes during the period relate to assets held at the reporting date.

There is no active market for trading in mortgage servicing rights after origination. Fair value is determined by discounting the projected net cash flows. Significant assumptions used to determine fair value based on significant unobservable inputs were as follows:

Discount rate - risk-free rate plus a market premium

| September 30, | December 31, | September 30, |
| :--- | :--- | :--- |
| 2014 | 2013 | 2013 |
| $10.17 \%$ | $10.21 \%$ | $10.23 \%$ |

Loan servicing costs - annually per loan based upon loan type:

| Performing loans | $\$ 60-\$ 105$ | $\$ 60-\$ 105$ | $\$ 58-\$ 105$ |
| :--- | :--- | :--- | :--- |
| Delinquent loans | $\$ 150-\$ 500$ | $\$ 150-\$ 500$ | $\$ 135-\$ 500$ |
| Loans in foreclosure | $\$ 1,000-\$ 4,250$ | $\$ 1,000-\$ 4,250$ | $\$ 875-\$ 4,250$ |
| Escrow earnings rate - indexed to rates paid on deposit | $1.95 \%$ | $1.80 \%$ | $1.54 \%$ | accounts with comparable average life

The Company is exposed to interest rate risk as benchmark residential mortgage interest rates directly affect the prepayment speeds used in valuing our mortgage servicing rights, which is partially managed through forward sales of residential mortgage-backed securities and forward sales contracts. A separate third party model is used to estimate prepayment speeds based on interest rates, housing turnover rates, estimated loan curtailment, anticipated defaults and other relevant factors. The prepayment model is updated daily for changes in market conditions and adjusted to better correlate with actual performance of BOK Financial's servicing portfolio.

Stratification of the residential mortgage loan servicing portfolio and outstanding principal of loans serviced for others by interest rate at September 30, 2014 follows (in thousands):

[^14]The interest rate sensitivity of our mortgage servicing rights and securities and derivative contracts held as an economic hedge is modeled over a range of $+/-50$ basis points. At September 30, 2014, a 50 basis point increase in

## Edgar Filing: BOK FINANCIAL CORP ET AL - Form 10-Q

mortgage interest rates is expected to increase the fair value of our mortgage servicing rights, net of economic hedge by $\$ 3.2$ million. A 50 basis point decrease in mortgage interest rates is expected to decrease the fair value of our mortgage servicing rights, net of economic hedge by $\$ 5.4$ million. In the model, changes in the value of servicing rights due to changes in interest rates assume stable relationships between residential mortgage rates and prepayment speeds. Changes in market conditions can cause variations from these assumptions. These factors and others may cause changes in the value of our mortgage servicing rights to differ from our expectations.

- 104 -

The aging status of our mortgage loans serviced for others by investor at September 30, 2014 follows (in thousands):

|  | Past Due <br> Current | 30 to 59 | 60 to 89 | 90 Days or <br> Days |
| :--- | :--- | :--- | :--- | :--- |
| Days | Total |  |  |  |
| $\$ 4,952,266$ | $\$ 37,051$ | $\$ 12,343$ | $\$ 31,874$ | $\$ 5,033,534$ |
| $4,957,520$ | 29,596 | 8,963 | 18,070 | $5,014,149$ |
| $4,748,226$ | 128,785 | 41,634 | 14,096 | $4,932,741$ |
| 505,623 | 5,473 | 2,555 | 5,578 | 519,229 |
| $\$ 15,163,635$ | $\$ 200,905$ | $\$ 65,495$ | $\$ 69,618$ | $\$ 15,499,653$ |

The Company has off-balance sheet credit risk related to residential mortgage loans sold to U.S. government agencies with recourse prior to 2008 under various community development programs. These loans consist of first lien, fixed-rate residential mortgage loans underwritten to standards approved by the agencies including full documentation and originated under programs available only for owner-occupied properties. However, these loans have a higher risk of delinquency and loss given default than traditional residential mortgage loans. The Company no longer sells residential mortgage loans with recourse other than obligations under standard representations and warranties. The recourse obligation relates to loan performance for the life of the loan and the Company is obligated to repurchase the loan at the time of foreclosure for the unpaid principal balance plus unpaid interest. The principal balance of residential mortgage loans sold subject to recourse obligations totaled $\$ 175$ million at September 30, 2014, \$191 million at December 31, 2013 and $\$ 198$ million at September 30, 2013. A separate accrual for these off-balance sheet commitments is included in Other liabilities in the Consolidated Balance Sheets totaling $\$ 8.3$ million at September 30, 2014, $\$ 10$ million at December 31, 2013 and $\$ 10$ million at September 30, 2013. At September 30, 2014, approximately $3 \%$ of the loans sold with recourse with an outstanding principal balance of $\$ 5.8$ million were either delinquent more than 90 days, in bankruptcy or in foreclosure and $5 \%$ with an outstanding balance of $\$ 9.1$ million were past due 30 to 89 days. The provision for credit losses on loans sold with recourse is included in Mortgage banking costs in the Consolidated Statements of Earnings.

The activity in the allowance for losses on loans sold with recourse included in Other liabilities in the Consolidated Balance Sheets is summarized as follows (in thousands):

Beginning balance
Provision for recourse losses
Loans charged off, net
Ending balance

| Three Months Ended   <br> September 30, Nine Months Ended  <br> 2014 2013  | September 30, |  |  |
| :--- | :--- | :--- | :--- |
| $\$ 8,690$ | $\$ 10,920$ | $\$ 9,562$ | 2013 |
| 93 | 576 | 260 | 228,158 |
| $(461$ | $)$ | $(1,055$ | $)$ |
| $\$ 8,322$ | $\$ 10,441$ | $\$ 8,322$ | $)$ |

The Company also has obligations to repurchase or provide indemnification for residential mortgage loans sold to government sponsored entities due to standard representations and warranties made under contractual agreements and to service loans in accordance with investor guidelines. The Company has established accruals for losses related to these obligations that are included in Other liabilities in the Consolidated Balance Sheets and in Mortgage banking costs in the Consolidated Statements of Earnings.

The level of repurchases and indemnifications related to standard representations and warranties has remained low. The Company repurchased nine loans from the agencies for $\$ 2.0$ million during the third quarter of 2014. There were no indemnifications on loans paid during the third quarter of 2014. Losses recognized on indemnifications and repurchases were insignificant.

A summary of unresolved deficiency requests from the agencies follows (in thousands, except for number of unresolved deficiency requests):

|  | September 30, | September 30, |
| :--- | :--- | :--- |
|  | 2014 | 2013 |
| Number of unresolved deficiency requests | 184 | 524 |
| Aggregate outstanding principal balance subject to unresolved deficiency requests | $\$ 15,548$ | $\$ 64,428$ |
| Unpaid principal balance subject to indemnification by the Company | 4,792 | 2,440 |

The activity in the accruals for mortgage losses is summarized as follows (in thousands).

| Three Months <br> Ended | Nine Months Ended |  |  |
| :--- | :--- | :--- | :--- |
| $\left.\begin{array}{llll}\text { September 30, } & \text { September 30, } \\ 2014 & 2013 & 2014 & 2013 \\ \$ 12,119 & \$ 9,508 & \$ 12,716 & \$ 8,983 \\ 1,122 & 1,804 & 2,475 & 4,111 \\ (3,486 & (222 & ) & (5,436\end{array}\right)$ | $(2,004)$ |  |  |
| $\$ 9,755$ | $\$ 11,090$ | $\$ 9,755$ | $\$ 11,090$ |

(7) Employee Benefits

BOK Financial has sponsored a defined benefit Pension Plan for all employees who satisfied certain age and service requirements. Pension Plan benefits were curtailed as of April 1, 2006. The Company recognized periodic pension expense of $\$ 149$ thousand and $\$ 500$ thousand for the three months ended September 30, 2014 and 2013, respectively and $\$ 446$ thousand and $\$ 1.5$ million for the nine months ended September 30, 2014 and 2013, respectively. The Company made no Pension Plan contributions during the three and nine months ended September 30, 2014 and 2013.

No minimum contribution is required for 2014.

- 106 -
(8) Commitments and Contingent Liabilities

Litigation Contingencies
As a member of Visa, BOK Financial is obligated for a proportionate share of certain covered litigation losses incurred by Visa under a retrospective responsibility plan. A contingent liability was recognized for the Company's share of Visa's covered litigation liabilities. Visa funded an escrow account to cover litigation claims, including covered litigation losses under the retrospective responsibility plan, with proceeds from its initial public offering in 2008 and from available cash.

BOK Financial currently owns 251,837 Visa Class B shares which are convertible into 103,782 shares of Visa Class A shares after the final settlement of all covered litigation. Class B shares may be diluted in the future if the escrow fund is not adequate to cover future covered litigation costs. Therefore, no value has been currently assigned to the Class B shares and no value may be assigned until the Class B shares are converted into a known number of Class A shares.

In the ordinary course of business, BOK Financial and its subsidiaries are subject to legal actions and complaints. Management believes, based upon the opinion of counsel, that the actions and liability or loss, if any, resulting from the final outcomes of the proceedings, will not have a material effect on the Company's financial condition, results of operations or cash flows.

## Alternative Investment Commitments

The Company sponsors two private equity funds and invests in several tax credit entities and other funds as permitted by banking regulations. Consolidation of these investments is based on the variable interest model determined by the nature of the entity. Variable interest entities are generally defined as entities that either do not have sufficient equity to finance their activities without support from other parties or whose equity investors lack a controlling financial interest. Variable interest entities are consolidated based on the determination that the Company is the primary beneficiary including the power to direct the activities that most significantly impact the variable interest's economic performance and the obligation to absorb losses of the variable interest or the right to receive benefits of the variable interest that could be significant to the variable interest.

BOKF Equity, LLC, an indirect wholly-owned subsidiary, is the general partner of two consolidated private equity funds ("the Funds"). The Funds provide alternative investment opportunities to certain customers, some of which are related parties, through unaffiliated limited partnerships. These unaffiliated limited partnerships generally invest in distressed assets, asset buy-outs or venture capital companies. As general partner, BOKF Equity, LLC has the power to direct activities that most significantly affect the Funds' performance and contingent obligations to make additional investments totaling $\$ 5.5$ million at September 30, 2014. Substantially all of the obligations are offset by limited partner commitments. The Company does not accrue its contingent liability to fund investments. The Volcker Rule in Title VI of the Dodd-Frank Act will limit both the amount and structure of these types of investments.

Consolidated tax credit investment entities represent the Company's interest in entities earning federal new market tax credits related to qualifying loans. The Company has the power to direct the activities that most significantly impact the variable interest's economic performance of the entity including being the primary beneficiary of or the obligation to absorb losses of the variable interest that could be significant to the variable interest.

The Company also has interests in various unrelated alternative investments generally consisting of unconsolidated limited partnership interests in or loans to entities for which investment return is primarily in the form of tax credits or that invest in distressed real estate loans and properties, energy development, venture capital and other activities. The Company is prohibited by banking regulations from controlling or actively managing the activities of these
investments and the Company's maximum exposure to loss is restricted to its investment balance. The Company's obligation to fund alternative investments is included in Other liabilities in the Consolidated Balance Sheets.

- 107 -

A summary of consolidated and unconsolidated alternative investments as of September 30, 2014, December 31, 2013 and September 30, 2013 is as follows (in thousands):

|  | September 30,2014 |  |  |  |  |

|  | Loans | Other | Other | Other | Non-controlling |
|  |  | assets | liabilities | borrowings | interests |

- 108 -

## Other Commitments and Contingencies

At September 30, 2014, Cavanal Hill Funds' assets included $\$ 1.1$ billion of U.S. Treasury, $\$ 1.2$ billion of cash management and $\$ 245$ million of tax-free money market funds. Assets of these funds consist of highly-rated, short-term obligations of the U.S. Treasury, corporate issuers and U.S. states and municipalities. The net asset value of units in these funds was $\$ 1.00$ at September 30, 2014. An investment in these funds is not insured by the Federal Deposit Insurance Corporation or guaranteed by BOK Financial or any of its subsidiaries. BOK Financial may, but is not obligated to purchase assets from these funds to maintain the net asset value at $\$ 1.00$. No assets were purchased from the funds in 2014 or 2013.

Cottonwood Valley Ventures, Inc. ("CVV, Inc."), an indirectly wholly-owned subsidiary of BOK Financial, is being audited by the Oklahoma Tax Commission ("OTC") for tax years 2007 through 2009. CVV, Inc. is a qualified venture capital company under the applicable Oklahoma statute. As authorized by the statute, CVV, Inc. guarantees transferable Oklahoma state income tax credits by providing direct debt financing to private companies which qualify as statutory business ventures. Due to certain statutory limitations on utilization of such credits, CVV, Inc. must sell the majority of the credits to provide the economic incentives provided for by the statute. During the third quarter of 2012, CVV, Inc. and credit purchasers settled the assessment related to the 2008 tax credits disallowed with no material adverse impact to the consolidated financial statements. Management does not anticipate that the remaining issue under audit will have a material adverse impact to the consolidated financial statements.

The Company agreed to guarantee rents totaling $\$ 29$ million through September of 2017 to the City of Tulsa as owner of a building immediately adjacent to the Bank's main office for space currently rented by third-party tenants in the building. All rent payments are current. Remaining guaranteed rents totaled $\$ 9.1$ million at September 30, 2014. In return for this guarantee, the Company will receive $80 \%$ of net cash flow as defined in an agreement with the City of Tulsa through September 2017 from rental of space that was vacant at the inception of the agreement. The maximum amount that the Company may receive under this agreement is $\$ 4.5$ million.

- 109 -
(9) Shareholders' Equity

On October 28, 2014, the Company declared a a quarterly cash dividend of $\$ 0.42$ per common share on or about December 1, 2014 to shareholders of record as of November 14, 2014.

Dividends declared were $\$ 0.40$ and $\$ 1.20$ per share during the three and nine months ended September 30, 2014, respectively. Dividends declared were $\$ 0.38$ and $\$ 1.14$ per share during the three and nine months ended September 30, 2013, respectively.

Accumulated Other Comprehensive Income (Loss)
AOCI includes unrealized gains and losses on available for sale ("AFS") securities and non-credit related unrealized losses on AFS securities for which an other-than-temporary impairment has been recorded in earnings. AOCI also includes unrealized gains on AFS securities that were transferred from AFS to investment securities in the third quarter of 2011. Such amounts are being amortized over the estimated remaining life of the security as an adjustment to yield, offsetting the related amortization of premium on the transferred securities. Unrealized losses on employee benefit plans will be reclassified into income as pension plan costs are recognized over the remaining service period of plan participants. Accumulated losses on the interest rate lock hedge of the 2005 subordinated debt issuance are being reclassified into income over the ten-year life of the debt. Gains and losses in AOCI are net of deferred income taxes.

A rollforward of the components of accumulated other comprehensive income (loss) is included as follows (in thousands):

Balance, December 31, 2012

[^15]Reportable segments reconciliation to the Consolidated Financial Statements for the nine months ended September 30, 2013 is as follows (in thousands):

[^16]Fair value is defined by applicable accounting guidance as the price to sell an asset or transfer a liability in an orderly transaction between market participants in the principal market for the given asset or liability at the measurement date based on market conditions at that date. Certain assets and liabilities are recorded in the Company's financial statements at fair value. Some are recorded on a recurring basis and some on a non-recurring basis.

For some assets and liabilities, observable market transactions and market information might be available. For other assets and liabilities, observable market transactions and market information might not be available. A hierarchy for fair value has been established which categorizes into three levels the inputs to valuation techniques used to measure fair value. The three levels are as follows:

Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1) - fair value is based on unadjusted quoted prices in active markets for identical assets or liabilities.

Significant Other Observable Inputs (Level 2) - Fair value is based on significant other observable inputs which are generally determined based on a single price for each financial instrument provided to us by an applicable third-party pricing service and is based on one or more of the following:

Quoted prices for similar, but not identical, assets or liabilities in active markets;
Quoted prices for identical or similar assets or liabilities in inactive markets;
Inputs other than quoted prices that are observable, such as interest rate and yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates;
Other inputs derived from or corroborated by observable market inputs.
Significant Unobservable Inputs (Level 3) - Fair value is based upon model-based valuation techniques for which at least one significant assumption is not observable in the market.

Transfers between levels are recognized as of the end of the reporting period. There were no transfers in or out of quoted prices in active markets for identical instruments to significant other observable inputs or significant unobservable inputs during the nine months ended September 30, 2014 and 2013, respectively. Transfers between significant other observable inputs and significant unobservable inputs during the three and nine months ended September 30, 2014 and 2013 are included in the summary of changes in recurring fair values measured using unobservable inputs.

The underlying methods used by the third-party pricing services are considered in determining the primary inputs used to determine fair values. Management has evaluated the methodologies employed by the third-party pricing services by comparing the price provided by the pricing service with other sources, including brokers' quotes, sales or purchases of similar instruments and discounted cash flows to establish a basis for reliance on the pricing service values. Significant differences between the pricing service provided value and other sources are discussed with the pricing service to understand the basis for their values. Based on all observable inputs, management may adjust prices obtained from third-party pricing services to more appropriately reflect the prices that would be received to sell assets or paid to transfer liabilities in orderly transactions in the current market. No significant adjustments were made to prices provided by third-party pricing services at September 30, 2014, December 31, 2013 or September 30, 2013.

Assets and Liabilities Measured at Fair Value on a Recurring Basis
The fair value of financial assets and liabilities that are measured on a recurring basis is as follows as of September 30, 2014 (in thousands):

Following is a description of the Company's valuation methodologies used for assets and liabilities measured on a recurring basis:
Securities
The fair values of trading, available for sale and fair value option securities are based on quoted prices for identical instruments in active markets, when available. If quoted prices for identical instruments are not available, fair values are based on significant other observable inputs such as quoted prices of comparable instruments or interest rates and credit spreads, yield curves, volatilities, prepayment speeds and loss severities.

The fair value of certain available for sale municipal and other debt securities may be based on significant unobservable inputs. These significant unobservable inputs include limited observed trades, projected cash flows, current credit rating of the issuers and, when applicable, the insurers of the debt and observed trades of similar debt. Discount rates are primarily based on reference to interest rate spreads on comparable securities of similar duration and credit rating as determined by the nationally-recognized rating agencies adjusted for a lack of trading volume. Significant unobservable inputs are developed by investment securities professionals involved in the active trading of similar securities. A summary of significant inputs used to value these securities follows. A management committee composed of senior members from the Company's Capital Markets, Risk Management and Finance departments assess the appropriateness of these inputs monthly.

## Derivatives

All derivative instruments are carried on the balance sheet at fair value. Fair values for exchange-traded contracts are based on quoted prices. Fair values for over-the-counter interest rate, commodity and foreign exchange contracts are based on valuations provided either by third-party dealers in the contracts, quotes provided by independent pricing services, or a third-party provided pricing model that uses significant other observable market inputs.

Credit risk is considered in determining the fair value of derivative instruments. Management determines fair value adjustments based on various risk factors including but not limited to counterparty credit rating or equivalent loan grading, derivative contract notional size, price volatility of the underlying commodity, duration of the derivative contracts and expected loss severity. Expected loss severity is based on historical losses for similarly risk graded commercial loan customers. Decreases in counterparty credit rating or grading and increases in price volatility and expected loss severity all tend to increase the credit quality adjustment which reduces the fair value of asset contracts. The reduction in fair value is recognized in earnings during the current period.

We also consider our own credit risk in determining the fair value of derivative contracts. Changes in our credit rating would affect the fair value of our derivative liabilities. In the event of a credit downgrade, the fair value of our derivative liabilities would increase. The change in the fair value would be recognized in earnings in the current period.
Residential Mortgage Loans Held for Sale
Residential mortgage loans held for sale are carried on the balance sheet at fair value. The fair values of residential mortgage loans held for sale are based upon quoted market prices of such loans sold in securitization transactions, including related unfunded loan commitments.

Other Assets - Private Equity Funds
The fair value of the portfolio investments of the Company's two private equity funds are based upon net asset value reported by the underlying funds, as adjusted by the general partner when necessary to represent the price that would be received to sell the assets. The Company's private equity funds provide customers alternative investment opportunities as limited partners of the funds. As fund of funds, the private equity funds invest in other limited partnerships or limited liability companies that invest substantially all of their assets in U.S. companies pursuing diversified investment strategies including early-stage venture capital, distressed securities and corporate or asset
buy-outs. Private equity fund assets are long-term, illiquid investments. No secondary market exists for these assets. The private equity funds typically invest in funds that provide no redemption rights to investors. The fair value of the private equity investments may only be realized through cash distributions from the underlying funds.

A summary of quantitative information about assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of September 30, 2014 follows (in thousands): Quantitative Information about Level 3 Recurring Fair Value Measurements

|  | Amortized |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Par | Cost/Unpaid Fair <br> Value | Valuation <br> Principal <br> Balance | Value | Technique(s) |$\quad$| Unobservable |
| :--- | Range | (Weighted Average) |
| :--- |

Available for sale
securities

Discounted cash flows developed using discount rates primarily based on reference to interest rate spreads for
${ }^{1}$ comparable securities of similar duration and credit rating as determined by the nationally-recognized rating agencies, adjusted for lack of trading volume.
${ }_{2}$ Interest rate yields used to value investment grade tax-exempt securities represent a spread of 482 to 514 basis points over average yields for comparable tax-exempt securities.
${ }^{3}$ Represents fair value as a percentage of par value.
${ }_{4}$ Interest rate yields used to value investment grade taxable securities based on comparable short-term taxable securities which are generally yielding less than $1 \%$.

The fair value of these securities measured at fair value using significant unobservable inputs are sensitive primarily to changes in interest rate spreads. At September 30, 2014, for tax-exempt securities rated investment grade by all nationally-recognized rating agencies, a 100 basis point increase in the spreads over average yields for comparable securities would result in an additional decrease in the fair value of $\$ 147$ thousand. For taxable securities rated
investment grade by all nationally-recognized rating agencies, a 100 basis point increase in the spreads over average yield for comparable securities would result in an additional decrease in the fair value of $\$ 59$ thousand.

Discounted cash flows developed using discount rates primarily based on reference to interest rate spreads for
${ }^{1}$ comparable securities of similar duration and credit rating as determined by the nationally-recognized rating agencies, adjusted for lack of trading volume.
${ }_{2}$ Interest rate yields used to value investment grade tax-exempt securities represent a spread of 462 to 517 basis points over average yields for comparable tax-exempt securities.
${ }^{3}$ Represents fair value as a percentage of par value.
${ }^{4}$ Fair value based on proposed settlement agreement between bond holders and issuer.
${ }_{5}$ Interest rate yields used to value investment grade taxable securities based on comparable short-term taxable securities which are generally yielding less than $1 \%$.
${ }_{6}$ Amortized cost reduced by other-than-temporary impairments recorded in earnings. See Note 2 for additional discussion.
7

## Edgar Filing: BOK FINANCIAL CORP ET AL - Form 10-Q

Fair value of shares of a smaller privately-held financial institution were valued using preliminary announced purchase information by a publicly-traded acquirer.

Fair Value of Assets and Liabilities Measured on a Non-Recurring Basis

Assets measured at fair value on a non-recurring basis include collateral for certain impaired loans and real property and other assets acquired to satisfy loans, which are based primarily on comparisons to completed sales of similar assets.

The following represents the carrying value of assets measured at fair value on a non-recurring basis (and related losses) during the period. The carrying value represents only those assets with a balance at September 30, 2014 for which the fair value was adjusted during the nine months ended September 30, 2014:

The following represents the carrying value of assets measured at fair value on a non-recurring basis (and related losses) during the period. The carrying value represents only those assets with a balance at September 30, 2013 for which the fair value was adjusted during the nine months ended September 30, 2013:

Fair Value Adjustments for the
Carrying Value at Sept. 30, 2013

|  | Quoted <br> Prices <br> in Active <br> Markets for <br> Identical <br> Instruments | Significant <br> Other <br> Observable <br> Inputs | Significant Unobservable Inputs | Recognized in: |  | Recognized |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Gross charge-offs against allowance for loan losses | Net losses and expenses of repossessed assets, net | Gross <br> charge-offs against allowance for loan losses | Net losses and expenses of repossessed assets, net |
| Impaired loans | \$- | \$ 10,607 | \$4,787 | \$660 | \$- | \$6,900 | \$- |
| Real estate and other repossessed assets |  | 14,901 | 170 | - | 1,767 | - | 2,560 |

The fair value of collateral-dependent impaired loans and real estate and other repossessed assets and the related fair value adjustments are generally based on unadjusted third-party appraisals. Our appraisal review policies require appraised values to be supported by observed inputs derived principally from or corroborated by observable market data. Appraisals that are not based on observable inputs or that require significant adjustments or fair value measurements that are not based on third-party appraisals are considered to be based on significant unobservable inputs. Non-recurring fair value measurements of collateral-dependent impaired loans and real estate and other repossessed assets based on significant unobservable inputs are generally due to estimates of current fair values between appraisal dates. Significant unobservable inputs include listing prices for the same or comparable assets, uncorroborated expert opinions or management's knowledge of the collateral or industry. These inputs are developed by asset management and workout professionals and approved by senior Credit Administration executives.

A summary of quantitative information about Non-recurring Fair Value Measurements based on Significant Unobservable Inputs (Level 3) as of September 30, 2014 follows (in thousands): Quantitative Information about Level 3 Non-recurring Fair Value Measurements

|  | Fair <br> Value | Valuation <br> Technique(s) | Unobservable Input | Range <br> (Weighted <br> Average) |

- 129 -

Because no market exists for certain of these financial instruments and management does not intend to sell these financial instruments, the fair values shown in the tables above may not represent values at which the respective financial instruments could be sold individually or in the aggregate at the given reporting date.

The following methods and assumptions were used in estimating the fair value of these financial instruments:
Cash and Cash Equivalents
The book value reported in the consolidated balance sheets for cash and short-term instruments approximates those assets' fair values.

## Securities

The fair values of securities are generally based on Significant Other Observable Inputs such as quoted prices for comparable instruments or interest rates and credit spreads, yield curves, volatilities, prepayment speeds and loss severities.

Loans
The fair value of loans, excluding loans held for sale, are based on discounted cash flow analyses using interest rates and credit and liquidity spreads currently being offered for loans with similar remaining terms to maturity and risk, adjusted for the impact of interest rate floors and ceilings which are classified as Significant Unobservable Inputs. The fair values of loans were estimated to approximate their discounted cash flows less loan loss allowances allocated to these loans of $\$ 163$ million at September 30, 2014, $\$ 157$ million at December 31, 2013 and $\$ 153$ million at September 30, 2013.

Deposits
The fair values of time deposits are based on discounted cash flow analyses using interest rates currently being offered on similar transactions which are considered Significant Unobservable Inputs. Estimated fair value of deposits with no stated maturity, which includes demand deposits, transaction deposits, money market deposits and savings accounts, is equal to the amount payable on demand. Although market premiums paid reflect an additional value for these low cost deposits, adjusting fair value for the expected benefit of these deposits is prohibited. Accordingly, the positive effect of such deposits is not included in the tables above.

Other Borrowings and Subordinated Debentures
The fair values of these instruments are based upon discounted cash flow analyses using interest rates currently being offered on similar instruments which are considered Significant Unobservable Inputs.

## Off-Balance Sheet Instruments

The fair values of commercial loan commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements. The fair values of these off-balance sheet instruments were not significant at September 30, 2014, December 31, 2013 or September 30, 2013.
Fair Value Election
As more fully disclosed in Note 2 and Note 6 to the Consolidated Financial Statements, the Company has elected to carry all residential mortgage-backed securities which have been designated as economic hedges against changes in
the fair value of mortgage servicing rights, certain corporate debt securities economically hedged by derivative contracts to manage interest rate risk and all residential mortgage loans originated for sale at fair value. Changes in the fair value of these financial instruments are recognized in earnings.

- 130 -
(13) Federal and State Income Taxes

The reconciliations of income (loss) attributable to continuing operations at the U.S. federal statutory tax rate to income tax expense are as follows (in thousands):

(14) Subsequent Events

The Company evaluated events from the date of the consolidated financial statements on September 30, 2014 through the issuance of those consolidated financial statements included in this Quarterly Report on Form 10-Q. No events were identified requiring recognition in and/or disclosure in the consolidated financial statements.

Yield calculations are shown on a tax equivalent at the statutory federal and state rates for the periods presented. The yield calculations exclude security trades that have been recorded on trade date with no corresponding interest income and the unrealized gains and losses. The yield calculation also includes average loan balances for which the accrual of interest has been discontinued and are net of unearned income. Yield / rate calculations are generally based on the conventions that determine how interest income and expense is accrued.

PART II. Other Information
Item 1. Legal Proceedings
See discussion of legal proceedings at Note 8 to the Consolidated Financial Statements.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
The following table provides information with respect to purchases made by or on behalf of the Company or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of the Company's common stock during the three months ended September 30, 2014.

| Period | Total | Average | Total |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Number of Shares | Maximum <br> Number of |
|  | Number of |  | Purchased as | Shares that |
|  |  | Price Paid | Part of | May Yet Be |
|  | Purchased ${ }^{2}$ | per Share | Publicly | Purchased |
|  |  |  | Announced | Under the |
|  |  |  | Plans or | Plans |
|  |  |  | Programs ${ }^{1}$ |  |
| July 1 to July 31, 2014 | - | \$- | - | 1,960,504 |
| August 1 to August 31, 2014 | 16,004 | \$67.65 | - | 1,960,504 |
| September 1 to September 30, 2014 | 96 | \$66.88 | - | 1,960,504 |
| Total | 16,100 |  | - |  |

On April 24, 2012, the Company's board of directors authorizing the Company to repurchase up to two million
${ }^{1}$ shares of the Company's common stock. As of September 30, 2014, the Company had repurchased 39,496 shares under this plan.
${ }_{2}$ The Company routinely repurchases mature shares from employees to cover the exercise price and taxes in connection with employee stock option exercises.

## Item 6. Exhibits

31.1 Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32 Certification of Chief Executive Officer and Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as
Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
Interactive data files pursuant to Rule 405 of Regulation S-T: (i) the Consolidated Balance Sheets, (ii) the 101 Consolidated Statements of Earnings, (iii) the Consolidated Statements of Changes in Equity, (iv) the Consolidated Statement of Cash Flows and (v) the Notes to Consolidated Financial Statements

Items 1A, 3, 4 and 5 are not applicable and have been omitted.

## Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
